

From: Lawrence York
Proposal: 1432 (RIN 7100 AD 82) Reg. V V - Proprietary Trading and Certain Interests In, and Relationships
Subject: Volcker Rule -- Prohibitions and Restrictions on Proprietary Trading and Certain Interests In, and R

Comments:

Dear Sir/Ms:

I am very concerned that Wall Street has infiltrated Treasury and the Fed to the detriment of our Financial System. We need the Volker Rule and we need to separate regulation of the banks from the Treasury Dept. Over the years they have managed through their cozy relationships and lobbying efforts to exempt themselves from security laws, have a different set accounting rules, choose their own regulators, and thumb their noses at all of us getting bailouts.

For Christ's sake and that of the nation, do the right thing and toughen the rules while making them fair for everyone.

Lawrence York
