I recently read that you are considering, or have already, moving the stress test reporting due date from January 5 to April 5. The reason is because several bankers have complained about having to work hard during the holidays. I find this to be absolutely absurd. It is bad enough that every law and policy in this country is made by businesses and high ranking executives. Those of us that actually work for a living and can barely pay our bills have to work hard during the holidays, but the executives don't care at all about us. Do not make this change, tell them to suck it up and actually put in some work for the millions of dollars that they get paid. If they truly have a problem, I'll help them out for a portion of their ridiculous wages. You are one of the few government agencies that actually has the power to help the average American and show that it is the people that run this country. Please do not become yet another puppet of big corporate money that bends to will of every rich person that cries loudly enough.
