

ClearingandSettlement.com

CONFIDENTIAL

11.18

Clearing and settlement is the only sector to be mandated worldwide since WWII:

- [G20 2009 Pittsburgh](#)
- [Dodd-Frank Act 2010](#)
- [European Markets Infrastructure Reform \(EMIR\)](#)

Our domain name is aligned with global regulations, investors and Wall Street service providers.

Our business:

Cyber is important to everything we do. The securities traded on regulated markets across the globe may total above 70T, but the fragmented securities and other assets that are not traded on the regulated markets may total above 200T and is lacking of a central market for true price discovery. We provide a non-regulated, US based, [Web 2.0](#) community where self-directed investors may post and trade information about transactions for virtually any asset.

Our global community centralizes fragmented assets, investors and licensed Wall Street service providers for negotiated transactions. It also features our [limited social media](#), industry news, videos and more.

Integrated into our community is an information exchange system where our registered members may post their content, Indications of Interest (IOI), and send messages to other members for further negotiations.

Our participating service providers, with their best efforts, may support our community offering their pre and or post trade services.

Companies may keep their debt and shareholders informed by [posting their press releases and corporate announcements in our social media](#).

Our opportunity

Wall Street remains highly regulated and may never provide a ubiquitous Web 2.0 community for price discovery.

ClearingandSettlement.com simply guarantees our self-directed trading members *the opportunity* for liquidity. Our members may post IOI and freely access our global directory of service providers that advertise their pre and or post trade services throughout our community.

Our neutral community specifically provides for self-directed members to enjoy Peer to Peer (P2P) negotiated transactions for virtually all types of public and private securities and all other assets. There are no regulated activities associated with our community and we do not compete against our participating members, service providers or regulated markets. We welcome the unlimited participation of licensed and bonded Wall Street service providers to support our members with their competitive services.

Currently featured in our expanding global directory of service providers is [Atree Custody](#), [CSOB](#), [KDPW](#) and others.

Features of our community:

- A classic Web 2.0 community, for *secondary trades only*.
- A non-regulated, horizontal community of global choice, operating without favor to any asset class, investor or licensed service provider.
- Centralization of virtually all types of public and private securities and other assets, investors and licensed service providers.
 - [Limited social media](#).
 - Post corporate and public announcements for shareholders and lenders.
- Companies may shape their message, with videos throughout our community.
- Inclusive, globally accessible, and without geographic restrictions.
- We are focused upon earning our income from advertising fees and the future development of other registered domain names such as .eth, .asia, .africa, .eu, and .cn.

The benefits to our featured service providers:

- A qualified Web 2.0 community for unlimited Wall Street participation.
- A competitive and neutral community.
- Economized marketing.
- Quickly enter new markets, forge closer ties with Africa, Asia, Europe and elsewhere.
- Improved communication effectiveness and minimizing risk for key constituents.
- Our community is focused upon expanding the sales of our participating service providers, aggregating and referring our members to qualified, licensed and bonded service providers.

The benefits to our members:

- Members are self-directed throughout our community.
- Negotiated P2P transactions, offers the best price discovery.
- Unlimited social media and combined with negotiated price discovery.
- Global distribution of IOI.
- No membership or posting fees.
- Tokens may be traded immediately within our community.

Pre & post-trade service providers:

- Attorneys
- Blockchain networks
- Broker-dealers
- Clearing and settlement providers
- Custodians
- Escrow agents
- Prime brokers
- Transfer agents
- Trust companies
