

From: William Carder
Proposal: 1432 (RIN 7100 AD 82) Reg. V V - Proprietary Trading and Certain Interests In, and Relationships
Subject: Volcker Rule -- Prohibitions and Restrictions on Proprietary Trading and Certain Interests In, and R

Comments:

We need a strong version of the Volker rule that approaches what Glass-Steagall did so successfully until it's repeal. Many of us who live in the main street economy believe that derivatives are weapons of wealth destruction only accessible to the 1% that offer little real value to the economy, increase systemic risk, and reduce the amount of money available for investment in the real economy.
