Your comment: The Federal Reserve Banks are gearing up for Account Services application changes. We plan to enhance our Account Services by replacing the mainframe-based Integrated Accounting System (IAS) with the Enterprise Accounting System (EASy) distributed application, which will position us to better serve a full range of customers and improve time-to-market with new services going forward. The EASy production implementation is tentatively scheduled to take place in the fourth quarter of 2013 and will result in changes to our Account Management Information (AMI) application that is available via the FedLine Web? and FedLine Advantage? access solutions.
