## Combined Quarterly Financial Report

Unaudited

June 30, 2025

The Federal Reserve System is the central bank of the United States. It performs five key functions to promote the effective operation of the U.S. economy and, more generally, the public interest.

#### The Federal Reserve

- **conducts the nation's monetary policy** to promote maximum employment, stable prices, and moderate long-term interest rates in the U.S. economy;
- **promotes the stability of the financial system** and seeks to minimize and contain systemic risks through active monitoring and engagement in the U.S. and abroad;
- **promotes the safety and soundness of individual financial institutions** and monitors their impact on the financial system as a whole;
- **fosters payment and settlement system safety and efficiency** through services to the banking industry and U.S. government that facilitate U.S.-dollar transactions and payments; and
- **promotes consumer protection and community development** through consumer-focused supervision and examination, research and analysis of emerging consumer issues and trends, community economic development activities, and administration of consumer laws and regulations.

# Overview

The Federal Reserve supplements the release of its annual financial statements with three quarterly financial reports to summarize the unaudited combined financial position and results of operations of the 12 Reserve Banks. The combined financial information reported includes the accounts and results of operations of each Reserve Bank and a consolidated variable interest entity.

The report contains

- the [combined statements](#) of condition, operations, and changes in capital; and
- eight explanatory notes that provide [supplemental financial information](#) for line items in the combined quarterly statements.

For more information about Federal Reserve Board financial statements and reporting, visit our website at <https://www.federalreserve.gov/aboutthefed/fed-financial-statements.htm>. For more information about how the Federal Reserve Board supervises Federal Reserve Bank operations, see the "Payment System and Reserve Bank Oversight" section of our latest Annual Report (<https://www.federalreserve.gov/publications/annual-report.htm>).

The following unaudited financial statements—for the quarter-ended June 30, 2025—summarize the combined financial position and results of operations of the 12 Federal Reserve Banks. The notes cited in the financial statements provide [supplemental financial information](#) for specific line items.

# Supplemental Financial Information

## (1) Loans

### Loans to Depository Institutions

The Board of Governors authorized the Reserve Banks to offer primary, secondary, and seasonal credit extensions to eligible borrowers under section 10B of the Federal Reserve Act (FRA). Primary loans provide discount window credit for periods up to 90 days, secondary loans are extended on a short-term basis, typically overnight, and seasonal loans may be extended for a period of up to nine months.

### Other Loans

The Board of Governors authorized the Bank Term Funding Program (BTFP) under section 13(3) of the FRA to offer advances up to one year in length to banks, savings associations, credit unions, and other eligible depository institutions to help assure eligible institutions had the ability to meet the needs of all their depositors. The Treasury, using the Exchange Stabilization Fund, made available \$25 billion as credit protection to the BTFP. The BTFP's authority to extend new loans ended March 11, 2024, and all remaining loans were repaid on March 7, 2025.

The Board of Governors authorized the Paycheck Protection Program Liquidity Facility (PPPLF) under section 13(3) of the FRA to support the flow of credit to households and businesses. The PPPLF program extended credit to eligible financial institutions that participate in the Small Business Administration's (SBA) Paycheck Protection Program, taking the loans as collateral at face value. The PPPLF's authority to extend new loans ended July 30, 2021.

The amounts outstanding at June 30, 2025, and December 31, 2024, for loans to depository institutions and other loans were as follows (in millions):

<sup>1</sup> A component of PPPLF loans presented in the "Within 15 days" column has reached contractual maturity and collection is expected based upon the terms of the PPPLF.

The Reserve Banks estimate the allowance for credit losses using the current expected credit loss (CECL) methodology. At June 30, 2025, and December 31, 2024, the Reserve Banks had no loans that were past due and determined to be non-performing, or on non-accrual status. No allowance for credit losses was recorded at June 30, 2025, and December 31, 2024.

## (2) System Open Market Account (SOMA) Holdings

Treasury securities, federal agency and government-sponsored enterprise (GSE) mortgage-backed securities (MBS), and GSE debt securities are reported at amortized cost in the Combined statements of condition. SOMA portfolio holdings at June 30, 2025, and December 31, 2024, were as follows:

The Federal Reserve Bank of New York (FRBNY) may engage in purchases of securities under agreements to resell (repurchase agreements) with primary dealers and eligible counterparties and with foreign official account holders under the Foreign and International Monetary Authorities (FIMA) Repo Facility. The FRBNY may also engage in sales of securities under agreements to repurchase (reverse repurchase agreements) with primary dealers and with a set of expanded counterparties that includes banks, savings associations, GSEs, and domestic money market funds. Reverse repurchase agreements may also be executed with foreign official and international account holders as part of a service offering. Financial information related to repurchase agreements and reverse repurchase agreements held in the SOMA at June 30, 2025, and December 31, 2024, was as follows:

Federal agency and GSE residential MBS (RMBS) and commercial MBS (CMBS) are reported at stated maturity in table 6. Stated maturity differs from the estimated weighted-average life of RMBS and CMBS because it factors in scheduled payments and prepayment assumptions. The estimated weighted-average lives of RMBS and CMBS are reported in table 6a as of June 30, 2025, and December 31, 2024, respectively:

At June 30, 2025, and December 31, 2024, the fair value of foreign currency denominated investments held in the SOMA was \$19,592 million and \$17,360 million, respectively.

Because of the global character of bank funding markets, the Federal Reserve System has, at times, coordinated with other central banks to provide liquidity. The Federal Open Market Committee (FOMC) authorized and directed the FRBNY to maintain standing U.S. dollar liquidity swap arrangements with the Bank of Canada, the Bank of England, the Bank of Japan, the European Central Bank, and the Swiss National Bank in order to provide U.S. dollar liquidity to foreign markets.

Euros held in the SOMA under U.S. dollar liquidity swaps at June 30, 2025, and December 31, 2024, were \$37 million and \$1,120 million, respectively, and matured within 15 days of each period.

<sup>2</sup> Realized gains (losses), net for federal agency and GSE MBS are reported in "Other items of income (loss): System Open Market Account: Federal agency and government-sponsored enterprise mortgage-backed securities losses, net" in the Combined statements of operations.

<sup>3</sup> Because SOMA securities are recorded at amortized cost, the change in the cumulative unrealized gains (losses) is not reported in the Combined statements of operations.

### (3) Consolidated Variable Interest Entity (VIE)

In response to the coronavirus pandemic that began in 2020, the Board of Governors authorized lending facilities under section 13(3) of the FRA to support the flow of credit to households and businesses. The combined financial statements include the accounts and results of operations of a consolidated VIE, MS Facilities 2020 LLC (Main Street). A Reserve Bank consolidates a VIE if it has a controlling financial interest. The Reserve Bank that is a controlling member extended a loan to Main Street under the authority of section 13(3) of the FRA. Intercompany balances and transactions are eliminated in consolidation. Pursuant to the Coronavirus Aid, Relief, and Economic Security Act (CARES Act), the Treasury provided credit protection to the limited liability company (LLC) and is a non-controlling member of Main Street. The assets of the VIE and the amounts provided by the Treasury as credit protection are used to secure the loan from the Reserve Bank.

Main Street supported small and medium-sized businesses and nonprofit organizations that were in sound financial condition before the onset of the pandemic through the purchase of loan participations. Main Street's authority to purchase assets ended on January 8, 2021. Semiannually, Main Street returns a portion of the Treasury's equity investment, as reported in table 13.

The classification of assets and liabilities of the consolidated VIE as of June 30, 2025, and December 31, 2024, respectively, are as follows:

<b>Table 11. Net portfolio assets and liabilities of Main Street</b> (in millions)		June 30, 2025	December 31, 2024
<b>Assets</b>			
Cash and cash equivalents <sup>1</sup>		\$ 811	\$ 1,250

<b>Total assets, net</b>		<b>\$ 5,095</b>	<b>\$ 7,996</b>
<b>Liabilities</b>			
<b>Net assets and liabilities</b>		<b>\$ 5,076</b>	<b>\$ 7,968</b>

<sup>1</sup> Includes \$445 million and \$647 million of cash equivalents and \$366 million and \$603 million of cash, as of June 30, 2025, and December 31, 2024, respectively.

<sup>2</sup> Represents the portion of the Treasury preferred equity contribution to the credit facilities, which are held as short-term investments in non-marketable securities at amortized cost and the related earnings on those investments.

<sup>3</sup> Reported at principal amount outstanding, net of allowance, charge-offs, and recoveries and including interest.

Under the CECL methodology, loan participations with similar risks are collectively assessed for expected credit losses whereas loan participations with different risks are individually assessed. A loan participation is placed on non-accrual status if it is 90 days past due, or earlier, based on credit indicators. There were \$378 million and \$277 million in loan participations that were 90 days or greater past due as of June 30, 2025, and December 31, 2024, respectively. The principal exposure of loan participations in non-accrual status as of June 30, 2025, and December 31, 2024, was \$0.7 billion and \$1.0 billion, respectively. The evaluation of loan participations purchased by Main Street, including those in non-accrual status, resulted in recording a credit loss allowance of \$0.6 billion and \$0.7 billion as of June 30, 2025, and December 31, 2024, respectively. Main Street realized principal and interest losses, net of subsequent recoveries, of \$102 million and \$280 million for charge-offs during the six months ended June 30, 2025, and June 30, 2024, respectively.

In certain cases, when a borrower experiences significant financial difficulties and is unable to meet its financial obligations, modifications to contractual terms may be approved that would not otherwise have been approved if the loan were performing. Of the \$467 million and \$711 million loan participations that were modified, \$318 million and \$326 million were on non-accrual status as of June 30, 2025, and December 31, 2024, respectively.

The maturity distribution of major asset categories in the consolidated VIE net portfolio holdings, which have set maturity terms is as follows:

The allocation of the excess of net unconsolidated VIE assets is determined in accordance with the LLC agreement for each entity. The hypothetical liquidation basis of valuation (HLBV) is applied in determining the allocation. Under the HLBV, the hypothetical liquidation of the VIE at book value forms the basis for allocating income or loss and net assets between its controlling and non-controlling interest holders.

## (4) Federal Reserve Notes

Federal Reserve notes are the circulating currency of the United States. These notes, which are identified as issued to a specific Reserve Bank, must be fully collateralized. All of the Reserve Banks' assets are eligible to be pledged as collateral. At June 30, 2025, and December 31, 2024, all Federal Reserve notes, net, were fully collateralized.

**UNAUDITED**

## **(5) Depository Institution Deposits**

Depository institutions' deposits primarily represents balances maintained in master accounts and excess balance accounts held by the depository institutions at the Reserve Banks.

## **(6) Treasury Deposits**

The Treasury holds deposits at the Reserve Banks in a general account pursuant to the Reserve Banks' role as fiscal agent and depositary of the United States.

## **(7) Capital and Surplus**

The FRA requires that each member bank subscribe to the capital stock of the Reserve Bank in an amount equal to 6 percent of the capital and surplus of the member bank. These shares have a par value of \$100 and may not be transferred or hypothecated. As a member bank's capital and surplus changes, its holdings of Reserve Bank stock must be adjusted. Currently, only one-half of the subscription is paid in, and the remainder is subject to call. A member bank is liable for Reserve Bank liabilities up to twice the par value of stock subscribed by it.

The FRA requires each Reserve Bank to pay each member bank an annual dividend on paid-in capital stock. By law, member banks with more than \$10 billion of total consolidated assets, adjusted annually for inflation, receive a dividend on paid-in capital stock equal to the smaller of 6 percent or the rate equal to the high yield of the 10-year Treasury note auctioned at the last auction held prior to the payment of the dividend. Member banks with \$10 billion or less of total consolidated assets, adjusted annually for inflation, receive a dividend on paid-in capital stock equal to 6 percent. The dividend is paid semiannually and is cumulative.

The FRA limits aggregate Reserve Bank surplus to \$6.785 billion.

The Treasury equity contribution to the consolidated VIE is reported as an element of "Consolidated variable interest entity formed to administer credit and liquidity facilities: Non-controlling interest" in the Combined statements of condition. The reported amount also includes Treasury's allocated portion of undistributed net VIE assets as of June 30, 2025, determined in accordance with VIE agreements and accounting policies adopted by the VIE.

## **(8) Income and Expense**

### **(A) Loans to Depository Institutions and Other Loans**

Interest income on primary, secondary, and seasonal loans is accrued using the applicable rate for each loan type established at least every 14 days by the Reserve Banks' boards of directors, subject to review

and determination by the Board of Governors. Interest income on advances made under the BTFP and PPPLF is accrued using the applicable rate as outlined by the term sheets of the respective programs.

Supplemental information on interest income on loans and other loans is as follows:

### **(C) Consolidated Variable Interest Entity**

The combined financial statements include the accounts and results of operations of consolidated VIE formed under the authority of section 13(3) of the FRA (note 3). Net income and losses from operations of the consolidated VIE are reported as "Consolidated variable interest entity: (Loss) income, net" in the Combined statements of operations. The portion of consolidated VIE net income and loss that is allocated to the non-controlling interests is reported as "Consolidated variable interest entity: Non-controlling interest (income) loss, net" in the Combined statements of operations.

Supplemental information on consolidated VIE income is as follows:

## (D) Depository Institution Deposits

Depository institutions earn interest at the interest of reserve balance (IORB) rate. The Board of Governors sets the IORB rate at a rate not to exceed the general level of short-term interest rates and has the discretion to change the IORB rate at any time. In 2024, the FOMC decreased the established target range for the federal funds rate effective September 19, November 8, and December 19.

The Reserve Banks also offer term deposits through the Term Deposit Facility, and all depository institutions that are eligible to receive interest on their balances at the Reserve Banks may participate in the term deposit program. The interest rate paid on these deposits is determined by auction.

## (E) Operating Expenses

The Reserve Banks have established procedures for budgetary control and monitoring of operating expenses as part of their efforts to ensure appropriate stewardship and accountability. Reserve Bank and Board governance bodies provide budget guidance for major functional areas for the upcoming budget year. The Board's Committee on Federal Reserve Bank Affairs (BAC) reviews the Reserve Banks' budgets, and the BAC chair submits the budgets to Board members for review and final action. Throughout the year, Reserve Bank and Board staff monitor actual performance and compare it with approved budgets and forecasts.

Additional information regarding Reserve Bank operating expenses is available each year in the Annual Report of the Board of Governors of the Federal Reserve System at <https://www.federalreserve.gov/>

publications/annual-report.htm, and on the Audit webpage of the Board's website at <https://www.federalreserve.gov/regreform/audit.htm>.

## (F) Reconciliation of Total Distribution of Comprehensive Income and Treasury Remittances

The Reserve Banks remitted excess earnings to the Treasury periodically during 2024 and the first half of 2025. At June 30, 2025, Treasury remittances are reported as "Earnings remittances to the Treasury, net" in the Combined statements of operations. In the fall of 2022, the Reserve Banks first suspended weekly remittances to the Treasury because earnings shifted from excess to less than the costs of operations, payment of dividends, and reservation of surplus. The Reserve Banks began accumulating a deferred asset, which represents the net accumulation of costs in excess of earnings and is reported as "Deferred asset—remittances to the Treasury" in the Combined statements of condition. The deferred asset represents the amount of net excess earnings the Reserve Banks will need to realize in the future before remittances to the Treasury resume. This deferred asset is periodically reviewed for impairment and no impairment existed as of June 30, 2025.

The following table presents the distribution of the System's total comprehensive income (loss):

<b>Table 18. Reconciliation of total distribution of comprehensive income (loss) and Treasury remittances</b> (in millions)
