Postal (if outside the U.S.):

Your comment: Mr Chairman It is completely outrageous and irresponsible for you and Janet yellen to throw political hand grenades at the entire cryptocurrency ecosphere... At worst Bitcoin is a very well regulated commodity and deserves a cogent and well thought out response. As a chairman of the Federal reserve words have power and you have caused severe wreckage for investors in this financial instrument. Clearly you and Janet yellen want to cause chaos rather than represent the interests of millions of Americans and people around the world. You should be ashamed.
