

From: Margaret Campbell  
Proposal: 1432 (RIN 7100 AD 82) Reg. V V - Proprietary Trading and Certain Interests In, and Relationships  
Subject: Volcker Rule -- Prohibitions and Restrictions on Proprietary Trading and Certain Interests In, and R

---

Comments:

Look, I am a capitalist at heart. I spent 30 years in business with the last 10 in consulting. I made lots and lots of money. I get it! BUT, if a bank wants to gamble then they shouldn't be backstopped by MY tax dollars. They should go be a hedge fund. A bank that is federally insured should not be able to gamble money, period, end of discussion.

Two things need to happen:

- 1) you need to break up the TBTF banks
- 2) implement a strong Volcker Rule a la Glass-Steagall

Tell the banks: you want to gamble, fine, go be a hedge fund and use someone else's dollars.

Thank You,

Margaret Campbell
