Subject: Incentive-Based Compensation

Comments:

Bring regulation back into banking and separate banking from investment sectors. Do entirely away with "too big to fail," which breeds shortsightedness and encourages foolish and mismanaged growth at taxpayers' expense. These organizations keep on getting A rated for investment because no matter what they do they will not sink. But the rest of us have been sinking economically and will continue to do so. Also, don't allow mega-corporations to control government!
