Proposal: 1786 (AG44) Resolution Related Resource for Large Banking Organizations

Subject: Resolution-Related Resource Requirement for Large Banking Organizations

---

Comments:

NONCONFIDENTIAL // EXTERNAL

So you're privatizing profits and socializing losses.

You're .... doing it again. That 2008 thing. 80trillion in swaps, a number no human can grasp, hidden for months, and now released.

I mean. We expected this. What will happen this year 2023 is China will attack Taiwan, and the U.S. will sanction China. Then the banks and economy will experience a shock unseen in a generation. After that, the corrupt banking system will collapse, again. Stocks this time really. Then this buffer bill will kill retirement for Americans. After that, you'll probably bail out the banks again that were practicing illegal activity. Who knows after that.

Why am I writing? Maybe if you guys actually regulated and jailed corrupt bankers this would have been prevented. No bank can ever fail right? Ha. You have no ownership over your actions, just excuses. No solutions, only greed. We are Russia now. These events pass, and we know what will happen.

I'm not writing to argue against the bill any more. I'm saying that you chose this. Individual investors, "dumb money", all know.
