

Proposal: 1723 (AF94) Reg BB - Community Reinvestment Act

Description:

---

Comment ID: 137684

From: Milwaukee Christian Center, Karen Higgins

Proposal: 1723 (AF94) Reg BB - Community Reinvestment Act

Subject: R-1723 Community Reinvestment Act

---

Comments:

Date:Feb 15, 2021

Proposal:Regulation BB: Community Reinvestment Act [R-1723]

Document ID:R-1723

Revision:1

First name:Karen

Middle initial:

Last name:Higgins

Affiliation (if any):Milwaukee Christian Center (MCC) Please note we are not a religious organization

Affiliation Type:Other (Oth)

Address line 1:807 SOUTH 14TH STREET

Address line 2:

City:MILWAUKEE

State:Wisconsin

Zip:53204

Country:UNITED STATES

Postal (if outside the U.S.):

Your comment:Docket Number R-1723 and RIN Number 7100-AF94

To Whom it May Concern:

The Federal Reserve Board (Fed) must strengthen CRA exams in order to promote recovery from the COVID-19 pandemic. The Fed has described approaches in its Advance Notice of Proposed Rulemaking (ANPR) on CRA that will make CRA exams more objective. Yet, questions remain about whether the Fed's approach will make grading tougher. If nearly every bank continues to pass their CRA exams, banks will not engage in serious efforts to help communities of color and low- and moderate-income (LMI) neighborhoods recover from the pandemic.

Milwaukee Christian Center (MCC) is an organization whose mission is to build strong neighborhoods full of opportunity. We have a Federally funded housing program that builds and rehabilitates homes for low to moderate income families in the City of Milwaukee. In the last 15 years we have built over 46 new homes. We believe strong neighborhoods offer safe, and affordable housing for ALL their residents. Our agency, along with working on housing, has consistently during the pandemic worked to provide essential resources for families to access to stay safe and well through our food pantry, older adult outreach, and youth programming. This has been essential as our communities have been hard hit with COVID and struggle to recover from its effects. These effects include loss of employment and health issues.

NCRC recently released a report finding a strong relationship between redlining and susceptibility to COVID. Redlined neighborhoods have the highest levels of health conditions such as asthma, diabetes and kidney disease, which make residents more susceptible to COVID-19. Life expectancy is almost four years lower in the redlined communities.

Since the start of the pandemic, about 41% of African American businesses have been closed compared to just 17% of White-owned small businesses. Discrimination in lending contributes to these differences in survival rates. A NCRC investigation found that African Americans applying for Paycheck Protection Program (PPP) loans for their small businesses during the pandemic were likely to receive less information than Whites.

CRA must be strengthened in order to combat discrimination. The Fed emphasizes improving the performance measures on CRA exams including those used on the lending test that compare a bank's percent of loans to LMI borrowers to other lenders. The Fed does not describe in detail the impact of its reforms on CRA ratings except to hint that banks may continue to receive the same grades.

Moreover, the Fed is proposing to reduce the number of ratings on a state level and on subtests from five to four. This proposal would result in fewer distinctions in performance whereas new CRA exams must reveal more distinctions in order to motivate banks to be more responsive to COVID-19 recovery needs. Five ratings must be retained on the state level and on subtests.

The Fed asks whether underserved areas should be designated based on high levels of poverty or low levels of retail lending. NCRC advocated an approach based on low levels of lending which would effectively target redlined neighborhoods and communities of color.

We also ask the Fed to consider explicitly including race on CRA exams. The agencies have hesitated to do so but we believe that the CRA statute allows this since the law emphasizes banks meeting credit needs in all communities, but particularly underserved ones. CRA exams could include performance measures assessing lending, investing, branching and services to people of color and communities of color. The Fed could also provide CRA consideration for lending and investing in majority minority census tracts outside of assessment areas just as the Fed is considering for Indian reservations and other underserved areas.

In the interest of reaching underserved areas, we strongly support the Fed's proposals to improve data collection including community development financing data, which would better enable stakeholders to determine communities most in need.

We support the Fed's proposals to expand assessment areas, which are geographical areas on CRA exams. In addition to areas around branches, assessment areas must also include areas outside of branches with significant amounts of bank lending or deposit taking.

We do not support expanding financial education to any income since LMI consumers and people of color are most likely to be unbanked as revealed by surveys of the Federal Deposit Insurance Corporation (FDIC). Likewise, the Fed should further develop its procedures for awarding CRA credit for financing affordable housing that is unsubsidized so that such financing actually serves LMI residents.

Finally, we applaud the Fed proposal to eliminate distinctions in the rigor of examination among assessment areas that have resulted in banks neglecting smaller cities, rural counties and Native American reservations.

We appreciate the direction the Fed has embarked upon but caution that it must not end up with proposals that replicate existing CRA ratings inflation as this will not help our communities devastated by COVID-19.
