Subject: Incentive-Based Compensation

---

Comments:

When a crime occurs, it must be dealt with; a just society can function in no other way.

The greed and unscrupulous practices of the members of Wall St, who were complacent in their behavior, must be addressed. I know that our hopes and dreams are now in a different place because the money that would be used for retirement is gone. I know that my health has deteriorated because of the stress ( 2nd occurrence of breast cancer) and I know that it is my responsibility to speak out and call for justice. Please look on the issue of incentives so that justice has a chance to play out. Allowing the default swaps to continue only prolongs their gambling. It is time to clear the field and restore integrity. Thank you for considering my comments.

Thank you for considering my comment,
