Re: Basel III Capital Proposals

Ladies and Gentlemen:

Thank you for the opportunity to provide comment on the Basel III proposals<sup>1</sup> that were recently issued for public comment by the Federal Reserve Board, the Office of the Comptroller of the Currency, and the Federal Deposit Insurance Corporation.

Community banks operate a relationship-based business that is specifically designed to serve customers in our communities on a long-term basis. This model contributes to the success of community banks all over the United States through practical, common sense approaches to managing risk. Community banks should be allowed to continue using the current Basel I framework for computing their capital requirements. Basel III was designed to apply to the largest, internationally active, banks and not to community banks. As you know, community banks did not engage in the highly leveraged activities that severely depleted capital levels of the largest banks and created panic in the financial markets. The largest banks operate purely on transaction volume and pay little attention to the customer relationship. This difference in banking models demonstrates the need to place tougher capital standards exclusively on the largest banks to better manage the ability to absorb losses.

Sincerely,

Allan R Tormohlen  
VP/Commercial Loan Officer

---

<sup>1</sup> The proposals are titled: *Regulatory Capital Rules: Regulatory Capital, Implementation of Basel III, Minimum Regulatory Capital Ratios, Capital Adequacy, and Transition Provisions; Regulatory Capital Rules: Standardized Approach for Risk-weighted Assets; Market Discipline and Disclosure Requirements; and Regulatory Capital Rules: Advanced Approaches Risk-based Capital Rules; Market Risk Capital Rule.*
