Postal (if outside the U.S.):

Your comment: Letting these banks make "risky" FOMO plays such as "forever fails with infinite risks" have to be reined in for ALL capital fairness! Why not just let them take it to the casino and place it all on green? These institutions continue to buy their way out in egregiously bad dumping positions through regulation controls/favortism/or illegal and non-enforced compliance efforts of regulators! When will the sharades and financial terrorism of these mafia style controls they demand be stopped to protect non-monopoly market equality?
