COMMUNITY REINVESTMENT ACT PERFORMANCE EVALUATION

Regions Bank
1900 Fifth Avenue North
Birmingham, Alabama 35203

RSSD ID NUMBER: 233031

FEDERAL RESERVE BANK OF ATLANTA
1000 Peachtree Street, N.E.
Atlanta, Georgia 30309-4470

NOTE: This document is an evaluation of this institution's record of meeting the credit needs of its entire community, including low- and moderate-income neighborhoods, consistent with safe and sound operation of the institution. This evaluation is not, nor should it be construed as, an assessment of the financial condition of this institution. The rating assigned to the institution does not represent an analysis, conclusion, or opinion of the federal financial supervisory agency concerning the safety and soundness of this financial institution.

INSTITUTION'S CRA RATING

INSTITUTION'S CRA RATING: Regions Bank is rated **SATISFACTORY**.

As described in detail under the *Institution, Scope of Examination* section, the institution's CRA rating is derived using two different examination procedures: Large Bank and Strategic Plan. Ratings under each examination method and the overall CRA rating are summarized below.

Large Bank Examination Procedures

The Large Bank Examination Procedures are applicable to all multistate assessment areas (AAs) and all states except the state of Utah. The following table indicates the performance level of Regions Bank with respect to the Lending, Investment, and Service tests for the applicable multistate AAs and states.

Regions Bank Multistate AAs and States Using Large Bank Examination Method			
Performance Levels	**Performance Tests**		
	Lending Test*	**Investment Test**	**Service Test**
Outstanding		X	
High Satisfactory			
Low Satisfactory	X		X
Needs to Improve			
Substantial Noncompliance			
OVERALL RATING – LARGE BANK	**SATISFACTORY**		

*The Lending Test is weighted more heavily than the Investment and Service Tests when arriving at an overall rating.

Strategic Plan Examination Procedures

The following table shows the annual performance levels and overall CRA rating for Regions Bank with respect to the performance goals outlined in the bank's Strategic Plan applicable only to the state of Utah.

Regions Bank State of Utah			
	Performance Levels Met by Year		
Performance Goals	**Goal Not Met**	**Satisfactory**	**Outstanding**
Qualified Investments		2023	2022, 2024
Qualified Grants			2022, 2023, 2024
Qualified Service Hours	2022	2023	2024
OVERALL RATING – STRATEGIC PLAN	**OUTSTANDING**		

Overall CRA Rating

The following table summarizes the bank's overall institution rating considering both examination methods.

Regions Bank Overall Institution CRA Rating	
Examination Method	**Overall Rating**
Large Bank	Satisfactory
Strategic Plan	Outstanding
OVERALL CRA RATING – INSTITUTION	**SATISFACTORY**

Major factors contributing to this rating include:

- The geographic distribution of loans reflects adequate penetration in LMI geographies.
- The overall distribution of borrowers reflects adequate penetration among customers of different income levels and businesses of different sizes.
- The bank makes a relatively high level of community development (CD) loans.
- The bank makes limited use of innovative and/or flexible lending practices in serving credit needs of its assessment areas (AAs).
- The bank makes an excellent level of qualified CD investments and grants.
- Retail delivery services are reasonably accessible to the geographies and individuals of different income levels.
- The bank provides a relatively high level of CD services.
- According to the goals set out in its Utah Strategic Plan, the bank made an Outstanding level of qualified investments in 2022 and 2024; an Outstanding level of grants in 2022, 2023, and 2024; and an Outstanding level of services in 2024.

INSTITUTION

DESCRIPTION OF INSTITUTION

Regions Bank is a commercial bank headquartered in Birmingham, Alabama that operates in 16 states, including Alabama, Arkansas, Florida, Georgia, Illinois, Indiana, Iowa, Kentucky, Louisiana, Mississippi, Missouri, North Carolina, South Carolina, Tennessee, Texas, and Utah. As of December 31, 2023, the bank had 1,271 branches across its footprint. Regions received a "Satisfactory" rating under the Large Institution Examination Procedures at its previous Community Reinvestment Act (CRA) Performance Evaluation (PE) dated April 25, 2022. No known legal impediments exist that would restrain the bank from meeting the credit needs of its AAs.

For this examination, 149 AAs were reviewed. Deposits in these AAs totaled $129.6 billion as of June 30, 2023. Descriptions of the full-scope AAs can be found in the applicable state or multistate sections of this report.

Business Structure

Regions Financial Corporation (RFC) is a top 40 financial holding company with consolidated assets of approximately $153 billion as of June 30, 2024. RFC is headquartered in Birmingham, Alabama and is the parent company of Regions Bank (Regions or the bank), which is a full-service provider of retail and commercial banking, wealth management, and mortgage banking products and services. The bank represents 99 percent of the parent's consolidated assets and is the primary source of income and liquidity.

On October 1, 2021, Regions completed its acquisition of home improvement lender EnerBank USA. EnerBank was one of America's largest point-of-sale lenders serving homeowners and contractors through a series of loan programs and digital solutions that supported a wide range of home improvement needs. Lending services were delivered directly to homeowners at the point of sale via contractors who are part of EnerBank's national network. The company served homeowners and contractors in all 50 states, with a primary focus in much of Regions' retail banking footprint across the South, Midwest, and Texas. The EnerBank USA name was consolidated into the Regions Bank brand. Before its acquisition, EnerBank was regulated by the FDIC, maintaining one branch in the Salt Lake City AA and operated under a CRA Strategic Plan. On January 18, 2022, the Federal Reserve Board of Governors approved Regions' request to continue operating under EnerBank's CRA Strategic Plan for the Salt Lake City AA through its expiration date of December 31, 2024.

<u>Regions Community Development Corporation (RCDC)</u>

The RCDC was formed in 2020 to be a catalyst for revitalizing communities and improving the lives of economically disadvantaged families in the Regions footprint. The mission of the RCDC is to make life better by providing debt and/or equity financing for projects and entities that serve a CD purpose.

<u>Regions Foundation</u>

Regions Foundation is a nonprofit 501(c)(3) corporation funded primarily through contributions from Regions Bank. A significant portion of the Regions Foundation grants, mission-related-investments (MRI), and program-related-investment (PRI) loans are made to CRA-qualified organizations or for CRA-qualified purposes.

Credit Products and Loan Portfolio

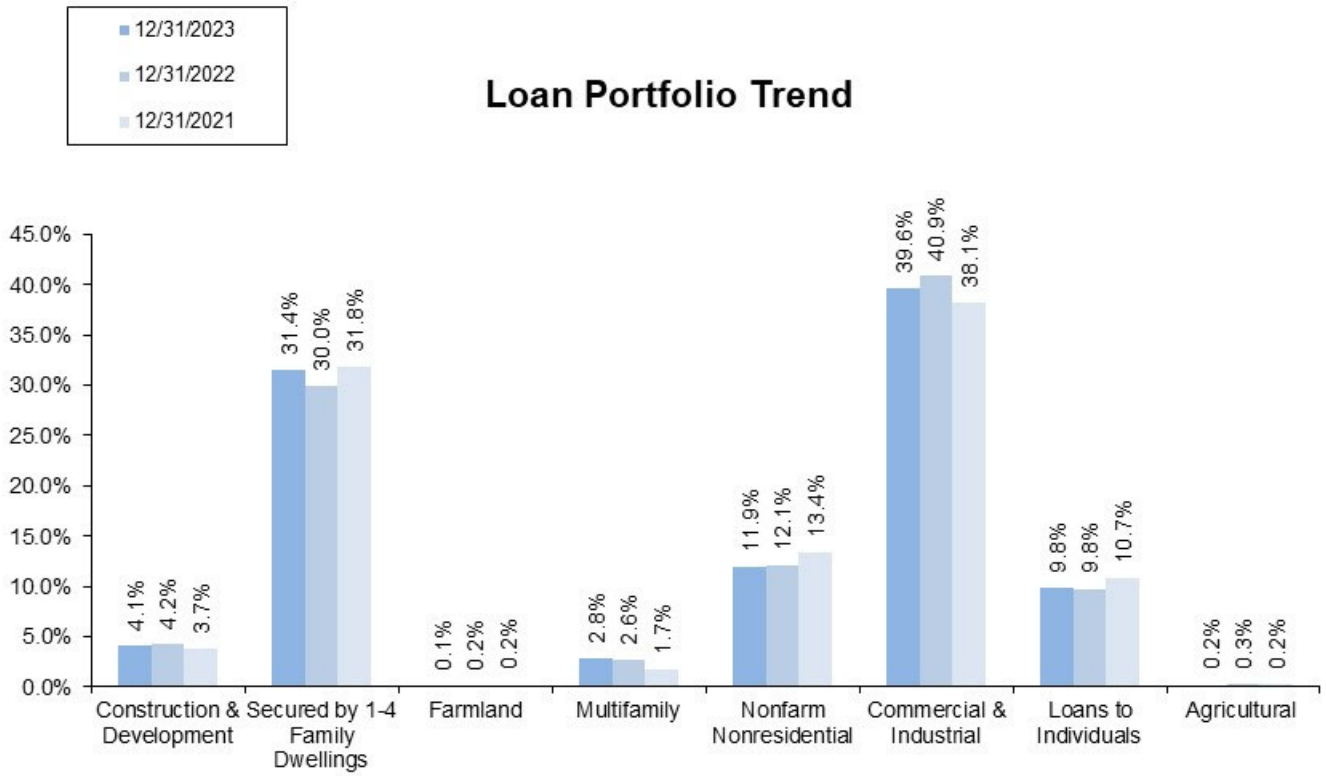
Regions Bank offers a wide variety of consumer, residential real estate, commercial, and agricultural loan products to fulfill the credit needs of the residents and businesses in its AAs. Consumer loan products include auto loans, personal lines of credit (LOC), installment loans, home equity loans, mortgage loans, and student loans. The bank also offers construction and commercial loan products including LOCs, term loans, bridge loans, business credit cards, and SBA loans. See the *Product Innovation* section below for further details.

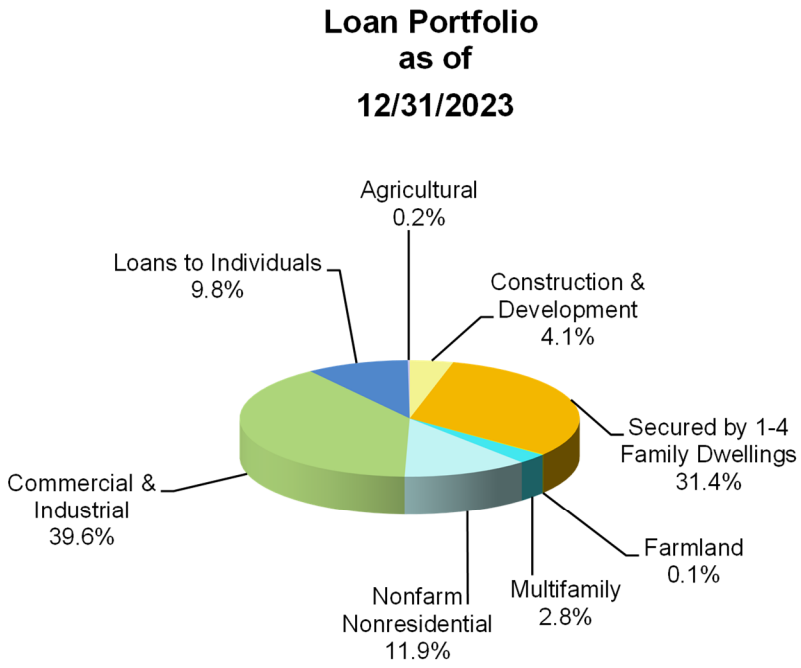
Loan Portfolio

The following table and graphs show the composition of the loan portfolio according to the Consolidated Report of Condition and Income (Call Report) as of December 31, 2021, 2022, and 2023. For all three years, Commercial and Industrial loans represented the largest volume of loans by dollar, growing by 12.8 percent over that time period, followed by One- to Four-Family Dwelling loans, which grew at a rate of 7.3 percent.

COMPOSITION OF LOAN PORTFOLIO							
	12/31/2023		12/31/2022		12/31/2021		
Loan Type	$ (000s)	Percent	$ (000s)	Percent	$ (000s)	Percent	% Change
Construction and Development	3,338,000	4.1%	3,395,000	4.2%	2,768,000	3.7%	20.6%
Secured by One- to Four- Family Dwellings	25,335,000	31.4%	23,992,000	30.0%	23,605,000	31.8%	7.3%
Other Real Estate: Farmland	120,000	0.1%	127,000	0.2%	145,000	0.2%	-17.2%
Multifamily	2,268,000	2.8%	2,097,000	2.6%	1,261,000	1.7%	79.9%
Nonfarm nonresidential	9,610,000	11.9%	9,657,000	12.1%	9,928,000	13.4%	-3.2%
Commercial and Industrial	31,885,000	39.6%	32,769,000	40.9%	28,262,000	38.1%	12.8%
Loans to Individuals	7,873,000	9.8%	7,808,000	9.8%	7,960,000	10.7%	-1.1%
Agricultural Loans	148,000	0.2%	218,000	0.3%	185,000	0.2%	-20.0%
Total	*$80,577,000*	*100.00%*	*$80,063,000*	*100.00%*	*$74,114,000*	*100.00%*	8.7%

*This table does not include the entire loan portfolio. Specifically, it excludes loans to depository institutions, bankers acceptances, lease financing receivables, obligations of state and political subdivisions, and other loans that do not meet any other category. Contra assets are also not included in this table.





COVID-19 Response

Regions participated in the Paycheck Protection Program (PPP), which was established as part of the Coronavirus Aid, Relief, and Economic Security Act of 2020 and expired on May 31, 2021, overlapping for the first five months of the 36-month retail review period for this exam. The bank included 29,405 PPP loans for $1.4 billion institution-wide during 2021. PPP loans were designed to help businesses retain workers and staff during the economic crisis caused by the pandemic. PPP loans in amounts less than $1 million were considered retail small business loans while loans greater than $1 million were considered as CD loans if they also had a primary purpose of CD as defined under the CRA. Since the CD review period did not begin until January 1, 2022, PPP CD loans were not included in this examination.

Although most of Regions' customer assistance-related financial service responses to the pandemic expired prior to this examination's review period, the bank continued its consumer mortgage payment forbearance and home equity payment hardship programs through March 31, 2021. Additionally, the bank's branch contingency procedures, including expanded services in both the drive-thru and via phone, continued until April 1, 2022.

SCOPE OF EXAMINATION

The CRA performance evaluation assesses the bank's record of meeting the credit needs of its community, including LMI neighborhoods, within the context of information such as asset size and financial condition of the institution, competitive factors, as well as the economic and demographic characteristics of its defined AAs. Unless otherwise noted, demographic characteristics discussed in the *Description of Operations* section of each AA are derived from 2022 FFIEC Census data and deposit information is taken from the FDIC Deposit Market Share Report data as of June 30, 2023.

Examination Procedures and Full-Scope Reviews

Regions CRA performance evaluation is a hybrid evaluation that uses two separate and distinct types of CRA procedures – Large Institution Examination Procedures and Strategic Plan Procedures. CRA performance within

all the AAs except the Salt Lake City AA used the Large Institution Examination Procedures. Strategic Plan Examination Procedures were used for the Salt Lake City AA in the state of Utah.

Full-scope reviews using the Large Institution Examination Procedures were conducted in 23 of the bank's 149 AAs. The remaining AAs, with the exception of Salt Lake City, were reviewed using limited-scope procedures.

AAs receiving full-scope reviews are:

- Alabama: Birmingham, Mobile
- Arkansas: Little Rock
- Florida: Miami, Tampa
- Georgia: Atlanta
- Illinois: Decatur
- Indiana: Indianapolis
- Iowa: Waterloo
- Kentucky: Southwest Kentucky (non-metro)
- Louisiana: New Orleans
- Mississippi: Jackson
- Missouri: Cape Girardeau
- North Carolina: Charlotte
- South Carolina: Charleston
- Tennessee: Nashville
- Texas: Houston
- Multistate:
    - Augusta (GA-SC)
    - Chattanooga (TN-GA)
    - Columbus (GA-AL)
    - Memphis (TN-MS-AR)
    - St. Louis (MO-IL)
    - Texarkana (TX-AR)

CRA performance in the Salt Lake City AA used the Strategic Plan Procedures. The Plan includes the following three performance goals for each year of the review period (2022, 2023, and 2024):

- Qualified Investments
- Qualified Grants
- Qualified Service Hours

The Strategic Plan establishes measurable levels of performance for each goal tied to performance ratings. See the *Conclusions with Respect to Performance Goals in the Salt Lake City AA* section for additional details and ratings.

State/Multistate MSA Weighting

When determining the overall rating, the greatest weight was placed on performance in Florida, closely followed by Alabama due to its share of HMDA-reportable and small business lending and total deposits. Since Regions operated only one branch in the state of Utah in the Salt Lake City AA, accepting only employee deposits, the total level of deposits held in this state, along with the level of HMDA-reportable and small business lending, was minimal. Therefore, the Strategic Plan rating for the state of Utah carried minimal weight in the overall institutional rating.

Lending Test

Under the Lending Test, performance is evaluated using the following criteria and time frames.

Lending Test Performance Criterion	Products Selected for Review[2]	Time Period
Level of Lending Activity	• HMDA-reportable loans • Small business loans	January 1, 2021 – December 31, 2023
AA Concentration		
Geographic Distribution of Loans		
Loan Distribution by Borrower's Profile		
CD Lending		January 1, 2022 – December 31, 2024
Product Innovation		January 1, 2021 – December 31, 2023

Lending Test Review Period, Products Reviewed, and Product Weighting

Unless otherwise noted within individual AAs, the following criteria apply throughout the report:

- Given the bank's business strategy and total volume originated during the review period, performance in HMDA-reportable loans carried greater weight toward overall performance conclusions.

- As defined in *Appendix D*, HMDA-reportable loans include various loan categories. There was sufficient volume for analysis in three of the loan categories: home purchase, home refinance, and home improvement. Weighting of HMDA-reportable loan categories are presented in order of significance within each AA.

- Equal emphasis was placed on lending performance in 2021, 2022, and 2023 in deriving overall conclusions for geographic and borrower distribution.

- The use of loan size as a proxy provided additional context for assessing lending performance to small businesses in 2021, which included loans as part of the SBA's Paycheck Protection Program (PPP). The PPP resulted in significant volumes of loans to small businesses and did not require financial institutions to collect revenues of businesses. In those cases where revenue was not collected voluntarily by a financial institution, the revenue category "not known" was used. As such, the percentage of small business loans originated in amounts less than $250,000 was also considered and analyzed for Regions Bank and aggregate lenders along with performance context factors in 2021.

- The housing affordability ratio referenced in individual AAs throughout the document is calculated by dividing the median household income by the median housing value. Values closer to 100 percent indicate greater affordability.

Lending Test Analysis Comparisons

Lending Test analysis entails comparisons of bank performance each year to applicable AA demographics and the performance of other lenders for the same year. Under the Lending Test, comparisons to AA demographics for the 2021 year is based on 2015 American Community Survey data, while demographics of the 2022 and 2023 years are based on 2020 U.S. Census data. Certain business demographics are based on Dun & Bradstreet (D&B) data applicable to the year of bank lending activity being considered. Key demographic data used for analysis is discussed in the *Description of Institution's Operations* section of each full-scope AA and additional demographic

[2] These two products are defined in *Appendix D*.

tables are found in *Appendix E* (full-scope AAs) and *Appendix G* (limited-scope AAs), and *Appendix I* (Strategic Plan).

Investment Test

All CD investments, including grants and donations, made between January 1, 2022 and December 31, 2024 were reviewed. In addition, investments made prior to January 1, 2022 but still outstanding as of December 31, 2024 were also considered. Qualified investments and grants were evaluated to determine the bank's overall level of activity, use of innovative and/or complex investments, and responsiveness to the credit and CD needs of the bank's AAs.

Service Test

Under the Service Test, performance was evaluated using the following criteria and time frames:

Service Test Performance Criterion	Time Period
Accessibility of Delivery Systems	January 1, 2021 – December 31, 2023
Changes in Branch Locations	
Reasonableness of Business Hours and Services	
Community Development Services	January 1, 2022 – December 31, 2024

Community Contacts

As part of the CRA evaluation, several community contacts were made with local community, governmental, and economic development representatives familiar with the economic and demographic characteristics as well as CD opportunities in the AAs. Information obtained from these contacts was used to establish a context for the communities in which the bank operates and to gather information on the bank's performance. Specific information obtained from the community contacts is included in the applicable section of the evaluation for each AA.

CONCLUSIONS WITH RESPECT TO PERFORMANCE TESTS

LENDING TEST

Performance under the Lending Test is rated Low Satisfactory, as reflected in the following table.

Rated Area	Lending Test Rating
Florida	Low Satisfactory
Alabama	Low Satisfactory
Tennessee	High Satisfactory
Georgia	Low Satisfactory
Louisiana	High Satisfactory
Mississippi	Low Satisfactory
Texas	Low Satisfactory
Arkansas	Low Satisfactory
Indiana	Low Satisfactory
Illinois	Low Satisfactory
South Carolina	Low Satisfactory

Rated Area	Lending Test Rating
North Carolina	Low Satisfactory
Missouri	Low Satisfactory
Kentucky	Needs to Improve
Iowa	Low Satisfactory
St. Louis MO-IL Multistate	Low Satisfactory
Memphis TN-MS-AR Multistate	High Satisfactory
Chattanooga TN-GA Multistate	High Satisfactory
Augusta GA-SC Multistate	Low Satisfactory
Texarkana TX-AR Multistate	Low Satisfactory
Columbus GA-AL Multistate	Low Satisfactory
OVERALL	**LOW SATISFACTORY**

Performance under each of the criteria of the Lending Test is shown in the tables that follow.

Lending Activity

The following tables summarize the bank's lending activity for 2021, 2022, and 2023. Lending levels reflect adequate responsiveness to AA needs. Detailed information about lending activity can be found in each of the state and full-scope AA sections of this report.

Rated Area	Lending Activity
Florida	Good
Alabama	Adequate
Tennessee	Adequate
Georgia	Good
Louisiana	Adequate
Mississippi	Poor
Texas	Excellent
Arkansas	Adequate
Indiana	Good
Illinois	Adequate
South Carolina	Good
North Carolina	Excellent
Missouri	Adequate
Kentucky	Adequate
Iowa	Poor

AA Concentration

The bank originated a high percentage of loans to borrowers and businesses located in the AAs. The table below shows the number and percentage of loans that were located inside and outside of the bank's AAs. As shown, 90.6 percent of the HMDA-reportable loans and 79.8 percent of small business loans by number were to borrowers or businesses in the bank's AAs.

Lending Inside and Outside the Assessment Area

Loan Types	Inside				Outside			
	#	%	$(000s)	%	#	%	$(000s)	%

CD Lending

The following table summarizes the total dollar volume and conclusions for CD loans by rated area. Individual state totals include loans benefitting AAs and the broader state or regional areas (BSRA) that includes the AAs. It also includes loans made outside any AAs within a state if the bank was deemed to have been responsive to the needs of its AAs in that state.

Rated Area	CD Loans ($)	CD Lending Activity
Florida	$392.5 Million	Relatively High Level
Alabama	$249.9 Million	Relatively High Level

Columbus GA-AL Multistate	$0	Few, if Any
BSRA that Includes Multiple States in Bank Footprint	$50.9 Million	
OVERALL	**$3.1 Billion**	**RELATIVELY HIGH LEVEL**

As the previous table shows, Regions Bank originated or renewed $3.1 billion in CD lending with impact to one or more of the states in its footprint. This is considered a relatively high level of CD loans when considering performance across the footprint, particularly in Florida and Alabama, which largely influence overall conclusions.

Some of the most impactful CD loans are separately highlighted within the applicable state or full-scope AA directly receiving the benefit. As the previous table shows, the bank originated or renewed $50.9 million in BSRAs that benefited more than one state within its footprint. Since these loans have impact across multiple states, they are considered at the institution level. The most impactful and responsive of these loans include:

- One loan totaling $20 million to a CDFI serving Ohio, West Virginia, Kentucky, Virginia, Tennessee, North Carolina, South Carolina, Mississippi, Alabama, and Georgia. The loan was used by the CDFI to provide credit for growth and development opportunities of small, rural, and minority-owned businesses.

- Two lines of credit (LOC) totaling $9.5 million to a national CDFI serving all states and multistate AAs in the bank's footprint. The LOCs were originated to assist the CDFI's small business and microloan programs. While the LOCs could be used across the entirety of the bank's footprint, the CDFI prioritized originating loans in the following AAs: Charlotte, Indianapolis, Austin, Miami, Houston, Memphis, Dallas, Atlanta, and Birmingham.

- One LOC totaling $7.5 million to a national CDFI serving all states and multistate AAs in the bank's footprint. The LOC provided the CDFI with working capital toward its initiative to create affordable single-family homes in LMI communities.

- One LOC totaling $5 million to a CDFI serving Alabama, Arkansas, Louisiana, Mississippi, and Tennessee. The LOC was originated to allow the CDFI to fulfill its mission of providing affordable financing and building assets to individuals in economically distressed parts of the Southern US.

- Three LOCs totaling $3 million to a nonprofit housing developer serving LMI families living in the Gulf Coast regions of Texas, Louisiana, Mississippi, Alabama, and Florida.

- One LOC totaling $3 million to a CDFI serving Mississippi and Alabama. The LOC was used for working capital to allow the CDFI to originate home loans to LMI borrowers and microloans to small businesses.

Product Innovation

The bank makes limited use of innovative and/or flexible lending practices in serving the credit needs of its AAs. In deriving this conclusion, consideration was given to the variety of offerings and the impact of the offerings. Descriptions of each innovative and/or flexible lending option offered during the review period are as follows. Unless otherwise noted, each program was available throughout the bank's entire footprint and review period.

Consumer Real Estate Programs

- *Regions Affordable 97:* This internally developed mortgage product is specially designed for LMI homebuyers in the bank's AAs. To qualify, a borrower must be LMI or purchase a home located in an LMI tract and must complete pre-purchase homeownership counseling through a HUD-approved provider. The product features a 30-year fixed rate and includes flexible features such as lower minimum credit scores, eligibility of non-traditional credit, LTV limits up to 97 percent, and no private mortgage insurance (PMI) required. Additional features are available for the product that provide flexibility, including eligibility of pledged assets as collateral and biweekly payments. During the review period, the bank originated 2,105 loans through the Affordable 97 product totaling $383.7 million.

- *Regions Affordable 100:* This internally developed mortgage product contains all of the same requirements and flexible features as the Regions Affordable 97 Program with the exception of LTV limits, which are up to 100 percent for this product. During the review period, the bank originated 3,423 loans through the Affordable 100 product totaling $627.5 million.

- *Regions Affordable Home Equity Loan (HELOAN):* This internally developed mortgage product is a new offering developed by Regions Bank and offered to all markets in October 2022. Affordable HELOANs were created to address unique home lending needs and provide LMI homeowners with a smaller dollar loan option with a fixed interest rate. The product is available to homeowners residing in LMI tracts and offers a lower minimum loan amount and a higher LTV (when compared to the bank's traditional HELOC product). From implementation in October 2022 through the remainder of the review period, the bank did not originate any Affordable HELOANs.

- *Home Possible:* This mortgage product through Freddie Mac targets LMI borrowers and offers features such as flexible down payment options, including sweat equity and high LTV limits. During the review period, the bank originated 168 loans through this program totaling $31.9 million.

- *HomeReady:* This mortgage program is offered through Fannie Mae and is available to LMI borrowers. The program features terms that are more flexible than traditional government-insured loans, such as lower down payment, cancellable PMI, and flexible funding source options such as gifts and grants. During the review period, the bank originated 584 loans totaling $106.5 million through this program.

- *Federal Housing Administration (FHA)/U.S. Department of Veterans Affairs (VA) Insured Loan Programs:* These government-insured loan programs offer flexible, long-term financing to eligible borrowers with low or no down payment requirements. During the review period, the bank originated 5,163 FHA loans totaling $1.1 billion and 1,816 VA loans totaling $551 million.

- *USDA Rural Development Loan Program:* This loan program is designed to assist LMI individuals in purchasing affordable housing in rural areas and features no down payment or PMI requirements. During the review period, the bank originated 857 loans for $129.6 million through this program.

Down Payment Assistance (DPA) Program

- *Regions First Home Assist:* This internally developed program offers DPA to first-time LMI homebuyers or borrowers purchasing a home located in an LMI tract within select markets. The DPA is offered as a grant with no repayment required and is eligible for use on the Regions Affordable 97, Home Possible, and HomeReady products. Moreover, the maximum DPA amount is flexible and evaluated by the bank periodically to address unique affordability challenges in its markets. As of December 31, 2023, the maximum DPA amount was $5,000 within select markets in Alabama, Arkansas, the Augusta GA-SC Multistate MSA, Florida, Louisiana, Mississippi, North Carolina, South Carolina, Tennessee, and Texas. During the review period, the bank assisted 1,067 individuals in receiving DPA through this program.

Consumer Real Estate Bond Loans[3] through State Entities

- *Alabama Housing Finance Authority (HFA):* The Alabama HFA provides homeownership and rental opportunities for LMI Alabamians. This includes single-family financing programs with lower interest rates and Down Payment Assistance on 30-year, fixed rate mortgage loans for LMI borrowers as well as multifamily programs that create affordable rental housing for low-income families by utilizing tax

[3] Bond loans provide partial government backing for mortgages. Government support means lenders can offer lower interest rates on mortgages to LMI borrowers.

incentives. Regions began offering bond loans from the Alabama HFA to applicants in June 2022 and originated six loans totaling $586,050 to LMI borrowers through the end of the review period.

- *Florida Housing Finance Corporation (FHFC):* The FHFC provides a wide range of affordable housing opportunities for residents throughout Florida. Programs of the FHFC are designed to be innovative, measurable, and sustainable in responding to affordable housing challenges of the state. Programs include conventional and government loan programs, DPA programs, multifamily programs, and specialized loan programs. Regions is a participating lender and originated 152 loans totaling $21.5 million to LMI borrowers during the review period.

- *Tennessee Housing Development Agency (THDA):* The THDA provides fixed-rate mortgage loans for first-time homebuyers and helps ensure the production of new affordable housing units for very low-income and LMI borrowers. The THDA also provides grants to preserve and create homes, offers DPA and rental assistance, and assists in the creation and maintenance of rental housing. Regions is an approved mortgage lender and originated 72 loans totaling $7.7 million to LMI borrowers during the review period.

- *Louisiana Housing Corporation (LHC):* The LHC offers two mortgage revenue bond programs and a bond assistance program for first-time LMI homebuyers in the state. The programs include conventional and government loan offerings with reduced interest rates, lower minimum credit score requirements, and reduced mortgage insurance premiums. Assistance with closing costs and DPA are also available in the form of a grant or a second mortgage depending on the program chosen. Regions Bank began offering bond loans from the LHC to applicants in April 2023 and originated two loans totaling $403,344 through the end of the review period.

- *Mississippi Home Corporation (MHC):* The MHC offers several programs to address affordable housing needs for LMI Mississippians. Programs include conventional and government loan offerings and more specialized offerings including Smart6, Easy8, and Trusty10, with each offering a 30-year fixed term and varying amounts of assistance in the form of a forgivable second mortgage. Regions began offering bond loans from the MHC to applicants in May 2023, and originated 14 loans totaling $1 million.

- *North Carolina HFA (NHFA):* The NHFA offers an Advantage Mortgage Program with supplemental features such as DPA and tax credits. The Advantage Mortgage Program is available to all LMI home buyers in the state seeking conventional or government loan offerings. The program provides for fixed-rate mortgages and DPA up to 3 percent of the loan amount, with additional DPA available for LMI first-time homebuyers and veterans. Regions began offering bond loans from the NHFA to applicants in November 2021 and originated 28 loans totaling $3.5 million through the end of the review period.

- *Illinois Housing Development Authority (IHDA):* The IHDA offers several mortgage programs for first-time LMI homebuyers across the state, all of which include DPA in the form of a second mortgage that is either forgivable, deferred, or interest-free depending on the mortgage program chosen. Additionally, the IHDA offers two programs to LMI areas to increase generational wealth and build homeownership accessibility. Programs from the IHDA have lower credit score requirements, require completion of homeownership counseling prior to close, and are available on all mortgage types. Through these programs, Regions Bank originated 14 loans totaling $1.5 million during the review period.

INVESTMENT TEST

Performance under the Investment Test is rated Outstanding. The rating reflects an aggregation of the ratings for each rated area. The following table summarizes the ratings as well as the total dollar amount of qualified investments and donations by rated area. Individual state totals include investments and donations benefiting AAs and BSRAs that include the AAs. Totals also include investments made outside AAs within a state if the bank was deemed to have been responsive to the needs of its AAs in that state first.

Investments and Contributions in the Bank's Footprint

Columbus GA-AL Multistate	$11.5 million	$10,800	Outstanding
BSRA that Includes Multiple States in Bank Footprint	$395 million	$1.5 million	
OVERALL	**$3.3 billion**	**$52.2 million**	**Outstanding**
	$3.4 billion		

*Includes investments and contributions made outside of the bank's AAs in that state, broken down as follows: $20.1 million (investments) in Florida, $9.7 million (investments) and $265,800 (contributions) in Alabama, $14.0 million (investments) in Tennessee, $40.3 million (investments) and $6,000 (contributions) in Georgia, $37 million (investments) in Louisiana, $23.2 million (investments) and $10,500 (contributions) in Mississippi, $95.9 million (investments) and $29,900 (contributions) in Texas, $9.8 million (investments) in Arkansas, $3.6 million (investments) in Indiana, $17.7 million (investments) in South Carolina, $26.4 million (investments) and $1,700 (contributions) in North Carolina, $17 million (investments) and $3,500 (contributions) in Kentucky, $3.9 million (investments) and $5,000 (contributions) in Iowa.

As shown in the previous table, Regions made $3.4 billion in qualified investments and contributions during the review period with impact to one or more of the states in its footprint. This is considered an excellent level of CD investments and contributions overall.

Some of the most impactful CD investments and contributions are highlighted later in the report within the applicable state or full-scope AA directly receiving the benefit. As the previous table shows, the bank had $395 million in investments and $1.5 million in contributions in BSRAs that benefited more than one state with the bank's footprint. Since these investments and contributions have impact across multiple states, they are considered at the institution level. The most impactful of these investments and contributions include:

- $393.2 million in current-period SBA investments to finance small business development across the bank's footprint.

- $1 million in current-period investments and $341,000 in prior-period investments in a CDFI that operates across Arkansas and Mississippi.

- $459,000 in current-period investments in an affordable housing-focused CDFI that operates in Florida and Alabama.

- Two donations totaling $100,000 to an organization that provides disaster recovery services in Alabama and Mississippi.

- Four donations totaling $180,000 to a national vocational and career readiness program that primarily benefits LMI youth.

- Two donations totaling $250,000 to an affordable housing organization that develops multifamily affordable housing in Alabama, Louisiana, and Mississippi.

Investments and contributions are separately described below to provide further detail and discuss impact and responsiveness applicable to the bank's AAs.

Investments (not including contributions)
As shown in the previous table, qualified investments totaled $3.3 billion. This included $2.3 billion in investments made during the current review period, as well as prior period investments still outstanding with a balance of $1 billion.

The majority of investment dollars ($1.8 billion) supported the construction of affordable housing through low-income housing tax credits (LIHTC). Of this total, $1.3 billion of Regions' investments were made in the current period, while $460.6 million consisted of prior period LIHTCs. Altogether, these LIHTC investments helped to build 31,713 units of affordable housing for LMI individuals and families. In making these investments, Regions exhibited excellent responsiveness to the need for affordable housing across its banking footprint.

Other major investment types included the following:

- $123.3 million in New Markets Tax Credit (NMTC) investments, which helped to create or retain 3,770 jobs in LMI geographies.

- $14.8 million of equity investments in CDFIs that provide financial services to LMI communities and small businesses within the bank's footprint.

- $741.9 million in Mortgage-Backed Securities (MBS) to finance affordable housing for LMI individuals and families across the bank's footprint.

- $548.3 million in SBA securities to support small business financing across the bank's footprint.

Overall, both the volume and responsiveness of the bank's CD investments was excellent.

Contributions

Contributions in the Bank's Footprint by CD Purpose		
Contribution Purpose	**#**	**$**
Affordable Housing	354	$4.2 million
Community Services	2,943	$34.9 million
Economic Development	301	$11.5 million
Revitalization & Stabilization	124	$1.6 million
OVERALL	**3,722**	**$52.2 million**

As the table shows, the majority of contributions during the review period provided support for organizations engaged in community services targeted to or primarily benefiting LMI individuals. Examples include supporting LMI access to education, financial literacy, and healthcare services; homeless shelters; and food banks.

Contributions also exhibited responsiveness to affordable housing, economic development, and revitalization and stabilization. In the affordable housing space, the bank donated to organizations focused on developing affordable housing for LMI families. The bank also donated to organizations that provide free home repairs for LMI homeowners as well as organizations that provide rental and utility assistance for LMI individuals. Additionally, the bank supported economic development by funding small business incubators, loan funds that provide seed capital to early-stage businesses, and organizations that provide free training and technical assistance to entrepreneurs. In the revitalization and stabilization category, the bank supported disaster recovery efforts across its footprint, as well as initiatives to revitalize LMI neighborhoods and downtown districts.

Additional details regarding specific investments and contributions can be found in the state and full-scope AA sections.

SERVICE TEST

Performance under the Service Test is rated Low Satisfactory. The Service Test rating in each rated area is derived from the bank's performance with retail banking services and CD services and the overall rating for each rated area is presented in the table below.

Rated Area	Service Test Rating
Florida	Low Satisfactory
Alabama	High Satisfactory
Tennessee	High Satisfactory
Georgia	Low Satisfactory
Louisiana	High Satisfactory

Rated Area	Service Test Rating
Mississippi	High Satisfactory

Chattanooga TN-GA Multistate	Adequate
Augusta GA-SC Multistate	Adequate
Texarkana TX-AR Multistate	Adequate
Columbus GA-AL Multistate	Poor
OVERALL	**Adequate**

Each rated area's retail banking services conclusion includes an analysis of three characteristics: accessibility of delivery systems, including alternative delivery systems for delivering retail banking services to LMI individuals and/or geographies; changes in branch locations; and reasonableness of business hours and services in meeting AA needs. Each of these characteristics is described under the following headings.

Accessibility of Delivery Systems

Overall, delivery systems are reasonably accessible to geographies and individuals throughout the bank's AAs. Branches and ATMs are located across all income tract categories, and in 2023, 6.5 percent of the bank's total branches were located in low-income tracts, and 22.9 percent of branches were located in moderate-income tracts. Accessibility is described in greater detail within each state and full-scope AA throughout the report.

Regions made changes to their branch network and branch staffing in recent few years to enhance accessibility to more products and services. Specifically, management has staffed newer branches with Universal Bankers, which allows the bank to leverage cross-trained bankers and technology to offer more services with fewer employees within the branch.

Regions also leverages alternative delivery systems for delivering retail banking services, including but not limited to mobile and online banking; 24-hour banking through ATMs and the mobile banking suite; and mobile ATMs. The bank provided institutional level data demonstrating that customers living in LMI census tracts use alternative delivery services at a similar rate as customers not living in LMI tracts.

Regions has an array of banking products to meet the financial needs of all their clients, including LMI customers. The Regions Now Banking is a suite of products designed for unbanked and underbanked consumers and includes: full-service check cashing for individuals who do not have a Regions account; the Regions Now card, which is a pre-paid reloadable Visa card; access to Western Union; and Now Savings, which is a no-monthly fee and no minimum balance savings account that is designed to reward Regions Now customers for positive saving behavior. The bank also has Now Checking, which is a BankOn certified checking account with a low, flat monthly fee and no overdraft fees and provides customers with access to online banking bill pay and access to Zelle to transfer money.

Regions also offers borrowing options for customers with lower credit scores or needing to establish or rebuild their credit. The bank offers the Explore Credit Card, which is a full-service Visa credit card secured by the customer's savings. Customers can open this account with $250 on deposit, and credit scores are not considered in the underwriting process. In addition, the bank offers deposit-secured loans that allow individuals with a lower credit score, or no credit, to establish a positive credit payment history.

Regions also focuses on financial education to reach LMI consumers. This is illustrated in the CD service activities related to financial education described in subsequent sections of the report. Additionally, Regions has developed Greenprint, a tool offered to all customers to help identify their financial objectives and how Regions products and services can help them meet their goals. The results of this assessment are reviewed with a banker and allows the bank to work with any customer to develop a plan to meet their financial goals, regardless of the customer's current financial status.

Changes in Branch Locations

Overall, the bank's record of opening and closing branches has generally not adversely affected the accessibility of delivery systems, particularly to LMI geographies and/or LMI individuals.

During the review period, the bank opened 32 branches, with the most expansion in the states of Florida, Georgia, and Texas. The bank opened one branch in a low-income tract and 10 in moderate-income tracts. The largest number of the new branches were opened in upper-income tracts. During the same timeframe, the bank closed 128 branches, with the largest number of branch closures in Florida, Mississippi, Texas, Louisiana, Tennessee, Alabama, Arkansas and Indiana. The bank closed seven branches in low-income tracts and 27 branches in moderate-income tracts. Most of the branch closings were in middle-income tracts and upper-income tracts. Additional details on the bank's record of branch openings and closings are included in the full-scope AA sections later in the report.

The bank's retail branching strategy includes a consistent process for analyzing the bank's retail network for optimization and consolidation opportunities. The bank considers factors such as the proximity to other branches, financial and other metrics, as well as regulatory risk, and the potential impact of the branch consolidation on LMI communities. All branch closures discussed in this report were subject to the bank's consistent evaluation process.

Reasonableness of Business Hours and Services

Business hours and services do not vary in a way that inconveniences its AAs, particularly LMI geographies or individuals. Most branch locations operate lobby hours from 9:00 a.m. to 4:00 p.m. or 5:00 p.m. Monday through Thursday, and all locations are open until 5:00 p.m. on Friday. Weekday drive-through hours are available at most branches as well, which generally mirror the branch lobby hours, though in some markets and particularly where the bank lobby closes before 5:00 p.m., the bank offers longer drive-through hours until 5:00 p.m. The bank offers Saturday lobby and drive through hours in many markets throughout their footprint, generally from 9:00 a.m. until noon. While there are subtle differences in hours between branches and AAs, they do not vary in a way that adversely impacts LMI geographies or individuals. Moreover, the bank offers the same general suite of loan and deposit products and services throughout its entire branch network.

The following tables outline the geographic distribution of the bank's branches and ATMs by census tract income.

Geographic Distribution of Branches & ATMS 2021
All Assessment Areas

Tract Category	Branches							ATMs

CD Services

The bank provides a relatively high level of CD services activities throughout its AAs. The table below summarizes by rated area, the total number of service activities, hours of CD services, and the CD service

performance conclusions. Totals shown for each state include hours that benefit AAs and BSRAs that include the AAs within each state.

Rated Area	Services (#)	Services (Hours)	CD Service Conclusion
Florida	1,945	6,854*	Limited Level
Alabama	2,503	17,070*	Leader
Tennessee	1,310	6,213*	Relatively High Level
Georgia	562	3,048*	Adequate Level

BSRA that benefits entire footprint	4	85	
OVERALL	**12,668**	**64,401**	**Relatively High Level**

*Includes 1,379 hours of services at the BSRA level that include the bank's AAs within the following states: Alabama (545 hours); Florida (15 hours); Georgia (4 hours); Indiana (187 hours); Louisiana (64 hours); Missouri (30 hours); Mississippi (374 hours); North Carolina (44 hours); Tennessee (83 hours); Texas (33 hours).

As the table shows, Regions engaged in 64,401 hours of qualifying CD service activities during the review period. This total includes 62,937 hours that directly benefit the bank's individual AAs, 1,379 hours that benefit a BSRA within a state that includes the bank's AAs, and 85 hours that benefit the bank's entire footprint. Specifically, staff provided technical assistance and served on the board for a CDFI that provides small business financing in Alabama, Louisiana, Texas and Georgia.

Most of the qualified CD service activities (approximately 83 percent) met the criteria for community services while CD service activities that support affordable housing and economic development each made up approximately seven percent of total hours. During the review period, bank staff provided over 22,000 hours of board service, offering leadership to nearly 3,300 nonprofit organizations across the bank's footprint. Bank staff

also provided almost 26,000 hours of financial education and homeownership counseling for LMI individuals. Additional details for CD service activities are described later in the report in the sections on the state and/or AA that they benefit.

Strategic Plan

Performance in the state of Utah as evaluated by the terms outlined in the bank's Strategic Plan was Outstanding. See the *Conclusions with Respect to Performance Goals in the Salt Lake City AA* section for additional details and ratings.

FAIR LENDING OR OTHER ILLEGAL CREDIT PRACTICES REVIEW

No evidence of discriminatory or other illegal credit practices inconsistent with helping to meet community credit needs was identified.

FLORIDA

CRA RATING FOR FLORIDA: **SATISFACTORY**
The Lending Test is rated: **Low Satisfactory**
The Investment Test is rated: **High Satisfactory**
The Service Test is rated: **Low Satisfactory**

Major factors contributing to this rating include:

- The geographic distribution of loans reflects adequate penetration throughout Florida AAs.
- The distribution of borrowers reflects adequate penetration throughout Florida AAs.
- The bank made a relatively high level of CD loans in Florida.
- The bank made a significant level of qualified CD investments and grants in Florida.
- Retail banking services, which includes accessibility of delivery systems, changes in branch locations, and reasonableness of hours and services, are adequate.
- The bank made a limited level of CD service activities in Florida

SCOPE OF EXAMINATION

A full-scope review was conducted for the following AAs in Florida:

- Miami
- Tampa

Limited-scope reviews were conducted for the remaining 21 AAs:

- Daytona
- Ft. Lauderdale
- Ft. Myers
- Ft. Walton
- Gainesville
- Homosassa Springs
- Jacksonville
- Lakeland
- Naples
- Northern Florida
- Ocala
- Okeechobee
- Orlando
- Palm Bay
- Panama City
- Pensacola
- Punta Gorda
- Sarasota
- Tallahassee

- The Villages
- West Palm Beach

The time period, products, and affiliates evaluated for these AAs are consistent with the scope discussed in the institution section of this report.

DESCRIPTION OF INSTITUTION'S OPERATIONS IN FLORIDA

As of June 30, 2023, Regions Bank had $25.2 billion in deposits in Florida, accounting for 19.5 percent of its total deposits. Regions Bank operated 272 branch offices in Florida as of December 31, 2023, representing 21.4 percent of its total branches. HMDA-reportable lending in Florida accounted for 22.4 percent of total institutional HMDA-reportable lending by number of loans and 27.5 percent by dollar volume. Small business lending in Florida accounted for 34.7 percent of the bank's total small business lending by number of loans and 34.2 percent by dollar volume. Overall, the bank's HMDA-reportable and CRA lending activity in the state was greater than the percentage of total institutional deposits.

The following table shows lending activity from January 1, 2021 through December 31, 2023.

Statewide Summary of Lending Activity
Assessment Areas Located in: Florida
2021-2023

Loan Type	#	%	$(000s)	%

Originations & Purchases

CONCLUSIONS WITH RESPECT TO PERFORMANCE TESTS IN FLORIDA

LENDING TEST

Overview

The Lending Test rating for the state of Florida is Low Satisfactory. The rating is a result of performance in each component of the Lending Test applicable to the state; Lending Activity (good); Geographic Distribution

(adequate); Borrower Distribution (adequate); and CD Lending (relatively high level). Highlights of each are found in the sections that follow, with additional descriptions and details within each AA of the state.

Lending Activity

Lending levels reflect good responsiveness to the credit needs of Florida AAs. The total number and dollar volume of HMDA-reportable and small business loans were considered in arriving at Lending Activity conclusions, as well as competitive factors and the bank's overall importance to each AA. Statewide conclusions are derived from conclusions within each AA as detailed in the *Lending Activity* section of the Tampa and Miami AAs.

Geographic and Borrower Distribution

The geographic distribution of HMDA-reportable and small business loans reflects adequate penetration throughout the AAs in Florida. The distribution of borrowers reflects adequate penetration among customers of different incomes levels and businesses of different sizes. The analyses of HMDA-reportable and small business lending within each full-scope AA in Florida are discussed in detail later in this report.

CD Lending

The bank made a relatively high level of CD loans in Florida. During the review period, the bank originated or renewed $375.3 million in qualified CD loans directly benefiting Florida AAs. In addition, the bank received consideration at the state level for two CD loans totaling $700,000 that benefited multiple AAs throughout the state. Of the statewide loans, one was an LOC available to three charter schools in the Miami and Tampa AAs, and the other was an LOC to a statewide small business accelerator. The bank made an adequate level of CD loans in the Tampa full-scope AA and an excellent level of CD loans in the Miami full-scope AA. More information on CD loans can be found in the full-scope AA sections of this report.

The bank was considered responsive to the CD needs of its AA in the state. Therefore, the bank also received consideration for $16.5 million in qualified CD loans within the state that did not benefit the bank's AAs, including $15 million that supported the creation of 60 new units of income-restricted affordable housing.

INVESTMENT TEST

The Investment Test rating for Florida is High Satisfactory. The bank made a significant level of qualified CD investments and grants in Florida, with $507.6 million in qualified investments and $4.7 million in qualified contributions directly benefiting its Florida AAs. In addition, the bank received consideration at the state level for $1 million in qualified investments to CDFIs that finance affordable housing and small business development across the state. The bank also received consideration at the state level for $1.2 million in qualified contributions that benefited the entire state. These contributions primarily focused on affordable housing and hurricane disaster recovery efforts, and as such were responsive to the state's main CD needs during the review period.

The bank made a significant level of qualified investments and contributions in the Tampa full-scope AA and an excellent level of qualified investments and contributions in the Miami full-scope AA. Additional details regarding specific investments and contributions can be found in the full-scope AA sections of this report.

The bank was responsive to the CD needs of its AAs in the state. Therefore, the bank also received consideration for $20.1 million in qualified investments within the state that benefited geographies outside of the bank's AAs. This amount included three LIHTCs totaling $18.2 million and one NMTC totaling $1.9 million.

SERVICE TEST

The Service Test rating for Florida is Low Satisfactory.

Retail Services

Delivery systems are reasonably accessible to the bank's geographies and individuals of different income levels in Florida. As of December 31, 2023, Regions operated 272 branches in Florida. The bank had seven branches in low-income tracts and 67 branches in moderate-income tracts, representing 27.2 percent of total branches in the state.

A full array of personal and business banking products and services is offered at all locations in Florida AAs. Across the state, branch hours vary but not in a way that inconveniences individual AAs. Most branches offer drive-through hours beginning at 8:00 a.m. and lobby hours beginning at 9 a.m. Most branch lobbies are open until 4 p.m. though some are open until 4:30 p.m. or 5:00 p.m. Monday through Thursday and nearly all branches are open until 5 p.m. on Friday. Drive-throughs are open until 5 p.m. Monday through Friday. Additionally, many branches offer Saturday lobby hours from 9 a.m. until noon or 1 p.m. Delivery systems include full-service ATMs at nearly all branches. In addition to those ATMs, the bank compliments its traditional service delivery methods with alternative delivery systems that provide increased access to banking services, as previously discussed in the *Institution, Retail Banking Services* section of this report.

During the review period, the bank closed 27 branches and opened 10 branches in Florida. At the time of closure, three branches were in moderate-income census tracts, 12 branches were in middle-income census tracts, and 12 were in upper-income census tracts. Of the branches opened, one was in a moderate-income census tract. Changes to the bank's branch network in Florida have not generally adversely affected the accessibility of delivery systems.

Additional details on the bank's retail services can be found in the full-scope AA sections of this report.

CD Services

The bank provides a limited level of CD service activities in Florida. During the review period, the bank engaged in 6,854 hours of qualified CD service activities in Florida. This total includes 6,839 hours directly benefiting individual AAs in Florida and 15 hours benefiting a BSRA that includes all the bank's AAs in Florida. These hours include board of directors' representation for statewide organizations focused on community economic development and promoting arts education and cultural experiences particularly for LMI individuals with disabilities.

Additional details of CD service hours in Florida are described later within each individual AA they benefit.

METROPOLITAN AREA – TAMPA MSA
(Full-Scope Review)

DESCRIPTION OF INSTITUTION'S OPERATIONS IN THE TAMPA AA

Overview

The Tampa, Florida AA includes Hernando, Hillsborough, Pasco, and Pinellas counties, which comprises the Tampa-St. Petersburg-Clearwater MSA. As of December 31, 2023, Regions Bank operated 58 branches in the AA, representing 21.3 percent of its Florida branches. The Tampa AA accounts for 4.6 percent of total branches and 5.0 percent of total deposits for the institution. In addition, the market represents 6.5 percent of the combined HMDA-reportable and small business lending by dollar volume for the institution.

The Tampa MSA is a competitive banking market dominated by several large institutions. According to the FDIC Summary of Deposits Report dated June 30, 2023, there were 58 depository institutions operating 606 branch locations in the AA, with a total of $123.9 billion in deposits. Regions Bank ranked sixth in deposit market share at 5.2 percent of total deposits ($6.5 billion). Raymond James Bank had the largest deposit market share at 31.1 percent, followed by Bank of America and Truist Bank with 12.8 and 11.8 percent, respectively.

HMDA-reportable lending and lending are similarly competitive. For HMDA-reportable lending, Regions Bank originated or purchased 1.5 percent of total HMDA-reportable loans in the AA in 2021, 1.8 percent in 2022, and 1.7 percent in 2023. Regions Bank ranked 14th out of 1,175 reporters in 2021, 10th out of 1,160 reporters in 2022, and 11th out of 1,050 reporters in 2023. United Wholesale Mortgage, Suncoast Credit Union, and Rocket Mortgage were the top HMDA reporters in the market during the review period.

For small business lending, Regions Bank ranked 11th out of 268 reporters in 2021 with 2.5 percent of small business loans. In 2022, it ranked 23rd out of 222 reporters with 0.3 percent of total loans. In 2023, Regions Bank ranked 18th out of 205 reporters with 0.6 percent of total loans. American Express Bank, Bank of America, and JP Morgan Chase Bank were the top small business reporters in the market for 2021, 2022 and 2023.

AA Demographics, Population, and Income Characteristics

The AA population was 3,342,963 as of July 1, 2023. This represented a 5.3 percent increase since the 2020 census.[4] During the same period, the statewide population in Florida experienced a 5.0 percent increase.[5]

According to 2023 FFIEC Census data, the AA is made up of 788 census tracts: 37 tracts are low-income (4.7 percent), 220 tracts are moderate-income (27.9 percent), 289 tracts are middle-income (36.7 percent), 217 tracts are upper-income (27.5 percent), and 25 tracts have unknown income (3.2 percent).

For purposes of classifying borrower income, this evaluation uses the FFIEC estimated median family income. The following chart sets forth the estimated median family income for 2021, 2022, and 2023 for the MSA. The median income increased by $16,700 from 2021 to 2023. The chart also provides a range of the estimated annual family income for each income category (low, moderate, middle, and upper).

[5] Ibid.

Borrower Income Levels
Tampa-St. Petersburg-Clearwater, FL MSA

FFIEC Estimated Median Family Income		Low	Moderate	Middle	Upper
		0 - 49.99%	50% - 79.99%	80% - 119.99%	120% - & above
2021	**$72,700**	0 - $36,349	$36,350 - $58,159	$58,160 - $87,239	$87,240 - & above
2022	**$82,100**	0 - $41,049	$41,050 - $65,679	$65,680 - $98,519	$98,520 - & above
2023	**$89,400**	0 - $44,699	$44,700 - $71,519	$71,520 - $107,279	$107,280 - & above

There are 762,610 total families in the AA. Of these families, 21.1 percent are low-income, 18.3 percent are moderate-income, 19.2 percent are middle-income, and 41.4 percent are upper-income. Of the total families, 9.0 percent have incomes below the poverty level, which is lower than the families below poverty for the state of Florida (9.5 percent). Additionally, poverty rates are higher in LMI tracts, with 31.8 percent of the families residing in low-income tracts and 13.9 percent of the families residing in moderate-income tracts living below the poverty level.

Housing Characteristics

There are 1,436,297 total housing units in the AA, of which 56.8 percent are owner-occupied, 29.5 percent are rental units, and 13.7 percent are vacant. However, home ownership rates are lower in LMI tracts. Specifically, 24.9 percent of all housing units in low-income tracts and 50.9 percent of all housing units in moderate-income tracts are owner-occupied.

The median age of the housing stock in the AA is 43 years, which is older than in the statewide median in Florida (34 years). Housing units in LMI census tracts were slightly older, at 47 years in low-income tracts and 45 years in moderate-income tracts. The older age of homes is an indicator of potential opportunity for home improvement loans in LMI tracts.

Housing values in the AA rose steeply during the review period. In January 2021, the median home listing price in the AA was $299,900. By December 2023, the median home listing price in the AA had increased to $420,000.[6] This represents a 40 percent increase, making the AA one of the hottest real estate markets in the nation during the review period.

Median gross rent in the AA is $1,159 per month, which was slightly lower than the median gross rent for the state of Florida ($1,218 per month). Additionally, the affordability ratio for the AA (27.1 percent) is slightly higher than the state of Florida (24.9 percent). The percentage of renters with rent costs greater than 30 percent of income is 50.1 percent, which is slightly lower than the state of Florida at 52.6 percent. This indicates that despite housing cost increases during the review period, the Tampa AA remains more affordable than other large metro areas in Florida.

Economic Conditions

The Tampa MSA is the nation's 17th largest metro and one of the largest regional economies in the United States. Tampa maintains a low economic diversity index which indicates the region is better insulated against economic disruptions. This is primarily due to the broad mix of industries that are equally represented by strong business

[6] "Housing Inventory: Median Listing Price in Tampa-ST. Petersburg-Clearwater, FL (CBSA)." *FRED – Federal Reserve Bank of St. Louis*, https://fred.stlouisfed.org/series/MEDLISPRI45300. Accessed 7 May 2025.

sectors.[7] Employment in professional and business services led the industry groups with over 292,000 jobs followed by trade, transportation, and utilities. Year-over-year, education and health services saw the most growth of 6.6 percent, adding 14,800 jobs in the Tampa metro area. Professional and business services, trade, transportation and utilities, and education and health services account for 53 percent of the total industry employment.[8]

Tampa's labor force was the second largest in Florida in 2021, 2022, and 2023 among 24 MDs and MSAs within the state.[9] Tampa's labor force increased from 1.556 million in March 2021 from 1.625 million in 2022 and reached a high of 1.679 million by March 2023.[10]

The following table displays the unemployment rate percentages for the bank's Tampa AA, as well as the state of Florida. As illustrated, the unemployment rate in the AA trended downward similarly to the state of Florida during the review period. The AA unemployment rate decreased from 4.3 percent in 2021 to 3.0 percent in 2023. Similarly, the unemployment rate in the state of Florida decreased from 4.7 percent in 2021 to 2.9 percent in 2023. Within the AA, Hernando County had the highest unemployment rate during the review period (5.2 percent in 2021), while Pinellas County had the lowest unemployment rate (2.8 percent in 2023).

Credit and CD Needs

To better understand the CD and economic landscapes, a local CD practitioner was contacted. This individual discussed the various opportunities and challenges across the region as well as how financial institutions can be responsive to local CD needs through lending, investment, and/or service activities. The contact indicated that there are few areas designated for revitalization and stabilization, and no empowerment or enterprise zones in the

AA. However, Pasco County did offer hurricane relief aid to those with negative impact to their primary residence by Hurricane Idalia or Tropical Storm Debby.

According to the contact, economic development incubators provide micro loans, counseling, office space, and other services. A local food and agricultural incubator program was introduced 12 years ago. The incubator provides a commercial kitchen and a host of support services. The challenge for private developers is that these areas are so large that it is difficult to secure funding to develop these areas. The contact said that the areas most impacted by economic hardship are East Tampa and Downtown Temple Terrace.

The contact also indicated that banks are active participants in the community and with the Pasco economic development initiatives. Lastly, the contact explained that some banking institutions in the area have been a tremendous help post pandemic. There has been significant impact through financial literacy initiatives.

CONCLUSIONS WITH RESPECT TO PERFORMANCE TESTS IN THE TAMPA AA

LENDING TEST

Lending levels reflect good responsiveness to credit needs of the AA. The geographic distribution of loans reflects adequate penetration throughout the AA, and the distribution of borrowers reflects adequate penetration among customers of different income levels and businesses of different revenue sizes. In addition, the bank made an adequate level of CD loans in the AA.

The analysis included 6,679 HMDA-reportable loans and 3,698 small business loans reported by the bank in the AA during the review period. Considering the significant volume of both HMDA-reportable and small business lending in the Tampa AA (Regions was a top-20 lender in this market for both loan products during the review period), these two loan products received similar weight in determining conclusions. Additionally, during 2021, 2022, and 2023 the bank originated or purchased 2,037 home purchase loans, 2,007 home improvement loans, and 1,885 home refinance loans in the AA. Thus, when considering HMDA-reportable loan categories, home purchase loans and home improvement loans received equal weight given their relative share of the total HMDA-reportable lending in this AA, followed closely by home refinance loans.

Details of the bank's mortgage and small business lending and information regarding lending by peers can be found in *Appendix F.*

Lending Activity

Lending activity is considered good. Overall, 6.5 percent of HMDA-reportable loans and 6.2 percent of small business loans were made in the Tampa AA. The percentage of the bank's HMDA-reportable and small business lending exceeds the percentage of its area deposits. In addition, the bank is an important contributor to HMDA-reportable lending in the area.

Geographic Distribution of Loans

The geographic distribution of loans reflects adequate penetration throughout the AA. As described in the following sections, overall performance for HMDA-reportable lending is poor and small business lending performance is good.

Home Purchase Loans

Home purchase lending in low-income tracts is poor. In 2021, the bank made 1.8 percent of its home purchase loans in low-income tracts, which was similar to the percentage of owner-occupied units in these tracts

(1.9 percent) but below aggregate performance of 2.3 percent. Bank performance declined in 2022 and 2023, with the bank making only 1.0 percent of its home purchase loans in low-income tracts, which was below the percentage of owner-occupied units in these tracts (1.7 percent). In 2022, the bank's lending (1.2 percent) was below aggregate performance (1.9 percent). In 2023, the bank's lending (0.9 percent) was below aggregate performance (2.0 percent). The overall poor rating is driven by the bank underperforming the aggregate in all three years.

Home purchase lending in moderate-income tracts is poor. In 2021, the bank made 12.5 percent of its home purchase loans in moderate-income tracts, which is below the percentage of owner-occupied units in these tracts (21.9 percent) and below aggregate performance of 20.7 percent. In 2022 and 2023, the bank again made 12.5 percent of its home purchase loans in moderate-income tracts, which is below the percentage of owner-occupied units in these tracts (24.4 percent). In 2022, the bank's lending (11.1 percent) was below aggregate performance (24.1 percent) and in 2023, the bank's lending (14.0 percent) was below aggregate performance (27.1 percent).

Home Improvement Loans

Home improvement lending in low-income tracts is adequate. In 2021, the bank made 1.0 percent of its home improvement loans in low-income tracts, which is below the percentage of owner-occupied units in these tracts (1.9 percent) but similar to aggregate performance of 1.1 percent. In 2022 and 2023, the bank made 0.7 percent of its home improvement loans in low-income tracts, which was below the percentage of owner-occupied units in these tracts (1.7 percent). In 2022, the bank's lending (0.6 percent) was below aggregate performance (1.0 percent). In 2023, the bank's lending (1.0 percent) was similar to aggregate performance (1.1 percent).

Home improvement lending in moderate-income tracts is adequate. In 2021, the bank made 13.3 percent of its home improvement loans in moderate-income tracts, which was below the percentage of owner-occupied units in these tracts (21.9 percent) and similar to aggregate performance of 14.2 percent. In 2022 and 2023, the bank made 16.0 percent of its home improvement loans in moderate-income tracts, which was below the percentage of owner-occupied units in these tracts (24.4 percent). In 2022, the bank's lending (15.6 percent) was similar to aggregate performance (15.1 percent) and in 2023, the bank's lending (16.6 percent) was similar to aggregate performance (17.4 percent).

Home Refinance Loans

Home refinance lending in low-income tracts is poor. In 2021, the bank made 1.1 percent of its home refinance loans in low-income tracts, which was below the percentage of owner-occupied units in these tracts (1.9 percent) and below aggregate performance of 1.4 percent. Bank performance declined in 2022 and 2023, with the bank making 0.9 percent of its home refinance loans in low-income tracts, which was below the percentage of owner-occupied units in these tracts (1.7 percent). In 2022, the bank's lending (0.6 percent) was below aggregate performance (1.8 percent). In 2023, the bank's lending (1.4 percent) was below aggregate performance (2.1 percent). The poor rating stems from the bank lending below aggregate in all three years.

Home refinance lending in moderate-income tracts is poor. In 2021, the bank made 15.1 percent of its home refinance loans in moderate-income tracts, which was below the percentage of owner-occupied units in these tracts (21.9 percent) but similar to aggregate performance of 15.0 percent. In 2022 and 2023, the bank made 17.6 percent of its home refinance loans in moderate-income tracts, which was below the percentage of owner-occupied units in these tracts (24.4 percent). In 2022, the bank's lending (18.1 percent) was below aggregate performance (21.8 percent) and in 2023, the bank's lending declined further (to 16.9 percent), which was below aggregate performance (23.4 percent).

Small Business Loans

Small business lending in low-income tracts is good. In 2021, the bank made 4.0 percent of its small business loans in low-income tracts, which was similar to the percentage of total businesses located in these tracts (4.1 percent) and aggregate performance at 4.5 percent. In 2022 and 2023, the bank made 4.3 percent of its small business loans in low-income tracts, which was above the percentage of total businesses located in these tracts (3.3 percent). In 2022, the bank's lending (3.2 percent) matched aggregate performance (3.2 percent) and in 2023, the bank's lending (5.0 percent) was above aggregate performance of 3.0 percent.

Small business lending in moderate-income tracts is good. In 2021, the bank made 22.4 percent of its small business loans in moderate-income tracts, which was similar to the percentage of total businesses located in these tracts (21.7 percent) and above aggregate performance of 20.4 percent. The bank's performance improved in 2022 and 2023, with the bank making 26.9 percent of its small business loans in moderate-income tracts, which was above the percentage of total businesses located in these tracts (23.0 percent). In 2022, the bank's lending (25.2 percent) was above aggregate performance (21.7 percent) and in 2023, the bank's lending (27.8 percent) was above aggregate performance of 20.7 percent.

No conspicuous lending gaps were identified based on an analysis of the dispersion of the loan products reviewed. The bank had activity in approximately 85 percent of all census tracts throughout the review period. Furthermore, lending data and maps did not indicate an absence of loans across LMI tracts.

Lending to Borrowers of Different Incomes and Businesses of Different Sizes

The distribution of loans based on borrower income or gross annual revenues is adequate. As described in the following sections, overall performance for HMDA-reportable lending is good while small business lending performance is adequate.

Home Purchase Loans

Home purchase lending to low-income borrowers is poor. In 2021, the bank made 2.6 percent of its home purchase loans to low-income borrowers, which was below the percentage of low-income families (21.6 percent) and below aggregate performance of 3.8 percent. Bank performance declined further in 2022 and 2023, with the bank making 1.6 percent of its home purchase loans to low-income borrowers, which was below the percentage of low-income families (21.1 percent). In 2022, the bank's lending (2.2 percent) was similar to aggregate performance (2.8 percent) and in 2023, the bank's lending (1.1 percent) was below aggregate performance (2.1 percent).

Home purchase lending to moderate-income borrowers is poor. In 2021, the bank made 11.0 percent of its home purchase loans to moderate-income borrowers, which was below the percentage of moderate-income families (17.9 percent) and below aggregate performance of 16.1 percent. Bank performance declined further in 2022 and 2023, with the bank making 8.8 percent of its home purchase loans to moderate-income borrowers, which was below the percentage of moderate-income families (18.3 percent). In 2022, the bank's lending (10.9 percent) was below aggregate performance (13.1 percent) and in 2023, the bank's lending (6.7 percent) was below aggregate performance (11.6 percent).

Home Improvement Loans

Home improvement lending to low-income borrowers is excellent. In 2021, the bank made 11.2 percent of its home improvement loans to low-income borrowers, which was below the percentage of low-income families (21.6 percent) but nearly double aggregate performance of 6.0 percent. In 2022 and 2023, the bank made 9.9 percent of its home improvement loans to low-income borrowers, which was below the percentage of

low-income families (21.1 percent). In 2022, the bank's lending (10.6 percent) was above aggregate performance (6.1 percent) and in 2023, the bank's lending (8.6 percent) was above aggregate performance (5.5 percent).

Home improvement lending to moderate-income borrowers is good. In 2021, the bank made 16.5 percent of its home improvement loans to moderate-income borrowers, which was below the percentage of moderate-income families (17.9 percent) and above aggregate performance of 15.0 percent. In 2022 and 2023, the bank made 18.4 percent of its home improvement loans to moderate-income borrowers, which was similar to the percentage of moderate-income families (18.3 percent). In 2022, the bank's lending (18.1 percent) was above aggregate performance (13.7 percent) and in 2023, the bank's lending (18.8 percent) was above aggregate performance (14.9 percent).

Home Refinance Loans

Home refinance lending to low-income borrowers is excellent. In 2021, the bank made 9.6 percent of its home refinance loans to low-income borrowers, which was below the percentage of low-income families (21.6 percent) but nearly double aggregate performance of 5.0 percent. In 2022 and 2023, the bank made 14.2 percent of its home refinance loans to low-income borrowers, which was below the percentage of low-income families (21.1 percent). In 2022, the bank's lending (15.5 percent) was above aggregate performance (9.9 percent) and in 2023, the bank's lending (12.2 percent) was above aggregate performance (8.9 percent).

Home refinance lending to moderate-income borrowers is good. In 2021, the bank made 20.3 percent of its home refinance loans to moderate-income borrowers, which was above the percentage of moderate-income families (17.9 percent) and above aggregate performance of 14.7 percent. In 2022 and 2023, the bank made 22.2 percent of its home refinance loans to moderate-income borrowers, which was above the percentage of moderate-income families (18.3 percent). In 2022, the bank's lending (22.6 percent) was above aggregate performance (20.1 percent) and in 2023, the bank's lending (21.6 percent) was above aggregate performance (19.2 percent).

Small Business Loans

Small business lending to businesses of different sizes is adequate. In 2021, the bank made 74.2 percent of its small business loans to businesses with revenues of $1 million or less, which was below the percentage of total businesses with revenues of $1 million or less (94.0 percent). The bank's performance is above aggregate performance of 46.7 percent. However, 2021 was a year in which many banks extended PPP loans as a result of the COVID-19 pandemic and were not required to capture and report the revenue of the businesses, which is reflected in the aggregate data. As a result, performance context and loan size data were considered. In 2021, the bank made loans of less than $250,000 to businesses at a similar rate (94.3 percent) as aggregate lenders (97.5 percent). In 2022 and 2023, the bank made 58.0 percent of its small business loans to businesses with revenues of $1 million or less, which was below the percentage of total businesses with revenues of $1 million or less (93.8 percent). In 2022, the bank's small business lending (57.6 percent) was above aggregate performance (52.3 percent) and in 2023, the bank's lending (58.2 percent) was above aggregate performance (54.9 percent).

CD Lending

The bank makes an adequate level of CD loans in the Tampa AA. During the review period, the bank made 17 qualified CD loans totaling $53.2 million. Specifically, the bank provided $32.4 million for affordable housing for LMI individuals, $13 million to promote economic development by financing small businesses, and $7.9 million for community services that benefit LMI individuals. This performance is below performance of other banks in the area when considering Regions presence in the AA. However, performance was deemed adequate in light of performance context. As described below, 16 of the 17 loans qualified are impactful, flexible, and/or responsive to AA needs, with a majority of dollars addressing affordable housing needs noted by community contacts.

- Two loans totaling $32.2 million for the acquisition and rehabilitation of 84 units of affordable housing contracted through HUD's Section 8 program. Post-renovation rents remain within Section 8 guidelines, and all units are occupied by low-income tenants.

- Eight SBA 504 loans for $13 million that provide financing for small businesses.

- Two LOCs totaling $6 million to support a Federally Qualified Health Center (FQHC). The FQHC provides medical assistance to residents in the AA, with primary focus on underserved communities and LMI residents throughout the AA.

- Three renewing LOCs totaling $1.7 million to a nonprofit agency serving Pinellas County. The LOCs were earmarked exclusively for the nonprofit's affordable housing building program, which seeks to create new affordable housing for LMI residents through coordinated efforts with nonprofits and government agencies in the area.

- One LOC totaling $250,000 to a nonprofit housing agency focused on the creation of affordable housing exclusively to LMI individuals and families. This LOC was used as working capital to continue the mission.

The Tampa AA also positively benefited from two CD loans totaling $700,000 benefitting multiple AAs in Florida. These loans were previously described under the *CD Lending* heading for the state of Florida.

INVESTMENT TEST

The bank made a significant level of qualified CD investments and grants in the Tampa AA, totaling $94.3 million. This amount includes seven current period investments totaling $27.2 million, 10 prior period investments still outstanding with a total balance of $66.2 million, and 124 donations totaling $970,600.

Investment types varied and addressed a range of CD needs. These include Small Business Investment Company (SBIC) funds to address small business financing needs, LIHTC projects to address affordable housing challenges, MBS supporting LMI borrowers, and a school construction bond used to improve local school facilities that primarily serve LMI students. The bank made significant use of innovative and/or complex investments to support CD initiatives. Additionally, the bank exhibits good responsiveness to credit and CD needs.

Examples of noteworthy investments and grants that are responsive to identified community development and credit needs include:

- One current-period LIHTC project totaling $15.6 million for the creation of 84 new units of affordable housing for LMI individuals and families.

- One prior period bond for $23 million to finance facility improvements at local schools that primarily serve LMI students.

- Eight SBIC fund allocations totaling $17 million to finance small businesses in the AA.

- Five donations totaling $28,500 to a nonprofit which provides free home repair services to LMI homeowners.

- Four donations totaling $87,500 to support a non-profit that provides various services to LMI residents, including workforce development training, financial coaching, and free tax preparation.

- Three donations totaling $15,000 to support an organization that offers free consulting and technical assistance services to local small businesses and aspiring entrepreneurs.

The Tampa AA also positively benefited from $1 million in investments and $1.2 million in donations benefitting the BSRA that includes the entire state of Florida. These investments and donations were previously described under the *Investment Test* heading for the state of Florida.

SERVICE TEST

As described, retail banking services are adequate in Tampa. Additionally, the bank provides a limited level of CD services in the AA.

Retail Banking Services

Service delivery systems are reasonably accessible to the geographies and individuals of different income levels throughout the Tampa AA. In deriving this conclusion, the distribution of branches by census tract income level was compared to the distribution of households and businesses among the tract categories in the AA. As the following tables show, the bank operated branches and ATMs in all census tract categories throughout the review period, with 1.7 percent of branches in low-income tracts and 29.3 percent of branches in moderate-income tracts in 2023. The percentage of branches in low-income tracts was less than the percentage of households (3.7 percent) and businesses (3.3 percent) in those tracts. The percentage of branches in moderate-income tracts exceeded households (26.9 percent) and businesses (23.0 percent) in those tracts.

The bank closed three branches during the review period, with one in a moderate-income tract and two in middle-income tracts. The one branch closure in the moderate-income tract was near three other branches, so the impact was limited. The bank did not open any branches in Tampa during the review period. Overall, the branch opening and closing have generally not adversely affected the accessibility of the bank's delivery systems.

Hours of operation are similar across branches, with drive-through hours from 8 a.m. to 5 p.m. Lobby hours at most branches are from 9 a.m. until 4 p.m. Monday through Thursday and until 5 p.m. on Friday. The bank offers lobby hours until 5 p.m. at 14 branches, including four branches in moderate-income tracts every weekday. The bank also offers Saturday lobby hours from 9 a.m. to noon at approximately half of its branches, including branches in LMI tracts. The bank offers the same suite of products and services throughout the AA. Therefore, hours and services do not vary in a way that inconveniences the AA.

The tables below show the distribution of branches and ATMs along with households and businesses by tract category.

CD Services

The bank provides a limited level of CD services based on the volume of activity relative to the opportunities available within the market and a lack of responsiveness to identified CD needs. During the review period, employees provided 451 CD service activities totaling 1,476 hours to nearly 60 different organizations operating throughout the AA. Bank staff provided financial expertise in a variety of ways, including via financial literacy and homebuyer education; service on boards of directors and committees; and other technical assistance.

Noteworthy CD services in the Tampa AA include:

- 531 hours of service conducting financial education in schools and to the youth and adults served by various nonprofit organizations.
- 96 hours of service with a variety of nonprofit affordable housing organizations and other CDCs to facilitate homebuyer education courses.
- 682 hours of service on the board of directors for 27 different organizations in the AA. Many of these organizations were focused on affordable housing and providing community services targeted to LMI

individuals, including activities that promote financial stability, access to emergency assistance and other essential services, and support for underserved communities.

- One employee provided 87 hours of service as a board member for an organization that assists children and families that have been impacted by incarceration and provides services to ex-offenders with gaining life-skills and finding employment.
- 24 hours of service on the board of directors for a CDFI focused on providing access to affordable financial products and financial education

The Tampa AA also positively benefited from 15 hours of CD service benefiting the BSRA that includes the entire state of Florida. These services were previously described under the CD services section for the state of Florida.

METROPOLITAN AREA – MIAMI MSA
(Full-Scope Review)

DESCRIPTION OF INSTITUTION'S OPERATIONS IN THE MIAMI AA

Overview

The AA includes Miami-Dade County, which comprises the entire Miami-Miami Beach-Kendall, Florida MD. As of December 31, 2023, the bank operated 37 branches in the AA, representing 13.6 percent of branches in the state of Florida and 2.9 percent of its total branches. Of the branches in the AA, one is a low-income census tract, 11 are in moderate-income census tracts, seven are in middle-income census tracts, 17 are in upper-income census tracts and one is in a census tract with unknown income. As a percentage within the state of Florida, 15.6 percent of the bank's deposit volume and 12.9 percent of its HMDA-reportable and small business loans by number are located in the Miami AA.

The AA is a highly competitive banking market with numerous institutions operating in the area. Specifically, there are 57 depository institutions operating 585 branches in the AA. Regions ranked 12th in deposit market share with 2.0 percent of total deposits ($3.9 billion). Bank of America had the largest deposit market share at 14.9 percent, followed by JPMorgan Chase Bank and Wells Fargo Bank with 11.2 percent and 10.1 percent of deposit market share, respectively.

For HMDA-reportable lending, Regions originated and/or purchased 1.3 percent of the total HMDA-reportable loans in the AA in each year of the review period (2021, 2022, and 2023). Regions was 17th out of 812 reporters in 2021; 18th out of 745 reporters in 2022; and 15th out of 623 reporters in 2023. Regions Bank's ranking indicates that it is an important contributor for HMDA-reportable lending in the Miami AA. United Wholesale Mortgage was the top HMDA reporter in the market for all three years.

For small business lending, Regions ranked 14th out of 239 reporters in 2021 with 1.2 percent of small business loans. In 2022, the bank ranked 25th out of 187 reporters with 0.22 percent of total small business loans. In 2023, Regions ranked 18th out of 166 reporters with 0.36 percent of total small business loans. American Express was the top small business reporter in the market for 2021, 2022 and 2023. As with HMDA-reportable lending, Regions is an active small business lender in this AA.

AA Demographics, Population, and Income Characteristics

The AA is located in the southeastern tip of the state along the Atlantic Ocean and is the most populous county in the state of Florida. The AA also borders and includes portions of the Everglades and is densely populated, with a total population of 2.7 million.

In 2021, the AA contained 519 census tracts: 30 low-income tracts (5.8 percent), 144 moderate-income tracts (27.7 percent), 150 middle-income tracts (28.9 percent), 177 upper-income tracts (34.1 percent), and 18 unknown-income tracts (3.5 percent). In 2022, there was a census tract boundary change resulting in the AA containing 707 census tracts: 34 low-income tracts (4.8 percent), 176 moderate-income tracts (24.9 percent), 221 middle-income tracts (31.3 percent), 243 upper-income tracts (34.4 percent), and 33 unknown-income tracts (4.7 percent).

For purposes of classifying borrower income, this evaluation uses the FFIEC estimated the median family income for the relevant area. As the following table shows, the median family income increased from $61,000 in 2021 to $74,700 in 2023.

Borrower Income Levels
Miami-Miami Beach-Kendall, FL MD

FFIEC Estimated Median Family Income		Low	Moderate	Middle	Upper
		0 - 49.99%	50% - 79.99%	80% - 119.99%	120% - & above
2021	**$61,000**	0 - $30,499	$30,500 - $48,799	$48,800 - $73,199	$73,200 - & above
2022	**$68,300**	0 - $34,149	$34,150 - $54,639	$54,640 - $81,959	$81,960 - & above
2023	**$74,700**	0 - $37,349	$37,350 - $59,759	$59,760 - $89,639	$89,640 - & above

There are 619,475 total families in the AA. Of these families, 23.1 percent were low-income, 17.3 percent were moderate-income, 17.7 percent were middle-income, and 42.0 percent were upper-income. Of the total families, 12.7 percent had incomes below the poverty level, which is higher than the families below poverty for the state of Florida (9.5 percent). Additionally, poverty rates are higher in LMI tracts, with 31.1 percent of the families residing in low-income tracts living below the poverty level and 19.5 percent of the families residing in moderate-income tracts living below the poverty level. Moreover, 39 percent of low-income families and 40 percent of moderate-income families reside in moderate-income tracts. This data indicates that lending challenges likely occur in moderate-income tracts.

Housing Characteristics

There are 1,032,310 total housing units in the AA, of which 45.1 percent are owner-occupied, 42.3 percent are rental units, and 12.6 percent are vacant. However, fewer home ownership opportunities exist in LMI tracts. Specifically, 72.4 percent of all housing units in low-income tracts and 60.0 percent of all housing units in moderate-income tracts are rental units.

The median age of the housing stock in the AA was 47 years, which is older than the overall median age for Florida (34 years). Housing units in LMI census tracts in the AA were older, with a median housing stock age of 54 years in low-income tracts and 56 years in moderate-income tracts. The older age of homes is an indicator of potential opportunity for home improvement loans in LMI tracts.

The median housing value in the AA was $310,663, which is higher than the median housing value in Florida ($232,000). Median gross rent in the AA was $1,373 per month, which was higher than the median gross rent in the state of Florida ($1,218 per month). Additionally, the affordability ratio for the AA (17.4 percent) is lower than the affordability ratio for the state of Florida (24.9 percent). Housing cost burden is a challenge in the AA. Data shows that the percentage of renters with rent costs greater than 30 percent of income is 59.9 percent, which is higher than the state of Florida at 52.6 percent.

According to the Florida Realtors, the median sale price of a single-family home in the larger Miami MSA for December 2023 was $592,995, representing a 6.4 percent increase compared to December 2022.[11] Interest from foreign buyers continues to drive up housing prices, with housing prices being out of reach for even middle-income households. This means that more households are seeking out rental housing, driving rents up further. Housing data suggests that housing in the AA is not affordable without subsidy. A similar sentiment was shared

[11] "Florida Residential Market Sales Activity." *Florida Realtors*, Year-End-2023-Fla-MSA-summary.pdf. Accessed 10 Dec. 2024.

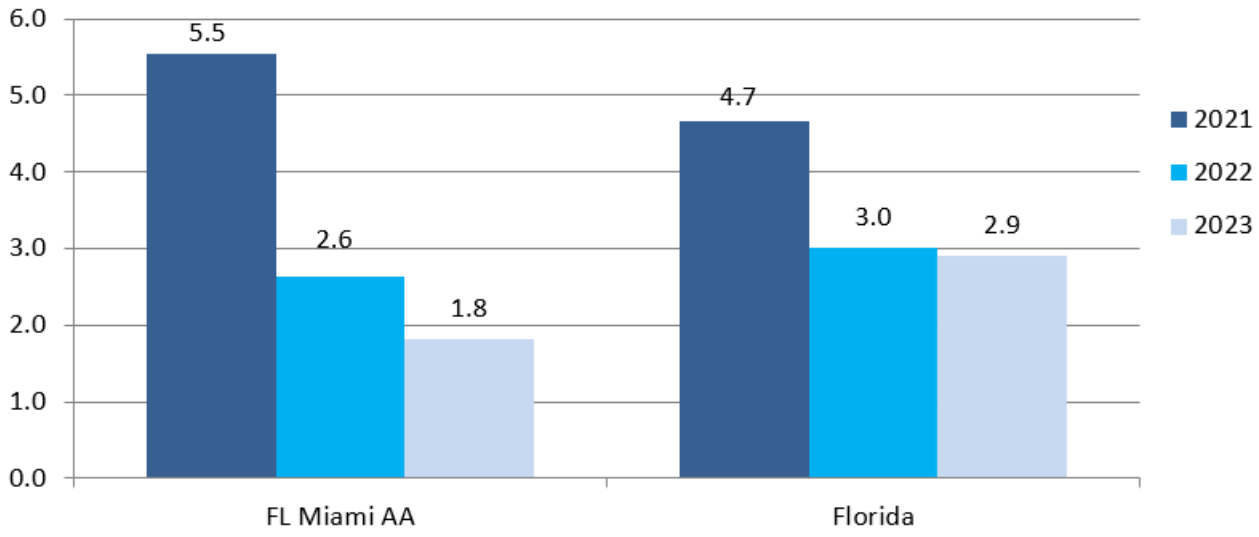
by a community contact who stated that the relocation of people from other parts of the country drove housing prices high, resulting in decreased affordability, especially for LMI borrowers.

Economic Conditions

Miami is a major transportation hub with the Port of Miami providing access to international shipping and Miami International Airport serving as a major travel hub. Miami also serves as a financial center with several international banks. According to the Bureau of Labor Statistics during the first quarter of 2023, the largest industries by number of employees include healthcare and social assistance (166,237 employees), retail trade (138,825 employees), and government (136,758 employees). Major private employers in the AA are the University of Miami, Baptist Health South Florida, American Airlines, Carnival Cruise Lines, and Miami Children's Hospital.[12] Major public employers in the AA are Miami-Dade County Public Schools, Miami-Dade County, Federal Government, Florida State Government, and Jackson Health System.[13]

The following table shows the unemployment rate for the AA and the state of Florida for 2021, 2022 and 2023. The unemployment rate for the AA decreased from 5.5 percent in 2021 to 1.8 percent in 2023. While the unemployment rate for the AA in 2021 was higher than the state of Florida, it has since improved and in 2023 was slightly below the state of Florida.

Unemployment Rates - FL Miami



Not Seasonally Adjusted. Source: Bureau of Labor Statistics

Credit and CD Needs

As part of the CRA examination, information was obtained from a local affordable housing specialist and an individual specializing in economic development for the area.

The housing specialist stated that there is a considerable shortage of affordable housing units driven by an influx of residents over the past five years. As a result, housing prices rose sharply, especially during the pandemic,

[12] "Top Employers." *Miami-Dade Beacon Council*, www.beaconcouncil.com/data/economic-overview/top-employers/. Accessed 7 May 2024.
[13] Ibid.

making it even more difficult for LMI individuals to become homeowners. With rising interest rates and high housing prices, LMI individuals cannot afford houses that they may have previously been able to buy. Rental rates have also increased sharply in the area. The shortage and affordability of houses is causing many LMI individuals to leave the county and/or state and relocate to areas where housing is more affordable.

The individual engaged in economic development stated that the business community does not have credit needs that are difficult to obtain. Businesses seem to be optimistic about the direction of the economy and don't have a high need to borrower funds as revenues are improving. Regional and large banks are willing to collaborate with CD initiatives and banks are engaged and accessible.

CONCLUSIONS WITH RESPECT TO PERFORMANCE TESTS IN THE MIAMI AA

LENDING TEST

Lending levels reflect good responsiveness to credit needs of the AA. The geographic distribution of loans reflects good penetration throughout the AA, and the distribution of borrowers reflects adequate penetration among customers of different income levels and businesses of different revenue sizes. In addition, the bank made an excellent level of CD loans in the AA.

The analysis included 2,537 HMDA-reportable loans and 3,168 small business loans reported by the bank in the AA during the review period. Therefore, small business loans received greater weight in determining conclusions. Additionally, during 2021, 2022, and 2023, the bank originated or purchased 960 home refinance loans, 811 home purchase loans, and 477 home improvement loans in the AA. Thus, when considering HMDA-reportable loan categories, greatest weight was assigned to home refinance loans given its relative share of total HMDA-reportable lending in this AA, followed by home purchase loans and, to a lesser extent, home improvement loans.

Details of the bank's mortgage and small business lending and information regarding lending by peers can be found in *Appendix F.*

Lending Activity

Lending activity is considered good. Overall, 3.5 percent of HMDA-reportable loans and 5.7 percent of small business loans were made in the AA. The percentage of the bank's HMDA-reportable and CRA small business lending exceeds the percentage of its area deposits. In addition, the bank is an important contributor to HMDA-reportable lending in the area.

Geographic Distribution of Loans

The geographic distribution of loans reflects good penetration throughout the Miami AA. As described in the following sections, overall performance for small business lending performance is excellent and HMDA-reportable lending is poor. While small business loans were given greater weight in deriving conclusions in the AA, the bank's poor performance in HMDA-reportable lending was also considered in deriving an overall geographic distribution conclusion of good, especially when considering that Regions Bank is a high volume contributor to HMDA-reportable lending in the AA and community contacts noted affordable housing as the primary need in the AA.

Small Business Loans

Small business lending in low-income tracts is excellent. In 2021, the bank made 3.8 percent of its small business loans in low-income tracts, which was similar to the percentage of total businesses located in these tracts

(3.4 percent) and aggregate performance of 3.1 percent. In 2022 and 2023, the bank made 4.0 percent of its small business loans in low-income tracts, which was above the percentage of total businesses located in these tracts (2.7 percent). In 2022, the bank's lending (3.3 percent) was above aggregate performance (2.4 percent) and in 2023, the bank's lending (4.5 percent) was nearly double aggregate performance of 2.3 percent.

Small business lending in moderate-income tracts is good. In 2021, the bank made 27.7 percent of its small business loans in moderate-income tracts, which was above the percentage of total businesses located in these tracts (22.4 percent) and above aggregate performance of 22.2 percent. Performance declined in 2022 and 2023, with the bank making 24.0 percent of its small business loans in moderate-income tracts, which was above the percentage of total businesses located in these tracts (20.4 percent). In 2022, the bank's lending (22.9 percent) was also above aggregate performance (18.5 percent) and in 2023, the bank's lending (24.8 percent) was again above aggregate performance of 18.6 percent.

Home Refinance Loans

Home refinance lending in low-income tracts is adequate. In 2021, the bank made 1.0 percent of its home refinance loans in low-income tracts, which was below the percentage of owner-occupied units in these tracts (2.0 percent) and similar to aggregate performance of 1.1 percent. Bank performance improved in 2022 and 2023, with the bank making 1.6 percent of its home refinance loans in low-income tracts, which was similar to the percentage of owner-occupied units in these tracts (2.0 percent). In 2022, the bank's lending (1.2 percent) was similar to aggregate performance (2.2 percent) and in 2023, the bank's lending (2.5 percent) matched aggregate performance (2.5 percent).

Home refinance lending in moderate-income tracts is poor. In 2021, the bank made 14.8 percent of its home refinance loans in moderate-income tracts, which was below the percentage of owner-occupied units in these tracts (21.4 percent) and below aggregate performance of 16.5 percent. Bank performance declined in 2022 and 2023, with the bank making 10.7 percent of its home refinance loans in moderate-income tracts, which was below the percentage of owner-occupied units in these tracts (18.3 percent). In 2022, the bank's lending (9.9 percent) was below aggregate performance (15.5 percent) and in 2023, the bank's lending (12.5 percent) was below aggregate performance (16.2 percent).

Home Purchase Loans

Home purchase lending in low-income tracts is poor. In 2021, the bank made 0.6 percent of its home purchase loans in low-income tracts, which was below the percentage of owner-occupied units in these tracts (2.0 percent) and below aggregate performance of 2.0 percent. Bank performance improved in 2022 and 2023, with the bank making 2.4 percent of its home purchase loans in low-income tracts, which was similar to the percentage of owner-occupied units in these tracts (2.0 percent). However, bank performance remained below aggregate performance in 2022 and 2023. Specifically, in 2022 the bank's lending (2.3 percent) was below aggregate performance (3.0 percent) and in 2023, the bank's lending (2.5 percent) was below aggregate performance (3.4 percent).

Home purchase lending in moderate-income tracts is poor. In 2021, the bank made 13.8 percent of its home purchase loans in moderate-income tracts, which was below the percentage of owner-occupied units in these tracts (21.4 percent) and below aggregate performance of 18.4 percent. Bank performance declined in 2022 and 2023, with the bank making 10.4 percent of its home purchase loans in moderate-income tracts, which was below the percentage of owner-occupied units in these tracts (18.3 percent). In 2022, the bank's lending (8.8 percent) was below aggregate performance (15.7 percent) and in 2023, the bank's lending (12.3 percent) was below aggregate performance (16.8 percent).

Home Improvement Loans
Home improvement lending in low-income tracts is good. In 2021, the bank made 0.8 percent of its home improvement loans in low-income tracts, which was below the percentage of owner-occupied units in these tracts (2.0 percent) but similar to aggregate performance of 0.9 percent. Bank performance improved in 2022 and 2023, with the bank making 1.7 percent of its home improvement loans in low-income tracts, which was similar to the percentage of owner-occupied units in these tracts (2.0 percent). In 2022, the bank's lending (1.5 percent) was above aggregate performance (1.0 percent) and in 2023, the bank's lending (1.9 percent) was above aggregate performance (1.2 percent).

Home improvement lending in moderate-income tracts is excellent. In 2021, the bank made 15.3 percent of its home improvement loans in moderate-income tracts, which was below the percentage of owner-occupied units in these tracts (21.4 percent) but above aggregate performance of 9.9 percent. In 2022 and 2023, the bank made 14.2 percent of its home improvement loans in moderate-income tracts, which was below the percentage of owner-occupied units in these tracts (18.3 percent). In 2022, the bank's lending (10.7 percent) was above aggregate performance (9.3 percent) and in 2023, the bank's lending (18.8 percent) was nearly double aggregate performance (10.4 percent).

No conspicuous lending gaps were identified based on an analysis of the dispersion of the loan products reviewed. The bank had activity in approximately 75 percent of all census tracts throughout the review period. Furthermore, lending data and maps did not indicate an absence of loans across LMI tracts.

Lending to Borrowers of Different Incomes and Businesses of Different Sizes
The distribution of borrowers based on customer income or gross annual revenues is adequate. As described in the following sections, overall performance for small business lending is adequate while HMDA-reportable lending performance is good.

Small Business Loans
Small business lending to businesses of different sizes is adequate. In 2021, the bank made 70.6 percent of its small business loans to businesses with revenues of $1 million or less, which was below the percentage of total businesses with revenues of $1 million or less (93.2 percent). The bank's performance is above aggregate performance of 42.3 percent. However, 2021 was a year in which many banks extended PPP loans as a result of the COVID-19 pandemic and were not required to capture and report the revenue of the businesses, which is reflected in the aggregate data. As a result, performance context and loan size data were considered. In 2021, the bank made loans of less than $250,000 to businesses at a similar rate (93.8 percent) as aggregate lenders (98.0 percent). In 2022 and 2023, the bank made 57.4 percent of its small business loans to businesses with revenues of $1 million or less, which was below the percentage of total businesses with revenues of $1 million or less (92.8 percent). In 2022, bank lending (56.0 percent) was above aggregate performance (52.0 percent) and in 2023, the bank's lending (58.3 percent) was above with aggregate performance (54.0 percent).

Home Refinance Loans
Home refinance lending to low-income borrowers is good. In 2021, the bank made 2.1 percent of its home refinance loans to low-income borrowers, which was below the percentage of low-income families (24.0 percent) but similar to aggregate performance of 1.3 percent. Bank performance improved in 2022 and 2023, with the bank making 3.6 percent of its home refinance loans to low-income borrowers, which was below the percentage of low-income families (23.1 percent). In 2022, the bank's lending (3.5 percent) was above aggregate performance (2.8 percent) and in 2023, the bank's lending (3.8 percent) was above aggregate performance (3.1 percent).

Home refinance lending to moderate-income borrowers is good. In 2021, the bank made 8.2 percent of its home refinance loans to moderate-income borrowers, which was below the percentage of moderate-income families (16.6 percent) but above aggregate performance of 6.0 percent. Bank performance improved in 2022 and 2023, with the bank making 10.7 percent of its home refinance loans to moderate-income borrowers, which was below the percentage of moderate-income families (17.3 percent). In 2022, the bank's lending (12.8 percent) was above aggregate performance (8.1 percent) and in 2023, the bank's lending (6.3 percent) was similar to aggregate performance (5.6 percent).

Home Purchase Loans

Home purchase lending to low-income borrowers is adequate. In 2021, the bank made 0.9 percent of its home purchase loans to low-income borrowers, which was below the percentage of low-income families (24.0 percent) but similar to aggregate performance of 0.5 percent. In 2022 and 2023, the bank made 0.6 percent of its home purchase loans to low-income borrowers, which was below the percentage of low-income families (23.1 percent). In 2022, the bank's lending (1.2 percent) was above aggregate performance (0.6 percent) and in 2023, the bank made no home purchase loans to low-income borrowers, which was similar to aggregate performance of only 0.3 percent.

Home purchase lending to moderate-income borrowers is good. In 2021, the bank made 5.2 percent of its home purchase loans to moderate-income borrowers, which was below the percentage of moderate-income families (16.6 percent) but similar to aggregate performance of 4.4 percent. In 2022 and 2023, the bank made 4.3 percent of its home purchase loans to moderate-income borrowers, which was below the percentage of moderate-income families (17.3 percent). In 2022, the bank's lending (5.0 percent) was above aggregate performance (3.0 percent) and in 2023, the bank's lending (3.4 percent) was above aggregate performance (2.0 percent).

Home Improvement Loans

Home improvement lending to low-income borrowers is excellent. In 2021, the bank made 3.4 percent of its home improvement loans to low-income borrowers, which was below the percentage of low-income families (24.0 percent) but more than double aggregate performance of 1.4 percent. Bank performance improved in 2022 and 2023, with the bank making 4.7 percent of its home improvement loans to low-income borrowers, which was below the percentage of low-income families (23.1 percent). In 2022, the bank's lending (7.8 percent) was above aggregate performance (1.7 percent) and in 2023, the bank's lending (0.6 percent) was similar to aggregate performance (0.9 percent).

Home improvement lending to moderate-income borrowers is excellent. In 2021, the bank made 9.3 percent of its home improvement loans to moderate-income borrowers, which was below the percentage of moderate-income families (16.6 percent) but more than double aggregate performance of 3.8 percent. In 2022 and 2023, the bank made 5.8 percent of its home improvement loans to moderate-income borrowers, which was below the percentage of moderate-income families (17.3 percent). In 2022, the bank's lending (3.4 percent) was similar to aggregate performance (3.8 percent) and in 2023, the bank's lending (9.1 percent) was more than double aggregate performance (3.5 percent).

CD Lending

The bank makes an excellent level of CD loans in the Miami AA. During the review period, the bank made 14 qualified CD loans totaling $105 million. Specifically, the bank provided $82.6 million for affordable housing for LMI individuals, $19.1 million for community services that benefit LMI individuals, and $3.3 million to promote economic development by financing small businesses. When considering the bank's presence within the AA, the performance is similar to that of other banks in the area rated excellent. As described below, several of the qualified

loans are impactful, flexible, and/or responsive to AA needs, with a majority of dollars addressing the affordable housing needs noted by community contacts.

- Two loans totaling $31.8 million for the construction of 140 new units of multifamily affordable housing. The newly constructed apartments are income restricted through the Housing Credit Program and available only to LMI families.

- One loan totaling $19.2 million for the rehabilitation of 186 units of multifamily affordable housing operating under LIHTCs, which are complex. Additionally, the rehabilitation was done as "tenant-in-place", meaning that families were not displaced during the renovations.

- Two loans made in partnership with other lenders for the financing of 140 new units of affordable housing using LIHTCs. Regions Bank was a participating lender, with its participating amount totaling $15.9 million.

- One loan totaling $12.5 million for the rehabilitation of 141 units of multifamily affordable housing that are income restricted. Post-renovation rents remain unchanged, with units available only to LMI families.

- One LOC totaling $2 million to a local CDFI for lending and investing exclusively to LMI census tracts in the AA.

The Miami AA also positively benefited from two LOCs totaling $700,000 that impacted multiple AAs in Florida . These loans were previously described under the *CD Lending* heading for the state of Florida. Moreover, the AA positively benefited from two LOCs totaling $9.5 million to a national CDFI with prioritization in nine AAs, including Miami. The CDFI LOCs were previously described under the *CD Lending* heading for the institution.

INVESTMENT TEST

The bank made an excellent level of qualified CD investments and grants in the Miami AA totaling $96.3 million. This amount includes five current period investments totaling $77.4 million, 17 prior period investments still outstanding with a total balance of $18.2 million, and 67 donations totaling $694,800.

Investment types varied and addressed a range of CD needs. These include NMTC investments to stimulate economic development in LMI tracts, LIHTC projects to address affordable housing challenges, and MBS supporting LMI borrowers. The bank makes extensive use of innovative and/or complex investments to support CD initiatives. Additionally, the bank exhibits excellent responsiveness to credit and CD needs.

Noteworthy investments and grants provided during the review period that were responsive to CD needs identified in performance context include:

- Three current-period LIHTC projects totaling $71.5 million. These three LIHTC investments helped to build 467 new units of affordable housing for LMI individuals, which was responsive to the need for affordable housing in the AA.

- A $3.9 million NMTC investment that created 34 new jobs at a healthcare clinic that is in an LMI tract and primarily serves LMI patients.

- Four donations for $24,000 to support a CDFI that focuses on affordable housing development in the AA.

- Three donations totaling $106,000 to support a local non-profit that provides various services to LMI individuals and families, including financial coaching, employment assistance, credit counseling, and public benefits enrollment.

- Two donations totaling $230,000 to support a tuition-free executive leadership training and mentorship program for early-stage entrepreneurs from disadvantaged communities and backgrounds.

The Miami AA also positively benefited from $1 million in investments and $1.2 million in donations benefiting the BSRA that includes the entire state of Florida. These investments and donations were previously described under the *Investment Test* heading for the state of Florida.

SERVICE TEST

As described, retail banking services are good in Miami. Additionally, the bank provides a limited level of CD services in its AA.

Retail Banking Services

Service delivery systems are accessible to the bank's geographies and individuals of different income levels throughout the Miami AA. In deriving this conclusion, the distribution of the bank's branches by census tract income level was compared to the distribution of households and businesses among the tract categories in the AA. As the following tables show, the bank operated branches and ATMs in all census tract categories throughout the review period, with 2.7 percent of branches in low-income tracts and 29.7 percent of branches in moderate-income tracts in 2023. The percentage of branches in low-income tracts was less than the percentage of households (4.9 percent) and the same as the percentage of businesses (2.7 percent) in those tracts. The percentage of branches in moderate-income tracts exceeded households (27.2 percent) and businesses (20.4 percent) in those tracts.

The bank closed three branches, had two relocations and opened one branch during the review period. Two of the branch closures were in moderate-income tracts, while one was in a middle-income tract. The two relocations and one branch opening were in upper-income tracts. Overall, the branch opening and closing have generally not adversely affected the accessibility of the bank's delivery systems.

Hours of operation are nearly identical across branches, with drive-through hours beginning at 8 a.m., lobby hours from 9 a.m. until 4 p.m. Monday through Thursday and until 5 p.m. on Friday. The bank also offers Saturday lobby hours from 9 a.m. to noon or 1 p.m. at most branches. The bank offers the same suite of products and services throughout the AA. Therefore, hours and services do not vary in a way that inconveniences the AA.

The tables below show the distribution of branches and ATMs along with households and businesses by tract category.

DTO - Drive thru only is a subset of total branches
SA = Stand Alone ATM is a subset of total ATMs

CD Services

The bank provides a limited level of CD services based on the volume of activity relative to the opportunities available within the market and a lack of responsiveness to identified CD needs. During the review period, bank employees provided 227 CD service activities totaling 843 hours to 27 organizations operating throughout the AA. Bank staff provided their financial expertise in a variety of ways, including financial literacy and homebuyer education; service on board of directors; grant review; and other technical assistance and advisory services.

Noteworthy CD services in the Miami AA include:

- 161 hours of service conducting financial education in schools and to the youth and adults served by various nonprofit organizations.

- Multiple employees provided 128 hours of service activities, including service on the board of directors and other technical assistance, to an organization that works with youth in the foster care system, utilizing

community volunteers to help these youth access essential services and working towards permanent placement with families.

- 63 hours of service to four different organizations facilitating homebuyer education courses.

- One employee provided 13 hours of service as a board member for an organization that is working to collectively address the many interrelated factors that impact community and individual well-being and resilience.

The Miami AA also positively benefited from 15 hours of CD service benefiting the BSRA that includes the entire state of Florida. These services were previously described under the CD services section for the state of Florida.

METROPOLITAN AREAS
LIMITED-SCOPE REVIEW

The following MSA AAs were reviewed using limited-scope examination procedures. Through these procedures, conclusions regarding the institution's CRA performance are drawn from the review of available facts and data, including performance and demographic information. Refer to the tables in *Appendices G and H* for additional information regarding these AAs.

DESCRIPTION OF INSTITUTION'S OPERATIONS IN FLORIDA MSA AAs

MSA AA	AA Delineation/Counties	# Branches *(as of 12/31/2023)*	Deposits ($000s) *(as of June 30, 2023)*
Daytona	Volusia	7	$436,149
Ft. Lauderdale	Broward	14	$1,055,418
Ft. Myers	Lee	8	$654,898
Ft. Walton	Okaloosa & Walton	13	$1,295,348
Gainesville	Alachua	1	$81,414
Homosassa Springs	Citrus	4	$300,957
Jacksonville	Clay, Duval, Nassau, & St. Johns	14	$1,124,485
Lakeland	Polk	3	$284,741

The key performance standards of the Lending Test for limited-scope areas included geographic distribution, borrower distribution, and CD loans. For the geographic distribution of loans, performance was poor in Ft. Myers, Ft. Walton, Lakeland, Naples, and Sarasota and adequate in the remaining AAs. Borrower distribution was good in Homosassa Springs, Ocala, and West Palm Beach and adequate in the remaining AAs. Qualifying amounts and conclusions for CD loans were as follows: $6.3 million in Daytona (adequate); $19.8 million in Ft. Lauderdale (relatively high); $2.8 million in Ft. Myers (low level); $15.1 million in Ft. Walton (adequate); $25.4 million in Jacksonville (relatively high); $1.5 million in Lakeland (low level); $15.3 million in Ocala (relatively high); $112.3 million in Orlando (excellent); $2.8 million in Palm Bay (low level); $2.6 million in Pensacola (low level); $5.8 million in Sarasota (low level); $1.2 million in The Villages (low level); and $5.1 million in West Palm Beach (low level). The bank made no CD loans in Gainesville, Homosassa Springs, Naples, Panama City, Punta Gorda, or Tallahassee.

Qualifying amounts and conclusions for the bank's investment and grant activity in limited-scope MSA areas were as follows: $3.7 million in Daytona (adequate level), $21.6 million in Ft. Lauderdale (significant level), $1.4 million in Ft. Myers (few, if any), $5 million in Ft. Walton (poor level), $16.4 million in Gainesville (excellent level), $826,300 in Homosassa Springs (few, if any), $19.2 million in Jacksonville (significant level), $4.3 million in Lakeland (significant level), $26.9 million in Naples (excellent level), $20.9 million in Ocala (excellent level), $108.9 million in Orlando (excellent level), $7.4 million in Palm Bay (significant level), $22.9 million in Panama City (excellent level), $7.9 million in Pensacola (poor level), $918,000 in Punta Gorda

(few, if any), $3.4 million in Sarasota (poor level), $15.8 million in Tallahassee (excellent level), $10.9 million in The Villages (excellent level), $20.5 million in West Palm Beach (excellent level).

The performance standards of the Service Test for limited-scope MSA areas included retail banking and CD services. Conclusions for retail banking services were as follows: good in Homosassa Springs, Orlando, and Pensacola; adequate in Daytona, Ft. Myers, Ft. Walton, Jacksonville, Panama City, Sarasota, The Villages and West Palm Beach; and poor in Gainesville, Naples, Ocala, Palm Bay, Punta Gorda, and Tallahassee. Qualifying hours and conclusions for CD services were as follows: 66 hours in Daytona (poor); 386 hours in Ft. Lauderdale (adequate); 578 hours in Ft. Myers (good); 12 hours in Ft. Walton (very poor); 35 hours in Gainesville (adequate); 0 hours is Homosassa Springs (very poor); 542 hours in Jacksonville (adequate); 29 hours in Lakeland (poor); 212 hours in Naples (adequate); 167 hours in Ocala (poor); 638 hours in Orlando (poor); 84 hours in Palm Bay (poor); 136 hours in Panama City (poor); 94 hours in Pensacola (poor); 40 hours in Punta Gorda (poor); 504 hours in Sarasota (adequate); 97 hours in Tallahassee (adequate); 0 hours in The Villages (very poor); 768 hours in West Palm Beach (leader). All MSA AAs reviewed under limited-scope procedures also positively benefited from 15 hours of CD service benefiting the BSRA that includes the entire state of Florida. These services were previously described under the CD services section for the state of Florida.

Performance in the limited-scope AAs did not impact overall performance for the state.

NONMETROPOLITAN STATEWIDE AREAS
LIMITED-SCOPE REVIEW

The following non-MSA AAs were reviewed using limited-scope examination procedures. Through these procedures, conclusions regarding the institution's CRA performance are drawn from the review of available facts and data, including performance and demographic information. Refer to the tables in *Appendices G and H* for additional information regarding these AAs.

DESCRIPTION OF INSTITUTION'S OPERATIONS IN FLORIDA NON-MSA AAs

Non-MSA AA	AA Delineation/Counties	# Branches *(as of 12/31/2023)*	Deposits ($000s) *(as of June 30, 2023)*
Northern FL	Calhoun, Holmes, Jackson & Washington	4	$253,517
Okeechobee	Okeechobee	1	$39,296

CONCLUSIONS WITH RESPECT TO PERFORMANCE TESTS

The following table compares conclusions regarding performance in each limited-scope non-MSA AA to overall performance for the state of Florida.

Performance in the Limited-Scope Review Non-MSA Assessment Areas			
Non-MSA AA	**Lending Test**	**Investment Test**	**Service Test**
Northern FL	Not Consistent (Below)	Not Consistent (Below)	Consistent
Okeechobee	Not Consistent (Below)	Not Consistent (Below)	Not Consistent (Exceeds)

The key performance standards of the Lending Test for limited-scope areas included geographic distribution, borrower distribution, and CD loans. For the geographic distribution of loans, performance was poor for Northern Florida and Okeechobee. Borrower distribution was adequate for Northern Florida and Okeechobee. The bank made $1 million in CD loans in Northern Florida (low level) and made no qualifying CD loans in Okeechobee.

Qualifying amounts and conclusions for the bank's investment and grant activity in limited-scope non-MSA areas were as follows: $2.7 million in Northern Florida (adequate level) and $103,500 in Okeechobee (few, if any).

The performance standards of the Service Test for limited-scope MSA areas included retail banking and CD services. Conclusions for retail banking services were as follows: excellent in Okeechobee and adequate in Northern Florida. Qualifying hours and conclusions for CD services were as follows: 114 hours in Northern Florida (adequate) and 18 hours in Okeechobee (poor). All MSAs AAs reviewed under limited-scope procedures also positively benefited from 15 hours of CD service benefiting the BSRA that includes the entire state of Florida. These services were previously described under the CD services section for the state of Florida.

Performance in the limited-scope AAs did not impact overall performance for the state.

ALABAMA

CRA RATING FOR ALABAMA: SATISFACTORY
The Lending Test is rated: Low Satisfactory
The Investment Test is rated: Outstanding
The Service Test is rated: High Satisfactory

Major factors contributing to this rating include:

- The geographic distribution of loans reflects adequate penetration throughout Alabama AAs.
- The distribution of borrowers reflects adequate penetration throughout Alabama AAs.
- The bank makes a relatively high level of CD loans in Alabama.
- The bank makes an excellent level of qualified CD investments and grants in Alabama.
- Retail banking services, which includes accessibility of delivery systems, changes in branch locations, and reasonableness of hours and services, are good.
- The bank is a leader in providing CD service activities in Alabama

SCOPE OF EXAMINATION

A full-scope review was conducted for the following AAs in Alabama:
- Birmingham
- Mobile

Limited-scope reviews were conducted for the remaining 14 AAs:
- Anniston
- Auburn
- Coffee-Covington-Escambia
- Daphne-Fairhope-Foley
- Decatur
- Dothan
- Florence
- Gadsden
- Huntsville
- Montgomery
- Northern Alabama
- Southern Alabama
- Talladega-Tallapoosa
- Tuscaloosa

The time period, products, and affiliates evaluated for these AAs are consistent with the scope discussed in the institution section of this report.

DESCRIPTION OF INSTITUTION'S OPERATIONS IN ALABAMA

As of June 30, 2023, Regions Bank had $31.9 billion in deposits in Alabama, accounting for 24.6 percent of its total deposits. Regions Bank operated 184 branch offices in Alabama as of December 31, 2023, representing 14.5 percent of its total branches. HMDA-reportable lending in Alabama accounted for 19.4 percent of total institutional HMDA-reportable lending by number of loans and 15.3 percent by dollar volume. Small business lending in Alabama accounted for 13.2 percent of the bank's total small business lending by number of loans and 14.8 percent by dollar volume. Overall, the bank's HMDA-reportable and small business lending activity in the state was less than the percentage of total institutional deposits.

The following table shows lending activity from January 1, 2021 through December 31, 2023.

CONCLUSIONS WITH RESPECT TO PERFORMANCE TESTS IN ALABAMA

LENDING TEST

Overview

The Lending Test rating for the state of Alabama is Low Satisfactory. The rating is a result of performance in each characteristic of the Lending Test applicable to the state, including Lending Activity (adequate); Geographic Distribution (adequate); Borrower Distribution (adequate); and CD Lending (relatively high level). Highlights of each characteristic are found in the sections that follow, with additional descriptions and details within each AA.

Lending Activity

Lending levels reflect adequate responsiveness to the credit needs of Alabama AAs. The total number and dollar volume of HMDA-reportable and small business loans was considered in determining Lending Activity conclusions, as well as competitive factors and the bank's overall presence within each AA. Statewide

conclusions are derived from conclusions within each AA as detailed in the *Lending Activity* section of the Birmingham and Mobile AAs.

Geographic and Borrower Distribution

The geographic distribution of HMDA-reportable and small business loans reflects adequate dispersion throughout the AAs in Alabama, and the distribution of borrowers by customer income and revenue size of businesses is adequate. The analyses of HMDA-reportable and small business lending within each full-scope AA in Alabama are discussed in detail later in this report.

CD Lending

The bank made a relatively high level of CD loans in Alabama. During the review period, the bank originated or renewed $200.3 million in qualified CD loans directly benefiting Alabama AAs. More information on CD loans can be found in the full-scope AA sections of this report.

The bank is a leader in making CD loans in the Birmingham full-scope AA but made a low level of CD loans in the Mobile full-scope AA. While the bank was a leader in making CD loans in the Birmingham AA, performance in the Mobile full-scope AA and across 13 of the limited-scope AAs was noticeably weaker, with 12 of those areas considered poor or very poor. Additionally, the bank has notable market share in the Mobile full-scope AA and most of the limited-scope AAs. As such, weaker performance in Mobile and the limited-scope areas was considered in the assessment of the bank's overall CD lending performance for the state of Alabama.

In addition to the total for the state, the bank also received consideration at the state level for 15 CD loans totaling $19 million that benefited multiple AAs throughout the state. Statewide loans included:

- Three loans totaling $7.5 million to a statewide entity operating in Birmingham. The loans were used for early-stage, startup capital for small businesses across the state of Alabama.

- One LOC for $5.6 million for the creation of new industrial facilities in low-income communities throughout the state. The loan was made in connection with NMTCs and is focused on small business and job growth.

- Three LOCs totaling $2.3 million to a nonprofit operating in Birmingham for support of statewide affordable housing programs.

- One loan totaling $1.8 million to a nonprofit operating in Birmingham and focused on addressing CD needs in LMI census tracts throughout the state. The loan was used to create a pool of loans that are CDFI-qualified for the nonprofit to continue its efforts in becoming a CDFI.

- Two LOCs totaling $800,000 for working capital to a nonprofit health center serving LMI residents in Birmingham, Tuscaloosa, Northern Alabama, and Southern Alabama AAs.

- One loan for $472,000 to a nonprofit operating in Birmingham to acquire its existing facility and expand services. The nonprofit provides essential services, including housing and medical care, exclusively to LMI individuals throughout the state.

- Two LOCs totaling $300,000 to a nonprofit operating in Birmingham for sourcing opportunities for investment in underserved and LMI communities throughout Alabama.

- Two LOCs totaling $300,000 to a nonprofit operating in Birmingham and providing programs and services to LMI youth across the state. The nonprofit helps students in preparation for college, including assistance with applications, admissions, and testing.

Despite the weaker performance in several AAs in Alabama, the bank was considered responsive to the CD needs of its AAs in the state. Therefore, the bank also received consideration for $30.6 million in qualified CD loans within the state but that did not benefit the bank's AAs, including $15.2 million that supported a Historically Black College or University (HBCU).

INVESTMENT TEST

The Investment Test rating for Alabama is Outstanding. The bank made an excellent level of qualified CD investments and grants in Alabama, with $246.7 million in qualified investments and $19.3 million in qualified contributions directly benefiting its Alabama AAs. In addition, the bank received consideration at the state level for $5.2 million in investments in a statewide fund that engages in affordable housing, small business venture funding, and revitalization and stabilization efforts throughout the state of Alabama. The bank also received consideration at the state level for $723,400 in statewide contributions to support disaster relief, LMI youth education support, small business development, and revitalization efforts.

The bank made an excellent level of qualified investments and contributions in the Birmingham and Mobile full-scope AAs. Additional details regarding specific investments and contributions can be found in the full-scope AA sections of this report.

The bank was responsive to the needs of its AAs in the state of Alabama. Therefore, the bank also received consideration for $9.7 million in qualified investments and $265,800 in qualified contributions within the state that benefited geographies outside of the bank's AAs. This amount included one NMTC for $5.2 million, four LIHTCs totaling $4.5 million, and two donations totaling $5,500 to support scholarship programs at a community college that primarily serves LMI students.

SERVICE TEST

The bank's Service Test rating for Alabama is High Satisfactory.

Retail Services

Delivery systems are readily accessible to the bank's geographies and individuals of different income levels in Alabama. As of December 31, 2023, Regions operated 184 branches in the state, including 17 branches in low-income tracts and 34 branches in moderate-income tracts, representing 27.7 percent of total statewide branches.

A full array of personal and business banking products and services is offered at all locations in Alabama AAs. Across the state, branch hours vary but not in a way that inconveniences individual AAs. Most branches offer lobby hours beginning at 9 a.m., though some have drive-through hours beginning at 8:30 a.m. Branch lobbies are generally open Monday through Thursday until 4 p.m., though in certain markets including Daphne-Fairhope, Decatur, Florence, Huntsville, Mobile and Southern Alabama, branches are open until 4:30 p.m. or 5:00 p.m. Nearly all branches are open until 5 p.m. on Friday. Drive-throughs are generally open until 5 p.m. daily and some branches offer branch lobby hours on Saturday from 9 a.m. to 12 p.m. Delivery systems include full-service ATMs at nearly all of the branches. In addition to those ATMs, the bank compliments its traditional service delivery methods with alternative delivery systems that provide increased access to banking services, as previously discussed in the *Institution, Retail Banking Services* section of this report.

During the review period, the bank closed 11 branches and opened 1 branch in Alabama. At the time of closure, three branches were in low-income census tracts, one branch was in a moderate-income tract, five branches were in middle-income census tracts, and two branches were in upper-income census tracts. The one branch that was opened was in a middle-income tract. Changes to the bank's branch network in Alabama generally did not adversely affect the accessibility of delivery systems.

Additional details on the bank's retail services can be found in the full-scope AA sections of this report.

CD Services

Regions is a leader in providing CD services in Alabama. During the review period, the bank engaged in 17,070 hours of qualifying CD service activities in Alabama. This total includes 16,525 hours directly benefiting individual AAs in Alabama and 545 hours benefiting a BSRA that includes all of the bank's AAs in Alabama. These hours include board of directors' representation for statewide organizations focused on small businesses and microenterprises, economic development and community revitalization, financial education and services for LMI youth.

Additional details of CD service activities in Alabama are described later within each individual AA they benefit.

METROPOLITAN AREA – BIRMINGHAM MSA
(Full-Scope Review)

DESCRIPTION OF INSTITUTION'S OPERATIONS IN THE BIRMINGHAM AA

Overview

The Birmingham AA includes Blount, Chilton, Jefferson, St. Clair, and Shelby counties, which are five of the six counties that comprise the Birmingham-Hoover, Alabama MSA. As of December 31, 2023, the bank operated 55 branches in the AA, representing 29.9 percent of its branches in the state of Alabama and 4.3 percent of its total branches. Of the branches in the AA, eight are in low-income census tracts, 13 are in moderate-income census tracts, 16 are in middle-income census tracts, 16 are in upper-income census tracts, and two branches are in unknown census tracts. Within the state of Alabama, 51.9 percent of the bank's deposit volume and 39.6 percent of its HMDA-reportable and small business loans by number are located in the Birmingham AA.

The AA is a competitive banking market with several local, regional, and national institutions operating in the area, as well as local and regional institutions headquartered in the area. As of June 2024, there were 48 depository institutions operating 276 branches in the AA. Regions ranked 1st in deposit market share with 35.4 percent of total deposits ($16.5 billion). PNC Bank has the second largest deposit market share at 13.2 percent, followed by Servisfirst Bank at 8.8 percent, Wells Fargo Bank at 8.6 percent, and Synovus at 6.0 percent.

For HMDA-reportable lending, Regions originated and/or purchased 7.3 percent, 8.4 percent, and 8.4 percent of total HMDA-reportable loans in the AA in 2021, 2022 and 2023, respectively. Regions was ranked 1st out of 552 reporters in 2021; 1st out of 519 reporters in 2022; and 1st out of 514 reporters in 2023.

For small business lending, Regions ranked 2nd out of 156 reporters in 2021 with 7.4 percent of small business loans. In 2022, the bank ranked 16th out of 138 reporters with 1.3 percent of total small business loans. In 2023, Regions ranked 12th out of 132 reporters with 1.7 percent of total small business loans. American Express was the top small business reporter in the market for 2021, 2022 and 2023.

AA Demographics, Population, and Income Characteristics

The AA had a total population of approximately 1.1 million as of the 2020 Census. The individual counties within the AA vary greatly in size, with Jefferson County being the largest and accounting for more than half of the total AA population (674,721 residents).

The AA contains 296 census tracts: 26 low-income tracts (8.8 percent), 76 moderate-income tracts (25.7 percent), 107 middle-income tracts (36.1 percent), 80 upper-income tracts (27.0 percent), and seven unknown-income tracts (2.4 percent).

For purposes of classifying borrower income, this evaluation uses the FFIEC estimated median family income for the relevant area. As the following table shows, the median family income increased from $73,300 in 2021 to $89,600 in 2023.

Borrower Income Levels
Birmingham-Hoover, AL MSA

FFIEC Estimated Median Family Income		Low 0 - 49.99%	Moderate 50% - 79.99%	Middle 80% - 119.99%	Upper 120% - & above
2021	**$73,300**	0 - $36,649	$36,650 - $58,639	$58,640 - $87,959	$87,960 - & above
2022	**$83,300**	0 - $41,649	$41,650 - $66,639	$66,640 - $99,959	$99,960 - & above
2023	**$89,600**	0 - $44,799	$44,800 - $71,679	$71,680 - $107,519	$107,520 - & above

There are 271,677 total families in the AA. Of these families, 22 percent are low-income, 17.3 percent are moderate-income, 18.9 percent are middle-income, and 41.9 percent are upper-income. Families with income below the poverty level in the AA is 9.6 percent, which is lower than the 11.6 percent poverty level for the overall state of Alabama. Within the AA, Chilton County has the highest share of families below poverty at 13.3 percent, while families below poverty in Shelby County was lower at 4.3 percent. Poverty rates are highest in low-income and moderate-income tracts, with 32.2 percent of the families residing in low-income tracts and 16.3 percent of families residing in middle-income tracts living below the poverty level.

Housing Characteristics

There are 478,198 total housing units in the AA, of which 60 percent are owner-occupied, 26.9 percent are rental units, and 13.1 percent are vacant. As described, housing units in the AA are predominately owner-occupied, which indicates a variety of home lending opportunities available. However, fewer home lending opportunities exist in low-income tracts where only 29.1 percent of housing units are owner-occupied.

The median age of housing stock in the AA is 44 years, which is older than the median age of housing stock in the state of Alabama (36 years). Housing units in LMI census tracts were older, with a median of 61 years for low-income tracts and 55 years for moderate-income tracts. The older age of homes is an indicator of potential opportunity for home improvement loans in LMI tracts.

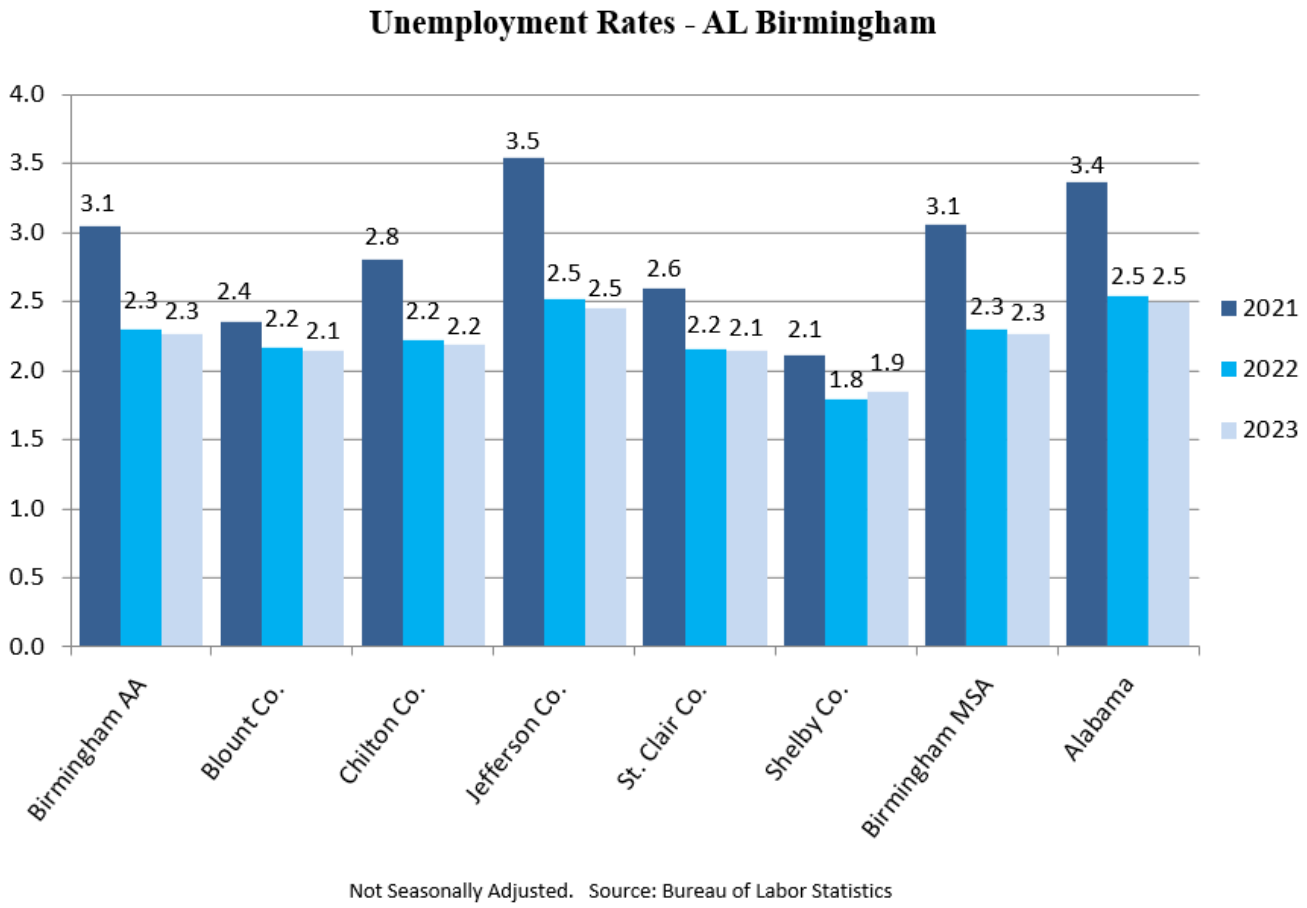
As of 2020, the median housing value in the AA was $172,757, which was higher than the median housing value in Alabama ($149,600). Shelby County had the highest median value at $220,700 and Chilton County had the lowest at $104,500. Median gross rent in the AA was $934 per month, which was higher than the state of Alabama ($811 per month). Shelby County had the highest median gross rent at $1,078 per month, while Blount County had the lowest median gross rent at $666 per month. Additionally, the affordability ratio of the AA (34.4 percent) is similar to Alabama (34.8 percent). Affordability varied throughout the AA, with Jefferson County having the lowest affordability ratio at 33.4 percent and Chilton County having the highest at 49.9 percent. Families that are housing cost burdened are defined as renters or homeowners paying 30.0 percent or more of household income toward housing cost. Within the AA, 42.4 percent of renters had rent costs greater than 30 percent of income, which was higher than the state of Alabama at 40.8 percent.

Economic Conditions

According to the Bureau of Labor Statistics during the first quarter of 2023, the largest industries in the AA by number of employees included government (75,391), healthcare and social assistance (60,471), and retail trade (52,718). Several large corporations are headquartered in the AA, including the Regions Financial Corporation, Shipt, Alabama Power, and Blue Cross Blue Shield of Alabama. Major employers in the area include University

of Alabama at Birmingham, Regions Financial Corporation, Brookwood Baptist Health, St. Vincent's Health System, and Children's of Alabama.[14]

The following table shows the unemployment rate percentages for the AA and the state of Alabama. As shown, unemployment rates in the AA were similar to unemployment rates for the state of Alabama during the review period. The AA unemployment rate improved from 3.1 percent in 2021 to 2.3 percent in 2023, while the state's unemployment rate similarly dropped from 3.4 percent in 2021 to 2.5 percent in 2023. Shelby County had the lowest unemployment rate in the AA during the review period, while Jefferson County had the highest.



Not Seasonally Adjusted. Source: Bureau of Labor Statistics

Credit and CD Needs

As part of the CRA examination, information from recently conducted interviews with contacts engaged in Birmingham-area workforce development, affordable housing, and economic development were referenced.

One contact representing a small business and economic development organization described the economic conditions of Birmingham as declining, with affordable housing to LMI individuals and access to capital for small businesses being the primary challenges faced by residents in the city. The contact explained that two scenarios have negatively impacted LMI individuals and communities: predatory lending practices are on the rise, and real estate investors have been purchasing homes in bulk to rent to individuals at higher prices. In addition, limited access to start-up capital has hindered entrepreneurial growth and existing small businesses have struggled to expand and sustain operations with few banks in the area offering small dollar loans for short-term needs.

[14] Major Employers." *Birmingham Business Alliance*, www.birminghambusinessalliance.com/major-employers. Accessed 8 March 2025

Additionally, the contact stated there are few bank branches accessible to LMI communities. Regarding lending needs, the contact shared that flexible credit programs for LMI individuals and microloan programs for small businesses are primary lending needs for the area as these programs would improve access to financing for groups that do not meet traditional qualifying guidelines for loans. The contact highlighted the need for financial institutions to provide these more flexible lending opportunities and encouraged banks to partner together and collaborate on developing such products. The contact stated that currently financial institutions are much more likely to donate or lend to CDFIs in the areas who offer such programs, but the contact noted that CDFIs cannot do it alone and encouraged the financial institutions with greater capacity to further support the region with more flexible lending products.

Another contact representing an organization providing economic development and community planning services to the area shared that the Birmingham region is currently experiencing an economic resurgence. They shared that while unemployment is low, employees continue to seek out jobs that provide living wages and benefits. The contact highlighted opportunities to improve access to transportation, affordable housing, and small businesses that would help attract employers support this type of quality job creation.

According to a local economic development contact, the economy is improving post-Covid 19 with downtown Birmingham beginning to see an uptick in the business sector, but other areas of the city that are predominantly LMI are more stagnant. The contact mentioned growth in the luxury condo and apartment sector being built downtown but saw a distinct gap in affordable housing both downtown and the MSA at large. The contact mentioned a significant barrier to affordable housing is the current economy, with high interest rates and inflation making it challenging for potential home buyers to afford down payments and interest rates. Regarding banking needs, the contact shared that there are geographic areas that lack access to bank branches, which makes it difficult for individuals to meet their credit needs. The contact also mentioned that while unemployment is low, a significant population of workforce is underemployed, leading to individuals seeking multiple jobs to meet their financial needs.

Based on the conversations with these CD contacts, opportunities are available in the AA for banks to engage in the affordable housing development space. There is also a desire for financial institutions to increase their physical presence in communities and for more innovative financing practices to be adopted and tested out in this market.

CONCLUSIONS WITH RESPECT TO PERFORMANCE TESTS IN THE BIRMINGHAM AA

LENDING TEST

Lending levels reflect good responsiveness to credit needs of the AA. The geographic distribution of loans reflects adequate penetration throughout the AA and the distribution of borrowers reflects adequate penetration among customers of different income levels and businesses of different revenue sizes. In addition, the bank is a leader in making CD loans in the AA.

The analysis included 9,161 HMDA-reportable loans and 2,658 small business loans reported by the bank in the AA during the review period. Therefore, HMDA-reportable loans received greater weight in determining conclusions. Additionally, during 2021, 2022, and 2023, the bank originated or purchased 3,083 home purchase loans, 2,588 home refinance loans, and 2,325 home improvement loans in the AA. Thus, when considering HMDA-reportable loan categories, greatest weight was assigned to home purchase loans given its relative share of the total HMDA-reportable lending in this AA, followed by home refinance loans and home improvement loans.

Details of the bank's mortgage and small business lending and information regarding lending by peers can be found in *Appendix F*.

Lending Activity

Lending activity is considered good. Overall, 7.4 percent of HMDA-reportable loans and 6.2 percent of small business loans were made in the AA. The percentage of the bank's HMDA-reportable and small business lending is below the percentage of its area deposits. However, lending activity was deemed good when considering that all of the bank's corporate deposits are assigned to this AA, and the bank is an important contributor to both HMDA-reportable and small business lending – ranking first in originating HMDA-reportable loans in the AA.

Geographic Distribution of Loans

The geographic distribution of loans reflects adequate penetration throughout the AA. As described in the following sections, overall performance for HMDA-reportable lending is poor and small business lending performance is good. Because Regions Bank ranks first in HMDA-reportable lenders for each of the three years of analysis and has a strong presence in this AA (operating 55 branches in the AA, including its main office), their performance relative to aggregate lenders is particularly relevant. In addition to the performance within individual HMDA categories described in this section, the "Geographic Distribution of HMDA Loans – Table 2 of 2" in *Appendix F* shows that the bank's overall percentage of HMDA-reportable loans in LMI tracts within the Birmingham AA was below aggregate lenders in this area for each of the three years of analysis.

Home Purchase Loans

Home purchase lending in low-income tracts is poor. In 2021, the bank made 1.5 percent of its home purchase loans in low-income tracts, which was below the percentage of owner-occupied units in these tracts (5.2 percent) and similar to aggregate performance of 1.9 percent. In 2022 and 2023, the bank made 2.0 percent of its home purchase loans in low-income tracts, which was below the percentage of owner-occupied units in these tracts (3.9 percent). In 2022, the bank's lending (1.3 percent) was below aggregate performance (2.3 percent) while in 2023, the bank's lending (3.0 percent) was similar aggregate performance (2.3 percent).

Home purchase lending in moderate-income tracts is poor. In 2021, the bank made 12.4 percent of its home purchase loans in moderate-income tracts, which was below the percentage of owner-occupied units in these tracts (20.8 percent) and below aggregate performance of 14.7 percent. Bank performance declined further in 2022 and 2023, with the bank making 10.3 percent of its home purchase loans in moderate-income tracts, which was below the percentage of owner-occupied units in these tracts (20.8 percent). In 2022, the bank's lending (9.4 percent) was below aggregate performance (15.7 percent) and in 2023, the bank's lending (11.5 percent) was below aggregate performance (16.7 percent).

Home Refinance Loans

Home refinance lending in low-income tracts is adequate. In 2021, the bank made 1.7 percent of its home refinance loans in low-income tracts, which was below the percentage of owner-occupied units in these tracts (5.2 percent) but similar to aggregate performance of 1.1 percent. In 2022 and 2023, the bank made 2.1 percent of its home refinance loans in low-income tracts, which was below the percentage of owner-occupied units in these tracts (3.9 percent). In 2022, the bank's lending (2.5 percent) was above aggregate performance (1.7 percent) and in 2023, the bank's lending (1.5 percent) was below aggregate performance (2.5 percent).

Home refinance lending in moderate-income tracts is adequate. In 2021, the bank made 9.0 percent of its home refinance loans in moderate-income tracts, which was below the percentage of owner-occupied units in these tracts (20.8 percent) but similar to aggregate performance of 9.9 percent. Bank performance improved in 2022 and 2023, with the bank making 16.1 percent of its home refinance loans in moderate-income tracts, which was

below the percentage of owner-occupied units in these tracts (20.8 percent). In 2022, the bank's lending (17.2 percent) was above aggregate performance (16.0 percent); however, the bank's lending (14.8 percent) was below aggregate performance (18.1 percent) in 2023.

Home Improvement Loans

Home improvement lending in low-income tracts is poor. In 2021, the bank made 1.4 percent of its home improvement loans in low-income tracts, which was below the percentage of owner-occupied units in these tracts (5.2 percent) and below aggregate performance of 2.2 percent. In 2022 and 2023, the bank made 1.6 percent of its home improvement loans in low-income tracts, which was below the percentage of owner-occupied units in these tracts (3.9 percent). In 2022, the bank's lending (1.5 percent) matched aggregate performance (1.5 percent) but in 2023, the bank's lending (1.7 percent) was below aggregate performance (2.3 percent).

Home improvement lending in moderate-income tracts is adequate. In 2021, the bank made 7.4 percent of its home improvement loans in moderate-income tracts, which was below the percentage of owner-occupied units in these tracts (20.8 percent) and below aggregate performance of 9.0 percent. Bank performance improved in 2022 and 2023, with the bank making 10.7 percent of its home improvement loans in moderate-income tracts, which was below the percentage of owner-occupied units in these tracts (20.8 percent). In 2022, the bank's lending (9.9 percent) was similar to aggregate performance (10.2 percent) and in 2023, the bank's lending (11.8 percent) was similar to aggregate performance (12.2 percent).

Small Business Loans

Small business lending in low-income tracts is excellent. In 2021, the bank made 7.9 percent of its small business loans in low-income tracts, which was similar to the percentage of total businesses located in these tracts (7.1 percent) and above aggregate performance of 6.8 percent. Bank performance improved in 2022 and 2023, with the bank making 11.4 percent of its small business loans in low-income tracts, which was above the percentage of total businesses located in these tracts (7.6 percent). In 2022, the bank's lending (11.7 percent) was nearly double aggregate performance (6.4 percent) and in 2023, the bank's lending (11.1 percent) was above aggregate performance of 6.5 percent.

Small business lending in moderate-income tracts is adequate. In 2021, the bank made 19.4 percent of its small business loans in moderate-income tracts, which was below the percentage of total businesses located in these tracts (21.7 percent) and matched aggregate performance at 19.4 percent. In 2022 and 2023, the bank made 14.1 percent of its small business loans in moderate-income tracts, which was below the percentage of total businesses located in these tracts (17.5 percent). In 2022, the bank's lending (15.2 percent) was similar to aggregate performance (15.6 percent) and in 2023, the bank's lending (13.3 percent) was similar to aggregate performance of 14.1 percent.

While HMDA-reportable loans were given greater weight in deriving conclusions in the AA, the bank's good performance in small business lending was also considered in deriving an overall geographic distribution conclusion of adequate, especially when considering that Regions Bank is an important contributor to both HMDA-reportable and small business lending in the AA, and community contacts noted that both affordable housing and small business lending are needed in the AA. In addition, no conspicuous lending gaps were identified based on an analysis of the dispersion of the loan products reviewed. The bank had activity in nearly all AA census tracts throughout the review period. Lending data and maps did not indicate an absence of loans across LMI tracts.

Lending to Borrowers of Different Incomes and Businesses of Different Sizes

The distribution of loans based on borrower income or gross annual revenues is adequate. As described in the following sections, overall performance for HMDA-reportable lending is adequate and small business lending performance is also adequate.

Home Purchase Loans

Home purchase lending to low-income borrowers is adequate. In 2021, the bank made 6.1 percent of its home purchase loans to low-income borrowers, which was below the percentage of low-income families (23.9 percent) and similar to aggregate performance of 6.5 percent. In 2022 and 2023, the bank made 7.0 percent of its home purchase loans to low-income borrowers, which was below the percentage of low-income families (22.0 percent). In 2022, the bank's lending (5.8 percent) was below aggregate performance (7.7 percent); however, the bank's lending (8.6 percent) was above aggregate performance (7.2 percent) in 2023.

Home purchase lending to moderate-income borrowers is adequate. In 2021, the bank made 27.9 percent of its home purchase loans to moderate-income borrowers, which was above the percentage of moderate-income families (15.7 percent) and above aggregate performance of 20.6 percent. Bank performance declined in 2022 and 2023, with the bank making 20.0 percent of its home purchase loans to moderate-income borrowers, which was above the percentage of moderate-income families (17.3 percent). In 2022, the bank's lending (21.6 percent) was similar to aggregate performance (21.5 percent) while in 2023, the bank's lending (17.8 percent) was below aggregate performance (20.4 percent).

Home Refinance Loans

Home refinance lending to low-income borrowers is good. In 2021, the bank made 6.9 percent of its home refinance loans to low-income borrowers, which was below the percentage of low-income families (23.9 percent) but above aggregate performance of 5.3 percent. Bank performance improved in 2022 and 2023, with the bank making 16.6 percent of its home refinance loans to low-income borrowers, which was below the percentage of low-income families (22.0 percent). In 2022, the bank's lending (17.0 percent) was above aggregate performance (10.7 percent) and in 2023, the bank's lending (16.0 percent) was above aggregate performance (10.8 percent).

Home refinance lending to moderate-income borrowers is good. In 2021, the bank made 15.3 percent of its home refinance loans to moderate-income borrowers, which was similar to the percentage of moderate-income families (15.7 percent) and above aggregate performance of 13.7 percent. Bank performance improved in 2022 and 2023, with the bank making 25.8 percent of its home refinance loans to moderate-income borrowers, which was above the percentage of moderate-income families (17.3 percent). In 2022, the bank's lending (27.1 percent) was above aggregate performance (20.8 percent) and in 2023, the bank's lending (24.3 percent) was above aggregate performance (19.6 percent).

Home Improvement Loans

Home improvement lending to low-income borrowers is good. In 2021, the bank made 8.6 percent of its home improvement loans to low-income borrowers, which was below the percentage of low-income families (23.9 percent) but above aggregate performance of 7.4 percent. Bank performance improved in 2022 and 2023, with the bank making 11.0 percent of its home improvement loans to low-income borrowers, which was below the percentage of low-income families (22.0 percent). In 2022, the bank's lending (11.0 percent) was above aggregate performance (7.9 percent) and in 2023, the bank's lending (11.1 percent) was above aggregate performance (9.0 percent).

Home improvement lending to moderate-income borrowers is adequate. In 2021, the bank made 12.9 percent of its home improvement loans to moderate-income borrowers, which was below the percentage of moderate-income

families (15.7 percent) and similar to aggregate performance of 12.6 percent. In 2022 and 2023, the bank made 16.5 percent of its home improvement loans to moderate-income borrowers, which was similar to the percentage of moderate-income families (17.3 percent). In 2022, the bank's lending (15.2 percent) was similar to aggregate performance (14.8 percent) and in 2023, the bank's lending (18.5 percent) was above aggregate performance (16.0 percent).

Small Business Loans

Small business lending to businesses of different sizes is adequate. In 2021, the bank made 73.1 percent of its small business loans to businesses with revenues of $1 million or less, which was below the percentage of total businesses with revenues of $1 million or less (90.7 percent). The bank's performance is above aggregate performance of 41.5 percent. However, 2021 was a year in which many banks extended PPP loans as a result of the COVID-19 pandemic and were not required to capture and report the revenue of the businesses, which is reflected in the aggregate data. As a result, performance context and loan size data were considered. In 2021, the bank made loans of less than $250,000 to businesses at a rate (91.1 percent) below aggregate lenders (94.3 percent). In 2022 and 2023, the bank made 49.6 percent of its small business loans to businesses with revenues of $1 million or less, which was below the percentage of total businesses with revenues of $1 million or less (91.3 percent). In 2022, lending (46.9 percent) was above aggregate performance (44.5 percent) and in 2023, the bank's lending (51.7 percent) was above aggregate performance (45.8 percent).

CD Lending

The bank is a leader in making CD loans in the Birmingham AA. During the review period, the bank made 40 qualified CD loans totaling $89.5 million in the AA. Specifically, the bank provided $43.1 million for community services that benefit LMI individuals, $29.6 million for affordable housing for LMI individuals, $8.8 million for the revitalization and stabilization of LMI communities, $2.8 million to promote economic development by financing small businesses, and $5.3 million in loans with more than one CD purpose including affordable housing and revitalization and stabilization.

Bank performance exceeds performance of other banks in the area, and several of the loans were impactful and deemed responsive to AA needs. Additionally, while not included directly in the Birmingham totals, several loans were originated or renewed to organizations operating in Birmingham that serve multiple areas throughout Alabama. These loans had a positive impact on performance in this AA, but as described previously, were credited to the state of Alabama.

Impactful loans directly benefiting the AA include that were responsive to community credit needs include:

- One loan for $5 million to a national CDFI for dual purpose of affordable housing and revitalization and stabilization. The loan funds were used to assist in affordable housing efforts exclusively in Birmingham, with funds restricted to neighborhoods under formal revitalization plans. Neighborhoods benefiting include Belview Heights, Pratt City, and Woodlawn. This loan also supports the efforts of another impactful loan described below – the LOC made to the public charter school designed to be the anchor of the Woodlawn revitalization plan and create additional affordable and mixed-income housing.

- One loan totaling $4 million for a complete transformation of the YMCA of Greater Birmingham into a new community resource center. The renovated center and its grounds will include a new FQHC and mental counseling facility onsite, a new subdivision of 23 affordable single-family homes, a park, and is located on its own bus stop across from a grocery store. The goal of the renovation is to serve the needs of the whole family and create positive change in the Roebuck neighborhood, a blighted community under formal

revitalization[15]. The loan was part of a multi-sourced funding effort between the nonprofit, banks, Jefferson County, the city of Birmingham, NMTCs, campaign pledges, and a partnership with Habitat for Humanity. Regions Bank was a leading lender and participant in this project.

- Three LOCs totaling $3.3 million to a newly formed public charter school in a low-income tract in the Woodlawn community. As outlined in a formal revitalization plan for the Woodlawn community, the charter school serves as an anchor in the low-income tracts and supports key CD initiatives. Specifically, providing affordable and mixed-income housing that is instrumental to transition the area from a neglected, blighted, and poverty-stricken area into a vibrant mixed-income community.

- Two SBA 504 loans for $2.5 million that provide financing for small businesses.

- Three LOCs totaling $2.3 million to a nonprofit for the creation of 1-4 family affordable housing to LMI people in the city of Birmingham.

- Two LOCs totaling $1.5 million to a homeless shelter for renovations and expansion. The LOCs were formed alongside matching grant program funding from the Federal Home Loan Bank of Atlanta's Affordable Housing Program.

- Three LOCs totaling $1.5 million to a small business incubator, all for the purpose of revitalization and stabilization. The LOCs were used for redevelopment and creation of new businesses throughout downtown, the Historic District, the Theatre District, and the Civil Rights District. The LOCs purpose aligns with needs noted in formal city plans for Birmingham.

- Three LOCs totaling $300,000 to a local housing authority. The LOCs were targeted to improvement projects in blighted areas and in low-income tracts and were part of a larger plan of revitalization for the city.

- Two LOCs totaling $300,000 to a small business incubator for its Impact Fund, which targeted funding to startup minority-owned businesses.

The Birmingham AA positively benefited from two LOCs totaling $9.5 million to a national CDFI with prioritization in nine AAs, including Birmingham. The CDFI LOCs were previously described under the *CD Lending* heading for the institution.

INVESTMENT TEST

The bank made an excellent level of qualified CD investments and grants in the Birmingham AA, totaling $80.2 million. This amount includes 24 current period investments totaling $39.8 million, 29 prior period investments still outstanding with a balance of $24.8 million, and 449 donations totaling $15.7 million.

Investment types varied and addressed a range of CD needs. These include state tax credit investments to support economic development, deposits in CDFI, SBIC funds to address small business financing needs, LIHTC projects to address affordable housing challenges, and MBS supporting LMI borrowers. The bank made extensive use of innovative and/or complex investments to support CD initiatives. Additionally, the bank exhibits excellent responsiveness to CD needs.

[15]"Regions Foundation, YMCA of Greater Birmingham break ground on transformative project." *Alabama News Center*, www.alabamanewscenter.com/2023/10/04/regions-foundation-ymca-of-greater-birmingham-break-ground-on-transformative-project/. Accessed 3 April 2025.

Examples of noteworthy investments and grants provided during the review period include that address community credit needs as detailed by the community contact and performance context:

- A $4.9 million current-period LIHTC for the creation of 48 new units of affordable housing for LMI individuals and families.
- A $245,000 current-period certificate of deposit in a CDFI that primarily serves LMI individuals and communities.
- Three state tax credit investments totaling $3.3 million to support a local venture capital lab that provides capital, resources, and technical support to early-stage entrepreneurs from under-resourced backgrounds.
- Eight donations totaling $3 million to a public-private partnership that supports Birmingham City Schools and provides college scholarships to graduating seniors, the majority of whom are LMI.
- A $750,000 donation to help a local organization build a community resource center, healthcare facility, early childhood education center, recreational facilities, and 23 units of affordable housing in an LMI area.
- A $400,000 donation to a local affordable housing nonprofit to help finance the construction of 15 affordable single-family homes for LMI families.
- Six donations totaling $256,500 to support a nonprofit organization focused on revitalizing a low-income area in Birmingham through essential infrastructure and improved housing conditions.
- Three donations totaling $170,000 to a local nonprofit that provides support and technical assistance to local small businesses.

The Birmingham AA also positively benefited from $5.2 million in investments and $723,400 in donations benefiting a BSRA that includes the entire state of Alabama. These investments and donations are described under the *Investment Test* heading for the state of Alabama.

SERVICE TEST

Retail banking services are good in Birmingham. Additionally, the bank is a leader in providing of CD services in its AA.

Retail Banking Services

Service delivery systems are readily accessible to the bank's geographies and individuals of different income levels throughout the Birmingham AA. In deriving this conclusion, the distribution of the bank's branches by census tract income level was compared to the distribution of households and businesses among the tract categories in the AA. As the following tables show, the bank operated branches and ATMs in all census tract categories throughout the review period, with 14.5 percent of branches in low-income tracts and 23.6 percent of branches in moderate-income tracts in 2023. The percentage of branches in low-income tracts exceeds the percentage of households (6.9 percent) and the percentage of businesses (7.6 percent) in those tracts. The percentage of branches in moderate-income tracts was similar to the percentage of households (24.1 percent) and greater than the percentage of businesses (17.5 percent) in those tracts. Of particular note, Regions maintains branches in the Roebuck and Woodlawn neighborhoods in Birmingham, two neighborhoods targeted for revitalization where other banking services are very limited. When another financial institution announced its

planned closure in the Roebuck neighborhood in early 2024, the Birmingham City Council passed a resolution urging the bank not to close, which indicates the importance of maintaining retail branches in this neighborhood.[16]

The bank closed four branches during the review period and opened no new branches. All of the branch closures were consolidations with other branches, including two in low-income tracts and one in an upper-income tract. Overall, the branch opening and closing have generally not adversely affected the accessibility of the bank's delivery systems.

Hours of operation vary slightly across branches, with drive-through hours beginning at 8:30 a.m. at some branches and 9:00 am at others. Branch lobby hours are 9 a.m. until 4 p.m. at nearly all branches Monday through Thursday and until 5 p.m. on Friday. The bank also offers Saturday lobby hours from 9:00 a.m. to noon at slightly less than half of the branches in the AA. The bank offers the same suite of products and services throughout the assessment area. Thus, hours and services do not vary in a way that inconveniences the AA.

The tables below show the distribution of branches and ATMs along with households and businesses by tract category.

CD Services

The bank is a leader in providing CD services in Birmingham. During the review period, bank employees provided 1,424 CD service activities totaling 12,285 hours to nearly 170 organizations operating throughout the AA. Bank staff provided their financial expertise in a variety of ways, including financial literacy for adults and youth; homebuyer education; technical assistance with Federal Home Loan Bank grant applications; service on board of directors, advisory boards or other committees; leadership training and other human resources assistance; legal services assistance; and other forms of technical assistance related to the bank employee's expertise.

Noteworthy and responsive CD services in the Birmingham AA include:

- Bank staff provided leadership to 67 different organizations serving the AAs, with over 3,000 hours of board service during the review period.

- Several employees providing approximately 250 hours of service conducting financial education through a program that provides intensive assistance for individuals recently released from prison.

- Bank employees engaged in approximately 40 hours of CD services with a small nonprofit working to lead a holistic CD initiative for a neighborhood that has experienced years of disinvestment. Bank employees served on the board of directors, provided technical assistance with the organization's affordable housing endeavors and provided financial education to individuals served by the organization.

- Multiple employees provided 110 hours of service activities with a nonprofit organization that provides a range of programs and services to the Hispanic community in Birmingham. Employees served on the board of directors and provided financial education to clients of the organization.

- Several of the bank's legal associates provided 25 hours of qualified services through an organization that provides low-income families access to legal services such as drafting wills, power of attorney, and health care directives.

- One employee provided over 500 hours of board service to a private school where nearly 75 percent of the students are considered LMI.

- Bank staff provided approximately 250 hours of CD services to a nonprofit organization that provides food-based education to connect LMI youth in Birmingham to food, farming, and culinary arts. Employees used their expertise in several different capacities including serving on the board of directors and aiding with the development the organization's three-year strategic plan.

The Birmingham AA also positively benefited from 545 hours of CD service benefiting the BSRA that includes the entire state of Alabama. These services were previously described under the CD services write up for the state of Alabama.

METROPOLITAN AREA – MOBILE MSA
(Full-Scope Review)

DESCRIPTION OF INSTITUTION'S OPERATIONS IN THE MOBILE AA

Overview

The Mobile AA consists of Mobile County, which is one of the two counties that comprise the Mobile, Alabama MSA. As of December 31, 2023, the bank operated 24 branches in the AA, representing 13.0 percent of branches in the state of Alabama. Of the branches in the AA, one is in a low-income tract, six are in moderate-income tracts, six are in middle-income tracts, and eleven are in upper-income tracts. As a percentage within the state of Alabama, 9.5 percent of deposit dollar volume and 10.4 percent of HMDA-reportable and small business loans by number are located in the Mobile AA. As described, the Mobile AA is the bank's second most heavily weighted AA in the state of Alabama, after Birmingham.

The Mobile banking market is competitive, with a several national and multi-regional banks. As of June 30, 2023, there were 25 financial institutions operating 106 branch locations within the AA. Regions Bank held the largest deposit market share with $3.0 billion in deposits (31.3 percent deposit market share). PNC Bank and Hancock Whitney Bank ranked second and third at 14.4 percent and 13.6 percent, respectively.

Regions originated or purchased 6.1 percent, 6.3 percent, and 6.4 percent of total HMDA-reportable loans in the AA in 2021, 2022 and 2023, respectively. Regions ranked 3rd out of 391 reporters in 2021; 2nd out of 383 reporters in 2022; and 1st out of 345 reporters in 2023. Regions' rankings indicate that it is an important contributor for HMDA-reportable lending in the AA. Rocket Mortgage was the top HMDA reporter in the AA in 2021, Trustmark National Bank was the top reporter in 2022, and Regions was the top reporter in 2023.

For small business lending, Regions ranked 3rd out of 110 reporters in 2021 with 5.6 percent of small business loans. In 2022, the bank ranked 19th out of 95 reporters with 1.1 percent of small business loans. In 2023, Regions ranked 13th out of 97 reporters with 1.8 percent of small business loans. Regions' rankings indicate that it is an important contributor to small business lending in the Mobile AA. American Express was the top small business reporter in the market for 2021, 2022 and 2023.

AA Demographics, Population, and Income Characteristics

Mobile County, located in southwest Alabama, has a population of 414,000 people.[17] The county has eleven municipalities – Bayou La Batre, Chickasaw, Citronelle, Creola, Dauphin Island, Mobile, Saraland, Satsuma, Semmes, Prichard, and Mt. Vernon. The county is adjacent to Mobile Bay and the Gulf of Mexico. The county has a total area of 1,644 square miles of which 1,233 square miles is land and 410 square miles is water. It includes several islands, including Dauphin Island, Gaillard Island and Mon Louis Island. Mobile County has the state's only saltwater port, the nation's ninth largest by tonnage. Two commercial airports offer service – Mobile Downtown Airport and Mobile Regional Airport. Mobile County has several universities, including the University of South Alabama, the University of Mobile, and Springhill College.[18]

For purposes of classifying borrower income, this evaluation uses the FFIEC estimated median family income for the relevant area. As the following table shows, the median family income increased from $61,300 in 2021 to $73,00 in 2023.

Borrower Income Levels
Mobile, AL MSA

FFIEC Estimated Median Family Income		Low 0 - 49.99%	Moderate 50% - 79.99%	Middle 80% - 119.99%	Upper 120% - & above
2021	**$61,300**	0 - $30,649	$30,650 - $49,039	$49,040 - $73,559	$73,560 - & above
2022	**$68,000**	0 - $33,999	$34,000 - $54,399	$54,400 - $81,599	$81,600 - & above
2023	**$73,000**	0 - $36,499	$36,500 - $58,399	$58,400 - $87,599	$87,600 - & above

Housing Characteristics

There are 184,321 total housing units in the assessment area, of which 54.8 percent are owner-occupied, 30.7 percent are rental units, and 14.5 percent are vacant. As described, housing units in the assessment area are predominately owner-occupied, which indicates a variety of home lending opportunities available within the assessment area. However, significantly fewer home lending opportunities exist in low-income tracts where only 28.9 percent of housing units are owner-occupied.

The median age of housing stock in the assessment area is 46 years, which is older than the median age of housing stock in the state of Alabama (36 years). Housing units in LMI census tracts were older, with a median of 61 years for low-income tracts and 55 years for moderate-income tracts. The older age of homes is an indicator of potential opportunity for home improvement loans in LMI tracts.

As of 2020, the median housing value in the assessment area was $138,394, which was lower than the median housing value in Alabama ($149,600). Median gross rent in the assessment area was $869 per month, which was higher than the median gross rent in the state of Alabama ($811 per month). Additionally, the affordability ratio of the assessment area (35.8 percent) is similar to the affordability ratio of Alabama (34.8 percent). Families that are housing cost burdened are defined as renters or homeowners paying 30.0 percent or more of household income toward housing cost. Within the assessment area, 46.5 percent of renters had rent costs greater than 30 percent of income, which was higher than the state of Alabama at 40.8 percent.

Economic Conditions

The largest industries in Mobile AA are Health Care & Social Assistance (24,595 people), Manufacturing (21,992 people), and Retail Trade (19,744 people), and the highest paying industries are Management of Companies & Enterprises ($216,250), Mining, Quarrying, & Oil & Gas Extraction ($85,114), and Utilities ($73,043). From 2021 to 2022, employment in Mobile AA grew at a rate of 0.07 percent. The most common job groups by number of people living in Mobile AA are Office & Administrative Support Occupations (18,979 people), Sales & Related Occupations (17,722 people), and Management Occupations (16,409 people). [19]

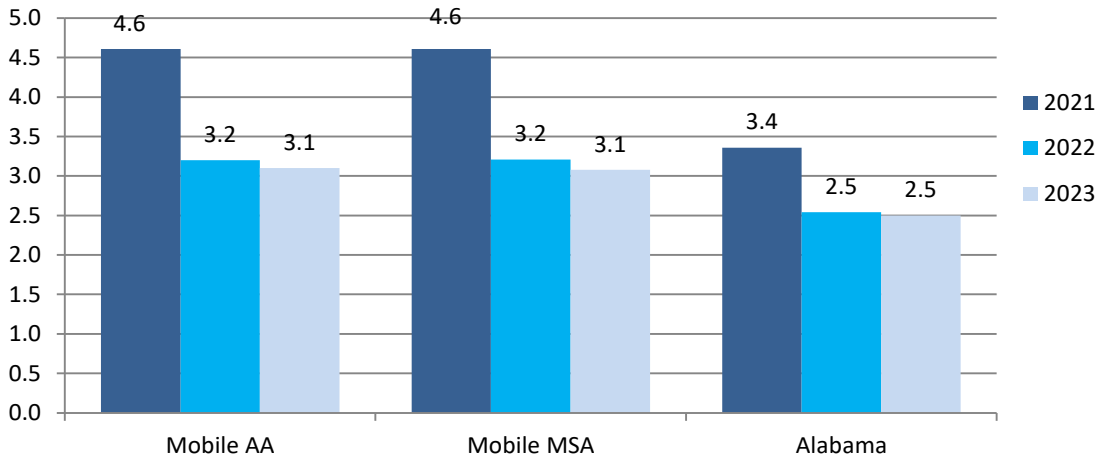
The Port of Mobile is one of only two deep draft ports in the United States with direct Gulf access to the 15,000 miles of inland waterway access. The Harbor deepening and widening project is projected to be completed by early 2025. Mobile has direct and easy access to both I-10 and I-65 Interstate highways, helping businesses cover North to South, East to West and all points in between. A new I-10 Mobile River Bridge construction started in 2024 which represents a $2.7 billion investment. The Mobile Aeroplex at Brookley and the Mobile

[19] *Mobile County, AL Data USA*. Available at: https://datausa.io/profile/geo/mobile-county-al/#economy (Accessed: 16 January 2025).

Regional Airport is owned and operated by the Mobile Airport Authority. The Mobile Aeroplex at Brookley will be the future home of the Mobile International Airport.[20]

The following table shows the unemployment rate for the Mobile AA, the MSA, and the state of Alabama during the review period. As shown, unemployment rates in the AA were higher than unemployment rates for the state of Alabama. The AA's unemployment rate decreased from 4.6 percent in 2021 to 3.1 percent in 2023 while the state's unemployment rate decreased from 3.4 percent in 2021 to 2.5 percent in 2023.

Unemployment Rates - AL Mobile



Not Seasonally Adjusted. Source: Bureau of Labor Statistics

Credit and CD Needs

As part of the CRA examination, information from two recent interviews with Mobile area CD practitioners were referenced. According to a local affordable housing contact, housing opportunities are limited in the AA; there is a shortage of affordable housing. Most new construction is occurring in the high-end luxury market segment. Existing home prices have also skyrocketed. Current market conditions make it challenging for LMI individuals to rent or purchase homes. Regarding economic conditions and banking needs, there are several partnerships with banks that help to provide financial literacy to the local community. The contact described how organizations have partnered with both large and small financial institutions for financial education. The contact also stated that the local financial institutions actively recruit business loans and business development loans which are relevant to the local tourism industry.

CONCLUSIONS WITH RESPECT TO PERFORMANCE TESTS IN THE MOBILE AA

LENDING TEST

Lending levels reflect adequate responsiveness to credit needs of the AA. The geographic distribution of loans reflects adequate penetration throughout the AA and the distribution of borrowers reflects good penetration among customers of different income levels and businesses of different revenue sizes. In addition, the bank made a low level of CD loans in the AA.

[20] "Location Advantage." *Mobile Chamber Economic Development*, 16 Aug. 2024, mobileeconomicdevelopment.com/location-advantage/#port-of-mobile. *Accessed 20 Dec. 2024*

The analysis included 2,186 HMDA-reportable loans and 912 small business loans reported by the bank in the AA during the review period. HMDA-reportable loans received greater weight in determining conclusions. Additionally, during the review period, the bank originated or purchased 759 home refinance loans, 607 home purchase loans, and 514 home improvement loans in the AA. Thus, when considering HMDA-reportable loan categories, greatest weight was assigned to home refinance loans given its relative share of the total HMDA-reportable lending in this AA, followed by home purchase loans and home improvement loans.

Details of the bank's mortgage and small business lending and information regarding lending by peers can be found in *Appendix F.*

Lending Activity

Lending activity is considered adequate. Overall, 1.0 percent of HMDA-reportable loans and 1.8 percent of small business loans were made in the AA. The percentage of the bank's HMDA-reportable and small business lending is below the percentage of its area deposits. This is considered adequate performance because the bank's most heavily weighted product in the AA is HMDA-reportable lending, and the bank is an important contributor to HMDA-reportable lending in the area. Regions ranked third in originating HMDA-reportable loans in 2021, second in 2022, and first in 2023.

Geographic Distribution of Loans

The geographic distribution of loans reflects adequate penetration throughout the AA. As described in the following sections, overall performance for HMDA-reportable lending is adequate and small business lending performance is good.

Home Refinance Loans

Home refinance lending in low-income tracts is not rated due to limited opportunity within low-income tracts in the AA. Limited opportunity is demonstrated by low percentages of owner-occupied housing and home refinance lending by the bank and aggregate lenders.

Home refinance lending in moderate-income tracts is adequate. In 2021, the bank made 6.0 percent of its home refinance loans in moderate-income tracts, which was below the percentage of owner-occupied units in these tracts (15.0 percent) but identical to aggregate performance of 6.0 percent. In 2022 and 2023, the bank made 15.4 percent of its home refinance loans in moderate-income tracts, which was below the percentage of owner-occupied units in these tracts (20.7 percent). In 2022, the bank's lending (14.4 percent) was similar to aggregate performance (13.7 percent) and in 2023, the bank's lending (16.7 percent) was similar to aggregate performance (16.4 percent).

Home Purchase Loans

Home purchase lending in low-income tracts is not rated due to limited opportunity within low-income tracts in the AA. Limited opportunity is demonstrated by low percentages of owner-occupied housing and home purchase lending by the bank and aggregate lenders.

Home purchase lending in moderate-income tracts is adequate. In 2021, the bank made 10.9 percent of its home purchase loans in moderate-income tracts, which was below the percentage of owner-occupied units in these tracts (15.0 percent) but above aggregate performance of 8.4 percent. In 2022 and 2023, the bank made 14.3 percent of its home purchase loans in moderate-income tracts, which was below the percentage of owner-occupied units in these tracts (20.7 percent). In 2022, the bank's lending (13.8 percent) was similar to aggregate performance (14.2 percent) and in 2023, the bank's lending (14.8 percent) was similar to aggregate performance (15.7 percent).

Home Improvement Loans
Home improvement lending in low-income tracts is not rated due to limited opportunity within low-income tracts in the AA. Limited opportunity is demonstrated by low percentages of owner-occupied housing and home improvement lending by the bank and aggregate lenders.

Home improvement lending in moderate-income tracts is adequate. In 2021, the bank made 8.9 percent of its home improvement loans in moderate-income tracts, which was below the percentage of owner-occupied units in these tracts (15.0 percent) but similar to aggregate performance of 9.6 percent. In 2022 and 2023, the bank made 11.7 percent of its home improvement loans in moderate-income tracts, which was below the percentage of owner-occupied units in these tracts (20.7 percent). In 2022, the bank's lending (6.9 percent) was below aggregate performance (10.7 percent) and in 2023, the bank's lending (18.9 percent) was similar to aggregate performance (18.6 percent).

Small Business Loans
Small business lending in low-income tracts is adequate. In 2021, the bank made 6.4 percent of its small business loans in low-income tracts, which was similar to the percentage of total businesses located in these tracts (6.9 percent) and aggregate performance of 6.6 percent. In 2022 and 2023, the bank made 2.7 percent of its small business loans in low-income tracts, which was below the percentage of total businesses located in these tracts (3.8 percent). In 2022, the bank's lending (1.8 percent) was below aggregate performance (3.5 percent) and in 2023, the bank's lending (3.4 percent) was similar to aggregate performance of 3.5 percent.

Small business lending in moderate-income tracts is good. In 2021, the bank made 17.9 percent of its small business loans in moderate-income tracts, which was below the percentage of total businesses located in these tracts (19.2 percent) but similar to aggregate performance of 18.1 percent. The bank's performance improved in 2022 and 2023, with the bank making 32.9 percent of its small business loans in moderate-income tracts, which was above the percentage of total businesses located in these tracts (26.9 percent). In 2022, the bank's lending (36.4 percent) was above aggregate performance (23.9 percent) and in 2023, the bank's lending (30.4 percent) was again above aggregate performance of 23.3 percent.

No conspicuous lending gaps were identified based on an analysis of the dispersion of the loan products reviewed. The bank had activity in over 90 percent of census tracts throughout the review period. Additionally, lending data and maps did not indicate an absence of loans across LMI tracts.

Lending to Borrowers of Different Incomes and Businesses of Different Sizes
The distribution of loans based on borrower income or gross annual revenues is good. As described in the following sections, overall performance for HMDA-reportable lending is excellent while small business lending performance is adequate. While HMDA-reportable loans were given greater weight in deriving conclusions in the AA, the bank's adequate performance in small business lending was also considered in deriving an overall borrower distribution conclusion of good, especially when considering that Regions Bank is an important contributor to both HMDA-reportable lending and small business lending in the Mobile AA.

Home Refinance Loans
Home refinance lending to low-income borrowers is excellent. In 2021, the bank made 7.3 percent of its home refinance loans to low-income borrowers, which was below the percentage of low-income families (24.0 percent) but nearly double aggregate performance of 3.9 percent. Bank performance improved in 2022 and 2023, with the bank making 13.4 percent of its home refinance loans to low-income borrowers, which was below the percentage of low-income families (21.9 percent). In 2022, the bank's lending (17.2 percent) was more than double aggregate

performance (7.8 percent) and in 2023, the bank's lending (7.9 percent) was above aggregate performance (6.9 percent).

Home refinance lending to moderate-income borrowers is excellent. In 2021, the bank made 19.2 percent of its home refinance loans to moderate-income borrowers, which was above the percentage of moderate-income families (15.6 percent) and above aggregate performance of 12.3 percent. Bank performance improved in 2022 and 2023, with the bank making 29.1 percent of its home refinance loans to moderate-income borrowers, which was above the percentage of moderate-income families (17.5 percent). In 2022, the bank's lending (25.6 percent) was above aggregate performance (18.8 percent) and in 2023, the bank's lending (34.1 percent) was above aggregate performance (17.9 percent).

Home Purchase Loans

Home purchase lending to low-income borrowers is good. In 2021, the bank made 7.8 percent of its home purchase loans to low-income borrowers, which was below the percentage of low-income families (24.0 percent) but above aggregate performance of 5.1 percent. In 2022 and 2023, the bank made 7.1 percent of its home purchase loans to low-income borrowers, which was below the percentage of low-income families (21.9 percent). In 2022, the bank's lending (6.7 percent) was above aggregate performance (4.8 percent) and in 2023, the bank's lending (7.7 percent) was nearly double aggregate performance (4.2 percent).

Home purchase lending to moderate-income borrowers is excellent. In 2021, the bank made 23.7 percent of its home purchase loans to moderate-income borrowers, which was above the percentage of moderate-income families (15.6 percent) and above aggregate performance of 19.8 percent. Bank performance improved in 2022 and 2023, with the bank making 30.6 percent of its home purchase loans to moderate-income borrowers, which was above the percentage of moderate-income families (17.5 percent). In 2022, the bank's lending (31.8 percent) was above aggregate performance (19.5 percent) and in 2023, the bank's lending (29.0 percent) was also above aggregate performance (17.1 percent).

Home Improvement Loans

Home improvement lending to low-income borrowers is good. In 2021, the bank made 7.8 percent of its home improvement loans to low-income borrowers, which was below the percentage of low-income families (24.0 percent) but above aggregate performance of 6.5 percent. In 2022 and 2023, the bank made 10.5 percent of its home improvement loans to low-income borrowers, which was below the percentage of low-income families (21.9 percent). In 2022, the bank's lending (8.4 percent) was above aggregate performance (5.8 percent) and in 2023, the bank's lending (13.6 percent) was above aggregate performance (8.4 percent).

Home improvement lending to moderate-income borrowers is good. In 2021, the bank made 17.2 percent of its home improvement loans to moderate-income borrowers, which was above the percentage of moderate-income families (15.6 percent) and above aggregate performance of 13.4 percent. In 2022 and 2023, the bank made 18.6 percent of its home improvement loans to moderate-income borrowers, which was above the percentage of moderate-income families (17.5 percent). In 2022, the bank's lending (17.8 percent) was above aggregate performance (13.8 percent) and in 2023, the bank's lending (19.7 percent) was above aggregate performance (16.0 percent).

Small Business Loans

Small business lending to businesses of different sizes is adequate. In 2021, the bank made 74.5 percent of its small business loans to businesses with revenues of $1 million or less, which was below the percentage of total businesses with revenues of $1 million or less (90.7 percent). The bank's performance is above aggregate performance of 38.4 percent. However, 2021 was a year in which many banks extended PPP loans as a result of the COVID-19 pandemic and were not required to capture and report the revenue of the businesses, which is

reflected in the aggregate data. As a result, performance context and loan size data were considered. In 2021, the bank made loans of less than $250,000 to businesses at a similar rate (93.7 percent) as aggregate lenders (94.2 percent). In 2022 and 2023, the bank made 48.8 percent of its small business loans to businesses with revenues of $1 million or less, which was below the percentage of total businesses with revenues of $1 million or less (91.5 percent). In 2022, the bank's lending (49.1 percent) was above aggregate performance (42.9 percent) and in 2023, the bank's lending (48.6 percent) was above aggregate performance (44.8 percent).

CD Lending

The bank makes a low level of CD loans in the Mobile AA. During the review period, the bank originated three qualified CD loans totaling $27.3 million in the AA. Specifically, the bank provided $15 million for the revitalization and stabilization of LMI communities and $12.3 million for affordable housing for LMI individuals. When considering the bank's presence in the AA and performance context, this performance is below performance of other banks in the area.

Two of the loans were deemed responsive to AA needs and are described below.

- $12.3 million for the construction of apartments in the AA using LIHTCs, which are complex. The projects are designed to create 55 new units of affordable housing for LMI individuals and/or families. These loans are responsive given the affordable housing challenges and the need for additional affordable housing units in the AA as noted by community contacts.

INVESTMENT TEST

The bank made an excellent level of qualified CD investments and grants in the Mobile AA, totaling $38.1 million. This amount includes seven current period investments totaling $28.4 million, 14 prior period investments still outstanding with a balance of $9.2 million, and 62 donations totaling $537,000.

Investment types varied and addressed a range of CD needs. These include state tax credit investments to support economic development, deposits and equity investments in CDFIs, SBA 504 debentures to finance small business development, LIHTC projects to address affordable housing challenges, and MBS supporting LMI borrowers. The bank made extensive use of innovative and/or complex investments to support CD initiatives. Additionally, the bank exhibits excellent responsiveness to CD needs.

Example of noteworthy investments and grants provided during the review period that are responsive to local CD and credit needs include:

- A $13.5 million current period LIHTC for the creation of 55 new units of affordable housing for LMI individuals and families.

- An $800,000 current period equity investment and $250,000 current period deposit in a local CDFI that primarily serves LMI individuals and communities.

- A $600,000 state tax credit that helped fund the development of an industrial site located in a moderate-income tract. This development will attract a new employer to the area, resulting in job opportunities for local residents.

- Two state tax credit investments totaling $300,000 to support a local small business incubator that supports early-stage entrepreneurship efforts.

- Two donations totaling $13,000 to a local affordable housing agency.

- Three donations totaling $50,000 to a local nonprofit that provides mentorship and educational programming for LMI youth.

The Mobile AA also positively benefited from $5.2 million in investments and $723,400 in donations benefiting a BSRA that includes the entire state of Alabama. These investments and donations were previously described under the *Investment Test* heading for the state of Alabama.

SERVICE TEST

Retail banking services are adequate in Mobile. Additionally, the bank provides an adequate level of CD services in its AA.

Retail Banking Services

Service delivery systems are reasonably accessible to the bank's geographies and individuals of different income levels throughout the AA. In deriving this conclusion, the distribution of the bank's branches by census tract income level was compared to the distribution of households and businesses among the tract categories in the AA. As the following tables show, the bank operated branches and ATMs in all census tract categories throughout the review period, with 4.2 percent of branches in low-income tracts and 25.0 percent of branches in moderate-income tracts in 2023. The percentage of branches in low-income tracts exceeded the percentage of households (3.6 percent) and businesses (3.8 percent) in those tracts. The percentage of branches in moderate-income tracts was slightly less than the percentage of households (27.1 percent) and businesses (26.9 percent) in those tracts. Additionally, the bank had several branches located in middle-income tracts but near moderate-income tracts, which enhanced accessibility to the households and businesses in moderate-income tracts. During the review period, the bank did not open or close any branches in this AA.

Hours of operation are similar across branches, with drive-through and branch lobby hours from 9:00 a.m. to 4:30 p.m. Monday through Thursday and until 5 p.m. on Friday. The bank offers Saturday lobby hours from 9:00 a.m. to noon at a limited number of branches, including two branches in moderate-income tracts in 2023. Thus, hours and services do not vary in a way that inconveniences the AA, particularly LMI geographies and individuals.

The tables below show the distribution of branches and ATMs along with households and businesses by tract category.

CD Services

The bank provides an adequate level of CD services in the AA. During the review period, bank employees provided 115 CD service activities totaling 717 hours to approximately 30 different organizations operating throughout the AA. Bank staff provided their financial expertise in a variety of ways, including financial literacy and homebuyer education; service on board of directors and other committees of nonprofit organizations engaged in CD and other technical assistance.

Noteworthy and responsive CD services in the Mobile AA include:

- Bank staff provided over 439 hours of board service for 15 different nonprofit organizations that serve the Mobile AA.
- Bank staff provided 92 hours of service for a nonprofit organization focused on housing preservation and commercial revitalization of a historic community located in a moderate-income tract. In addition to board service, a human resources associate provided technical assistance to the organization by helping them develop employment procedures for an executive search committee.

- A staff member provided 20 hours of service on the board of directors for a nonprofit business incubator and innovation hub focused on accelerating startup growth in the Gulf Coast region.
- Several staff members provided 23 hours of service assisting a nonprofit organization with the preparation of a grant application to the Federal Home Loan Bank to help finance the renovation of affordable housing developments.
- 160 hours of service providing financial and homebuyer education in conjunction with schools and nonprofit and faith-based organizations.

METROPOLITAN AREAS
LIMITED-SCOPE REVIEW

The following MSA AAs were reviewed using limited-scope examination procedures. Through these procedures, conclusions regarding the institution's CRA performance are drawn from the review of available facts and data, including performance and demographic information. Please refer to the tables in *Appendices G and H* for additional information regarding these AAs.

DESCRIPTION OF INSTITUTION'S OPERATIONS IN ALABAMA MSA AAs

MSA AA	AA Delineation/Counties	# Branches *(as of 12/31/2023)*	Deposits ($000s) *(as of June 30, 2023)*
Anniston	Calhoun	6	$473,464
Auburn	Lee	2	$342,627
Daphne-Fairhope-Foley	Baldwin	9	$1,424,768
Decatur	Lawrence & Morgan	4	$589,220
Dothan	Houston	5	$664,367
Florence	Colbert & Lauderdale	4	$286,598
Gadsden	Etowah	4	$319,587
Huntsville	Limestone & Madison	18	$2,661,617
Montgomery	Autauga, Elmore, & Montgomery	15	$2,302,892
Tuscaloosa	Tuscaloosa	7	$764,117

CONCLUSIONS WITH RESPECT TO PERFORMANCE TESTS

The following table compares conclusions regarding performance in each limited-scope MSA AA to overall performance for the state of Alabama.

Performance in the Limited-Scope Review Metropolitan Assessment Areas			
MSA AA	**Lending Test**	**Investment Test**	**Service Test**
Anniston	Consistent	Not Consistent (Below)	Consistent
Auburn	Not Consistent (Below)	Consistent	Consistent
Daphne-Fairhope-Foley	Not Consistent (Below)	Not Consistent (Below)	Not Consistent (Below)
Decatur	Not Consistent (Below)	Not Consistent (Below)	Not Consistent (Below)
Dothan	Consistent	Not Consistent (Below)	Not Consistent (Below)
Florence	Consistent	Consistent	Consistent
Gadsden	Not Consistent (Exceeds)	Consistent	Not Consistent (Below)
Huntsville	Consistent	Not Consistent (Below)	Not Consistent (Below)
Montgomery	Consistent	Not Consistent (Below)	Not Consistent (Below)
Tuscaloosa	Consistent	Not Consistent (Below)	Not Consistent (Below)

The performance standards of the Lending Test for limited-scope areas include geographic distribution, borrower distribution, and CD loans. For the geographic distribution of loans, performance was good in Dothan and Montgomery, poor in Daphne-Fairhope-Foley, and adequate in the remaining AAs. Borrower distribution was excellent in Tuscaloosa, adequate in Auburn, and good in the remaining AAs. Qualifying amounts and conclusions for CD loans were as follows: $2.3 million in Anniston (low level); $12.3 million in Gadsden (excellent); $45.3 million in Huntsville (adequate); and $10.6 million in Montgomery (low level). The bank made no qualifying CD loans in the remaining six limited-scope MSA AAs.

Qualifying amounts and conclusions for the bank's investment and grant activity in limited-scope MSA areas are as follows: $1 million in Anniston (few, if any), $12.6 million in Auburn (excellent level), $5.7 million in Daphne-Fairhope-Foley (poor level), $4.8 million in Decatur (adequate level), $931,000 in Dothan (few, if any), $10 million in Florence (excellent level), $15.1 million in Gadsden (excellent level), $31 million in Huntsville (significant level), $34 million in Montgomery (significant level), and $3.4 million in Tuscaloosa (poor level).

The performance standards of the Service Test for limited-scope MSA areas include retail banking and CD services. Conclusions for retail banking services were as follows: good in Anniston and Florence; adequate in Auburn, Daphne-Fairhope-Foley, Decatur, Dothan, Gadsden, Huntsville, Montgomery and Tuscaloosa. Qualifying hours and conclusions for CD services were as follows: 199 hours in Anniston (adequate level); 162 hours in Auburn (leader); 57 hours in Daphne-Fairhope-Foley (poor level); 172 hours in Decatur (adequate level); 135 hours in Dothan (adequate level); 208 hours in Florence (relatively high level); 134 hours in Gadsden (adequate level); 1,078 hours in Huntsville (relatively high level); 552 hours in Montgomery (adequate level); 380 hours in Tuscaloosa (relatively high level). All MSA AA reviewed under limited-scope procedures also positively benefited from 545 hours of CD service benefiting the BSRA that includes the entire state of Alabama. These services were previously described under the *CD Services* section for the state of Alabama.

Performance in the limited-scope AAs did impact overall performance for the state. See *CD Lending* within the *Conclusions with Respect to Performance Tests in Alabama* section of the report for more details.

NONMETROPOLITAN STATEWIDE AREAS
LIMITED-SCOPE REVIEW

The following non-MSA AAs were reviewed using limited-scope examination procedures. Through these procedures, conclusions regarding the institution's CRA performance are drawn from the review of available facts and data, including performance and demographic information. Please refer to the tables in *Appendices G and H* for additional information regarding these AAs.

DESCRIPTION OF INSTITUTION'S OPERATIONS IN ALABAMA NON-MSA AAs

Non-MSA AA	AA Delineation/Counties	# Branches *(as of 12/31/2023)*	Deposits ($000s) *(as of June 30, 2023)*
Coffee-Covington-Escambia	Coffee, Covington, & Escambia	5	$279,654
Northern AL	Cherokee, Cullman, Dekalb, Fayette, Jackson, Marshall, & Walker	11	$1,322,359
Southern AL	Choctaw, Clarke, Conecuh, Dallas, Marengo, Monroe, Pike, & Sumter	11	$637,793
Talladega-Tallapoosa	Talladega & Tallapoosa	4	$219,576

CONCLUSIONS WITH RESPECT TO PERFORMANCE TESTS

The following table compares conclusions regarding performance in each limited-scope non-MSA AA to overall performance for the state of Alabama.

Performance in the Limited-Scope Review Non-MSA Assessment Areas			
Non-MSA AA	**Lending Test**	**Investment Test**	**Service Test**
Coffee-Covington-Escambia	Not Consistent (Exceeds)	Consistent	Not Consistent (Below)
Northern AL	Consistent	Not Consistent (Below)	Not Consistent (Below)
Southern AL	Consistent	Not Consistent (Below)	Not Consistent (Below)
Talladega-Tallapoosa	Not Consistent (Below)	Not Consistent (Below)	Not Consistent (Below)

The performance standards of the Lending Test for limited-scope areas include geographic distribution, borrower distribution, and CD loans. For the geographic distribution of loans, performance was good in Coffee-Covington-Escambia, poor in Talladega-Tallapoosa, and adequate in the remaining AAs. Borrower distribution was excellent in Coffee-Covington-Escambia, good in Southern Alabama, and adequate in the remaining AAs. Qualifying amounts and conclusions for CD loans were as follows: $4.1 million in Coffee-Covington-Escambia (adequate); $4.5 million in Northern Alabama (low level); and $4.4 million in Southern Alabama (low level). The bank made no qualifying CD loans in Talladega-Tallapoosa.

Qualifying amounts and conclusions for the bank's investment and grant activity in limited-scope non-MSA areas are as follows: $8.1 million in Coffee-Covington-Escambia (excellent level), $10.9 million in Northern Alabama (adequate level), $8.9 million in Southern Alabama (significant level), and $842,000 in Talladega-Tallapoosa (poor level).

The performance standards of the Service Test for limited-scope non-MSA areas include retail banking and CD services. Conclusions for retail banking services were as follows: good in Coffee-Covington-Escambia and adequate in Northern Alabama, Southern Alabama and Talladega-Tallapoosa. Qualifying hours and conclusions for CD services were as follows: 25 hours in Coffee-Covington-Escambia (poor level); 227 hours in Northern Alabama (adequate level); 46 hours in Southern Alabama (poor level); 380 hours in Talladega-Tallapoosa (relatively high level). All non-MSA AAs reviewed under limited-scope procedures also positively benefited from 545 hours of CD service benefiting the BSRA that includes the entire state of Alabama. These services were previously described under the *CD Services* section for the state of Alabama.

Performance in the limited-scope AAs did impact overall performance for the state. See *CD Lending* within the *Conclusions with Respect to Performance Tests in Alabama* section of the report for more details.

TENNESSEE

CRA RATING FOR TENNESSEE: SATISFACTORY

The Lending Test is rated: **High Satisfactory**
The Investment Test is rated: **Outstanding**
The Service Test is rated: **High Satisfactory**

Major factors contributing to this rating include:

- The geographic distribution of loans reflects adequate penetration throughout Tennessee AAs.
- The distribution of borrowers reflects good penetration throughout Tennessee AAs.
- The bank made a relatively high level of CD loans in Tennessee.
- The bank made an excellent level of qualified CD investments and grants in Tennessee.
- Retail banking services, which includes accessibility of delivery systems, changes in branch locations, and reasonableness of hours and services, are adequate.
- The bank provides a relatively high level of CD service activities in Tennessee

SCOPE OF EXAMINATION

A full-scope review was conducted for the following AA in Tennessee:
- Nashville

Limited-scope reviews were conducted for the remaining 10 AAs:
- Clarksville
- Cleveland
- Eastern Tennessee
- Jackson
- Johnson City
- Kingsport
- Knoxville
- Middle Tennessee
- Morristown
- Western Tennessee

The time period, products, and affiliates evaluated for these AAs are consistent with the scope discussed in the institution section of this report.

DESCRIPTION OF INSTITUTION'S OPERATIONS IN TENNESSEE

As of June 30, 2023, Regions Bank had $17.3 billion in deposits in Tennessee accounting for 13.4 percent of its total deposits. Regions Bank operated 148 branch offices in Tennessee as of December 31, 2023, representing

11.6 percent of its total branches. HMDA-reportable lending in Tennessee accounted for 14.4 percent of total institutional HMDA-reportable lending by number of loans and 12.0 percent by dollar volume. Small business lending in Tennessee accounted for 9.8 percent of the bank's total small business lending by number of loans and 9.0 percent by dollar volume.

The following table shows lending activity from January 1, 2021 through December 31, 2023.

Statewide Summary of Lending Activity
Assessment Areas Located in: Tennessee
2021-2023

Loan Type	#	%	$(000s)	%

Originations & Purchases

CONCLUSIONS WITH RESPECT TO PERFORMANCE TESTS IN TENNESSEE

LENDING TEST

Overview

The Lending Test rating for the state of Tennessee is High Satisfactory. The rating is a result of performance in each characteristic of the Lending Test applicable to the state, including Lending Activity (adequate); Geographic Distribution (adequate); Borrower Distribution (good); and CD Lending (relatively high level). Highlights of each characteristic are found in the sections that follow, with additional descriptions and details within each AA of the state.

Lending Activity

Lending levels reflect adequate responsiveness to the credit needs of Tennessee AAs. The total number and dollar volume of HMDA-reportable and CRA small business loans was considered in arriving at this conclusion, as well as competitive factors and the bank's overall importance to each AA. Statewide conclusions are derived from conclusions within each AA as detailed in the *Lending Activity* section of the Nashville AA.

Geographic and Borrower Distribution

The geographic distribution of HMDA-reportable and small business loans reflects adequate dispersion throughout the AAs in Tennessee and the distribution of borrowers by customer income and revenue size of

businesses is good. The analyses of HMDA-reportable and small business lending within the full-scope AA in Tennessee are discussed in detail later in this report.

CD Lending

The bank made a relatively high level of CD loans in Tennessee, driven by performance in the Nashville full-scope AA. During the review period, the bank originated or renewed $239.4 million in qualified CD loans directly benefiting Tennessee AAs. More information on CD loans can be found in the full-scope AA sections of this report. In addition, the bank received consideration at the state level for nine CD loans totaling $24.4 million that benefited multiple AAs throughout the state. Statewide loans include:

- Four loans totaling $14.2 million to two statewide CDFIs operating in Nashville. The loans served multiple purposes, including developing 1-4 family and multifamily affordable housing and creating an opportunity fund for small businesses in the state.

- One loan totaling $5 million to a CDFI serving the southeastern U.S. The loan proceeds were targeted to Knoxville and Eastern Tennessee AAs and used for providing access to capital, creating jobs, and providing technical assistance for small businesses in LMI communities.

- Three renewing LOCs totaling $5 million to a foodbank operating in Nashville and serving a large portion of Tennessee, including Clarksville, Jackson, Nashville, Middle Tennessee, and Western Tennessee AAs. The LOCs were utilized by the non-profit to continue its services while awaiting grant and state funding.

- One LOC totaling $500,000 to a nonprofit housing agency operating in Nashville and serving Nashville, Middle Tennessee, and Clarksville AAs.

INVESTMENT TEST

The Investment Test rating for Tennessee is Outstanding. The bank made an excellent level of qualified CD investments and grants in Tennessee, with $371.3 million in qualified investments and $3.4 million in qualified contributions directly benefiting its Tennessee AAs. In addition, the bank received consideration at the state level for $4.4 million in qualifying statewide contributions. $4.3 million of these contributions were to a statewide CDFI focused on financing small businesses. Another 13 contributions, totaling $75,000, benefited statewide affordable housing organizations.

The bank made an excellent level of qualified investments and contributions in the Nashville full-scope AA. Additional details regarding specific investments and contributions can be found in the full-scope AA section of this report.

The bank was responsive to the needs of its AAs in the state of Tennessee. Therefore, the bank also received consideration for $14 million in qualified investments within the state that benefited geographies outside of the bank's AAs. This amount included four LIHTCs totaling $4.4 million and one NMTC totaling $9.5 million.

SERVICE TEST

The Service Test rating for Tennessee is High Satisfactory.

Retail Services

Delivery systems are reasonably accessible to the bank's geographies and individuals of different income levels in Tennessee. As of December 31, 2023, Regions operated 148 branches in the state, including six branches in

low-income tracts and 45 branches in moderate-income tracts, representing 34.5 percent of total statewide branches.

A full array of personal and business banking products and services is offered at all locations in Tennessee AAs. Across the state, branch hours vary but not in a way that inconveniences individual AAs. Branches generally offer lobby hours and drive-through hours beginning at 9 a.m. and closing at 4 p.m. Monday-Thursday. However, in some AAs, including Jackson and Middle TN, and in a limited number of branches in other AAs, branch lobby and drive-through hours start at 8:30 a.m. The bank also offers later hours until 4:30 p.m. or 5 p.m. at some branches across the state, particularly in the larger urban areas of Nashville and Knoxville, as well as in the Western TN AA. Regions offers branch lobby hours on Saturday from 9 a.m. to 12 p.m. at slightly less than half of the branches statewide. Delivery systems include full-service ATMs at nearly all of the branches. In addition to those ATMs, the bank compliments its traditional service delivery methods with alternative delivery systems that provide increased access to banking services, as previously discussed in the *Institution, Retail Banking Services* section of this report.

During the review period, the bank closed 12 branches and opened four branches in Tennessee. At the time of closure, two branches were in moderate-income tracts, seven branches were in middle-income tracts, and 3 branches were in upper-income tracts. The bank opened once branch in a moderate-income tract, one in a middle-income tract and two in upper-income tracts. Changes to the bank's branch network in Tennessee did not adversely affect the accessibility of delivery systems, particularly to LMI geographies or LMI individuals.

Additional details on the bank's retail services can be found in the full-scope AA section of this report.

CD Services

Regions provides a relatively high level of CD services in Tennessee. During the review period, the bank engaged in 6,212 hours of qualifying CD service activities in the state. This total includes 6,124 hours directly benefiting individual AAs in Tennessee and 88 hours benefiting a BSRA that includes all of the bank's AAs in state. The hours that benefit the BSRA include board of directors' representation for a statewide housing agency and a CDFI that provides small business financing across the state.

Additional details of service hours in Tennessee are described later in the report in the sections for the individual AAs they benefit.

METROPOLITAN AREA – NASHVILLE MSA
(Full-Scope Review)

DESCRIPTION OF INSTITUTION'S OPERATIONS IN THE NASHVILLE AA

Overview

The Nashville AA consists of Cannon, Cheatham, Davidson, Dickson, Maury, Robertson, Rutherford, Sumner, Williamson, and Wilson counties, which are part of the 14-county Nashville-Davidson-Murfreesboro-Franklin MSA. As of December 31, 2023, Regions Bank operated 64 branch offices in the AA, representing 43.2 percent of the bank's branches in the state of Tennessee and 5.0 percent of its total branches. Of the branches in the AA two are in low-income census tracts, 17 are in moderate-income census tracts, 19 are in middle-income census tracts, 25 are in upper-income census tracts, and one is in an unknown income census tract. As a percentage within the state of Tennessee, 57.8 percent of the bank's deposit volume and 50.9 percent of its HMDA-reportable and small business loans by number are located in the Nashville AA.

Nashville has a competitive banking market where national and regional banks have a significant presence in addition to a number of local community banks. According to the June 30, 2023 FDIC Summary of Deposits Report, there were 62 financial institutions operating 561 branch locations across the AA with $91.9 billion in total deposits.[21] Regions Bank ranked 3rd in deposit market share with $10 billion or 10.9 percent of total deposits. Pinnacle Bank and Bank of America held the largest deposit market share, with 21.2 percent and 14.7 percent respectively.[22]

HMDA-reportable lending and small business lending are similarly competitive. Regions ranked 6th out of 912 lenders in 2021 with 2.5 percent of total HMDA-reportable loans. In 2022, the bank ranked 2nd out of 882 lenders with 3.3 percent of total HMDA-reportable loans. In 2023, the bank ranked 6th out of 818 lenders with 2.9 percent of total HMDA-reportable loans. Regions Bank's ranking indicates that it is an important contributor for HMDA-reportable lending in the Nashville AA. Other leading HMDA reporters in the AA included Rocket Mortgage, Pinnacle Bank, Wells Fargo Bank, U.S. Bank, and PennyMac Loan Services.

For small business lending, Regions ranked 7th in 2021 with 4 percent of total small business loans. In 2022, the bank ranked 21st in market share, with 0.5 percent of total small business loans. In 2023, the bank ranked 15th in market share, with 0.7 percent of total small business loans. Leading small business reporters in the market included American Express, JP Morgan Chase, Bank of America, and U.S Bank.

AA Demographics, Population, and Income Characteristics

The Nashville AA has grown rapidly in recent years. Population in the AA was approximately 2 million in 2023, representing an increase of 4.4 percent since 2020.[23] Davidson County, which the city of Nashville is part of, is the largest county in the AA with a 2023 population of 712,334. The highest population growth rates in the AA from 2020 to 2023 have been in the suburban counties; 10.8 percent in Wilson County, 9.7 percent in Maury County, and 7.5 percent in Rutherford County.[24]

[21] "Office and Deposits of all FDIC-Insured Institutions: Deposit Market Share Report." *Federal Deposit Insurance Corporation*, https://www7.fdic.gov/sod/sodMarketRpt.asp?barItem=2. Accessed 5 Dec 2024.
[22] Ibid.
[23] "QuickFacts." *United States Census Bureau*, https://www.census.gov/quickfacts/fact/table/US,TN,davidsoncountytennessee,dicksoncountytennessee,maurycountytennessee,robertsoncountytennessee/PST045221. Accessed 5 Dec 2024.
[24] Ibid.

The AA contains 415 census tracts: 22 low-income tracts (5.3 percent), 102 moderate-income tracts (24.6 percent), 163 middle-income tracts (39.3 percent), 118 upper-income tracts (28.4 percent), and 10 unknown-income tracts (2.4 percent).

For purposes of classifying borrower income, this evaluation uses the FFIEC estimated median family income for the Nashville-Davidson-Murfreesboro-Franklin MSA. As shown, the median family income increased from $79,200 in 2021 to $100,500 in 2023.

Borrower Income Levels
Nashville-Davidson-Murfreesboro-Franklin, TN MSA

FFIEC Estimated Median Family Income		Low	Moderate	Middle	Upper
		0 - 49.99%	50% - 79.99%	80% - 119.99%	120% - & above
2021	**$79,200**	0 - $39,599	$39,600 - $63,359	$63,360 - $95,039	$95,040 - & above
2022	**$95,600**	0 - $47,799	$47,800 - $76,479	$76,480 - $114,719	$114,720 - & above
2023	**$100,500**	0 - $50,249	$50,250 - $80,399	$80,400 - $120,599	$120,600 - & above

There were 464,362 total families in the AA. Of these families, 20.2 percent were low-income, 17.6 percent were moderate-income, 21.6 percent were middle-income, and 40.5 percent were upper-income. 7.7 percent of families had income below the poverty level, which was lower than 10.6 percent poverty level for the state of Tennessee. Within the AA, the families below poverty in Cannon County was higher at 12.5 percent while Williamson County was lower at 3.2 percent. Additionally, poverty rates are higher in LMI tracts, with 29.5 percent of the families residing in low-income tracts living below the poverty level and 14.4 percent of the families residing in moderate-income tracts living below the poverty level. Additionally, 36.3 percent of low-income families and 31.5 percent of moderate-income families reside in moderate-income tracts.

Housing Characteristics

There are 765,550 total housing units in the AA, of which 60.4 percent are owner-occupied, 32.0 percent are rental units, and 7.6 percent are vacant. However, fewer home ownership opportunities exist in low-income tracts as only 26.3 percent of housing units in low-income tracts are owner-occupied.

The median age of housing stock across the AA was 37 years, which is slightly older than the median age of the housing stock for the state of Tennessee (36 years). Housing units in LMI census tracts were older, with a median age of 48 years in low-income tracts and 44 years in moderate-income tracts. The older age of homes is an indicator of potential opportunity for home improvement loans in LMI tracts.

The median housing value across the AA is $266,581, which is higher than the statewide median housing value in Tennessee ($177,600). Median gross rent in the AA is $1,144 per month, which is higher than the median gross rent in the state of Tennessee ($897 per month). Additionally, the affordability ratio for the AA (25.7 percent) is lower than the affordability ratio for the state of Tennessee (30.9 percent). Housing cost burden is a challenge in the AA. Data shows that the percentage of renters with rent costs greater than 30 percent of income is 44.1 percent, which is higher than the state of Tennessee at 42.4 percent. Housing data suggests that housing in the AA is less affordable than housing in the state of Tennessee.

Economic Conditions

Nashville has ranked as one of the top 10 large metropolitan areas for population and job growth in recent years and is also a leading national hub for the health care industry and a thriving tourism center. Between January 2020 and December 2023, total nonfarm payrolls grew 9.2 percent in the MSA,[25] while total nonfarm payrolls in the United States only increased 3.6 percent.[26] The industries with the fastest job growth in this same period included food services, manufacturing, transportation, and healthcare.[27] Meanwhile, the utilities, agriculture and mining industries saw decreases in total jobs during the same period.[28] The key industries that represent the majority of the region's economy are health care, music and entertainment, manufacturing, tourism and hospitality.[29] Apart from state government, the leading private sector employers are Vanderbilt University Medical Center, Nissan North America, Hospital Corporation of America Healthcare, Inc., Vanderbilt University, and Amazon.[30]

As displayed in the following charts, all counties in the AA had an unemployment rate of 5.0 percent or lower from 2021 to 2023. The unemployment rate improved for most counties in the AA during this timeframe. Maury County had the highest unemployment rate while Williamson County had the lowest. Additionally, the unemployment rate in the MSA (2.7 percent) and the state of Tennessee (at 3.3 percent) decreased from 2021 to 2023.

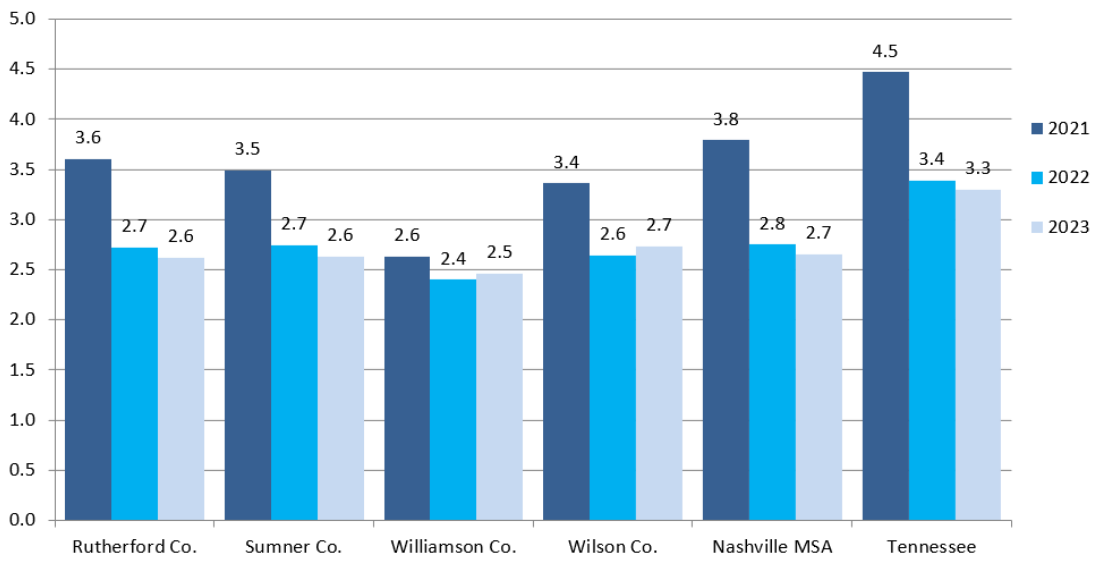
Unemployment Rates - TN Nashville (2 of 2)



Not Seasonally Adjusted. Source: Bureau of Labor Statistics

Credit and CD Needs

As part of the CRA examination, information was obtained from individuals specializing in small business financing and economic development. One contact indicated that the local economy is strong and trending up as unemployment is below the national average. However, the housing market is limited for LMI families, as quality housing stock under $300,000 is basically nonexistent. According to the contact, the primary limitation is funding. The contact stated that the primary credit needs are LMI mortgages, but the current housing market does not have sufficient supply in the necessary price range. The contact also mentioned that the largest issue in the area is the lack of financial literacy in the community.

According to a community contact involved with economic development, Dickson County is part of the thriving Nashville, TN MSA. The contact stated the local economy continues to experience vibrant growth. The unemployment rate for Dickson County has slightly increased, but is still relatively low given the commercial, industrial, retail, and residential growth in this area. Requests for residential housing permits in the area are slowing somewhat due to the current interest rates. The contact stated that there were needs within the local community for residential housing, business loans, and consumer loans. The contact also indicated that there continues to be a need for market rate housing and housing for first-time home buyers, in addition to affordable apartment homes in the area for LMI residents. Lastly, the contact stated that all local institutions appear to be doing a good job of meeting the financial needs of the area, and institutions appear to be willing to assist building the communities in the area.

Another community contact stated that many LMI individuals are not banked in traditional ways. Bigger banks are not reaching LMI individuals who are gravitating to FinTechs and prepaid pay-cards from employers. There is high credit union engagement; however, the contact believes credit unions are no better in the rates they offer or underwriting standards than banks. Neighborhoods in the most significant need include Antioch, Madison, and North Nashville. Some of these areas are going through gentrification which is pushing out LMI individuals. Nashville growth is driven by large companies like Oracle and Amazon which bring high wage, high skill positions, and have made the city and nearby suburbs unaffordable.

The contact discussed that small dollar lending is the largest need for LMI consumers in the area. Peer-to-Peer lending platforms have lighter criteria/not as strict. Additionally, these platforms are online meaning LMI consumers do not have to be coached on how to enter a bank and overcome that barrier. The contact stated that small business lending is lacking. Many LMI consumers do not know what is necessary to get a small business loan and do not have the financial statements, credit score, business plan etc. in place. The contact also noted that debt loads are too high for many, SBA qualifications are too high, and no funding from small business groups as the focus is placed on attracting outside corporations. Additionally, the contact believes banks need to help educate LMI consumers on small business borrowing as there are many groups which help with personal finance.

CONCLUSIONS WITH RESPECT TO PERFORMANCE TESTS IN THE NASHVILLE AA

LENDING TEST

Lending levels reflect adequate responsiveness to credit needs of the AA. The geographic distribution of loans reflects adequate penetration throughout the AA and the distribution of loans reflects good penetration among borrowers of different income levels and businesses of different revenue sizes. In addition, the bank made a relatively high level of CD loans in the Nashville AA.

The analysis included 8,389 HMDA-reportable loans and 2,934 small business loans reported by the bank in the AA during the review period. As such, HMDA-reportable lending received greater weight in determining conclusions. Additionally, during 2021, 2022, and 2023, the bank originated or purchased 2,850 home refinance loans, 2,476 home improvement loans, and 1,487 home purchase loans in the AA. Thus, when considering HMDA-reportable loan categories, greatest weight was assigned to home refinance loans given its relative share of the total HMDA-reportable lending in this AA, followed by home improvement loans and, to a lesser extent, home purchase loans.

Details of the bank's mortgage and small business lending and information regarding lending by peers can be found in *Appendix F*.

Lending Activity

Lending activity is considered adequate. Overall, 7.3 percent of HMDA-reportable loans and 5.3 percent of small business loans were made in the AA. The percentage of the bank's HMDA-reportable lending, which is the most heavily weighted product in the AA, is consistent with the percentage of its area deposits. The percentage of small business lending is below the percentage of its area deposits. In addition, the bank is an important contributor to HMDA-reportable lending in the area.

Geographic Distribution of Loans

The geographic distribution of loans reflects adequate penetration throughout the AA. As described in the following sections, overall performance for HMDA-reportable lending is adequate and small business lending performance is good. As previously stated, HMDA-reportable loans were the primary driver of conclusions, with home refinance and home improvement loans being the most heavily weighted HMDA-reportable product categories.

Home Refinance Loans

Home refinance lending in low-income tracts is adequate. In 2021, the bank made 2.5 percent of its home refinance loans in low-income tracts, which was below the percentage of owner-occupied units in these tracts (3.5 percent) and aggregate performance of 3.6 percent. In 2022 and 2023, the bank made 2.3 percent of its home

refinance loans in low-income tracts, which was similar to the percentage of owner-occupied units in these tracts (2.2 percent). In 2022, the bank's lending (2.1 percent) was similar to aggregate performance (2.7 percent) and in 2023, the bank's lending (2.7 percent) was similar to aggregate performance (2.8 percent).

Home refinance lending in moderate-income tracts is adequate. In 2021, the bank made 15.2 percent of its home refinance loans in moderate-income tracts, which was below the percentage of owner-occupied units in these tracts (18.3 percent) but above aggregate performance of 13.9 percent. In 2022 and 2023, the bank made 16.4 percent of its home refinance loans in moderate-income tracts, which was below the percentage of owner-occupied units in these tracts (18.5 percent). In 2022, the bank's lending (17.4 percent) was similar to aggregate performance (17.1 percent) and in 2023, the bank's lending declined to 15.0 percent, which was below aggregate performance (19.2 percent).

Home Improvement Loans

Home improvement lending in low-income tracts is poor. In 2021, the bank made 2.2 percent of its home improvement loans in low-income tracts, which was below the percentage of owner-occupied units in these tracts (3.5 percent) and similar to aggregate performance of 2.8 percent. In 2022 and 2023, the bank made 1.2 percent of its home improvement loans in low-income tracts, which was below the percentage of owner-occupied units in these tracts (2.2 percent). In 2022, the bank's lending (1.3 percent) was similar to aggregate performance (1.4 percent) and in 2023, the bank's lending (0.9 percent) was below aggregate performance (1.4 percent).

Home improvement lending in moderate-income tracts is good. In 2021, the bank made 15.3 percent of its home improvement loans in moderate-income tracts, which was below the percentage of owner-occupied units in these tracts (18.3 percent) but above aggregate performance of 11.5 percent. In 2022 and 2023, the bank made 14.5 percent of its home improvement loans in moderate-income tracts, which was below the percentage of owner-occupied units in these tracts (18.5 percent). In 2022, the bank's lending (12.2 percent) was similar to aggregate performance (12.0 percent) and in 2023, the bank's lending (19.2 percent) was above aggregate performance (13.8 percent).

Home Purchase Loans

Home purchase lending in low-income tracts is good. In 2021, the bank made 7.6 percent of its home purchase loans in low-income tracts, which was more than double the percentage of owner-occupied units in these tracts (3.5 percent) and above aggregate performance of 5.5 percent. In 2022 and 2023, the bank made 3.6 percent of its home purchase loans in low-income tracts, which was above the percentage of owner-occupied units in these tracts (2.2 percent). In 2022, the bank's lending (2.9 percent) was similar to aggregate performance (3.1 percent) and in 2023, the bank's lending (4.7 percent) was above aggregate performance (2.9 percent).

Home purchase lending in moderate-income tracts is poor. In 2021, the bank made 14.4 percent of its home purchase loans in moderate-income tracts, which was below the percentage of owner-occupied units in these tracts (18.3 percent) and below aggregate performance of 17.1 percent. In 2022 and 2023, the bank made 14.9 percent of its home purchase loans in moderate-income tracts, which was below the percentage of owner-occupied units in these tracts (18.5 percent). In 2022, the bank's lending (12.9 percent) was below aggregate performance (18.8 percent) and in 2023, the bank's lending (18.5 percent) was similar to aggregate performance (19.4 percent).

Small Business Loans

Small business lending in low-income tracts is good. In 2021, the bank made 7.3 percent of its small business loans in low-income tracts, which was similar to the percentage of total businesses located in these tracts (8.0 percent) and aggregate performance of 7.7 percent. In 2022 and 2023, the bank made 5.0 percent of its small business loans in low-income tracts, which was similar to the percentage of total businesses located in these tracts

(4.4 percent). In 2022, the bank's lending (4.9 percent) was above aggregate performance (3.6 percent) and in 2023, the bank's lending (5.1 percent) was above aggregate performance of 3.5 percent.

Small business lending in moderate-income tracts is good. In 2021, the bank made 19.2 percent of its small business loans in moderate-income tracts, which was below the percentage of total businesses located in these tracts (20.9 percent) and similar to aggregate performance of 19.1 percent. The bank's performance improved in 2022 and 2023, with the bank making 25.4 percent of its small business loans in moderate-income tracts, which was above the percentage of total businesses located in these tracts (22.3 percent). In 2022, the bank's lending (27.2 percent) was above aggregate performance (20.4 percent) and in 2023, the bank's lending (24.3 percent) was above aggregate performance of 20.4 percent.

No conspicuous lending gaps were identified based on an analysis of the dispersion of the loan products reviewed. The bank had activity in nearly all AA census tracts throughout the review period. Furthermore, lending data and maps did not indicate an absence of loans across LMI tracts.

Lending to Borrowers of Different Incomes and Businesses of Different Sizes

The distribution of borrowers reflects good penetration among customers of different incomes and businesses of different sizes. As described in the following sections, overall performance for HMDA-reportable lending is good while small business lending performance is adequate.

Home Refinance Loans

Home refinance lending to low-income borrowers is excellent. In 2021, the bank made 12.1 percent of its home refinance loans to low-income borrowers, which was below the percentage of low-income families (20.4 percent) but more than double aggregate performance of 5.6 percent. Bank performance improved in 2022 and 2023, with the bank making 17.8 percent of its home refinance loans to low-income borrowers, which was below the percentage of low-income families (20.2 percent). However, bank performance consistently exceeded aggregate performance. Specifically, in 2022, the bank's lending (18.3 percent) was above aggregate performance (11.8 percent) and in 2023, the bank's lending (17.2 percent) was above aggregate performance (10.4 percent).

Home refinance lending to moderate-income borrowers is good. In 2021, the bank made 21.8 percent of its home refinance loans to moderate-income borrowers, which was above the percentage of moderate-income families (17.5 percent) and aggregate performance of 15.8 percent. In 2022 and 2023, the bank made 26.7 percent of its home refinance loans to moderate-income borrowers, which was above the percentage of moderate-income families (17.6 percent). In 2022, the bank's lending (28.1 percent) was above aggregate performance (22.1 percent) and in 2023, the bank's lending (24.8 percent) was above aggregate performance (20.3 percent).

Home Improvement Loans

Home improvement lending to low-income borrowers is excellent. In 2021, the bank made 8.7 percent of its home improvement loans to low-income borrowers, which was below the percentage of low-income families (20.4 percent) but above aggregate performance of 5.0 percent. Bank performance improved in 2022 and 2023, with the bank making 10.3 percent of its home improvement loans to low-income borrowers, which was below the percentage of low-income families (20.2 percent). However, bank performance consistently exceeded aggregate performance. Specifically, in 2022, the bank's lending (10.1 percent) was above aggregate performance (6.2 percent) and in 2023, the bank's lending (10.5 percent) was above aggregate performance (6.1 percent).

Home improvement lending to moderate-income borrowers is good. In 2021, the bank made 16.6 percent of its home improvement loans to moderate-income borrowers, which was similar to the percentage of moderate-income families (17.5 percent) and above aggregate performance of 12.6 percent. In 2022 and 2023, the bank

made 20.3 percent of its home improvement loans to moderate-income borrowers, which was above the percentage of moderate-income families (17.6 percent). In 2022, the bank's lending (20.0 percent) was above aggregate performance (15.4 percent) and in 2023, the bank's lending (20.9 percent) was above aggregate performance (16.3 percent).

Home Purchase Loans

Home purchase lending to low-income borrowers is good. In 2021, the bank made 5.4 percent of its home purchase loans to low-income borrowers, which was below the percentage of low-income families (20.4 percent) but above aggregate performance of 3.9 percent. In 2022 and 2023, the bank made 5.2 percent of its home purchase loans to low-income borrowers, which was below the percentage of low-income families (20.2 percent). In 2022, the bank's lending (5.1 percent) was above aggregate performance (4.1 percent) and in 2023, the bank's lending (5.3 percent) was above aggregate performance (3.3 percent).

Home purchase lending to moderate-income borrowers is good. In 2021, the bank made 25.2 percent of its home purchase loans to moderate-income borrowers, which was above the percentage of moderate-income families (17.5 percent) and above aggregate performance of 17.6 percent. In 2022 and 2023, the bank made 20.2 percent of its home purchase loans to moderate-income borrowers, which was above the percentage of moderate-income families (17.6 percent). In 2022, the bank's lending (20.7 percent) was above aggregate performance (17.6 percent) and in 2023, the bank's lending (19.4 percent) was above aggregate performance (16.5 percent).

Small Business Loans

Small business lending to businesses of different sizes is adequate. In 2021, the bank made 76.5 percent of its small business loans to businesses with revenues of $1 million or less, which was below the percentage of total businesses with revenues of $1 million or less (91.7 percent). The bank's performance is above aggregate performance of 48.5 percent in 2021. However, 2021 was a year in which many banks extended PPP loans as a result of the COVID-19 pandemic and were not required to capture and report the revenue of the businesses, which is reflected in the aggregate data. As a result, performance context and loan size data were considered. In 2021, the bank made loans of less than $250,000 to businesses at a similar rate (94.2 percent) as aggregate lenders (95.3 percent). In 2022 and 2023, the bank made 49.0 percent of its small business loans to businesses with revenues of $1 million or less, which was below the percentage of total businesses with revenues of $1 million or less (91.5 percent). In 2022, bank lending (50.8 percent) was similar to aggregate performance (51.5 percent) and in 2023, the bank's lending (47.7 percent) was below aggregate performance (53.7 percent). Moreover, the majority of the bank's small business loans were originated in amounts of $250,000 or less, indicating a willingness to lend in the smaller amounts that are typically requested by small businesses.

CD Lending

The bank makes a relatively high level of CD loans in the Nashville AA. During the review period, the bank originated or renewed 18 qualified CD loans totaling $161.1 million in the AA. Specifically, the bank provided $144.5 million for affordable housing for LMI individuals; $11.4 million to support economic development by financing small businesses and $5.3 million for community services that benefit LMI individuals.

Bank performance was relatively high when considering performance context, especially addressing the need for affordable housing as pointed out by the community contact. In addition to the responsive loans made within the AA listed below, the bank also originated or renewed several loans to organizations operating in Nashville that serve multiple areas throughout Tennessee. These loans had a positive impact on performance in this AA, but as described previously, were credited to the state of Tennessee. Nearly all the loans were deemed impactful and/or responsive to AA needs.

- Five loans totaling $85 million for construction of apartments in the AA using LIHTCs, which are complex. The projects were designed to create 440 new units of affordable housing for LMI individuals and/or families. These loans are responsive given the affordable housing challenges and the need for additional affordable housing units in the AA, as noted by community contacts.

- Two loans totaling $36 million for the creation of 42 new units of affordable housing for LMI senior citizens.

- One loan totaling $19.2 million to a local housing nonprofit. The loan was necessary after renovations to allow time for the nonprofit to secure permanent financing that ensures continued affordability for renters. Once finalized, permanent financing will include multiple sources to ensure affordability to LMI residents, including NMTCs.

- Four new SBA 504 loans totaling $9.5 million that provide financing to small businesses.

- One LOC totaling $5 million to a nonprofit fund to preserve existing affordable housing and accelerate production of new affordable housing in the AA.

- One LOC totaling $300,000 to a nonprofit offering essential services, including housing, basic life skills, and workforce development, to formerly incarcerated individuals. The LOC was impactful because it provides access to capital to a small nonprofit that is providing an important service in Nashville.

INVESTMENT TEST

The bank made an excellent level of qualified CD investments and grants in the Nashville AA, totaling $214.9 million. This amount included nine current period investments totaling $118.1 million, 25 prior period investments still outstanding with a balance of $94.4 million, and 167 donations totaling $2.4 million.

Investment types varied and addressed a range of CD needs. These include deposits and equity investments in CDFIs, SBIC funds to address small business financing needs, LIHTC projects to address affordable housing challenges, and MBS supporting LMI borrowers. The bank made extensive use of innovative and/or complex investments to support CD initiatives. Additionally, the bank exhibits excellent responsiveness to CD needs.

Examples of noteworthy investments and grants provided during the review period that are responsive to CD and credit needs include:

- Three current-period LIHTC projects totaling $110.5 million. These three LIHTC investments helped to build 720 new units of affordable housing for LMI individuals and families, which was responsive to the need for affordable housing in the AA as pointed out by the community contact.

- A $250,000 current period deposit with a CDFI that primarily serves LMI individuals and communities in the Nashville area.

- Five current period SBIC allocations totaling $7.4 million to finance small businesses in the Nashville AA.

- Eight contributions totaling $60,000 to support a nonprofit affordable housing developer in the AA.

- Seven contributions totaling $206,000 to support scholarships at a local college which primarily educates students from LMI families.

- Six contributions totaling $120,500 to a local organization that provides shelter and support services for LMI women.

- Four contributions totaling $63,000 to support a microenterprise development program and small business incubator.

- Six contributions totaling $180,100 to support an organization dedicated to revitalizing and stabilizing targeted LMI neighborhoods in the Nashville AA.

The Nashville AA also positively benefited from $4.4 million in donations benefiting a BSRA that includes the entire state of Tennessee. These donations were previously described under the *Investment Test* heading for the state of Tennessee.

SERVICE TEST

Retail banking services are adequate in Nashville. Additionally, the bank provides a relatively high level of CD services in its AA.

Retail Banking Services

Service delivery systems are reasonably accessible to the bank's geographies and individuals of different income levels throughout the Nashville AA. In deriving this conclusion, the distribution of the bank's branches by census tract income level was compared to the distribution of households and businesses among the tract categories in the AA. As the following tables show, the bank operated branches and ATMs in all census tract categories throughout the review period, with 3.1 percent of branches in low-income tracts and 26.6 percent of branches in moderate-income tracts in 2023. The percentage of branches in low-income tracts was less than the percentage of households (4.8 percent) and the percentage of businesses (4.4 percent) in those tracts. The percentage of branches in moderate-income tracts exceeded the percentage of households (23.4 percent) and the percentage of businesses (22.3 percent) in those tracts

The bank closed three branches during the review period and opened two branches. All of the branch closures were in middle-income tracts. The bank opened one branch in a moderate-income tract and a second branch in a middle-income tract. Overall, the branch openings and closings have not adversely affected the accessibility of the bank's delivery systems.

Hours of operation vary slightly across branches. In general, branch lobby hours are 9 a.m. to 4 p.m., with longer hours at a number of branches that either open at 8:30 a.m. or stay open until 4:30 p.m. or 5 p.m. Monday to Thursday. Most branches are open until 5 p.m. on Friday. Drive-through hours are typically the same as the branch lobby hours. The bank also offers Saturday lobby hours from 9:00 a.m. to noon at slightly less than half of the branches in the AA, including branches in LMI tracts. The bank offers the same suite of products and services throughout the AA. Thus, hours and services do not vary in a way that inconveniences the AA, particularly LMI geographies and LMI individuals.

The tables below show the distribution of branches and ATMs along with households and businesses by tract category.

CD Services

The bank provides a relatively high level of CD services in the AA. During the review period, bank employees provided 699 CD service activities totaling 3,290 hours to 86 organizations operating throughout the AA. Bank staff provided their financial expertise in a variety of ways, including financial literacy and homebuyer education, service on board of directors and other committees, and other technical assistance and advisory services.

Noteworthy and responsive CD services in the Nashville AA include:

- Bank staff provided over 1,200 hours of board service for approximately 35 different nonprofit organizations.

- Bank staff conducted over 1,000 hours of homebuyer counseling and financial education for youth and adults in partnership with 41 organizations throughout the review period.

- Bank staff volunteered approximately 330 hours for the Volunteer Income Tax assistance (VITA) program that provides free tax preparation services for LMI individuals.

- Senior executives that oversee bank teams that specialize in balance sheet, liquidity, and stress testing provided 12 hours of technical assistance to a minority depository institution/CDFI to help build capacity in targeted areas.

- Several bank associates, including a human resources manager and branch manager participated in a workforce development program providing training for individuals interested in careers in banking and whose first language is not English.

The Nashville AA also positively benefited from 88 hours of CD service benefiting the BSRA that includes the entire state of Tennessee. These services were previously described under the CD services write up for the state of Tennessee.

METROPOLITAN AREAS
LIMITED-SCOPE REVIEW

The following MSA AAs were reviewed using limited-scope examination procedures. Through these procedures, conclusions regarding the institution's CRA performance are drawn from the review of available facts and data, including performance and demographic information. Please refer to the tables in *Appendices G and H* for additional information regarding these AAs.

DESCRIPTION OF INSTITUTION'S OPERATIONS IN TENNESSEE MSA AAs

MSA AA	AA Delineation/Counties	# Branches *(as of 12/31/2023)*	Deposits ($000s) *(as of June 30, 2023)*
Clarksville	Montgomery & Stewart	5	$466,929
Cleveland	Bradley	4	$313,014
Jackson*	Gibson & Madison	9	$732,097
Johnson City	Carter & Washington	5	$275,587
Kingsport	Sullivan	4	$363,929
Knoxville	Anderson, Blount, Knox, Loudon, & Roane	25	$2,727,977
Morristown	Hamblen & Jefferson	2	$276,737

*AA was modified during review period as follows: Chester & Crockett counties removed May 2021.

CONCLUSIONS WITH RESPECT TO PERFORMANCE TESTS

The following table compares conclusions regarding performance in each limited-scope MSA AA to overall performance for the state of Tennessee.

Performance in the Limited-Scope Review Metropolitan Assessment Areas			
MSA AA	**Lending Test**	**Investment Test**	**Service Test**
Clarksville	Consistent	Consistent	Not Consistent (Below)
Cleveland	Consistent	Consistent	Consistent
Jackson	Not Consistent (Below)	Not Consistent (Below)	Not Consistent (Below)
Johnson City	Consistent	Consistent	Not Consistent (Below)
Kingsport	Not Consistent (Below)	Not Consistent (Below)	Consistent
Knoxville	Not Consistent (Below)	Consistent	Not Consistent (Below)
Morristown	Consistent	Consistent	Not Consistent (Below)

The key performance standards of the Lending Test for limited-scope areas included geographic distribution, borrower distribution, and CD loans. For the geographic distribution of loans, performance was poor in Morristown and adequate in the remaining AAs. Borrower distribution was adequate in Cleveland, Johnson City, and Knoxville and good in the remaining AAs. Qualifying amounts and conclusions for CD loans were as follows: $15.1 million in Clarksville (excellent); $10.7 million in Cleveland (excellent); $7.7 million in Johnson City (relatively high); $19.8 million in Knoxville (adequate); and $24.9 million in Morristown (excellent). While the bank made no qualifying CD loans within the Jackson AA, the AA benefits from three LOCs totaling

$5 million to a foodbank serving a BSRA that includes the Jackson AA as previously described in the *CD Lending* section for the state of Tennessee. The bank made no qualifying CD loans in the Kingsport AA.

Qualifying amounts and conclusions for the bank's investment and grant activity in limited-scope MSA areas were as follows: $16.9 million in Clarksville (excellent level), $13.9 million in Cleveland (excellent level), $7.9 million in Jackson (adequate level), $11.9 million in Johnson City (excellent level), $1.3 million in Kingsport (few, if any), $63.3 million in Knoxville (excellent level), and $13.7 million in Morristown (excellent level).

The performance standards of the Service Test for limited-scope MSA areas included retail banking and CD services. Conclusions for retail banking services were as follows: good in Clarksville, Cleveland, Johnson City, Kingsport; adequate in Jackson, Knoxville, and Morristown. Qualifying hours and conclusions for CD services were as follows: 92 hours in Clarksville (poor level); 155 hours in Cleveland (adequate level); 392 hours in Jackson (adequate level); 68 hours in Johnson City (poor level); 107 hours in Kingsport (adequate level); 1,472 hours in Knoxville (relatively high level); 73 hours in Morristown (adequate level). All MSA AAs reviewed under limited-scope procedures also positively benefited from 83 hours of CD service benefiting the BSRA that includes the entire state of Tennessee. These services were previously described under the CD services write up for the state of Tennessee.

Performance in the MSA limited-scope AAs did not impact overall performance for the state.

NONMETROPOLITAN STATEWIDE AREAS
LIMITED-SCOPE REVIEW

The following non-MSA AAs were reviewed using limited-scope examination procedures. Through these procedures, conclusions regarding the institution's CRA performance are drawn from the review of available facts and data, including performance and demographic information. Please refer to the tables in *Appendices G and H* for additional information regarding these AAs.

DESCRIPTION OF INSTITUTION'S OPERATIONS IN TENNESSEE NON-MSA AAs

Non-MSA AA	AA Delineation/Counties	# Branches *(as of 12/31/2023)*	Deposits ($000s) *(as of June 30, 2023)*
Eastern TN	Cumberland, McMinn, Meigs, Monroe, & Rhea	6	$560,035
Middle TN	Bedford, Coffee, Dekalb, Franklin, Lewis, Lincoln, Putnam, & Warren	11	$927,945
Western TN*	Carroll, Dyer, Hardeman, Haywood, Henderson, Henry, Houston, Humphreys, Lake, Lauderdale, McNairy, Obion, & Weakley	13	$666,149

*AA was modified during review period as follows: Benton County removed May 2021.

CONCLUSIONS WITH RESPECT TO PERFORMANCE TESTS

The following table compares conclusions regarding performance in each limited-scope non-MSA AA to overall performance for the state of Tennessee.

Performance in the Limited-Scope Review Non-MSA Assessment Areas			
Non-MSA AA	**Lending Test**	**Investment Test**	**Service Test**
Eastern TN	Not Consistent (Below)	Not Consistent (Below)	Not Consistent (Below)
Middle TN	Not Consistent (Below)	Consistent	Not Consistent (Below)
Western TN	Not Consistent (Below)	Not Consistent (Below)	Not Consistent (Below)

The key performance standards of the Lending Test for limited-scope areas included geographic distribution, borrower distribution, and CD loans. For the geographic distribution of loans, performance was poor in Western Tennessee and adequate in the remaining AAs. Borrower distribution was good in Middle Tennessee and adequate in the remaining AAs. The bank made no qualifying CD loans within these three AAs. However, the Middle Tennessee and Western Tennessee AAs benefit from statewide loans serving a BSRA that includes the AAs as previously described in the *CD Lending* section for the state of Tennessee.

Qualifying amounts and conclusions for the bank's investment and grant activity in limited-scope non-MSA areas were as follows: $2.5 million in Eastern Tennessee (poor level), $24.8 million in Middle Tennessee (excellent level), and $3.7 million in Western Tennessee (poor level).

The performance standards of the Service Test for limited-scope non-MSA areas included retail banking and CD services. Conclusions for retail banking services were as follows: good in Eastern TN and adequate in Middle TN and Western TN. Qualifying hours and conclusions for CD services were as follows 87 hours in Eastern TN (poor level); 122 hours in Middle TN (poor level); and 266 hours in Western TN (adequate level). All non-MSA

AAs reviewed under limited-scope procedures also positively benefited from 83 hours of CD service benefiting the BSRA that includes the entire state of Tennessee. These services were previously described under the community development services write up for the state of Tennessee.

Performance in the non-MSA limited-scope AAs did not impact overall performance for the state.

GEORGIA

CRA RATING FOR GEORGIA: **SATISFACTORY**
The Lending Test is rated: **Low Satisfactory**
The Investment Test is rated: **Outstanding**
The Service Test is rated: **Low Satisfactory**

Major factors contributing to this rating include:

- The geographic distribution of loans reflects adequate penetration throughout Georgia AAs.
- The distribution of borrowers reflects adequate penetration throughout Georgia AAs.
- The bank made a relatively high level of CD loans in Georgia.
- The bank made an excellent level of qualified CD investments and grants in Georgia.
- Retail banking services, which includes accessibility of delivery systems, changes in branch locations, and reasonableness of hours and services, are adequate.
- The bank provides an adequate level of CD service activities in Georgia.

SCOPE OF EXAMINATION

A full-scope review was conducted for the following AA in Georgia:

- Atlanta

Limited-scope reviews were conducted for the remaining 12 assessment areas:

- Albany
- Athens
- Dalton
- Elbert-Wilkes
- Gainesville
- Jefferson-Jenkins
- Northeast Georgia
- Northwest Georgia
- Rome
- Savannah
- Southwest Georgia
- Valdosta

The time period, products, and affiliates evaluated for these AAs are consistent with the scope discussed in the institution section of this report.

DESCRIPTION OF INSTITUTION'S OPERATIONS IN GEORGIA

As of June 30, 2023, Regions Bank had $8.9 billion in deposits in Georgia accounting for 6.9 percent of its total deposits. Regions Bank operated 108 branch offices in Georgia as of December 31, 2023, representing 8.5 percent of its total branches. HMDA-reportable lending in Georgia accounted for 8.8 percent of total institutional HMDA-reportable lending by number of loans and 11.3 percent by dollar volume. Small business lending in Georgia accounted for 8.2 percent of the bank's total small business lending by number of loans and 8.0 percent by dollar volume. Overall, the bank's HMDA-reportable and small business lending activity in the state was greater than the percentage of total institutional deposits.

The following table shows lending activity from January 1, 2021 through December 31, 2023.

Statewide Summary of Lending Activity
Assessment Areas Located in: Georgia
2021-2023

Loan Type	#	%	$(000s)	%
HMDA Home Purchase	3,586	24.3%	1,551,548	46.0%
HMDA Refinance	3,299	22.3%	756,588	22.4%
HMDA Home Improvement	2,439	16.5%	208,867	6.2%

Originations & Purchases

CONCLUSIONS WITH RESPECT TO PERFORMANCE TESTS IN GEORGIA

LENDING TEST

Overview

The Lending Test rating for the state of Georgia is Low Satisfactory. The rating is a result of performance in each characteristic of the Lending Test applicable to the state, including Lending Activity (good); Geographic Distribution (adequate); Borrower Distribution (adequate); and CD Lending (relatively high level). Highlights of each characteristic are found in the sections that follow, with additional descriptions and details within the full-scope AA of the state.

Lending Activity

Lending levels reflect good responsiveness to the credit needs of Georgia AAs. The total number and dollar volume of HMDA-reportable and small business loans was considered in Lending Activity conclusions, as well

as competitive factors and the bank's overall importance to each AA. Statewide conclusions are derived from conclusions within each AA as detailed in the *Lending Activity* section of the Atlanta AA.

Geographic and Borrower Distribution

The geographic distribution of HMDA-reportable and small business loans reflects adequate dispersion throughout the AAs in Georgia and the distribution of borrowers by income and revenue size of businesses is adequate. The analyses of HMDA-reportable and small business lending within the full-scope AA in Georgia are discussed in detail later in this report.

CD Lending

The bank has made a relatively high level of CD loans in Georgia. During the review period, the bank originated or renewed $227.6 million in qualified CD loans directly benefiting Georgia AAs. In addition, the bank received consideration at the state level for one CD loan totaling $1 million to a nonprofit health clinic for LMI patients that serves the Atlanta, Dalton, Northwest Georgia, and Rome AAs. More information on CD loans can be found in the Atlanta full-scope section of this report.

The bank is a leader in making CD loans in the Atlanta full-scope AA; however, performance across all 12 limited-scope AAs was noticeably weaker, with one of those areas considered poor and ten of those areas considered very poor. Additionally, the bank has notable market share in several of the limited-scope AAs. As such, weaker performance in limited-scope areas was considered in the assessment of the bank's overall CD lending performance for the state of Georgia.

Despite weaker performance in several limited-scope AAs in Georgia, the bank was considered responsive to the CD needs of its AAs in the state. Therefore, the bank also received consideration for $34 million in qualified CD loans within the state but that did not benefit the bank's AAs, including a $11.6 million loan to create 50 new units of affordable housing using LIHTCs.

INVESTMENT TEST

The Investment Test rating for Georgia is Outstanding. The bank made an excellent level of qualified CD investments and grants in Georgia, with $168.6 million in qualified investments and $2.8 million in qualified contributions directly benefiting its Georgia AAs. In addition, the bank received consideration at the state level for $61,500 in qualifying statewide contributions. One contribution of $50,000 supported a statewide CDFI that provides non-traditional financing and technical assistance to small businesses. Another contribution of $11,500 supported a medical debt relief program for LMI people.

The bank made an excellent level of qualified investments and contributions in the Atlanta full-scope AA. Additional details regarding specific investments and contributions can be found in the full-scope AA section of this report.

The bank was responsive to the needs of its AAs in the state of Georgia. Therefore, the bank also received consideration for $40.3 million in qualified investments within the state that benefited geographies outside of the bank's AAs. This amount included 11 LIHTCs totaling $35.2 million, one SBIC allocation of $5 million, and a $125,000 state tax credit investment to fund a hospital in a rural, low-income area. The bank also received consideration for $6,000 in donations to an organization that provides education and job training programs for LMI adults.

SERVICE TEST

The Service Test rating for Georgia is Low Satisfactory.

Retail Services

Delivery systems are reasonably accessible to the bank's geographies and individuals of different income levels in Georgia. As of December 31, 2023, Regions operated 108 branches in the state, including six branches in low-income tracts and 25 branches in moderate-income tracts, representing 28.7 percent of total statewide branches.

A full array of personal and business banking products and services is offered at all locations in Georgia AAs. Across the state, branch hours do not vary in a way that inconveniences individual AAs. Nearly all branches in the state offer lobby hours and drive-through hours beginning at 9 a.m. and closing at 5 p.m. Monday-Friday. Regions offered branch lobby hours on Saturday from 9 a.m. to 12 p.m. at approximately half of the branches in the state. Delivery systems include full-service ATMs at all branches in the state. In addition to those ATMs, the bank compliments its traditional service delivery methods with alternative delivery systems that provide increased access to banking services, as previously discussed in the *Institution, Retail Banking Services* section of this report.

During the review period, the bank closed three branches, including one branch in a moderate-income tract. The bank did not open any branches. Changes to the bank's branch network in Georgia did not adversely affect the accessibility of delivery systems, particularly to LMI geographies or LMI individuals.

Additional details on the bank's retail services can be found in the full-scope AA sections of this report.

CD Services

Regions provides an adequate level of CD services in Georgia. During the review period, employees engaged in 3,048 hours of qualifying CD service activities in the state. This total includes 3,044 hours directly benefiting individual AAs in Georgia and four hours benefiting a BSRA that includes all of the bank's AAs in state. The hours that benefit the BSRA include board of directors' representation for statewide organization focused on financial education and a statewide economic development organization.

Additional details of service hours in Georgia are described later in the report in the sections for the individual AAs they benefit.

METROPOLITAN AREA – ATLANTA MSA
(Full-Scope Review)

DESCRIPTION OF INSTITUTION'S OPERATIONS IN THE ATLANTA AA

Overview

The Atlanta AA consists of the following 24 counties in the Atlanta-Sandy Springs-Alpharetta, GA MSA: Barrow, Bartow, Carroll, Cherokee, Clayton, Cobb, Coweta, Dawson, Dekalb, Douglas, Fayette, Forsyth, Fulton, Gwinnett, Haralson, Heard, Henry, Morgan, Newton, Paulding, Pickens, Rockdale, Spalding, and Walton. As of December 31, 2023, the bank operated 72 branches in the AA, representing 66.7 percent of its branches in the state of Georgia and 5.7 percent of its total branches. Of the branches in the AA, three are in low-income tracts, 16 are in moderate-income tracts, 22 are in middle-income tracts, 30 are in upper-income tracts, and one is in an unknown income tract. As a percentage within the state of Georgia, 65.3 percent of deposit dollar volume and 68.2 percent of HMDA-reportable and small business loans by number are in the Atlanta AA. As described, the Atlanta AA is the bank's primary AA in the state of Georgia.

The Atlanta banking market is highly competitive, with a significant presence of national and multi-regional banks. There are 78 financial institutions operating 1,044 branch locations within the Atlanta AA. Regions ranked 7th in total deposits, holding 2.5 percent deposit market share with approximately $5.8 billion in total deposits. Truist Bank holds the largest deposit market share in the Atlanta AA, followed by Bank of America and Wells Fargo Bank.

For HMDA-reportable lending, Regions originated or purchased 0.8 percent, 1.06 percent, and 0.96 percent of total HMDA-reportable loans in the AA in 2021, 2022, and 2023, respectively. Regions was ranked 27th out of 969 reporters in 2021; 22nd out of 963 reporters in 2022; and 23rd out of 908 reporters in 2023. Given the highly competitive nature of lending in this AA, Regions' ranking indicates that it is an important contributor for HMDA-reportable lending in the Atlanta AA. Rocket Mortgage (formally known as Quicken Loans) was the top HMDA reporter in the market for 2021, 2022, and 2023.

For small business lending, Regions ranked 18th out of 313 reporters in 2021 with 0.87 percent of small business loans. In 2022, the bank ranked 33rd out of 259 reporters with 0.14 percent of small business loans. In 2023, Regions ranked 22nd out of 245 reporters with 0.28 percent of small business loans. Given the highly competitive nature of lending in this AA, Regions' ranking indicates it is an important contributor for small business lending in the Atlanta AA. American Express was the top CRA reporter in the market for 2021, 2022, and 2023.

AA Demographics, Population, and Income Characteristics

The Atlanta AA had a population of 6.0 million as of the 2020 Census, having grown over 10.1 percent since 2015. Even more recently, the Atlanta MSA was ranked the 6th largest MSA in the U.S with a population over 6.3 million as of 2023.[31] The most populous county with 1.1 million people is Fulton County, which is home to the city of Atlanta. The other large population centers are in neighboring Gwinnett, Cobb, and DeKalb counties, with a combined population of approximately 2.5 million people. Forsyth County experienced the largest population growth between 2015 and 2020 with 28.1 percent, followed by Dawson County with 18.2 percent, and Cherokee County with 18.0 percent. This data indicates that population growth during the review period for the AA occurred primarily in suburbs of Atlanta.

[31] "Population of the Largest Metropolitan Areas in the United States in 2023". *Statista*, www.statista.com/statistics/183600/population-of-metropolitan-areas-in-the-us/. Access 6 December 2024.

The Atlanta AA contains 1,474 census tracts: 116 low-income census tracts (7.9 percent), 354 moderate-income census tracts (24.0 percent), 462 middle-income census tracts (31.3 percent), 489 upper-income census tracts (33.2 percent), and 53 tracts with unknown income levels (3.6 percent).

For purposes of classifying borrower income, this evaluation uses the FFIEC estimated median family income for the relevant area. As the following table shows, the median family income increased from $85,700 in 2021 to $102,900 in 2023.

Borrower Income Levels
Atlanta-Sandy Springs-Alpharetta, GA MSA

FFIEC Estimated Median Family Income		Low	Moderate	Middle	Upper
		0 - 49.99%	50% - 79.99%	80% - 119.99%	120% - & above
2021	**$85,700**	0 - $42,849	$42,850 - $68,559	$68,560 - $102,839	$102,840 - & above
2022	**$95,700**	0 - $47,849	$47,850 - $76,559	$76,560 - $114,839	$114,840 - & above
2023	**$102,900**	0 - $51,449	$51,450 - $82,319	$82,320 - $123,479	$123,480 - & above

There are 1,420,403 families in the AA, of which 21.8 percent are low-income, 17.1 percent are moderate-income, 19.6 percent are middle-income, and 41.5 percent are upper-income. Of the total families, 8.3 percent had incomes below the poverty level. The largest percentage of those families below the poverty level live in moderate-income tracts (36.4 percent) and middle-income tracts (29.1 percent). Moreover, low-income families reside primarily in moderate-income tracts and moderate-income families reside primarily in middle-income tracts. The data indicates that lending challenges and opportunities exist for families residing in moderate- and middle-income tracts.

Housing Characteristics

There are approximately 2.3 million housing units in the AA, of which 59.2 percent are owner-occupied, 33.2 percent are rental units, and 7.5 percent are vacant. As described, housing units in the AA are predominately owner-occupied, which indicates a variety of home lending opportunities available. However, fewer home lending opportunities exist in low-income tracts where only 24.9 percent of housing units are owner-occupied and 61.7 percent of units are rentals.

The median age of the housing stock in the AA was 37 years, which is older than that of homes in Georgia (31 years). Housing units in the LMI census tracts were even older, with the median age of housing stock at 47 years for low-income tracts and 39 years for moderate-income tracts. The older age of homes is an indicator of potential opportunity for home improvement loans in LMI tracts.

The median housing value in the AA was $235,609, which is higher than the median housing value in Georgia ($190,200). Forsyth County had the highest median housing value at $362,300 and Heard County had the lowest median housing value at $114,500. Moreover, median gross rent in the AA ($1,209 per month) is higher than the median statewide gross rent in Georgia ($1,042 per month). As with median housing values, Forsyth County had the highest median gross rent at $1,432 per month. Additionally, the affordability ratio of the AA (30.2 percent) is lower than the affordability ratio of Georgia (32.2 percent). Affordability varied throughout the AA, with Fulton County having the lowest affordability ratio at 22.3 percent and Heard County having the highest affordability ratio at 44.2 percent. Families that are housing cost-burdened are defined as renters or homeowners

paying 30.0 percent or more of household income toward housing cost. Within the AA, the percentage of renters with rent costs greater than 30 percent of income (47.0 percent) is higher than the state of Georgia at 45.3 percent. More specifically, renters are most cost burdened in Newton, DeKalb, and Gwinnett counties.

Overall, the data suggests that housing is expensive in the AA relative to the state of Georgia and is not affordable, particularly in Fulton, DeKalb, Gwinnett, and Cobb counties where affordability is lower, and the percentage of cost burdened families is higher compared to the overall AA and the state of Georgia.

Economic Conditions

The AA includes the city of Atlanta, which is the state capital and largest city in the state of Georgia. Atlanta has access to three major interstate highways (I-75, I-85, and I-20) and is the home to the busiest airport in the world (Hartsfield-Jackson International Airport), making it a major transportation and logistics hub.[32] There are 17 Fortune 500 companies headquartered in Atlanta, including The Home Depot, UPS, Delta Air Lines, and Coca-Cola.[33] The latest addition to is Assurant, a global insurance provider, which relocated its headquarters from New York to Cobb County at the end of 2022.[34] The largest employers in metro Atlanta include Delta Air Lines, Emory University, Piedmont Healthcare, Northside Hospital, Publix Super Markets, and The Home Depot.[35] According to the Bureau of Labor Statistics during the third quarter of 2023, the largest industries in the AA by number of employees on nonfarm payrolls include trade, transportation, and utilities (650.9 thousand), professional and business services (584.5 thousand), and education and health services (411.2 thousand).[36]

The following tables show the unemployment rate percentages for the bank's Atlanta AA and the state of Georgia. As shown, unemployment rates in the AA were similar to unemployment rates for the state of Georgia. The AA unemployment rate improved from 3.9 percent in 2021 to 3.1 percent in 2023 while the state's unemployment rate similarly dropped from 3.9 percent in 2021 to 3.2 percent in 2023. Forsyth and Cherokee County had the lowest unemployment rate in the AA during the review period, while Clayton County had the highest unemployment rate in the AA during the review period.

Credit and CD Needs

As part of the CRA examination, information from three recently conducted interviews with contacts engaged in Atlanta-area affordable housing, LMI services, and CD were referenced. According to an affordable housing community contact, the AA has a robust employment market with ample job opportunities available. However, home prices have skyrocketed and there is a major shortage of affordable housing. The majority of new residential construction is focused on the high-end market segment, with median home prices in the $500,000 range. Given prevailing market conditions, it remains challenging for LMI individuals to purchase homes.

A contact employed by a local CD fund mentioned that gentrification has led to the displacement of LMI individuals to the suburbs. While there are programs available to help offset housing costs, many LMI residents still struggle to afford the expenses associated with relocating to the suburban areas. Also, according to the contact, there is a need for additional assistance for start-up businesses in the area, especially those that have been in business for less than two years. Furthermore, according to a community contact at a local nonprofit, there are opportunities for financial institutions to offer increased financial assistance and foster greater engagement with nonprofit organizations that are in need of funding.

Based on conversations with these community contacts, numerous opportunities are available in the AA for financial institutions. Opportunities described include engaging with nonprofit organizations, small businesses, developers, and others in a wide range of CD activities, including affordable housing development, financial education, and assistance to nonprofit organizations.

CONCLUSIONS WITH RESPECT TO PERFORMANCE TESTS IN THE ATLANTA AA

LENDING TEST

Lending levels reflect good responsiveness to credit needs of the AA. The geographic distribution of loans reflects adequate penetration throughout the AA, and the distribution of loans reflects adequate penetration

among borrowers of different income levels and businesses of different revenue sizes. In addition, the bank is a leader in making CD loans in the Atlanta AA.

The analysis included 6,911 HMDA-reportable loans and 3,112 small business loans reported by the bank in the AA during the review period. Therefore, HMDA-reportable lending received greater weight in determining conclusions. Additionally, during 2021, 2022, and 2023, the bank originated or purchased 2,578 home purchase loans, 1,920 home refinance loans, and 1,587 home improvement loans in the AA. Thus, when considering HMDA-reportable loan categories, greatest weight was assigned to home purchase loans given its relative share of the total HMDA-reportable lending in this AA, followed by home refinance loans and home improvement loans.

Details of the bank's mortgage and small business lending and information regarding lending by peers can be found in *Appendix F.*

Lending Activity

Lending activity is considered good. Overall, 9.0 percent of HMDA-reportable loans and 5.8 percent of small business loans were made in the AA. The percentage of the bank's HMDA-reportable and small business lending exceeds the percentage of its area deposits.

Geographic Distribution of Loans

The geographic distribution of loans reflects adequate penetration throughout the AA. As described in the following sections, overall performance for HMDA-reportable lending is adequate and small business lending performance is also adequate.

Home Purchase Loans

Home purchase lending in low-income tracts is adequate. In 2021, the bank made 4.3 percent of its home purchase loans in low-income tracts, which was above the percentage of owner-occupied units in these tracts (3.3 percent) and similar to aggregate performance of 3.8 percent. In 2022 and 2023, the bank made 4.4 percent of its home purchase loans in low-income tracts, which was above the percentage of owner-occupied units in these tracts (3.0 percent). In 2022, the bank's lending (4.1 percent) was similar to aggregate performance (3.8 percent) and in 2023, the bank's lending (4.7 percent) was similar to aggregate performance (4.2 percent).

Home purchase lending in moderate-income tracts is adequate. In 2021, the bank made 17.3 percent of its home purchase loans in moderate-income tracts, which was below the percentage of owner-occupied units in these tracts (19.9 percent) and aggregate performance of 20.1 percent. Bank performance improved in 2022 and 2023, with the bank making 23.1 percent of its home purchase loans in moderate-income tracts, which was above the percentage of owner-occupied units in these tracts (19.7 percent). In 2022, the bank's lending (22.9 percent) was above aggregate performance (20.6 percent) and in 2023, the bank's lending (23.3 percent) was similar to aggregate performance (23.0 percent).

Home Refinance Loans

Home refinance lending in low-income tracts is poor. In 2021, the bank made 1.7 percent of its home refinance loans in low-income tracts, which was below the percentage of owner-occupied units in these tracts (3.3 percent) and below aggregate performance of 2.3 percent. In 2022 and 2023, the bank made 1.0 percent of its home refinance loans in low-income tracts, which was below the percentage of owner-occupied units in these tracts (3.0 percent). In 2022, the bank's lending (1.6 percent) was below aggregate performance (3.2 percent) and in 2023, the bank made no home refinance loans in low-income tracts despite aggregate performance of 3.8 percent.

Home refinance lending in moderate-income tracts is poor. In 2021, the bank made 12.9 percent of its home refinance loans in moderate-income tracts, which was below the percentage of owner-occupied units in these tracts (19.9 percent) and aggregate performance of 15.3 percent. In 2022 and 2023, the bank made 14.7 percent of its home refinance loans in moderate-income tracts, which was below the percentage of owner-occupied units in these tracts (19.7 percent). In 2022, the bank's lending (15.0 percent) was below aggregate performance (20.9 percent) and in 2023, the bank's lending (14.4 percent) was also below aggregate performance (23.5 percent).

Home Improvement Loans

Home improvement lending in low-income tracts is poor. In 2021, the bank made 1.8 percent of its home improvement loans in low-income tracts, which was below the percentage of owner-occupied units in these tracts (3.3 percent) but similar to aggregate performance of 2.2 percent. In 2022 and 2023, the bank made 0.8 percent of its home improvement loans in low-income tracts, which was below the percentage of owner-occupied units in these tracts (3.0 percent). In 2022, the bank's lending (0.7 percent) was below aggregate performance (1.6 percent) and in 2023, the bank's lending (1.0 percent) was below aggregate performance (2.2 percent).

Home improvement lending in moderate-income tracts is adequate. In 2021, the bank made 12.0 percent of its home improvement loans in moderate-income tracts, which was below the percentage of owner-occupied units in these tracts (19.9 percent) but similar to aggregate performance of 12.1 percent. In 2022 and 2023, the bank made 11.8 percent of its home improvement loans in moderate-income tracts, which was below the percentage of owner-occupied units in these tracts (19.7 percent). In 2022, the bank's lending (11.1 percent) was below aggregate performance (12.4 percent) and in 2023, the bank's lending (13.0 percent) was similar to aggregate performance (14.0 percent).

Small Business Loans

Small business lending in low-income tracts is adequate. In 2021, the bank made 5.0 percent of its small business loans in low-income tracts, which was similar to the percentage of total businesses located in these tracts (5.7 percent) and aggregate performance of 5.5 percent. In 2022 and 2023, the bank made 5.7 percent of its small business loans in low-income tracts, which was similar to the percentage of total businesses located in these tracts (5.6 percent). In 2022, the bank's lending (6.7 percent) was above aggregate performance (4.8 percent) and in 2023, the bank's lending (5.1 percent) was similar to aggregate performance of 4.4 percent.

Small business lending in moderate-income tracts is good. In 2021, the bank made 24.0 percent of its small business loans in moderate-income tracts, which was similar to the percentage of total businesses located in these tracts (23.0 percent) and above aggregate performance of 22.4 percent. In 2022 and 2023, the bank made 23.4 percent of its small business loans in moderate-income tracts, which was similar to the percentage of total businesses located in these tracts (22.7 percent). In 2022, the bank's lending (23.4 percent) was above aggregate performance (21.2 percent) and in 2023, the bank's lending (23.5 percent) was also above aggregate performance of 20.3 percent.

No conspicuous lending gaps were identified based on an analysis of the dispersion of the loan products reviewed. The bank had activity in 75 percent of all census tracts throughout the review period. Furthermore, lending data and maps did not indicate a concentrated absence of loans across LMI tracts.

Lending to Borrowers of Different Incomes and Businesses of Different Sizes

The distribution of borrowers based on customer income or gross annual revenues is adequate. As described in the following sections, performance for HMDA-reportable lending and small business lending is adequate.

Home Purchase Loans

Home purchase lending to low-income borrowers is adequate. In 2021, the bank made 5.1 percent of its home purchase loans to low-income borrowers, which was below the percentage of low-income families (22.9 percent) but similar to aggregate performance of 5.7 percent. In 2022 and 2023, the bank made 4.8 percent of its home purchase loans to low-income borrowers, which was below the percentage of low-income families (21.8 percent). However, in 2022 the bank's lending (5.6 percent) was above aggregate performance (4.2 percent) and in 2023, the bank's lending (3.6 percent) matched aggregate performance (3.6 percent).

Home purchase lending to moderate-income borrowers is good. In 2021, the bank made 20.4 percent of its home purchase loans to moderate-income borrowers, which was above the percentage of moderate-income families (16.7 percent) and aggregate performance of 18.9 percent. In 2022 and 2023, the bank made 20.2 percent of its home purchase loans to moderate-income borrowers, which was above the percentage of moderate-income families (17.1 percent). In 2022, the bank's lending (21.1 percent) was above aggregate performance (17.1 percent) and in 2023, the bank's lending (18.9 percent) was above aggregate performance (17.2 percent).

Home Refinance Loans

Home refinance lending to low-income borrowers is good. In 2021, the bank made 9.2 percent of its home refinance loans to low-income borrowers, which was below the percentage of low-income families (22.9 percent) but above aggregate performance of 6.7 percent. In 2022 and 2023, the bank made 14.6 percent of its home refinance loans to low-income borrowers, which was below the percentage of low-income families (21.8 percent). In 2022, the bank's lending (15.7 percent) was above aggregate performance (11.7 percent) and in 2023, the bank's lending (12.4 percent) was above aggregate performance (11.2 percent).

Home refinance lending to moderate-income borrowers is adequate. In 2021, the bank made 18.9 percent of its home refinance loans to moderate-income borrowers, which was above the percentage of moderate-income families (16.7 percent) and above aggregate performance of 15.5 percent. In 2022 and 2023, the bank made 24.1 percent of its home refinance loans to moderate-income borrowers, which was above the percentage of moderate-income families (17.1 percent). In 2022, the bank's lending (28.1 percent) was above aggregate performance (23.1 percent) but in 2023, the bank's lending (16.7 percent) was below aggregate performance (23.0 percent).

Home Improvement Loans

Home improvement lending to low-income borrowers is good. In 2021, the bank made 8.4 percent of its home improvement loans to low-income borrowers, which was below the percentage of low-income families (22.9 percent) but above aggregate performance of 5.6 percent. In 2022 and 2023, the bank made 9.2 percent of its home improvement loans to low-income borrowers, which was below the percentage of low-income families (21.8 percent). In 2022, the bank's lending (9.6 percent) was nearly double aggregate performance (5.1 percent) and in 2023, the bank's lending (8.6 percent) was above aggregate performance (6.4 percent).

Home improvement lending to moderate-income borrowers is adequate. In 2021, the bank made 12.9 percent of its home improvement loans to moderate-income borrowers, which was below the percentage of moderate-income families (16.7 percent) but similar to aggregate performance of 12.1 percent. In 2022 and 2023, the bank made 16.6 percent of its home improvement loans to moderate-income borrowers, which was similar to the percentage of moderate-income families (17.1 percent). In 2022, the bank's lending (15.3 percent) was above aggregate performance (13.8 percent) and in 2023, the bank's lending (18.8 percent) was above aggregate performance (16.4 percent).

Small Business Loans

Small business lending to businesses of different sizes is adequate. In 2021, the bank made 74.9 percent of its small business loans to businesses with revenues of $1 million or less, which was below the percentage of total businesses with revenues of $1 million or less (93.4 percent). The bank's performance is above aggregate performance of 42.1 percent in 2021. However, 2021 was a year in which many banks extended PPP loans as a result of the COVID-19 pandemic and were not required to capture and report the revenue of the businesses, which is reflected in the aggregate data. As a result, performance context and loan size data were considered. In 2021, the bank made loans of less than $250,000 to businesses at a similar rate (93.6 percent) as aggregate lenders (97.7 percent). In 2022 and 2023, the bank made 54.7 percent of its small business loans to businesses with revenues of $1 million or less, which was below the percentage of total businesses with revenues of $1 million or less (93.7 percent). In 2022, bank lending (56.5 percent) was above aggregate performance (48.6 percent) and in 2023, the bank's lending (53.7 percent) was above aggregate performance (50.7 percent). Moreover, the majority of the bank's small business loans were originated in amounts of $250,000 or less, indicating a willingness to lend in the smaller amounts that are typically requested by small businesses.

CD Lending

The bank is a leader in making CD loans in the Atlanta AA. During the review period, the bank originated 38 qualified CD loans totaling $222.9 million in the AA. Specifically, the bank provided $161.8 million for affordable housing to LMI individuals; $41.4 million to support economic development by financing small businesses; $15 million for the revitalization and stabilization of LMI communities; and $4.7 million for community services that benefit LMI individuals. Bank performance is above performance of other banks in the area when considering its presence and market share in the Atlanta AA. Moreover, several of the loans were deemed impactful and/or responsive to AA needs as described below.

- Twelve loans totaling $152.6 million for construction of apartments in the AA using LIHTCs, which are complex. The projects were designed to create 533 new units of affordable housing for LMI individuals and/or families. These loans are responsive given the affordable housing challenges and the need for additional affordable housing units in the AA, as noted by community contacts.

- Eight new SBA 504 loans totaling $16.5 million that provide financing to small businesses.

- One loan totaling $4.3 million for renovations to a naturally occurring affordable housing (NOAH) property. The renovations resulted in an increase in monthly rent; however, all tenants occupying the property are LMI and post-renovation rents remain affordable to LMI residents.

- One loan for $3 million to a small business for the purchase of equipment to expand its business and hire additional LMI employees.

- One loan totaling $2.3 million for renovations to a NOAH property. The renovations did not result in any increases to monthly rent and all tenants occupying the property are low-income.

The Atlanta AA positively benefited from two LOCs totaling $9.5 million to a national CDFI with prioritization in nine AAs, including Atlanta. The CDFI LOCs were previously described under the *CD Lending* heading for the institution.

INVESTMENT TEST

The bank made an excellent level of qualified CD investments and grants in the Atlanta AA, totaling $134.1 million. This amount included 15 current period investments totaling $79.3 million, 15 prior period investments still outstanding with a balance of $52.4 million, and 144 donations totaling $2.4 million.

Investment types varied and addressed a range of CD needs. These include deposits in CDFIs, NMTC investments to stimulate economic development in LMI tracts, SBIC funds to address small business financing needs, LIHTC projects to address affordable housing challenges, and MBS supporting LMI borrowers. The bank made extensive use of innovative and/or complex investments to support CD initiatives. Additionally, the bank exhibits excellent responsiveness to CD needs.

Examples of noteworthy investments and grants provided during the review period include:

- Three current period LIHTC projects totaling $63.3 million that helped to build 579 new units of affordable housing for LMI individuals and families, which was responsive to the need for affordable housing in the AA.
- A $3 million current period NMTC investment that helped to create 54 new jobs in a low-income tract.
- Nine current period SBIC fund allocations totaling $11.1 million to finance small businesses in the AA.
- A $250,000 current period deposit in a CDFI that primarily serves LMI individuals and communities in the AA.
- Two contributions totaling $700,000 to support the Atlanta office of a nonprofit which provides microloans and technical assistance to aspiring entrepreneurs from disadvantaged backgrounds.
- Ten contributions totaling $35,300 to support a local nonprofit affordable housing organization.
- Four contributions totaling $76,000 to support an organization which offers shelter, job training, food, and healthcare to LMI individuals.

The Atlanta AA also positively benefited from $61,500 in donations benefiting a BSRA that includes the entire state of Georgia. These donations were previously described under the *Investment Test* heading for the state of Georgia.

SERVICE TEST

Retail banking services are adequate in Atlanta. Additionally, the bank provides an adequate level of CD services in its AA.

Retail Banking Services

Service delivery systems are reasonably accessible to the bank's geographies and individuals of different income levels throughout the Atlanta AA. In deriving this conclusion, the distribution of the bank's branches by census tract income level was compared to the distribution of households and businesses among the tract categories in the AA. As the following tables show, the bank operated branches and ATMs in all census tract categories throughout the review period, with 4.2 percent of branches in low-income tracts and 22.2 percent of branches in moderate-income tracts in 2023. The percentage of branches in low-income tracts was below the percentage of households (6.8 percent) and the percentage of businesses (5.6 percent) in those tracts. The percentage of branches in moderate-income tracts was below the percentage of households (24.6 percent) and similar to the percentage of businesses (22.7 percent) in those tracts.

While the bank's delivery systems are reasonably accessible to the assessment area overall, there are some portions of the assessment area where accessibility is limited. Areas of inaccessibility were noted in certain counties within the AA, including the outskirts of DeKalb and Gwinnett counties where many LMI income tracts are located. Pockets of inaccessibility were also noted around LMI tracts in Cobb County.

The bank closed two branches during the review period and opened six branches in the Atlanta AA. The branch closed one branch in a moderate-income tract and one in an upper-income tract in 2021. The bank opened one branch in a moderate-income tract in Walton County in 2021 that changed to a middle-income tract in 2022 with the U.S. Census change. The bank opened two other branches in moderate-income tracts with one in Forsyth County and one in Fulton County. The bank also opened two branches in middle and upper-income tracts in Fulton County and one in an upper-income tract in Cobb County. Overall, the branch opening and closings have not adversely affected the accessibility of the bank's delivery systems though the branch openings did not address the areas noted above where accessibility was limited.

The hours of operation are consistent across all branches in the AA. Branch lobby and drive-through hours are 9 a.m. to 5 p.m. each weekday. The bank also offers Saturday lobby hours from 9:00 a.m. to noon at more than half of the branches in the AA, including branches in LMI tracts. The bank offers the same suite of products and services throughout the AA. Thus, hours and services do not vary in a way that inconveniences the AA, particularly LMI geographies and LMI individuals.

The tables below show the distribution of branches and ATMs along with households and businesses by tract category.

CD Services

The bank provides an adequate level of CD services in the AA. During the review period, bank employees provided 402 CD service activities totaling 2,295 hours to 76 organizations operating throughout the AA. Bank staff provided their financial expertise in a variety of ways, including financial literacy and homebuyer education; service on board of directors and other committees; and other technical assistance and advisory services.

Noteworthy CD services in the Atlanta AA include:

- Bank staff volunteered 570 hours of board service to 18 nonprofit organizations engaged in CD work.
- Bank employees conducted 1,683 hours of homebuyer counseling and financial education for youth and adults in partnership with 63 organizations, including nonprofit organizations, schools, government agencies and private employers.
- Bank staff provided nearly 170 hours of CD services to support two programs that focus on providing support to formerly incarcerated individuals with the reentry process. Bank staff served on the Board and provided financial education to clients of the programs.

The Atlanta AA also positively benefited from four hours of CD service benefiting the BSRA that includes the entire state of Georgia. These services were previously described under the CD services write up for the state of Georgia.

METROPOLITAN AREAS
LIMITED-SCOPE REVIEW

The following MSA AAs were reviewed using limited-scope examination procedures. Through these procedures, conclusions regarding the institution's CRA performance are drawn from the review of available facts and data, including performance and demographic information. Please refer to the tables in *Appendices G and H* for additional information regarding these AAs.

DESCRIPTION OF INSTITUTION'S OPERATIONS IN GEORGIA MSA AAs

MSA AA	AA Delineation/Counties	# Branches *(as of 12/31/2023)*	Deposits ($000s) *(as of June 30, 2023)*
Albany	Dougherty	3	$224,084
Athens	Clarke	2	$135,489
Dalton	Murray & Whitfield	3	$332,673
Gainesville	Hall	5	$627,370
Rome	Floyd	2	$315,848
Savannah	Chatham	1	$90,022
Valdosta	Lowndes	1	$132,071

CONCLUSIONS WITH RESPECT TO PERFORMANCE TESTS

The following table compares conclusions regarding performance in each limited-scope MSA AA to overall performance for the state of Georgia.

Performance in the Limited-Scope Review Metropolitan Assessment Areas			
MSA AA	**Lending Test**	**Investment Test**	**Service Test**
Albany	Not Consistent (Below)	Not Consistent (Below)	Not Consistent (Below)
Athens	Not Consistent (Below)	Not Consistent (Below)	Not Consistent (Below)
Dalton	Not Consistent (Below)	Not Consistent (Below)	Not Consistent (Exceeds)
Gainesville	Consistent	Consistent	Consistent
Rome	Not Consistent (Below)	Not Consistent (Below)	Consistent
Savannah	Not Consistent (Below)	Consistent	Not Consistent (Below)
Valdosta	Not Consistent (Below)	Not Consistent (Below)	Not Consistent (Below)

The key performance standards of the Lending Test for limited-scope areas included geographic distribution, borrower distribution, and CD loans. For the geographic distribution of loans, performance was adequate in Athens, Rome, and Valdosta and good in the remaining AAs. Borrower distribution was poor in Savannah, adequate in Athens, Gainesville, and Rome, and good in the remaining AAs. The bank made only one CD loan across these seven AAs, and it totaled $250,000 in Gainesville. While the bank made no qualifying CD loans within the remaining AAs, the Dalton and Rome AAs benefit from a $1 million loan serving a BSRA that includes those areas as previously described in the *CD Lending* section for the state of Georgia.

Qualifying amounts and conclusions for the bank's investment and grant activity in limited-scope MSA areas were as follows: $1.9 million in Albany (adequate level), $767,200 in Athens (poor level), $851,700 in Dalton (few, if any), $22.8 million in Gainesville (excellent level), $558,200 in Rome (few, if any), $6.1 million in Savannah (excellent level), and $353,300 in Valdosta (few, if any).

The performance standards of the Service Test for limited-scope MSA areas included retail banking and CD services. Conclusions for retail banking services were as follows: good in Dalton, Gainesville and Rome; poor in Albany, Athens, and Valdosta; very poor in Savannah. Qualifying hours and conclusions for CD services were as follows: 71 hours in Albany (adequate level); 24 hours in Athens (poor level); 336 hours in Dalton (leader); 59 hours in Gainesville (poor level); 0 hours in Rome (very poor level); 47 hours in Savannah (poor level); and six hours in Valdosta (very poor level). All MSA AAs reviewed under limited-scope procedures also positively benefited from four hours of CD service benefiting the BSRA that includes the entire state of Georgia. These services were previously described under the CD services write up for the state of Georgia.

Performance in the limited-scope MSA AAs did impact overall performance for the state. See *CD Lending* within the *Conclusions with Respect to Performance Tests in Georgia* section of the report for more details.

NONMETROPOLITAN STATEWIDE AREAS
LIMITED-SCOPE REVIEW

The following non-MSA AAs were reviewed using limited-scope examination procedures. Through these procedures, conclusions regarding the institution's CRA performance are drawn from the review of available facts and data, including performance and demographic information. Please refer to the tables in *Appendices G and H* for additional information regarding these AAs.

DESCRIPTION OF INSTITUTION'S OPERATIONS IN GEORGIA NON-MSA AAs

Non-MSA AA	AA Delineation/Counties	# Branches *(as of 12/31/2023)*	Deposits ($000s) *(as of June 30, 2023)*
Elbert-Wilkes	Elbert & Wilkes	2	$119,099
Jefferson-Jenkins	Jefferson & Jenkins	2	$80,814
Northeast GA	Banks, Habersham, Jackson, Rabun, Stephens, & White	7	$546,965
Northwest GA	Chattooga, Gilmer, Gordon, & Polk	4	$298,652
Southwest GA	Clay, Crisp, Decatur, & Randolph	4	$194,680

CONCLUSIONS WITH RESPECT TO PERFORMANCE TESTS

The following table compares conclusions regarding performance in each limited-scope non-MSA AA to overall performance for the state of Georgia.

Performance in the Limited-Scope Review Non-MSA Assessment Areas			
Non-MSA AA	**Lending Test**	**Investment Test**	**Service Test**
Elbert-Wilkes	Not Consistent (Below)	Not Consistent (Below)	Not Consistent (Exceeds)
Jefferson-Jenkins	Not Consistent (Below)	Not Consistent (Below)	Consistent
Northeast GA	Not Consistent (Below)	Not Consistent (Below)	Consistent
Northwest GA	Consistent	Not Consistent (Below)	Consistent
Southwest GA	Not Consistent (Below)	Not Consistent (Below)	Consistent

The key performance standards of the Lending Test for limited-scope areas included geographic distribution, borrower distribution, and CD loans. For the geographic distribution of loans, performance was not rated in Jefferson-Jenkins (due to the absence of LMI tracts), adequate in Elbert-Wilkes and Northeast Georgia, and good in the remaining AAs. Borrower distribution was adequate in all five AAs. The bank made two CD loans in Northwest Georgia totaling $4.5 million, which was deemed adequate. The Northwest Georgia AA also benefits from a $1 million loan serving a BSRA that includes the area as previously described in the *CD Lending* section for the state of Georgia. The bank made no qualifying CD loans in the remaining AAs.

Qualifying amounts and conclusions for the bank's investment and grant activity in limited-scope non-MSA areas were as follows: $500 in Elbert-Wilkes (few, if any), $571,900 in Jefferson-Jenkins (poor level), $602,700 in Northeast Georgia (few, if any), $2.8 million in Northwest Georgia (adequate level), and $93,500 in Southwest Georgia (few, if any).

The performance standards of the Service Test for limited-scope non-MSA areas included retail banking and CD services. Conclusions for retail banking services were as follows: good in Elbert-Wilkes and Northwest GA; adequate in Jefferson-Jenkins, Northeast GA, and Southwest GA. Qualifying hours and conclusions for CD services were as follows: 46 hours in Elbert-Wilkes (adequate level); 0 hours in Jefferson-Jenkins (very poor level); 19 hours in Northeast GA (poor); 75 hours in Northwest GA (poor level); and 66 hours in Southwest GA (poor level). All non-MSA AAs reviewed under limited-scope procedures also positively benefited from four hours of CD service benefiting the BSRA that includes the entire state of Georgia. These services were previously described under the CD services write up for the state of Georgia.

Performance in the limited-scope non-MSA AAs did impact overall performance for the state. See *CD Lending* within the *Conclusions with Respect to Performance Tests in Georgia* section of the report for more details.

LOUSIANA

CRA RATING FOR LOUISIANA: **SATISFACTORY**
The Lending Test is rated: **High Satisfactory**
The Investment Test is rated: **High Satisfactory**
The Service Test is rated: **High Satisfactory**

Major factors contributing to this rating include:

- The geographic distribution of loans reflects poor penetration throughout Louisiana AAs.
- The distribution of borrowers reflects good penetration throughout Louisiana AAs.
- The bank made an excellent level of CD loans in Louisiana.
- The bank made a significant level of qualified CD investments and grants in Louisiana.
- Retail banking services, which includes accessibility of delivery systems, changes in branch locations, and reasonableness of hours and services, are adequate.
- The bank provides a relatively high level of CD service activities in Louisiana.

SCOPE OF EXAMINATION

A full-scope review was conducted for the following AA in Louisiana:
- New Orleans

Limited-scope reviews were conducted for the remaining 10 assessment areas:
- Alexandria
- Baton Rouge
- Hammond
- Houma
- Lafayette
- Monroe
- Northwest Louisiana
- Shreveport
- Southern Louisiana
- West Carroll

The time period, products, and affiliates evaluated for these assessment areas are consistent with the scope discussed in the institution section of this report.

DESCRIPTION OF INSTITUTION'S OPERATIONS IN LOUSIANA

As of June 30, 2023, Regions had $8.6 billion in deposits in Louisiana accounting for 6.6 percent of its deposits. Regions operated 82 branch offices in Louisiana as of December 31, 2023, representing 6.5 percent of its total branches. HMDA-reportable lending in Louisiana accounted for 4.3 percent of total institutional HMDA-reportable lending by number of loans and 3.9 percent by dollar volume. Small business lending in Louisiana accounted for 6.3 percent of the bank's total small business lending by number of loans and 5.8 percent by dollar volume. Overall, the bank's HMDA-reportable and small business lending activity in the state was less than the percentage of total institutional deposits.

The following table shows lending activity from January 1, 2021 through December 31, 2023.

Statewide Summary of Lending Activity
Assessment Areas Located in: Louisiana
2021-2023

Loan Type	#	%	$(000s)	%

Originations & Purchases

CONCLUSIONS WITH RESPECT TO PERFORMANCE TESTS IN LOUSIANA

LENDING TEST

Overview

The Lending Test rating for the state of Louisiana is High Satisfactory. The rating is a result of performance in each characteristic of the Lending Test applicable to the state, including Lending Activity (adequate); Geographic Distribution (poor); Borrower Distribution (good); and CD Lending (excellent). Highlights of each characteristic are found in the sections that follow, with additional descriptions and details within the full-scope AA of the state.

Lending Activity

Lending levels reflect adequate responsiveness to the credit needs of Louisiana AAs. The total number and dollar volume of HMDA-reportable and small business loans was considered in arriving at Lending Activity

conclusions, as well as competitive factors and the bank's overall importance to each AA. Statewide conclusions are derived from conclusions within each AA as detailed in the *Lending Activity* section of the New Orleans AA.

Geographic and Borrower Distribution

The geographic distribution of HMDA-reportable and small business loans reflects poor dispersion throughout the AAs in Louisiana and the distribution of borrowers reflects good penetration among customers of different income levels and businesses of different sizes. The analyses of HMDA-reportable and small business lending within the full-scope AA are discussed in detail later in this report.

CD Lending

The bank made an excellent level of CD loans in Louisiana, driven by performance in the New Orleans full-scope AA. During the review period, the bank originated or renewed $444.6 million in qualified CD loans directly benefiting Louisiana AAs. More information on CD loans can be found in the full-scope AA section of this report. In addition, the bank received consideration at the state level for three CD loans totaling $1.3 million that benefited multiple AAs throughout the state. The three loans were LOCs to a nonprofit organization providing community services to LMI individuals in Baton Rouge and New Orleans.

INVESTMENT TEST

The Investment Test rating for Louisiana is High Satisfactory.

The bank made a significant level of qualified CD investments and grants in Louisiana, with $164.8 million in qualified investments and $1.8 million in qualified contributions directly benefiting its Louisiana AAs. In addition, the bank received consideration at the state level for $75,000 in qualifying statewide contributions. This includes $50,000 to a nonprofit that provides statewide small business technical assistance services.

The bank made a significant level of qualified investments and contributions in the New Orleans full-scope AA. Additional details regarding specific investments and contributions can be found in the full-scope AA section of this report.

The bank was responsive to the needs of its AAs in the state of Louisiana. Therefore, the bank also received consideration for $37 million in qualified investments within the state that benefited geographies outside of the bank's AAs. This amount included 18 LIHTCs totaling $30.8 million and one NMTC investment of $6.2 million.

SERVICE TEST

The Service Test rating for Louisiana is High Satisfactory.

Retail Services

Delivery systems are reasonably accessible to the bank's geographies and individuals of different income levels in Louisiana. As of December 31, 2023, Regions operated 82 branches in the state, including eight branches in low-income tracts and 23 branches in moderate-income tracts, representing 37.8 percent of total statewide branches.

A full array of personal and business banking products and services is offered at all locations in the Louisiana AAs. Across the state, branch hours do not vary in a way that inconveniences individual AAs. Most branches in the state offer lobby hours and drive-through hours beginning at 9 a.m. and closing at 5 p.m. Monday-Friday. Regions offered branch lobby hours on Saturday from 9 a.m. to 12 p.m. or 1 p.m. at some branches in the state, particularly in the larger urban markets like New Orleans, Baton Rouge and Shreveport. Delivery systems include

full-service ATMs at all branches in the state. In addition to those ATMs, the bank compliments its traditional service delivery methods with alternative delivery systems that provide increased access to banking services as previously discussed in the *Institution, Retail Banking Services* section of this report.

During the review period, the bank closed 12 branches, including one branch in a low-income tract and two in moderate-income tracts. The bank opened two branches, including one in a moderate-income tract. Changes to the bank's branch network in Louisiana did not adversely affect the accessibility of delivery systems, particularly to LMI geographies or LMI individuals.

Additional details on the bank's retail services can be found in the full-scope AA sections of this report.

CD Services

Regions provides a relatively high level of CD services in Louisiana. During the review period, the bank engaged in 5,029 hours of qualifying CD service activities in the state. This total includes 4,965 hours directly benefiting individual AAs in Louisiana and 64 hours benefiting a BSRA that includes several or all of the AAs in state. The BSRA hours include 14 hours providing financial education in conjunction with an organization that serves the Baton Rouge and Lafayette AAs and 50 hours of service on the board of directors for a statewide affordable housing association that benefits all of the bank's AAs in the state.

Additional details of service hours in Louisiana are described later in the report in the sections for the individual AAs they benefit.

METROPOLITAN AREA – NEW ORLEANS MSA
(Full-Scope Review)

DESCRIPTION OF INSTITUTION'S OPERATIONS IN THE NEW ORLEANS AA

Overview

The New Orleans AA includes Jefferson, Orleans, Plaquemines, St. Bernard, St. Charles, St. James, St. John the Baptist, and St. Tammany parishes. As of December 31, 2023, the bank operated 25 branches in the assessment area, representing 30.5 percent of its branches in the state of Louisiana and 2.0 percent of its total branches. Of the branches in the AA, nine are in moderate-income tracts, eight are in middle-income census tracts, and eight are in upper-income census tracts. As a percentage within the state of Louisiana, 42.6 percent of the bank's deposit volume and 40.5 percent of the bank's HMDA-reportable and small business loans by number are located in the New Orleans AA.

The AA is a competitive banking market with several national, regional, and local institutions operating in the area. As of June 30, 2023, there were 34 depository institutions operating 295 branches in the AA. Regions ranked 4th in deposit market share with 7.9 percent of total deposits ($3.7 billion). Capital One had the largest deposit market share at 28.7 percent, followed by Hancock Whitney Bank and JPMorgan Chase Bank, with 18.5 percent and 17.6 percent, respectively.

For HMDA-reportable lending, Regions originated and/or purchased 1.9 percent, 2.2 percent, and 2.2 percent of total HMDA-reportable loans in the AA in 2021, 2022 and 2023. Regions was ranked 16th out of 507 reporters in 2021; 11th out of 478 reporters in 2022; and 11th out of 424 reporters in 2023. Regions' ranking indicates that it is an important contributor for HMDA-reportable lending in the New Orleans AA. Rocket Mortgage was the top HMDA reporter in the market for 2021. Hancock Whitney Bank was the top HMDA reporter in the market for 2022 and 2023.

For small business lending, Regions ranked 12th out of 158 reporters in 2021 with 2.1 percent of small business loans. In 2022, the bank ranked 34th out of 134 reporters with 0.3 percent of total small business loans. In 2023, Regions ranked 21st out of 126 reporters with 0.5 percent of total small business loans. American Express was the top CRA reporter in the market for 2021, 2022 and 2023.

AA Demographics, Population, and Income Characteristics

The population in the AA was 1,271,845 as of the 2020 Census, representing an increase of 2.6 percent since 2015. New Orleans, located in Orleans Parish, is the principal city within the AA. The Orleans Parish had a population of 383,997 in 2020, representing an increase of 1.9 percent since 2015. Furthermore, the most populous parish was Jefferson followed by Orleans and St. Tammany parishes. St. Tammany, St. Bernard, and Orleans parishes posted the largest population gains since 2015, with St. Tammany increasing in population by 8.9 percent since 2015. St. Charles, St. John the Baptist, Plaquemines, and St. James parishes posted losses during the same period.

The AA contains 430 census tracts: 51 low-income tracts (11.9 percent), 117 moderate-income tracts (27.2 percent), 109 middle-income tracts (25.3 percent), 131 upper-income tracts (30.5 percent), and 22 unknown-income tracts (5.1 percent).

For purposes of classifying borrower income, this evaluation uses the FFIEC estimated median family income for the relevant area. As the following table shows, the median family income increased from $70,100 in 2021 to $82,300 in 2023.

Borrower Income Levels
New Orleans-Metairie, LA MSA

FFIEC Estimated Median Family Income		Low 0 - 49.99%	Moderate 50% - 79.99%	Middle 80% - 119.99%	Upper 120% - & above
2021	**$70,100**	0 - $35,049	$35,050 - $56,079	$56,080 - $84,119	$84,120 - & above
2022	**$81,800**	0 - $40,899	$40,900 - $65,439	$65,440 - $98,159	$98,160 - & above
2023	**$82,300**	0 - $41,149	$41,150 - $65,839	$65,840 - $98,759	$98,760 - & above

There are 290,997 total families in the AA. Of these families, 24.9 percent are low-income, 15.3 percent are moderate-income, 18.1 percent are middle-income, and 41.6 percent are upper-income. Additionally, 12.2 percent of families were below the poverty level, which was lower than the 14.2 percent poverty level for the state of Louisiana. Within the AA, the families below poverty for St. Bernard parish was higher at 18.7 percent, while families below poverty in St. Tammany parish was much lower at 8.1 percent. The largest percentage of families below the poverty level live in moderate-income tracts (37.4 percent) and middle-income tracts (25.1 percent). Moreover, 36.0 percent of low-income families and 36.3 percent of moderate-income families reside in moderate-income tracts.

Housing Characteristics

There are 559,877 total housing units in the AA, of which 55.3 percent are owner-occupied, 31.5 percent are rental units, and 13.1 percent are vacant. While most units are owner-occupied, a disproportionately higher percentage of housing units in LMI tracts were rental units or vacant. In low-income census tracts, approximately 66.1 percent of all housing units were rentals or vacant and in moderate-income census tracts, 54.9 percent of units were rentals or vacant.

The median age of housing stock across the AA was 52 years, which was older than the median age of the housing stock for the state of Louisiana (40 years). Housing units in LMI census tracts were older, with a median age of 57 years in low-income tracts and 55 years in moderate-income tracts. The older age of homes is an indicator of potential opportunity for home improvement loans in LMI tracts.

Over the three-year review period from January 2021 to December 2023, the median home listing price in New Orleans increased by 3.2 percent, rising from $314,950 to $325,000.[37] Comparatively over the same period, the median home listing price in the United States increased by 22.4 percent, rising from $335,000 to $410,000.[38] As such, the increase in home prices within the New Orleans market is significantly more modest than the national trend.

Median gross rent in the AA was $1,018 per month, which is higher than the median gross rent in the state of

[37] "Housing Inventory: Median Listing Price in New Orleans-Metairie, LA (CBSA)." *Federal Reserve Bank of St. Louis*, Table Data - Housing Inventory: Median Listing Price in New Orleans-Metairie, LA (CBSA) | FRED | St. Louis Fed. Accessed 19 Dec. 2024.
[38] "Housing Inventory: Median Listing Price in the United States." *Federal Reserve Bank of St. Louis*, Table Data - Housing Inventory: Median Listing Price in the United States | FRED | St. Louis Fed. Accessed 19 Dec. 2024.

Louisiana ($876 per month). Additionally, the affordability ratio of the AA (26.6 percent) is lower than the affordability ratio for the state of Louisiana (30.2 percent). Housing cost burden represents a significant challenge within the AA. The percentage of renters with rent costs greater than 30 percent of income is 51.0 percent, which is higher than the state of Louisiana at 46.7 percent.

Economic Conditions

New Orleans has a diverse economy, consisting of five main industry sectors: energy, advanced manufacturing, international trade, healthcare, and tourism.[39] The largest companies in New Orleans include: Ochsner Health System, Tulane University, Woodward Design + Build, Entergy Corporation, Whitney Holding Corp, Boh Bros Construction, and Superior Energy Services.[40] Although longstanding industries like energy and tourism continue to serve as pillars of the local economy, emerging sectors such as education and healthcare are experiencing growth.[41] From 2013 to 2023, the educational services industry grew by 29 percent and the healthcare and social assistance industry grew by 28 percent.[42] In 2023, the healthcare industry was the largest source of employment in the region, accounting for a total of 77,398 jobs, followed by the trade & logistics sector, accounting for a total of 59,131 jobs.[43]

The following table shows the unemployment rate percentages for the New Orleans AA and the state of Louisiana. As shown, unemployment rates in the AA were similar to unemployment rates for the state of Louisiana. The AA unemployment rate improved from 6.4 percent in 2021 to 3.8 percent in 2023 while the state's unemployment rate similarly dropped from 5.6 percent in 2021 to 3.7 percent in 2023. St. Tammany parish had the lowest unemployment rate in the AA during the review period while St. John the Baptist parish had the highest unemployment rate.

Credit and CD Needs

As part of the CRA examination, information was obtained from a community contact specializing in economic development. The contact conveyed that St. Tammany parish has experienced exponential growth over the past decade and a half, attracting both younger and older populations. Small business growth has also been evident in the area. The contact noted that approximately one-third of St. Tammany's population commutes to surroundings parishes, such as Orleans Parish, for employment purposes.

The contact also stated that small business and affordable housing loans are the primary credit needs in the area. Housing prices have risen dramatically, creating a gap in financing. According to the contact, the area has an involved network of financial institutions. However, additional support is needed for startups and small businesses.

CONCLUSIONS WITH RESPECT TO PERFORMANCE TESTS IN THE NEW ORLEANS AA

LENDING TEST

Lending levels reflect adequate responsiveness to credit needs of the AA. The geographic distribution of loans reflects poor penetration throughout the AA and the distribution of loans reflects good penetration among borrowers of different income levels and businesses of different revenue sizes. In addition, the bank made an excellent level of CD loans in the New Orleans AA.

The analysis included 2,063 HMDA-reportable loans and 1,301 small business loans reported by the bank in the AA during the review period. Therefore, HMDA-reportable lending received greater weight in determining conclusions. Additionally, during 2021, 2022, and 2023, the bank originated or purchased 691 home purchase loans, 624 home refinance loans, and 446 home improvement loans in the AA. Thus, when considering HMDA-reportable loan categories, equal weight was assigned to home purchase loans and home refinance loans given their relative share of the total HMDA-reportable lending in this AA, followed by home improvement loans.

Details of the bank's mortgage and small business lending and information regarding lending by peers can be found in *Appendix F.*

Lending Activity

Lending activity is considered adequate. Overall, 1.6 percent of HMDA-reportable loans and 2.2 percent of small business loans were made in the AA. The percentage of the bank's HMDA-reportable lending is below the percentage of its area deposits, and the percentage of small business lending is consistent with the percentage of its area deposits. In addition, the bank is an important contributor to HMDA-reportable lending in the area.

Geographic Distribution of Loans

The geographic distribution of loans reflects poor penetration throughout the AA. As described in the following sections, overall performance for HMDA-reportable lending is poor and small business lending performance is poor. The bank's poor performance in HMDA-reportable lending is noteworthy when considering that Regions Bank is an important contributor to HMDA-reportable lending in the AA and community contacts noted affordable housing as a primary need in the AA.

Home Purchase Loans

Home purchase lending in low-income tracts is poor. In 2021, the bank made 7.1 percent of its home purchase loans in low-income tracts, which was above the percentage of owner-occupied units in these tracts (5.4 percent)

and similar to aggregate performance of 6.3 percent. However, bank performance declined in 2022 and 2023, with the bank making only 3.4 percent of its home purchase loans in low-income tracts, which was below the percentage of owner-occupied units in these tracts (5.7 percent). In 2022, the bank's lending (3.7 percent) was below aggregate performance (5.5 percent) and in 2023, the bank's lending (3.0 percent) was below aggregate performance (5.0 percent).

Home purchase lending in moderate-income tracts is adequate. In 2021, the bank made 22.4 percent of its home purchase loans in moderate-income tracts, which was above the percentage of owner-occupied units in these tracts (19.9 percent) and above aggregate performance of 18.0 percent. In 2022 and 2023, the bank made 21.6 percent of its home purchase loans in moderate-income tracts, which was similar to the percentage of owner-occupied units in these tracts (22.5 percent). In 2022, the bank's lending (24.0 percent) was above aggregate performance (19.6 percent) but in 2023, the bank's lending (17.3 percent) was below aggregate performance (19.4 percent).

Home Refinance Loans

Home refinance lending in low-income tracts is poor. In 2021, the bank made 2.6 percent of its home refinance loans in low-income tracts, which was below the percentage of owner-occupied units in these tracts (5.4 percent) and below aggregate performance of 4.2 percent. In 2022 and 2023, the bank made 3.0 percent of its home refinance loans in low-income tracts, which was below the percentage of owner-occupied units in these tracts (5.7 percent). In 2022, the bank's lending (1.7 percent) was below aggregate performance (4.7 percent) and in 2023, the bank's lending improved to 4.7 percent but was still below aggregate performance (5.9 percent).

Home refinance lending in moderate-income tracts is poor. In 2021, the bank made 13.5 percent of its home refinance loans in moderate-income tracts, which was below the percentage of owner-occupied units in these tracts (19.9 percent) but similar to aggregate performance of 13.7 percent. In 2022 and 2023, the bank made 13.4 percent of its home refinance loans in moderate-income tracts, which was below the percentage of owner-occupied units in these tracts (22.5 percent). In 2022, the bank's lending (13.9 percent) was below aggregate performance (19.8 percent) and in 2023, the bank's lending declined further (12.8 percent), which was below aggregate performance (23.0 percent).

Home Improvement Loans

Home improvement lending in low-income tracts is poor. In 2021, the bank did not make any home improvement loans in low-income tracts. In 2022 and 2023, the bank made 0.7 percent of its home improvement loans in low-income tracts, which was below the percentage of owner-occupied units in these tracts (5.7 percent). In 2022, the bank's lending (0.5 percent) was below aggregate performance (2.7 percent) and in 2023, the bank's lending (0.9 percent) was below aggregate performance (2.6 percent).

Home improvement lending in moderate-income tracts is adequate. In 2021, the bank made 10.8 percent of its home improvement loans in moderate-income tracts, which was below the percentage of owner-occupied units in these tracts (19.9 percent) but similar to aggregate performance of 10.4 percent. In 2022 and 2023, the bank made 16.0 percent of its home improvement loans in moderate-income tracts, which was below the percentage of owner-occupied units in these tracts (22.5 percent). In 2022, the bank's lending (15.5 percent) was above aggregate performance (13.3 percent) and in 2023, the bank's lending (16.7 percent) was similar to aggregate performance (16.2 percent).

Small Business Loans

Small business lending in low-income tracts is poor. In 2021, the bank made 11.9 percent of its small business loans in low-income tracts, which was above the percentage of total businesses located in these tracts (8.1 percent) and above aggregate performance of 9.1 percent. However, bank performance declined in 2022 and 2023, with the bank making 3.1 percent of its small business loans in low-income tracts, which was below the percentage of

total businesses located in these tracts (6.2 percent). In 2022, the bank's lending (1.5 percent) was below aggregate performance (5.8 percent) and in 2023, the bank's lending (4.3 percent) was below aggregate performance of 5.7 percent.

Small business lending in moderate-income tracts is adequate. In 2021, the bank made 20.5 percent of its small business loans in moderate-income tracts, which was similar to the percentage of total businesses located in these tracts (19.5 percent) and similar to aggregate performance of 19.9 percent. The bank's performance improved in 2022 and 2023, with the bank making 26.7 percent of its small business loans in moderate-income tracts, which was above the percentage of total businesses located in these tracts (22.5 percent). In 2022, the bank's lending (29.1 percent) was above aggregate performance (22.4 percent) and in 2023, the bank's lending (25.0 percent) was above aggregate performance of 21.1 percent.

No conspicuous lending gaps were identified based on an analysis of the dispersion of the loan products reviewed. However, lending data and maps did indicate small lending gaps across some LMI tracts, specifically low-income tracts north and west of the French Quarter and moderate-income tracts in the Algiers neighborhood along the West Bank of the Mississippi River. However, these gaps were not deemed conspicuous because they were small and because the bank had loans in adjacent LMI tracts surrounding these areas. Additionally, the bank had activity in approximately 50 percent of low-income census tracts and 70 percent of moderate-income census tracts throughout the review period, demonstrating the bank's attempts to lend in LMI areas across the AA. While not conspicuous, these lending gaps provide additional context surrounding the poor performance previously discussed.

Lending to Borrowers of Different Incomes and Businesses of Different Sizes

The distribution of loans based on borrower income or gross annual revenues is good. As described in the following sections, overall performance for HMDA-reportable lending is good while small business lending performance is adequate.

Home Purchase Loans

Home purchase lending to low-income borrowers is adequate. In 2021, the bank made 5.1 percent of its home purchase loans to low-income borrowers, which was below the percentage of low-income families (24.9 percent) but similar to aggregate performance of 4.1 percent. In 2022 and 2023, the bank made 4.2 percent of its home purchase loans to low-income borrowers, which was below the percentage of low-income families (24.9 percent). In 2022, the bank's lending (4.5 percent) was similar to aggregate performance (4.1 percent) and in 2023, the bank's lending (3.8 percent) was similar to aggregate performance (2.8 percent).

Home purchase lending to moderate-income borrowers is excellent. In 2021, the bank made 20.8 percent of its home purchase loans to moderate-income borrowers, which was above the percentage of moderate-income families (15.8 percent) and above aggregate performance of 17.3 percent. Bank performance improved further in 2022 and 2023, with the bank making 26.1 percent of its home purchase loans to moderate-income borrowers, which was above the percentage of moderate-income families (15.3 percent). In 2022 the bank's lending (26.8 percent) was above aggregate performance (17.6 percent) and in 2023, the bank's lending (24.8 percent) was above aggregate performance (14.2 percent).

Home Refinance Loans

Home refinance lending to low-income borrowers is good. In 2021, the bank made 5.9 percent of its home refinance loans to low-income borrowers, which was below the percentage of low-income families (24.9 percent) but above aggregate performance of 3.8 percent. In 2022 and 2023, the bank made 10.9 percent of its home refinance loans to low-income borrowers, which was below the percentage of low-income families (24.9 percent).

In 2022, the bank's lending (13.9 percent) was above aggregate performance (8.5 percent) and in 2023, the bank's lending (7.0 percent) was similar to aggregate performance (6.8 percent).

Home refinance lending to moderate-income borrowers is good. In 2021, the bank made 15.4 percent of its home refinance loans to moderate-income borrowers, which was similar to the percentage of moderate-income families (15.8 percent) and above aggregate performance of 11.4 percent. In 2022 and 2023, the bank made 23.9 percent of its home refinance loans to moderate-income borrowers, which was above the percentage of moderate-income families (15.3 percent). In 2022, the bank's lending (32.2 percent) was above aggregate performance (17.9 percent) and in 2023, the bank's lending (12.8 percent) was similar to aggregate performance (13.7 percent).

Home Improvement Loans

Home improvement lending to low-income borrowers is good. In 2021, the bank made 5.8 percent of its home improvement loans to low-income borrowers, which was below the percentage of low-income families (24.9 percent) but similar to aggregate performance of 4.8 percent. In 2022 and 2023, the bank made 7.8 percent of its home improvement loans to low-income borrowers, which was below the percentage of low-income families (24.9 percent). In 2022, the bank's lending (8.8 percent) was above aggregate performance (5.5 percent) and in 2023, the bank's lending (6.1 percent) was above aggregate performance (4.8 percent).

Home improvement lending to moderate-income borrowers is excellent. In 2021, the bank made 18.0 percent of its home improvement loans to moderate-income borrowers, which was above the percentage of moderate-income families (15.8 percent) and nearly double aggregate performance of 9.8 percent. In 2022 and 2023, the bank made 16.0 percent of its home improvement loans to moderate-income borrowers, which was similar to the percentage of moderate-income families (15.3 percent). In 2022, the bank's lending (17.6 percent) was above aggregate performance (10.4 percent) and in 2023, the bank's lending (13.2 percent) was above aggregate performance (9.6 percent).

Small Business Loans

Small business lending to businesses of different sizes is adequate. In 2021, the bank made 78.8 percent of its small business loans to businesses with revenues of $1 million or less, which was below the percentage of total businesses with revenues of $1 million or less (92.5 percent). The bank's performance is above aggregate performance of 37.1 percent in 2021. However, 2021 was a year in which many banks extended PPP loans as a result of the COVID-19 pandemic and were not required to capture and report the revenue of the businesses, which is reflected in the aggregate data. As a result, performance context and loan size data were considered. In 2021, the bank made loans of less than $250,000 to businesses at a similar rate (95.5 percent) as aggregate lenders (95.8 percent). In 2022 and 2023, the bank made 56.0 percent of its small business loans to businesses with revenues of $1 million or less, which was below the percentage of total businesses with revenues of $1 million or less (92.7 percent). In 2022, bank lending (55.2 percent) was above aggregate performance (51.1 percent) and in 2023, the bank's lending (56.5 percent) was similar to aggregate performance (54.2 percent). Additionally, the majority of the bank's small business loans were originated in amounts of $250,000 or less, indicating a willingness to lend in the smaller amounts that are typically requested by small businesses.

CD Lending

The bank makes an excellent level of CD loans in the New Orleans AA. During the review period, the bank originated or renewed eight loans totaling $221.7 million in the AA. Specifically, the bank provided $210.0 million for the revitalization and stabilization of FEMA-declared designated disaster areas and $11.7 million in affordable housing to LMI individuals. This performance far exceeds the previous examination and performance of other banks in the area. Additionally, seven of the eight CD loans were deemed impactful and/or responsive to AA needs, as described below.

- Three loans totaling $210 million toward disaster recovery efforts in the aftermath of Hurricane Ida, which struck southeastern Louisiana as a Category 4 hurricane in August 2021. The loans were used to repair, renovate, reconstruct, and/or rebuild multiple structures throughout Jefferson and St. John the Baptist parishes, including schools and government buildings destroyed by the hurricane.

- One loan totaling $7.6 million for the construction of a 45-unit mixed-rate multifamily housing property in a moderate-income tract in the city of New Orleans. Of the 45 units, 36 of those units will be income-restricted for low-income residents. This is especially impactful and responsive given the affordable housing needs, opportunities, and challenges in New Orleans and the bulk of units being income-restricted to low-income families.

- Three LOCs totaling $950,000 to two nonprofit housing agencies for the creation of single-family housing in New Orleans. Both agencies build homes exclusively for LMI individuals and families in the city.

INVESTMENT TEST

The bank made a significant level of qualified CD investments and grants in the New Orleans AA, totaling $36.5 million. This amount included 5 current period investments totaling $21.3 million, 16 prior period investments still outstanding with a balance of $14.2 million, and 63 donations totaling $1.0 million.

Investment types varied and addressed a range of CD needs. These include deposits in CDFIs, SBIC funds to address small business financing needs, LIHTC projects to address affordable housing challenges, and MBS supporting LMI borrowers. The bank made significant use of innovative and/or complex investments to support CD initiatives. Additionally, the bank exhibits good responsiveness to CD needs.

Example of noteworthy investments and grants provided during the review period include:

- Two current period LIHTC projects totaling $17.4 million. These two LIHTC investments helped to build 115 new units of affordable housing for LMI individuals and families, which was responsive to the need for affordable housing in the AA.

- A $50,000 equity investment and $250,000 deposit in a CDFI focused on financing affordable housing and revitalization efforts.

- A $3.6 million current period SBIC allocation to finance a small business in the AA.

- Two donations totaling $15,000 to support a local nonprofit that redevelops vacant and abandoned properties to increase the supply of affordable housing in the AA.

- A $50,000 donation to a local nonprofit that provides support services and workforce development training to disabled veterans.

- Two donations totaling $300,000 to support a small business accelerator program that provides workshops and technical assistance to local entrepreneurs.

- Two donations totaling $50,000 to support disaster relief efforts in response to March 2022 tornado damage in the AA.

The New Orleans AA also positively benefited from $75,000 in donations benefiting a BSRA that includes the entire state of Louisiana. These donations were previously described under the *Investment Test* heading for the state of Louisiana.

SERVICE TEST

Retail banking services are adequate in New Orleans. Additionally, the bank provides a relatively high level of CD services in its AA.

Retail Banking Services

Retail delivery systems are reasonably accessible to the bank's geographies and individuals of different income levels throughout the New Orleans AA. In deriving this conclusion, the distribution of the bank's branches by census tract income level was compared to the distribution of households and businesses among the tract categories in the AA. As the following tables show, the bank operated branches and ATMs in all census tract categories in 2021 though the bank did not have any branches in low-income tracts after the U.S. Census changes took place in 2022. In 2023, the bank had nine branches in moderate-income tracts, or 36.0 percent of total branches, which was greater than both the percentage of households (27.5 percent) and businesses (22.5 percent) located in these tracts. There are some LMI tracts within the AA with limited access to bank branches, particularly in the Mid-City area as well as the 7th, 8th, and 9th Wards. However, it was determined that the retail service delivery systems are reasonably accessible given the bank's limited branch network across this AA overall.

The bank closed four branches during the review period and opened one branch in the New Orleans AA. The branch closed one branch in a moderate-income tract, two in middle-income tracts, and one in an upper-income tract. All of the branch closures were either a relocation or a consolidation with another nearby branch. The bank opened one new branch in a low-income tract in 2021, but the tract designation changed to middle-income with the U.S. Census changes in 2022. Overall, the branch opening and closings have not adversely affected the accessibility of the bank's delivery systems.

The hours of operation are consistent across all branches in the AA. Branch lobby and drive-through hours are 9 a.m. to 5 p.m. each weekday. The bank also offers Saturday lobby hours from 9:00 a.m. to noon in some of the branches in the AA, including branches located in moderate-income income tracts. The bank offers the same suite of products and services throughout the AA. Thus, hours and services do not vary in a way that inconveniences the AA, particularly LMI geographies and LMI individuals.

The tables below show the distribution of branches and ATMs along with households and businesses by tract category.

CD Services

The bank provides a relatively high level of CD services in the AA. During the review period, bank employees provided 188 CD service activities totaling 1,649 hours to 47 organizations operating throughout the AA. Bank staff provided their financial expertise in a variety of ways, including financial education, service on board of directors and other committees, and other technical assistance.

Noteworthy and responsive CD services in the AA include:

- Bank employees gave 1,058 hours of service on the board of directors for 11 different organizations engaged in work related to CD.
- Two of the bank's human resources associates worked with a nonprofit organization focused on achieving better outcomes for LMI families in New Orleans to provide 27 hours of training on the skills needed for successful employment.
- One bank employee gave 130 hours in board service for a nonprofit organization working on revitalization and home repairs for LMI homeowners in New Orleans.

- A senior bank executive provided 30 hours of service on the loan review committee of a nonprofit organization that provides access to government-sponsored financing programs for small businesses.

The New Orleans AA also positively benefited from 64 hours of CD service benefiting the BSRA that includes the entire state of Louisiana. These services were previously described under the CD services write up for the state.

METROPOLITAN AREAS
LIMITED-SCOPE REVIEW

The following MSA AAs were reviewed using limited-scope examination procedures. Through these procedures, conclusions regarding the institution's CRA performance are drawn from the review of available facts and data, including performance and demographic information. Please refer to the tables in *Appendices G and H* for additional information regarding these AAs.

DESCRIPTION OF INSTITUTION'S OPERATIONS IN LOUISIANA MSA AAs

MSA AA	AA Delineation/Parishes	# Branches *(as of 12/31/2023)*	Deposits ($000s) *(as of June 30, 2023)*
Alexandria	Rapides	3	$174,506
Baton Rouge	Ascension, East Baton Rouge, Livingston, Pointe Coupee, & West Baton Rouge	20	$1,833,351
Hammond	Tangipahoa	4	$230,561
Houma-Thibodaux	Lafourche & Terrebonne	5	$527,784
Lafayette	Iberia & Lafayette	4	$397,560
Monroe	Morehouse & Ouachita	4	$357,403
Shreveport-Bossier City	Bossier & Caddo	10	$1,036,438

CONCLUSIONS WITH RESPECT TO PERFORMANCE TESTS

The following table compares conclusions regarding performance in each limited-scope MSA AA to overall performance for the state of Louisiana.

Performance in the Limited-Scope Review Metropolitan Assessment Areas			
MSA AA	**Lending Test**	**Investment Test**	**Service Test**
Alexandria	Consistent	Not Consistent (Exceeds)	Not Consistent (Below)
Baton Rouge	Not Consistent (Below)	Not Consistent (Below)	Not Consistent (Below)
Hammond	Consistent	Not Consistent (Exceeds)	Consistent
Houma-Thibodaux	Consistent	Not Consistent (Below)	Not Consistent (Below)
Lafayette	Consistent	Not Consistent (Exceeds)	Not Consistent (Below)
Monroe	Consistent	Not Consistent (Exceeds)	Not Consistent (Below)
Shreveport-Bossier City	Not Consistent (Below)	Consistent	Not Consistent (Below)

The key performance standards of the Lending Test for limited-scope areas included geographic distribution, borrower distribution, and CD loans. For the geographic distribution of loans, performance was poor in Baton Rouge and adequate in the remaining AAs. Borrower distribution was good in Shreveport-Bossier City and adequate in the remaining AAs. Qualifying amounts and conclusions for CD loans were as follows: $9.1 million in Alexandria (excellent); $880,000 in Baton Rouge (low level); $25.5 million in Hammond (excellent);

$121 million in Houma-Thibodaux (excellent); $22.5 million in Lafayette (excellent); $22.8 million in Monroe (excellent); and $21.2 million in Shreveport-Bossier City (relatively high).

Qualifying amounts and conclusions for the bank's investment and grant activity in limited-scope MSA areas were as follows: $13.1 million in Alexandria (excellent level), $11.9 million in Baton Rouge (poor level), $30 million in Hammond (excellent level), $225,900 in Houma-Thibodaux (few, if any), $25.4 million in Lafayette (excellent level), $29.7 million in Monroe (excellent level), and $12.4 million in Shreveport-Bossier City (significant level).

The performance standards of the Service Test for limited-scope MSA areas included retail banking and CD services. Conclusions for retail banking services were as follows: poor in Alexandra and Houma-Thibodaux; adequate in Baton Rouge, Lafayette, Monroe, and Shreveport-Bossier City; and good in Hammond. Qualifying hours and conclusions for CD services were as follows: 218 hours in Alexandria (relatively high level); 1,474 hours in Baton Rouge (relatively high level); 238 hours in Hammond (relatively high level); 264 hours in Houma-Thibodaux (relatively high level); 153 hours in Lafayette (adequate level); 177 hours in Monroe (adequate level); 590 hours in Shreveport-Bossier City (relatively high level). All MSA AAs reviewed under limited-scope procedures also positively benefited from 64 hours of CD service benefiting the BSRA that includes the entire state of Louisiana. These services were previously described under the CD services write up for the state of Louisiana.

Performance in the limited-scope MSA AAs did not impact overall performance for the state.

NONMETROPOLITAN STATEWIDE AREAS
LIMITED-SCOPE REVIEW

The following non-MSA AAs were reviewed using limited-scope examination procedures. Through these procedures, conclusions regarding the institution's CRA performance are drawn from the review of available facts and data, including performance and demographic information. Please refer to the tables in *Appendices G and H* for additional information regarding these AAs.

DESCRIPTION OF INSTITUTION'S OPERATIONS IN LOUISIANA NON-MSA AAs

Non-MSA AA	AA Delineation/Parishes	# Branches *(as of 12/31/2023)*	Deposits ($000s) *(as of June 30, 2023)*
Northwest LA	Lincoln & Webster	4	$204,641
Southern LA	St. Mary	2	$84,713
West Carroll	West Carroll	1	$78,417

CONCLUSIONS WITH RESPECT TO PERFORMANCE TESTS

The following table compares conclusions regarding performance in each limited-scope non-MSA AA to overall performance for the state of Louisiana.

Performance in the Limited-Scope Review Non-MSA Assessment Areas			
Non-MSA AA	**Lending Test**	**Investment Test**	**Service Test**
Northwest LA	Not Consistent (Below)	Not Consistent (Below)	Not Consistent (Below)
Southern LA	Not Consistent (Below)	Not Consistent (Exceeds)	Not Consistent (Below)
West Carroll	Not Consistent (Below)	Not Consistent (Below)	Not Consistent (Below)

The key performance standards of the Lending Test for limited-scope areas included geographic distribution, borrower distribution, and CD loans. For the geographic distribution of loans and the borrower distribution of loans, performance was adequate in Northwest Louisiana, poor in Southern Louisiana, and not rated in West Carroll (due to an absence of volume sufficient to conduct an analysis). The bank did not make any qualifying CD loans in any of these AAs.

Qualifying amounts and conclusions for the bank's investment and grant activity in limited-scope non-MSA areas were as follows: $1.4 million in Northwest Louisiana (poor level), $4.2 million in Southern Louisiana (excellent level), and $176,200 in West Carroll (few, if any).

The performance standards of the Service Test for limited-scope non-MSA areas included retail banking and CD services. Retail banking services were adequate in all three non-MSA AAs. Qualifying hours and conclusions for CD services were as follows: 68 hours in Northwest Louisiana (poor level); 29 hours in Southern Louisiana (poor level); and 57 hours in West Carroll (relatively high level). All non-MSA AA reviewed under limited-scope procedures also positively benefited from 64 hours of CD service benefiting the BSRA that includes the entire state of Louisiana. These services were previously described under the CD services write up for the state of Louisiana.

Performance in the limited-scope non-MSA AAs did not impact overall performance for the state.

MISSISSIPPI

CRA RATING FOR MISSISSIPPI: SATISFACTORY

The Lending Test is rated: Low Satisfactory
The Investment Test is rated: Outstanding
The Service Test is rated: High Satisfactory

Major factors contributing to this rating include:

- The geographic distribution of loans reflects adequate penetration throughout Mississippi AAs.
- The distribution of borrowers reflects excellent penetration throughout Mississippi AAs.
- The bank made an adequate level of CD loans in Mississippi.
- The bank made an excellent level of qualified CD investments and grants in Mississippi.
- Retail banking services, which include accessibility of delivery systems, changes in branch locations, and reasonableness of hours and services, are good.
- The bank provides a relatively high level of CD service activities in Mississippi.

SCOPE OF EXAMINATION

A full-scope review was conducted for the following AA in Mississippi:

- Jackson

Limited-scope reviews were conducted for the remaining eight AAs:

- Adams
- Central Mississippi
- Gulfport
- Hattiesburg
- Northern Mississippi
- Northwest Mississippi
- Southern Mississippi
- Warren

The time period, products, and affiliates evaluated for these AAs are consistent with the scope discussed in the institution section of this report.

DESCRIPTION OF INSTITUTION'S OPERATIONS IN MISSISSIPPI

As of June 30, 2023, Regions had $8.2 billion in deposits in Mississippi, accounting for 6.4 percent of total deposits. Regions Bank operated 94 branch offices in Mississippi as of December 31, 2023, representing 7.4 percent of its total branches. HMDA-reportable lending in Mississippi accounted for 5.2 percent of total institutional HMDA-reportable lending by number of loans and 3.3 percent by dollar volume. Small business lending in Mississippi accounted for 4.9 percent of the bank's total small business lending by number of loans

and 4.5 percent by dollar volume. Overall, the bank's HMDA-reportable and small business lending activity in the state was less than the percentage of total institutional deposits.

The following table shows lending activity from January 1, 2021 through December 31, 2023.

CONCLUSIONS WITH RESPECT TO PERFORMANCE TESTS IN MISSISSIPPI

LENDING TEST

Overview

The Lending Test rating for the state of Mississippi is Low Satisfactory. The rating is a result of performance in each characteristic of the Lending Test applicable to the state, including Lending Activity (poor), Geographic Distribution (adequate), Borrower Distribution (excellent), and CD Lending (adequate). Highlights of each characteristic are found in the sections that follow, with additional descriptions and details within the full-scope AA of the state.

Lending Activity

Lending levels reflect poor responsiveness to the credit needs of Mississippi AAs. The total number and dollar volume of HMDA-reportable and small business loans was considered in arriving at Lending Activity conclusions, as well as competitive factors and the bank's overall importance to each AA. Statewide conclusions are derived from conclusions within each AA as detailed in the *Lending Activity* section of the Jackson AA.

Geographic and Borrower Distribution

The geographic distribution of HMDA-reportable and small business loans reflects adequate dispersion throughout the AAs of Mississippi, and the distribution of borrowers by customer income and revenue size of

businesses is excellent. The analyses of HMDA-reportable and small business lending within the full-scope AA are discussed in detail later in this report.

CD Lending

The bank made an adequate level of CD loans in Mississippi, driven by performance in the Jackson full-scope AA. During the review period, the bank originated or renewed $77.5 million in qualified CD loans directly benefiting Mississippi AAs. More information on CD loans can be found in the full-scope AA section of this report.

INVESTMENT TEST

The Investment Test rating for Mississippi is Outstanding.

The bank made an excellent level of qualified CD investments and grants in Mississippi, with $106 million in qualified investments and $1.4 million in qualified contributions directly benefiting its Mississippi AAs. The bank also received consideration at the state level for $904,000 in qualifying statewide contributions. This included $850,000 to a nonprofit which provides healthcare, educational, and social services for LMI youth across the state of Mississippi.

The bank made an excellent level of qualified investments and contributions in the Jackson full-scope AA. Additional details regarding specific investments and contributions can be found in the full-scope AA section of this report. The bank was responsive to the needs of its AAs in the state of Mississippi. Therefore, the bank also received consideration for $23.2 million in qualified investments within the state that benefited geographies outside of the bank's AAs. This amount included one current period LIHTC of $13 million and seven prior period LIHTCs totaling $10.2 million. The bank also received consideration for $10,500 in donations to a university outside its AAs that primarily serves LMI students.

SERVICE TEST

The Service Test rating for Mississippi is High Satisfactory.

Retail Services

Delivery systems are accessible to the bank's geographies and individuals of different income levels in Mississippi. As of December 31, 2023, Regions operated 94 branches in the state, including 12 branches in low-income tracts and 19 branches in moderate-income tracts, representing 33.3 percent of total statewide branches.

A full array of personal and business banking products and services is offered at all locations in Mississippi AAs. Across the state, branch hours do not vary in a way that inconveniences individual AAs. Most branches in the state offer lobby hours and drive-through hours beginning at 9 a.m. and closing at 4:30 p.m. Monday-Thursday, and until 5 p.m. on Friday. Regions offers branch lobby hours on Saturday from 9 a.m. to 12 p.m. in a limited number of branches across the state, and those hours are offered primarily at branches in middle-income tracts. Delivery systems include full-service ATMs at all branches in the state. In addition to those ATMs, the bank compliments its traditional service delivery methods with alternative delivery systems that provide increased access to banking services, as previously discussed in the *Institution, Retail Banking Services* section of this report.

During the review period, the bank closed 14 branches, including one branch in a low-income tract and four in moderate-income tracts. The bank closed six branches in middle-income tracts and three in upper-income tracts. The bank opened one branch in an upper-income tract. Changes to the bank's branch network in Mississippi generally did not adversely affect the accessibility of delivery systems, particularly to LMI geographies or LMI

individuals. Additional details on the bank's retail services can be found in the full-scope AA sections of this report.

CD Services

Regions provides a relatively high level of CD services in Mississippi. During the review period, staff engaged in 4.888 hours of qualifying CD service activities in the state. This total includes 4,514 hours directly benefiting individual AAs in Mississippi and 374 hours benefiting a BSRA that includes all of the AAs in state. The BSRA hours included 150 hours of board service for a statewide affordable housing association and 220 hours of service for a statewide nonprofit organization working with LMI youth across the state. Bank staff served on the board for this organization, as well as provided technical assistance through committee participation and teaching financial education to clients of the organization.

Additional details of service hours in Mississippi are described later in the report in the sections for the individual AAs they benefit.

METROPOLITAN AREA – JACKSON MSA
(Full-Scope Review)

DESCRIPTION OF INSTITUTION'S OPERATIONS IN THE JACKSON AA

Overview

The Jackson AA consists of the following five counties in the Jackson, MS MSA: Copiah, Hinds, Madison, Rankin, and Yazoo. As of December 31, 2023, the bank operated 28 branches in the AA, representing 29.8 percent of its branches in the state of Mississippi and 2.2 percent of its total branches. Of the branches in the AA, six are in low-income tracts, two are in moderate-income tracts, seven are in middle-income tracts, 11 are in upper-income tracts and two are in unknown-income tracts. As a percentage within the state of Mississippi, 43.2 percent of deposit dollar volume and 33.8 percent of HMDA-reportable and small business loans by number are located in the Jackson AA. As described, the Jackson AA is the bank's primary AA in the state of Mississippi.

The Jackson banking market is moderately competitive, with a presence of national and regional banks. There are 30 financial institutions operating 191 branch locations within the Jackson AA. Regions ranked 2nd in total deposits, holding 18.9 percent deposit market share with approximately $3.6 billion in total deposits. Trustmark National Bank holds the largest deposit market share in the Jackson AA with Bankplus ranked 3rd after Regions.

For HMDA-reportable lending, Regions originated or purchased 3.4 percent, 4.1 percent, and 4.6 percent of total HMDA-reportable loans in the AA in 2021, 2022 and 2023, respectively. Regions was ranked 7th out of 359 reporters in 2021; 5th out of 319 reporters in 2022; and 5th out of 296 reporters in 2023. Regions' ranking indicates that it is an important contributor for HMDA-reportable lending in the Jackson AA. Trustmark National Bank was the top HMDA reporter in the market for 2021, 2022 and 2023.

For small business lending, Regions ranked 8th out of 117 reporters in 2021 with 4.3 percent of small business loans. In 2022, the bank ranked 22nd out of 110 reporters with 1.0 percent of small business loans. In 2023, Regions ranked 14th out of 110 reporters with 1.5 percent of small business loans. Regions ranking indicates that it is an important contributor to small business lending in the Jackson AA. American Express was the top small business reporter in the market for 2021, 2022, and 2023.

AA Demographics, Population, and Income Characteristics

The Jackson AA had a population of 549,029 as of the 2020 Census, which was a slight decline of 0.1 percent since 2015. The most populous county with 227,742 people was Hinds, which is home to the city of Jackson. Hinds county realized the largest population decline in the AA, declining 7.4 percent from 2015-2020. The other large population centers are in neighboring Madison and Rankin counties, with a combined population of approximately 266,000 people. Madison County experienced the largest population growth between 2015 and 2020 with 8.9 percent, followed by Rankin County with 7.0 percent. This data indicates that population was stagnant during the review period, with slight increases in suburban counties offset by significant population decline in the urban center.

The Jackson AA contains 145 census tracts: 20 low-income census tracts (13.8 percent), 33 moderate-income census tracts (22.8 percent), 46 middle-income census tracts (31.7 percent), 44 upper-income census tracts (30.3 percent), and two tracts with unknown income levels (1.4 percent).

For purposes of classifying borrower income, this evaluation uses the FFIEC estimated median family income for the Jackson, MS MSA. As the following table shows, the median family income increased from $66,100 in 2021 to $76,800 in 2023.

Borrower Income Levels
Jackson, MS MSA

FFIEC Estimated Median Family Income		Low	Moderate	Middle	Upper
		0 - 49.99%	50% - 79.99%	80% - 119.99%	120% - & above
2021	**$66,100**	0 - $33,049	$33,050 - $52,879	$52,880 - $79,319	$79,320 - & above
2022	**$74,000**	0 - $36,999	$37,000 - $59,199	$59,200 - $88,799	$88,800 - & above
2023	**$76,800**	0 - $38,399	$38,400 - $61,439	$61,440 - $92,159	$92,160 - & above

There are 134,678 families in the AA, of which 22.0 percent are low-income, 15.9 percent are moderate-income, 19.2 percent are middle-income, and 42.9 percent are upper-income. Of the total families, 11.4 percent had incomes below the poverty level. The largest percentage of those families live in moderate-income tracts (32.9 percent) and low-income tracts (27.9 percent). Moreover, low-income families reside primarily in moderate-income tracts and moderate-income families reside primarily in middle-income tracts. The data indicates that lending challenges and opportunities exist for families residing in moderate- and middle-income tracts.

Housing Characteristics

There are approximately 231,809 housing units in the AA, of which 59.1 percent are owner-occupied, 28.8 percent are rental units, and 12.1 percent are vacant. As described, housing units in the AA are predominately owner-occupied, which indicates a variety of home lending opportunities available. However, fewer home lending opportunities exist in low-income tracts where only 29.3 percent of housing units are owner-occupied and 52.9 percent of units are rentals.

The median age of the housing stock in the AA is 42 years, which is older than that of homes in Mississippi (36 years). Housing units in the LMI census tracts are even older, with the median age of housing stock at 59 years in low-income tracts and 54 years in moderate-income tracts. The older age of homes is an indicator of potential opportunity for home improvement loans in LMI tracts.

The median housing value in the AA is $154,146, which is higher than the statewide median housing value in Mississippi ($125,500). Madison County has the highest median housing value at $224,300 and Yazoo County has the lowest median housing value at $88,600. Moreover, median gross rent in the AA ($901 per month) is higher than the statewide median gross rent in Mississippi ($789 per month). Rankin County has the highest median gross rent at $1,044 per month while Copiah County had the lowest median gross rent at $664 per month. Additionally, the affordability ratio of the AA (35.87 percent) is lower than the statewide affordability ratio of Mississippi (37.06 percent). Affordability varies throughout the AA, with Madison County having the lowest affordability ratio at 31.93 percent and Hinds County having the highest affordability ratio at 49.78 percent. Families that are housing cost-burdened are defined as renters or homeowners paying 30.0 percent or more of household income toward housing cost. Within the AA, the percentage of renters with rent costs greater than 30 percent of income (42.4 percent) is higher than the state of Mississippi at 39.7 percent. More specifically, renters are most cost burdened in Hinds County (45.1 percent), and Madison County (44.1 percent).

Overall, the data suggests that housing is expensive in the AA relative to the state of Mississippi and is not affordable, particularly in Hinds and Madison County, where the highest percentage of renters are cost-burdened.

Economic Conditions

The Jackson AA is in central Mississippi within the Jackson, MS MSA. Located within the AA is the city of Jackson, which is the state capital of Mississippi. Jackson has access to major interstates including Interstate 55, 20, and 59 as well as Highway 80 and 49.[44] Due to the proximity of these roadways, Jackson is located within a three- to four-hour drive to major cities including Memphis, Tennessee, New Orleans, Louisiana, and Birmingham, Alabama.[45] During the review period, the Jackson, MS MSA's gross domestic product (GDP) experienced consistent growth.[46] In 2021, GDP in the MSA was $31.9 billion and increased 8.7 percent to 34.7 billion in 2022.[47] From 2022 to 2023, GDP in the MSA increased 6.6 percent to $37 billion.

The Jackson metro area has a diverse economy that includes advanced manufacturing, health care, information technology, and food processing and distribution industries. The area has a presence of global companies including Nissan, Continental Tire, and International Paper.[48] Top employers in the Jackson MSA include the University of Mississippi Medical Center (with more than 10,000 employees), followed by Jackson Public School and Nissan North America, Inc.[49,50]

The following tables show the unemployment rate percentages for the Jackson AA, the counties in the AA, the MSA, and the state of Mississippi. As shown, unemployment rates in the AA were lower than unemployment rates for the state of Mississippi. The AA unemployment rate improved from 4.9 percent in 2021 to 2.8 percent in 2023 while the state's unemployment rate dropped from 5.4 percent in 2021 to 3.2 percent in 2023. Rankin County had the lowest unemployment rate in the AA during the review period while Yazoo County had the highest.

Credit and CD Needs

To better understand the local landscape, information from a recently conducted interview with an individual engaged in Jackson-area CD was referenced. This individual discussed the various needs and opportunities across the region as well as how financial institutions can be responsive to local CD needs.

The employment rate has recovered in most areas of the state since the COVID-19 pandemic, including multiple counties from the Jackson AA. However, according to the contact, the main issues affecting the Jackson area are inflation, supply chain disruptions, and a lack of work force availability. Revitalization and stabilization efforts in Hinds County such as the renovation, demolition, and rebuilding of rental properties are at a standstill because of the lack of funding opportunities, which could have a negative impact on the LMI population. In addition, the contact mentioned that there is a lack of financing opportunities in the area for small businesses. The contact suggested that banks increase the offerings of lending products including start-up loans, GAP financing and micro loans to these small businesses to accelerate CD efforts. Financing for first time LMI home buyers is another obstacle the Jackson area faces. The contact stated that LMI first time home buyers need more flexible lending opportunities including small dollar loans and relaxed underwriting criteria.

Overall, the contact believes that financial institutions within the AA could be more responsive to the credit needs of the community by creating more lending opportunities for CD projects that directly impact small businesses and LMI borrowers.

CONCLUSIONS WITH RESPECT TO PERFORMANCE TESTS IN THE JACKSON AA

LENDING TEST

Lending levels reflect poor responsiveness to credit needs of the AA. The geographic distribution of loans reflects adequate penetration throughout the AA and the distribution of loans reflects excellent penetration among borrowers of different income levels and businesses of different revenue sizes. In addition, the bank makes an adequate level of CD loans in the AA.

The analysis included 1,901 HMDA-reportable loans and 1,054 small business loans reported by the bank in the AA during the review period. With volumes of the two products putting the bank in the top 20 of all HMDA and small business reporters in the market, the products received similar weight in determining conclusions in the AA. Additionally, during 2021, 2022, and 2023, the bank originated or purchased 750 home refinance loans, 426 home purchase loans, and 438 home improvement loans in the AA. Thus, when considering HMDA-reportable loan categories, greatest weight was assigned to home refinance loans given its relative share of the total HMDA-reportable lending in this AA, followed by equal weight for home purchase and home improvement loans.

Details of the bank's mortgage and small business lending and information regarding lending by peers can be found in *Appendix F.*

Lending Activity

Lending activity is poor. Overall, 0.9 percent of HMDA-reportable loans and 2.3 percent of CRA small business loans were made in the AA. The percentage of the bank's HMDA-reportable and small business lending is well below the percentage of its area deposits. Regions is an important contributor to HMDA-reportable lending in the area. As previously noted, HMDA-reportable and small business lending are nearly equally weighted in this AA.

Geographic Distribution of Loans

The bank's geographic distribution of loans reflects adequate penetration throughout the AA. As described in the following sections, overall performance for HMDA-reportable lending is adequate and small business lending performance is adequate.

Home Refinance Loans

Home refinance lending in low-income tracts is adequate. In 2021, the bank made 1.6 percent of its home refinance loans in low-income tracts, which was below the percentage of owner-occupied units in these tracts (5.4 percent) but above aggregate performance of 0.7 percent. In 2022 and 2023, the bank made 3.0 percent of its home refinance loans in low-income tracts, which was below the percentage of owner-occupied units in these tracts (5.6 percent). In 2022, the bank's lending (3.1 percent) was similar to aggregate performance (3.4 percent) and in 2023, the bank's lending (2.8 percent) was similar to aggregate performance (2.9 percent).

Home refinance lending in moderate-income tracts is good. In 2021, the bank made 13.0 percent of its home refinance loans in moderate-income tracts, which was below the percentage of owner-occupied units in these tracts (18.1 percent) but more than double aggregate performance of 5.6 percent. In 2022 and 2023, the bank made 13.9 percent of its home refinance loans in moderate-income tracts, which was below the percentage of owner-occupied units in these tracts (15.3 percent). In 2022, the bank's lending (13.3 percent) was above aggregate performance (9.4 percent) and in 2023, the bank's lending (14.9 percent) was above aggregate performance (10.8 percent).

Home Purchase Loans

Home purchase lending in low-income tracts is good. In 2021, the bank made 3.3 percent of its home purchase loans in low-income tracts, which was below the percentage of owner-occupied units in these tracts (5.4 percent) but more than triple aggregate performance of 1.0 percent. Bank performance declined in 2022 and 2023, with the bank making 1.7 percent of its home purchase loans in low-income tracts, which was below the percentage of owner-occupied units in these tracts (5.6 percent). In 2022, the bank's lending (3.1 percent) was above aggregate performance (1.6 percent); however, the bank did not make any home purchase loans in low-income tracts in 2023.

Home purchase lending in moderate-income tracts is adequate. In 2021, the bank made 6.5 percent of its home purchase loans in moderate-income tracts, which was below the percentage of owner-occupied units in these tracts (18.1 percent) but similar to aggregate performance of 6.9 percent. In 2022 and 2023, the bank made 9.9 percent of its home purchase loans in moderate-income tracts, which was below the percentage of owner-occupied units in these tracts (15.3 percent). In 2022, the bank's lending (6.9 percent) was below aggregate performance (9.4 percent) and in 2023, the bank's lending (13.5 percent) was above aggregate performance (10.2 percent).

Home Improvement Loans

Home improvement lending in low-income tracts is poor. In 2021, the bank made 4.7 percent of its home improvement loans in low-income tracts, which was similar to the percentage of owner-occupied units in these tracts (5.4 percent) but below aggregate performance of 6.7 percent. Bank performance declined in 2022 and 2023, with the bank making 2.6 percent of its home improvement loans in low-income tracts, which was below the percentage of owner-occupied units in these tracts (5.6 percent). In 2022, the bank's lending (2.0 percent) was below aggregate performance (3.7 percent) and in 2023, the bank's lending (3.1 percent) was similar to aggregate performance (3.9 percent).

Home improvement lending in moderate-income tracts is poor. In 2021, the bank made 10.2 percent of its home improvement loans in moderate-income tracts, which was below the percentage of owner-occupied units in these tracts (18.1 percent) and aggregate performance of 21.3 percent. In 2022 and 2023, the bank made 9.3 percent of

its home improvement loans in moderate-income tracts, which was below the percentage of owner-occupied units in these tracts (15.3 percent). In 2022, the bank's lending (9.2 percent) was below aggregate performance (15.0 percent) and in 2023, the bank's lending (9.4 percent) was below aggregate performance (14.4 percent).

Small Business Loans

Small business lending in low-income tracts is adequate. In 2021, the bank made 9.5 percent of its small business loans in low-income tracts, which was above the percentage of total businesses located in these tracts (6.8 percent) and above aggregate performance of 5.9 percent. Bank performance declined in 2022 and 2023, with the bank making 5.7 percent of its small business loans in low-income tracts, which was below the percentage of total businesses located in these tracts (7.8 percent). In 2022, the bank's lending (6.6 percent) was similar to aggregate performance (5.8 percent) and in 2023, the bank's lending (4.9 percent) was similar to aggregate performance of 5.5 percent.

Small business lending in moderate-income tracts is good. In 2021, the bank made 20.8 percent of its small business loans in moderate-income tracts, which was similar to the percentage of total businesses located in these tracts (19.9 percent) and above aggregate performance of 17.2 percent. The bank's performance improved in 2022 and 2023, with the bank making 23.3 percent of its small business loans in moderate-income tracts, which was above the percentage of total businesses located in these tracts (19.5 percent). In 2022, the bank's lending (19.9 percent) was above aggregate performance (16.3 percent) and in 2023, the bank's lending (25.8 percent) was above aggregate performance of 15.3 percent.

No conspicuous lending gaps were identified based on an analysis of the dispersion of the loan products reviewed. The bank had activity in approximately 90 percent of all census tracts throughout the review period. Furthermore, lending data and maps did not indicate an absence of loans across LMI tracts.

Lending to Borrowers of Different Incomes and Businesses of Different Sizes

The distribution of borrowers based on customer income or gross annual revenues is excellent. As described in the following sections, performance for HMDA-reportable lending is excellent and small business lending performance is good.

Home Refinance Loans

Home refinance lending to low-income borrowers is excellent. In 2021, the bank made 9.6 percent of its home refinance loans to low-income borrowers, which was below the percentage of low-income families (22.5 percent) but more than double aggregate performance of 3.9 percent. Bank performance improved in 2022 and 2023, with the bank making 16.9 percent of its home refinance loans to low-income borrowers, which was below the percentage of low-income families (22.0 percent). In 2022, the bank's lending (16.4 percent) was more than double aggregate performance (6.9 percent) and in 2023, the bank's lending (17.7 percent) was again more than double aggregate performance (6.5 percent).

Home refinance lending to moderate-income borrowers is excellent. In 2021, the bank made 15.9 percent of its home refinance loans to moderate-income borrowers, which was similar to the percentage of moderate-income families (16.3 percent) and above aggregate performance of 9.9 percent. Bank performance improved in 2022 and 2023, with the bank making 25.1 percent of its home refinance loans to moderate-income borrowers, which was above the percentage of moderate-income families (15.9 percent). In 2022, the bank's lending (24.4 percent) was above aggregate performance (15.1 percent) and in 2023, the bank's lending (26.2 percent) was above aggregate performance (15.6 percent).

Home Purchase Loans

Home purchase lending to low-income borrowers is excellent. In 2021, the bank made 7.1 percent of its home purchase loans to low-income borrowers, which was below the percentage of low-income families (22.5 percent) but above aggregate performance of 4.9 percent. Bank performance improved in 2022 and 2023, with the bank making 9.1 percent of its home purchase loans to low-income borrowers, which was below the percentage of low-income families (22.0 percent). In 2022, the bank's lending (9.9 percent) was more than double aggregate performance (4.5 percent) and in 2023, the bank's lending (8.1 percent) was above aggregate performance (4.6 percent).

Home purchase lending to moderate-income borrowers is good. In 2021, the bank made 23.9 percent of its home purchase loans to moderate-income borrowers, which was above the percentage of moderate-income families (16.3 percent) and above aggregate performance of 18.1 percent. In 2022 and 2023, the bank made 21.1 percent of its home purchase loans to moderate-income borrowers, which was above the percentage of moderate-income families (15.9 percent). In 2022, the bank's lending (22.9 percent) was above aggregate performance (18.8 percent) and in 2023, the bank's lending (18.9 percent) was also above aggregate performance (16.8 percent).

Home Improvement Loans

Home improvement lending to low-income borrowers is excellent. In 2021, the bank made 6.3 percent of its home improvement loans to low-income borrowers, which was below the percentage of low-income families (22.5 percent) and similar to aggregate performance of 6.0 percent. In 2022 and 2023, the bank made 11.3 percent of its home improvement loans to low-income borrowers, which was below the percentage of low-income families (22.0 percent). In 2022, the bank's lending (10.5 percent) was above aggregate performance (7.8 percent) and in 2023, the bank's lending (11.9 percent) was more than double aggregate performance (5.0 percent).

Home improvement lending to moderate-income borrowers is excellent. In 2021, the bank made 14.2 percent of its home improvement loans to moderate-income borrowers, which was below the percentage of moderate-income families (16.3 percent) and above aggregate performance of 8.6 percent. Bank performance improved in 2022 and 2023, with the bank making 22.2 percent of its home improvement loans to moderate-income borrowers, which was above the percentage of moderate-income families (15.9 percent). In 2022, the bank's lending (22.4 percent) was above aggregate performance (13.0 percent) and in 2023, the bank's lending (22.0 percent) was above aggregate performance (13.1 percent).

Small Business Loans

Small business lending to businesses of different sizes is good. In 2021, the bank made 76.6 percent of its small business loans to businesses with revenues of $1 million or less, which was below the percentage of total businesses with revenues of $1 million or less (91.6 percent). The bank's performance is above aggregate performance of 35.6 percent in 2021. However, 2021 was a year in which many banks extended PPP loans as a result of the COVID-19 pandemic and were not required to capture and report the revenue of the businesses, which is reflected in the aggregate data. As a result, performance context and loan size data were considered. In 2021, the bank made loans of less than $250,000 to businesses at a similar rate (91.5 percent) as aggregate lenders (95.4 percent). In 2022 and 2023, the bank made 59.4 percent of its small business loans to businesses with revenues of $1 million or less, which was below the percentage of total businesses with revenues of $1 million or less (92.8 percent). In 2022, bank lending (58.1 percent) was above aggregate performance (47.6 percent) and in 2023, the bank's lending improved to 60.4 percent, which was also above aggregate performance (50.5 percent). The majority of the bank's small business loans were originated in amounts of $250,000 or less, indicating a willingness to lend in the smaller amounts that are typically requested by small businesses.

CD Lending

The bank makes an adequate level of CD loans in the Jackson AA. During the review period, the bank originated or renewed six qualified CD loans totaling $22.9 million in the AA. Specifically, the bank provided $21.4 million in affordable housing to LMI individuals and $1.6 million in community services benefiting LMI individuals.

While the dollar volume of CD loans is below performance of other banks in the area, the CD loans had qualitative features that were responsive to AA needs, including the need for affordable housing given the affordable housing challenges in the AA, as noted by community contacts. These qualitative factors contributed to the overall adequate conclusion for this AA.

The impactful loans directly benefiting the AA include:

- Two loans totaling $10.3 million for the renovation of 90 units of affordable housing. The renovations were completed on three different apartment complexes, all of which were income-restricted housing under HUD Section 8 contracts. Rents remained unchanged post-renovation and all tenants are low-income.

- One loan totaling $6.2 million for construction of apartments in the AA using LIHTCs, which are complex. The project was designed to create 54 new units of affordable housing for LMI individuals and/or families.

- One loan totaling $3.4 million for the construction of affordable apartments in the AA. The project created 120 new units of affordable housing and has income restrictions in place that meet HUD Section 8 housing guidelines. The apartment complex also prioritizes low-income individuals and those with HUD vouchers.
- One LOC totaling $1.5 million to a local nonprofit housing agency for the creation of affordable single-family housing in Jackson.

Additionally, the Jackson AA positively benefited from four loans with impact at the institution level, as previously described under the *CD Lending* heading for the institution. This includes three LOCs totaling $3 million to a nonprofit housing developer serving LMI families living in the gulf coast regions and one LOC totaling $5 million to a CDFI operating in Jackson and serving individuals in economically distressed parts of the Deep South. It is important to note that while the four LOCs have broader, institution-wide impact, affordable housing projects were identified and completed in the Jackson AA as a result of the LOCs to these organizations.

INVESTMENT TEST

The bank made an excellent level of qualified CD investments and grants in the Jackson AA totaling $62.3 million. This amount included seven current period investments totaling $54.3 million, eight prior period investments still outstanding with a balance of $7.4 million, and 81 donations totaling $638,300.

Investment types varied and addressed a range of CD needs. These include deposits in CDFIs, LIHTC projects to address affordable housing challenges, and MBS supporting LMI borrowers. The bank made extensive use of innovative and/or complex investments to support CD initiatives. Additionally, the bank exhibits excellent responsiveness to CD needs.

Examples of noteworthy investments and grants provided during the review period include:

- Seven current period LIHTC projects totaling $54.3 million. These seven LIHTC investments helped to build 491 new units of affordable housing for LMI individuals and families, which was responsive to the need for affordable housing in the AA as noted by community contacts.

- A $76,774 prior period equity investment in a CDFI that primarily serves LMI individuals and communities in the AA.

- Three donations totaling $30,000 to support a local nonprofit affordable housing organization.

- Two donations totaling $40,000 to support operations at a local hospital at where 85 percent of patients are LMI.

- Two donations totaling $20,000 to support downtown revitalization efforts in the AA.

The Jackson AA also positively benefited from $904,000 in contributions benefiting a BSRA that includes the Jackson AA. These investments and donations were previously described under the *Investment Test* heading for the state of Mississippi.

SERVICE TEST

As described, retail banking services are good in Jackson. Additionally, the bank provides a relatively high level of community development services in its assessment area.

Retail Banking Services

Retail service delivery systems are accessible to the bank's geographies and individuals of different income levels throughout the Jackson AA. In deriving this conclusion, the distribution of the bank's branches by census tract income level was compared to the distribution of households and businesses among the tract categories in the AA. As the following tables show, the bank operated branches and ATMs in all census tract categories throughout the review period, with 21.4 percent of branches in low-income tracts and 7.1 percent of branches in moderate-income tracts in 2023. The percentage of branches in low-income tracts is above the percentage of households (10.6 percent) and the percentage of businesses (7.8 percent) in those tracts. The percentage of branches in moderate-income tracts is less than the percentage of households (20.6 percent) and the percentage of businesses (19.5 percent) in those tracts.

It is important to note that two branches that were previously in tracts classified as moderate-income were reclassified as income-unknown with the census changes in 2022, which impacted the distribution of total bank branches across the tract income level. Additionally, the bank has several branches located in middle-income and upper-income tracts that are in close proximity to moderate-income tracts, which increases the accessibility of retail services for residents of these tracts. These factors were all considered when evaluating the accessibility of retail services.

The bank closed four branches during the review period and opened one limited-service branch in the Jackson AA. The branch consolidated one branch in a moderate-income tract without an ATM, into another nearby branch. The remaining branch closures were in upper-income tracts. Overall, the branch opening and closings have generally not adversely affected accessibility of the bank's delivery systems.

The hours of operation are consistent across all branches in the AA. Branch lobby and drive-through hours are 9 a.m. to 4:30 p.m. Monday through Thursday, and until 5:00 p.m. on Fridays. The bank offers Saturday lobby hours from 9:00 a.m. to noon in three branches in the AA, including one branch in a moderate-income income tract. As noted earlier, the bank offers very limited Saturday hours at branches across the state of Mississippi. The bank offers the same suite of products and services throughout the AA. Thus, hours and services do not vary in a way that inconveniences the AA, particularly LMI geographies and LMI individuals.

The tables below show the distribution of branches and ATMs along with households and businesses by tract category.

CD Services

The bank provides a relatively high level of CD services in the AA During the review period, bank employees provided 453 CD service activities totaling 1,941 hours to 56 organizations operating throughout the AA. Bank staff provided their financial expertise in a variety of ways, including financial education, service on boards of directors and other committees, and other technical assistance.

Noteworthy and responsive CD services in the Jackson AA include:

- Bank employees gave 487 hours of service on the board of directors for 14 different organizations engaged in work related to CD.
- Bank employees representing several different areas of the bank provided 11 hours of technical assistance to the leadership of several different business units at a regional CDFI, to help the CDFI build capacity in targeted areas.

- One bank employee provided five hours of technical assistance to a nonprofit affordable housing organization to help them prepare a grant application to the Federal Home Loan Bank, to support the construction of a new affordable housing project in Jackson.
- A senior bank executive provided 167 hours serving on the board and investment committee for a foundation focused on increasing college access and post-secondary training for LMI individuals.

The Jackson AA also positively benefited from 374 hours of CD service benefiting the BSRA that includes the entire state of Mississippi. These services were previously described under the CD services write up for the state.

METROPOLITAN AREAS
LIMITED-SCOPE REVIEW

The following MSA AAs were reviewed using limited-scope examination procedures. Through these procedures, conclusions regarding the institution's CRA performance are drawn from the review of available facts and data, including performance and demographic information. Please refer to the tables in *Appendices G and H* for additional information regarding these AAs.

DESCRIPTION OF INSTITUTION'S OPERATIONS IN MISSISSIPPI MSA AAs

MSA AA	AA Delineation/Counties	# Branches *(as of 12/31/2023)*	Deposits ($000s) *(as of June 30, 2023)*
Gulfport	Hancock, Harrison, & Jackson	7	$370,956
Hattiesburg	Covington, Forrest, & Lamar	8	$593,853

CONCLUSIONS WITH RESPECT TO PERFORMANCE TESTS

The following table compares conclusions regarding performance in each limited-scope MSA AA to overall performance for the state of Mississippi.

Performance in the Limited-Scope Review Metropolitan Assessment Areas			
MSA AA	**Lending Test**	**Investment Test**	**Service Test**
Gulfport	Consistent	Consistent	Not Consistent (Below)
Hattiesburg	Consistent	Not Consistent (Below)	Consistent

The key performance standards of the Lending Test for limited-scope areas included geographic distribution, borrower distribution, and CD loans. For the geographic distribution of loans, performance was adequate in both AAs. Borrower distribution was adequate in Gulfport and good in Hattiesburg. The bank made $8.4 million in CD loans in Gulfport (relatively high level) but made no CD loans in Hattiesburg.

Qualifying amounts and conclusions for the bank's investment and grant activity in limited-scope MSA areas were as follows: $10.5 million in Gulfport (excellent level) and $1.5 million in Hattiesburg (few, if any).

The performance standards of the Service Test for limited-scope MSA areas included retail banking and CD services. Conclusions for retail banking services were poor in Gulfport and good in Hattiesburg. Qualifying hours and conclusions for CD services were as follows: 286 hours in Gulfport (adequate level) and 337 hours in Hattiesburg (adequate level). All MSA AAs reviewed under limited-scope procedures also positively benefited from 374 hours of CD service benefiting the BSRA that includes the entire state of Mississippi. These services were previously described under the CD services write up for the state of Mississippi.

Performance in the limited-scope MSA AAs did not impact overall performance for the state.

NONMETROPOLITAN STATEWIDE AREAS
LIMITED-SCOPE REVIEW

The following non-MSA AAs were reviewed using limited-scope examination procedures. Through these procedures, conclusions regarding the institution's CRA performance are drawn from the review of available facts and data, including performance and demographic information. Please refer to the tables in *Appendices G and H* for additional information regarding these AAs.

DESCRIPTION OF INSTITUTION'S OPERATIONS IN MISSISSIPPI NON-MSA AAs

Non-MSA AA	AA Delineation/Counties	# Branches *(as of 12/31/2023)*	Deposits ($000s) *(as of June 30, 2023)*
Adams	Adams	3	$158,467
Central MS	Atalla, Choctaw, Clay, Lauderdale, Lowndes, Montgomery, Neshoba, Newton, Oktibbeha, Webster, & Winston	17	$1,037,820
Northern MS	Alcorn, Benton, Calhoun, Chickasaw, Grenada, Lafayette, Lee, Panola, Pontotoc, Tippah, & Union	13	$1,064,977
Northwest MS	Bolivar, Coahoma, Leflore, Tallahatchie, & Washington	8	$605,213
Southern MS	Jefferson Davis, Jones, Lawrence, Lincoln, Marion, Pearl River, & Pike	9	$613,355
Warren	Warren	1	$227,097

CONCLUSIONS WITH RESPECT TO PERFORMANCE TESTS

The following table compares conclusions regarding performance in each limited-scope non-MSA AA to overall performance for the state of Mississippi.

Performance in the Limited-Scope Review Non-MSA Assessment Areas			
Non-MSA AA	**Lending Test**	**Investment Test**	**Service Test**
Adams	Not Consistent (Below)	Not Consistent (Below)	Not Consistent (Below)
Central MS	Consistent	Not Consistent (Below)	Not Consistent (Below)
Northern MS	Consistent	Not Consistent (Below)	Consistent
Northwest MS	Consistent	Not Consistent (Below)	Consistent
Southern MS	Consistent	Not Consistent (Below)	Not Consistent (Below)
Warren	Not Consistent (Exceeds)	Not Consistent (Below)	Consistent

The key performance standards of the Lending Test for limited-scope areas included geographic distribution, borrower distribution, and CD loans. For the geographic distribution of loans, performance was poor in Adams and adequate in the remaining AAs. Borrower distribution was excellent in Warren, good in Central Mississippi and Southern Mississippi, and adequate in the remaining AAs. Qualifying amounts and conclusions for CD loans were as follows: $12.9 million in Central Mississippi (adequate); $7.1 million in Northern Mississippi (low level); $7.1 million in Northwest Mississippi (adequate); $1.2 million in Southern Mississippi (low level); and $18 million in Warren (excellent). The bank did not make any qualifying CD loans in the Adams AA.

Qualifying amounts and conclusions for the bank's investment and grant activity in limited-scope non-MSA areas were as follows: $109,200 in Adams (few, if any), $16.1 million in Central Mississippi (significant level), $8.2 million in Northern Mississippi (adequate level), $6 million in Northwest Mississippi (adequate level), $2.1 million in Southern Mississippi (few, if any), and $596,500 in Warren (few, if any).

The performance standards of the Service Test for limited-scope non-MSA areas included retail banking and CD services. Conclusions for retail banking services were as follows: good in Adams, Central MS, Northern Mississippi, Southern Mississippi and Warren; adequate in Northwest Mississippi. Qualifying hours and conclusions for CD services were as follows: 33 hours in Adams (poor level); 359 hours in Central Mississippi (poor level); 622 hours in Northern Mississippi (relatively high level); 610 hours in Northwest Mississippi (leaders); 59 hours in Southern Mississippi (poor level); and 267 hours in Warren (leader). All non-MSA AAs reviewed under limited-scope procedures also positively benefited from 374 hours of CD service benefiting the BSRA that includes the entire state of Mississippi. These services were previously described under the CD services write up for the state of Mississippi.

Performance in the limited-scope non-MSA AAs did not impact overall performance for the state.

TEXAS

CRA RATING FOR TEXAS: **SATISFACTORY**
The Lending Test is rated: **Low Satisfactory**
The Investment Test is rated: **Outstanding**
The Service Test is rated: **Low Satisfactory**

Major factors contributing to this rating include:

- The geographic distribution of loans reflects poor penetration throughout Texas AAs.
- The distribution of borrowers reflects adequate penetration throughout Texas AAs.
- The bank is a leader in making CD loans in Texas.
- The bank made an excellent level of qualified CD investments and grants in Texas.
- Retail banking services, which includes accessibility of delivery systems, changes in branch locations, and reasonableness of hours and services, are poor.
- The bank provides a relatively high level of CD service activities in Texas.

SCOPE OF EXAMINATION

A full-scope review was conducted for the following AA in Texas:

- Houston

Limited-scope reviews were conducted for the remaining seven AAs:

- Austin
- Cass
- Dallas
- Ft. Worth
- Longview
- Nacogdoches-Angelina-Anderson
- Tyler

The time period, products, and affiliates evaluated for these assessment areas are consistent with the scope discussed in the institution section of this report.

DESCRIPTION OF INSTITUTION'S OPERATIONS IN TEXAS

As of June 30, 2023, Regions Bank had $5.7 billion in deposits in Texas accounting for 4.4 percent of its total deposits. Regions Bank operated 89 branch offices in Texas as of December 31, 2023, representing 7.0 percent of its total branches. HMDA-reportable lending in Texas accounted for 3.4 percent of total institutional HMDA-reportable lending by number of loans and 7.8 percent by dollar volume. Small business lending in Texas accounted for 6.3 percent of the bank's total small business lending by number of loans and 6.5 percent by dollar

volume. Overall, the bank's HMDA-reportable and small business lending activity in the state was less than the percentage of total institutional deposits.

The following table shows lending activity from January 1, 2021 through December 31, 2023.

Statewide Summary of Lending Activity
Assessment Areas Located in: Texas
2021-2023

Originations & Purchases

CONCLUSIONS WITH RESPECT TO PERFORMANCE TESTS IN TEXAS

LENDING TEST

Overview

The Lending Test rating for the state of Texas is Low Satisfactory. The rating is a result of performance in each characteristic of the Lending Test applicable to the state, including Lending Activity (excellent), Geographic Distribution (poor), Borrower Distribution (adequate), and CD Lending (leader). Highlights of each characteristic are found in the sections that follow, with additional descriptions and details within the full-scope AA of the state.

Lending Activity

Lending levels reflect excellent responsiveness to the credit needs of Texas AAs. The total number and dollar volume of HMDA-reportable and small business loans was considered in arriving at Lending Activity conclusions, as well as competitive factors and the bank's overall importance to each AA. Statewide conclusions are derived from conclusions within each AA as detailed in the *Lending Activity* section of the Houston AA.

Geographic and Borrower Distribution

The geographic distribution of HMDA-reportable and small business loans reflects poor dispersion throughout the AAs in Texas due to conspicuous lending gaps identified in several AAs in Texas and the distribution of borrowers by customer income and revenue size of businesses is adequate. The analyses of HMDA-reportable and small business lending within the full-scope AA are discussed in detail later in this report.

CD Lending

The bank is a leader in making CD loans in Texas. During the review period, the bank originated or renewed $780 million in qualified CD loans directly benefiting Texas AAs. In addition, the bank received consideration at the state level for two CD loans totaling $45 million benefiting all AAs in Texas. One of the statewide loans was an LOC to a CDFI serving the distressed and underserved communities throughout the state of Texas and the second statewide loan was to a nonprofit health center providing affordable healthcare services to LMI individuals anywhere in the state. More information on CD loans can be found in the full-scope AA section of this report.

Regions was considered responsive to the CD needs of its AAs in the state. Therefore, the bank also received consideration for $86.6 million in qualified CD loans within the state but that did not benefit the bank's AAs, including $50.5 million for the creation of 373 new affordable housing units using LIHTCs and $18.8 million in SBA 504 loans.

INVESTMENT TEST

The Investment Test rating for Texas is Outstanding.

The bank made an excellent level of qualified CD investments and grants in Texas with $539.8 million in qualified investments and $2.4 million in qualified contributions directly benefiting its Texas AAs. In addition, the bank received consideration for $1.0 million in equity investments in a CDFI which serves rural and underserved areas throughout Texas. The bank also received consideration at the state level for $65,300 in qualifying statewide contributions. This included $50,000 to a CDFI which provides nontraditional financing and technical assistance to small businesses across the state.

The bank made an excellent level of qualified investments and contributions in the Houston full-scope AA. Additional details regarding specific investments and contributions can be found in the full-scope AA section of this report.

Regions was responsive to the needs of its AAs in the state of Texas. Therefore, the bank also received consideration for $95.9 million in qualified investments within the state that benefited geographies outside of the bank's AAs. This amount included six current period LIHTCs totaling $62.8 million, 13 prior period LIHTCs totaling $21.1 million, and two LMI MBS pools totaling $12.0 million. The bank also received consideration for $29,900 in donations outside the AA, including $25,000 to support charter school scholarships for LMI students.

SERVICE TEST

The Service Test rating for Texas is Low Satisfactory.

Retail Services

Delivery systems are unreasonably inaccessible to portions of the bank's geographies and individuals of different income levels in Texas. As of December 31, 2023, Regions operated 89 branches in the state, including 11 branches in low-income tracts and 13 branches in moderate-income tracts, representing 27.0 percent of total statewide branches. There were significant concentrations of LMI tracts in both the Houston and Dallas AAs with limited retail branching access; the accessibility of the bank's delivery systems in Houston is discussed in more detail later in this report.

A full array of personal and business banking products and services is offered at all locations in Texas AAs. Across the state, branch hours do not vary in a way that inconveniences individual AAs. Most branches in the state offer lobby hours and drive-through hours beginning at 9 a.m. and closing at 4:30 p.m. or 5 p.m. Monday through Friday. Regions offers branch lobby hours from 9 a.m. to 12 p.m. on Saturday in some branches across

the state, primarily concentrated in the Houston and Austin AAs. Delivery systems include full-service ATMs at all branches in the state. In addition to those ATMs, the bank compliments its traditional service delivery methods with alternative delivery systems that provide increased access to banking services, as previously discussed in the *Institution, Retail Banking Services* section of this report.

During the review period, the bank closed 13 branches, including three branches in moderate-income tracts, two in middle-income tracts and eight in upper-income tracts. The bank opened five branches, including one in a low-income tract and four in upper-income tracts. Changes to the bank's branch network in Texas generally did not adversely affect the accessibility of delivery systems, particularly to LMI geographies or LMI individuals. Additional details on the bank's retail services can be found in the full-scope AA sections of this report.

CD Services

Regions provides a relatively high level of CD services in Texas. During the review period, the bank engaged in 5,906 hours of qualifying CD service activities in Texas. This total includes 5,873 hours directly benefiting individual AAs in Texas and 33 hours benefiting a BSRA that includes all of the bank's AAs in Texas. These hours include representation on an advisory board for a statewide association focused on building capacity and developing resources for CD organizations.

Additional details of service hours in Texas are described later within each individual AA they benefit.

METROPOLITAN AREA – HOUSTON MSA
(Full-Scope Review)

DESCRIPTION OF INSTITUTION'S OPERATIONS IN THE HOUSTON AA

Overview

The Houston AA consists of the following five counties in the Houston-The Woodlands-Sugar Land, TX MSA: Brazoria, Fort Bend, Galveston, Harris, and Montgomery. As of December 31, 2023, the bank operated 48 branches in the AA, representing 53.9 percent of its branches in the state of Texas and 3.8 percent of its total branches. Of the branches in the AA, four are in low-income tracts, six are in moderate-income tracts, 12 are in middle-income tracts, 25 are in upper-income tracts, and one is in an unknown-income tract. As a percentage within the state of Texas, 36.9 percent of deposit dollar volume and 47.4 percent of HMDA- and small business loans by number are located in the Houston AA. As described, Houston is the bank's primary AA in the state of Texas.

The Houston banking market is highly competitive, with a large presence of national and multi-regional banks. There are 100 financial institutions operating 1,307 branch locations within the Houston AA. Regions ranked 17th in total deposits, holding 0.7 percent deposit market share with approximately $2.1 billion in total deposits. JPMorgan Chase Bank holds the largest deposit market share in the Houston AA followed by Wells Fargo Bank and Bank of America.

For HMDA-reportable lending, Regions originated or purchased 0.3 percent, 0.4 percent, and 0.4 percent of total HMDA-reportable loans in the AA in 2021, 2022 and 2023, respectively. Regions was ranked 71st out of 1,024 reporters in 2021; 63rd out of 1,026 reporters in 2022; and 59th out of 947 reporters in 2023. Given the highly competitive nature of lending in this AA, Regions' ranking indicates that it is an important contributor for HMDA-reportable lending in the Houston AA. Rocket Mortgage was the top HMDA reporter in the market for 2021 and 2022. United Wholesale Mortgage was the top HMDA reporter in the market for 2023.

For small business lending, Regions ranked 27th out of 331 reporters in 2021 with 0.4 percent of small business loans. In 2022, the bank ranked 65th out of 273 reporters with 0.1 percent of small business loans. In 2023, Regions ranked 28th out of 276 reporters with 0.3 percent of small business loans. Given the highly competitive nature of lending in this AA, Regions' ranking indicates that it is an important contributor for small business lending in the Houston AA. JPMorgan Chase Bank was the top CRA reporter in the market for 2021, 2022 and 2023.

AA Demographics, Population, and Income Characteristics

The Houston AA has a population of 6.9 million, having grown over 12.0 percent since 2015. As of 2023, the Houston-The Woodlands-Sugar Land, TX MSA was the 5th largest MSA in the U.S with a population over 7.5 million.[51] The most populous county with 4.7 million people is Harris County, which is home to the city of Houston. The other large population centers are in neighboring Fort Bend County and Montgomery County, with a combined population of approximately 1.4 million people. Fort Bend County experienced the largest population growth between 2015 and 2020 at 25.0 percent, followed by Montgomery County at 23.5 percent. This data indicates that population had consistent growth during the review period for the AA.

[51]"Population of the Largest Metropolitan Areas in the United States in 2024". *Statista*, www.statista.com/statistics/183600/population-of-metropolitan-areas-in-the-us/. Access 13 December 2024.

The Houston AA contains 1,562 census tracts: 215 low-income census tracts (13.8 percent), 385 moderate-income census tracts (24.6 percent), 408 middle-income census tracts (26.1 percent), 505 upper-income census tracts (32.3 percent), and 49 tracts with unknown income levels (3.1 percent).

For purposes of classifying borrower income, this evaluation uses the FFIEC estimated median family income for the relevant area. As the following table shows, the median family income increased from $79,800 in 2021 to $94,100 in 2023.

Borrower Income Levels
Houston-The Woodlands-Sugar Land, TX MSA

FFIEC Estimated Median Family Income		Low	Moderate	Middle	Upper
		0 - 49.99%	50% - 79.99%	80% - 119.99%	120% - & above
2021	**$79,800**	0 - $39,899	$39,900 - $63,839	$63,840 - $95,759	$95,760 - & above
2022	**$90,800**	0 - $45,399	$45,400 - $72,639	$72,640 - $108,959	$108,960 - & above
2023	**$94,100**	0 - $47,049	$47,050 - $75,279	$75,280 - $112,919	$112,920 - & above

There are 1,650,859 families in the AA, of which 23.6 percent are low-income, 16.6 percent are moderate-income, 17.8 percent are middle-income, and 42.0 percent are upper-income. Of the total families, 10.6 percent had incomes below the poverty level. The largest percentage of those families below the poverty level live in low-income tracts (30.8 percent) and moderate-income tracts (34.3 percent). The data indicates that lending challenges and opportunities exist in LMI tracts.

Housing Characteristics

There are approximately 2.6 million housing units in the AA, of which 55.0 percent are owner-occupied, 36.1 percent are rental units, and 8.9 percent are vacant. As described, housing units in the AA are predominately owner-occupied, which indicates a variety of home lending opportunities available within the AA. However, fewer home lending opportunities exist in low-income tracts, where only 24.2 percent of housing units are owner-occupied and 63.2 percent of units are rentals.

The median age of the housing stock in the AA is 36 years, which is older than that of homes in Texas overall (33 years). Housing units in the LMI census tracts were even older, with the median age of housing stock at 48 years for low-income tracts and 45 years for moderate-income tracts. The older age of homes is an indicator of potential opportunity for home improvement loans in LMI tracts.

The median housing value in the AA was $209,205, which is higher than the median housing value in Texas overall ($187,200). Fort Bend County had the highest median housing value at $277,600, while Harris County had the lowest median housing value at $189,400. Moreover, median gross rent in the AA ($1,140 per month) is higher than the median gross rent in Texas ($1,082 per month). As with median housing values, Fort Bend County had the highest median gross rent at $1,474 per month. Additionally, the affordability ratio of the AA (33.1 percent) is lower than the affordability ratio of Texas (34.1 percent). Affordability varied throughout the AA with Harris County having the lowest affordability ratio at 33.3 percent and Brazoria County having the highest at 39.1 percent. Families that are housing cost-burdened are defined as renters or homeowners paying 30.0 percent or more of household income toward housing cost. Within the AA, the percentage of renters with rent costs greater than 30 percent of income (44.6 percent) is higher than the state of Texas at 42.7 percent. Renters are most cost burdened in Harris County and Galveston County.

Overall, the data suggests that housing is expensive in the AA relative to the state of Texas and is generally not affordable, particularly in Harris County, and the percentage of cost-burdened families is higher in the AA than the state of Texas overall.

Economic Conditions

The AA includes the city of Houston, which is the largest city in the state of Texas. The Houston region is recognized as the "Energy Capital of the World" and is home to over 4,700 energy-related firms. Houston remains at the forefront of foreign investment in energy, particularly from Mexico. Twenty-four Fortune 500 companies are headquartered in the Houston region, including Chevron, ExxonMobil, Phillips 66, and Sysco. Houston ranks third among U.S. metro areas for most Fortune 500 headquarters.[52]

The largest employers in metro Houston include Memorial Hermann Healthcare System, UT MD Anderson Cancer Center, Walmart, ExxonMobil, and United Airlines.[53] According to the Bureau of Labor Statistics during the first quarter of 2023, the largest industries in the AA by number of employees include healthcare and social assistance (354,568), accommodation and food services (301,291), and professional and technical services (247,441).

The following tables show the unemployment rate percentages for the bank's Houston AA, the counties in the AA, the MSA, and the state of Texas. As shown, unemployment rates in the AAs were similar to unemployment rates for the state of Texas during the review period. The AA unemployment rate improved from 6.3 percent in 2021 to 4.2 percent in 2023 while the state's unemployment rate similarly dropped from 5.6 percent in 2021 to 4.0 percent in 2023. Montgomery County had the lowest unemployment rate in the AA during the review period while Brazoria County had the highest.

Credit and CD Needs

As part of the CRA examination, information from a recently conducted interview with a contact engaged in CD in the Houston area was referenced. According to the contact, inflation and the high interest rate environment have contributed to affordable housing challenges because inflated home prices are outpacing income levels. Additionally, the contact stated that many local nonprofits and affordable housing organizations that have traditionally provided housing at an affordable rate have been struggling over the past year with financing affordable housing efforts. It was also stated that investors are purchasing these properties and charging high rental rates, therefore, making it difficult for LMI individuals within the community to have access to affordable housing. To be responsive to the needs of the community, the contact mentioned that financial institutions can offer financing opportunities in the area for small businesses by opening more branches to increase access to banking services. Further, banks can also offer financing opportunities to first time home buyers such as downpayment assistance programs.

CONCLUSIONS WITH RESPECT TO PERFORMANCE TESTS IN THE HOUSTON AA

LENDING TEST

Lending levels reflect excellent responsiveness to credit needs of the AA. The geographic distribution of loans reflects poor penetration throughout the AA and the distribution of borrowers reflects adequate penetration among customers of different income levels and businesses of different revenue sizes. In addition, the bank is a leader in making CD loans in the Houston AA.

The analysis included 1,916 HMDA-reportable loans and 1,506 small business loans reported by the bank in the AA during the review period. With volumes of the two products being similar, they received equal weight in determining conclusions in the AA. Additionally, during 2021, 2022, and 2023, the bank originated or purchased 692 home purchase loans, 513 home refinance loans, and 384 home improvement loans in the AA. Thus, when considering HMDA-reportable loan categories, similar weight was assigned to home purchase loans and home refinance loans given their relative share of the total HMDA-reportable lending in this AA, followed by home improvement loans.

Details of the bank's mortgage and small business lending and information regarding lending by peers can be found in *Appendix F.*

Lending Activity

Lending activity is considered excellent. Overall, 3.2 percent of HMDA-reportable loans and 2.5 percent of small business loans were made in the AA. The percentage of the bank's HMDA-reportable and small business lending exceeds the percentage of its area deposits. In addition, the bank is an important contributor to HMDA-reportable lending in the area.

Geographic Distribution of Loans

The geographic distribution of loans reflects poor penetration throughout the AA. As described in the following sections, overall performance for HMDA-reportable lending is adequate and small business lending performance is good. However, the geographic distribution of loans analysis also includes reviewing groups of contiguous geographies that have no or low penetration relative to other geographies. This dispersion analysis revealed lower loan penetration in certain LMI areas relative to loan penetration in middle- and upper-income areas. Due to weaknesses noted in the dispersion of loans, the bank's overall geographic distribution of loans reflects poor performance.

Home Purchase Loans

Home purchase lending in low-income tracts is adequate. In 2021, the bank made 4.0 percent of its home purchase loans in low-income tracts, which was below the percentage of owner-occupied units in these tracts (5.4 percent) but similar to aggregate performance of 3.0 percent. In 2022 and 2023, the bank made 3.8 percent of its home purchase loans in low-income tracts, which was below the percentage of owner-occupied units in these tracts (5.1 percent). In 2022, the bank's lending (4.8 percent) was above aggregate performance (3.6 percent) and in 2023, the bank's lending (2.6 percent) was below aggregate performance (3.5 percent).

Home purchase lending in moderate-income tracts is adequate. In 2021, the bank made 22.0 percent of its home purchase loans in moderate-income tracts, which was similar to the percentage of owner-occupied units in these tracts (21.0 percent) and above aggregate performance of 13.9 percent. Bank performance declined in 2022 and 2023, with the bank making 14.6 percent of its home purchase loans in moderate-income tracts, which was below the percentage of owner-occupied units in these tracts (19.4 percent). In 2022, the bank's lending (15.0 percent) matched aggregate performance (15.0 percent) and in 2023, the bank's lending (14.1 percent) was below aggregate performance (15.3 percent).

Home Refinance Loans

Home refinance lending in low-income tracts is adequate. In 2021, the bank made 3.7 percent of its home refinance loans in low-income tracts, which was below the percentage of owner-occupied units in these tracts (5.4 percent) but above aggregate performance of 2.1 percent. In 2022 and 2023, the bank made 2.6 percent of its home refinance loans in low-income tracts, which was below the percentage of owner-occupied units in these tracts (5.1 percent). In 2022, the bank's lending (3.0 percent) was similar to aggregate performance (3.1 percent). However, in 2023, the bank made only one refinance loan in a low-income tract (1.8 percent), which was below aggregate performance (4.5 percent).

Home refinance lending in moderate-income tracts is adequate. In 2021, the bank made 10.6 percent of its home refinance loans in moderate-income tracts, which was below the percentage of owner-occupied units in these tracts (21.0 percent) but similar to aggregate performance of 10.1 percent. In 2022 and 2023, the bank made 13.1 percent of its home refinance loans in moderate-income tracts, which was below the percentage of owner-occupied units in these tracts (19.4 percent). In 2022, the bank's lending improved to 12.6 percent but was below aggregate performance (15.0 percent). Similarly, in 2023, the bank's lending improved to 14.3 percent but still fell short of aggregate performance (18.7 percent). While bank performance was below aggregate performance for two years, consideration was also given to the bank's improved performance throughout each year of the review period when deriving an overall adequate conclusion for home refinance lending in moderate-income tracts.

Home Improvement Loans

Home improvement lending in low-income tracts is adequate. In 2021, the bank made 3.8 percent of its home improvement loans in low-income tracts, which was below the percentage of owner-occupied units in these tracts (5.4 percent) but above aggregate performance of 2.5 percent. In 2022 and 2023, the bank made 2.5 percent of its home improvement loans in low-income tracts, which was below the percentage of owner-occupied units in these tracts (5.1 percent). In 2022, the bank's lending (1.8 percent) was below aggregate performance (2.9 percent) but in 2023, the bank's lending (3.4 percent) was above aggregate performance (2.4 percent).

Home improvement lending in moderate-income tracts is adequate. In 2021, the bank made 11.5 percent of its home improvement loans in moderate-income tracts, which was below the percentage of owner-occupied units in these tracts (21.0 percent) but similar to aggregate performance of 11.9 percent. In 2022 and 2023, the bank made 11.4 percent of its home improvement loans in moderate-income tracts, which was below the percentage of owner-occupied units in these tracts (19.4 percent). In 2022, the bank's lending (10.4 percent) was similar to aggregate

performance (11.0 percent) and in 2023, the bank's lending (12.9 percent) was above aggregate performance (11.5 percent).

Small Business Loans

Small business lending in low-income tracts is good. In 2021, the bank made 11.5 percent of its small business loans in low-income tracts, which was above the percentage of total businesses located in these tracts (9.9 percent) and above aggregate performance of 9.5 percent. In 2022 and 2023, the bank made 11.4 percent of its small business loans in low-income tracts, which was above the percentage of total businesses located in these tracts (8.8 percent). In 2022, the bank's lending (8.1 percent) was similar to aggregate performance (8.0 percent) and in 2023, the bank's lending (12.1 percent) was above aggregate performance of 7.5 percent.

Small business lending in moderate-income tracts is good. In 2021, the bank made 18.1 percent of its small business loans in moderate-income tracts, which was similar to the percentage of total businesses located in these tracts (18.9 percent) and aggregate performance of 18.2 percent . The bank's performance improved in 2022 and 2023, with the bank making 25.0 percent of its small business loans in moderate-income tracts, which was above the percentage of total businesses located in these tracts (19.7 percent). In 2022, the bank's lending (25.8 percent) was above aggregate performance (18.3 percent) and in 2023, the bank's lending (24.8 percent) was also above aggregate performance of 17.7 percent.

The dispersion analysis of HMDA-reportable loans and small business loans across the AA revealed conspicuous lending gaps, detracting from the bank's previously discussed geographic distribution performance. The following table and write up summarizes penetration levels by tract income.

Tract Income	TX Houston - 2021			TX Houston - 2022			TX Houston - 2023		
	# Tracts	Tracts w/ Loans	Penetration	# Tracts	Tracts w/ Loans	Penetration	# Tracts	Tracts w/ Loans	Penetration
LMI	460	200	43.5%	600	115	19.2%	600	179	29.8%
Middle	258	159	61.6%	408	130	31.9%	408	162	39.7%
Upper	312	238	76.3%	505	245	48.5%	505	262	51.9%
Unknown	9	0	0.0%	49	3	6.1%	49	8	16.3%
Total	**1,039**	**597**	**57.5%**	**1,562**	**493**	**31.6%**	**1,562**	**611**	**39.1%**

As shown in the previous table, based on reviews from both loan categories, the bank had loan activity in AA census tracts as follows: in 2021, loans in 597 of 1,039 census tracts (57.5 percent); in 2022, loans in 493 of 1,562 census tracts (31.6 percent); and in 2023, loans in 611 of 1,562 census tracts (39.1 percent). Focusing on LMI areas, the bank had loan activity as follows: in 2021, loans in 200 of 460 LMI census tracts (43.5 percent); in 2022, loans in 115 of 600 LMI census tracts (19.2 percent); and in 2023, loans in 179 of 600 LMI census tracts (29.8 percent). As described, each of the LMI penetration ratios (2021, 2022, and 2023) is below the overall penetration ratio for the same year. Additionally, each of the LMI penetration ratios (2021, 2022, and 2023) is below the penetration ratio of middle- and upper-income geographies for the same year.

This lower penetration level in LMI areas was identified in Harris County, particularly surrounding the city of Houston. Within or immediately adjacent to this area, the bank operated four branches that were surrounded by LMI geographies throughout the review period. However, few loans were made in the area during the review period. While this area contains lending performance context challenges including high levels of poverty, lending opportunities remain in the area, particularly homeownership opportunities as highlighted by community contacts.

Aggregate lenders originated over 12,000 HMDA-reportable loans and over 25,000 small business loans in this area during the combined 2022 and 2023 years. This data reflects viable home mortgage and small business lending opportunities persist, despite the challenges to making loans in this area.

The bank's lack of lending in proximity to the four branches serving the area represents a conspicuous lending gap in a large LMI area, adversely impacting the bank's overall performance under this Lending Test criterion. Despite an adequate level of HMDA-reportable loans and a good level of small business loans made in other LMI areas in the AA, the bank's overall geographic distribution of loans is poor when factoring in the conspicuous lending gaps.

Lending to Borrowers of Different Incomes and Businesses of Different Sizes

The distribution of borrowers based on customer income or gross annual revenues is adequate. As described in the following sections, overall performance for HMDA-reportable lending is adequate and small business lending performance is also adequate.

Home Purchase Loans

Home purchase lending to low-income borrowers is poor. In 2021, the bank made 1.5 percent of its home purchase loans to low-income borrowers, which was below the percentage of low-income families (24.4 percent) and aggregate performance of 2.3 percent. In 2022 and 2023, the bank made 2.1 percent of its home purchase loans to low-income borrowers, which was below the percentage of low-income families (23.6 percent). In 2022, the bank's lending (1.8 percent) was below aggregate performance (2.7 percent) and in 2023, the bank's lending (2.6 percent) was above aggregate performance (1.9 percent).

Home purchase lending to moderate-income borrowers is poor. In 2021, the bank made 10.6 percent of its home purchase loans to moderate-income borrowers, which was below the percentage of moderate-income families (16.0 percent) and aggregate performance of 14.0 percent. In 2022 and 2023, the bank made 13.8 percent of its home purchase loans to moderate-income borrowers, which was below the percentage of moderate-income families (16.6 percent). In 2022, the bank's lending (18.5 percent) was above aggregate performance (14.5 percent) but in 2023, the bank's lending declined to 8.3 percent and was below aggregate performance (12.6 percent).

Home Refinance Loans

Home refinance lending to low-income borrowers is good. In 2021, the bank made 3.7 percent of its home refinance loans to low-income borrowers, which was below the percentage of low-income families (24.4 percent) but above aggregate performance of 2.5 percent. Bank performance improved in 2022 and 2023, with the bank making 11.0 percent of its home refinance loans to low-income borrowers, which was below the percentage of low-income families (23.6 percent). In 2022, the bank's lending (11.9 percent) was above aggregate performance (7.0 percent) and in 2023, the bank's lending (8.9 percent) was above aggregate performance (6.9 percent).

Home refinance lending to moderate-income borrowers is adequate. In 2021, the bank made 13.7 percent of its home refinance loans to moderate-income borrowers, which was below the percentage of moderate-income families (16.0 percent) but above aggregate performance of 9.3 percent. In 2022 and 2023, the bank made 17.3 percent of its home refinance loans to moderate-income borrowers, which was similar to the percentage of moderate-income families (16.6 percent). In 2022, the bank's lending (17.0 percent) was similar to aggregate performance (16.8 percent) and in 2023, the bank's lending (17.9 percent) was above aggregate performance (15.4 percent).

Home Improvement Loans

Home improvement lending to low-income borrowers is adequate. In 2021, the bank made 8.7 percent of its home improvement loans to low-income borrowers, which was below the percentage of low-income families (24.4 percent) but double aggregate performance of 4.3 percent. In 2022 and 2023, the bank made 5.0 percent of its home improvement loans to low-income borrowers, which was below the percentage of low-income families (23.6 percent). In 2022, the bank's lending (6.1 percent) was similar to aggregate performance (5.3 percent) while in 2023, the bank's lending (3.4 percent) was below aggregate performance (4.7 percent).

Home improvement lending to moderate-income borrowers is adequate. In 2021, the bank made 11.5 percent of its home improvement loans to moderate-income borrowers, which was below the percentage of moderate-income families (16.0 percent) and above aggregate performance of 8.7 percent. In 2022 and 2023, the bank made 12.1 percent of its home improvement loans to moderate-income borrowers, which was below the percentage of moderate-income families (16.6 percent). In 2022, the bank's lending (14.0 percent) was above aggregate performance (11.2 percent) and in 2023, the bank's lending (9.5 percent) was below aggregate performance (11.4 percent).

Small Business Loans

Small business lending to businesses of different sizes is adequate. In 2021, the bank made 70.3 percent of its small business loans to businesses with revenues of $1 million or less, which was below the percentage of total businesses with revenues of $1 million or less (92.0 percent). The bank's performance is above aggregate performance of 42.3 percent in 2021. However, 2021 was a year in which many banks extended PPP loans as a result of the COVID-19 pandemic and were not required to capture and report the revenue of the businesses, which is reflected in the aggregate data. As a result, performance context and loan size data were considered. In 2021, the bank made loans of less than $250,000 to businesses at a similar rate (96.3 percent) as aggregate lenders (96.6 percent). In 2022 and 2023, the bank made 52.9 percent of its small business loans to businesses with revenues of $1 million or less, which was below the percentage of total businesses with revenues of $1 million or less (92.1 percent). In 2022, lending (55.6 percent) was above aggregate performance (50.1 percent) and in 2023, the bank's lending (52.2 percent) was similar to aggregate performance (53.1 percent). The majority of the bank's small business loans were originated in amounts of $250,000 or less, indicating a willingness to lend in the smaller amounts that are typically requested by small businesses.

CD Lending

The bank is a leader in making CD loans in the Houston AA. During the review period, the bank originated or renewed 25 qualified CD loans totaling $328.4 million in the AA. Specifically, the bank provided $303.4 million in affordable housing to LMI individuals, $24.1 million in economic development by financing small businesses, and $1.0 million in community services benefiting LMI individuals. Bank performance exceeds performance of other banks in the area. In addition, several of the qualifying CD loans were impactful and/or responsive to AA needs and are described below.

- Eight loans totaling $105.6 million for construction of apartments in the AA using LIHTCs, which are complex. The projects were designed to create 546 new units of affordable housing for LMI individuals and/or families. These loans are responsive given the affordable housing challenges and the need for additional affordable housing units in the AA, as noted by community contacts.

- Two loans totaling $84.1 million for constructing mixed-income multifamily properties with 830 new apartments. Of the total units, approximately 52 percent are set aside for LMI tenants, with 85 of the units set aside for recipients of vouchers under HUD Section 8.

- Five new SBA 504 loans totaling $20.1 million that provide financing to small businesses.

- One loan totaling $13.8 million for renovations to all 216 units of a multifamily property originally constructed using LIHTCs. Renovations were completed as "tenant-in-place", meaning that tenants were not displaced and could remain in the same complex during the renovations. All tenants of the property are low-income, and rents remain affordable under LIHTC criteria post-renovation.

- One LOC totaling $500,000 to a nonprofit organization for working capital. The LOC helped the nonprofit continue services towards its mission of providing food exclusively to low-income families in Houston.

The Houston AA also positively benefited from two LOCs totaling $9.5 million to a national CDFI with prioritization in nine AAs, including Houston. The CDFI LOCs were previously described under the *CD Lending* heading for the institution.

INVESTMENT TEST

The bank made an excellent level of qualified CD investments and grants in the Houston AA, totaling $154.7 million. This amount included 17 current period investments totaling $138.5 million, 10 prior period investments still outstanding with a balance of $15 million, and 102 donations totaling $1.2 million.

Investment types varied and addressed a range of CD needs. These include NMTC investments to stimulate economic development in LMI tracts, SBIC funds to address small business financing needs, LIHTC projects to address affordable housing challenges, and MBS supporting LMI borrowers. The bank made extensive use of innovative and/or complex investments to support CD initiatives. Additionally, the bank exhibits excellent responsiveness to CD needs.

Examples of noteworthy investments and grants provided during the review period include:

- Five current period LIHTC projects totaling $85.8 million. These five LIHTC investments helped to build 818 new units of affordable housing for LMI individuals and families, which was responsive to the need for affordable housing in the AA as noted by community contacts.

- Seven current period SBIC allocations totaling $5.6 million to finance small businesses in the AA.

- Four current period NMTC investments totaling $15.9 million. These NMTC investments helped to retain 149 jobs and create 21 new jobs in LMI tracts. Four contributions totaling $81,000 to support academic programs and student scholarships at a university that primarily educates LMI students.

- Seven contributions totaling $86,400 to a nonprofit that provides an array of social services to LMI families, including childcare, after-school and summer programs, and food for needy families.

- A $300,000 contribution to support a local public-private partnership aimed at revitalizing the AA's LMI neighborhoods.

The Houston AA also positively benefited from $1 million in investments and $65,300 in contributions benefiting a BSRA that includes the Houston AA. These investments and donations were previously described under the Investment Test heading for the state of Texas.

SERVICE TEST

Retail banking services are poor in Houston. Additionally, the bank provides a relatively high level of CD services in the AA.

Retail Banking Services

Retail service delivery systems are unreasonably inaccessible to portions of the bank's geographies and individuals of different income levels throughout the Houston AA. In deriving this conclusion, the distribution of the bank's branches by census tract income level was compared to the distribution of households and businesses among the tract categories in the AA. As the following tables show, the bank operated branches and ATMs in all census tract categories throughout the review period, with 8.3 percent of branches in low-income tracts and 12.5 percent of branches in moderate-income tracts in 2023. The percentage of branches in low-income tracts was less than the percentage of households (11.1 percent) and similar to the percentage of businesses (8.8 percent) in those tracts. The percentage of branches in moderate-income tracts was less than the percentage of households (23.4 percent) and the percentage of businesses (19.7 percent) in those tracts. There are concentrations of LMI tracts in the northern, western and southern portions of Harris County (where the city of Houston is located) that have limited access to retail branches. Branch accessibility in this market is a need discussed by a local community contact.

The bank closed eight branches during the review period that were all in middle- and upper-income tracts. As discussed earlier, the branch closures were guided by the bank's branch distribution planning process. The bank opened four branches during the review period, including one in a moderate-income tract. The remaining branch openings were in upper-income tracts. Overall, branch openings and closings have generally not adversely affected the accessibility of the bank's delivery systems.

Hours of operation are consistent across all branches in the AA. Branch lobby and drive-through hours are 9 a.m. to 5:00 p.m. Monday through Friday and the bank offers Saturday lobby hours from 9:00 a.m. to noon at most branches in the AA. The bank offers the same suite of products and services throughout the AA. Thus, hours and services do not vary in a way that inconveniences the AA, particularly LMI geographies and LMI individuals.

The tables below show the distribution of branches and ATMs along with households and businesses by tract category.

Based on 2023 FFIEC Census Data
Closed branches/ATMs are only included in "closed" columns and are not included in any other totals.
DTO - Drive thru only is a subset of total branches
SA = Stand Alone ATM is a subset of total ATMs

CD Services

The bank provides a relatively high level of CD services in the AA. During the review period, bank employees provided 464 CD service activities totaling 2,451 hours to 66 organizations operating throughout the AA. Bank staff provided their financial expertise in a variety of ways, including providing financial and homebuyer education, service on board of directors, and other technical assistance.

Noteworthy and responsive CD services in the Houston AA include:

- Bank employees gave 637 hours of service on the board of directors for nine different organizations engaged in work related to CD.
- One bank employee gave 129 hours in board service to a nonprofit Community Housing Development Organization that specializes in providing affordable housing and support services for women leaving abusive situations.
- Bank staff provided 276 hours of service to a nonprofit community organization that offers a variety of services to LMI individuals, including programs for children, food assistance, activities for seniors and a financial opportunity center. Bank staff served on the board, provided financial education to clients of the center, and offered other forms of technical assistance.
- Bank staff provided 189 hours of their financial expertise in a variety of capacities for a nonprofit that supports primarily minority-owned small businesses, including service on the board of directors, and providing technical support to small businesses served by the organization.

The Houston AA also positively benefited from 33 hours of CD service benefiting the BSRA that includes the entire state of Texas. These services were previously described under the CD services write up for the state.

METROPOLITAN AREAS
LIMITED-SCOPE REVIEW

The following MSA AAs were reviewed using limited-scope examination procedures. Through these procedures, conclusions regarding the institution's CRA performance are drawn from the review of available facts and data, including performance and demographic information. Please refer to the tables in *Appendices G and H* for additional information regarding these AAs.

DESCRIPTION OF INSTITUTION'S OPERATIONS IN TEXAS MSA AAs

MSA AA	AA Delineation/Counties	# Branches *(as of 12/31/2023)*	Deposits ($000s) *(as of June 30, 2023)*
Austin	Travis & Williamson	9	$670,249
Dallas	Collin, Dallas, Denton, & Rockwall	12	$1,670,661
Fort Worth	Tarrant	5	$422,561
Longview	Gregg	3	$156,584
Tyler	Smith	5	$249,560

CONCLUSIONS WITH RESPECT TO PERFORMANCE TESTS

The following table compares conclusions regarding performance in each limited-scope MSA AA to overall performance for the state of Texas.

Performance in the Limited-Scope Review Metropolitan Assessment Areas			
MSA AA	**Lending Test**	**Investment Test**	**Service Test**
Austin	Consistent	Consistent	Consistent
Dallas	Consistent	Consistent	Consistent
Fort Worth	Consistent	Consistent	Consistent
Longview	Not Consistent (Below)	Consistent	Not Consistent (Exceeds)
Tyler	Consistent	Consistent	Not Consistent (Exceeds)

The key performance standards of the Lending Test for limited-scope areas included geographic distribution, borrower distribution, and CD loans. For the geographic distribution of loans, performance was adequate in Longview and Tyler and poor in the remaining AAs. Borrower distribution was adequate in Longview and Tyler and poor in the remaining AAs. Qualifying amounts and conclusions for CD loans were as follows: $83.2 million in Austin (leader); $182 million in Dallas (leader); $181.5 million in Fort Worth (leader); and $4.9 million in Tyler (relatively high). The bank made no qualifying CD loans in the Longview AA.

Qualifying amounts and conclusions for the bank's investment and grant activity in limited-scope MSA areas were as follows: $103.9 million in Austin (excellent level), $166.6 million in Dallas (excellent level), $100 million in Fort Worth (excellent level), $5.2 million in Longview (excellent level), and $11 million in Tyler (excellent level).

The performance standards of the Service Test for limited-scope MSA areas included retail banking and CD services. Conclusions for retail banking services were as follows: adequate in Austin, Longview and Tyler and poor in Dallas and Fort Worth. Qualifying hours and conclusions for CD services were as follows: 477 hours in Austin (relatively high level); 1,306 hours in Dallas (leader); 244 hours in Fort Worth (relatively high level); 429 hours in Longview (leader); and 426 hours in Tyler (leader). All MSA AAs reviewed under limited-scope procedures also positively benefited from 33 hours of CD service benefiting the BSRA that includes the entire state of Texas. These services were previously described under the CD services write up for the state of Texas.

Performance in the limited-scope MSA AAs did not impact overall performance for the state.

NONMETROPOLITAN STATEWIDE AREAS
LIMITED-SCOPE REVIEW

The following non-MSA AAs were reviewed using limited-scope examination procedures. Through these procedures, conclusions regarding the institution's CRA performance are drawn from the review of available facts and data, including performance and demographic information. Please refer to the tables in *Appendices G and H* for additional information regarding these AAs.

DESCRIPTION OF INSTITUTION'S OPERATIONS IN TEXAS NON-MSA AAs

Non-MSA AA	AA Delineation/Counties	# Branches *(as of 12/31/2023)*	Deposits ($000s) *(as of June 30, 2023)*
Cass	Cass	1	$43,091
Nacogdoches-Angelina-Anderson	Anderson, Angelina, & Nacogdoches	6	$364,490

CONCLUSIONS WITH RESPECT TO PERFORMANCE TESTS

The following table compares conclusions regarding performance in each limited-scope non-MSA AA to overall performance for the state of Texas.

Performance in the Limited-Scope Review Non-MSA Assessment Areas			
Non-MSA AA	**Lending Test**	**Investment Test**	**Service Test**
Cass	Not Consistent (Below)	Not Consistent (Below)	Consistent
Nacogdoches-Angelina-Anderson	Not Consistent (Below)	Not Consistent (Below)	Not Consistent (Exceeds)

The key performance standards of the Lending Test for limited-scope areas included geographic distribution, borrower distribution, and CD loans. For the geographic and borrower distribution of loans, performance was adequate in Nacogdoches-Angelina-Anderson and not rated for Cass (due to an absence of volume sufficient to conduct an analysis). The bank did not make any qualifying CD loans in either of these AAs.

Qualifying amounts and conclusions for the bank's investment and grant activity in limited-scope non-MSA areas were as follows: $91,000 in Cass (few, if any) and $433,900 in Nacogdoches-Angelina-Anderson (few, if any).

The performance standards of the Service Test for limited-scope non-MSA areas included retail banking and CD services. Conclusions for retail banking services were as follows: adequate in Cass and good in Nacogdoches-Angelina-Anderson. Qualifying hours and conclusions for CD services were as follows: 14 hours in Cass (poor level) and 526 hours in Nacogdoches-Angelina-Anderson (leader). All non-MSA AAs reviewed under limited-scope procedures also positively benefited from 33 hours of CD service benefiting the BSRA that includes the entire state of Texas. These services were previously described under the CD services write up for the state of Texas.

Performance in the limited-scope non-MSA AAs did not impact overall performance for the state.

ARKANSAS

CRA RATING FOR ARKANSAS: SATISFACTORY
The Lending Test is rated: Low Satisfactory
The Investment Test is rated: High Satisfactory
The Service Test is rated: Low Satisfactory

Major factors contributing to this rating include:

- The geographic distribution of loans reflects adequate penetration throughout Arkansas AAs.
- The distribution of borrowers reflects good penetration throughout Arkansas AAs.
- The bank made a low level of CD loans in Arkansas.
- The bank made a significant level of qualified CD investments and grants in Arkansas.
- Retail banking services, which includes accessibility of delivery systems, changes in branch locations, and reasonableness of hours and services, are adequate.
- The bank provides an adequate level of CD service activities in Arkansas.

SCOPE OF EXAMINATION

A full-scope review was conducted for the following AA in Arkansas:

- Little Rock

Limited-scope reviews were conducted for the remaining eight AAs:

- Fayetteville
- Ft. Smith
- Hot Springs
- Jonesboro
- Northeast Arkansas
- Northwest Arkansas
- Southern Arkansas
- Union

The time period, products, and affiliates evaluated for these AAs are consistent with the scope discussed in the institution section of this report.

DESCRIPTION OF INSTITUTION'S OPERATIONS IN ARKANSAS

As of June 30, 2023, Regions Bank had $4.2 billion in deposits in Arkansas accounting for 3.3 percent of its total deposits. Regions Bank operated 52 branch offices in Arkansas as of December 31, 2023, representing 4.1 percent of its total branches. HMDA-reportable lending in Arkansas accounted for 3.7 percent of total institutional HMDA-reportable lending by number of loans and 3.1 percent by dollar volume. Small business lending in Arkansas accounted for 2.5 percent of the bank's total small business lending by number of loans and 3.1 percent

by dollar volume. Overall, the bank's HMDA-reportable and small business lending activity in the state was greater than the percentage of total institutional deposits.

The following table shows lending activity from January 1, 2021 through December 31, 2023.

Statewide Summary of Lending Activity
Assessment Areas Located in: Arkansas
2021-2023

CONCLUSIONS WITH RESPECT TO PERFORMANCE TESTS IN ARKANSAS

LENDING TEST

Overview

The Lending Test rating for the state of Arkansas is Low Satisfactory. The rating is a result of performance in each characteristic of the Lending Test applicable to the state, including Lending Activity (adequate), Geographic Distribution (adequate), Borrower Distribution (good), and CD Lending (low level). Highlights of each characteristic are found in the sections that follow, with additional descriptions and details within the full-scope AA of the state.

Lending Activity

Lending levels reflect adequate responsiveness to the credit needs of Arkansas AAs. The total number and dollar volume of HMDA-reportable and small business loans was considered in arriving at Lending Activity conclusions, as well as competitive factors and the bank's overall importance to each AA. Statewide conclusions are derived from conclusions within each AA as detailed in the *Lending Activity* section of the Little Rock AA.

Geographic and Borrower Distribution

The geographic distribution of HMDA-reportable and small business loans reflects adequate dispersion throughout Arkansas AAs and the distribution of loans by borrower income and revenue size of businesses is

good. The analyses of HMDA-reportable and small business lending within the full-scope AA are discussed in detail later in this report.

CD Lending

The bank made a low level of CD loans in Arkansas. During the review period, the bank originated or renewed $11.7 million in qualifying CD loans across its Arkansas AAs. More information on CD loans can be found in the full-scope AA section of this report. In addition, the bank received consideration at the state level for four CD loans totaling $9.2 million benefiting multiple areas of the state, including three LOCs totaling $9 million to a nonprofit community organization serving LMI individuals in Northwest Arkansas and one LOC totaling $150,000 to a nonprofit offering free legal services to low-income residents across Central Arkansas.

INVESTMENT TEST

The Investment Test rating for Arkansas is High Satisfactory.

The bank made a significant level of qualified CD investments and grants in Arkansas with $110.9 million in qualified investments and $378,300 in qualified contributions directly benefiting its Arkansas AAs. The bank also received consideration at the state level for $6,000 in qualifying statewide contributions to support tornado disaster relief.

The bank made a significant level of qualified investments and contributions in the Little Rock full-scope AA. Additional details regarding specific investments and contributions can be found in the full-scope AA section of this report.

The bank was responsive to the needs of its AAs in the state of Arkansas. Therefore, the bank also received consideration for $9.8 million in qualified investments within the state that benefited geographies outside of the bank's AAs. This amount was comprised of 12 prior period LIHTCS totaling $9.8 million.

SERVICE TEST

The Service Test rating for Arkansas is Low Satisfactory.

Retail Services

Delivery systems are reasonably accessible to the bank's geographies and individuals of different income levels in Arkansas. As of December 31, 2023, Regions operated 52 branches in the state, including one branch in a low-income tract and 11 branches in moderate-income tracts, representing 23.1 percent of total statewide branches.

A full array of personal and business banking products and services is offered at all locations in Arkansas AAs. Across the state, branch hours do not vary in a way that inconveniences individual AAs. Branches in the state offer lobby hours and drive-through hours beginning at 8:30 a.m. or 9 a.m. and closing between 4 p.m. and 5 p.m. Monday-Thursday, and all branches are open until 5 p.m. on Friday. Regions offers branch lobby hours from 9 a.m. to 12 p.m. on Saturday at approximately 15 branches across the state, including at three branches in moderate-income tracts. Delivery systems include full-service ATMs at most branches in the state. In addition to those ATMs, the bank compliments its traditional service delivery methods with alternative delivery systems that provide increased access to banking services, as previously discussed in the *Institution, Retail Banking Services* section of this report.

During the review period, the bank closed nine branches, including one branch in a low-income tract and one branch in a moderate-income tract. The bank closed four branches in middle-income tracts and three in upper-

income tracts. The bank did not open any branches in Arkansas during the review period. Changes to the bank's branch network in Arkansas did not generally adversely affect the accessibility of delivery systems, particularly to LMI geographies or LMI individuals.

Additional details on retail services can be found in the full-scope AA section of this report.

CD Services

Regions provides an adequate level of CD services in Arkansas. During the review period, the bank engaged in 2,582 hours of qualifying CD service activities benefiting the bank's AAs in Arkansas. Additional details of service hours are described later within each individual AA they benefit.

METROPOLITAN AREA – LITTLE ROCK MSA
(Full-Scope Review)

DESCRIPTION OF INSTITUTION'S OPERATIONS IN THE LITTLE ROCK AA

Overview

The Little Rock AA includes Faulkner, Grant, Lonoke, Pulaski, and Saline counties, which are five of the six counties that comprise the Little Rock-North Little Rock-Conway, Arkansas MSA. As of December 31, 2023, the bank operated 20 branches in the AA, representing 38.5 percent of its branches in the state of Arkansas and 1.6 percent of its total branches. Of the branches in the AA, one is in a low-income census tract, three are in moderate-income census tracts, seven are in middle-income census tracts, and nine are in upper-income census tracts. As a percentage within the state of Arkansas, 48.5 percent of the bank's deposit volume and 42.8 percent of its HMDA-reportable and small business loans by number are located in the Little Rock AA.

The Little Rock AA is a competitive banking market. As of June 30, 2023, there were 39 financial institutions operating 291 branch locations in the AA. Regions Bank ranked 7th with a deposit market share of 6.1 percent ($2.1 billion). Bank Ozk had the largest deposit market share at 23.1 percent, followed by Simmons Bank and Bank of America with 15.1 percent and 12.5 percent, respectively.

HMDA-reportable lending in the AA is similarly competitive. Regions originated and/or purchased 2.4 percent of HMDA-reportable loans in the AA in 2021, 2.2 percent in 2022, and 2.0 percent 2023. Regions ranked 15th out of 442 reporters in 2021, 12th out of 442 reporters in 2022; and 13th out of 401 reporters in 2023. Rocket Mortgage was the top HMDA reporter in the market in 2021. Arkansas Federal Credit Union was the top HMDA reporter in 2022 and 2023.

Small business lending is also competitive. Regions Bank ranked 14th out of 128 reporters in 2021 with 2.3 percent of reported loans. In 2022, the bank ranked 29th out of 131 reporters with 0.4 percent and in 2023, Regions Bank ranked 21st out of 113 reporters with 0.7 percent of reported loans. From 2021 through 2023, small business lending in the AA was primarily dominated by American Express, Arvest Bank, Centennial Bank, JP Morgan Chase Bank, and Capital One Bank.

AA Demographics, Population, and Income Characteristics

The AA population increased 1.5 percent from 2020 to 2023, reaching 738,012 residents in 2023.[54] The majority of people reside in Pulaski County, home to Little Rock, but Saline County was one of the fastest growing counties in the state, growing 5.0 percent between 2020 and 2023. During this same period, the state's population grew by 1.9 percent.[55]

In 2021, the AA contained 161 census tracts: 11 low-income tracts (6.8 percent), 38 moderate-income tracts (23.6 percent), 62 middle-income tracts (38.5 percent), 48 upper-income tracts (29.8 percent), and two unknown-income tracts (1.2 percent). In 2022 and 2023, a census tract remapping increased the total number of census tracts to 188: 16 low-income tracts (8.5 percent), 38 moderate-income tracts (20.2 percent), 84 middle-income tracts (44.7 percent), 48 upper-income tracts (25.5 percent), and two unknown-income tracts (1.1 percent).

[55] Ibid.

For purposes of classifying borrower income, this evaluation uses the FFIEC estimated median family income for the relevant area. As the following table shows, the median family income increased from $70,600 in 2021 to $83,100 in 2023.

Borrower Income Levels
Little-Rock-North Little Rock-Conway, AR MSA

FFIEC Estimated Median Family Income		Low	Moderate	Middle	Upper
		0 - 49.99%	50% - 79.99%	80% - 119.99%	120% - & above
2021	**$70,600**	0 - $35,299	$35,300 - $56,479	$56,480 - $84,719	$84,720 - & above
2022	**$79,000**	0 - $39,499	$39,500 - $63,199	$63,200 - $94,799	$94,800 - & above
2023	**$83,100**	0 - $41,549	$41,550 - $66,479	$66,480 - $99,719	$99,720 - & above

There are 180,957 total families in the AA. Of these families, 22.7 percent were low-income, 16.4 percent were moderate-income, 19.5 percent were middle-income, and 41.4 percent were upper-income. Poverty is a concern in the AA. Of the total families, 10.2 percent had incomes below the poverty level, which is lower than the families below poverty for the state of Arkansas (11.8 percent). Poverty rates are higher in LMI tracts, with 38.7 percent of the families residing in low-income tracts living below the poverty level and 14.8 percent of the families residing in moderate-income tracts living below the poverty level. Additionally, 25.6 percent of low-income families and 26.6 percent of moderate-income families reside in moderate-income tracts.

Housing Characteristics

There are 322,604 total housing units in the AA, of which 56.5 percent were owner-occupied, 32.2 percent were rental units, and 11.3 percent were vacant. However, fewer home ownership opportunities exist in LMI tracts. Specifically, 26.3 percent of all housing units in low-income tracts and 44.4 percent of all housing units in moderate-income tracts were owner-occupied.

The median age of the housing stock in the AA was 39 years, which is older than that in the statewide median in Arkansas (36 years). The median age of housing units in LMI census tracts was higher at 57 years in low-income tracts and 46 years in moderate-income tracts. The older age of homes is an indicator of potential opportunity for home improvement loans in LMI tracts.

The median housing value in the AA was $158,489, which is higher than the statewide median housing value in Arkansas ($133,600). Median gross rent in the AA was $854 per month, which was higher than the median gross rent in the state of Arkansas ($760 per month). Additionally, the affordability ratio of the AA (35.4 percent) is lower than the affordability ratio for the state of Arkansas (37.0 percent). Housing cost burden is a challenge in the AA. Data shows that the percentage of renters with rent costs greater than 30 percent of income is 42.2 percent, which is slightly higher than the state of Arkansas at 38.4 percent. This data suggests housing affordability challenges in the AA.

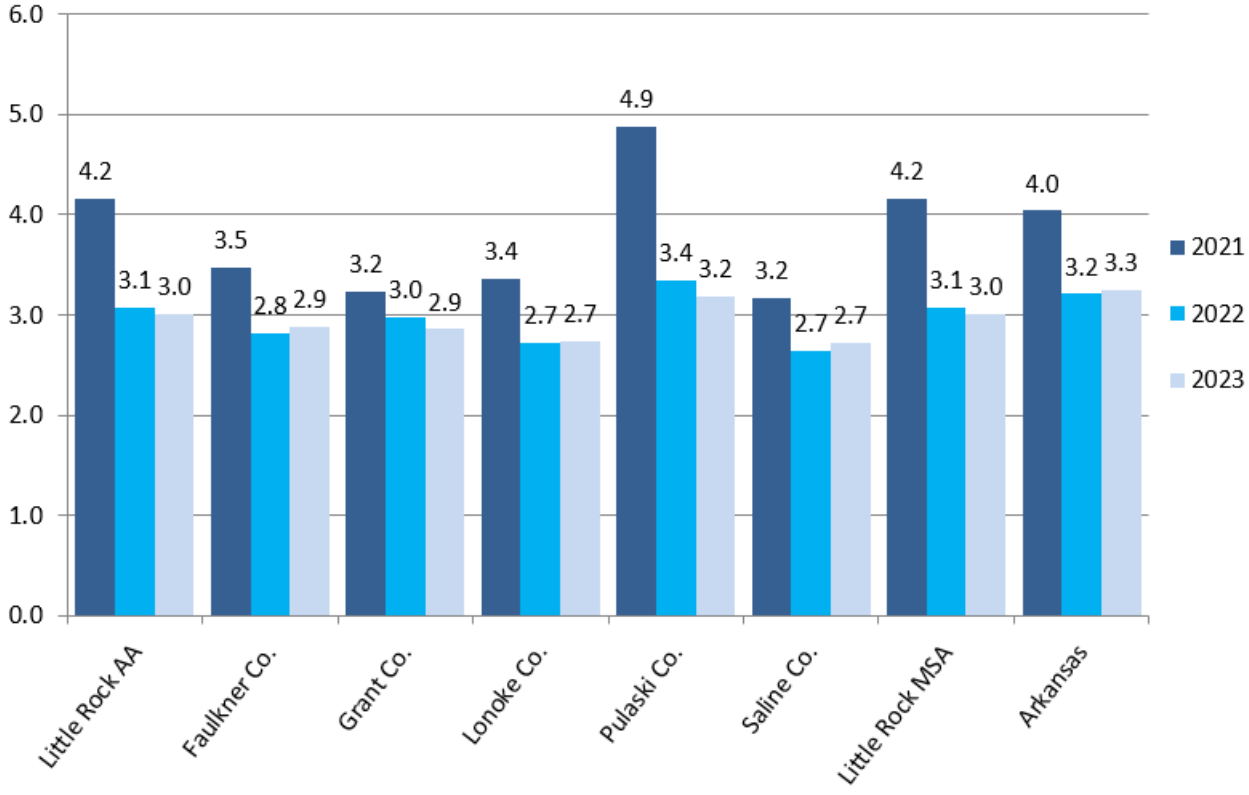
Economic Conditions

The AA is home to the city of Little Rock, which is the state capital of Arkansas and the state's most populous city. Little Rock is an economic engine and fuels much of the state's economic activity. The area has a diverse economy consisting of various sectors such as advanced manufacturing, aerospace, information technology,

healthcare, military, and nonprofit industries.[56] Little Rock has many major employers in the region. The federal, state, and local government are the largest employers in the region with 72,000 combined employees.[57] Outside the government sector, other major employers include the University of Arkansas for Medical Sciences, Baptist Health, Little Rock Air Force Base, Arkansas Children's Hospital, and the Little Rock School District.[58]

The following table shows the unemployment rate for the AA overall, the counties that comprise the AA, and the state of Arkansas for 2021, 2022, and 2023. The unemployment rate in the AA decreased from 4.2 percent in 2021 to 3.0 percent in 2023. The unemployment rate in the AA in 2021 was slightly higher at 4.2 percent than the state of Arkansas at 4.0 percent, with both rates decreasing in 2023.

Unemployment Rates - AR Little Rock



Not Seasonally Adjusted. Source: Bureau of Labor Statistics

Credit and CD Needs

To better understand the CD and economic landscapes, two CD experts were contacted. These individuals discussed the various opportunities and challenges across the region as well as how financial institutions can be responsive to local CD needs.

One community contact engaged in affordable housing indicated that Little Rock has a mild economy when compared to other places the contact has worked. It does not have an extremely high cost of living. Market rates are generally affordable. The contact also stated that the rent capacity is equivalent to what is seen in other areas

[56] "Explore Our Region." *Little Rock Regional Chamber*, https:// www.littlerockchamber.com/o/lrrc/page/explore-our-region?openSearch=true 5 Dec. 2024.
[57] "Major Employers in the Little Rock Region." *Little Rock Regional Chamber*, https:// www.littlerockchamberweb.com/major-employers/. 5 Dec. 2024.
[58] Ibid.

where rent has gone up. It was also mentioned that with this being a soft market, an increase in the rent comparatively is not as bad as in other places. The contact also described the general banking and credit needs of Saline and Grant counties, noting that there are a number of construction projects occurring with interest in affordable housing but noted that the amount of public funding is low.

The contact mentioned that the largest area industries are healthcare & social assistance, retail trade and educational services. The contact added that financial services is also a large industry in the area, especially in the more urban areas. There are also many financial support services in the area, specifically, FIS has an accelerator program centered around financial services that brings in companies from all over. The largest employers are the University of Arkansas system which has several campuses and a large medical facility in the area, followed by public and state government positions given Little Rock is the state capital, and school systems.

With regards to personal banking needs, the contact mentioned that for the most part the AA is well banked. There appears to be enough institutions to support small business and consumer needs. Most recent investment and banking presence has been in the newer parts of Little Rock. While there are plenty of banks, access is more concentrated in higher income areas. General banking products are available, however, beyond that the products aimed at LMI, first time home buyers, or small businesses are generally institution specific and more often offered by CDFIs rather than traditional financial institutions.

In discussing small business and economic development, the contact stated that economic development in the area is good. There are many economic development activities and organizations to support and help attract organizations to the area. Further, the area also has several accelerator programs to help launch and promote small businesses. Arkansas was recently named one of the best states to start a small business. The biggest barrier many businesses and the community face is the labor market. Workforce readiness and the level of education have been a persistent, ongoing issue in Arkansas. The top two issues are access to capital and workforce. SBDCs in the area help with some of the capital access hardship faced by many businesses that don't meet underwriting criteria of traditional financial institutions. There is also an SBA guarantee program utilized by many businesses that helps meet this need. While there is a large network of lenders in the area, low credit scores and collateral issues often make traditional loans difficult to obtain.

CONCLUSIONS WITH RESPECT TO PERFORMANCE TESTS IN THE LITTLE ROCK AA

LENDING TEST

Lending levels reflect adequate responsiveness to credit needs of the AA. The geographic distribution of loans reflects adequate penetration throughout the AA and the distribution of loans reflects good penetration among borrowers of different income levels and businesses of different revenue sizes. In addition, the bank made a low level of CD loans in the Little Rock AA.

The analysis included 1,818 HMDA-reportable loans and 629 CRA small business loans reported by the bank in the AA during the review period. Therefore, HMDA-reportable loans received greater weight in determining conclusions. Additionally, during 2021, 2022, and 2023, the bank originated or purchased 860 home purchase loans, 501 home refinance loans, and 303 home improvement loans in the AA. Thus, when considering HMDA-reportable loan categories, greatest weight was assigned to home purchase loans given its relative share of the total HMDA-reportable lending in this AA, followed by home refinance loans and, to a lesser extent, home improvement loans.

Details of the bank's mortgage and small business lending and information regarding lending by peers can be found in *Appendix F.*

Lending Activity

Lending activity is considered adequate. Overall, 1.5 percent of HMDA-reportable loans and 1.7 percent of small business loans were made in the AA. The percentage of the bank's HMDA-reportable and small business lending is consistent the percentage of its area deposits.

Geographic Distribution of Loans

The geographic distribution of loans reflects adequate penetration throughout the AA. As described in the following sections, overall performance for HMDA-reportable lending is adequate and small business lending performance is also adequate.

Home Purchase Loans

Home purchase lending in low-income tracts is adequate. In 2021, the bank made 2.9 percent of its home purchase loans in low-income tracts, which was similar to the percentage of owner-occupied units in these tracts (2.5 percent) and above aggregate performance of 1.5 percent. In 2022 and 2023, the bank made 3.4 percent of its home purchase loans in low-income tracts, which was similar to the percentage of owner-occupied units in these tracts (3.5 percent). In 2022, the bank's lending (3.9 percent) was similar to aggregate performance (3.5 percent) and in 2023, the bank's lending (2.7 percent) was below aggregate performance (4.4 percent).

Home purchase lending in moderate-income tracts is adequate. In 2021, the bank made 11.7 percent of its home purchase loans in moderate-income tracts, which was below the percentage of owner-occupied units in these tracts (16.4 percent) but similar to aggregate performance of 11.7 percent. In 2022 and 2023, the bank made 13.1 percent of its home purchase loans in moderate-income tracts, which was below the percentage of owner-occupied units in these tracts (14.6 percent). In 2022, the bank's lending (15.1 percent) was above aggregate performance (12.1 percent) and in 2023, the bank's lending (10.3 percent) was below aggregate performance (12.9 percent).

Home Refinance Loans

Home refinance lending in low-income tracts is good. In 2021, the bank made 1.2 percent of its home refinance loans in low-income tracts, which was below the percentage of owner-occupied units in these tracts (2.5 percent) but similar to aggregate performance of 0.9 percent. Bank performance improved in 2022 and 2023, with the bank making 3.5 percent of its home refinance loans in low-income tracts, which matched the percentage of owner-occupied units in these tracts (3.5 percent). In 2022, the bank's lending (1.9 percent) was similar to aggregate performance (2.7 percent) and in 2023, the bank's lending (6.1 percent) was nearly double aggregate performance (3.2 percent).

Home refinance lending in moderate-income tracts is adequate. In 2021, the bank made 10.3 percent of its home refinance loans in moderate-income tracts, which was below the percentage of owner-occupied units in these tracts (16.4 percent) but above aggregate performance of 9.0 percent. In 2022 and 2023, the bank made 13.5 percent of its home refinance loans in moderate-income tracts, which was below the percentage of owner-occupied units in these tracts (14.6 percent). In 2022, the bank's lending (13.5 percent) was above aggregate performance (12.3 percent) and in 2023, the bank's lending (13.6 percent) was similar to aggregate performance (12.7 percent).

Home Improvement Loans

Home improvement lending in low-income tracts is adequate. In 2021, the bank made 2.5 percent of its home improvement loans in low-income tracts, which matched the percentage of owner-occupied units in these tracts (2.5 percent) and was above aggregate performance of 1.5 percent. In 2022 and 2023, the bank made 2.7 percent of its home improvement loans in low-income tracts, which was similar to the percentage of owner-occupied units in these tracts (3.5 percent). In 2022, the bank's lending (3.2 percent) matched aggregate performance (3.2 percent) but in 2023, the bank's lending (1.7 percent) was below aggregate performance (4.1 percent).

Home improvement lending in moderate-income tracts is poor. In 2021, the bank made 11.7 percent of its home improvement loans in moderate-income tracts, which was below the percentage of owner-occupied units in these tracts (16.4 percent) but similar to aggregate performance of 12.0 percent. Bank performance declined in 2022 and 2023, with the bank making 9.8 percent of its home improvement loans in moderate-income tracts, which was below the percentage of owner-occupied units in these tracts (14.6 percent). In 2022, the bank's lending (9.7 percent) was below aggregate performance (12.3 percent) and in 2023, the bank's lending (10.2 percent) was below aggregate performance (15.3 percent).

Small Business Loans

Small business lending in low-income tracts is good. In 2021, the bank made 6.4 percent of its small business loans in low-income tracts, which was above the percentage of total businesses located in these tracts (4.9 percent) and above aggregate performance of 4.6 percent. In 2022 and 2023, the bank made 6.7 percent of its small business loans in low-income tracts, which was similar to the percentage of total businesses located in these tracts (7.0 percent). In 2022, the bank's lending (6.3 percent) was similar to aggregate performance (6.0 percent) and in 2023, the bank's lending (7.0 percent) was above aggregate performance of 5.6 percent.

Small business lending in moderate-income tracts is adequate. In 2021, the bank made 15.8 percent of its small business loans in moderate-income tracts, which was below the percentage of total businesses located in these tracts (20.8 percent) and below aggregate performance of 18.3 percent. The bank's performance improved in 2022 and 2023, with the bank making 20.2 percent of its small business loans in moderate-income tracts, which was similar to the percentage of total businesses located in these tracts (20.0 percent). In 2022, the bank's lending (24.1 percent) was above aggregate performance (17.6 percent) and in 2023, the bank's lending (17.5 percent) was similar to aggregate performance of 17.3 percent.

No conspicuous lending gaps were identified based on an analysis of the dispersion of the loan products reviewed. The bank had activity in approximately 87 percent of all census tracts throughout the review period. Furthermore, lending data and maps did not indicate an absence of loans across LMI tracts.

Lending to Borrowers of Different Incomes and Businesses of Different Sizes

The distribution of borrowers based on customer income or gross annual revenues is good. As described in the following sections, overall performance for HMDA-reportable lending is good while small business lending performance is adequate.

Home Purchase Loans

Home purchase lending to low-income borrowers is adequate. In 2021, the bank made 7.4 percent of its home purchase loans to low-income borrowers, which was below the percentage of low-income families (21.3 percent) but above aggregate performance of 6.2 percent. In 2022 and 2023, the bank made 6.3 percent of its home purchase loans to low-income borrowers, which was below the percentage of low-income families (22.7 percent). In 2022, the bank's lending (8.1 percent) was above aggregate performance (6.3 percent) while in 2023, the bank's lending (3.8 percent) was below aggregate performance (4.8 percent).

Home purchase lending to moderate-income borrowers is good. In 2021, the bank made 23.0 percent of its home purchase loans to moderate-income borrowers, which was above the percentage of moderate-income families (17.5 percent) and above aggregate performance of 18.8 percent. In 2022 and 2023, the bank made 19.9 percent of its home purchase loans to moderate-income borrowers, which was above the percentage of moderate-income families (16.4 percent). In 2022, the bank's lending (21.3 percent) was above aggregate performance (18.2 percent) and in 2023, the bank's lending (17.9 percent) was similar to aggregate performance (17.0 percent).

Home Refinance Loans

Home refinance lending to low-income borrowers is excellent. In 2021, the bank made 6.0 percent of its home refinance loans to low-income borrowers, which was below the percentage of low-income families (21.3 percent) but above aggregate performance of 4.2 percent. In 2022 and 2023, the bank made 12.9 percent of its home refinance loans to low-income borrowers, which was below the percentage of low-income families (22.7 percent). In 2022, the bank's lending (11.5 percent) was above aggregate performance (7.2 percent) and in 2023, the bank's lending (15.2 percent) was more than double aggregate performance (6.5 percent).

Home refinance lending to moderate-income borrowers is good. In 2021, the bank made 18.1 percent of its home refinance loans to moderate-income borrowers, which was similar to the percentage of moderate-income families (17.5 percent) and above aggregate performance of 12.1 percent. In 2022 and 2023, the bank made 26.5 percent of its home refinance loans to moderate-income borrowers, which was above the percentage of moderate-income families (16.4 percent). In 2022, the bank's lending (34.6 percent) was above aggregate performance (18.7 percent) while in 2023, the bank's lending (13.6 percent) was below aggregate performance (17.3 percent).

Home Improvement Loans

Home improvement lending to low-income borrowers is adequate. In 2021, the bank made 5.8 percent of its home improvement loans to low-income borrowers, which was below the percentage of low-income families (21.3 percent) but similar to aggregate performance of 5.2 percent. In 2022 and 2023, the bank made 9.3 percent of its home improvement loans to low-income borrowers, which was below the percentage of low-income families (22.7 percent). In 2022, the bank's lending (10.5 percent) was above aggregate performance (6.7 percent) and in 2023, the bank's lending (6.8 percent) was nearly identical to aggregate performance (6.7 percent).

Home improvement lending to moderate-income borrowers is excellent. In 2021, the bank made 22.5 percent of its home improvement loans to moderate-income borrowers, which was above the percentage of moderate-income families (17.5 percent) and above aggregate performance of 14.0 percent. In 2022 and 2023, the bank made 19.1 percent of its home improvement loans to moderate-income borrowers, which was above the percentage of moderate-income families (16.4 percent). In 2022, the bank's lending (19.4 percent) was above aggregate performance (14.7 percent) and in 2023, the bank's lending (18.6 percent) was above aggregate performance (14.6 percent).

Small Business Loans

Small business lending to businesses of different sizes is adequate. In 2021, the bank made 74.5 percent of its small business loans to businesses with revenues of $1 million or less, which was below the percentage of total businesses with revenues of $1 million or less (91.1 percent). The bank's performance is above aggregate performance of 42.0 percent in 2021. However, 2021 was a year in which many banks extended PPP loans as a result of the COVID-19 pandemic and were not required to capture and report the revenue of the businesses, which is reflected in the aggregate data. As a result, performance context and loan size data were considered. In 2021, the bank made loans of less than $250,000 to businesses at a similar rate (91.1 percent) as aggregate lenders (95.2 percent). In 2022 and 2023, the bank made 49.7 percent of its small business loans to businesses with revenues of $1 million or less, which was below the percentage of total businesses with revenues of $1 million or less (91.3 percent). In 2022, bank lending (54.4 percent) was above aggregate performance (52.1 percent) while

in 2023, the bank's lending (46.5 percent) was below aggregate performance (51.9 percent). The majority of the bank's small business loans were originated in amounts of $250,000 or less, indicating a willingness to lend in the smaller amounts that are typically requested by small businesses.

CD Lending

The bank makes a low level of CD loans in the Little Rock AA. During the review period, the bank originated or renewed three qualified CD loans totaling $9.7 million in the AA. Specifically, the bank provided $9.7 million in affordable housing to LMI individuals and $27,000 in community services benefiting LMI individuals. The AA also benefits from a $150,000 LOC to a nonprofit serving Central Arkansas, which includes the Little Rock AA. This LOC was previously described under the *CD Lending* heading for the state of Arkansas.

The most impactful loans in this area were to fund a housing project in Cabot using LIHTCs. The LIHTC development created 64 new apartment units of affordable housing for LMI individuals and/or families. While the two LIHTC loans are impactful, the remaining loan demonstrates limited responsiveness to the area, and the bank's current lending by number of loans and dollar volume is below peers in this area.

INVESTMENT TEST

The bank made a significant level of qualified CD investments and grants in the Little Rock AA totaling $59 million. This amount included three current period investments totaling $49.8 million, 18 prior period investments totaling $8.9 million, and 43 donations totaling $203,700.

Investment types varied and addressed a range of CD needs. These include LIHTC projects to address affordable housing challenges, MBS supporting LMI borrowers, and Commercial MBS secured by multifamily affordable housing. The bank made occasional use of innovative and/or complex investments to support CD initiatives. Additionally, the bank exhibits good responsiveness to CD needs.

Examples of noteworthy investments and grants provided during the review period include:

- An $11.4 current period LIHTC project. This LIHTC investment helped to build 64 new units of affordable housing for LMI individuals and families, which was responsive to the need for affordable housing in the AA.
- A $33.8 million current period Commercial MBS secured by a multifamily property which provides 384 units of affordable housing.
- Four donations totaling $26,000 to a nonprofit affordable housing organization.
- Three donations totaling $21,000 to an organization that provides counseling and healthcare to LMI youth and adults.
- Three donations totaling $12,500 to support an organization which provides free technical assistance services to early-stage small businesses.
- Two donations totaling $20,000 to support tornado disaster recovery efforts.

The Little Rock AA also positively benefited from $6,000 in contributions benefiting a BSRA that includes the Little Rock AA. These investments and donations were previously described under the *Investment Test* heading for the state of Arkansas.

SERVICE TEST

Retail banking services are adequate in Little Rock. Additionally, the bank provides an adequate level of CD services in its AA.

Retail Banking Services

Retail service delivery systems are reasonably accessible to the bank's geographies and individuals of different income levels throughout the Little Rock AA. In deriving this conclusion, the distribution of the bank's branches by census tract income level was compared to the distribution of households and businesses among the tract categories in the AA. As the following tables show, the bank operated branches and ATMs in all census tract categories throughout the review period, with 5.0 percent of branches in low-income tracts and 15.0 percent of branches in moderate-income tracts in 2023. The percentage of branches in low-income tracts is below the percentage of households (6.6 percent) and the percentage of businesses (7.0 percent) in those tracts. The percentage of branches in moderate-income tracts is below the percentage of households (19.1 percent) and the percentage of businesses (20.0 percent) in those tracts.

While the bank has a limited number of branches in LMI tracts in the Little Rock AA, it has maintained a bank branch in a moderate-income tract at the intersection of Baseline Road and Geyer Springs Road, which is in the southwest corner of Pulaski County. This is a commercial area that has seen a decline in bank branches, so the Regions branch provides important access to retail services in this area, which was a factor considered when assessing the accessibility of the bank's delivery systems.

The bank closed three branches during the review period in the Little Rock AA, including one in a low-income census tract, one in a middle-income tract, and one in an upper-income tract. The branch that was closed in the low-income tract was consolidated into another branch in a moderate-income tract. Overall, the branch opening and closings have generally not adversely affected the accessibility of the bank's delivery systems.

The hours of operation are consistent across all branches in the AA. Branch lobby most branches are 9 a.m. to 4 p.m. or 4:30 p.m. Monday through Thursday, and until 5:00 p.m. on Fridays. At a number of branches, the bank has longer hours for drive-through services, starting at 8:30 a.m. and closing at 5 p.m. each weekday. The bank offers Saturday lobby hours from 9:00 a.m. to noon in 8 branches in the AA, including two branches in moderate-income income tracts. The bank offers the same suite of products and services throughout the AA. Thus, hours and services do not vary in a way that inconveniences the AA, particularly LMI geographies and LMI individuals.

The tables below show the distribution of branches and ATMs along with households and businesses by tract category.

Geographic Distribution of Branches & ATMS 2021
Assessment Area: AR Little Rock

CD Services

The bank provides an adequate level of CD services in the AA. During the review period, bank employees provided 335 CD service activities totaling 1,286 hours to 40 organizations operating throughout the AA. Bank staff provided their financial expertise in a variety of ways, but the majority of the banks qualified CD service hours were proving financial education to youth and adults.

Noteworthy and responsive CD services in the Little Rock AA include:

- 152 hours of service on the board of directors of nonprofit organizations that provide a range of community services targeting LMI individuals.
- One staff member provided 18 hours of service on the board of directors for a business council that primarily supports small businesses.
- One staff member provided 68 hours of service on the board for directors for a nonprofit affordable housing organization focused on developing homeownership opportunities for LMI individuals

METROPOLITAN AREAS
LIMITED-SCOPE REVIEW

The following MSA AAs were reviewed using limited-scope examination procedures. Through these procedures, conclusions regarding the institution's CRA performance are drawn from the review of available facts and data, including performance and demographic information. Please refer to the tables in *Appendices G and H* for additional information regarding these AAs.

DESCRIPTION OF INSTITUTION'S OPERATIONS IN ARKANSAS MSA AAs

MSA AA	AA Delineation/Counties	# Branches *(as of 12/31/2023)*	Deposits ($000s) *(as of June 30, 2023)*
Fayetteville	Benton & Washington	4	$299,156
Ft. Smith	Sebastian	3	$186,137
Hot Springs	Garland	6	$535,660
Jonesboro	Craighead	2	$232,628

CONCLUSIONS WITH RESPECT TO PERFORMANCE TESTS

The following table compares conclusions regarding performance in each limited-scope MSA AA to overall performance for the state of Arkansas.

Performance in the Limited-Scope Review Metropolitan Assessment Areas			
MSA AA	**Lending Test**	**Investment Test**	**Service Test**
Fayetteville	Not Consistent (Below)	Not Consistent (Exceeds)	Consistent
Ft. Smith	Consistent	Not Consistent (Exceeds)	Consistent
Hot Springs	Not Consistent (Below)	Not Consistent (Below)	Not Consistent (Exceeds)
Jonesboro	Consistent	Consistent	Not Consistent (Exceeds)

The key performance standards of the Lending Test for limited-scope areas included geographic distribution, borrower distribution, and CD loans. For the geographic distribution of loans, performance was poor in Hot Springs, good in Jonesboro, and adequate in the remaining AAs. Borrower distribution was good in all four of these AAs. The bank originated one qualifying CD loan totaling $2 million in the Jonesboro AA, which was a low level. While no qualifying CD loans were made in the remaining AAs, the Ft. Smith AA benefits from three LOCs totaling $9 million serving the BSRA of Northwest Arkansas, including Ft. Smith. No qualifying CD loans were originated in or benefited the Fayetteville or Hot Springs AAs.

Qualifying amounts and conclusions for the bank's investment and grant activity in limited-scope MSA areas were as follows: $34.5 million in Fayetteville (excellent level), $8.1 million in Ft. Smith (excellent level), $1 million in Hot Springs (few, if any), and $3.1 million in Jonesboro (significant level).

The performance standards of the Service Test for limited-scope MSA areas included retail banking and CD services. Conclusions for retail banking services were as follows: very poor in Fayetteville, and adequate in Ft. Smith, Hot Springs, and Jonesboro. Qualifying hours and conclusions for CD services were as

follows: 317 hours in Fayetteville (leader); 128 hours in Ft. Smith (adequate); 485 hours in Hot Springs (leader); and 153 hours in Jonesboro (leader).

Performance in the limited-scope MSA AAs did not impact overall performance for the state.

NONMETROPOLITAN STATEWIDE AREAS
LIMITED-SCOPE REVIEW

The following non-MSA AAs were reviewed using limited-scope examination procedures. Through these procedures, conclusions regarding the institution's CRA performance are drawn from the review of available facts and data, including performance and demographic information. Please refer to the tables in *Appendices G and H* for additional information regarding these AAs.

DESCRIPTION OF INSTITUTION'S OPERATIONS IN ARKANSAS NON-MSA AAs

Non-MSA AA	AA Delineation/Counties	# Branches *(as of 12/31/2023)*	Deposits ($000s) *(as of June 30, 2023)*
Northeast AR	Cross, Greene, Jackson, Lawrence, Mississippi, St. Francis, & White	7	$409,683
Northwest AR	Boone, Conway, Johnson, Pope, & Van Buren	7	$387,666
Southern AR	Clark & Howard	2	$87,946
Union	Union	1	$49,715

CONCLUSIONS WITH RESPECT TO PERFORMANCE TESTS

The following table compares conclusions regarding performance in each limited-scope non-MSA AA to overall performance for the state of Arkansas.

Performance in the Limited-Scope Review Non-MSA Assessment Areas			
Non-MSA AA	**Lending Test**	**Investment Test**	**Service Test**
Northeast AR	Not Consistent (Below)	Not Consistent (Below)	Not Consistent (Below)
Northwest AR	Consistent	Not Consistent (Below)	Consistent
Southern AR	Not Consistent (Below)	Consistent	Consistent
Union	Not Consistent (Below)	Not Consistent (Below)	Consistent

The key performance standards of the Lending Test for limited-scope areas included geographic distribution, borrower distribution, and CD loans. For the geographic distribution of loans, performance was not rated in Southern Arkansas (due to the absence of LMI census tracts), adequate in Union, and good in the remaining AAs. Borrower distribution was good in Northeast Arkansas and Northwest Arkansas and adequate in the remaining AAs. The bank did not originate any qualifying CD loans directly in these AAs; however, the Northwest Arkansas AA benefits from three LOCs totaling $9 million serving the BSRA of Northwest Arkansas, including Ft. Smith.

Qualifying amounts and conclusions for the bank's investment and grant activity in limited-scope non-MSA areas were as follows: $3.8 million in Northeast Arkansas (adequate level), $665,900 in Northwest Arkansas (few, if any), $1 million in Southern Arkansas (significant level), and $62,200 in Union (few, if any).

The performance standards of the Service Test for limited-scope non-MSA areas included retail banking and CD services. Conclusions for retail banking services were as follows: poor in Northeast Arkansas, adequate in Northwest Arkansas and Union, and good in Southern Arkansas. Qualifying hours and conclusions for CD

services were as follows: 117 hours in Northeast Arkansas (poor); 66 hours in Northwest Arkansas (poor); eight hours in Southern Arkansas (very poor); and 22 hours in Union (poor).

Performance in the limited-scope non-MSA AAs did not impact overall performance for the state.

INDIANA

CRA RATING FOR INDIANA: **SATISFACTORY**
The Lending Test is rated: **Low Satisfactory**
The Investment Test is rated: **Outstanding**
The Service Test is rated: **High Satisfactory**

Major factors contributing to this rating include:

- The geographic distribution of loans reflects good penetration throughout Indiana AAs.
- The distribution of borrowers reflects good penetration throughout Indiana AAs.
- The bank made a low level of CD loans in Indiana.
- The bank made an excellent level of qualified CD investments and grants in Indiana.
- Retail banking services, which includes accessibility of delivery systems, changes in branch locations, and reasonableness of hours and services, are adequate.
- The bank is a leader in providing CD service activities in Indiana, relative to the bank's presence in this state.

SCOPE OF EXAMINATION

A full-scope review was conducted for the following assessment area in Indiana:
- Indianapolis

Limited-scope reviews were conducted for the remaining eight assessment areas:
- Bloomington
- Clinton-Grant
- Evansville
- Kokomo*
- Lafayette
- Louisville
- Southwest Indiana
- Terre Haute*

The time period, products, and affiliates evaluated for these AAs are consistent with the scope discussed in the institution section of this report.

*As of December 31, 2023, the bank operated no branch offices in these AAs. The bank exited the Kokomo AA in May 2021 and the Terre Haute AA in February 2022, early in the review periods. These AAs, therefore, were not included in the performance analysis.

DESCRIPTION OF INSTITUTION'S OPERATIONS IN INDIANA

As of June 30, 2023, Regions Bank had $2.7 billion in deposits in Indiana accounting for 2.1 percent of its total deposits. Regions Bank operated 40 branch offices in Indiana as of December 31, 2023, representing 3.1 percent of its total branches. HMDA-reportable lending in Indiana accounted for 3.6 percent of total institutional HMDA-reportable lending by number of loans and 2.7 percent by dollar volume. Small business lending in Indiana accounted for 2.1 percent of the bank's total small business lending by number of loans and 2.4 percent by dollar volume. Overall, the bank's HMDA-reportable and small business lending activity in the state was greater than the percentage of total institutional deposits.

The following table shows lending activity from January 1, 2021 through December 31, 2023.

Statewide Summary of Lending Activity
Assessment Areas Located in: Indiana
2021-2023

Loan Type	#	%	$(000s)	%

CONCLUSIONS WITH RESPECT TO PERFORMANCE TESTS IN INDIANA

LENDING TEST

Overview

The Lending Test rating for the state of Indiana is Low Satisfactory. The rating is a result of performance in each characteristic of the Lending Test applicable to the state, including Lending Activity (good); Geographic Distribution (good); Borrower Distribution (good); and CD Lending (low level). Highlights of each characteristic are found in the sections that follow, with additional descriptions and details within the full-scope AA of the state.

Lending Activity

Lending levels reflect good responsiveness to the credit needs of Indiana AAs. The total number and dollar volume of HMDA-reportable and small business loans was considered in arriving at Lending Activity conclusions, as well as competitive factors and the bank's overall importance to each AA. Statewide conclusions are derived from conclusions within each AA as detailed in the *Lending Activity* section of the Indianapolis AA.

Geographic and Borrower Distribution

The geographic distribution of HMDA-reportable and small business loans reflects good dispersion throughout Indiana AAs and the distribution of loans by borrower income and revenue size of businesses is good. The analyses of HMDA-reportable and small business lending within the full-scope AA are discussed in detail later in this report.

CD Lending

The bank made a low level of CD loans in Indiana. During the review period, the bank originated or renewed $12.8 million in qualifying CD loans across its Indiana AAs. More information on CD loans can be found in the full-scope AA section of this report.

INVESTMENT TEST

The Investment Test rating for Indiana is Outstanding. Regions made an excellent level of qualified CD investments and grants in Indiana, with $78.5 million in qualified investments and $1.2 million in qualified contributions directly benefiting its Indiana AAs. The bank also received consideration at the state level for $41,000 in qualifying statewide contributions. This included a $30,000 contribution to support a statewide career readiness program that primarily benefits LMI youth.

The bank made an excellent level of qualified investments and contributions in the Indianapolis full-scope AA. Additional details regarding specific investments and contributions can be found in the full-scope AA section of this report.

The bank was responsive to the needs of its AAs in the state of Indiana. Therefore, the bank received consideration for $3.6 million in qualified investments within the state that benefited geographies outside of the bank's AAs. This amount included a $1.6 million current period NMTC, a $1.2 million prior period LIHTC, and $785,300 in prior period LMI MBS.

SERVICE TEST

The Service Test rating for Indiana is High Satisfactory.

Retail Services

Delivery systems are reasonably accessible to the bank's geographies and individuals of different income levels in Indiana. As of December 31, 2023, Regions operated 40 branches in the state, including two branches in low-income tracts and 13 branches in moderate-income tracts, representing 37.5 percent of total statewide branches.

A full array of personal and business banking products and services is offered at all locations in Indiana assessment areas. Across the state, branch hours do not vary in a way that inconveniences individual AAs. Most branches in the state offer lobby hours and drive-through hours beginning at 9 a.m. and closing at 5 p.m. each weekday. Regions also offers branch lobby hours from 9 a.m. to 12 p.m. on Saturday at most branches across the state, including at most of the branches in LMI tracts. Delivery systems include full-service ATMs at most branches in the state. In addition to those ATMs, the bank compliments its traditional service delivery methods with alternative delivery systems that provide increased access to banking services, as previously discussed in the *Institution, Retail Banking Services* section of this report.

During the review period, the bank closed 10 branches, including four branches in moderate-income tracts and opened one branch in a moderate-income tract. Changes to the bank's branch network in Arkansas did not

generally adversely affect the accessibility of delivery systems, particularly to LMI geographies or LMI individuals. Additional details on the bank's retail services can be found in the full-scope AA sections of this report.

CD Services

Regions is a leader in providing CD services in Indiana. During the review period, the bank engaged in 2,858 hours of qualifying CD service activities in Indiana. This total includes 2,671 hours directly benefiting individual AAs in Indiana and 187 hours benefiting a BSRA that includes all of the bank's AAs in the state. These hours include board of directors and committee representation for a statewide association focused on promoting partnerships between banks and CD organizations. Statewide hours also include providing technical assistance to an organization focused on workforce development and financial education for LMI youth, and service on a committee for an organization assisting small businesses at the state level. Additional details of service hours in Indiana are described later within each individual AA they benefit.

METROPOLITAN AREA – INDIANAPOLIS MSA
(Full-Scope Review)

DESCRIPTION OF INSTITUTION'S OPERATIONS IN THE INDIANAPOLIS AA

The Indianapolis AA consists of the following five counties in the Indianapolis-Carmel-Anderson, IN MSA: Boone, Hamilton, Johnson, Marion, and Morgan. As of December 31, 2023, the bank operated 24 branches in the AA, representing 60 percent of its branches in the state of Indiana and 1.9 percent of its total branches. Of the branches in the AA, seven are in a moderate-income tracts, nine are in middle-income tracts, and eight are in upper-income tracts. As a percentage within the state of Indiana, 62 percent of deposit dollar volume and 58.6 percent of HMDA-reportable and small business loans by number are located in the Indianapolis AA. As described, Indianapolis is the bank's primary AA in the state of Indiana.

The AA is a competitive banking market with local, regional, and national institutions operating in the area. According to the FDIC Summary of Deposits Report as of June 30, 2023, there were 39 depository institutions operating 372 branches in the AA. Regions ranked 12th in deposit market share with 2.3 percent of total deposits ($1.7 billion). JPMorgan Chase Bank had the largest deposit market share at 19.5 percent, followed by Merchants Bank of Indiana and PNC Bank at 15.2 percent and 12.4 percent, respectively.

For HMDA-reportable lending, Regions originated or purchased 1.0 percent, 1.1 percent, and 1.2 percent of total HMDA-reportable loans in the AA in 2021, 2022 and 2023, respectively. Regions was ranked 27th out of 663 reporters in 2021; 30th out of 642 reporters in 2022; and 25th out of 612 reporters in 2023. The top HMDA reporters in the market were Rocket Mortgage (formally known as Quicken Loans) in 2021 and The Huntington National Bank in 2022 and 2023.

For small business lending, Regions ranked 21st out of 179 reporters in 2021 with 1.4 percent of small business loans. In 2021, the bank ranked 36th out of 164 reporters with 0.2 percent of small business loans. In 2023, Regions ranked 27th out of 148 reporters with 0.4 percent of small business loans. JPMorgan Chase Bank was the top CRA reporter in the market for 2021, 2022, and 2023.

AA Demographics, Population, and Income Characteristics

The Indianapolis AA is in central Indiana, with a total population of 1,629,027 in 2020, having grown 8.7 percent since 2015. The five individual counties within the AA vary greatly in size. Marion County contains a significant portion of the population (977,203 residents) and is home to the city of Indianapolis. The second largest county in the AA is Hamilton County with a population of 347,467 people. There was significant population growth in three counties within the AA between 2015 and 2020. Boone County experienced 17 percent population growth, Hamilton County 17.1 percent population growth, and Johnson County 11.1 percent. This data indicates that population growth during the review period occurred primarily in suburbs of Indianapolis.

The Indianapolis assessment area contains 366 census tracts: 52 low-income census tracts (14.2 percent), 92 moderate-income census tracts (25.1 percent), 118 middle-income census tracts (32.2 percent), 96 upper-income census tracts (26.2 percent), and eight tracts with unknown income levels (2.2 percent).

For purposes of classifying borrower income, this evaluation uses the FFIEC estimated median family income for the relevant area. As the following table shows, the median family income increased from $79,700 in 2021 to $97,300 in 2023.

Borrower Income Levels
Indianapolis-Carmel-Anderson, IN MSA

FFIEC Estimated Median Family Income		Low	Moderate	Middle	Upper
		0 - 49.99%	50% - 79.99%	80% - 119.99%	120% - & above
2021	**$79,700**	0 - $39,849	$39,850 - $63,759	$63,760 - $95,639	$95,640 - & above
2022	**$91,900**	0 - $45,949	$45,950 - $73,519	$73,520 - $110,279	$110,280 - & above
2023	**$97,300**	0 - $48,649	$48,650 - $77,839	$77,840 - $116,759	$116,760 - & above

There are 378,544 families in the AA, of which 21.3 percent are low-income, 17.7 percent are moderate-income, 19.9 percent are middle-income, and 41.1 percent are upper-income. Of the total families, 8.3 percent had incomes below the poverty level (compared to 8.9 percent in Indiana). Within the AA, families below poverty for Marion County was higher at 11.9 percent, while families below poverty in Hamilton County was lower at 3 percent. Across the AA, low-income families reside primarily in low- and moderate-income tracts and moderate-income families reside primarily in moderate-income and middle-income tracts.

Housing Characteristics

There are 672,067 housing units in the AA, of which 57.1 percent are owner-occupied, 33.8 percent are rental units, and 9.1 percent are vacant. As described, housing units in the AA are predominately owner-occupied, which indicates home lending opportunities available within the AA. However, fewer home lending opportunities exist in low-income tracts, where only 28.5 percent of housing units are owner-occupied.

The median age of the housing stock in the AA was 46 years, which is the same for the state of Indiana (46 years). Housing units in the LMI census tracts were older, with the median age of housing stock at 61 years for low-income tracts and 58 years for moderate-income tracts. The older age of homes is an indicator of potential opportunity for home improvement loans in LMI tracts.

The median housing value in the AA was $176,297, which is higher than the median housing value in Indiana ($148,900). Hamilton County had the highest median housing value at $282,700 and Marion County had the lowest median housing value at $145,200. Median gross rent in the AA ($945 per month) is higher than the median gross rent of Indiana ($844 per month). As with median housing values, Hamilton County had the highest median gross rent at $1,188 per month. Additionally, the affordability ratio of the AA (35.4 percent) is lower than the affordability ratio for Indiana (39.1 percent). Affordability varied throughout the AA, with Hamilton County having the lowest affordability ratio at 35 percent and Johnson and Morgan counties having the highest affordability ratio at 40.9 percent. Families that are housing cost burdened are defined as renters or homeowners paying 30.0 percent or more of household income toward housing cost. Within the AA the percentage of renters with rent costs greater than 30 percent of income (42.8 percent) is higher than the state of Indiana at 40.4 percent. Within the AA, renters in Marion County are the most cost burdened with 45.4 percent of all renters classified as cost burdened. Overall, the data suggests that housing is less affordable in the AA relative to the state of Indiana.

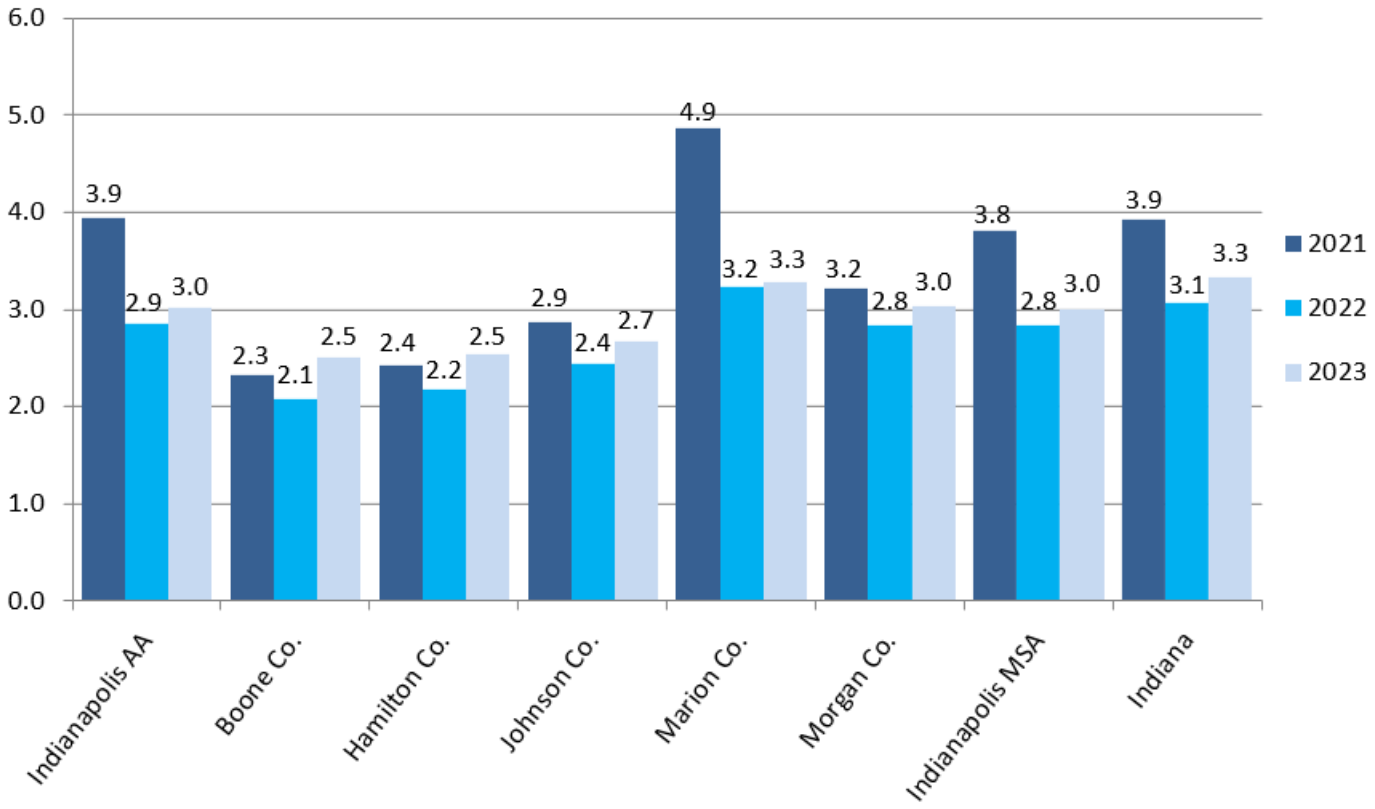
Economic Conditions

The AA includes the city of Indianapolis, which is the state capital and largest city in the state of Indiana. Indianapolis has access to four major interstate highways (I-65, I-69, I-74, and I-70), which combined with its

central mid-west location makes it a natural hub for transportation and distribution activities.[59] According to the Bureau of Labor Statistics during the first quarter of 2023, the largest industries in the AA by number of employees include healthcare and social assistance (130,150), retail trade (76,789), and manufacturing (74,929). Indianapolis is home to three Fortune 500 companies including health insurance provider Elavance Health, agricultural business Corteva, and pharmaceutical business Eli Lily.[60]

The following tables show the unemployment rate percentages for the bank's Indianapolis AA, the counties that comprise the AA, the MSA, and the state of Indiana. As shown, unemployment rates in the AA were similar to unemployment rates for the state of Indiana. The AA unemployment rate improved from 3.9 percent in 2021 to 3.0 percent in 2023 while the state's unemployment rate similarly dropped from 3.9 percent in 2021 to 3.3 percent in 2023. Boone County had the lowest unemployment rate in the AA during the review period while Marion County had the highest unemployment rate.

Unemployment Rates - IN Indianapolis



Not Seasonally Adjusted. Source: Bureau of Labor Statistics

Credit and CD Needs

As part of the CRA examination, information from a recently conducted interview was referenced with a contact engaged in Indianapolis-area small business and CD activities.

According to the contact, the local economy continues to move in a positive direction and unemployment remains low; however, inflation poses a significant challenge. The contact mentioned that credit access has become more

[59] "The top industries and employers in the Indy metro area". *Indy Today*. https://indytoday.6amcity.com/city-guide/work/most-influential-companies-indianapolis-in. Accessed December 11, 2024.

restricted over time, and some institutions have stopped providing start-up lending entirely. Interest and need among entrepreneurs remain strong, however, with the end of many federal pandemic programs, institutions are increasingly denying small business loan applications if the applicant does not maintain a deposit relationship with the bank. It was also noted that there is not a large CDFI presence in the Indianapolis area to serve LMI customers trying to obtain financing.

The contact also noted that affordable housing remains a significant problem. Housing inventory in the Indianapolis area remains low, prices are high, and lenders are becoming more restrictive. Further, the contact noted that corporate buyers are pushing prices higher and can outbid individuals and families.

Based on conversations with these community contacts, opportunities are available in the AA for banks, such as engaging with nonprofit organizations, developers, and others in a wide range of CD activities, including affordable housing development, workforce development, neighborhood revitalization, small business lending, financial education, and technical assistance to nonprofit organizations and their constituencies.

CONCLUSIONS WITH RESPECT TO PERFORMANCE TESTS IN THE INDIANAPOLIS AA

LENDING TEST

Lending levels reflect good responsiveness to credit needs of the AA. The geographic distribution of loans reflects good penetration throughout the AA and the distribution of borrowers reflects good penetration among customers of different income levels and businesses of different revenue sizes. The bank made a low level of CD loans in the Indianapolis AA.

The analysis included 2,346 HMDA-reportable loans and 764 small business loans reported by the bank in the AA during the review period. Therefore, HMDA-reportable lending received greater weight when determining conclusions. Additionally, during the review period the bank originated or purchased 869 home purchase loans, 657 home refinance loans, and 515 home improvement loans in the AA. Thus, when considering HMDA-reportable loan categories, greatest weight was assigned to home purchase loans, followed by home refinance loan, and home improvement loans.

Details of the bank’s mortgage and small business lending and information regarding lending by peers can be found in *Appendix F*.

Lending Activity

Lending activity is considered good. Overall, 1.8 percent of HMDA-reportable loans and 1.9 percent of small business loans were made in the AA. The percentage of the bank's HMDA-reportable and small business lending exceeds the percentage of its area deposits. In addition, the bank is an important contributor to HMDA-reportable lending in the area.

Geographic Distribution of Loans

The geographic distribution of loans reflects good penetration throughout the AA. As described in the following sections, overall performance for HMDA-reportable lending is good and small business lending performance is adequate.

Home Purchase Loans

Home purchase lending in low-income tracts is good. In 2021, the bank made 5.1 percent of its home purchase loans in low-income tracts, which was below the percentage of owner-occupied units in these tracts (7.7 percent) and below aggregate performance of 8.6 percent. Bank performance improved in 2022 and 2023, with the bank making 10.7 percent of its home purchase loans in low-income tracts, which was nearly double the percentage of owner-occupied units in these tracts (5.7 percent). In 2022, the bank's lending (7.3 percent) was above aggregate performance (6.3 percent) and in 2023, the bank's lending (15.2 percent) was more than double aggregate performance (7.2 percent).

Home purchase lending in moderate-income tracts is good. In 2021, the bank made 24.4 percent of its home purchase loans in moderate-income tracts, which was above the percentage of owner-occupied units in these tracts (18.7 percent) and above aggregate performance of 18.1 percent. In 2022 and 2023, the bank made 20.7 percent of its home purchase loans in moderate-income tracts, which was above the percentage of owner-occupied units in these tracts (17.2 percent). In 2022, the bank's lending (21.0 percent) was above aggregate performance (16.8 percent) and in 2023, the bank's lending (20.3 percent) was above aggregate performance (17.1 percent).

Home Refinance Loans

Home refinance lending in low-income tracts is good. In 2021, the bank made 6.4 percent of its home refinance loans in low-income tracts, which was below the percentage of owner-occupied units in these tracts (7.7 percent) but nearly double aggregate performance of 3.6 percent. In 2022 and 2023, the bank made 6.0 percent of its home refinance loans in low-income tracts, which was similar to the percentage of owner-occupied units in these tracts (5.7 percent). In 2022, the bank's lending (6.4 percent) was above aggregate performance (4.9 percent) and in 2023, the bank's lending (5.5 percent) was below aggregate performance (6.2 percent).

Home refinance lending in moderate-income tracts is good. In 2021, the bank made 17.9 percent of its home refinance loans in moderate-income tracts, which was similar to the percentage of owner-occupied units in these tracts (18.7 percent) and above aggregate performance of 13.8 percent. In 2022 and 2023, the bank made 20.7 percent of its home refinance loans in moderate-income tracts, which was above the percentage of owner-occupied units in these tracts (17.2 percent). In 2022, the bank's lending (17.7 percent) was above aggregate performance (16.4 percent) and in 2023, the bank's lending (25.3 percent) was above aggregate performance (18.3 percent).

Home Improvement Loans

Home improvement lending in low-income tracts is adequate. In 2021, the bank made 5.4 percent of its home improvement loans in low-income tracts, which was below the percentage of owner-occupied units in these tracts (7.7 percent) but similar to aggregate performance of 5.1 percent. In 2022 and 2023, the bank made 4.2 percent of its home improvement loans in low-income tracts, which was below the percentage of owner-occupied units in these tracts (5.7 percent). In 2022, the bank's lending (4.4 percent) was similar to aggregate performance (4.0 percent) and in 2023, the bank's lending was identical to aggregate performance at 4.0 percent.

Home improvement lending in moderate-income tracts is adequate. In 2021, the bank made 15.1 percent of its home improvement loans in moderate-income tracts, which was below the percentage of owner-occupied units in these tracts (18.7 percent) but above aggregate performance of 13.2 percent. In 2022 and 2023, the bank made 12.4 percent of its home improvement loans in moderate-income tracts, which was below the percentage of owner-occupied units in these tracts (17.2 percent). In 2022, the bank's lending (9.8 percent) was below aggregate performance (12.5 percent) but in 2023, the bank's lending (16.7 percent) was above aggregate performance (13.7 percent).

Small Business Loans

Small business lending in low-income tracts is adequate. In 2021, the bank made 9.7 percent of its small business loans in low-income tracts, which was similar to the percentage of total businesses located in these tracts (9.6 percent) and similar to aggregate performance of 9.1 percent. In 2022 and 2023, the bank made 6.3 percent of its small business loans in low-income tracts, which was similar to the percentage of total businesses located in these tracts (6.8 percent). In 2022, the bank's lending (8.0 percent) was above aggregate performance (6.3 percent) and in 2023, the bank's lending (5.3 percent) was below aggregate performance of 6.2 percent.

Small business lending in moderate-income tracts is adequate. In 2021, the bank made 19.6 percent of its small business loans in moderate-income tracts, which was similar to the percentage of total businesses located in these tracts (19.8 percent) and above aggregate performance of 17.7 percent. In 2022 and 2023, the bank made 17.6 percent of its small business loans in moderate-income tracts, which was similar to the percentage of total businesses located in these tracts (18.1 percent). In 2022, the bank's lending (20.7 percent) was above aggregate performance (16.8 percent) and in 2023, the bank's lending matched aggregate performance at 15.8 percent.

No conspicuous lending gaps were identified based on an analysis of the dispersion of the loan products reviewed. The bank had activity in over 80 percent of all census tracts throughout the review period. Furthermore, lending data and maps did not indicate an absence of loans across LMI tracts.

Lending to Borrowers of Different Incomes and Businesses of Different Sizes

The distribution of loans based on borrower income or gross annual revenues is good. As described in the following sections, overall performance for HMDA-reportable lending is good while small business lending performance is poor.

Home Purchase Loans

Home purchase lending to low-income borrowers is excellent. In 2021, the bank made 23.4 percent of its home purchase loans to low-income borrowers, which was similar to the percentage of low-income families (23.2 percent) and more than double aggregate performance of 9.2 percent. In 2022 and 2023, the bank made 22.2 percent of its home purchase loans to low-income borrowers, which was similar to the percentage of low-income families (21.3 percent). In 2022, the bank's lending (26.0 percent) was more than double aggregate performance (9.3 percent) and in 2023, the bank's lending (17.3 percent) was more than double aggregate performance (7.9 percent).

Home purchase lending to moderate-income borrowers is excellent. In 2021, the bank made 28.8 percent of its home purchase loans to moderate-income borrowers, which was above the percentage of moderate-income families (17.0 percent) and above aggregate performance of 21.2 percent. Bank performance improved further in 2022 and 2023, with the bank making 33.8 percent of its home purchase loans to moderate-income borrowers, which was above the percentage of moderate-income families (17.7 percent). In 2022, the bank's lending (34.4 percent) was above aggregate performance (21.8 percent) and in 2023, the bank's lending (33.0 percent) was above aggregate performance (21.6 percent).

Home Refinance Loans

Home refinance lending to low-income borrowers is excellent. In 2021, the bank made 20.2 percent of its home refinance loans to low-income borrowers, which was below the percentage of low-income families (23.2 percent) but more than double aggregate performance of 7.9 percent. In 2022 and 2023, the bank made 22.8 percent of its home refinance loans to low-income borrowers, which was above the percentage of low-income families (21.3 percent). In 2022, the bank's lending (21.3 percent) was above aggregate performance (14.9 percent) and in 2023, the bank's lending (25.3 percent) was nearly double aggregate performance (13.8 percent).

Home refinance lending to moderate-income borrowers is good. In 2021, the bank made 26.1 percent of its home refinance loans to moderate-income borrowers, which was above the percentage of moderate-income families (17.0 percent) and above aggregate performance of 17.1 percent. In 2022 and 2023, the bank made 27.6 percent of its home refinance loans to moderate-income borrowers, which was above the percentage of moderate-income families (17.7 percent). In 2022, the bank's lending (30.5 percent) was above aggregate performance (23.5 percent) and in 2023, the bank's lending (23.1 percent) was above aggregate performance (21.0 percent).

Home Improvement Loans

Home improvement lending to low-income borrowers is good. In 2021, the bank made 13.5 percent of its home improvement loans to low-income borrowers, which was below the percentage of low-income families (23.2 percent) but above aggregate performance of 8.4 percent. In 2022 and 2023, the bank made 15.5 percent of its home improvement loans to low-income borrowers, which was below the percentage of low-income families (21.3 percent). In 2022, the bank's lending (15.7 percent) was above aggregate performance (10.1 percent) and in 2023, the bank's lending (15.1 percent) was above aggregate performance (10.8 percent).

Home improvement lending to moderate-income borrowers is adequate. In 2021, the bank made 17.3 percent of its home improvement loans to moderate-income borrowers, which was similar to the percentage of moderate-income families (17.0 percent) and above aggregate performance of 15.0 percent. In 2022 and 2023, the bank made 20.0 percent of its home improvement loans to moderate-income borrowers, which was above the percentage of moderate-income families (17.7 percent). In 2022, the bank's lending (17.2 percent) was nearly identical to aggregate performance (17.1 percent) and in 2023, the bank's lending (24.6 percent) was above aggregate performance (17.7 percent).

Small Business Loans

Small business lending to businesses of different sizes is poor. In 2021, the bank made 66.7 percent of its small business loans to businesses with revenues of $1 million or less, which was below the percentage of total businesses with revenues of $1 million or less (90.6 percent). The bank's performance is above aggregate performance of 45.4 percent in 2021. However, 2021 was a year in which many banks extended PPP loans as a result of the COVID-19 pandemic and were not required to capture and report the revenue of the businesses, which is reflected in the aggregate data. As a result, performance context and loan size data were considered. In 2021, the bank made fewer loans of less than $250,000 to businesses (90.1 percent) compared to aggregate lenders (94.8 percent). Bank performance declined in 2022 and 2023, with the bank making 44.4 percent of its small business loans to businesses with revenues of $1 million or less, which was below the percentage of total businesses with revenues of $1 million or less (90.3 percent). In 2022, bank lending (42.5 percent) was below aggregate performance (50.1 percent) and in 2023, the bank's lending (45.4 percent) was below aggregate performance (53.4 percent).

CD Lending

The bank makes a low level of CD loans in the Indianapolis AA. During the review period, the bank originated or renewed eight qualified CD loans totaling $11.7 million in the AA. Specifically, the bank provided $6.7 million in affordable housing to LMI individuals, $3.6 million in economic development by financing small businesses, and $1.3 million in community services benefiting LMI individuals. The Indianapolis AA also benefited from two LOCs totaling $9.5 million to a national CDFI with prioritization in nine AAs, including Indianapolis. The CDFI LOCs were previously described under the *CD Lending* heading for the institution.

The most impactful loans in this area were two SBA 504 loans totaling $3.6 million and three loans totaling $316,000 made in conjunction with a local CDFI's loan fund. The loan fund is designed to allow the strategic acquisition and holding of transit-accessible properties for future development or to preserve existing affordable

housing. While these loans are impactful, the remaining loans demonstrate limited responsiveness to the area. The bank's current lending by number of loans and dollar volume is below its performance in previous examinations and below peers in the area.

INVESTMENT TEST

The bank made an excellent level of qualified CD investments and grants in the Indianapolis AA totaling $69.9 million. This amount included three current period investments totaling $41 million, 19 prior period investments totaling $27.8 million, and 108 donations totaling $1.1 million.

Investment types varied and addressed a range of CD needs. These include LIHTC projects to address affordable housing challenges, MBS supporting LMI borrowers, Commercial MBS secured by multifamily affordable housing, equity investments in CDFIs, and bonds to finance renovations at majority LMI schools. The bank made significant use of innovative and/or complex investments to support CD initiatives. Additionally, the bank exhibits excellent responsiveness to CD needs.

Examples of noteworthy investments and grants provided during the review period include:

- A $1 million current period investment in a CDFI fund to provide financing for three affordable housing properties in the AA.
- A $15 million current period Commercial MBS secured by a multifamily property which provides 200 units of affordable housing.
- Two donations totaling $10,000 to a nonprofit affordable housing organization.
- Five donations totaling $117,900 to an academic and career readiness program for LMI youth.
- A $175,000 donation to support a tuition-free executive leadership program for entrepreneurs from under-resourced communities in the AA.

The Indianapolis AA also positively benefited from $41,000 in contributions benefiting a BSRA that includes the entire state of Indiana. These investments and donations were previously described under the *Investment Test* heading for the state of Indiana.

SERVICE TEST

Retail banking services are adequate in Indianapolis. Additionally, the bank provides an excellent level of CD services in its AA.

Retail Banking Services

Retail service delivery systems are unreasonably inaccessible to portions of the bank's geographies and individuals of different income levels throughout the Indianapolis AA. In deriving this conclusion, the distribution of the bank's branches by census tract income level was compared to the distribution of households and businesses among the tract categories in the AA. As the following tables show, the bank operated branches and ATMs in all census tract categories in 2021, but due to the U.S. Census changes in 2022, those tracts were reclassified to moderate-income, so the bank had no branches in low-income tracts after that time. In 2023, 29.2 percent of the bank's branches were in moderate-income tracts, which was greater than the percentage of

households (22.8 percent) and businesses (18.1 percent) in these tracts. While the branch distribution in moderate-income tracts compares favorably to the percentage of households and businesses in these tracts, there are concentrations of LMI tracts in the eastern and western portions of the AA that have limited access to retail branches. The limited accessibility to LMI tracts in these portions of the AA was an important factor considered in deriving the overall conclusion for delivery systems accessibility.

The bank closed four branches during the review period in the Indianapolis AA, including one branch in a moderate-income tract, two branches in middle-income tracts and one branch in an upper-income tract. The branch that was closed in the moderate-income tract was relocated to a newly opened branch in a moderate-income tract in close proximity to the closed branch. Overall, the branch opening and closings have not adversely affected the accessibility of the bank's delivery systems.

The hours of operation are consistent across all branches in the AA. Branch lobby and drive-through hours at all branches are 9 a.m. to 5 p.m. Monday through Friday. The bank also offers Saturday lobby hours from 9:00 a.m. to noon in nearly all branches in the AA. Thus, hours and services do not vary in a way that inconveniences the AA, particularly LMI geographies and LMI individuals.

The tables below show the distribution of branches and ATMs along with households and businesses by tract category.

CD Services

The bank is a leader in providing CD services in the AA. During the review period, bank employees provided 633 CD service activities totaling 2,232 hours to 59 organizations operating throughout the AA. Bank staff provided their financial expertise in a variety of ways, including financial literacy and homebuyer education; service on board of directors; and other technical assistance to CD programs and initiatives.

Noteworthy and responsive CD services in the Indianapolis AA include:

- Bank staff provided 146 hours of technical assistance to support an initiative that helps small businesses located in under-resources communities build the capacity needed to have sustainable growth and job creation.

- Bank staff provided 34 hours of service to a CDFI focused on homeownership by serving on the board and providing financial education to clients of the organization.

- One bank employee gave 127 hours to an organization working to address homelessness for children and families. The employee served on the board and provided financial education to clients of the organization.

- One bank employee gave 8 hours of legal services by providing estate planning assistance to LMI individuals.

- Bank staff provided 1,288 hours of financial education with nearly 30 organizations that serve primarily LMI youth and adults throughout the AA

The Indianapolis AA also positively benefited from 187 hours of CD service benefiting the BSRA that includes the entire state of Indiana. These services were previously described under the CD services section for the state.

METROPOLITAN AREAS
LIMITED-SCOPE REVIEW

The following MSA AAs were reviewed using limited-scope examination procedures. Through these procedures, conclusions regarding the institution's CRA performance are drawn from the review of available facts and data, including performance and demographic information. Refer to the tables in *Appendices G and H* for additional information regarding these AAs.

DESCRIPTION OF INSTITUTION'S OPERATIONS IN INDIANA MSA AAs

MSA AA	AA Delineation/Counties	# Branches *(as of 12/31/2023)*	Deposits ($000s) *(as of June 30, 2023)*
Bloomington	Monroe	3	$111,903
Evansville	Vanderburgh	1	$36,890
Kokomo*	Howard	0	N/A
Lafayette	Carroll & Tippecanoe	5	$333,165
Louisville	Harrison & Washington	1	$130,952
Terre Haute*	Vigo	0	N/A

*As of December 31, 2023, the bank operated no branch offices in these AAs. The bank exited the Kokomo AA in May 2021 and the Terre Haute AA in February 2022. Therefore, no analysis was conducted in these markets.

CONCLUSIONS WITH RESPECT TO PERFORMANCE TESTS

The following table compares conclusions regarding performance in each limited-scope MSA AA to overall performance for the state of Indiana.

Performance in the Limited-Scope Review Metropolitan Assessment Areas			
MSA AA	**Lending Test**	**Investment Test**	**Service Test**
Bloomington	Not Consistent (Below)	Not Consistent (Below)	Not Consistent (Below)
Evansville	Not Consistent (Below)	Consistent	Not Consistent (Below)
Lafayette	Consistent	Not Consistent (Below)	Not Consistent (Below)
Louisville	Not Consistent (Below)	Not Consistent (Below)	Not Consistent (Below)

The key performance standards of the Lending Test for limited-scope areas included geographic distribution, borrower distribution, and CD loans. For the geographic distribution of loans, performance was poor in Louisville and adequate in the remaining AAs. Borrower distribution was adequate in Bloomington and Evansville and good in the remaining AAs. The bank originated one qualifying CD loan totaling $1.1 million in the Lafayette AA, which was a low level. No qualifying CD loans were originated in the remaining AAs.

Qualifying amounts and conclusions for the bank's investment and grant activity in limited-scope MSA areas were as follows: $337,300 in Bloomington (few, if any), $6.5 million in Evansville (excellent level), $857,600 in Lafayette (few, if any), and $663,500 in Louisville (poor level).

The performance standards of the Service Test for limited-scope MSA areas included retail banking and CD services. Conclusions for retail banking services were as follows: good in Lafayette; adequate in Bloomington;

poor in Evansville and Louisville. Qualifying hours and conclusions for CD services were as follows: 13 hours in Bloomington (poor level); 0 hours in Evansville (very poor level); 54 hours in Lafayette (poor); and two hours in Louisville (very poor level). All MSA AAs reviewed under limited-scope procedures also positively benefited from 187 hours of CD service benefiting the BSRA that includes the entire state of Indiana. These services were previously described under the CD services section for the state of Indiana.

Performance in the limited-scope MSA AAs did not impact overall performance for the state.

NONMETROPOLITAN STATEWIDE AREAS
LIMITED-SCOPE REVIEW

The following non-MSA AAs were reviewed using limited-scope examination procedures. Through these procedures, conclusions regarding the institution's CRA performance are drawn from the review of available facts and data, including performance and demographic information. Please refer to the tables in *Appendices G and H* for additional information regarding these AAs.

DESCRIPTION OF INSTITUTION'S OPERATIONS IN INDIANA NON-MSA AAs

Non-MSA AA	AA Delineation/Counties	# Branches *(as of 12/31/2023)*	Deposits ($000s) *(as of June 30, 2023)*
Clinton-Grant	Clinton & Grant	2	$135,220
Southwest IN*	Gibson, Greene, & Knox	4	$242,157

*AA was modified during review period as follows: Lawrence County removed March 2021.

CONCLUSIONS WITH RESPECT TO PERFORMANCE TESTS

The following table compares conclusions regarding performance in each limited-scope non-MSA AA to overall performance for the state of Indiana.

Performance in the Limited-Scope Review Non-MSA Assessment Areas			
Non-MSA AA	**Lending Test**	**Investment Test**	**Service Test**
Clinton-Grant	Consistent	Not Consistent (Below)	Not Consistent (Below)
Southwest IN	Consistent	Not Consistent (Below)	Not Consistent (Below)

The key performance standards of the Lending Test for limited-scope areas included geographic distribution, borrower distribution, and CD loans. For the geographic distribution of loans, performance was adequate in Clinton-Grant and excellent in Southwest Indiana. Borrower distribution was good in both AAs. The bank made no qualifying CD loans in the AAs.

Qualifying amounts and conclusions for the bank's investment and grant activity in limited-scope non-MSA areas were as follows: $438,300 in Clinton-Grant (few, if any) and $731,400 in Southwest Indiana (few, if any).

The performance standards of the Service Test for limited-scope non-MSA areas included retail banking and CD services. Conclusions for retail banking services were as follows: good in Southwest Indiana and poor in Clinton-Grant. Qualifying hours and conclusions for CD services were as follows: 181 hours in Clinton-Grant (leader) and 98 hours in Southwest Indiana (adequate level). All non-MSA AAs reviewed under limited-scope procedures also positively benefited from 187 hours of CD service benefiting the BSRA that includes the entire state of Indiana. These services were previously described under the CD services section for the state of Indiana.

Performance in the limited-scope non-MSA AAs did not impact overall performance for the state.

ILLINOIS

CRA RATING FOR ILLINOIS: **NEEDS TO IMPROVE**
The Lending Test is rated: **Low Satisfactory**
The Investment Test is rated: **Needs to Improve**
The Service Test is rated: **Low Satisfactory**

Major factors contributing to this rating include:

- The geographic distribution of loans reflects adequate penetration throughout Illinois AAs.
- The distribution of borrowers reflects good penetration throughout Illinois AAs.
- The bank made a low level of CD loans in Illinois.
- The bank made a poor level of qualified CD investments and grants in Illinois.
- Retail banking services, which includes accessibility of delivery systems, changes in branch locations, and reasonableness of hours and services, are good.
- The bank provides an adequate level of CD service activities in Illinois.

SCOPE OF EXAMINATION

A full-scope review was conducted for the following AA in Illinois:
- Decatur

Limited-scope reviews were conducted for the remaining eight AAs:
- Carbondale
- Central Illinois
- Champaign*
- Peoria
- Southeast Illinois
- Southern Illinois
- Springfield

The time period, products, and affiliates evaluated for these AAs are consistent with the scope discussed in the institution section of this report.

*As of December 31, 2023, the bank operated no branch offices in this AA. The bank exited the AA in May 2021, early in the retail review period and before the beginning of the CD review period. This AA, therefore, was not included in the performance analysis.

DESCRIPTION OF INSTITUTION'S OPERATIONS IN ILLINOIS

As of June 30, 2023, Regions Bank had $1.2 billion in deposits in Illinois accounting for 0.9 percent of its total deposits. Regions Bank operated 17 branch offices in Illinois as of December 31, 2023, representing 1.3 percent of its total branches. HMDA-reportable lending in Illinois accounted for 1.1 percent of total institutional HMDA-reportable lending by number of loans and 0.5 percent by dollar volume. Small business lending in Illinois accounted for 0.5 percent of the bank's total small business lending by number of loans and 0.5 percent by dollar volume. Overall, the bank's HMDA-reportable and small business lending activity in the state was equal to the percentage of total institutional deposits.

The following table shows lending activity from January 1, 2021 through December 31, 2023.

Statewide Summary of Lending Activity
Assessment Areas Located in: Illinois
2021-2023

Loan Type	#	%	$(000s)	%

Originations & Purchases

CONCLUSIONS WITH RESPECT TO PERFORMANCE TESTS IN ILLINOIS

LENDING TEST

Overview

The Lending Test rating for Illinois is Low Satisfactory. The rating is a result of performance in each characteristic of the Lending Test applicable to the state, including Lending Activity (adequate); Geographic Distribution (adequate); Borrower Distribution (good); and CD Lending (low level). Highlights of each characteristic are found in the sections that follow, with additional descriptions and details within the full-scope AA of the state.

Lending Activity

Lending levels reflect adequate responsiveness to the credit needs of Illinois AAs. The total number and dollar volume of HMDA-reportable and small business loans was considered in arriving at Lending Activity

conclusions, as well as competitive factors and the bank's overall importance to each AA. Statewide conclusions are derived from conclusions within each AA as detailed in the *Lending Activity* section of the Decatur AA.

Geographic and Borrower Distribution

The geographic distribution of HMDA-reportable and small business loans reflects adequate dispersion throughout the Illinois AAs, and the distribution of loans by borrower income and revenue size of businesses is good. The analyses of HMDA-reportable and small business lending within the full-scope AA are discussed in detail later in this report.

CD Lending

The bank made a low level of CD loans in Illinois. During the review period, the bank renewed $5.7 million in qualifying CD loans in one of its Illinois AAs, with no qualifying CD loans in the remaining seven AAs of the state. More information on CD loans can be found in the full-scope AA section of this report.

INVESTMENT TEST

The Investment Test rating for Illinois is Needs to Improve. The bank made a poor level of qualified CD investments and grants in Illinois, with $8.5 million in qualified investments and $239,800 in qualified contributions directly benefiting its Illinois AAs. The bank also received consideration at the state level for a $6,000 contribution to support statewide disaster recovery efforts.

The bank made a poor level of qualified investments and contributions in the Decatur full-scope AA. Additional details regarding specific investments and contributions can be found in the full-scope AA section of this report. The bank did not adequately meet the needs of its Illinois AAs. As such, investment and donation activity outside the bank's AAs in Illinois was not considered.

SERVICE TEST

The Service Test rating for Illinois is Low Satisfactory.

Retail Services

Delivery systems are readily accessible to the bank's geographies and individuals of different income levels in Illinois. As of December 31, 2023, Regions operated 17 branches in the state, including one branch in a low-income tract and six branches in moderate-income tracts, representing 41.2 percent of total statewide branches.

A full array of personal and business banking products and services is offered at all locations in Illinois AAs. Branch hours do not vary in a way that inconveniences individual AAs. Branches in the state offer lobby and drive-through hours beginning at 9 a.m. and most close at 5 p.m. Monday through Friday. Regions also offers branch lobby hours from 9 a.m. to 12 p.m. on Saturday at most branches across the state. Delivery systems include full-service ATMs at most branches in the state. In addition to those ATMs, the bank compliments its traditional service delivery methods with alternative delivery systems that provide increased access to banking services, as previously discussed in the *Institution, Retail Banking Services* section of this report.

During the review period, the bank closed one branch in a middle-income tract and opened no new branches in the state. Changes to the bank's branch network in Illinois did not generally adversely affect the accessibility of delivery systems, particularly to LMI geographies or LMI individuals. Additional details on the bank's retail services can be found in the full-scope AA sections of this report.

CD Services

Regions provides an adequate level of CD services in Illinois. During the review period, the bank engaged in 317 hours of qualifying CD service activities benefiting AAs in Illinois. Additional details of service hours in Illinois are described later within each individual AA they benefit.

METROPOLITAN AREA – DECATUR MSA
(Full-Scope Review)

DESCRIPTION OF INSTITUTION'S OPERATIONS IN THE DECATUR AA

Overview

The Decatur AA is comprised of only one county: Macon County, Illinois. As of June 30, 2023, Regions operated three branches in the AA representing 17.6 percent of its branches in the state of Illinois. Of the three branches, there is one branch each in a low-income tract, moderate-income tract and middle-income tract. As a percentage within the state, 24.0 percent of deposit dollar volume and 24.4 percent of HMDA-reportable and small business loans by number are located in the Decatur AA.

The Decatur market has 13 financial institutions operating 35 total branches. Regions ranked 4th in total deposits in the AA, holding 11.9 percent of the market deposits with approximately $281 million. Busey Bank holds the largest deposit market share in the AA, followed by Hickory Point Bank and Trust and First Mid Bank and Trust.

For HMDA-reportable lending, Regions originated or purchased 4.1 percent, 5.2 percent, and 4.1 percent of total HMDA-reportable loans in the AA in 2021, 2022 and 2023, respectively. Regions was ranked 7th out of 185 reporters in 2021; 2nd out of 188 reporters in 2022; and 7th out of 167 reports in 2023. Region's ranking indicates that it is an important contributor for HMDA-reportable lending in the Decatur assessment area. Various banks such as Town & Country Banc Mortgage, Busey Bank and U. S Bank were the top HMDA lenders in 2021, 2022 and 2023, respectively.

For small business lending, Regions ranked 8th out of 55 reporters in 2021 with 3.3 percent of small business loans. In 2022, the bank ranked 14th out of 52 reporters with 0.8 percent of small business loans. In 2023, Regions ranked 15th out of 49 reporters with 0.6 percent of small business loans. First MidBank and Trust was the top small business reporter for 2021 and 2023, while American Express was the leading reporter in 2022.

AA Demographics, Population, and Income Characteristics

As of July 2023, the Decatur AA had a population of 100,591[61], which was a 3.3 percent decline in population since 2020. The city of Decatur, which is the largest city in the AA, had a population of 68,670[62], which was a 3.4 percent decline since 2020. During the same time period, the state of Illinois experienced a 2.1 percent decline in population[63]. A community contact also indicated the Decatur area is experiencing an outflow of residents.

In 2021, the Decatur AA contains 34 census tracts: eight low-income census tracts (23.5 percent), five moderate-income census tracts (14.7 percent), 11 middle-income census tracts (32.4 percent) and 10 upper-income census tracts (29.4 percent). In 2022, there was a census tract boundary change which resulted in the AA containing 37 census tracts: five low-income census tracts (13.5 percent), nine moderate-income census tracts (24.3 percent), 18 middle-income census tracts (48.6 percent), four upper-income census tracts (10.8 percent) and one census tract of unknown income (2.7 percent).

For purposes of classifying borrower income, this evaluation uses the FFIEC estimated median family income for the relevant area. As the following table shows, the median family income increased from $68,700 in 2021 to $82,200 in 2023.

[61] "QuickFacts". *U.S. Census Bureau,* U.S. Census Bureau QuickFacts: Macon County, Illinois; Decatur city, Illinois; United States. Accessed 9 Dec. 2024
[62] Ibid.
[63] Ibid.

Borrower Income Levels
Decatur, IL MSA

FFIEC Estimated Median Family Income		Low	Moderate	Middle	Upper
		0 - 49.99%	50% - 79.99%	80% - 119.99%	120% - & above
2021	**$68,700**	0 - $34,349	$34,350 - $54,959	$54,960 - $82,439	$82,440 - & above
2022	**$84,100**	0 - $42,049	$42,050 - $67,279	$67,280 - $100,919	$100,920 - & above
2023	**$82,200**	0 - $41,099	$41,100 - $65,759	$65,760 - $98,639	$98,640 - & above

There are 26,176 families in the AA, of which 21.2 percent are low-income, 17.2 percent are moderate-income, 21.4 percent are middle-income, and 40.2 percent are upper-income. Of the total families, 11.3 percent had incomes below the poverty level. The largest percentage of families below the poverty level live in moderate-income tracts (36.7 percent) and middle-income tracts (30.2 percent). Moreover, low-income and moderate-income families reside primarily in moderate-income and middle-income tracts. The data indicates that lending challenges and opportunities exist for families residing in moderate-income and middle-income tracts.

Housing Characteristics

There are approximately 50,364 housing units in the AA, of which 60.1 percent are owner-occupied, 26.9 percent are rental units, and 13.0 percent are vacant. As described, housing units in the AA are predominately owner-occupied, which indicates a variety of home lending opportunities within the AA. Fewer home lending opportunities exist in low-income tracts where only 32.0 percent of housing units are owner-occupied and 44.0 percent of units are rentals.

The median age of the housing stock in the AA was 61 years, which is older than that of homes in Illinois (51 years). The median age of the housing units in the LMI census tracts was the same as the AA at 61 years. The older age of homes is an indicator of potential opportunity for home improvement loans throughout the AA, including in LMI tracts.

The median housing value in the AA was $103,080, which is approximately 51 percent of the median housing value in Illinois ($202,100). Moreover, median gross rent in the AA ($690 per month) is lower than the median gross rent of Illinois ($1,038 per month). Additionally, the affordability ratio of the AA (51.4 percent) is higher than the affordability ratio of Illinois (33.9 percent). Families that are housing cost-burdened are defined as renters or homeowners paying 30.0 percent or more of household income toward housing cost. Within the AA, the percentage of cost-burdened renters (41.4 percent) is slightly lower than the state of Illinois at 43.7 percent.

Overall, the data suggests that housing is more affordable in the AA relative to the state of Illinois.

Economic Conditions

The assessment area of Decatur, IL is located in central Illinois[64]; Decatur city is the largest city in the AA.[65] The region is home to a diverse set of major industries and ancillary and supporting businesses.[66] The largest industries in Macon County are manufacturing, health care and social assistance, food and agriculture and

[64] "About Macon, IL." *Best Places*, Macon, IL. Accessed 9 Dec. 2024

[66] "Major Employers." *Economic Development Corporation*, Major Employers - Economic Development Corporation. Accessed 9 Dec. 2024

educational services.[67] Some of the major employers in the area include Archer Daniels Midland, Caterpillar, Decatur Memorial Hospital and Decatur Public Schools.[68] The importance of agriculture to the AA was also emphasized during discussions with a community contact.

The following tables show the unemployment rate percentages for the AA and the state of Illinois. As shown, unemployment rates in the AA were higher than the unemployment rates for the state of Illinois. The AA unemployment rate improved from 7.8 percent in 2021 to 6.0 percent in 2023 while the state's unemployment rate dropped from 6.1 percent in 2021 to 4.5 percent in 2023.

Not Seasonally Adjusted. Source: Bureau of Labor Statistics

Credit and CD Needs

As part of the CRA examination, information from one recently conducted interview with a contact from the Decatur AA engaged in the small farm area was referenced. According to the contact, agriculture is a vital part of the economy. Larger farming operations have had an increased need for loans and operating lines of credit. At the same time, smaller farmers are facing difficulty getting financed due to limited income and operating history. The Farm Credit System is an important alternative source of funding for small farmers. With funds from alternative funding sources and community banks, farm lending needs are currently being met. Based on information from the community contact, opportunities are available in the AA for banks to provide small business and small farm loans, including providing targeted programs for new farmers with limited operating history.

CONCLUSIONS WITH RESPECT TO PERFORMANCE TESTS IN THE DECATUR AA

LENDING TEST

Lending levels reflect adequate responsiveness to credit needs of the AA. The geographic distribution of loans reflects adequate penetration throughout the AA and the distribution of loans reflects good penetration among

[67] "Macon, IL." *Data USA*, Macon, IL | Data USA. Accessed 9 Dec. 2024
[68] "Major Employers." *Economic Development Corporation*, Major Employers - Economic Development Corporation. Accessed 9 Dec. 2024

borrowers of different income levels and businesses of different revenue sizes. The bank made a low level of CD loans in the Decatur AA.

The analysis included 327 HMDA-reportable loans and 59 small business loans reported by the bank in the AA during the review period. Therefore, HMDA-reportable lending received greater weight in determining conclusions. Additionally, during the review period, the bank originated or purchased 209 home purchase loans, 67 home refinance loans, and 36 home improvement loans in the AA. Thus, when considering HMDA-reportable loan categories, greatest weight was assigned to home purchase loans given its relative share of the total HMDA-reportable lending in this AA, followed by home refinance loans and home improvement loans to a lesser extent.

Details of the bank's mortgage and small business lending and information regarding lending by peers can be found in *Appendix F*.

Lending Activity

Lending activity is considered adequate. Overall, 0.1 percent of HMDA-reportable loans and 0.2 percent of small business loans were made in the AA. The percentage of the bank's HMDA-reportable and small business lending is consistent with the percentage of its area deposits.

Geographic Distribution of Loans

The bank's geographic distribution of loans reflects adequate penetration throughout the AA. As described in the following sections, overall performance for HMDA-reportable lending is adequate and small business lending performance is poor.

Home Purchase Loans

Home purchase lending in low-income tracts is adequate. In 2021, the bank made 4.7 percent of its home purchase loans in low-income tracts, which was below the percentage of owner-occupied units in these tracts (9.4 percent) but similar to aggregate performance of 5.2 percent. In 2022 and 2023, the bank made 2.4 percent of its home purchase loans in low-income tracts, which was below the percentage of owner-occupied units in these tracts (4.3 percent). In 2022, the bank's lending (1.3 percent) was similar to aggregate performance (2.2 percent) but in 2023, the bank's lending (4.1 percent) was similar to aggregate performance (3.7 percent).

Home purchase lending in moderate-income tracts is good. In 2021, the bank made 7.1 percent of its home purchase loans in moderate-income tracts, which was below the percentage of owner-occupied units in these tracts (9.5 percent) but above aggregate performance of 6.0 percent. In 2022 and 2023, the bank made 15.3 percent of its home purchase loans in moderate-income tracts, which was similar to the percentage of owner-occupied units in these tracts (15.6 percent). In 2022, the bank's lending (14.7 percent) was above aggregate performance (13.2 percent) and in 2023, the bank's lending (16.3 percent) was above aggregate performance (13.2 percent).

Home Refinance Loans

Home refinance lending in low-income tracts is poor. In 2021, the bank made 2.8 percent of its home refinance loans in low-income tracts, which was below the percentage of owner-occupied units in these tracts (9.4 percent) but similar aggregate performance of 1.9 percent. However, the bank made no home refinance loans in low-income tracts in 2022 or 2023 despite opportunities for such lending as shown by demographic data (4.3 percent) and aggregate performance (1.7 percent in 2022 and 3.2 percent in 2023).

Home refinance lending in moderate-income tracts is adequate. In 2021, the bank made 5.6 percent of its home refinance loans in moderate-income tracts, which was below the percentage of owner-occupied units in these tracts (9.5 percent) but above aggregate performance of 2.8 percent. In 2022 and 2023, the bank made 9.7 percent

of its home refinance loans in moderate-income tracts, which was below the percentage of owner-occupied units in these tracts (15.6 percent). In 2022, the bank's lending (4.8 percent) was below aggregate performance (12.8 percent) but in 2023, the bank's lending (20.0 percent) was above aggregate performance (18.0 percent).

Home Improvement Loans

Home improvement lending in low-income tracts is poor. In both 2021 and 2023, the bank made no home improvement loans in low-income tracts despite opportunities for such lending as shown by demographic data and aggregate performance. In 2022, the bank made 6.3 percent of its home improvement loans in low-income tracts, which was above aggregate performance of 4.5 percent.

Home improvement lending in moderate-income tracts is poor. In both 2021 and 2023, the bank made no home improvement loans in moderate-income tracts despite opportunities for such lending as shown by demographic data and aggregate performance. In 2022, the bank made 12.5 percent of its home improvement loans in moderate-income tracts, which was below aggregate performance of 14.8 percent.

Small Business Loans

Small business lending in low-income tracts is adequate. In 2021, the bank made 23.3 percent of its small business loans in low-income tracts, which was below the percentage of total businesses located in these tracts (27.3 percent) and below aggregate performance of 26.6 percent. In 2022 and 2023, the bank made 25.0 percent of its small business loans in low-income tracts, which was above the percentage of total businesses located in these tracts (16.8 percent). In 2022, the bank's lending (30.0 percent) was above aggregate performance (20.1 percent), and in 2023, the bank's lending (16.7 percent) was similar to aggregate performance of 17.1 percent.

Small business lending in moderate-income tracts is poor. In 2021, the bank made 9.3 percent of its small business loans in moderate-income tracts, which was below the percentage of total businesses located in these tracts (12.3 percent) and similar to aggregate performance of 8.6 percent. In 2022 and 2023, the bank made 12.5 percent of its small business loans in moderate-income tracts, which was below the percentage of total businesses located in these tracts (22.8 percent). Furthermore, in 2022, the bank's lending (10.0 percent) was below aggregate performance (18.8 percent) and in 2023, the bank's lending (16.7 percent) was again below aggregate performance of 20.1 percent.

No conspicuous lending gaps were identified based on an analysis of the dispersion of the loan products reviewed. The bank had activity in over 80 percent of all census tracts throughout the review period. Furthermore, lending data and maps did not indicate an absence of loans across LMI tracts.

Lending to Borrowers of Different Incomes and Businesses of Different Sizes

The distribution of loans based on borrower income or gross annual revenues is good. As described in the following sections, overall performance for HMDA-reportable lending is good while small business lending performance is poor.

Home Purchase Loans

Home purchase lending to low-income borrowers is excellent. In 2021, the bank made 15.3 percent of its home purchase loans to low-income borrowers, which was below the percentage of low-income families (22.9 percent) but above aggregate performance of 10.4 percent. Bank performance improved further in 2022 and 2023, with the bank making 23.4 percent of its home purchase loans to low-income borrowers, which was above the percentage of low-income families (21.2 percent). In 2022, the bank's lending (25.3 percent) was above aggregate

performance (15.4 percent) and in 2023, the bank's lending (20.4 percent) was above aggregate performance (11.1 percent).

Home purchase lending to moderate-income borrowers is excellent. In 2021, the bank made 34.1 percent of its home purchase loans to moderate-income borrowers, which was above the percentage of moderate-income families (16.9 percent) and above aggregate performance of 24.6 percent. In 2022 and 2023, the bank made 40.3 percent of its home purchase loans to moderate-income borrowers, which was above the percentage of moderate-income families (17.2 percent). In 2022, the bank's lending (37.3 percent) was above aggregate performance (24.9 percent) and in 2023, the bank's lending (44.9 percent) was above aggregate performance (25.1 percent).

Home Refinance Loans

Home refinance lending to low-income borrowers is good. In 2021, the bank made 8.3 percent of its home refinance loans to low-income borrowers, which was below the percentage of low-income families (22.9 percent) but above aggregate performance of 5.7 percent. In 2022 and 2023, the bank made 19.4 percent of its home refinance loans to low-income borrowers, which was below the percentage of low-income families (21.1 percent). In 2022, the bank's lending (19.0 percent) was above aggregate performance (13.4 percent) and in 2023, the bank's lending (20.0 percent) was above aggregate performance (12.2 percent).

Home refinance lending to moderate-income borrowers is good. In 2021, the bank made 25.0 percent of its home refinance loans to moderate-income borrowers, which was above the percentage of moderate-income families (16.9 percent) and above aggregate performance of 15.0 percent. In 2022 and 2023, the bank made 25.8 percent of its home refinance loans to moderate-income borrowers, which was above the percentage of moderate-income families (17.2 percent). In 2022, the bank's lending (28.6 percent) was above aggregate performance (26.7 percent) while in 2023, the bank's lending (20.0 percent) was below aggregate performance (25.4 percent).

Home Improvement Loans

Home improvement lending to low-income borrowers is poor. In 2021, the bank made 7.7 percent of its home improvement loans to low-income borrowers, which was below the percentage of low-income families (22.9 percent) and below aggregate performance of 9.7 percent. In 2022 and 2023, the bank made 8.7 percent of its home improvement loans to low-income borrowers, which was below the percentage of low-income families (21.2 percent). In 2022, the bank's lending (12.5 percent) was below aggregate performance (13.6 percent) and in 2023, the bank did not make any home improvement loans to low-income borrowers.

Home improvement lending to moderate-income borrowers is adequate. In 2021, the bank made 15.4 percent of its home improvement loans to moderate-income borrowers, which was below the percentage of moderate-income families (16.9 percent) but nearly identical to aggregate performance of 15.3 percent. In 2022 and 2023, the bank made 21.7 percent of its home improvement loans to moderate-income borrowers, which was above the percentage of moderate-income families (17.2 percent). In 2022, the bank's lending (25.0 percent) was above aggregate performance (19.3 percent) and in 2023, the bank's lending (14.3 percent) was below aggregate performance (24.4 percent).

Small Business Loans

Small business lending to businesses of different sizes is poor. In 2021, the bank made 67.4 percent of its small business loans to businesses with revenues of $1 million or less, which was below the percentage of total businesses with revenues of $1 million or less (89.4 percent). The bank's performance is above aggregate performance of 50.2 percent in 2021. However, 2021 was a year in which many banks extended PPP loans as a result of the COVID-19 pandemic and were not required to capture and report the revenue of the businesses, which is reflected in the aggregate data. As a result, performance context and loan size data were considered. In

2021, the bank made fewer loans of less than $250,000 to businesses (83.7 percent) compared to aggregate lenders (92.4 percent). Bank performance declined in 2022 and 2023, with the bank making 31.3 percent of its small business loans to businesses with revenues of $1 million or less, which was below the percentage of total businesses with revenues of $1 million or less (89.6 percent). In 2022, bank lending (30.0 percent) was below aggregate performance (54.8 percent) and in 2023, the bank's lending (33.3 percent) was below aggregate performance (58.4 percent).

CD Lending

The bank makes a low level of CD loans in the Decatur AA. During the review period, the bank renewed three qualified CD loans totaling $5.7 million in the AA. The loans qualified as economic development by financing a small business and demonstrated limited responsiveness to the area.

INVESTMENT TEST

Based on the low volume, the bank made a poor level of qualified CD investments and grants in the Decatur AA totaling $831,100. This amount included one current period investment totaling $142,400, five prior period investments totaling $622,000, and 17 donations totaling $66,800.

Investment variety was limited to a SBA 504 debenture to finance small business development and MBS supporting LMI borrowers. The bank made rare use of innovative and/or complex investments to support community development initiatives.

Examples of noteworthy investments and grants provided during the review period include:

- A $142,400 current period LMI MBS pool.
- Two donations totaling $10,000 to an organization which provides pre-purchase education to LMI homebuyers.
- Two donations totaling $20,000 to a nonprofit that provides workforce development training and other supportive services to LMI individuals with intellectual and developmental disabilities.

The Decatur AA also positively benefited from $6,000 in contributions benefiting a BSRA that includes the entire state of Illinois. These donations were previously described under the *Investment Test* heading for the state of Illinois.

SERVICE TEST

Retail banking services are good in Decatur. Additionally, the bank provides an adequate level of CD services in its AA.

Retail Banking Services

Retail service delivery systems are readily accessible to the bank's geographies and individuals of different income levels throughout the Decatur AA. In deriving this conclusion, the distribution of the bank's branches by census tract income level was compared to the distribution of households and businesses among the tract categories in the AA. As the following tables show, the bank operates three branches in this AA with one in a low-income branch (33.3 percent of total) and one in a moderate-income tract (33.3 percent of total). The percentage of branches in low-income tracts exceeds the percentage of households (7.1 percent) and the

percentage of businesses (16.8 percent) in those tracts. The percentage of branches in moderate-income tracts exceeds the percentage of households (23.6 percent) and the percentage of businesses (22.8 percent) in those tracts. The bank's branches are centrally located within the AA to provide access to all LMI tracts. The bank did not open or close any branches in the AA during the review period.

The hours of operation are consistent across all branches in the AA. Branch lobby and drive-through hours are 9 a.m. to 5 p.m. each weekday. The bank offers Saturday lobby hours from 9:00 a.m. to noon in two branches in the AA, including the one located in a moderate-income tract. Thus, hours and services do not vary in a way that inconveniences the AA, particularly LMI geographies and LMI individuals.

The tables below show the distribution of branches and ATMs along with households and businesses by tract category.

CD Services

The bank provides an adequate level of CD services in the AA given the bank's limited presence. During the review period, bank employees provided 27 CD service activities totaling 67 hours to six organizations operating throughout the AA. Bank staff provided their financial expertise in several ways, including financial literacy and homebuyer education and service on board of directors.

Noteworthy CD services in the Decatur AA include:

- 34 hours of board service for a program that works with LMI students through high schools to teach them life skills and provides real world opportunities for students to learn the basics of entrepreneurship.

- 18 hours of board service for a nonprofit organization that works to improve the economic and education outcomes for LMI youth and families.

METROPOLITAN AREAS
LIMITED-SCOPE REVIEW

The following MSA AAs were reviewed using limited-scope examination procedures. Through these procedures, conclusions regarding the institution's CRA performance are drawn from the review of available facts and data, including performance and demographic information. Please refer to the tables in *Appendices G and H* for additional information regarding these AAs.

DESCRIPTION OF INSTITUTION'S OPERATIONS IN ILLINOIS MSA Aas

MSA AA	AA Delineation/Counties	# Branches *(as of 12/31/2023)*	Deposits ($000s) *(as of June 30, 2023)*
Bloomington	McLean	1	$79,224
Carbondale	Jackson & Williamson	3	$238,299
Champaign*	Champaign	0	N/A
Peoria	Peoria & Tazewell	2	$80,674
Springfield	Sangamon	2	$74,620

*As of December 31, 2023, the bank operated no branch offices in this AA. The bank exited the AA in May 2021. Therefore, no analysis was conducted in this market.

CONCLUSIONS WITH RESPECT TO PERFORMANCE TESTS

The following table compares conclusions regarding performance in each limited-scope MSA AA to overall performance for the state of Illinois.

Performance in the Limited-Scope Review Metropolitan Assessment Areas			
MSA AA	**Lending Test**	**Investment Test**	**Service Test**
Bloomington	Consistent	Not Consistent (Exceeds)	Not Consistent (Below)
Carbondale	Consistent	Not Consistent (Below)	Consistent
Peoria	Consistent	Not Consistent (Exceeds)	Consistent
Springfield	Consistent	Not Consistent (Exceeds)	Consistent

The key performance standards of the Lending Test for limited-scope areas included geographic distribution, borrower distribution, and CD loans. For the geographic distribution of loans, performance was adequate in all AAs. Borrower distribution was good in all AAs. The bank made no qualifying CD loans in the AAs.

Qualifying amounts and conclusions for the bank's investment and grant activity in limited-scope MSA areas were as follows: $880,800 in Bloomington (adequate level), $272,700 in Carbondale (few if any), $2.7 million in Peoria (excellent level), and $2.0 million in Springfield (excellent level).

The performance standards of the Service Test for limited-scope MSA areas included retail banking and CD services. Conclusions for retail banking services were as follows: poor in Bloomington and adequate in Carbondale, Peoria, and Springfield. Qualifying hours and conclusions for CD services were as follows: 23 hours in Bloomington (adequate level); 50 hours in Carbondale (poor level); 59 hours in Peoria (adequate level); and 18 hours in Springfield (poor level).

Performance in the limited-scope MSA AAs did not impact overall performance for the state.

NONMETROPOLITAN STATEWIDE AREAS
LIMITED-SCOPE REVIEW

The following non-MSA AAs were reviewed using limited-scope examination procedures. Through these procedures, conclusions regarding the institution's CRA performance are drawn from the review of available facts and data, including performance and demographic information. Please refer to the tables in *Appendices G and H* for additional information regarding these AAs.

DESCRIPTION OF INSTITUTION'S OPERATIONS IN ILLINOIS NON-MSA AAs

Non-MSA AA	AA Delineation/Counties	# Branches *(as of 12/31/2023)*	Deposits ($000s) *(as of June 30, 2023)*
Central IL	Christian & Logan	2	$91,617
Southeast IL	Crawford	1	$62,683
Southern IL	Marion, Perry, Randolph, & Washington	3	$239,685

CONCLUSIONS WITH RESPECT TO PERFORMANCE TESTS

The following table compares conclusions regarding performance in each limited-scope non-MSA AA to overall performance for the state of Illinois.

Performance in the Limited-Scope Review Non-MSA Assessment Areas			
Non-MSA AA	**Lending Test**	**Investment Test**	**Service Test**
Central IL	Consistent	Consistent	Consistent
Southeast IL	Consistent	Not Consistent (Below)	Consistent
Southern IL	Consistent	Consistent	Not Consistent (Below)

The key performance standards of the Lending Test for limited-scope areas included geographic distribution, borrower distribution, and CD loans. For the geographic distribution of loans, performance was good in Southeast Illinois and adequate in the remaining AAs. Borrower distribution was adequate in Southeast Illinois and good in the remaining AAs. The bank made no qualifying CD loans in the AAs.

Qualifying amounts and conclusions for the bank's investment and grant activity in limited-scope non-MSA areas were as follows: $381,500 in Central Illinois (poor level), $177,400 in Southeast Illinois (few, if any), and $1.5 million in Southern Illinois (poor level).

The performance standards of the Service Test for limited-scope non-MSA areas included retail banking and CD services. Conclusions for retail banking services were as follows: good in Central Illinois, adequate in Southeast Illinois, and poor in Southern Illinois. Qualifying hours and conclusions for CD services were as follows: 28 hours in Central Illinois (poor level); 24 hours in Southeast Illinois (adequate level); and 48 hours in Southern Illinois (poor level).

Performance in the limited-scope non-MSA AAs did not impact overall performance for the state.

SOUTH CAROLINA

CRA RATING FOR SOUTH CAROLINA: SATISFACTORY

The Lending Test is rated: Low Satisfactory
The Investment Test is rated: Outstanding
The Service Test is rated: Low Satisfactory

Major factors contributing to this rating include:

- The geographic distribution of loans reflects poor penetration throughout South Carolina AAs.
- The distribution of borrowers reflects poor penetration throughout South Carolina AAs.
- The bank made an excellent level of CD loans in South Carolina.
- The bank made an excellent level of qualified CD investments and grants in South Carolina.
- Retail banking services, which includes accessibility of delivery systems, changes in branch locations, and reasonableness of hours and services, are adequate.
- The bank provides a limited level of CD service activities in South Carolina.

SCOPE OF EXAMINATION

A full-scope review was conducted for the following AA in South Carolina:

- Charleston

Limited-scope reviews were conducted for the remaining six AAs:

- Barnwell
- Columbia
- Greenville
- Hampton
- Hilton Head Island-Bluffton-Beaufort
- Spartanburg

The time period, products, and affiliates evaluated for these AAs are consistent with the scope discussed in the institution section of this report.

DESCRIPTION OF INSTITUTION'S OPERATIONS IN SOUTH CAROLINA

As of June 30, 2023, Regions Bank had $892 million in deposits in South Carolina, accounting for 0.7 percent of its total deposits. Regions Bank operated 14 branch offices in South Carolina as of December 31, 2023, representing 1.1 percent of its total branches. HMDA-reportable lending in South Carolina accounted for 1.3 percent of total institutional HMDA-reportable lending by number of loans and 1.9 percent by dollar volume. Small business lending in South Carolina accounted for 1.3 percent of the bank's total small business lending by number of loans and 1.5 percent by dollar volume. Overall, the bank's HMDA-reportable and CRA lending activity in the state was greater than the percentage of total institutional deposits.

The following table shows lending activity from January 1, 2021 through December 31, 2023.

Statewide Summary of Lending Activity
Assessment Areas Located in: South Carolina
2021-2023

CONCLUSIONS WITH RESPECT TO PERFORMANCE TESTS IN SOUTH CAROLINA

LENDING TEST

Overview

The Lending Test rating for the state of South Carolina is Low Satisfactory. The rating is a result of performance in each characteristic of the Lending Test applicable to the state, including Lending Activity (good); Geographic Distribution (poor); Borrower Distribution (poor); and CD Lending (excellent). Highlights of each characteristic are found in the sections that follow, with additional descriptions and details within the full-scope AA of the state.

Lending Activity

Lending levels reflect good responsiveness to the credit needs of South Carolina AAs. The total number and dollar volume of HMDA-reportable and small business loans was considered in arriving at Lending Activity conclusions, as well as competitive factors and the bank's overall importance to each AA. Statewide conclusions are derived from conclusions within each AA as detailed in the *Lending Activity* section of the Charleston AA.

Geographic and Borrower Distribution

The geographic distribution of HMDA-reportable and small business loans reflects poor dispersion throughout South Carolina AAs and the distribution of loans by borrower income and revenue size of businesses is poor. The analyses of HMDA-reportable and small business lending within the full-scope AA are discussed in detail later in this report.

CD Lending

The bank made an excellent level of CD loans in South Carolina. During the review period, the bank originated or renewed $89 million in qualified CD loans directly benefiting South Carolina AAs. In addition, the bank received

consideration at the state level for one CD loan totaling $1.5 million benefiting all AAs in South Carolina. The statewide loan was to a nonprofit specializing in originating loans to small businesses that do not qualify for traditional financing. More information on CD loans can be found in the full-scope AA section of this report.

The bank was considered responsive to the CD needs of its AAs in the state. Therefore, the bank also received consideration for one loan totaling $7.5 million for the creation of 105 new units of affordable housing in Cherokee County using LIHTCs. This loan received consideration for the state of South Carolina because it benefits an area within the state but did not benefit any of the bank's AAs in the state.

INVESTMENT TEST

The Investment Test rating for South Carolina is Outstanding. The bank made an excellent level of qualified CD investments and grants in South Carolina, with $90.4 million in qualified investments and $100,800 in qualified contributions directly benefiting its South Carolina AAs.

The bank made a significant level of qualified investments and contributions in the Charleston full-scope AA. Additional details regarding specific investments and contributions can be found in the full-scope AA section of this report.

The bank was responsive to the needs of its AAs in the state of South Carolina. Therefore, the bank also received consideration for $17.7 million in qualified investments within the state that benefited geographies outside of the bank's AAs. This amount included two current period LIHTCs that helped create 201 total new units of affordable housing for LMI individuals and families. These investments, along with performance in the limited scope AAs, positively affected the statewide rating.

SERVICE TEST

The Service Test rating for South Carolina is Low Satisfactory.

Retail Services

Delivery systems are reasonably accessible to the bank's geographies and individuals of different income levels in South Carolina. As of December 31, 2023, Regions operated 14 branches in the state, including one branch in a low-income tract and three branches in moderate-income tracts, representing 28.6 percent of total statewide branches.

A full array of personal and business banking products and services is offered at all locations in South Carolina AAs. Across the state, the bank offers branch lobby and drive-through hours beginning at 9 a.m. and closing at 5 p.m. each weekday. The bank only offers Saturday hours from 9 a.m. to 12 p.m. at one branch in the state, which is located in an upper-income tract. Therefore, branch hours do vary in a way that inconveniences portions of the bank's AAs, particularly LMI geographies and LMI individuals. The bank's delivery systems include full-service ATMs at all branches in the state. In addition to those ATMs, the bank compliments its traditional service delivery methods with alternative delivery systems that provide increased access to banking services, as previously discussed in the *Institution, Retail Banking Services* section of this report.

During the review period, the bank closed four branches in upper-income tracts and opened one branch in an upper-income tract. The branch closings were either relocations or consolidations. Changes to the bank's branch network in South Carolina did not generally adversely affect the accessibility of delivery systems, particularly to LMI geographies or LMI individuals. Additional details on the bank's retail services can be found in the full-scope AA area sections of this report.

CD Services

Regions provides a limited level of CD services in South Carolina. During the review period, the bank engaged in 369 hours of qualifying CD service activities that directly benefited individual AAs in South Carolina. The highest volume of CD service hours were in the Hilton Head Island-Bluffton AA at 198 qualified hours.

Additional details of CD service hours in South Carolina are described later within the section for the individual AA that they benefit.

METROPOLITAN AREA – CHARLESTON MSA
(Full-Scope Review)

DESCRIPTION OF INSTITUTION'S OPERATIONS IN THE CHARLESTON AA

Overview

The Charleston AA consists of Charleston and Dorchester counties, two of the three counties that comprise the Charleston-North Charleston, SC MSA. As of December 31, 2023, Regions Bank operated three branch offices in the AA, which represents 21.4 percent of its branches in the state of South Carolina and 0.2 percent of its total branches. As a percentage within the state of South Carolina, 27.6 percent of the bank's deposit volume and 30.5 percent of its total statewide HDMA-reportable and small business loans by number are located in the AA.

Regions operates in a competitive banking environment in the Charleston market, which has a large presence of national and regional banks. As of June 30, 2023, there were 32 financial institutions operating 157 total branch locations across the AA. Regions Bank ranked 15th in deposit market share with $246.3 million or 1.3 percent of total deposits. Wells Fargo Bank, Bank of America, and South State Bank were the leading banks in terms of deposit market share.

HMDA-reportable lending in the AA is similarly competitive. Regions originated and/or purchased approximately 0.5 percent of the total HMDA-reportable loans in the AA in 2021, 2022, and 2023. Regions was 53rd out of 676 reporters in 2021; 47th out of 641 reporters in 2022; and 43rd out of 556 reporters in 2023. Rocket Mortgage was the top HMDA reporter in the market in 2021 and 2022. PennyMac Loan Services was the top HMDA reporter in 2023.

Small business lending is also competitive. Regions Bank ranked 25th out of 157 reporters in 2021 with 0.6 percent of reported loans. In 2022, the bank ranked 38th out of 122 reporters with 0.1 percent of reported loans. In 2023, Regions ranked 26th out of 127 reporters with 0.2 percent of reported loans. From 2021 through 2023, top lenders in the market were American Express, Bank of America, JP Morgan Chase Bank, and Capital One.

AA Demographics, Population, and Income Characteristics

The Charleston AA has grown rapidly in the past several years. As of July 1, 2023, the AA had an estimated population of 594,200.[69] Charleston County has the highest population with approximately 424,367 residents; a 3.9 percent from 2020 to 2023.[70] Dorchester County has a population of 169,833; a 5.3 percent increase in population from 2020 to 2023.[71]

In 2021, the AA contained 111 census tracts: 14 low-income census tracts (12.6 percent), 21 moderate-income tracts (18.9 percent), 35 middle-income tracts (31.5 percent), 38 upper-income tracts (34.2 percent), and three unknown-income tracts (2.7 percent). In 2022 and 2023, census tract remapping increased the total number of census tracts to 130: nine low-income tracts (6.9 percent), 28 moderate-income tracts (21.5 percent), 41 middle-income tracts (31.5 percent), 48 upper-income tracts (36.9 percent), and four unknown-income tracts (3.1 percent).

For purposes of classifying borrower income, this evaluation uses the FFIEC estimated median family income for the relevant area. As shown, the median family income increased from $82,100 in 2021 to $101,300 in 2023.

Borrower Income Levels
Charleston-North Charleston, SC MSA

FFIEC Estimated Median Family Income		Low	Moderate	Middle	Upper
		0 - 49.99%	50% - 79.99%	80% - 119.99%	120% - & above
2021	**$82,100**	0 - $41,049	$41,050 - $65,679	$65,680 - $98,519	$98,520 - & above
2022	**$96,400**	0 - $48,199	$48,200 - $77,119	$77,120 - $115,679	$115,680 - & above
2023	**$101,300**	0 - $50,649	$50,650 - $81,039	$81,040 - $121,559	$121,560 - & above

There are 133,377 total families in the AA. Of these families, 21.3 percent are low-income, 16.5 percent are moderate-income, 19.3 percent are middle-income, and 42.9 percent are upper-income. Poverty is a concern in the AA. In Charleston County, the poverty rate is 11.0 percent, which is greater than Dorchester County's 10.2 percent poverty rate.[72] Throughout the AA, 37.8 percent of families were considered LMI based on 2023 FFIEC census data.[73] Additionally, 30.3 percent of families in low-income tracts and 14.1 percent of families in moderate-income tracts have incomes below the poverty level.[74] The high poverty rates and the concentration of families living below the poverty level in LMI tracts may create challenges for lending in these tracts.

Housing Characteristics

There are 252,966 total housing units in the AA, of which 56.5 percent are owner-occupied, 30.6 percent are rental units and 12.9 percent are vacant. However, fewer home ownership opportunities exist in LMI tracts. Specifically, only 37.2 percent of all housing units in low-income tracts and 46.0 percent of all housing units in moderate-income tracts are owner-occupied.

The median age of the housing stock in the AA was 37 years, which is older than that of homes in South Carolina overall (31 years). Housing units in LMI census tracts were older, with a median age of 46 years in low-income tracts and 40 years in moderate-income tracts. The older age of homes is an indicator of potential opportunity for home improvement loans in LMI tracts.

The median housing value in the AA was $283,127 which is higher than the median housing value in South Carolina ($170,100). Median gross rent in the AA was $1,205 per month, which was higher than the median gross rent in the state of South Carolina ($918 per month). Additionally, the affordability ratio of the AA (23.2 percent) is lower than the affordability ratio for the state of South Carolina (32.3 percent). Housing cost-burden is a challenge in the AA. Data shows that the percentage of renters with rent costs greater than 30 percent of income is 48.1 percent, which is higher than the state of South Carolina at 43.7 percent.

Economic Conditions

Charleston is the oldest and second-largest city in South Carolina. The city of Charleston is the primary economic driver for the region. Charleston began as a port city, and logistics and distribution remain important to its economy. According to the Charleston Regional Development Alliance, the target industries for the area include aerospace, automotive, information technology, life sciences, and logistics.[75]

[72] QuickFacts. U.S. Census Bureau, n.d. Web. 5 Dec. 2024 https://www.census.gov/quickfacts/fact/table/SC,berkeleycountysouthcarolina,dorchestercountysouthcarolina,charlestoncountysouthcarolina/PST045219

[74] 2023 FFIEC Census Data.
[75] "Target Industries." Charleston Regional Development Alliance, n.d. Web 5 Dec. 2024. https://www.crda.org/target-industries/

The Charleston AA has a robust economy with the presence of many private, public, and multinational firms. The top regional industry-sectors, by employment, included: government; accommodation and food service; retail trade; health care and social assistance; manufacturing; professional, scientific, and technical services; administrative and support and waste management and remediation; construction; and transportation and warehousing.[76] The largest public sector employers in the Charleston area include Joint Base Charleston, Medical University of South Carolina, Charleston County School District, Dorchester County School District II, and the Berkeley County School District.[77]

The following chart shows the unemployment rates for the AA, the counties that comprise the AA, the MSA and the state. The MSA's unemployment rate decreased from 2021 through 2023. In 2021, the AA had an unemployment rate of 3.6 percent. The unemployment rate decreased to 2.5 percent in 2023. The two counties in the AA experienced similar unemployment rate levels and changes from 2021 to 2023.

Not Seasonally Adjusted. Source: Bureau of Labor Statistics

Credit and CD Needs

To better understand the local CD and economic landscapes, individuals familiar with the community and with the CD landscape were contacted. These individuals discussed the various opportunities and challenges in the region and how financial institutions can be responsive to local CD needs through lending, investment, and/or service activities.

According to a contact specializing in small business loans and economic development, the Chamber of Commerce noted that 27 people move to Charleston daily, but also mentioned that Charleston does not have the infrastructure for the additional traffic or commuting and this continues to be an issue for the city. Charleston had robust mom and pop businesses that were considered key institutions in the area that are now fading and leaving the area. The contact talked about how people are leaving the downtown area of Charleston, which includes

[76] "Economic Data." Charleston County Development, n.d. Web. 5 Dec. 2024. https://www.charlestoncountydevelopment.org/data-center/economic-data/
[77] Ibid.

services such as tourism, beverage service, and national retailers. These services and others are moving or are being pushed further north.

The contact mentioned that in 1993 the second or third largest naval base closed in Charleston. The naval base was located in the middle of the LMI neighborhoods. Since the closing of the naval base, the Port Authority has opened a large port based on the former naval base location, and it is interrupting these communities.

Lastly, the contact stated that the main obstacle to small business development in the Charleston area is access to capital. The contact stated that banks are reluctant to make loans to small businesses unless the loan amount is $350,000 or more.

A contact specializing in economic development stated that Dorchester County is one of the fastest growing counties within the state of South Carolina. The contact mentioned that with the growing population, there are new financial institutions and health care organizations coming into the area. Currently, elevated interest rates are the biggest hindrance of financial institutions to meeting the community credit needs. There is no limit to competition among financial institutions within the area because there is so much growth within Dorchester County. The contact mentioned that financial institutions seem to only be servicing their best customers and that the lending products could be more market driven.

CONCLUSIONS WITH RESPECT TO PERFORMANCE TESTS IN THE CHARLESTON AA

LENDING TEST

Lending levels reflect good responsiveness to credit needs of the AA. The geographic distribution of loans reflects poor penetration throughout the AA and the distribution of loans reflects poor penetration among borrowers of different income levels and businesses of different revenue sizes. In contrast, the bank made an excellent level of CD loans in the Charleston AA.

The analysis included 467 HMDA-reportable loans and 188 small business loans reported by the bank in the AA during the review period. Therefore, HMDA-reportable lending received greater weight in determining conclusions. Additionally, during the review period, the bank originated or purchased 203 home purchase loans, 145 home refinance loans, and 80 home improvement loans in the AA. Thus, when considering HMDA-reportable loan categories, greatest weight was assigned to home purchase loans and home refinance loans given their relative share of the total HMDA-reportable lending in this AA, followed by home improvement loans.

Details of the bank's mortgage and small business lending and information regarding lending by peers can be found in *Appendix F.*

Lending Activity

Lending activity is considered good. Overall, 0.7 percent of HMDA-reportable loans and 0.5 percent of small business loans were made in the AA. The percentage of the bank's HMDA-reportable and small business lending exceeds the percentage of its area deposits.

Geographic Distribution of Loans

The geographic distribution of loans reflects poor penetration throughout the AA. As described in the following sections, overall performance for HMDA-reportable lending is poor and small business lending performance is poor.

Home Purchase Loans
Home purchase lending in low-income tracts is poor. In 2021 and 2023, the bank made no home purchase loans in low-income tracts despite opportunities for lending as reflected by demographic data and aggregate performance. In 2022, the bank made 4.0 percent of its home purchase loans in low-income tracts, which was similar to aggregate performance (3.5 percent).

Home purchase lending in moderate-income tracts is adequate. In 2021, the bank made 13.4 percent of its home purchase loans in moderate-income tracts, which was below the percentage of owner-occupied units in these tracts (17.8 percent) but similar to aggregate performance of 13.6 percent. In 2022 and 2023, the bank made 17.0 percent of its home purchase loans in moderate-income tracts, which was similar to the percentage of owner-occupied units in these tracts (17.6 percent). In 2022, the bank's lending (16.0 percent) was similar to aggregate performance (15.1 percent) and in 2023, the bank's lending (17.9 percent) was above aggregate performance (15.8 percent).

Home Refinance Loans
Home refinance lending in low-income tracts is very poor. During the three-year period, the bank made no home refinance loans in low-income tracts despite opportunities for lending as reflected by demographic data and aggregate data throughout the review period.

Home refinance lending in moderate-income tracts is poor. In 2021, the bank made 7.8 percent of its home refinance loans in moderate-income tracts, which was below the percentage of owner-occupied units in these tracts (17.8 percent) and below aggregate performance of 10.8 percent. In 2022 and 2023, the bank made 16.7 percent of its home refinance loans in moderate-income tracts, which was similar to the percentage of owner-occupied units in these tracts (17.6 percent). In 2022, the bank's lending (21.7 percent) was above aggregate performance (14.5 percent). However, in 2023, the bank made no home refinance loans in moderate-income tracts despite opportunities for lending as reflected by demographic data (17.6 percent) and aggregate performance (16.6 percent).

Home Improvement Loans
Home improvement lending in low-income tracts is adequate. In 2021 and 2023, the bank made no home improvement loans in low-income tracts. In 2022, the bank made 2.6 percent of its home improvement loans in low-income tracts, which was above aggregate performance (0.9 percent). However, as reflected by aggregate performance across the review period (1.9 percent in 2021, 0.9 percent in 2022, and 1.3 percent in 2023), challenges exist in low-income tracts for all banks and opportunities for home improvement loans are limited. Therefore, Regions Bank performance for the review period was deemed adequate.

Home improvement lending in moderate-income tracts is adequate. In 2021, the bank made no home improvement loans in moderate-income tracts despite opportunities for lending as reflected by demographic data and aggregate performance. In 2022 and 2023, the bank made 12.1 percent of its home improvement loans in moderate-income tracts, which was below the percentage of owner-occupied units in these tracts (17.6 percent). However, in 2022, the bank's lending (10.3 percent) was above aggregate performance (7.8 percent) and in 2023, the bank's lending (15.8 percent) was above aggregate performance (10.1 percent).

Small Business Loans
Small business lending in low-income tracts is poor. In 2021, the bank made 7.3 percent of its small business loans in low-income tracts, which was below the percentage of total businesses located in these tracts (9.4 percent) and below aggregate performance of 8.5 percent. In 2022 and 2023, the bank made 4.7 percent of its small business loans in low-income tracts, which was below the percentage of total businesses located in these tracts

(6.9 percent). In 2022, the bank's lending (4.0 percent) was below aggregate performance (6.0 percent) and in 2023, the bank's lending (5.1 percent) was again below aggregate performance of 6.4 percent.

Small business lending in moderate-income tracts is adequate. In 2021, the bank made 16.1 percent of its small business loans in moderate-income tracts, which was below the percentage of total businesses located in these tracts (18.8 percent) but similar to aggregate performance of 16.5 percent. In 2022 and 2023, the bank made 18.8 percent of its small business loans in moderate-income tracts, which was below the percentage of total businesses located in these tracts (20.7 percent). In 2022, the bank's lending (16.0 percent) was below aggregate performance (17.8 percent) but in 2023, the bank's lending (20.5 percent) was above aggregate performance of 17.5 percent.

No conspicuous lending gaps were identified based on an analysis of the dispersion of the loan products reviewed, particularly in light of the bank's limited presence in this AA. The bank had activity in over 60 percent of all census tracts throughout the review period, with most of that being in moderate- and upper-income areas surrounding the bank's three branches.

Lending to Borrowers of Different Incomes and Businesses of Different Sizes

The distribution of loans based on borrower income or gross annual revenues is poor. As described in the following sections, overall performance for HMDA-reportable lending is poor and small business lending performance is poor.

Home Purchase Loans

Home purchase lending to low-income borrowers is poor. In 2021, the bank made 1.0 percent of its home purchase loans to low-income borrowers, which was below the percentage of low-income families (22.4 percent) and below aggregate performance of 5.1 percent. In 2022, the bank made no home purchase loans to low-income borrowers despite opportunities for lending as reflected in demographic data and aggregate performance. In 2023, the bank made 1.8 percent of its home purchase loans to low-income borrowers, which was below aggregate performance of 3.0 percent.

Home purchase lending to moderate-income borrowers is adequate. In 2021, the bank made 11.3 percent of its home purchase loans to moderate-income borrowers, which was below the percentage of moderate-income families (15.5 percent) and below aggregate performance of 17.5 percent. Bank performance improved in 2022 and 2023, with the bank making 17.0 percent of its home purchase loans to moderate-income borrowers, which was similar to the percentage of moderate-income families (16.5 percent). In 2022, the bank's lending (14.0 percent) was below aggregate performance (15.9 percent); however, the bank's lending (19.6 percent) was above aggregate performance (14.5 percent) in 2023.

Home Refinance Loans

Home refinance lending to low-income borrowers is poor. In 2021, the bank made 7.0 percent of its home refinance loans to low-income borrowers, which was below the percentage of low-income families (22.4 percent) but above aggregate performance of 4.7 percent. In 2022 and 2023, the bank made 3.3 percent of its home refinance loans to low-income borrowers, which was below the percentage of low-income families (21.3 percent). In 2022, the bank's lending (4.3 percent) was below aggregate performance (10.4 percent) and in 2023, the bank made no home refinance loans to low-income borrowers despite opportunities for lending as reflected in aggregate performance (10.2 percent).

Home refinance lending to moderate-income borrowers is adequate. In 2021, the bank made 13.0 percent of its home refinance loans to moderate-income borrowers, which was below the percentage of moderate-income

families (15.5 percent) and below aggregate performance of 14.3 percent. However, bank performance improved in 2022 and 2023, with the bank making 23.3 percent of its home refinance loans to moderate-income borrowers, which was above the percentage of moderate-income families (16.5 percent). In 2022, the bank's lending (17.4 percent) was below aggregate performance (18.7 percent); however, the bank's lending (42.9 percent) was more than double aggregate performance (17.8 percent) in 2023.

Home Improvement Loans

Home improvement lending to low-income borrowers is poor. In 2021, the bank made no home improvement loans to low-income borrowers despite opportunities for lending as reflected in demographic data (22.4 percent) and aggregate performance (3.9 percent). In 2022 and 2023, the bank made 3.4 percent of its home improvement loans to low-income borrowers, which was below the percentage of low-income families (21.3 percent). In 2022, the bank's lending (2.6 percent) was below aggregate performance (4.2 percent) and in 2023, the bank's lending (5.3 percent) was similar to aggregate performance (5.0 percent).

Home improvement lending to moderate-income borrowers is adequate. In 2021, the bank made 22.7 percent of its home improvement loans to moderate-income borrowers, which was above the percentage of moderate-income families (15.5 percent) and more than double aggregate performance of 10.1 percent. In 2022 and 2023, the bank made 10.3 percent of its home improvement loans to moderate-income borrowers, which was below the percentage of moderate-income families (16.5 percent). In 2022, the bank's lending (10.3 percent) was below aggregate performance (12.3 percent) and in 2023, the bank's lending (10.5 percent) was below aggregate performance (15.0 percent).

Small Business Loans

Small business lending to businesses of different sizes is poor. In 2021, the bank made 56.5 percent of its small business loans to businesses with revenues of $1 million or less, which was below the percentage of total businesses with revenues of $1 million or less (92.7 percent). The bank's performance is above aggregate performance of 44.9 percent in 2021. However, 2021 was a year in which many banks extended PPP loans as a result of the COVID-19 pandemic and were not required to capture and report the revenue of the businesses, which is reflected in the aggregate data. As a result, performance context and loan size data were considered. In 2021, the bank made fewer loans of less than $250,000 to businesses (87.9 percent) compared to aggregate lenders (95.5 percent). Bank performance declined in 2022 and 2023, with the bank making 45.3 percent of its small business loans to businesses with revenues of $1 million or less, which was below the percentage of total businesses with revenues of $1 million or less (93.2 percent). In 2022, bank lending (40.0 percent) was below aggregate performance (49.2 percent) and in 2023, the bank's lending (48.7 percent) was below aggregate performance (51.0 percent).

CD Lending

The bank makes an excellent level of CD loans in the Charleston AA. During the review period, the bank originated or renewed five qualified CD loans totaling $30.6 million in the AA, all of which were for affordable housing to LMI individuals. Two of the loans were particularly impactful totaling $24.1 million for construction of apartments in the AA using LIHTCs, which are complex. The projects were designed to create 288 new units of affordable housing exclusively for low-income individuals and/or families. These loans are responsive given the affordable housing challenges and the need for additional affordable housing units in the AA, as noted by community contacts.

INVESTMENT TEST

The bank made a significant level of qualified CD investments and grants in the Charleston AA, totaling $7.8 million. This amount included one current period investment totaling $700,000, 11 prior period investments still outstanding with a balance of $7.1 million, and 12 donations totaling $58,800.

Investment types varied and addressed a range of CD needs. These include SBIC funds to address small business financing needs, LIHTC projects to address affordable housing challenges, and MBS supporting LMI borrowers. The bank made significant use of innovative and/or complex investments to support CD initiatives. Additionally, the bank exhibits good responsiveness to CD needs.

Some examples of noteworthy investments and grants provided during the review period include:

- A $700,000 current period SBIC allocation to finance a small business in the AA.
- One prior period LIHTC of $5 million, originally purchased in 2021. This LIHTC investment helped to build 108 new units of affordable housing for LMI individuals and families.
- A $30,000 contribution to support a technical college workforce development program that primarily serves LMI students.
- Three contributions totaling $7,500 to support a local nonprofit that provides financial literacy classes, employment search assistance, and emergency financial support to LMI individuals and families in the AA.

SERVICE TEST

Retail banking services are adequate in Charleston. Additionally, the bank provides a limited level of CD services in its AA.

Retail Banking Services

Retail service delivery systems are reasonably accessible to the bank's geographies and individuals of different income levels throughout the Charleston AA. In deriving this conclusion, the distribution of the bank's branches by census tract income level was compared to the distribution of households and businesses among the tract categories in the AA. As the following tables show, the bank operated three branches in the AA with one in a moderate-income tract (33.3 percent) and two in upper-income tracts (66.6 percent). By comparison, 22.1 percent of households live in moderate-income tracts and 20.7 percent of businesses are located in these tracts. The low number of total branches in this AA was taken into consideration when evaluating the accessibility of the bank's retail services.

The bank closed two branches and opened one branch in upper-income tracts during the review period. Specifically, the bank consolidated one branch and relocated another branch into a new branch. The bank's branch opening and closings have generally not adversely affected the accessibility of the bank's delivery systems.

The bank's weekday branch lobby and drive-through hours are consistent across all branches in the AA, opening at 9 a.m. and closing at 5 p.m. However, the bank offers Saturday hours at its branch in an upper income tract but does not offer similar hours at the branch located in a moderate-income tract. While the bank does offer the same suite of products and services throughout the AA, the branch hours vary in a way that inconveniences the AA, particularly LMI geographies and LMI individuals.

The tables below show the distribution of branches and ATMs along with households and businesses by tract category.

CD Services

The bank provides a limited level of CD services in the AA. During the review period, bank employees provided eight CD service activities totaling 31 hours to five organizations operating throughout the AA. Bank staff leveraged their financial expertise by providing financial education, primarily to LMI workers through their place of employment, and by serving on the board of directors for a nonprofit organization that provides assistance to LMI seniors.

METROPOLITAN AREAS
LIMITED-SCOPE REVIEW

The following MSA AAs were reviewed using limited-scope examination procedures. Through these procedures, conclusions regarding the institution's CRA performance are drawn from the review of available facts and data, including performance and demographic information. Please refer to the tables in *Appendices G and H* for additional information regarding these AAs.

DESCRIPTION OF INSTITUTION'S OPERATIONS IN SOUTH CAROLINA MSA Aas

MSA AA	AA Delineation/Counties	# Branches *(as of 12/31/2023)*	Deposits ($000s) *(as of June 30, 2023)*
Columbia	Richland	1	$73,881
Greenville	Anderson & Greenville	3	$185,525
Hilton Head Island-Bluffton	Beaufort & Jasper	4	$256,032
Spartanburg	Spartanburg	1	$51,652

CONCLUSIONS WITH RESPECT TO PERFORMANCE TESTS

The following table compares conclusions regarding performance in each limited-scope MSA AA to overall performance for the state of South Carolina.

Performance in the Limited-Scope Review Metropolitan Assessment Areas			
MSA AA	**Lending Test**	**Investment Test**	**Service Test**
Columbia	Consistent	Consistent	Consistent
Greenville	Consistent	Consistent	Not Consistent (Below)
Hilton Head Island-Bluffton	Not Consistent (Exceeds)	Consistent	Consistent
Spartanburg	Not Consistent (Below)	Not Consistent (Below)	Not Consistent (Below)

The key performance standards of the Lending Test for limited-scope areas included geographic distribution, borrower distribution, and CD loans. For the geographic distribution of loans, performance was poor in Columbia, good in Hilton Head Island-Bluffton, and adequate in the remaining AAs. Borrower distribution was adequate in all AAs. Qualifying amounts and conclusions for CD loans were as follows: $5.6 million in Columbia (adequate); $38.7 million in Greenville (excellent); and $14.1 million in Hilton Head Island-Bluffton (excellent). The bank made no qualifying CD loans in Spartanburg.

Qualifying amounts and conclusions for the bank's investment and grant activity in limited-scope MSA areas were as follows: $43.5 million in Columbia (excellent level), $21 million in Greenville (excellent level), $14.6 million in Hilton Head Island-Bluffton (excellent level), and $1.1 million in Spartanburg (significant level).

The performance standards of the Service Test for limited-scope MSA areas included retail banking and CD services. Conclusions for retail banking services were as follows: good in Columbia, adequate in Hilton Head Island-Bluffton, and poor in Greenville and Spartanburg. Qualifying hours and conclusions for CD services were as follows: 12 hours in Columbia (poor level); 86 hours in Greenville (adequate level); 198 hours in Hilton Head Island-Bluffton (relatively high level); and 11 hours in Spartanburg (poor level).

Performance in the limited-scope MSA AAs did impact overall performance for the state. See the *Investment Test* under the Conclusions with Respect to Performance Tests in South Caolina section for more details.

NONMETROPOLITAN STATEWIDE AREAS
LIMITED-SCOPE REVIEW

The following non-MSA AAs were reviewed using limited-scope examination procedures. Through these procedures, conclusions regarding the institution's CRA performance are drawn from the review of available facts and data, including performance and demographic information. Please refer to the tables in *Appendices G and H* for additional information regarding these AAs.

DESCRIPTION OF INSTITUTION'S OPERATIONS IN SOUTH CAROLINA NON-MSA Aas

Non-MSA AA	AA Delineation/Counties	# Branches *(as of 12/31/2023)*	Deposits ($000s) *(as of June 30, 2023)*
Barnwell	Barnwell	1	$45,378
Hampton	Hampton	1	$33,026

CONCLUSIONS WITH RESPECT TO PERFORMANCE TESTS

The following table compares conclusions regarding performance in each limited-scope non-MSA AA to overall performance for the state of South Carolina.

Performance in the Limited-Scope Review Non-MSA Assessment Areas			
Non-MSA AA	**Lending Test**	**Investment Test**	**Service Test**
Barnwell	Not Consistent (Below)	Not Consistent (Below)	Consistent
Hampton	Not Consistent (Below)	Consistent	Consistent

The key performance standards of the Lending Test for limited-scope areas included geographic distribution, borrower distribution, and CD loans. For the geographic distribution of loans, performance was not rated in either AA due to the absence of LMI tracts during the review period. Borrower distribution was adequate in both AAs. The bank made no qualifying CD loans in the AAs.

Qualifying amounts and conclusions for the bank's investment and grant activity in limited-scope non-MSA areas were as follows: $12,500 in Barnwell (few, if any) and $2.5 million in Hampton (excellent level).

The performance standards of the Service Test for limited-scope non-MSA areas included retail banking and CD services. Retail banking services for both AAs were adequate. The bank had a poor level of CD services in each AA, with 14 hours of qualifying CD services in Barnwell and 17 hours in Hampton.

Performance in the limited-scope non-MSA AAs did impact overall performance for the state. See the *Investment Test* under the Conclusions with Respect to Performance Tests in South Caolina section for more details.

NORTH CAROLINA

CRA RATING FOR NORTH CAROLINA: SATISFACTORY

The Lending Test is rated: **Low Satisfactory**
The Investment Test is rated: **Outstanding**
The Service Test is rated: **Low Satisfactory**

Major factors contributing to this rating include:

- The geographic distribution of loans reflects poor penetration throughout North Carolina AAs.
- The distribution of borrowers reflects poor penetration throughout North Carolina AAs.
- The bank made an excellent level of CD loans in North Carolina.
- The bank made an excellent level of qualified CD investments and grants in North Carolina.
- Retail banking services, which includes accessibility of delivery systems, changes in branch locations, and reasonableness of hours and services, are poor.
- The bank is a leader in providing CD service activities in North Carolina, given its presence in the AAs.

SCOPE OF EXAMINATION

A full-scope review was conducted for the following AA in North Carolina:
• Charlotte

Limited-scope reviews were conducted for the remaining two AAs:
• Macon
• Raleigh

The time period, products, and affiliates evaluated for these AAs are consistent with the scope discussed in the institution section of this report.

DESCRIPTION OF INSTITUTION'S OPERATIONS IN NORTH CAROLINA

As of June 30, 2023, Regions had $870 million in deposits in North Carolina accounting for 0.7 percent of its total deposits. Regions Bank operated seven branch offices in North Carolina as of December 31, 2023, representing 0.6 percent of its total branches. HMDA-reportable lending in North Carolina accounted for 1.0 percent of total institutional HMDA-reportable lending by number of loans and 3.1 percent by dollar volume. Small business lending in North Carolina accounted for 0.7 percent of the bank's total small business lending by number of loans and 1.0 percent by dollar volume. Overall, the bank's HMDA-reportable and small business lending activity in the state was greater than the percentage of total institutional deposits.

The following table shows lending activity from January 1, 2021 through December 31, 2023.

Statewide Summary of Lending Activity

Originations & Purchases

CONCLUSIONS WITH RESPECT TO PERFORMANCE TESTS IN NORTH CAROLINA

LENDING TEST

Overview

The Lending Test rating for the state of North Carolina is Low Satisfactory. The rating is a result of performance in each characteristic of the Lending Test applicable to the state, including Lending Activity (excellent); Geographic Distribution (poor); Borrower Distribution (poor); and CD Lending (excellent). Highlights of each characteristic are found in the sections that follow, with additional descriptions and details within the full-scope AA of the state.

Lending Activity

Lending levels reflect excellent responsiveness to the credit needs of North Carolina AAs. The total number and dollar volume of HMDA-reportable and small business loans was considered in arriving at Lending Activity conclusions, as well as competitive factors and the bank's overall importance to each AA. Statewide conclusions are derived from conclusions within each AA as detailed in the *Lending Activity* section of the Charlotte AA.

Geographic and Borrower Distribution

The geographic distribution of HMDA-reportable and small business loans reflects poor dispersion throughout North Carolina AAs and the distribution of loans by borrower income and revenue size of businesses is poor. The analyses of HMDA-reportable and small business lending within the full-scope AA are discussed in detail later in this report.

CD Lending

The bank made an excellent level of CD loans in North Carolina. During the review period, the bank originated or renewed $214.3 million in qualified CD loans directly benefiting North Carolina AAs. More information on CD loans can be found in the full-scope AA section of this report.

The bank was considered responsive to the CD needs of its AAs in the state. Therefore, the bank also received consideration for three loans totaling $8.9 million for the construction of affordable housing units outside the bank's AAs in North Carolina. Two of the loans totaling $7.1 million were for the creation of 48 units of affordable multifamily housing in Lenoir County using LIHTCs and one loan was for the creation of mixed-income housing in Buncombe County, with 20 percent of units set aside for LMI individuals and/or families[78].

INVESTMENT TEST

The Investment Test rating for North Carolina is Outstanding. The bank made an excellent level of qualified CD investments and grants in North Carolina, with $45.4 million in qualified investments and $562,600 in qualified contributions directly benefiting its North Carolina AAs. The bank also received consideration at the state level for a $2,500 contribution to a nonprofit aimed at addressing hunger and food insecurity across North Carolina.

The bank made an excellent level of qualified investments and contributions in the Charlotte full-scope AA. Details regarding specific investments and contributions can be found in the full-scope AA section of this report.

The bank was responsive to the needs of its AAs in the state of North Carolina. Therefore, the bank also received consideration for $26.4 million in qualified investments and $1,700 in contributions within the state that benefited geographies outside of the bank's AAs. This included a $4.9 million current period LIHTC, a $3.9 million current period NMTC, and a $3.5 million current period SBIC allocation.

SERVICE TEST

The Service Test rating for North Carolina is Low Satisfactory.

Retail Services

Delivery systems are unreasonably inaccessible to portions of the bank's geographies and individuals of different income levels in North Carolina. As of December 31, 2023, Regions operated seven branches in the state and none are in LMI tracts. The bank did not open or close any branches during the review period. The reasonableness of business hours and services was not evaluated given the lack of branches in LMI tracts across the state. The bank's limited presence in the state was a factor taken into consideration when evaluating retail services in North Carolina. Additional details on the bank's retail services can be found in the full-scope AA section of this report.

CD Services

Regions provides an excellent level of CD services in North Carolina given its limited presence in the state. During the review period, the bank engaged in 1,123 hours of qualifying CD service activities in the state. This total includes 1,079 hours directly benefiting individual AAs in North Carolina and 44 hours benefiting a BSRA that includes all of the bank's AAs in the state. These hours include board of directors' representation for a statewide CDFI that provides financing for small businesses as well as technical support and committee representation for several statewide organizations focused on financial education, access to banking, and improving partnerships between banks and CD organizations.

Additional details of service hours in North Carolina are described later within each individual AA they benefit.

[78] This mixed-income housing loan totaled $8.7 million. In accordance with the CRA Questions and Answers, .12(h)-8, the bank received pro rata consideration for 20 percent of that total, or $1.8 million.

METROPOLITAN AREA – CHARLOTTE MSA
(Full-Scope Review)

DESCRIPTION OF INSTITUTION'S OPERATIONS IN THE CHARLOTTE AA

Overview

The Charlotte AA consists of Mecklenburg County, one of the eleven counties that comprise the Charlotte-Concord-Gastonia, NC-SC MSA. As of December 31, 2023, the bank operated four branches in the AA, representing 57.1 percent of its branches in the state of North Carolina and 0.3 percent of the bank's total branches. Of the branches in the AA, two are in a middle-income census tract and two are in upper-income census tracts. As a percentage within the state of North Carolina, 79.8 percent of the bank's deposit volume and 61.8 percent of the bank's combined HMDA-reportable and small business loans by number are located in the Charlotte AA.

The AA is a highly competitive banking market, with a significant presence of national and regional banks. There are 35 financial institutions operating 242 branch locations in the AA. Regions Bank ranked 10th with deposit market share of 0.2 percent ($639.8 million). Bank of America had the largest deposit market share at 65.6 percent, followed by Truist Bank and Wells Fargo Bank with 21.1 percent and 9.6 percent deposit market share, respectively.

For HMDA-reportable lending, Regions originated and/or purchased 0.49 percent in 2021, 0.48 percent in 2022, and 0.46 percent 2023 of the total HMDA-reportable loans in the AA Regions was 39th out of 720 reporters in 2021; 43rd out of 672 reporters in 2022; and 48th out of 628 reporters in 2023. Rocket Mortgage was the top HMDA reporter in the market in 2021 and 2022. Bank of America was the top HMDA reporter in 2023.

For small business lending, Regions ranked 28th out of 185 reporters in 2021 with 0.29 percent of small business loans. In 2022, the bank ranked 53rd out of 162 reporters with 0.05 percent of total small business loans. In 2023, Regions ranked 35th out of 148 reporters with 0.19 percent of total small business loans. American Express was the top small business lender in the market for 2021, 2022 and 2023. As with HMDA-reportable lending, Regions is an active CRA small business lender in this AA.

AA Demographics, Population, and Income Characteristics

Mecklenburg County has grown in the past several years. Population in the AA was approximately 1.2 million as of 2023, representing an increase of 4.3 percent since 2020, which is above the state (3.8 percent) and national (1.0 percent) growth levels in the same timeframe. Charlotte is the principal city for the area with a population of 911,311 and has been a significant contributor to the growth in Mecklenburg County.[79]

In 2021 the AA contained 233 census tracts: 29 low-income tracts (12.4 percent), 50 moderate-income tracts (21.5 percent), 52 middle-income tracts (22.3 percent), 98 upper-income tracts (42.1 percent), and four unknown-income tracts (1.7 percent). In 2022 and 2023, census map changes increased the total number of census tracts to 305: 19 low-income tracts (6.2 percent), 77 moderate-income tracts (25.2 percent), 71 middle-income tracts (23.3 percent), 130 upper-income tracts (42.6 percent), and eight unknown-income tracts (2.6 percent).

For purposes of classifying borrower income, this evaluation uses the FFIEC estimated median family income for the relevant area. As the following table shows, the median family income increased from $77,300 in 2021 to $98,700 in 2023.

[79] "QuickFacts: North Carolina; Mecklenburg County; Charlotte; United States." *United States Census Bureau*, https://www.census.gov/quickfacts/fact/table/NC,mecklenburgcountynorthcarolina,charlottecitynorthcarolina,US/PST045221. Accessed 5 December 2025.

Borrower Income Levels
Charlotte-Concord-Gastonia, NC-SC MSA

FFIEC Estimated Median Family Income		Low 0 - 49.99%	Moderate 50% - 79.99%	Middle 80% - 119.99%	Upper 120% - & above
2021	**$77,300**	0 - $38,649	$38,650 - $61,839	$61,840 - $92,759	$92,760 - & above
2022	**$91,700**	0 - $45,849	$45,850 - $73,359	$73,360 - $110,039	$110,040 - & above
2023	**$98,700**	0 - $49,349	$49,350 - $78,959	$78,960 - $118,439	$118,440 - & above

There are 256,164 total families in the AA. Of these families, 20.2 percent are low-income, 16.6 percent are moderate-income, 18.3 percent are middle-income, and 44.8 percent are upper-income. Of the total families, 7.8 percent have incomes below the poverty level, which is lower than the families below poverty for the state of North Carolina (10.0 percent). Additionally, poverty rates are higher in LMI tracts, with 28.8 percent of the families residing in low-income tracts living below the poverty level and 14.0 percent of the families residing in moderate-income tracts living below the poverty level. Moreover, 44.7 percent of low-income families and 38.0 percent of moderate-income families reside in moderate-income tracts. This indicates the importance of lending in moderate-income tracts in order to reach LMI borrowers.

Housing Characteristics

There are 455,602 total housing units in the AA, of which 52.2 percent are owner-occupied, 40.4 percent are rental units, and 7.4 percent are vacant. Fewer home ownership opportunities exist in LMI tracts. Specifically, 25.2 percent of all housing units in low-income tracts and 43.6 percent of all housing units in moderate-income tracts are owner-occupied.

The median age of the housing stock in the AA was 35 years, which is older than that of homes in North Carolina (32 years). Housing units in LMI census tracts were older, with the median age of housing stock being 49 years in low-income tracts and 43 years in moderate-income tracts. The older age of homes is an indicator of potential opportunity for home improvement loans in LMI tracts.

The median housing value in the AA was $253,540, which is higher than the median housing value in North Carolina ($182,100). Median gross rent in the AA was $1,194 per month, which was higher than the median gross rent in the state of North Carolina ($932 per month). Additionally, the affordability ratio of the AA (27.2 percent) is lower than the affordability ratio for the state of North Carolina (31.1 percent). Housing cost burden is also a challenge in the AA. Data shows that the percentage of renters with rent costs greater than 30 percent of income is 43.5 percent, which is slightly higher than the state of North Carolina at 42.7 percent.

Economic Conditions

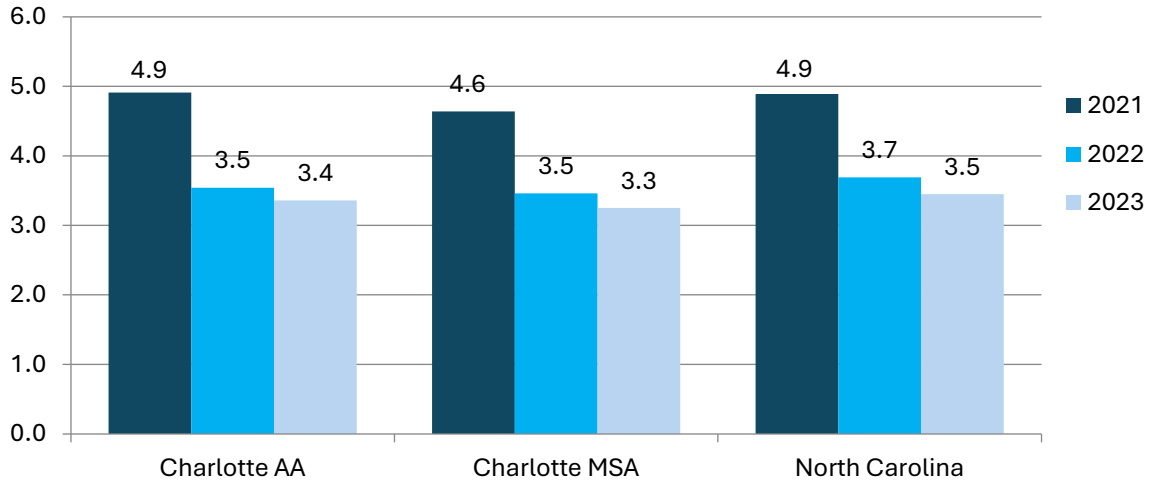
Charlotte is recognized as one of the largest banking centers in the nation. Other leading industries in the area include trade, transportation, education, healthcare, professional/business services, government, and utilities.[80] The area has experienced relatively good strong growth in the last several years. Between January 2020 and December 2023, total nonfarm payrolls in the Charlotte MSA increased 5.1 percent from 1.265 million to

[80] "Charlotte, NC-SC, Area Economic Summary." *Bureau of Labor Statistics*, 5 Dec 2024, https://www.bls.gov/regions/southeast/summary/blssummary_charlotte.pdf. Accessed 14 March 2022.

1.329 million.[81] Atrium Health, Wells Fargo, Bank of America, Novant Health, Duke Energy, and Spectrum are among the top employers in the region.[82] The Charlotte area serves as the headquarters for eight Fortune 500 companies, including Bank of America, Lowe's, Honeywell, Truist, Duke Energy, Nucor, Sonic Automotive, and Albemarle.[83]

The following table shows the unemployment rate for the AA, the MSA, and the state of North Carolina for 2021, 2022 and 2023. The unemployment rate in the AA decreased from 4.9 percent in 2021 to 3.4 percent in 2023. The North Carolina unemployment rate similarly decreased from 4.9 percent in 2021 to 3.5 percent in 2023.

Unemployment Rates - NC Charlotte



Credit and CD Needs

To better understand the local CD and economic landscapes, individuals familiar with the community and with CD activities were contacted. These individuals discussed the various opportunities and challenges and how financial institutions can be responsive to local CD needs through lending, investment, and/or service activities.

For small businesses, the contact discussed challenges and credit needs in the area. The contact stated that access to capital for the underserved communities is a key challenge. The contact also mentioned that access to capital is a challenge for small businesses, which is why partnerships with banks and CDFIs are crucial. The importance of technical assistance and business education was also emphasized. There are still underserved communities and unmet demand for accessible capital, technical assistance, and strong partnerships between banks and community organizations. Overall, the contact suggested there is room for improvement in the performance and engagement of local financial institutions in supporting CD initiatives through donations, investments, and services.

A second community contact engaged in affordable housing was interviewed. In discussing the economic conditions of Charlotte, the contact stated that affordable housing continues to be a major challenge with developers needing more flexible and longer-term financing options to make deals feasible. Small business development and support is another priority identified by the community as an area needing more investment

from banks and partners. Food insecurity and ensuring basic needs, like access to healthy food options, has risen as an issue, especially during and following the pandemic. Programs to address this issue needs funding. Home repair assistance and support for seniors and low-income homeowners to stay in their homes was also highlighted as important by community members. Workforce development and job training opportunities are ongoing needs, though not discussed in detail in this context. The pandemic created additional economic hardship over the past several years, increasing demand for CD resources and partnerships. The contact mentioned multiple CD loan, investment, and donation opportunities in the area.

CONCLUSIONS WITH RESPECT TO PERFORMANCE TESTS IN THE CHARLOTTE AA

LENDING TEST

Lending levels reflect excellent responsiveness to credit needs of the AA. The geographic distribution of loans reflects poor penetration throughout the AA and the distribution of loans reflects poor penetration among borrowers of different income levels and businesses of different revenue sizes. The bank made an excellent level of CD loans in the Charlotte AA.

The analysis included 733 HMDA-reportable loans and 228 small business loans reported by the bank in the AA during the review period. Therefore, HMDA-reportable lending received greater weight in determining conclusions. Additionally, during 2021, 2022, and 2023 the bank originated or purchased 403 home purchase loans, 215 home refinance loans, and 59 home improvement loans in the AA. Thus, when considering HMDA-reportable loan categories, greatest weight was assigned to home purchase loans given its relative share of the total HMDA-reportable lending in this AA, followed by home refinance loans, and to a lesser extent, home improvement loans.

Details of the bank's mortgage and small business lending and information regarding lending by peers can be found in *Appendix F.*

Lending Activity

Lending activity is considered excellent. Overall, 1.9 percent of HMDA-reportable loans and 0.8 percent of small business loans were made in the AA. The percentage of the bank's HMDA-reportable lending, which is the most heavily weighted product in the AA, exceeds the percentage of its area deposits. Additionally, the percentage of small business lending is consistent with the percentage of its area deposits.

Geographic Distribution of Loans

The geographic distribution of loans reflects poor penetration throughout the AA. As described in the following sections, overall performance for HMDA-reportable lending is poor and small business lending performance is adequate.

Home Purchase Loans

Home purchase lending in low-income tracts is poor. In 2021, the bank made 2.4 percent of its home purchase loans in low-income tracts, which was below the percentage of owner-occupied units in these tracts (4.3 percent) and below aggregate performance of 5.2 percent. In 2022 and 2023, the bank made 3.8 percent of its home purchase loans in low-income tracts, which was above the percentage of owner-occupied units in these tracts (2.9 percent). In 2022, the bank's lending (4.3 percent) was similar to aggregate performance (4.1 percent) but in 2023, the bank's lending (3.2 percent) was below aggregate performance (5.0 percent).

Home purchase lending in moderate-income tracts is poor. In 2021, the bank made 6.0 percent of its home purchase loans in moderate-income tracts, which was below the percentage of owner-occupied units in these tracts (16.1 percent) and below aggregate performance of 16.3 percent. In 2022 and 2023, the bank made 15.3 percent of its home purchase loans in moderate-income tracts, which was below the percentage of owner-occupied units in these tracts (21.6 percent). In 2022, the bank's lending (10.0 percent) was less than half aggregate performance (21.2 percent) and in 2023, the bank's lending (23.2 percent) was above aggregate performance (21.9 percent).

Home Refinance Loans

Home refinance lending in low-income tracts is poor. In 2021, the bank made 1.1 percent of its home refinance loans in low-income tracts, which was below the percentage of owner-occupied units in these tracts (4.3 percent) and below aggregate performance of 3.3 percent. In 2022 and 2023, the bank made 2.7 percent of its home refinance loans in low-income tracts, which was similar to the percentage of owner-occupied units in these tracts (2.9 percent). In 2022, the bank's lending (4.0 percent) was above aggregate performance (2.6 percent). However, in 2023, the bank made no home refinance loans in low-income tracts despite opportunities for lending as reflected by demographic data (2.9 percent) and aggregate performance (3.4 percent).

Home refinance lending in moderate-income tracts is poor. In 2021, the bank made 6.7 percent of its home refinance loans in moderate-income tracts, which was below the percentage of owner-occupied units in these tracts (16.1 percent) and below aggregate performance of 12.9 percent. In 2022 and 2023, the bank made 21.6 percent of its home refinance loans in moderate-income tracts, which matched the percentage of owner-occupied units in these tracts (21.6 percent). In 2022, the bank's lending (28.0 percent) was above aggregate performance (21.9 percent) but in 2023, the bank's lending (8.3 percent) was below aggregate performance (23.8 percent).

Home Improvement Loans

Home improvement lending in low-income tracts is adequate. In 2021 and 2023, the bank made no home improvement loans in low-income tracts. In 2022, the bank made 7.4 percent of its home improvement loans in low-income tracts, which was above the percentage of owner-occupied units in these tracts (2.9 percent) and more than triple aggregate performance (2.1 percent). However, as reflected by aggregate performance across the review period, challenges exist in low-income tracts for all banks and opportunities for home improvement loans are limited. Therefore, Regions' performance for the review period was deemed adequate.

Home improvement lending in moderate-income tracts is poor. In 2021, the bank made 13.3 percent of its home improvement loans in moderate-income tracts, which was below the percentage of owner-occupied units in these tracts (16.1 percent) but above aggregate performance of 11.7 percent. Bank performance declined in 2022 and 2023, with the bank making 9.1 percent of its home improvement loans in moderate-income tracts, which was below the percentage of owner-occupied units in these tracts (21.6 percent). In 2022, the bank's lending (11.1 percent) was below aggregate performance (14.4 percent) and in 2023, the bank's lending (5.9 percent) was below aggregate performance (16.4 percent).

Small Business Loans

Small business lending in low-income tracts is good. In 2021, the bank made 12.2 percent of its small business loans in low-income tracts, which was above the percentage of total businesses located in these tracts (9.1 percent) and above aggregate performance of 9.0 percent. In 2022 and 2023, the bank made 7.2 percent of its small business loans in low-income tracts, which was above the percentage of total businesses located in these tracts (5.4 percent). In 2022, the bank's lending (8.7 percent) was above aggregate performance (5.2 percent) and in 2023, the bank's lending (6.8 percent) was above aggregate performance of 4.9 percent.

Small business lending in moderate-income tracts is adequate. In 2021, the bank made 19.8 percent of its small business loans in moderate-income tracts, which was above the percentage of total businesses located in these tracts (15.9 percent) and above aggregate performance of 16.4 percent. In 2022 and 2023, the bank made 29.9 percent of its small business loans in moderate-income tracts, which was above the percentage of total businesses located in these tracts (23.9 percent). In 2022, the bank's lending (17.4 percent) was below aggregate performance (23.7 percent), but in 2023, the bank's lending (33.8 percent) was above aggregate performance of 23.7 percent.

No conspicuous lending gaps were identified based on an analysis of the dispersion of the loan products reviewed. The bank had activity in less than half of all census tracts throughout the review period. However, the bank has only four branches in this AA. Moreover, lending data and maps did not indicate an absence of loans across groups of LMI tracts, but instead, show that the majority of census tracts without loans are middle- and upper-income. Additionally, the bank had activity in approximately 40 percent of low-income census tracts and approximately 40 percent of moderate-income census tracts throughout the review period, further demonstrating its efforts to lend in LMI areas across the AA.

Lending to Borrowers of Different Incomes and Businesses of Different Sizes

The distribution of loans based on borrower income or gross annual revenues is poor. As described in the following sections, overall performance for HMDA-reportable lending is poor while small business lending performance is adequate.

Home Purchase Loans

Home purchase lending to low-income borrowers is poor. In 2021, the bank made no home purchase loans to low-income borrowers despite opportunities for lending as reflected by demographic data and aggregate performance. In 2022 and 2023, the bank made 1.3 percent of its home purchase loans to low-income borrowers, which was below the percentage of low-income families (20.2 percent). In 2022, the bank's lending (0.7 percent) was below aggregate performance (2.7 percent) and in 2023, the bank's lending (2.1 percent) was similar to aggregate performance (2.3 percent).

Home purchase lending to moderate-income borrowers is poor. In 2021, the bank made 4.8 percent of its home purchase loans to moderate-income borrowers, which was below the percentage of moderate-income families (15.1 percent) and below aggregate performance of 13.5 percent. In 2022 and 2023, the bank made 8.5 percent of its home purchase loans to moderate-income borrowers, which was below the percentage of moderate-income families (16.6 percent). In 2022, the bank's lending (8.6 percent) was below aggregate performance (13.3 percent) and in 2023, the bank's lending (8.4 percent) was below aggregate performance (12.3 percent).

Home Refinance Loans

Home refinance lending to low-income borrowers is poor. In 2021, the bank made 1.1 percent of its home refinance loans to low-income borrowers, which was below the percentage of low-income families (21.5 percent) and below aggregate performance of 4.4 percent. In 2022 and 2023, the bank made 5.4 percent of its home refinance loans to low-income borrowers, which was below the percentage of low-income families (20.2 percent). In 2022, the bank's lending (8.0 percent) was below aggregate performance (10.2 percent) and in 2023, the bank made no home refinance loans to low-income borrowers despite opportunities for lending as reflected by demographic data and aggregate performance.

Home refinance lending to moderate-income borrowers is adequate. In 2021, the bank made 10.1 percent of its home refinance loans to moderate-income borrowers, which was below the percentage of moderate-income families (15.1 percent) and below aggregate performance of 12.5 percent. Bank performance improved in 2022

and 2023, with the bank making 21.6 percent of its home refinance loans to moderate-income borrowers, which was above the percentage of moderate-income families (16.6 percent). In 2022, the bank's lending (28.0 percent) was above aggregate performance (20.1 percent) and in 2023, the bank's lending (8.3 percent) was below aggregate performance (18.9 percent).

Home Improvement Loans

Home improvement lending to low-income borrowers is poor. In 2021, the bank made 6.7 percent of its home improvement loans to low-income borrowers, which was below the percentage of low-income families (21.5 percent) but above aggregate performance of 3.2 percent. However, the bank made no home improvement loans to low-income borrowers in 2022 or 2023 despite opportunities for lending as reflected by demographic data and aggregate performance.

Home improvement lending to moderate-income borrowers is poor. In 2021, the bank made 6.7 percent of its home improvement loans to moderate-income borrowers, which was below the percentage of moderate-income families (15.1 percent) and below aggregate performance of 8.6 percent. In 2022 and 2023, the bank made 6.8 percent of its home improvement loans to moderate-income borrowers, which was below the percentage of moderate-income families (16.6 percent). In 2022, the bank's lending (7.4 percent) was below aggregate performance (11.5 percent) and in 2023, the bank's lending (5.9 percent) was again below aggregate performance (13.8 percent).

Small Business Loans

Small business lending to businesses of different sizes is adequate. In 2021, the bank made 63.4 percent of its small business loans to businesses with revenues of $1 million or less, which was below the percentage of total businesses with revenues of $1 million or less (91.7 percent). The bank's performance is above aggregate performance of 45.5 percent in 2021. However, 2021 was a year in which many banks extended PPP loans as a result of the COVID-19 pandemic and were not required to capture and report the revenue of the businesses, which is reflected in the aggregate data. As a result, performance context and loan size data were considered. In 2021, the bank made fewer loans of less than $250,000 to businesses (81.7 percent) compared to aggregate lenders (96.5 percent). In 2022 and 2023, the bank made 53.6 percent of its small business loans to businesses with revenues of $1 million or less, which was below the percentage of total businesses with revenues of $1 million or less (91.8 percent). However, in 2022, bank lending (56.5 percent) was above aggregate performance (51.2 percent) and in 2023, the bank's lending (52.7 percent) was similar to aggregate performance (53.8 percent). Moreover, the majority of the bank's small business loans were originated in amounts of $250,000 or less, indicating a willingness to lend in the smaller amounts that are typically requested by small businesses.

CD Lending

The bank makes an excellent level of CD loans in the Charlotte AA, particularly when considering the bank's limited presence in a highly competitive market. During the review period, the bank originated or renewed six qualified CD loans totaling $46.6 million. Specifically, the bank provided $32.7 million in affordable housing to LMI individuals and $13.9 million in economic development by financing small businesses. Two of the qualifying CD loans were impactful and/or responsive to AA needs as described below.

- One loan totaling $11.7 million for construction of apartments in the AA using LIHTCs, which are complex. The projects were designed to create 132 new units of affordable housing for LMI individuals and/or families, with at least 26 of those units being set aside for low-income individuals and/or families. These loans are responsive given the affordable housing challenges and the need for additional affordable housing units in the AA, as noted by community contacts.

- One new SBA 504 loan totaling $5.8 million that provided financing to a small business.

The Charlotte AA also positively benefited from two LOCs totaling $9.5 million to a national CDFI with prioritization in nine AAs, including Charlotte. The CDFI LOCs were previously described under the *CD Lending* heading for the institution.

INVESTMENT TEST

The bank made an excellent level of qualified CD investments and grants in the Charlotte AA, totaling $28.3 million. This amount included two current period investments totaling $20.9 million, six prior period investments totaling $6.9 million, and 76 donations totaling $509,900.

Investment types varied and addressed a range of CD needs. These include SBIC funds to address small business financing needs, LIHTC projects to address affordable housing challenges, and MBS supporting LMI borrowers. The bank made significant use of innovative and/or complex investments to support CD initiatives. Additionally, the bank exhibits excellent responsiveness to CD needs.

Examples of noteworthy investments and grants provided during the review period include:

- A $15.9 million current period LIHTC project. This LIHTC investment helped to build 132 new units of affordable housing for LMI individuals and families, which was responsive to the need for affordable housing in the AA.

- A $5 million current period SBIC allocation to finance a small business in the AA.

- A $100,000 donation to a local affordable housing developer to help fund the construction of 104 new units of affordable housing for LMI individuals and families.

- A $50,000 donation to a local nonprofit that offers financial workshops, 1:1 financial counseling, and interest-free loans to LMI individuals.

- A $7,500 donation to support a local CDFI focused on small business growth and development.

The Charlotte AA also positively benefited from a $2,500 donation benefiting a BSRA that includes the entire state of North Carolina. This donation was previously described under the *Investment Test* heading for the state of North Carolina.

SERVICE TEST

Retail banking services are poor in the Charlotte AA. The bank is a leader in providing CD service activities in the AA.

Retail Banking Services

Retail service delivery systems are unreasonably inaccessible to portions of the bank's geographies and individuals of different income levels throughout the Charlotte AA. In deriving this conclusion, the distribution of the bank's branches by census tract income level was compared to the distribution of households and businesses among the tract categories in the AA. As the following tables show, the bank operated four branches in the AA, with two in a middle-income tracts and two in upper-income tracts. The bank does not operate any branches in LMI tracts. By comparison, 5.8 percent of households live in low-income tracts and 5.4 percent of businesses are

located in these tracts; 25.8 percent of households live in moderate-income tracts and 23.9 percent of businesses are located in these tracts. The concentration of households and businesses in LMI tracts indicates that there is demand for retail banking services in these tracts.

The bank did not open or close any branches during the review period. The reasonableness of business hours and services was not evaluated given the lack of branches in LMI tracts in the AA.

The tables below show the distribution of branches and ATMs along with households and businesses by tract category.

CD Services

The bank is a leader in providing CD services in the AA, given their limited branch presence in Charlotte. During the review period, bank employees provided 235 CD service activities totaling 899 hours to 24 organizations operating throughout the AA. Bank staff provided their financial expertise in a variety of ways, including financial literacy and homebuyer education; service on board of directors; and other technical assistance.

Noteworthy and responsive CD services in the Charlotte AA include:

- 77 hours of board service to a regional nonprofit organization that provides transitional housing for LMI women and youth, and afterschool literacy training.

- 4 hours of legal services, provided by a bank attorney, with an organization that provides legal assistance to LMI youth and their families facing educational challenges.

- 29 hours of board service to a nonprofit organization that provides financial coaching, homebuyer education and low-interest loans targeted to LMI individuals to help them build assets.

- 76 hours of board service for an organization that provides workforce development training and job placement assistance in the food service industry, particularly for adults who face barriers to employment.

The Charlotte AA also positively benefited from 44 hours of CD service benefiting the BSRA that includes the entire state of North Carolina. These services were previously described under the CD services write up for the state.

METROPOLITAN AREA
LIMITED-SCOPE REVIEW

The following MSA AA was reviewed using limited-scope examination procedures. Through these procedures, conclusions regarding the institution's CRA performance are drawn from the review of available facts and data, including performance and demographic information. Please refer to the tables in *Appendices G and H* for additional information regarding the AA.

DESCRIPTION OF INSTITUTION'S OPERATIONS IN NORTH CAROLINA MSA AA

MSA AA	AA Delineation/Counties	# Branches *(as of 12/31/2023)*	Deposits ($000s) *(as of June 30, 2023)*
Raleigh	Wake	2	$120,989

CONCLUSION WITH RESPECT TO PERFORMANCE TESTS

The following table compares conclusions regarding performance in the limited-scope MSA AA to overall performance for the state of North Carolina.

Performance in the Limited-Scope Review Metropolitan Assessment Area			
MSA AA	**Lending Test**	**Investment Test**	**Service Test**
Raleigh	Consistent	Consistent	Consistent

The key performance standards of the Lending Test for the limited-scope area included geographic distribution, borrower distribution, and CD loans. For the geographic distribution of loans, performance was poor in Raleigh, and the borrower distribution was also poor. However, the bank made an excellent level of CD loans in Raleigh, totaling $167.8 million.

Qualifying amounts and conclusions for the bank's investment and grant activity in limited-scope MSA area was as follows: $17.3 million in Raleigh (excellent level).

The performance standards of the Service Test for limited-scope MSA areas included retail banking and CD services. Retail banking services in Raleigh were adequate. The bank had a relatively high level of qualifying CD services (143 hours). The Raleigh AA also positively benefited from 44 hours of CD service benefiting the BSRA that includes the entire state of North Carolina. These services were previously described under the CD services section for the state of North Carolina.

Performance in the limited-scope MSA AAs did not impact overall performance for the state.

NONMETROPOLITAN STATEWIDE AREA
LIMITED-SCOPE REVIEW

The following non-MSA AA was reviewed using limited-scope examination procedures. Through these procedures, conclusions regarding the institution's CRA performance are drawn from the review of available facts and data, including performance and demographic information. Please refer to the tables in *Appendices G and H* for additional information regarding the AA.

DESCRIPTION OF INSTITUTION'S OPERATIONS IN NORTH CAROLINA NON-MSA AA

Non-MSA AA	AA Delineation/Counties	# Branches *(as of 12/31/2023)*	Deposits ($000s) *(as of June 30, 2023)*
Macon	Macon	1	$54,713

CONCLUSION WITH RESPECT TO PERFORMANCE TESTS

The following table compares conclusions regarding performance in the limited-scope non-MSA AA to overall performance for the state of North Carolina.

Performance in the Limited-Scope Review Non-MSA Assessment Area			
Non-MSA AA	**Lending Test**	**Investment Test**	**Service Test**
Macon	Not Consistent (Below)	Not Consistent (Below)	Consistent

The key performance standards of the Lending Test for the limited-scope area included geographic distribution, borrower distribution, and CD loans. For the geographic distribution of loans, performance was not rated due to an absence of LMI tracts and borrower distribution was poor. Additionally, the bank made no qualifying CD loans in the Macon AA.

Qualifying amounts and conclusions for the bank's investment and grant activity in limited-scope non-MSA area was as follows: $292,800 in Macon (poor level).

The performance standards of the Service Test for limited-scope MSA areas included retail banking and CD services. Retail banking services in Macon were adequate. The bank had an adequate level of qualifying CD services (19 hours). The Macon AA also positively benefited from 44 hours of CD service benefiting the BSRA that includes the entire state of North Carolina. These services were previously described under the CD services section for the state of North Carolina.

Performance in the limited-scope non-MSA AAs did not impact overall performance for the state.

MISSOURI

CRA RATING FOR MISSOURI: NEEDS TO IMPROVE
The Lending Test is rated: Low Satisfactory
The Investment Test is rated: Needs to Improve
The Service Test is rated: Low Satisfactory

Major factors contributing to this rating include:

- The geographic distribution of loans reflects adequate penetration throughout Missouri AAs.
- The distribution of borrowers reflects good penetration throughout Missouri AAs.
- The bank made a low level of CD loans in Missouri.
- The bank made a poor level of qualified CD investments and grants in Missouri.
- Retail banking services, which includes accessibility of delivery systems, changes in branch locations, and reasonableness of hours and services, are adequate.
- The bank provides an adequate level of CD service activities in Missouri.

SCOPE OF EXAMINATION

A full-scope review was conducted for the following AA in Missouri:
- Cape Girardeau

Limited-scope reviews were conducted for the remaining seven AAs:
- Columbia
- Gasconade*
- Jefferson City
- Southeast Missouri
- Springfield
- St. Genevieve-Perry
- Taney

The time period, products, and affiliates evaluated for these AAs are consistent with the scope discussed in the institution section of this report.

*As of December 31, 2023, the bank operated no branch offices in this AA. The bank exited the AA in May 2021, early in the retail review period and before the beginning of the CD review period. This AA, therefore, was not included in the performance analysis.

DESCRIPTION OF INSTITUTION'S OPERATIONS IN MISSOURI

As of June 30, 2023, Regions Bank had $686 million in deposits in Missouri accounting for 0.5 percent of its total deposits. Regions Bank operated 13 branch offices in Missouri as of December 31, 2023, representing 1.0 percent of its total branches. HMDA-reportable lending in Missouri accounted for 0.9 percent of total institutional HMDA-reportable lending by number of loans and 0.6 percent by dollar volume. Small business lending in Missouri accounted for 0.4 percent of the bank's total small business lending by number of loans and 0.2 percent by dollar volume. Overall, the bank's HMDA-reportable and small business lending activity in the state was greater than the percentage of total institutional deposits.

The following table shows lending activity from January 1, 2021 through December 31, 2023.

Statewide Summary of Lending Activity

CONCLUSIONS WITH RESPECT TO PERFORMANCE TESTS IN MISSOURI

LENDING TEST

Overview

The Lending Test rating for Missouri is Low Satisfactory. The rating is a result of performance in each characteristic of the Lending Test applicable to the state, including Lending Activity (adequate); Geographic Distribution (adequate); Borrower Distribution (good); and CD Lending (low level). Highlights of each characteristic are found in the sections that follow, with additional descriptions and details within the full-scope AA of the state.

Lending Activity

Lending levels reflect adequate responsiveness to the credit needs of Missouri AAs. The total number and dollar volume of HMDA-reportable and small business loans were considered in arriving at Lending Activity

conclusions, as well as competitive factors and the bank's overall importance to each AA. Statewide conclusions are derived from conclusions within each AA as detailed in the *Lending Activity* section of the Cape Girardeau AA.

Geographic and Borrower Distribution

The geographic distribution of HMDA-reportable and small business loans reflects adequate dispersion throughout Missouri AAs and the distribution of loans by borrower income and revenue size of businesses is good. The analyses of HMDA-reportable and small business lending within the full-scope AA are discussed in detail later in this report.

CD Lending

The bank made a low level of CD loans in Missouri. During the review period, the bank originated $500,000 in qualifying CD loans in two of its Missouri AAs, with no qualifying CD loans found in the remaining AAs of the state. More information on CD loans can be found in the full-scope AA section of this report.

INVESTMENT TEST

The Investment Test rating for Missouri is Needs to Improve. The bank made a poor level of qualified CD investments and grants in Missouri, with $6.0 million in qualified investments and $106,500 in qualified contributions directly benefiting its Missouri AAs.

The bank made a poor level of qualified investments and contributions in the Cape Girardeau full-scope AA. Additional details regarding specific investments and contributions can be found in the full-scope AA section of this report. The bank did not adequately meet the needs of its Missouri AAs. As such, investment and donation activity outside the bank's AAs in Missouri was not considered.

SERVICE TEST

The Service Test rating for Missouri is Low Satisfactory.

Retail Services

Delivery systems are reasonably accessible to the bank's geographies and individuals of different income levels in Missouri. As of December 31, 2023, Regions operated 13 branches in the state, including one branch in a low-income tract and three branches in moderate-income tracts, representing 30.8 percent of total statewide branches.

A full array of personal and business banking products and services is offered at all locations in Missouri AAs. Across the state, branch hours do not vary in a way that inconveniences individual AAs. Most of the branches in the state offer lobby hours from 9 a.m. to 4:30 p.m. or 5 p.m. Monday-Thursday, and all branches are open until 5 p.m. on Friday. A number of branches have drive-through hours that open at 8:30 a.m. and close at 5 p.m. Regions offers branch lobby hours on Saturday from 9 a.m. to 12 p.m. at nine branches across the state, including one branch in a low-income tract and two on moderate-income tracts. Delivery systems include full-service ATMs at most branches in the state. In addition to those ATMs, the bank compliments its traditional service delivery methods with alternative delivery systems that provide increased access to banking services, as previously discussed in the *Institution, Retail Banking Services* section of this report.

During the review period, the bank closed three branches, including one branch in a moderate-income tract and two branches in middle-income tracts. The bank did not open any branches in Missouri during the review period. Changes to the bank's branch network in Missouri generally did not adversely affect the accessibility of delivery

systems, particularly to LMI geographies or LMI individuals. Additional details on the bank's retail services can be found in the full-scope AA section of this report.

CD Services

Regions provides an adequate level of CD services in Missouri. During the review period, the bank engaged in 562 hours of qualifying CD service activities in Missouri. This total includes 532 hours directly benefiting individual AAs in Missouri and 30 hours benefiting a BSRA that includes all of the bank's AAs in Missouri. These BSRA hours include service on the board of directors for an organization that supports a statewide network of programs focused on workforce development and educational programming for LMI youth.

Additional details of CD service hours in Missouri are described later within the section for the individual AA that they benefit.

METROPOLITAN AREA – CAPE GIRARDEAU MSA
(Full-Scope Review)

DESCRIPTION OF INSTITUTION'S OPERATIONS IN THE CAPE GIRARDEAU AA

Overview

The Cape Girardeau AA includes only Cape Girardeau County, which is one of the three counties that comprise the Cape Girardeau-Jackson, MO-IL MSA. As of December 31, 2023, the bank operated two branches in the AA. This accounts for 15.4 percent of the bank's branches in the state of Missouri. Furthermore, 25.0 percent of the bank's statewide deposits and 16.0 percent of its statewide combined HMDA-reportable and small business lending by dollar volume are located the Cape Girardeau AA.

The AA is a small yet competitive banking market. While local community banks account for most of the deposits, several national and regional banks maintain a presence. According to the FDIC Summary of Deposits Report as of June 30, 2023, there were 15 financial institutions operating 37 branches inside the AA with a total of $3.0 billion in deposits.[84] Banks with the largest deposit market share in the AA include: The Bank of Missouri (13.9 percent), Montgomery Bank (11.5 percent), and Wood & Huston Bank (11.5 percent).[85] Regions Bank ranked 9th in market share at 5.6 percent.[86]

HMDA-reportable lending in the AA is also competitive. Regions Bank originated and/or purchased 2.1 percent, 2.7 percent, and 3.4 percent of total HMDA-reportable loans in the AA in 2021, 2022, and 2023, respectively. The bank ranked 17th out of 189 reporters in 2021, 12th out of 152 reporters in 2022, and 9th out of 138 reporters in 2023. The top HMDA reporters in the AA include First State Community Bank, The Bank of Missouri, and Montgomery Bank.

Regions Bank is a smaller player in the small business lending space in the AA. Regions originated and/or purchased 1.2 percent, 0.0 percent, and 0.1 percent of total reported small business loans in the AA in 2021, 2022, and 2023, respectively. The bank ranked 14th out of 54 reporters in 2021, had no market share in 2022, and ranked 23rd out of 58 reporters in 2023. The top small business lenders in the AA include The Bank of Missouri, U.S. Bank, and First State Community Bank.

AA Demographics, Population, and Income Characteristics

The AA population was 82,984 as of July 1, 2023.[87] This represented a 1.6 percent increase since the 2020 census.[88] During the same period, the statewide population in Missouri increased by 0.7 percent.[89]

In 2021, the AA contained 16 census tracts: one low-income tracts (6.3 percent), three moderate-income tracts (18.8 percent), nine middle-income tracts (56.3 percent), and three upper-income tracts (18.8 percent). For 2022 and 2023, there was a census tract remapping that changed this distribution. The total census tracts in the AA increased to 19: 0 low-income tracts (0.0 percent), three moderate-income tracts (15.8 percent), 12 middle-income tracts (63.2 percent), and four upper-income tracts (21.1 percent).

For purposes of classifying borrower income, this evaluation uses the FFIEC estimated median family income for the Cape Girardeau, MO-IL MSA. The table below provides a breakdown of the estimated annual family income

[84] "Summary of Deposits – Market Share Reports." *Federal Deposit Insurance Corporation*, 30 June 2023, https://banks.data.fdic.gov/bankfind-suite/SOD/marketShare. Accessed 11 Dec. 2024.
[85] Ibid.
[86] Ibid.

[88] Ibid.
[89] Ibid.

for each income category (low, moderate, middle, and upper) in the MSA. As shown, estimated median family income increased 35.2 percent during the review period, from $62,800 in 2021 to $84,900 in 2023.

Borrower Income Levels
Cape Girardeau, MO-IL MSA

FFIEC Estimated Median Family Income		Low	Moderate	Middle	Upper
		0 - 49.99%	50% - 79.99%	80% - 119.99%	120% - & above
2021	**$62,800**	0 - $31,399	$31,400 - $50,239	$50,240 - $75,359	$75,360 - & above
2022	**$78,400**	0 - $39,199	$39,200 - $62,719	$62,720 - $94,079	$94,080 - & above
2023	**$84,900**	0 - $42,449	$42,450 - $67,919	$67,920 - $101,879	$101,880 - & above

There were 18,717 total families in the AA as of 2023. Of these families, 16.9 percent were low-income, 18.9 percent were moderate-income, 22.4 percent were middle-income, and 41.9 percent were upper-income. 8.2 percent of families had income below the poverty level, which was slightly lower than the 8.9 percent statewide level for Missouri.

Housing Characteristics

2023 FFIEC census data indicates that there are 34,398 total housing units in the AA. Of these, 57.9 percent are owner-occupied, 29.9 percent are rental units, and 12.2 percent are vacant. However, owner-occupied rates in moderate-income tracts are much lower at 27.2 percent.

The median age of housing stock across the AA was 46 years, which was similar to the Missouri statewide median at 44 years. The median age of housing stock was oldest in moderate-income tracts (53 years) and youngest in upper-income tracts (40 years). The relatively old age of housing stock in moderate-income tracts indicates opportunity for home improvement loans in these areas.

The median housing value in the AA increased sharply during the review period. In January 2021, the median home listing price in Cape Girardeau County was $179,900.[90] By December 2023, it increased to $272,450.[91] This represents a 51.4 percent increase during the three-year review period. Under the assumption that a borrower can obtain a mortgage for approximately three times their annual income and using the 2023 FFIEC median family income for LMI families in the MSA, affordable homes would be less than $127,347 for low-income families and less than $203,757 for moderate-income families.[92] As such, the recent increases in AA home prices have resulted in reduced housing affordability for LMI families.

Economic Conditions

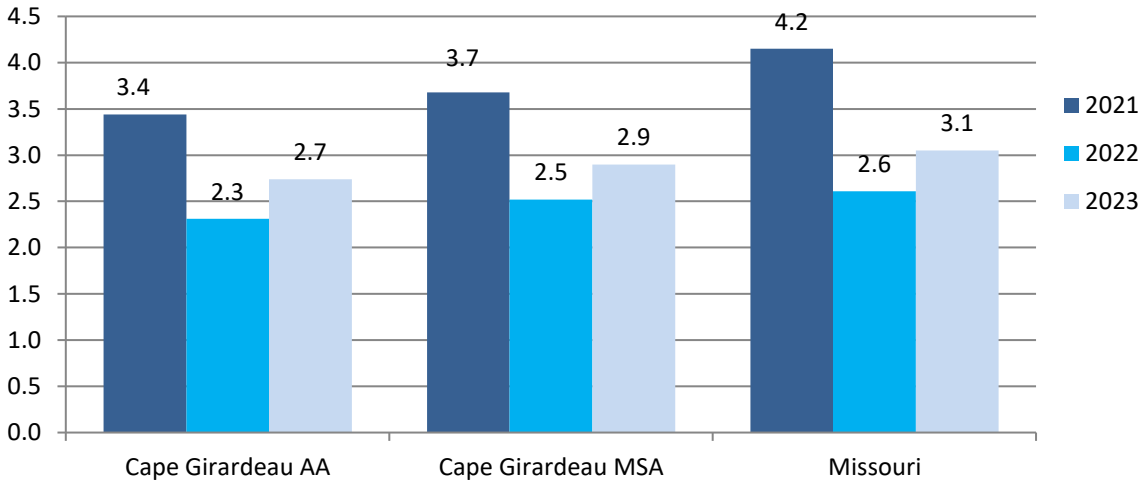
The AA has a stable economy with various employment opportunities for local residents. As of Q1 2023, total employment in the AA was 41,259.[93] Industries employing the most residents included healthcare/social assistance (9,912), retail trade (5,910), government (5,541), accommodation/food services (4,224), and

[90] "Housing Inventory: Median Listing Price in Cape Girardeau County, MO." *Federal Reserve Bank of St. Louis*, https://fred.stlouisfed.org/series/MEDLISPRI29031. Accessed 12 Dec. 2024.
[91] Ibid.
[92] This calculation uses 2023 FFIEC income classifications for the assessment area. Incomes for low-income families range from $0-$42,449 and incomes for moderate-income families range from $42,450-$67,919.
[93] "Quarterly Census of Employment and Wages." *Bureau of Labor Statistics(BLS)*

manufacturing (3,901).[94] The largest employers in Cape Girardeau include Saint Francis Healthcare System, SoutheastHEALTH, Procter & Gamble, Southeast Missouri State University, and Isle Casino Cape Girardeau.[95]

The following table shows the unemployment rate percentages for the bank's Cape Girardeau AA, the MSA, and the state of Missouri. As shown, the unemployment rate in the AA was lower than the overall unemployment rate in the state of Missouri during the three-year review period. The AA's unemployment rate dropped from 3.4 percent to 2.7 percent from 2021 to 2023. During the same period, Missouri's unemployment rate dropped from 4.2 percent to 3.1 percent.

Unemployment Rates - MO Cape Girardeau



Not Seasonally Adjusted. Source: Bureau of Labor Statistics

Credit and CD Needs

To better understand the local landscape, information from a recently conducted interview with an individual engaged in Cape Girardeau-area CD was referenced. This individual discussed the various needs and opportunities across the region as well as how financial institutions can be responsive to local CD needs.

The contact stated that the local economy is strong. The healthcare, education, and manufacturing industries serve as the backbone of the region's economy. These local industries have created significant job growth in recent years. The region also has a healthy start-up and small business scene. Access to labor is the primary barrier to further economic expansion, as many young residents tend to leave the region for larger metropolitan areas after graduating from high school or college.

The contact explained that there is a limited supply of affordable housing. The affordable homes that are available are typically older and in need of repairs. Very few new construction homes are within an affordable price range for LMI individuals. The contact mentioned that local banks have mortgage products for LMI and first-time homebuyers; however, the lack of affordable housing inventory limits the use of these mortgage products.

[94] Ibid.
[95] "Opportunities: Top 5 Employers in the Cape Area." *Cape Is Home*, https://www.capeishome.com/opportunities/. Accessed 12 Dec. 2024.

The contact also mentioned that there is a development project occurring in the South Cape neighborhood. This initiative's goal is to increase agricultural production of food crops, add a grocery store, and develop affordable housing (including townhomes, multifamily, and single-family homes) targeted to the LMI population. This CD initiative should create numerous opportunities for bank involvement, including loans, grants, and services.

CONCLUSIONS WITH RESPECT TO PERFORMANCE TESTS IN THE CAPE GIRARDEAU AA

LENDING TEST

Lending levels reflect adequate responsiveness to credit needs of the AA. The geographic distribution of loans reflects adequate penetration throughout the AA and the distribution of loans reflects good penetration among borrowers of different income levels and businesses of different revenue sizes. In addition, the bank made a low level of CD loans in the Cape Girardeau AA.

The analysis included 209 HMDA-reportable loans and 27 small business loans reported by the bank in the AA during the review period. Therefore, HMDA-reportable lending received greater weight in determining conclusions. Additionally, during the review period the bank originated or purchased 80 home refinance loans, 59 home purchase loans, and 22 home improvement loans in the AA. Thus, when considering HMDA-reportable loan categories, greatest weight was assigned to home refinance loans given its relative share of the total HMDA-reportable lending in this AA, followed by home purchase loans and, to a lesser extent, home improvement loans.

Details of the bank's mortgage and small business lending and information regarding lending by peers can be found in *Appendix F.*

Lending Activity

Lending activity is considered adequate. Overall, 0.1 percent of HMDA-reportable loans and 0.1 percent of small business loans were made in the AA. The percentage of the bank's HMDA-reportable and small business lending is the same as the percentage of its area deposits.

Geographic Distribution of Loans

The geographic distribution of loans reflects adequate penetration throughout the AA. As described in the following sections, overall performance for HMDA-reportable lending is adequate and small business lending performance is poor. As previously stated, there were no low-income tracts in this AA in 2022 or 2023; therefore, this analysis focused on performance in moderate-income tracts.

Home Refinance Loans

Home refinance lending in moderate-income tracts is adequate. In 2021, the bank made no home refinance loans in moderate-income tracts despite opportunities for lending as reflected by demographic data and aggregate performance. In 2022 and 2023, the bank made 10.5 percent of its home refinance loans in moderate-income tracts, which was above the percentage of owner-occupied units in these tracts (5.9 percent). In 2022, the bank's lending (11.1 percent) was above aggregate performance (5.3 percent) and in 2023, the bank's lending (9.1 percent) was above aggregate performance (5.8 percent).

Home Purchase Loans

Home purchase lending in moderate-income tracts is good. In 2021, the bank made 10.0 percent of its home purchase loans in moderate-income tracts, which was above the percentage of owner-occupied units in these tracts (6.4 percent) and above aggregate performance of 6.7 percent. In 2022, the bank made no home purchase loans

in moderate-income tracts despite opportunities for lending as reflected by demographic data and aggregate performance. However, in 2023, the bank made 23.5 percent of its home purchase loans in moderate-income tracts, which was above the percentage of owner-occupied units in these tracts (5.9 percent) and above aggregate performance (8.3 percent).

Home Improvement Loans
Home improvement lending in moderate-income tracts is adequate. In 2021, the bank made no home improvement loans in moderate-income tracts despite opportunities for lending as reflected by demographic data and aggregate performance. In 2022 and 2023, the bank made 10.5 percent of its home improvement loans in moderate-income tracts, which was above the percentage of owner-occupied units in these tracts (5.9 percent). In 2022, the bank's lending (11.1 percent) was above aggregate performance (2.5 percent) and in 2023, the bank's lending (10.0 percent) was above aggregate performance (5.5 percent).

Small Business Loans
Small business lending in moderate-income tracts is poor. In 2021, the bank made 11.5 percent of its small business loans in moderate-income tracts, which was above the percentage of total businesses located in these tracts (9.9 percent) and above aggregate performance of 9.5 percent. However, the bank made no small business loans in moderate-income tracts for 2022 or 2023 despite opportunities for lending as reflected by demographic data and aggregate performance.

No conspicuous lending gaps were identified based on an analysis of the dispersion of the loan products reviewed. The bank had activity in over 80 percent of all census tracts throughout the review period. Furthermore, lending data and maps did not indicate an absence of loans across LMI tracts.

Lending to Borrowers of Different Incomes and Businesses of Different Sizes
The distribution of loans based on borrower income or gross annual revenues is good. As described in the following sections, overall performance for HMDA-reportable lending is good while small business lending performance is adequate.

Home Refinance Loans
Home refinance lending to low-income borrowers is excellent. In 2021, the bank made 9.5 percent of its home refinance loans to low-income borrowers, which was below the percentage of low-income families (19.6 percent) but more than double aggregate performance of 3.6 percent. In 2022 and 2023, the bank made 21.1 percent of its home refinance loans to low-income borrowers, which was above the percentage of low-income families (16.9 percent). In 2022, the bank's lending (25.9 percent) was above aggregate performance (8.1 percent) and in 2023, the bank's lending (9.1 percent) was above aggregate performance (7.7 percent).

Home refinance lending to moderate-income borrowers is good. In 2021, the bank made 23.8 percent of its home refinance loans to moderate-income borrowers, which was above the percentage of moderate-income families (15.9 percent) and above aggregate performance of 13.6 percent. In 2022 and 2023, the bank made 21.1 percent of its home refinance loans to moderate-income borrowers, which was above the percentage of moderate-income families (18.9 percent). In 2022, the bank's lending (22.2 percent) was above aggregate performance (20.6 percent) and in 2023, the bank's lending (18.2 percent) was above aggregate performance (16.1 percent).

Home Purchase Loans
Home purchase lending to low-income borrowers is excellent. In 2021, the bank made 20.0 percent of its home purchase loans to low-income borrowers, which was similar to the percentage of low-income families (19.6 percent) and nearly triple aggregate performance of 6.8 percent. In 2022 and 2023, the bank made

13.8 percent of its home purchase loans to low-income borrowers, which was below the percentage of low-income families (16.9 percent). In 2022, the bank's lending (16.7 percent) was above aggregate performance (9.7 percent) and in 2023, the bank's lending (11.8 percent) was above aggregate performance (9.3 percent).

Home purchase lending to moderate-income borrowers is adequate. In 2021, the bank made 26.7 percent of its home purchase loans to moderate-income borrowers, which was above the percentage of moderate-income families (15.9 percent) and above aggregate performance of 18.5 percent. Bank performance declined in 2022 and 2023, with the bank making 17.2 percent of its home purchase loans to moderate-income borrowers, which was below the percentage of moderate-income families (18.9 percent). In 2022, the bank's lending (8.3 percent) was below aggregate performance (19.5 percent) while in 2023, the bank's lending (23.5 percent) was above aggregate performance (18.8 percent).

Home Improvement Loans

Home improvement lending to low-income borrowers is good. In 2021, the bank made 33.3 percent of its home improvement loans to low-income borrowers, which was above the percentage of low-income families (19.6 percent) and above aggregate performance of 7.5 percent. In 2022, the bank made no home improvement loans to low-income borrowers despite opportunities for lending as reflected by demographic data and aggregate performance. However, in 2023, the bank made 50.0 percent of its home improvement loans to low-income borrowers, which was above both the percentage of low-income families (16.9 percent) and aggregate performance of 11.7 percent.

Home improvement lending to moderate-income borrowers is poor. The bank made no home improvement loans to moderate-income borrowers in 2021 or 2023 despite opportunities for lending as reflected by demographic data and aggregate performance. In 2022, the bank made 22.2 percent of its home improvement loans to moderate-income borrowers, which was above the percentage of moderate-income families (18.9 percent) and above aggregate performance (17.5 percent).

Small Business Loans

Small business lending to businesses of different sizes is adequate. In 2021, the bank made 96.2 percent of its small business loans to businesses with revenues of $1 million or less, which was above the percentage of total businesses with revenues of $1 million or less (89.1 percent). The bank's performance was above aggregate performance of 54.8 percent in 2021. However, 2021 was a year in which many banks extended PPP loans as a result of the COVID-19 pandemic and were not required to capture and report the revenue of the businesses, which is reflected in the aggregate data. As a result, performance context and loan size data were considered. In 2021, the bank made all of its loans for amounts of less than $250,000 to businesses compared to aggregate lenders (95.2 percent). However, the bank made no small business loans in 2022 despite opportunity for lending as reflected by demographic data and aggregate performance. In 2023, the bank made one small business loan to a business with revenues of $1 million or less, which was below the percentage of total businesses with revenues of $1 million or less (89.4 percent) but above aggregate performance (60.3 percent). While the overall volume is low, all of the bank's small business loans were originated in amounts of $250,000 or less, indicating a willingness to lend in the smaller amounts that are typically requested by small businesses.

CD Lending

The bank makes a low level of CD loans in the Cape Girardeau AA. During the review period, the bank originated one qualified CD loan totaling $250,000 in the AA. The loan qualified as economic development by financing a CDFI's microloan program for small businesses. While the loan was responsive to AA credit needs of businesses, CD performance is at a low level due to the volume relative to the bank's presence in the AA and the additional needs and opportunities present in the area, as noted by community contacts.

INVESTMENT TEST

The bank made a poor level of qualified CD investments and grants in the Cape Girardeau AA totaling $538,100. This amount included two current period investments totaling $333,000, three prior period investments totaling $185,100, and three donations totaling $20,000.

Investment variety was limited to MBS supporting LMI borrowers and one prior period LIHTC originated in 2011. The bank made rare use of innovative and/or complex investments to support CD initiatives.

Examples of noteworthy investments and grants provided during the review period include:

- Two current period LMI MBS pools totaling $333,000.
- Two donations totaling $15,000 to an organization that provides free technical assistance and consulting services to local small businesses.
- A $5,000 donation to a nonprofit that provides various LMI services, including a food pantry and emergency financial assistance for families in need.

SERVICE TEST

Retail banking services are adequate in Cape Girardeau and the bank provides an adequate level of CD services in its AA.

Retail Banking Services

Retail service delivery systems are reasonably accessible to the bank's geographies and individuals of different income levels throughout the Cape Girardeau AA, particularly given the bank's limited branch presence. In deriving this conclusion, the distribution of the bank's branches by census tract income level was compared to the distribution of households and businesses among the tract categories in the AA. As the following tables show, the bank only operates two branches in the AA and neither are located in LMI tracts. In 2021, there was only one low-income tract in the AA, and with the U.S. Census changes in 2022, there were no low-income tracts in 2022 or 2023. There are three moderate-income tracts in the AA, where 11.4 percent of households lived and 7.2 percent of businesses are located. The bank's two branches are located near major roads or highways, which makes them more accessible to residents across the AA, including those in moderate-income tracts.

The bank did not open or close any branches in Cape Girardeau during the review period. Additionally, given the bank's lack of branches in LMI tracts, the reasonableness of business hours and services was not evaluated for this assessment area.

The tables below show the distribution of branches and ATMs along with households and businesses by tract category.

CD Services

Regions provides an adequate level of CD services given the bank's limited presence in the AA. During the review period, bank employees provided 62 hours of qualified CD service hours to one organization operating in the AA. Bank staff provided technical assistance to a small business development center that serves small businesses across the AA.

METROPOLITAN AREAS
LIMITED-SCOPE REVIEW

The following MSA AAs were reviewed using limited-scope examination procedures. Through these procedures, conclusions regarding the institution's CRA performance are drawn from the review of available facts and data, including performance and demographic information. Please refer to the tables in *Appendices G and H* for additional information regarding these AAs.

DESCRIPTION OF INSTITUTION'S OPERATIONS IN MISSOURI MSA Aas

MSA AA	AA Delineation/Counties	# Branches *(as of 12/31/2023)*	Deposits ($000s) *(as of June 30, 2023)*
Columbia	Boone	2	$87,464
Jefferson City	Cole	1	$47,163
Springfield	Christian & Greene	3	$140,954

CONCLUSIONS WITH RESPECT TO PERFORMANCE TESTS

The following table compares conclusions regarding performance in each limited-scope MSA AA to overall performance for the state of Missouri.

Performance in the Limited-Scope Review Metropolitan Assessment Area			
MSA AA	**Lending Test**	**Investment Test**	**Service Test**
Columbia	Not Consistent (Below)	Not Consistent (Exceeds)	Not Consistent (Exceeds)
Jefferson City	Not Consistent (Below)	Not Consistent (Exceeds)	Consistent
Springfield	Consistent	Consistent	Not Consistent (Below)

The key performance standards of the Lending Test for limited-scope areas included geographic distribution, borrower distribution, and CD loans. For the geographic distribution of loans, performance was not rated in Jefferson City due to an absence of LMI tracts and poor in the remaining AAs. Borrower distribution was good in Springfield and adequate in the remaining AAs. The bank originated one CD loan totaling $250,000 in Springfield (low level). The bank made no qualifying CD loans in the remaining AAs.

Qualifying amounts and conclusions for the bank's investment and grant activity in limited-scope MSA areas were as follows: $2.8 million in Columbia (excellent level), $801,000 in Jefferson City (significant level), and $1 million in Springfield (poor level).

The performance standards of the Service Test for limited-scope MSA areas included retail banking and CD services. Conclusions for retail banking services were as follows: excellent in Jefferson City, good in Columbia, and poor in Springfield. Qualifying hours and conclusions for CD services were as follows: 193 hours in Columbia (leader); 27 hours in Jefferson City (adequate level); and 68 hours in Springfield (adequate level). All MSA AAs reviewed under limited-scope procedures also positively benefited from 30 hours of CD service benefiting the BSRA that includes the entire state of Missouri. These services were previously described under the CD services section for the state of Missouri.

Performance in the limited-scope MSA AAs did not impact overall performance for the state.

NONMETROPOLITAN STATEWIDE AREAS
LIMITED-SCOPE REVIEW

The following non-MSA AAs were reviewed using limited-scope examination procedures. Through these procedures, conclusions regarding the institution's CRA performance are drawn from the review of available facts and data, including performance and demographic information. Please refer to the tables in *Appendices G and H* for additional information regarding these AAs.

DESCRIPTION OF INSTITUTION'S OPERATIONS IN MISSOURI NON-MSA Aas

Non-MSA AA	AA Delineation/Counties	# Branches *(as of 12/31/2023)*	Deposits ($000s) *(as of June 30, 2023)*
Gasconade*	Gasconade	0	N/A
Southeast MO	Scott & Stoddard	2	$101,132
St. Genevieve-Perry	Perry & St. Genevieve	2	$73,646
Taney	Taney	1	$42,615

*As of December 31, 2023, the bank operated no branch offices in this AA. The bank exited the AA in May 2021. Therefore, no analysis was conducted in this market.

CONCLUSIONS WITH RESPECT TO PERFORMANCE TESTS

The following table compares conclusions regarding performance in each limited-scope non-MSA AA to overall performance for the state of Missouri.

Performance in the Limited-Scope Review Non-MSA Assessment Areas			
Non-MSA AA	**Lending Test**	**Investment Test**	**Service Test**
Southeast MO	Not Consistent (Below)	Consistent	Consistent
St. Genevieve-Perry	Not Consistent (Below)	Not Consistent (Below)	Consistent
Taney	Not Consistent (Below)	Not Consistent (Exceeds)	Consistent

The key performance standards of the Lending Test for limited-scope areas included geographic distribution, borrower distribution, and CD loans. For the geographic distribution of loans, performance was poor in Taney and not rated in the remaining AAs due to an absence of LMI tracts. Borrower distribution was adequate in all AAs. The bank originated no CD loans in any of the AAs.

Qualifying amounts and conclusions for the bank's investment and grant activity in limited-scope non-MSA areas were as follows: $431,100 in Southeast Missouri (poor level), $140,600 in St. Genevieve-Perry (few, if any), and $335,800 in Taney (adequate level).

The performance standards of the Service Test for limited-scope non-MSA areas included retail banking and CD services. Conclusions for retail banking services were as follows: good in St. Genevieve-Perry, adequate in Southeast Missouri, and poor in Taney. Qualifying hours and conclusions for CD services were as follows: 12 hours in Southeast Missouri (poor level); 23 hours in St. Genevieve-Perry (poor level); and 147 hours in Taney (leader). All non-MSA AAs reviewed under limited-scope procedures also positively benefited from 30 hours of CD service benefiting the BSRA that includes the entire state of Missouri. These services were previously described under the CD services section for the state of Missouri.

Performance in the limited-scope non-MSA AAs did not impact overall performance for the state.

KENTUCKY

CRA RATING FOR KENTUCKY: NEEDS TO IMPROVE

The Lending Test is rated: Needs to Improve
The Investment Test is rated: Low Satisfactory
The Service Test is rated: High Satisfactory

Major factors contributing to this rating include:

- The geographic distribution of loans reflects poor penetration throughout Kentucky AAs.
- The distribution of borrowers reflects good penetration throughout Kentucky AAs.
- The bank made no CD loans in Kentucky.
- The bank made an adequate level of qualified CD investments and grants in Kentucky.
- Retail banking services, which includes accessibility of delivery systems, changes in branch locations, and reasonableness of hours and services, are good.
- The bank is a leader in providing CD service activities in Kentucky.

SCOPE OF EXAMINATION

A full-scope review was conducted for the following AA in Kentucky:
• Southwest Kentucky

A limited-scope review was conducted for the following AA:
• Simpson

The time period, products, and affiliates evaluated for these AAs are consistent with the scope discussed in the institution section of this report.

DESCRIPTION OF INSTITUTION'S OPERATIONS IN KENTUCKY

As of June 30, 2023, Regions Bank had $596 million in deposits in Kentucky accounting for 0.5 percent of its total deposits. Regions operated nine branch offices in Kentucky as of December 31, 2023, representing 0.7 percent of its total branches. HMDA-reportable lending in Kentucky accounted for 0.7 percent of total institutional HMDA-reportable lending by number of loans and 0.3 percent by dollar volume. Small business lending in Kentucky accounted for 0.2 percent of the bank's total small business lending by number of loans and 0.2 percent by dollar volume. Overall, the bank's HMDA-reportable and CRA lending activity in the state was equal to the percentage of total institutional deposits.

The following table shows lending activity from January 1, 2021 through December 31, 2023.

CONCLUSIONS WITH RESPECT TO PERFORMANCE TESTS IN KENTUCKY

LENDING TEST

Overview

The Lending Test rating for Kentucky is Needs to Improve. The rating is a result of performance in each characteristic of the Lending Test applicable to the state, including Lending Activity (adequate); Geographic Distribution (poor); Borrower Distribution (good); and CD Lending (few, if any). Highlights of each characteristic are found in the sections that follow, with additional descriptions and details within the full-scope AA of the state.

Lending Activity

Lending levels reflect adequate responsiveness to the credit needs of Kentucky AAs. The total number and dollar volume of HMDA-reportable and small business loans were considered in arriving at Lending Activity conclusions, as well as competitive factors and the bank's overall importance to each AA. Statewide conclusions are derived from conclusions within each AA as detailed in the *Lending Activity* section of the Southwest Kentucky AA.

Geographic and Borrower Distribution

The geographic distribution of HMDA-reportable and small business loans reflects poor dispersion throughout the Kentucky AAs and the distribution of loans by borrower income and revenue size of businesses is good. The analyses of HMDA-reportable and small business lending within the full-scope AA are discussed in detail later in this report.

CD Lending

The bank made no qualifying CD loans in Kentucky.

INVESTMENT TEST

The Investment Test rating for Kentucky is Low Satisfactory. The bank made an adequate level of qualified CD investments and grants in Kentucky, with $1.9 million in qualified investments and $539,100 in qualified contributions directly benefiting its Kentucky AAs. The bank also received consideration at the state level for a $1,000 contribution to a nonprofit that develops affordable housing across Kentucky.

The bank made an adequate level of qualified investments and contributions in the Southwest Kentucky full-scope AA. Additional details regarding specific investments and contributions can be found in the full-scope AA section of this report.

The bank was responsive to the needs of its AAs in the state of Kentucky. Therefore, the bank also received consideration for $17 million in qualified investments and $3,500 in contributions within the state that benefited geographies outside of the bank's AAs. This included a $10 million current period commercial MBS backed by multifamily affordable housing, a $1 million CDFI investment to finance affordable housing, and a $3,500 donation to provide take-home meals to food insecure students.

SERVICE TEST

The Service Test rating for Kentucky is High Satisfactory.

Retail Services

Delivery systems are accessible to the bank's geographies and individuals of different income levels in Kentucky. As of December 31, 2023, Regions operated nine branches in the state, including two branches in moderate-income tracts, representing 22.2 percent of total statewide branches.

A full array of personal and business banking products and services is offered at all locations in the two Kentucky AAs. Across the state, branch hours do not generally vary in a way that inconveniences individual AAs. Most of the branches in the state offer lobby hours from 9 a.m. to 4:30 p.m. Monday-Thursday, and all branches are open until 5 p.m. on Friday. Most of the branches have drive-through hours from 8:30 a.m. to 4 p.m. Monday-Thursday, and until 5 p.m. on Friday. Regions offers branch lobby hours on Saturday from 9 a.m. to 12 p.m. at four branches, including one branch in a moderate-income tract. Delivery systems include full-service ATMs at most branches in the state. In addition to those ATMs, the bank compliments its traditional service delivery methods with alternative delivery systems that provide increased access to banking services, as previously discussed in the *Institution, Retail Banking Services* section of this report.

During the review period, the bank closed two branches in upper-income tracts and did not open any branches. Changes to the bank's branch network in Kentucky did not generally adversely affect the accessibility of delivery systems, particularly to LMI geographies or LMI individuals. Additional details on the bank's retail services can be found in the full-scope AA sections of this report.

CD Services

Regions provides an excellent level of CD services in Kentucky, given the bank's limited presence in the state. During the review period, staff engaged in 632 hours of qualifying CD service activities that directly benefited the bank's AA in the state. Additional details of service hours in Kentucky are described later within each individual AA they benefit.

NONMETROPOLITAN AREA – SOUTHWEST KENTUCKY
(Full-Scope Review)

DESCRIPTION OF INSTITUTION'S OPERATIONS IN THE SOUTHWEST KENTUCKY AA

Overview

The Southwest Kentucky AA is a nonmetropolitan area consisting of the following five counties: Ballard, Calloway, Graves, McCracken, and Marshall. As of December 31, 2023, Regions operated eight branches in the AA, which represented 88.9 percent of the bank's branches and 91.1 percent of its deposits in Kentucky. In addition, the market accounts for 93.4 percent of Regions' combined HMDA-reportable and CA small lending in Kentucky.

Southwest Kentucky is a competitive banking market in which multiple community and regional banks have an active presence. According to the FDIC Summary of Deposits Report as of June 30, 2023, there were 15 financial institutions operating 67 branches inside the AA with a total of $5.2 billion in deposits.[96] Regions Bank is ranked 3rd in market share with 10.4 percent ($543.0 million).[97] Community Financial Services Bank had the largest deposit market share at 23.5 percent and The Paducah Bank and Trust Company ranked 2nd in deposit market share (13.3 percent).[98]

HMDA-reportable lending in the AA is competitive. In 2021, Regions originated or purchased 5.1 percent of HMDA-reportable loans in the AA, ranking 5th out of 259 reporters. In 2022, Regions Bank originated or purchased 7.3 percent of HMDA-reportable loans in the AA, ranking 2nd out of 237 reporters. In 2023, Regions Bank originated or purchased 7.5 percent of HMDA-reportable loans in the AA, ranking 1st out of 202 reporters. Other leading HMDA reporters during the review period included U.S. Bank, Independence Bank of Kentucky, The Paducah Bank and Trust Company, and Rocket Mortgage.

Small business lending in the AA is also competitive. Regions Bank ranked 10th out of 86 reporters in 2021 with 2.2 percent of reported loans. In 2022, Regions Bank fell to 25th out of 76 reporters with 0.2 percent of reported loans. In 2023, Regions Bank ranked 21st out of 74 reporters with 0.3 percent of reported loans. Leading small business lenders during the review period included Synchrony Bank, American Express, J.P. Morgan Chase, U.S. Bank, and Independence Bank of Kentucky.

AA Demographics, Population and Income Characteristics

The AA population was 181,495 as of July 1, 2023.[99] This represented a 0.3 percent increase since the 2020 census.[100] During the same period, the statewide population in Kentucky increased by 0.4 percent while the national population increased by 1.0 percent.[101]

The AA consists of 53 census tracts. Per 2023 FFIEC census data, one tract is low-income (1.9 percent), seven tracts are moderate-income (13.2 percent), 17 are middle-income (32.1 percent), 26 tracts are upper-income (49.1 percent), and two tracts have an unknown income level (3.8 percent).[102]

[100] Ibid.
[101] Ibid.
[102] FRB Atlanta calculations of 2023 FFIEC Census Data

For purposes of classifying borrower income, this evaluation uses the FFIEC estimated median family income for Kentucky non-metro areas. As shown, the median family income increased from $52,600 in 2021 to $64,900 in 2023.

Borrower Income Levels
Kentucky State Non-metro

FFIEC Estimated Median Family Income		Low	Moderate	Middle	Upper
		0 - 49.99%	50% - 79.99%	80% - 119.99%	120% - & above
2021	**$52,600**	0 - $26,299	$26,300 - $42,079	$42,080 - $63,119	$63,120 - & above
2022	**$61,700**	0 - $30,849	$30,850 - $49,359	$49,360 - $74,039	$74,040 - & above
2023	**$64,900**	0 - $32,449	$32,450 - $51,919	$51,920 - $77,879	$77,880 - & above

As of 2023, 16.6 percent of families in the AA were low-income, 15.5 percent were moderate-income, 18.0 percent were middle-income, and 50.0 percent were upper-income.[103] 10.8 percent of families in the AA lived below the poverty level during the review period.[104] This was slightly lower than the Kentucky statewide level of 12.3 percent.

Housing Characteristics

2023 FFIEC Census Data indicates that there were 88,167 housing units in the AA, of which 58.6 percent were owner-occupied, 25.1 percent were rental units, and 16.2 percent were vacant. Home ownership rates were lower in low-income tracts at 10.5 percent and 37.1 percent in moderate-income tracts. This indicates limited opportunity for generating home purchase loan applications and originations in LMI tracts.

The median age of housing stock across the AA was 45 years, which is older than the median for the state of Kentucky (40 years). The median age of housing stock in low-income tracts was slightly younger at 35 years, while the median age of housing stock in moderate-income tracts was older at 61 years. This indicates potential opportunities for home improvement loans in moderate-income tracts.

The median housing value in the AA increased during the review period, consistent with trends seen in many other regions of the country. As of January 2021, the median home listing price in McCracken County, the largest county in the AA, was $199,900.[105] By December 2023, the median listing price for a home increased to $299,900. This represents a cumulative increase of 50.0 percent during the review period.

According to 2023 FFIEC Census data, the median rent in the AA was $710 per month. The data also indicates that 40.9 percent of AA renters were cost-burdened, which is defined as spending more than 30 percent of gross income on rent. In the state of Kentucky overall, 38.3 percent of AA renters were cost-burdened. Home prices and rental prices present affordability challenges to AA residents, especially LMI residents.

Economic Conditions

The southwest Kentucky AA has a diverse economy with a variety of employment opportunities for local residents. The AA's largest industries by number of employees as of Q1 2023 included retail (10,980),

[103] Ibid.
[104] Ibid.
[105] "Housing Inventory: Median Listing Price in McCracken County, KY." *Federal Reserve Bank of St. Louis*, https://fred.stlouisfed.org/series/MEDLISPRI21145. Accessed 10 Dec. 2024.

healthcare/social assistance (9,540), and manufacturing (9,067).[106] Due to its access to the Mississippi River, several Class I railroads, and Interstate-24, the region also serves as a logistics hub.[107] The largest employers in the region include Ingram Barge, Baptist Health Paducah, Mercy Health, Murray State University, and Marquette Transportation.[108]

The following tables show the unemployment rate percentages for the AA, the counties that comprise the AA, the MSA, and the state. As shown, unemployment rates in the AA were similar to overall unemployment rates in the state of Kentucky during the review period. The AA unemployment rate improved from 4.5 percent in 2021 to 4.2 percent in 2023. Within the AA, Ballard County had the highest unemployment rate during the review period while Marshall County had the lowest.

Credit and CD Needs

To better understand the local landscape, information from a recently conducted interview with an individual engaged in Southwest Kentucky-area community and economic development was referenced. This individual discussed the various opportunities and challenges in the AA and how financial institutions can be responsive to local CD needs.

[106] *Bureau of Labor Statistics*, Quarterly Census of Employment and Wages
[107] "Logistics." *Greater Paducah Economic Development*, https://epaducah.com/site-selection/logistics/. Accessed 10 Dec. 2024.
[108] "Facts and Figures." *Paducah Area Chamber of Commerce*, https://www.paducahchamber.org/relocate/facts-and-figures/. Accessed 10 Dec. 2024.

The contact stated that the AAs economy has experienced healthy growth during the review period. This contact described several large development initiatives in recent years, including a $20 million hotel, a $12 million riverfront development project, $45 million in airport upgrades, and a $40 million sports complex. Moreover, the contact mentioned that local manufacturing employment is up 20 percent compared to pre-pandemic levels. This contact also stated that there are continued opportunities for financial institution involvement in local economic development initiatives, including loans, grants, and services.

CONCLUSIONS WITH RESPECT TO PERFORMANCE TESTS IN THE SOUTHWEST KENTUCKY AA

LENDING TEST

Lending levels reflect adequate responsiveness to credit needs of the AA. The geographic distribution of loans reflects poor penetration throughout the AA and the distribution of loans reflects good penetration among borrowers of different income levels and businesses of different revenue sizes. In addition, the bank made no CD loans in the AA.

The analysis included 765 HMDA-reportable loans and 80 small business loans reported by the bank in the AA during the review period. Therefore, HMDA-reportable lending received greater weight in determining conclusions. Additionally, during the review period, the bank originated or purchased 251 home refinance loans, 233 home purchase loans, and 181 home improvement loans in the AA. Thus, when considering HMDA-reportable loan categories, all three categories received equal weight in determining conclusions.

Details of the bank's mortgage and small business lending and information regarding lending by peers can be found in *Appendix F.*

Lending Activity

Lending activity is considered adequate. Overall, 0.3 percent of HMDA-reportable loans and 0.2 percent of small business loans were made in the AA. The percentage of the bank's HMDA-reportable and small business lending is consistent with the percentage of its area deposits. In addition, the bank is an important contributor to HMDA-reportable lending in the area, ranking second in originations in 2022 and first in 2023.

Geographic Distribution of Loans

The geographic distribution of loans reflects poor penetration throughout the AA. As described in the following sections, overall performance for HMDA-reportable lending is poor and small business lending performance is adequate. There is only one low-income tract in this AA and opportunities for lending are limited as reflected by demographic data and aggregate performance. Thus, lending in low-income tracts was not rated.

Home Purchase Loans

Home purchase lending in moderate-income tracts is poor. In 2021, the bank made 10.3 percent of its home purchase loans in moderate-income tracts, which was above the percentage of owner-occupied units in these tracts (6.1 percent) and above aggregate performance of 7.1 percent. Bank performance declined in 2022 and 2023, with the bank making 2.6 percent of its home purchase loans in moderate-income tracts, which was below the percentage of owner-occupied units in these tracts (5.3 percent). In 2022, the bank's lending (2.2 percent) was below aggregate performance (5.7 percent) and in 2023, the bank's lending (3.1 percent) was below aggregate performance (6.6 percent).

Home Refinance Loans
Home refinance lending in moderate-income tracts is adequate. In 2021, the bank made 3.6 percent of its home refinance loans in moderate-income tracts, which was below the percentage of owner-occupied units in these tracts (6.1 percent) and below aggregate performance of 5.2 percent. In 2022 and 2023, the bank made 4.5 percent of its home refinance loans in moderate-income tracts, which was similar to the percentage of owner-occupied units in these tracts (5.3 percent). In 2022, the bank's lending (2.9 percent) was similar to aggregate performance (3.5 percent) and in 2023, the bank's lending (7.0 percent) was above aggregate performance (5.4 percent).

Home Improvement Loans
Home improvement lending in moderate-income tracts is poor. In 2021, the bank made 2.3 percent of its home improvement loans in moderate-income tracts, which was below the percentage of owner-occupied units in these tracts (6.1 percent) and below aggregate performance of 5.9 percent. In 2022 and 2023, the bank made 3.6 percent of its home improvement loans in moderate-income tracts, which was below the percentage of owner-occupied units in these tracts (5.3 percent). In 2022, the bank's lending (5.1 percent) was below aggregate performance (6.8 percent) and in 2023, the bank's lending (1.7 percent) was below aggregate performance (4.4 percent).

Small Business Loans
Small business lending in moderate-income tracts is adequate. In 2021, the bank made 10.4 percent of its small business loans in moderate-income tracts, which was below the percentage of total businesses located in these tracts (13.7 percent) and below aggregate performance of 12.4 percent. The bank made no small business loans in moderate-income tracts in 2022 despite opportunities for lending as reflected by demographic data and aggregate performance. In 2023, the bank's lending (25.0 percent) was above both the percentage of total businesses located in these tracts (12.6 percent) and aggregate performance of 10.6 percent.

No conspicuous lending gaps were identified based on an analysis of the dispersion of the loan products reviewed. The bank had activity in over 92 percent of all census tracts throughout the review period. Furthermore, lending data and maps did not indicate an absence of loans across LMI tracts.

Lending to Borrowers of Different Incomes and Businesses of Different Sizes
The distribution of loans based on borrower income or gross annual revenues is good. As described in the following sections, overall performance for HMDA-reportable lending is good while small business lending performance is poor.

Home Purchase Loans
Home purchase lending to low-income borrowers is good. In 2021, the bank made 9.0 percent of its home purchase loans to low-income borrowers, which was below the percentage of low-income families (16.6 percent) but more than double aggregate performance of 4.0 percent. In 2022 and 2023, the bank made 4.5 percent of its home purchase loans to low-income borrowers, which was below the percentage of low-income families (16.6 percent). In 2022, the bank's lending (6.7 percent) was above aggregate performance (3.9 percent) while in 2023, the bank's lending (1.5 percent) was below aggregate performance (3.5 percent).

Home purchase lending to moderate-income borrowers is excellent. In 2021, the bank made 29.5 percent of its home purchase loans to moderate-income borrowers, which was above the percentage of moderate-income families (14.1 percent) and above aggregate performance of 15.7 percent. In 2022 and 2023, the bank made 21.9 percent of its home purchase loans to moderate-income borrowers, which was above the percentage of moderate-income families (15.5 percent). In 2022, the bank's lending (25.6 percent) was above aggregate performance (15.5 percent) and in 2023, the bank's lending (16.9 percent) was above aggregate performance (15.2 percent).

Home Refinance Loans

Home refinance lending to low-income borrowers is excellent. In 2021, the bank made 8.6 percent of its home refinance loans to low-income borrowers, which was below the percentage of low-income families (16.6 percent) but more than triple aggregate performance of 2.8 percent. In 2022 and 2023, the bank made 11.7 percent of its home refinance loans to low-income borrowers, which was below the percentage of low-income families (16.6 percent). In 2022, the bank's lending (11.8 percent) was more than double aggregate performance (5.5 percent) and in 2023, the bank's lending (11.6 percent) was nearly double aggregate performance (6.2 percent).

Home refinance lending to moderate-income borrowers is good. In 2021, the bank made 15.0 percent of its home refinance loans to moderate-income borrowers, which was above the percentage of moderate-income families (14.1 percent) and above aggregate performance of 10.0 percent. In 2022 and 2023, the bank made 22.5 percent of its home refinance loans to moderate-income borrowers, which was above the percentage of moderate-income families (15.5 percent). In 2022, the bank's lending (23.5 percent) was above aggregate performance (16.6 percent) and in 2023, the bank's lending (20.9 percent) was above aggregate performance (16.7 percent).

Home Improvement Loans

Home improvement lending to low-income borrowers is excellent. In 2021, the bank made 14.0 percent of its home improvement loans to low-income borrowers, which was below the percentage of low-income families (16.6 percent) but above aggregate performance of 8.1 percent. In 2022 and 2023, the bank made 11.6 percent of its home improvement loans to low-income borrowers, which was below the percentage of low-income families (16.6 percent). In 2022, the bank's lending (11.4 percent) was above aggregate performance (6.8 percent) and in 2023, the bank's lending (11.9 percent) was above aggregate performance (6.7 percent).

Home improvement lending to moderate-income borrowers is adequate. In 2021, the bank made 4.7 percent of its home improvement loans to moderate-income borrowers, which was below the percentage of moderate-income families (14.1 percent) and below aggregate performance of 8.9 percent. Bank performance improved in 2022 and 2023, with the bank making 20.3 percent of its home improvement loans to moderate-income borrowers, which was above the percentage of moderate-income families (15.5 percent). In 2022, the bank's lending (22.8 percent) was above aggregate performance (16.4 percent) and in 2023, the bank's lending (16.9 percent) was above aggregate performance (15.0 percent).

Small Business Loans

Small business lending to businesses of different sizes is poor. In 2021, the bank made 76.1 percent of its small business loans to businesses with revenues of $1 million or less, which was below the percentage of total businesses with revenues of $1 million or less (90.9 percent). The bank's performance is above aggregate performance of 58.9 percent in 2021. However, 2021 was a year in which many banks extended PPP loans as a result of the COVID-19 pandemic and were not required to capture and report the revenue of the businesses, which is reflected in the aggregate data. As a result, performance context and loan size data were considered. In 2021, the bank made fewer loans of less than $250,000 to businesses (94.0 percent) compared to aggregate lenders (96.0 percent). Additionally, in 2022 and 2023, the bank made 38.5 percent of its small business loans to businesses with revenues of $1 million or less, which was below the percentage of total businesses with revenues of $1 million or less (91.2 percent). In 2022, bank lending (40.0 percent) was below aggregate performance (61.9 percent) and in 2023, the bank's lending (37.5 percent) was below aggregate performance (62.7 percent).

CD Lending

The bank makes few, if any CD loans in the Southwest Kentucky AA. During the review period, the bank made no qualifying CD loans in the AA despite opportunities for CD lending in the area.

INVESTMENT TEST

The bank made an adequate level of qualified CD investments and grants in the Southwest Kentucky AA totaling $2.2 million. This amount included three current period investments totaling $734,800, eight prior period investments totaling $932,100, and 30 donations totaling $525,100.

Investment types varied and addressed a range of CD needs. These include SBIC funds to address small business financing needs and MBS supporting LMI borrowers. The bank made rare use of innovative and/or complex investments to support CD initiatives. Additionally, the bank exhibits adequate responsiveness to CD needs.

Examples of noteworthy investments and grants provided during the review period include:

- Three current period MBS pools totaling $734,800 to support LMI borrowers in the AA.
- A $733,383 prior period SBA 504 security to finance a small business in the AA.
- A $15,000 contribution to support tornado disaster relief efforts.
- Three contributions totaling $421,300 to support the operations of a nonprofit that provides financial literacy training and counseling to LMI individuals in the AA.
- A $3,500 donation to a local nonprofit that provides utility and housing assistance to LMI households.
- Two donations totaling $4,000 to support a local food kitchen that serves LMI individuals in the AA.

The Southwest Kentucky AA also positively benefited from a $1,000 donation benefiting a BSRA that includes the entire state of Kentucky. This donation was previously described under the Investment Test heading for the state of Kentucky.

SERVICE TEST

Retail banking services were good in the Southwest Kentucky AA and the bank provided an excellent level of CD services.

Retail Banking Services

The bank's retail service delivery systems are accessible to the geographies and individuals of different income levels throughout the Southwest Kentucky AA. In deriving this conclusion, the distribution of the bank's branches by census tract income level was compared to the distribution of households and businesses among the tract categories in the AA. As the following tables show, the bank had no branches in low-income tracts, though there was only one low-income census tract in the AA. In 2021, the bank operated one branch in a moderate-income tract; with the U.S. Census changes in 2022, a branch that was previously in a middle-income tract was reclassified to moderate-income, resulting in two bank branches (25 percent of total branches) in moderate-income tracts in 2023. By comparison, 8.2 percent of households and 12.6 percent of businesses were located in moderate-income tracts. The bank also had one branch in an upper-income tract in Paducah that was in close proximity to moderate-income tracts. Thus, delivery systems are considered accessible in the AA.

The bank closed two branches in upper-income tracts in Southwest Kentucky during the review period and opened no new branches. The bank's branch opening and closings have generally not adversely affected the accessibility of its delivery systems.

Weekday branch lobby hours are consistent across all branches in the AA, opening at 9 a.m. and closing at 4:30 p.m. All branches are open until 5 p.m. on Fridays. The bank offers drive-through hours starting at 8:30 AM each weekday. The bank offers Saturday hours from 9:00 a.m. to 12:00 p.m. on Saturdays at four branches, including one branch in a moderate-income census tract. Thus, hours and services do not vary in a way that inconveniences the AA, particularly LMI geographies and LMI individuals.

The tables below show the distribution of branches and ATMs along with households and businesses by tract category.

Geographic Distribution of Branches & ATMS 2021

CD Services

The bank is a leader in providing CD services in the AA. During the review period, bank employees provided 81 CD service activities totaling 605 hours to 22 organizations operating throughout the AA. Bank staff provided their financial expertise primarily by serving on the board of directors for organizations engaged in CD and providing financial education. Of particular note, bank staff engaged in 354 hours of service for an organization focused on increasing homeownership opportunities for LMI individuals by serving on the board of directors and providing homebuyer education to clients of the organization. Additionally, bank staff dedicated 55 hours of board and committee service to the organization that leads long-term recovery efforts for areas in the region that have been impacted by three recent natural disasters.

NONMETROPOLITAN STATEWIDE AREA
LIMITED-SCOPE REVIEW

The following non-MSA AA was reviewed using limited-scope examination procedures. Through these procedures, conclusions regarding the institution's CRA performance are drawn from the review of available facts and data, including performance and demographic information. Refer to the tables in *Appendices G and H* for additional information regarding the AA.

DESCRIPTION OF INSTITUTION'S OPERATIONS IN KENTUCKY NON-MSA AA

Non-MSA AA	AA Delineation/Counties	# Branches *(as of 12/31/2023)*	Deposits ($000s) *(as of June 30, 2023)*
Simpson	Simpson	1	$53,157

CONCLUSION WITH RESPECT TO PERFORMANCE TESTS

The following table compares conclusions regarding performance in the limited-scope non-MSA AA to overall performance for the state of Kentucky.

Performance in the Limited-Scope Review Non-MSA Assessment Area			
Non-MSA AA	**Lending Test**	**Investment Test**	**Service Test**
Simpson	Consistent	Not Consistent (Below)	Consistent

The key performance standards of the Lending Test for the limited-scope area included geographic distribution, borrower distribution, and CD loans. For the geographic distribution of loans, performance was not rated due to an absence of LMI tracts. Borrower distribution was adequate, and the bank made no qualifying CD loans.

Qualifying amounts and conclusions for the bank's investment and grant activity in the limited-scope non-MSA area was as follows: $213,200 in Simpson (poor level).

The performance standards of the Service Test for limited-scope non-MSA areas included retail banking and CD services. The bank's retail banking services were good in the Simpson AA. Additionally, the bank had 27 hours of qualified CD service activities (adequate).

Performance in the limited-scope non-MSA AA did not impact overall performance for the state.

IOWA

CRA RATING FOR IOWA: **SATISFACTORY**
The Lending Test is rated: **Low Satisfactory**
The Investment Test is rated: **High Satisfactory**
The Service Test is rated: **Low Satisfactory**

Major factors contributing to this rating include:

- The geographic distribution of loans reflects adequate penetration throughout Iowa AAs.
- The distribution of borrowers reflects adequate penetration throughout Iowa AAs.
- The bank made a low level of CD loans in Iowa.
- The bank made a significant level of qualified CD investments and grants in Iowa.
- Retail banking services, which includes accessibility of delivery systems, changes in branch locations, and reasonableness of hours and services, are adequate.
- The bank provides a limited level of CD service activities in Iowa.

SCOPE OF EXAMINATION

A full-scope review was conducted for the following AA in Iowa:
- Waterloo

Limited-scope reviews were conducted for the remaining three AAs:
- Cedar Rapids*
- Des Moines
- Fayette*

The time period, products, and affiliates evaluated for these AAs are consistent with the scope discussed in the institution section of this report.

*As of December 31, 2023, the bank operated no branch offices in these AAs. The bank exited the AAs in May 2021, early in the retail review period and before the beginning of the CD review period. These AAs, therefore, were not included in the performance analysis.

DESCRIPTION OF INSTITUTION'S OPERATIONS IN IOWA

As of June 30, 2023, Regions had $351 million in deposits in Iowa accounting for 0.3 percent of its total deposits. Regions Bank operated five branch offices in Iowa as of December 31, 2023, representing 0.4 percent of the bank's total branches. HMDA-reportable lending in Iowa accounted for 0.2 percent of total institutional HMDA-reportable lending by number of loans and 0.1 percent by dollar volume. Small business lending in Iowa accounted for 0.1 percent of the bank's total small business lending by number of loans and 0.1 percent by dollar volume. Overall, the bank's HMDA-reportable and small business lending activity in the state was less than the percentage of total institutional deposits.

The following table shows lending activity from January 1, 2021 through December 31, 2023.

Statewide Summary of Lending Activity
Assessment Areas Located in: Iowa
2021-2023

Originations & Purchases

CONCLUSIONS WITH RESPECT TO PERFORMANCE TESTS IN IOWA

LENDING TEST

Overview

The Lending Test rating for Iowa is Low Satisfactory. The rating is a result of performance in each characteristic of the Lending Test applicable to the state, including Lending Activity (poor); Geographic Distribution (adequate); Borrower Distribution (adequate); and CD Lending (low level). Highlights of each characteristic are found in the sections that follow, with additional descriptions and details within the full-scope AA of the state.

Lending Activity

Lending levels reflect poor responsiveness to the credit needs of Iowa AAs. The total number and dollar volume of HMDA-reportable and small business loans was considered in arriving at Lending Activity conclusions, as well as competitive factors and the bank's overall importance to each AA. Statewide conclusions are derived from conclusions within each AA as detailed in the *Lending Activity* section of the Waterloo AA.

Geographic and Borrower Distribution

The geographic distribution of HMDA-reportable and small business loans reflects adequate dispersion throughout Iowa AAs and the distribution of loans by borrower income and revenue size of businesses is adequate. The analyses of HMDA-reportable and small business lending within the full-scope AA are discussed in detail later in this report.

CD Lending

The bank made a low level of CD loans in Iowa. During the review period, the bank originated one loan totaling $2.6 million in the Des Moines AA, with no qualifying CD loans in the Waterloo AA of the state. In addition, the

bank received consideration at the state level for two CD loans totaling $150,000 that benefited multiple AAs throughout the state. Of the statewide loans, one was an LOC to a statewide CDFI operating in the Waterloo AA and the other was a loan to a nonprofit serving LMI clients throughout central Iowa. More information on CD loans can be found in the full-scope AA section of this report.

INVESTMENT TEST

The Investment Test rating for Iowa is High Satisfactory. The bank made a significant level of qualified CD investments and grants in Iowa, with $27.8 million in qualified investments and $40,600 in qualified contributions directly benefiting its Iowa AAs. The bank also received consideration at the state level for a $4,100 investment in a statewide certified business development company (CBDC). The bank also received consideration for $265,000 in statewide contributions. These contributions included $225,000 to support a statewide organization that provides job training and career readiness training that primarily benefits LMI students.

The bank made a significant level of qualified investments and contributions in the Waterloo full-scope AA. Additional details regarding specific investments and contributions can be found in the full-scope AA section of this report.

The bank was responsive to the needs of its AAs in the state of Iowa. Therefore, the bank also received consideration for $3.9 million in qualified investments and $5,000 in qualified contributions within the state that benefited geographies outside of the bank's AAs. This included a $1.8 million prior period LIHTC, a $1 million CDFI investment to finance affordable housing, and a $5,000 donation to support tornado disaster relief efforts.

SERVICE TEST

The Service Test rating for Iowa is Low Satisfactory.

Retail Services

Delivery systems are reasonably accessible to the bank's geographies and individuals of different income levels in Iowa, particularly given the bank's limited presence in the state. As of December 31, 2023, Regions operated five branches in the state, including two branches in moderate-income tracts, representing 40.0 percent of total statewide branches.

A full array of personal and business banking products and services is offered at all locations in the two Iowa AAs. Across the state, branch hours do not vary in a way that inconveniences individual AAs. All branches in the state offer lobby and drive-through hours from 9 a.m. to 5:00 p.m. Monday-Friday. The bank offers Saturday hours from 9 a.m. to 12 p.m. at most branches. Delivery systems include full-service ATMs at all branches in the state. In addition to those ATMs, the bank compliments its traditional service delivery methods with alternative delivery systems that provide increased access to banking services, as previously discussed in the *Institution, Retail Banking Services* section of this report.

During the review period, the bank closed two branches in moderate-income tracts and one in a middle-income tract. The branch closures were the result of the bank exiting two markets (Cedar Rapids and Fayette) in 2021. The bank did not open any branches in Iowa. Given the bank's limited branch presence in this state, including the two markets it exited, changes to the bank's branch network in Iowa did not generally adversely affect the accessibility of delivery systems, particularly to LMI geographies or LMI individuals. Additional details on the bank's retail services can be found in the full-scope AA sections of this report.

CD Services

Regions provides a limited level of CD services in Iowa. During the review period, staff engaged in 121 hours of qualifying CD service activities that directly benefited individual AAs in the state. The bank had the highest volume of CD service hours in the Des Moines AA with 86 qualified hours.

Additional details of CD service hours in Iowa are described later within the section for the individual AA that they benefit.

METROPOLITAN AREA – WATERLOO MSA
(Full-Scope Review)

DESCRIPTION OF INSTITUTION'S OPERATIONS IN THE WATERLOO AA

Overview

The Waterloo AA includes Black Hawk County, which is one of the three counties that comprise the Waterloo-Cedar Falls, IA MSA. As of December 31, 2023, the bank operated three branches in the AA. This accounts for 60.0 percent of the bank's branches in the state of Iowa and 0.2 percent of its total branches. Furthermore, 59.8 percent of the bank's statewide deposits and 19.0 percent of statewide combined HMDA-reportable and small business lending by dollar volume are located in the Waterloo AA.

The Waterloo AA is a small, moderately competitive banking market where national, regional, and local banks have a presence. According to the FDIC Summary of Deposits Report as of June 30, 2023, there were 13 financial institutions operating 34 branch offices inside the AA with a total of $2.8 billion in deposits.[109] Banks with the largest deposit market share in the AA include Farmers State Bank (32.4 percent), U.S. Bank (15.0 percent), and Lincoln Savings Bank (9.9 percent).[110] Regions ranked 5th in market share at 7.6 percent.[111]

Regions originated and/or purchased 0.4 percent, 0.4 percent, and 0.2 percent of total HMDA-reportable loans in the AA in 2021, 2022, and 2023, respectively. The bank ranked 27th out of 170 reporters in 2021, 26th out of 144 reporters in 2022, and 31st out of 128 reporters in 2023. The top HMDA reporters in the AA included Veridian Credit Union, Greenstate Credit Union, and Farmers State Bank.

For small business lending, Regions originated and/or purchased 0.7 percent, 0.3 percent, and 0.2 percent of total reported small business loans in the AA in 2021, 2022, and 2023, respectively. The bank ranked 20th out of 77 reporters in 2021, 27th out of 66 reporters in 2022, and 24th out of 68 reporters in 2023. The top small business reporters in the AA included Lincoln Savings Bank, U.S. Bank, J.P. Morgan Chase, and American Express.

AA Demographics, Population, and Income Characteristics

The AA population was 130,471 as of July 1, 2023.[112] This represented a 0.5 percent decrease since the 2020 census.[113] During the same time period, the statewide population in Iowa increased by 0.5 percent.[114]

During 2021, the AA contained 38 census tracts: four low-income tracts (10.5 percent), nine moderate-income tracts (23.7 percent), 18 middle-income tracts (47.4 percent), six upper-income tracts (15.8 percent), and one unknown income tract (2.6 percent). For 2022 and 2023, there was a census tract remapping that changed this distribution slightly. The total census tracts in the AA increased to 39: five low-income tracts (12.8 percent), eight moderate-income tracts (20.5 percent), 20 middle-income tracts (51.3 percent), and six upper-income tracts (15.4 percent).

For purposes of classifying borrower income, this evaluation uses the FFIEC estimated median family income for the Waterloo-Cedar Falls, IA MSA. The table below provides a breakdown of the estimated annual family income for each income category (low, moderate, middle, and upper) in the MSA. As shown, median family income increased 16.8 percent during the review period from $78,000 in 2021 to $91,100 in 2023.

Borrower Income Levels
Waterloo-Cedar Falls, IA MSA

FFIEC Estimated Median Family Income		Low 0 - 49.99%	Moderate 50% - 79.99%	Middle 80% - 119.99%	Upper 120% - & above
2021	**$78,000**	0 - $38,999	$39,000 - $62,399	$62,400 - $93,599	$93,600 - & above
2022	**$90,100**	0 - $45,049	$45,050 - $72,079	$72,080 - $108,119	$108,120 - & above
2023	**$91,100**	0 - $45,549	$45,550 - $72,879	$72,880 - $109,319	$109,320 - & above

There were 31,329 total families in the AA as of 2023; 23.3 percent were low-income, 18.0 percent were moderate-income, 20.6 percent were middle-income, and 38.1 percent were upper-income. Of these families, 9.9 percent had incomes below the poverty level, which was higher than the 7.1 percent statewide level for Iowa. Poverty rates were further elevated in LMI tracts, with 29.6 percent of families in low-income tracts and 21.7 percent of families in moderate-income tracts living below the poverty level.

Housing Characteristics

There are 58,187 housing units in the AA, of which 60.1 percent are owner-occupied, 31.5 percent are rental units, and 8.4 percent are vacant. Homeownership rates in low-income tracts and moderate-income tracts are lower at 33.2 percent and 48.5 percent, respectively.

The median age of housing stock across the AA was 61 years, which was 11 years older than the median Iowa statewide housing stock age. This age was consistent across low-, moderate-, and middle-income tracts, with only upper-income tracts displaying slightly newer housing stock at 53 years. The relatively old age of homes is an indicator of opportunity for home improvement loans in the AA, including in LMI tracts.

The median housing value in the AA increased during the review period. In January 2021, the median home listing price in Black Hawk County was $174,450.[115] By December 2023, the median home listing price had increased to $270,676.[116] This represented a 55.2 percent increase during the three-year review period. Using the assumption that a borrower can obtain a mortgage for approximately three times their annual income and using the 2023 FFIEC median family income for LMI families in the MSA, affordable homes would be less than $136,647 for low-income families and less than $218,637 for moderate-income families.[117] As such, the recent increases in AA home prices have put further affordability pressure on LMI families.

Economic Conditions

The AA has a diverse economy which offers a variety of employment opportunities to local residents. As of Q1 2023, total employment in the AA was 70,870.[118] Industries employing the most residents included manufacturing (14,700), healthcare and social assistance (10,151), government (9,244), and retail (8,565).[119] The largest organizations by number of employees include John Deere, Covenant Health Systems, and Tyson.[120]

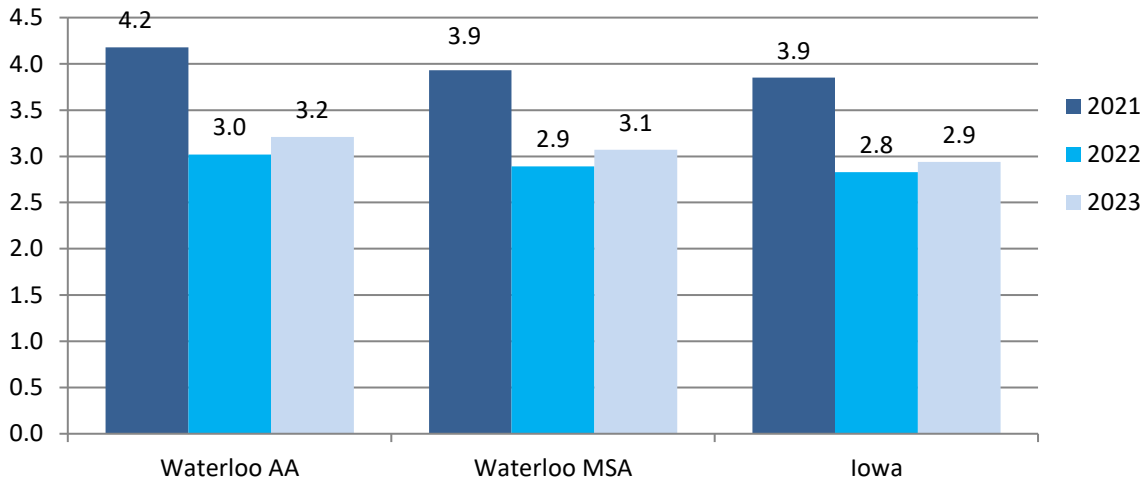
The following table shows the unemployment rate percentages for the bank's Waterloo AA, the MSA, and the state of Iowa. As shown, the unemployment rate in the AA was slightly higher than overall unemployment rate in the state of Iowa during the three-year review period. The AA's unemployment rate trend was in line with the overall state. During the review period, the AA unemployment rate dropped from 4.2 percent in 2021 to 3.2 percent in 2023. During this same timeframe, Iowa's unemployment rate also dropped from 3.9 percent in 2021 to 2.9 percent in 2023.

Unemployment Rates - IA Waterloo



Not Seasonally Adjusted. Source: Bureau of Labor Statistics

Credit and CD Needs

To better understand the local landscape, information from a recently conducted interview with an individual engaged in Waterloo-area CD was referenced. This individual discussed the various needs and opportunities across the region as well as how financial institutions can be responsive to local CD needs. The contact mentioned affordable housing as a primary need in the community.

The contact also mentioned that the local economy is stable and unemployment is low. Despite healthy demand for labor, the area's population continues to decrease. In an attempt to attract new residents and retain existing residents, community leaders are currently focusing on initiatives to increase quality of life.

The contact stated that local housing prices have increased steadily since the COVID-19 pandemic. Current housing prices in the AA are quite elevated compared to historical norms and this has created affordability challenges for LMI and first-time homebuyers. The affordable homes that are available are typically old and require extensive repairs before they are move-in ready. According to the contact, additional affordable housing supply is one of the community's primary needs.

The contact also discussed local CD initiatives that banks could participate in. Namely, there are local revolving loan funds that provide: (1) financing for small businesses that do not qualify for traditional bank financing, and (2) funds for affordable housing repair and downpayment assistance. These revolving loans are usually in the second or third lien position behind a bank. Funding these programs and/or serving on the programs' loan review committees are several ways that banks could assist in these CD initiatives.

CONCLUSIONS WITH RESPECT TO PERFORMANCE TESTS IN THE WATERLOO AA

LENDING TEST

Lending levels reflect poor responsiveness to credit needs of the AA. The geographic distribution of loans reflects adequate penetration throughout the AA and the distribution of loans reflects adequate penetration among borrowers of different income levels and businesses of different revenue sizes. In addition, the bank made a low level of CD loans benefiting the Waterloo AA.

The analysis included 58 HMDA-reportable loans and 19 small business loans reported by the bank in the AA during the review period. While overall volume is low, HMDA-reportable lending received greater weight in determining conclusions. Additionally, during 2021, 2022, and 2023, the bank originated or purchased 35 home refinance loans, 13 home improvement loans, and six home purchase loans in the AA. Thus, when considering HMDA-reportable loan categories, greatest weight was assigned to home refinance loans given its relative share of the total HMDA-reportable lending in this AA, followed by home improvement loans and home purchase loans.

Details of the bank's mortgage and small business lending and information regarding lending by peers can be found in *Appendix F.*

Lending Activity

Lending activity is considered poor. Overall, HMDA-reportable loans and CRA small business loans volumes are extremely low relative to the area deposits. Low volume is oftentimes indicative of reduced opportunity and/or reduced bank presence in an area and may result in conclusions not being formed. However, low volume in the Waterloo AA is not the result of the aforementioned factors. In fact, opportunities for lending appear plentiful when reviewing demographic data, aggregate performance, and information from community contacts. Additionally, the bank maintains the largest share of its Iowa branches and deposits in the Waterloo AA, but as previously noted in this section, does very little lending in the AA. Thus, as described in the sections that follow, overall conclusions were drawn for the AA despite lower levels of lending.

Geographic Distribution of Loans

The bank's geographic distribution of loans reflects adequate penetration throughout the AA. As described in the following sections, overall performance for HMDA-reportable lending is adequate and small business lending performance is adequate.

Home Refinance Loans

Based on the low volume, home refinance lending in low-income tracts is adequate, with the bank making three loans throughout the review period. In 2021, the bank made no home refinance loans in low-income tracts; however, opportunities for lending were limited in these tracts as reflected by aggregate performance of only 1.0 percent. In 2022 and 2023, the bank made 20.0 percent of its home refinance loans in low-income tracts, which was above the percentage of owner-occupied units in these tracts (5.1 percent). In 2022, the bank's lending (22.2 percent) was above aggregate performance (4.5 percent) and in 2023, the bank's lending (16.7 percent) was above aggregate performance (5.6 percent).

Home refinance lending in moderate-income tracts is good, with the bank making ten loans throughout the review period. In 2021, the bank made 30.0 percent of its home refinance loans in moderate-income tracts, which was above the percentage of owner-occupied units in these tracts (16.7 percent) and above aggregate performance of 10.6 percent. In 2022 and 2023, the bank made 26.7 percent of its home refinance loans in moderate-income

tracts, which was above the percentage of owner-occupied units in these tracts (13.7 percent). In 2022, the bank's lending (22.2 percent) was above aggregate performance (12.0 percent) and in 2023, the bank's lending (33.3 percent) was above aggregate performance (14.9 percent).

Home Improvement Loans
Home improvement lending in low-income tracts is poor with the bank making only one loan throughout the review period. In 2021, the bank made one home improvement loan in a low-income tract (14.3 percent), which was above the percentage of owner-occupied units in these tracts (3.1 percent) and above aggregate performance of 3.8 percent. In 2022 and 2023, the bank made no home improvement loans in low-income tracts despite opportunities for lending as reflected by demographic data and aggregate performance.

Home improvement lending in moderate-income tracts is adequate, with the bank making three loans throughout the review period. In 2021, the bank made no home improvement loans in moderate-income tracts (0.0 percent), below the owner-occupancy rate of 16.7 percent and below aggregate lending of 13.6 percent. In 2022 and 2023, the bank made three home improvement loans in moderate-income tracts (50 percent), which was above the percentage of owner-occupied units in these tracts (13.7 percent). In 2022, the bank's lending (50.0) was above aggregate performance (23.2 percent). Similarly, in 2023, the bank's lending (50.0 percent) was above aggregate performance (16.2 percent). Given the limited volume of lending (three loans over three years), the bank's performance is adequate.

Home Purchase Loans
During the review period, the bank made no home purchase loans in low-income tracts or in moderate-income tracts despite opportunities to lend as reflected in demographic data and aggregate performance.

Small Business Loans
Small business lending in low-income tracts is adequate, with the bank making two loans throughout the review period. In 2021, the bank made 8.3 percent of its small business loans in low-income tracts, which was similar to the percentage of total businesses located in these tracts (7.5 percent) and above aggregate performance of 6.9 percent. In 2022, the bank made 25.0 percent of its small business loans in low-income tracts, which was above the percentage of total businesses located in these tracts (7.9 percent) and above aggregate performance of 8.0 percent. The bank made no small business loans in low-income tracts in 2023 despite opportunities for lending as reflected in demographic data (7.9 percent) and aggregate performance (7.1 percent).

Small business lending in moderate-income tracts is adequate, with the bank making a low volume of loans (three) throughout the review period, which contributed to the rating. In 2021, the bank made 8.3 percent of its small business loans in moderate-income tracts, which was below the percentage of total businesses located in these tracts (17.2 percent) and below aggregate performance of 15.1 percent. The bank made no small business loans in moderate-income tracts in 2022 despite opportunities for lending as reflected in demographic data and aggregate performance. However, in 2023, the bank's lending (66.7 percent) was above the percentage of total businesses located in these tracts (16.5 percent) and above aggregate performance of 17.5 percent.

No conspicuous lending gaps were identified based on an analysis of the dispersion of the loan products reviewed. The bank had activity in less than half of all census tracts throughout the review period. However, the bank has only three branches in this AA. Moreover, lending data and maps did not indicate an absence of loans across groups of LMI tracts, but instead, show that all income tract categories experience similar penetration rates – approximately 40 percent. Thus, the analysis revealed that the bank's overall lending volume is low but not conspicuous in its dispersion.

Lending to Borrowers of Different Incomes and Businesses of Different Sizes

The distribution of loans based on borrower income or gross annual revenues is adequate. As described in the following sections, overall performance for HMDA-reportable lending is adequate while small business lending performance is good.

Home Refinance Loans

Home refinance lending to low-income borrowers is good, with the bank making 11 loans during the review period. In 2021, the bank made 25.0 percent of its home refinance loans to low-income borrowers, which was above the percentage of low-income families (21.0 percent) and above aggregate performance of 8.1 percent. In 2022 and 2023, the bank made 40.0 percent of its home refinance loans to low-income borrowers, which was above the percentage of low-income families (23.3 percent). In 2022, the bank's lending (44.4 percent) was above aggregate performance (16.0 percent) and in 2023, the bank's lending (33.3 percent) was above aggregate performance (13.4 percent).

Home refinance lending to moderate-income borrowers is excellent, with the bank making 12 loans during the review period. In 2021, the bank made 30.0 percent of its home refinance loans to moderate-income borrowers, which was above the percentage of moderate-income families (19.1 percent) and above aggregate performance of 20.8 percent. In 2022 and 2023, the bank made 40.0 percent of its home refinance loans to moderate-income borrowers, which was above the percentage of moderate-income families (18.0 percent). In 2022, the bank's lending (33.3 percent) was above aggregate performance (28.8 percent) and in 2023, the bank's lending (50.0 percent) was above aggregate performance (22.9 percent).

Home Improvement Loans

Home improvement lending to low-income borrowers is adequate, with the bank making five loans during the review period. In 2021, the bank made 28.6 percent of its home improvement loans to low-income borrowers, which was above the percentage of low-income families (21.0 percent) and above aggregate performance of 13.1 percent. In 2022, the bank made 75.0 percent of its home improvement loans to low-income borrowers, which was above the percentage of low-income families (23.3 percent) and above aggregate performance (17.8 percent). However, in 2023, the bank made no home improvement loans to low-income borrowers despite opportunity for lending as reflected in demographic data and aggregate performance.

Home improvement lending to moderate-income borrowers is adequate, with the bank making four loans during the review period. In 2021, the bank made 28.6 percent of its home improvement loans to moderate-income borrowers, which was above the percentage of moderate-income families (19.1 percent) and similar to aggregate performance of 27.6 percent. In 2022 and 2023, the bank made 33.3 percent of its home improvement loans to moderate-income borrowers, which was above the percentage of moderate-income families (18.0 percent). In 2022, the bank's lending (25.0) was similar to aggregate performance (23.2 percent). In 2023, the bank's lending (50.0 percent) was above aggregate performance (26.6 percent).

Home Purchase Loans

During the review period, the bank made no home purchase loans to low-income borrowers despite opportunities to lend as reflected in demographic data and aggregate performance.

Home purchase lending to moderate-income borrowers is poor, with the bank making only two loans during the review period. In 2021 and 2023, the bank made no home purchase loans to moderate-income borrowers despite opportunity for lending as reflected in demographic data and aggregate performance. In 2022, the bank's lending of home purchase loans to moderate-income borrowers (50.0 percent) was above the percentage of moderate-income families (18.0 percent) and above aggregate performance (27.4 percent).

Small Business Loans

Small business lending to businesses of different sizes is good. In 2021, the bank made 50.0 percent of its small business loans to businesses with revenues of $1 million or less, which was below the percentage of total businesses with revenues of $1 million or less (89.3 percent). The bank's performance is below aggregate performance of 52.7 percent in 2021. However, 2021 was a year in which many banks extended PPP loans as a result of the COVID-19 pandemic and were not required to capture and report the revenue of the businesses, which is reflected in the aggregate data. As a result, performance context and loan size data were considered. In 2021, the bank made all of its loans in amounts less than $250,000 to businesses compared to aggregate lenders (93.7 percent). In 2022 and 2023, the bank made 85.7 percent of its small business loans to businesses with revenues of $1 million or less, which was below the percentage of total businesses with revenues of $1 million or less (89.6 percent). In 2022, the bank's lending (75.0 percent) was above aggregate performance (53.7 percent) and in 2023, the bank originated all three of its small business loans to small businesses, which was also above aggregate performance (55.5 percent). Moreover, all of the bank's small business loans were originated in amounts of $250,000 or less, indicating a willingness to lend in the smaller amounts that are typically requested by small businesses.

CD Lending

The bank made a low level of CD loans in the Waterloo AA. During the review period, the bank did not originate or renew any qualifying CD loans directly benefiting the AA. However, the AA does benefit from one LOC totaling $100,000 to a statewide CDFI serving over 60 counties throughout the state, as previously noted in the *CD Lending* section for the state of Iowa. While this loan does not solely benefit the Waterloo AA, the CDFI operates an office in the Waterloo AA.

INVESTMENT TEST

The bank made a significant level of qualified CD investments and grants in the Waterloo AA, totaling $1.3 million. This amount included two current period investments totaling $472,200, four prior period investments totaling $814,300, and 11 donations totaling $40,600.

Investment variety was limited to MBS supporting LMI borrowers and one prior period LIHTC originated in 2011. The bank supplemented these investments with local and statewide donations that were responsive to various CD needs.

Examples of noteworthy investments and grants provided during the review period include:

- Two current period MBS pools totaling $472,200 to support LMI borrowers in the AA.
- A $20,000 donation to an organization that provides financial literacy training that primarily benefits LMI youth in the AA.
- A $2,500 donation to support a nonprofit affordable housing organization in the AA.
- A $2,500 donation to support a business accelerator and entrepreneurship program in the AA.

The Waterloo AA also positively benefited from $4,100 in qualified investments and $265,000 in qualified donations benefiting a BSRA that includes the entire state of Iowa. These investments and donations were previously described under the *Investment Test* heading for the state of Iowa.

SERVICE TEST

Retail banking services are adequate in Waterloo and the bank provides a limited level of CD services in its AA.

Retail Banking Services

Retail service delivery systems are accessible to the bank's geographies and individuals of different income levels throughout the Waterloo AA, given the bank's limited presence in this AA. In deriving this conclusion, the distribution of the bank's branches by census tract income level was compared to the distribution of households and businesses among the tract categories in the AA. As the following tables show, the bank operates three branches in this AA, including one (33.3 percent) that was in a low-income tract in 2021 that was reclassified to moderate-income in 2022. By comparison, 16.2 percent of households and 16.5 percent of businesses are in moderate-income in 2023. The bank's branch in a moderate-income tract is located in close proximity to the other LMI tracts in the AA. The bank did not close or open any branches during the review period.

The bank's branch lobby hours are consistent across all branches in the AA, opening at 9 a.m. and closing at 5:00 p.m. The bank offered Saturday hours from 9:00 a.m. to 12:00 p.m. on Saturdays at all branches in 2021 but eliminated the Saturday hours at the branch in the moderate-income tract in 2022. This change was considered when evaluating this component, but overall, it was determined that hours and services do not vary in a way that inconveniences the AA, particularly LMI geographies and LMI individuals.

The tables below show the distribution of branches and ATMs along with households and businesses by tract category.

Geographic Distribution of Branches & ATMS 2021

CD Services

The bank provides a limited level of CD services in the AA. During the review period, bank employees provided 11 CD service activities totaling 35 hours to four organizations operating throughout the AA. Bank staff leveraged their financial expertise by providing financial education, primarily for K-12 students, and by serving on the board of directors for a nonprofit organization that provides a range of services for LMI individuals.

METROPOLITAN AREAS
LIMITED-SCOPE REVIEW

The following MSA AAs were reviewed using limited-scope examination procedures. Through these procedures, conclusions regarding the institution's CRA performance are drawn from the review of available facts and data, including performance and demographic information. Refer to the tables in *Appendices G and H* for additional information regarding these AAs.

DESCRIPTION OF INSTITUTION'S OPERATIONS IN IOWA MSA Aas

MSA AA	AA Delineation/Counties	# Branches *(as of 12/31/2023)*	Deposits ($000s) *(as of June 30, 2023)*
Cedar Rapids*	Benton, Jones, & Linn	0	N/A
Des Moines	Polk & Warren	2	$75,807

*As of December 31, 2023, the bank operated no branch offices in this AA. The bank exited the AA in May 2021. Therefore, no analysis was conducted in this market.

CONCLUSIONS WITH RESPECT TO PERFORMANCE TESTS

The following table compares conclusions regarding performance in each limited-scope MSA AA to overall performance for the state of Iowa.

Performance in the Limited-Scope Review Metropolitan Assessment Area			
MSA AA	**Lending Test**	**Investment Test**	**Service Test**
Des Moines	Consistent	Not Consistent (Exceeds)	Consistent

The key performance standards of the Lending Test for limited-scope areas included geographic distribution, borrower distribution, and CD loans. Geographic distribution was poor in Des Moines and borrower distribution was adequate. The bank originated one CD loan totaling $2.6 million in Des Moines, which was adequate.

Qualifying amounts and conclusions for the bank's investment and grant activity in the limited-scope MSA area was as follows: $26.5 million in Des Moines (excellent level).

The performance standards of the Service Test for limited-scope MSA areas included retail banking and CD services. The bank's retail banking services were adequate in the Des Moines AA. Additionally, the bank had an adequate level of qualified CD service activities (86 hours).

Performance in the limited-scope AAs did not impact overall performance for the state.

NONMETROPOLITAN STATEWIDE AREAS
LIMITED-SCOPE REVIEW

The bank exited the Fayette non-MSA AA, which was the only non-MSA AA in Iowa, in May 2021 and, therefore, no analysis was conducted.

ST. LOUIS MO-IL MULTISTATE MSA

CRA RATING FOR ST. LOUIS MO-IL MULTISTATE[121]: SATISFACTORY

The Lending Test is rated: **Low Satisfactory**
The Investment Test is rated: **Low Satisfactory**
The Service Test is rated: **Low Satisfactory**

Major factors contributing to this rating include:

- The geographic distribution of loans reflects adequate penetration throughout the multistate AA.
- The distribution of borrowers reflects good penetration throughout the multistate AA.
- The bank made an adequate level of CD loans in the St. Louis Multistate AA.
- The bank made an adequate level of qualified CD investments and grants in the St. Louis Multistate AA.
- Retail banking services, which includes accessibility of delivery systems, changes in branch locations, and reasonableness of hours and services, are adequate.
- The bank provides a relatively high level of CD service activities in the St. Louis Multistate AA.

SCOPE OF EXAMINATION

The time period, products, and affiliates evaluated for the St. Louis Multistate AA are consistent with the overall scope described in the *Description of the Institution* section of this report. Regions Bank's performance in the St. Louis multistate AA was evaluated using full-scope examination procedures.

DESCRIPTION OF INSTITUTION'S OPERATIONS IN THE ST. LOUIS MULTISTATE MSA

Overview

The St. Louis AA includes seven counties located in the St. Louis, Missouri-Illinois Multistate MSA: Madison, Monroe, St. Clair, and Clinton counties in Illinois; Jefferson, St. Charles, and St. Louis counties in Missouri; as well as the City of St. Louis, Missouri. As of December 31, 2023, Regions Bank operated 60 branches in the AA. The St. Louis AA accounts for 3.5 percent of the institution's total deposits and 2.7 percent of its total HMDA-reportable and small business loans by dollar.

According to the FDIC Summary of Deposits Report dated June 30, 2023, there are 89 financial institutions operating 705 branch locations in the AA with $125.5 billion in total deposits.[122] Regions ranks 7th in the market with 3.6 percent of deposits ($4.5 billion).[123] U.S. Bank National Association has the largest deposit market share

[121] This rating reflects performance within the multistate MSA. The statewide evaluations are adjusted and do not reflect performance in the parts of those states contained within the multistate MSA.
[122] "Offices and Deposits of All FDIC-Insured Institutions Deposit Market Share Report." *Federal Deposit Insurance Corporation*, 30 June 2023, https://www7.fdic.gov/sod/sodMarketBank.asp?barItem=2. Accessed 10 Jan. 2025.
[123] Ibid.

at 16.7 percent followed by Stifel Bank & Trust and Bank of America with 13.7 percent and 13.6 percent, respectively.[124]

HMDA-reportable lending in the AA is competitive. Regions originated or purchased 1.3 percent in loans during 2021 and ranked 23rd out of 677 reporters. In 2022, Regions originated or purchased 1.7 percent in loans and ranked 17th out of 667 reporters for the year. Regions originated or purchased 2.0 percent in loans during 2023 and ranked 14th out of 596 reporters. From 2021 through 2023, HMDA-reportable lending in the AA was dominated by U.S. Bank National Association and DAS Acquisition Company (dba USA Mortgage).

Small business lending is also competitive. Regions ranked 12th out of 205 reporters in 2021 with 1.8 percent of reported loans. In 2022, the bank ranked 30th out of 179 reporters with 0.3 percent of reported loans. Regions Bank ranked 20th out of 173 reporters, with 0.5 percent of reported loans for 2023. From 2021 through 2023, lending in the AA was dominated by U.S. Bank National Association, American Express and JPMorgan Chase Bank.

AA Demographics, Population, and Income Characteristics

The AA population was 2,502,214 as of July 1, 2023. This represented a 1.2 percent decrease since the 2020 census.[125] During the same period, the statewide population in Illinois decreased by 2.1 percent and Missouri slightly increased by 0.7 percent.[126] The majority (39.4 percent) of AA residents live in St. Louis County and St. Charles County (16.7 percent). [127]

According to 2023 FFIEC Census data, the AA consists of 621 census tracts: 73 tracts are low-income (11.8 percent), 132 tracts are moderate-income (21.3 percent), 222 tracts are middle-income (35.7 percent), 187 tracts are upper-income (30.1 percent), and seven tracts have unknown income (1.1 percent).

For purposes of classifying borrower income, this evaluation uses the FFIEC estimated median family income for the St. Louis, MO-IL MSA. The table below provides a breakdown of the estimated annual family income for each income category (low, moderate, middle, and upper). As shown, the median family income for the MSA increased from $84,700 in 2021 to $100,800 in 2023.

Borrower Income Levels
St. Louis, MO-IL MSA

FFIEC Estimated Median Family Income		Low	Moderate	Middle	Upper
		0 - 49.99%	50% - 79.99%	80% - 119.99%	120% - & above
2021	**$84,700**	0 - $42,349	$42,350 - $67,759	$67,760 - $101,639	$101,640 - & above
2022	**$96,800**	0 - $48,399	$48,400 - $77,439	$77,440 - $116,159	$116,160 - & above
2023	**$100,800**	0 - $50,399	$50,400 - $80,639	$80,640 - $120,959	$120,960 - & above

[126] Ibid.
[127] Ibid.

There were 648,450 total families in the AA as of 2023; 20.5 percent were low-income, 17.6 percent were moderate-income, 20.8 percent were middle-income, and 41.1 percent were upper-income. Of these families, 7.3 percent of families had income below the poverty level, which was lower than the 8.5 percent and 8.9 percent statewide levels in Illinois and Missouri, respectively. [128] Poverty rates were elevated in LMI tracts, with 28.3 percent of families in low-income tracts and 12.3 percent of families in moderate-income tracts living below the poverty level.[129]

Housing Characteristics

There were 1,136,992 housing units in the AA, of which 61.8 percent were owner-occupied, 28.7 percent were rental units, and 9.5 percent were vacant. Homeownership rates in low-income tracts and moderate-income tracts were lower at 30.8 percent and 49.4 percent respectively.

The median age of housing stock across the AA was 55 years, which was 4 years older than the median for Illinois and 11 years older than the Missouri housing stock median age. This age was consistent across low, moderate, and middle-income tracts, with only upper-income tracts displaying a younger housing stock at 44 years. The relatively old age of homes is an indicator of opportunity for home improvement loans in the AA, including in LMI tracts.

The median housing value in the AA was flat during the review period. As of January 2021, the median listing price for a home in the St. Louis MSA was $337,006.[130] From January 2021 to January 2023, the median listing price for a home decreased 0.4 percent to $335,628.[131]

According to 2023 FFIEC Census data, the median gross rent in the AA was $925 per month, which is higher than the median gross rent in the state of Missouri ($843) but lower when compared to the median gross rent in the state Illinois ($1,038). Additionally, the affordability ratio of the AA (36.7 percent) is slightly higher than the states of Illinois and Missouri (33.9 and 35.0).

Housing cost burden is a challenge in the AA. The data indicate that 43.1 percent of AA renters were cost-burdened, which is defined as spending more than 30 percent of gross income on rent. This points to a need for additional affordable housing stock in the AA.

Economic Conditions

Greater St. Louis is one of the largest regional economies in the U.S., with a gross metro product of $210 billion. The region ranks as the third most economically diverse U.S. metro area mirroring the national industry mix. Greater St. Louis has competitive strengths in advanced manufacturing, bioscience and health innovation, digital transformation, financial and business services, and mobility and transportation.[132] The top five employers by full-time employees in St. Louis include BJC HealthCare, Washington University, Walmart Inc., Boeing Defense, Space, and Security, and SSM Health.[133]

The following table shows the unemployment rates from 2021 through 2023 for the seven counties in the bank's AA,, St. Louis City, the St. Louis MSA, and the states of Illinois and Missouri. As shown, the AA saw a period of both falling and rising unemployment rates. From 2021 to 2022, unemployment in the AA decreased from 4.5 percent in 2021 to 2.9 percent in 2022. During this time, St. Charles County had the lowest unemployment

rates for 2021 and 2022 at 3.3 and 2.1 percent, respectively. As shown, the unemployment rate in the AA was slightly higher than overall unemployment rate in Missouri and lower than Illinois. During the review period, the AA's unemployment rate dropped from 4.5 percent in 2021 to 3.2 percent in 2023. During this same timeframe Missouri's unemployment rate dropped from 4.2 percent in 2021 to 3.1 percent in 2023 while Illinois dropped from 6.1 percent in 2021 to 4.5 percent in 2023.

Credit and CD Needs

To better understand the local CD and economic landscapes, individuals familiar with the community and with CD activities were contacted. These individuals discussed the various opportunities and challenges in the region and how financial institutions can be responsive to local CD needs through lending, investment, and/or service activities.

One contact engaged in housing preservation and CD was interviewed. The contact indicated funding sustainability was a barrier for organizations whose initiatives are to bring systemic changes to place and people. The contact also indicated there is a focus placed on tech innovation and higher education, but the region lacks plans and strategy to address the needs of the underserved. The contact concluded the interview with mentioning that there is a lack of access to capital for small businesses, particularly for minority-owned small businesses.

A second contact, engaged in CD and small business development, identified the primary credit needs of the AA as small business lending and affordable housing initiatives. The contact stated that most of the apartment complexes located in the county have been built for luxury or senior citizens but do not address the need for low-income housing. The contact also noted pushback from the community that bringing in more affordable housing projects could increase the crime rate and unemployment rates. The contact further stated that finding a home less than $300,000 is not feasible unless the buyer wants a project. The housing for LMI geographies are primarily mobile home parks (rentals) and very few income eligible housing apartments. Some primary strengths of the local economy include population growth.

The contact believes that the county has strong infrastructure in place to keep up with community growth and mentioned that the Transportation Sales Tax that has helped build roads and bridges valued at $1 billion since its inception in the 1980s. This is unique as many other communities in the St. Louis area rely on state and federal government funding for infrastructure. The contact noted that due to the rising interest rate environment imposed to control inflation, small business and home mortgage lending has declined. The rise in interest rates has made it difficult for small businesses and LMI residents to obtain financing. The contact also noted that entrepreneurs will approach bank's wanting to take out a loan, but banks are not able to help the entrepreneur plan and get in a better financial condition to qualify for the loan. By referring these customers local small business assistance organizations, the small business counselors can help these people grow their business and be ready to obtain financing.

CONCLUSIONS WITH RESPECT TO PERFORMANCE TESTS IN THE ST. LOUIS MULTISTATE MSA

LENDING TEST

The Lending Test rating for the St. Louis Multistate AA is Low Satisfactory. Lending levels reflect adequate responsiveness to credit needs of the AA. The geographic distribution of loans reflects adequate penetration throughout the AA and the distribution of loans reflects good penetration among borrowers of different income levels and businesses of different revenue sizes. In addition, the bank made an adequate level of CD loans in the St. Louis multistate AA.

The analysis included 4,773 HMDA-reportable loans and 1,620 small business loans reported by the bank in the AA during the review period. Therefore, HMDA-reportable lending received greater weight in determining conclusions. Additionally, during 2021, 2022, and 2023, the bank originated or purchased 1,584 home refinance loans, 1,310 home purchase loans, and 1,075 home improvement loans in the AA. Thus, when considering HMDA-reportable loan categories, greatest weight was assigned to home refinance loans given its relative share

of the total HMDA-reportable lending in this AA, followed closely by home purchase loans and home improvement loans.

Details of the bank's mortgage and small business lending and information regarding lending by peers can be found in *Appendix F.*

Lending Activity

Lending activity is adequate. Overall, 2.6 percent of HMDA-reportable loans and 3.2 percent of small business loans were made in the AA. The percentage of the bank's HMDA-reportable lending, which is the most heavily weighted product in the AA, is below the percentage of its area deposits. The percentage of small business lending is consistent with the percentage of its area deposits. However, the bank is an important contributor to HMDA-reportable lending in the area, which further supports the adequate conclusion.

Geographic Distribution of Loans

The geographic distribution of loans reflects adequate penetration throughout the AA. As described in the following sections, performance for HMDA-reportable lending is adequate and small business lending performance is good.

Home Refinance Loans

Home refinance lending in low-income tracts is adequate. In 2021, the bank made 1.5 percent of its home refinance loans in low-income tracts, which was below the percentage of owner-occupied units in these tracts (5.5 percent) but similar to aggregate performance of 1.0 percent. In 2022 and 2023, the bank made 2.3 percent of its home refinance loans in low-income tracts, which was below the percentage of owner-occupied units in these tracts (4.7 percent). In 2022, the bank's lending matched aggregate performance (2.5 percent for both) and in 2023, the bank's lending (2.0 percent) was below aggregate performance (3.2 percent).

Home refinance lending in moderate-income tracts is adequate. In 2021, the bank made 12.4 percent of its home refinance loans in moderate-income tracts, which was below the percentage of owner-occupied units in these tracts (17.1 percent) but above aggregate performance of 9.7 percent. In 2022 and 2023, the bank made 16.3 percent of its home refinance loans in moderate-income tracts, which matched the percentage of owner-occupied units in these tracts. In 2022, the bank's lending (17.5 percent) was above aggregate performance (13.6 percent) while in 2023, the bank's lending (14.5 percent) was below aggregate performance (16.3 percent).

Home Purchase Loans

Home purchase lending in low-income tracts is good. In 2021, the bank made 5.0 percent of its home purchase loans in low-income tracts, which was similar to the percentage of owner-occupied units in these tracts (5.5 percent) and nearly double aggregate performance of 2.7 percent. In 2022 and 2023, the bank made 4.2 percent of its home purchase loans in low-income tracts, which was similar to the percentage of owner-occupied units in these tracts (4.7 percent). In 2022, the bank's lending (5.8 percent) was above aggregate performance (3.4 percent) while in 2023, the bank's lending (2.1 percent) was below aggregate performance (3.9 percent).

Home purchase lending in moderate-income tracts is adequate. In 2021, the bank made 18.7 percent of its home purchase loans in moderate-income tracts, which was above the percentage of owner-occupied units in these tracts (17.1 percent) and above aggregate performance of 16.2 percent. In 2022 and 2023, the bank made 15.6 percent of its home purchase loans in moderate-income tracts, which was below the percentage of owner-occupied units

in these tracts (16.3 percent). In 2022, the bank's lending (18.0 percent) was above aggregate performance (16.6 percent) while in 2023, the bank's lending (12.5 percent) was below aggregate performance (17.4 percent).

Home Improvement Loans

Home improvement lending in low-income tracts is good. In 2021, the bank made 1.9 percent of its home improvement loans in low-income tracts, which was below the percentage of owner-occupied units in these tracts (5.5 percent) but nearly identical to aggregate performance of 1.8 percent. In 2022 and 2023, the bank made 2.7 percent of its home improvement loans in low-income tracts, which was below the percentage of owner-occupied units in these tracts (4.7 percent). In 2022, the bank's lending (2.6 percent) was above aggregate performance (1.5 percent) and in 2023, the bank's lending (2.7 percent) was similar to aggregate performance (1.9 percent).

Home improvement lending in moderate-income tracts is adequate In 2021, the bank made 9.1 percent of its home improvement loans in moderate-income tracts, which was below the percentage of owner-occupied units in these tracts (17.1 percent) and similar to aggregate performance of 9.7 percent. In 2022 and 2023, the bank made 11.6 percent of its home improvement loans in moderate-income tracts, which was below the percentage of owner-occupied units in these tracts (16.3 percent). In 2022, the bank's lending (10.4 percent) was above aggregate performance (8.8 percent) and in 2023, the bank's lending (13.1 percent) was above aggregate performance (9.6 percent).

Small Business Loans

Small business lending in low-income tracts is good. In 2021, the bank made 8.9 percent of its small business loans in low-income tracts, which was above the percentage of total businesses located in these tracts (6.8 percent) and above aggregate performance of 6.3 percent. In 2022 and 2023, the bank made 8.0 percent of its small business loans in low-income tracts, which was above the percentage of total businesses located in these tracts (6.9 percent). In 2022, the bank's lending (9.8 percent) was above aggregate performance (6.0 percent) and in 2023, the bank's lending (6.9 percent) was above aggregate performance of 5.5 percent.

Small business lending in moderate-income tracts is good. In 2021, the bank made 19.2 percent of its small business loans in moderate-income tracts, which was above the percentage of total businesses located in these tracts (18.2 percent) and above aggregate performance of 17.1 percent. In 2022 and 2023, the bank made 19.7 percent of its small business loans in moderate-income tracts, which was above the percentage of total businesses located in these tracts (15.8 percent). In 2022, the bank's lending (19.1 percent) was also above aggregate performance (14.2 percent) and in 2023, the bank's lending (20.1 percent) was again above aggregate performance of 13.4 percent.

No conspicuous lending gaps were identified based on an analysis of the dispersion of the loan products reviewed. The bank had activity in over 80 percent of all census tracts throughout the review period. Furthermore, lending data and maps did not indicate an absence of loans across LMI tracts.

Lending to Borrowers of Different Incomes and Businesses of Different Sizes

The distribution of loans based on borrower income or gross annual revenues is good. As described in the following sections, overall performance for HMDA-reportable lending is excellent while small business lending performance is adequate.

Home Refinance Loans

Home refinance lending to low-income borrowers is excellent. In 2021, the bank made 16.4 percent of its home refinance loans to low-income borrowers, which was below the percentage of low-income families (21.4 percent)

but more than double aggregate performance of 6.4 percent. In 2022 and 2023, the bank made 23.5 percent of its home refinance loans to low-income borrowers, which was above the percentage of low-income families (20.5 percent). In 2022, the bank's lending (24.4 percent) was above aggregate performance (12.7 percent) and in 2023, the bank's lending (22.1 percent) was above aggregate performance (12.7 percent).

Home refinance lending to moderate-income borrowers is good. In 2021, the bank made 22.4 percent of its home refinance loans to moderate-income borrowers, which was above the percentage of moderate-income families (16.9 percent) and above aggregate performance of 15.3 percent. In 2022 and 2023, the bank made 24.1 percent of its home refinance loans to moderate-income borrowers, which was above the percentage of moderate-income families (17.6 percent). In 2022, the bank's lending (24.7 percent) was above aggregate performance (21.4 percent) and in 2023, the bank's lending (23.3 percent) was above aggregate performance (20.6 percent).

Home Purchase Loans

Home purchase lending to low-income borrowers is excellent. In 2021, the bank made 20.6 percent of its home purchase loans to low-income borrowers, which was similar to the percentage of low-income families (21.4 percent) and nearly double aggregate performance of 10.6 percent. In 2022 and 2023, the bank made 16.2 percent of its home purchase loans to low-income borrowers, which was below the percentage of low-income families (20.5 percent). In 2022, the bank's lending (18.2 percent) was above aggregate performance (11.2 percent) and in 2023, the bank's lending (13.6 percent) was above aggregate performance (10.8 percent).

Home purchase lending to moderate-income borrowers is good. In 2021, the bank made 27.6 percent of its home purchase loans to moderate-income borrowers, which was above the percentage of moderate-income families (16.9 percent) and above aggregate performance of 19.6 percent. In 2022 and 2023, the bank made 25.6 percent of its home purchase loans to moderate-income borrowers, which was above the percentage of moderate-income families (17.6 percent). In 2022, the bank's lending (27.7 percent) was above aggregate performance (20.2 percent) and in 2023, the bank's lending (22.8 percent) was above aggregate performance (21.3 percent).

Home Improvement Loans

Home improvement lending to low-income borrowers is excellent. In 2021, the bank made 19.4 percent of its home improvement loans to low-income borrowers, which was below the percentage of low-income families (21.4 percent) but more than double aggregate performance of 7.1 percent. In 2022 and 2023, the bank made 18.3 percent of its home improvement loans to low-income borrowers, which was below the percentage of low-income families (20.5 percent). In 2022, the bank's lending (22.5 percent) was more than double aggregate performance (8.9 percent) and in 2023, the bank's lending (13.4 percent) was above aggregate performance (7.3 percent).

Home improvement lending to moderate-income borrowers is good. In 2021, the bank made 21.9 percent of its home improvement loans to moderate-income borrowers, which was above the percentage of moderate-income families (16.9 percent) and above aggregate performance of 14.9 percent. In 2022 and 2023, the bank made 21.6 percent of its home improvement loans to moderate-income borrowers, which was above the percentage of moderate-income families (17.6 percent). In 2022, the bank's lending (19.4 percent) was above aggregate performance (16.2 percent) and in 2023, the bank's lending (24.1 percent) was above aggregate performance (16.5 percent).

Small Business Loans

Small business lending to businesses of different sizes is adequate. In 2021, the bank made 74.4 percent of its small business loans to businesses with revenues of $1 million or less, which was below the percentage of total businesses with revenues of $1 million or less (90.1 percent). The bank's performance is above aggregate performance of 50.8 percent in 2021. However, 2021 was a year in which many banks extended PPP loans as a

result of the COVID-19 pandemic and were not required to capture and report the revenue of the businesses, which is reflected in the aggregate data. As a result, performance context and loan size data were considered. In 2021, the bank made loans of less than $250,000 to businesses at a similar rate (92.8 percent) as aggregate lenders (94.6 percent). In 2022 and 2023, the bank made 59.3 percent of its small business loans to businesses with revenues of $1 million or less, which was below the percentage of total businesses with revenues of $1 million or less (90.6 percent). In 2022, bank lending (61.2 percent) was above aggregate performance (53.4 percent) and in 2023, the bank's lending (58.2 percent) was also above aggregate performance (56.5 percent). The majority of the bank's small business loans were originated in amounts of $250,000 or less, indicating a willingness to lend in the smaller amounts that are typically requested by small businesses.

CD Lending

The bank makes an adequate level of CD loans in the St. Louis Multistate AA. During the review period, the bank originated or renewed 19 qualified CD loans totaling $22.1 million in the AA. Specifically, the bank provided $10.9 million for community services that benefit LMI individuals, $6.7 million to support economic development by financing small businesses, $2.5 million for the revitalization and stabilization of LMI communities, and $2 million for affordable housing for LMI individuals.

While the dollar volume of CD loans is below performance of other banks in the area, several of the CD loans had qualitative features that were responsive to AA needs. These qualitative factors contributed to the overall adequate conclusion for this AA. The impactful and/or responsive loans directly benefiting the AA include:

- Three LOCs totaling $11 million to two different CDFIs for small business development and the creation of microloans in the city of St. Louis.
- One LOC totaling $2.5 million to a grocery store located in a moderate-income tract in St. Louis. The area is part of a formal revitalization plan to address food insecurity in a food desert.
- Three LOCs totaling $750,000 to a nonprofit hospital in East St. Louis. The LOCs were for working capital to ensure essential operations of the hospital remain uninterrupted. Given the lack of essential services and the concentrated disinvestment in the city, these LOCs were particularly impactful.
- Three loans totaling $600,000 to a local CDC. The loans were used toward the CDC's efforts to rehab and develop affordable single-family housing in North St. Louis exclusively benefiting low-income homeowners and/or renters.
- One new SBA 504 loan totaling $559,000 that provided financing to a small business. The loan created five new LMI jobs.
- One loan totaling $150,000 to a nonprofit, small business incubator for microloans in the city of St. Louis.
- One loan totaling $100,000 to a nonprofit childcare center for bridge financing of a new facility. The loan was used as start-up funding to support matching and supplemental grant funding from investors and the city of St. Louis.
- One loan for $75,000 to a nonprofit for its at-home programs to low-income students in St. Louis. The nonprofit's mission is to bridge the education gap between schools and home and provide teachers and schools in low-income communities with tools, professional development, and financial support.

INVESTMENT TEST

The Investment Test rating for the St. Louis Multistate AA is Low Satisfactory.

The bank made an adequate level of qualified CD investments and grants in the St. Louis AA totaling $32.2 million. This amount includes four current period investments for $25.6 million, 22 prior period investments still outstanding with a balance of $4.7 million, and 151 donations totaling $2 million.

Investment types varied and addressed an adequate range of CD needs. These include investments in SBIC funds to address small business financing needs, MBS supporting LMI borrowers, and LIHTC projects to address affordable housing challenges. The bank made occasional use of innovative and/or complex investments to support CD initiatives. Additionally, the bank exhibits adequate responsiveness to CD needs.

Examples of noteworthy investments and grants provided during the review period include:

- Three current period Commercial MBS secured by multifamily properties totaling $21 million. These investments helped to finance 1,094 total units of affordable housing, which was responsive to the need for affordable housing in the AA.

- Two prior-period LIHTC investments totaling $2 million for the creation of 148 units of affordable housing for LMI individuals and families.

- A $4.6 million current period SBIC allocation to finance small businesses in the AA.

- Seven donations totaling $592,000 to support a non-profit that provides various services to LMI residents, including financial education and coaching.

- Three donations totaling $65,000 to support a non-profit promoting economic self-resilience, with a specific focus on supporting women-owned businesses.

- Three donations totaling $30,000 to a CDFI to support their work with small business, including providing loan loss reserve capital to micro-entrepreneurs.

SERVICE TEST

The Service Test is rated Low Satisfactory for the St. Louis Multistate MSA. Regions retail banking services were adequate and the bank provided a relatively high level of CD services.

Retail Banking Services

Retail service delivery systems are reasonably accessible to the bank's geographies and individuals of different income levels throughout the St. Louis Multistate AA. In deriving this conclusion, the distribution of the bank's branches by census tract income level was compared to the distribution of households and businesses among the tract categories in the AA. As the following tables show, the bank operated branches and ATMs in all census tract categories throughout the review period, but the distribution shifted with the U.S. Census change in 2022. In 2021, the bank operated six branches (9.7 percent) in low-income tracts, which was similar to the percentage of households (9.4 percent) and greater than the percentage of businesses (6.8 percent) located in these tracts. The bank operated 13 branches (21.0 percent) in moderate-income tracts, which exceeded the percentage of households (19.9 percent) and businesses (18.2 percent). In 2022 and 2023, the number of branches in low-

income tracts declined to three (5.0 percent) due to Census changes, which was below the percentage of households (8.2 percent) and businesses (6.9 percent) in these tracts. The number of branches in moderate-income tracts stayed the same at 13 (21.7 percent), which exceeded the percentage of households (19.3 percent) and businesses (15.8 percent) in these tracts. While the bank's overall geographic distribution of branches is adequate, there are some concentrations of LMI tracts where accessibility is limited. Specifically, accessibility concerns for LMI tracts were noted in north St. Louis (city) and east St. Louis, IL.

During the review period, the bank closed one branch in an upper-income tract in 2021, and two branches in 2023 (one in a moderate-income tract and one in a middle-income tract). The bank did not open any branches in this AA during the review period. The closure of the branch in a moderate-income tract in downtown St. Louis was a consolidation with a branch several miles away. However, the closure did have an adverse impact on accessibility for the LMI tracts surrounding the original branch. The remaining closures generally did not have an adverse impact on accessibility.

The bank's branch lobby and drive-through hours are consistent across all branches in the AA, opening at 9 a.m. and closing at 5:00 p.m. Monday through Friday. The bank offers Saturday hours from 9:00 a.m. to 12:00 p.m. at nearly all branches in the AA. Thus, hours and services do not vary in a way that inconveniences the AA, particularly LMI geographies and LMI individuals.

The tables below show the distribution of branches and ATMs along with households and businesses by tract category.

Geographic Distribution of Branches & ATMS 2021
Assessment Area: Multi St. Louis

CD Services

Regions provides a relatively high level of CD services in St. Louis. During the review period, bank employees provided 479 CD service activities totaling 2,916 hours to 72 organizations operating throughout the AA. Bank staff offered their financial expertise in a variety of ways, including financial literacy and homebuyer education; service on board of directors other committees; and other technical assistance and advisory services.

Noteworthy CD service activities in the St. Louis Multistate AA area include:

- Bank staff provided over 1,700 hours of board service for approximately 25 different nonprofit organizations that serve the St. Louis AA.

- Bank staff conducted 427 hours of homebuyer counseling and financial education for youth and adults in partnership with 39 organizations throughout the review period.

- Bank staff volunteered approximately 170 hours for a nonprofit organization that focused on workforce development for people living in poverty. Bank staff offered their financial expertise in a number of capacities, including serving on the board of directors, providing technical assistance to help the organization with capacity building and strategic planning, and teaching financial education classes to clients of the organization.

- A vice president of the bank served 160 hours on the board for a CDFI that serves the AA, and assisting with the organization's mortgage and home repair programs.

- Bank staff facilitated an annual needs assessment workshop for CD organizations, CDFIs, and other nonprofit organizations serving LMI individuals to assist with assessing community needs and capacity building. Throughout the review period, bank staff provided over 90 hours for this initiative.

MEMPHIS TN-MS-AR MULTISTATE MSA

CRA RATING FOR MEMPHIS TN-MS-AR MULTISTATE[134]: SATISFACTORY

The Lending Test is rated: **High Satisfactory**
The Investment Test is rated: **Low Satisfactory**
The Service Test is rated: **Low Satisfactory**

Major factors contributing to this rating include:

- The geographic distribution of loans reflects adequate penetration throughout the multistate AA.
- The distribution of borrowers reflects excellent penetration throughout the multistate AA.
- The bank made an adequate level of CD loans in the Memphis Multistate MSA.
- The bank made an adequate level of qualified CD investments and grants in the Memphis Multistate AA.
- Retail banking services, which includes accessibility of delivery systems, changes in branch locations, and reasonableness of hours and services, are poor.
- The bank provides a relatively high level of CD service activities in the Memphis Multistate AA.

SCOPE OF EXAMINATION

The time period, products, and affiliates evaluated for the Memphis Multistate AA are consistent with the overall scope described in the Description of the Institution section of this report. Regions' performance in the Memphis Multistate AA was evaluated using full-scope examination procedures.

DESCRIPTION OF INSTITUTION'S OPERATIONS IN THE MEMPHIS MULTISTATE MSA

Overview

The Memphis Multistate AA consists of Crittenden County in Arkansas; Desoto, Marshall, and Tate counties in Mississippi; and Fayette, Shelby, and Tipton counties in Tennessee. Memphis, the principal city in the AA, is located in Shelby County. The AA is part of the eight-county Memphis, TN-MS-AR MSA. As of December 31, 2023, the bank operated 41 branches in the AA, representing 3.2 percent of its total branches. The Memphis AA accounts for approximately 3.6 percent of the bank's deposit volume by dollar and 3.0 percent of its total HMDA-reportable and small business loan volume by number.

Memphis has an active banking market with a significant presence of national and multi-regional banks. As of June 30, 2023, there were 44 financial institutions operating 327 branch locations within the AA. Ranked 2nd, Regions held 11.4 percent deposit market share with approximately $4.7 billion in total deposits. Along with Regions, deposit leaders include First Horizon Bank and Pinnacle Bank with 34.6 percent and 5.8 percent, respectively.

[134] This rating reflects performance within the multistate MSA. The statewide evaluations are adjusted and do not reflect performance in the parts of those states contained within the multistate MSA.

HMDA-reportable lending is competitive in the AA and Regions is among the leading lenders in this AA. In 2021, Regions originated 2.3 percent of the HMDA-reportable loans in the AA, ranking 11th out of 647 reporters. In 2022, Regions originated 2.8 percent of the HMDA-reportable loans in the AA, ranking 7th out of 602 reporters. In 2023, Regions originated 3.1 percent of the HMDA-reportable loans in the AA, ranking 6th out of 565 reporters. Rocket Mortgage was the top HMDA reporter in the market for all three years.

Small business lending is also competitive in the AA, although to a lesser extent than HMDA-reportable lending. Regions ranked 8th out of 172 small business loan reporters in 2021 with 4.4 percent of loans. In 2022, the bank ranked 21st out of 149 reporters with 0.7 percent of total small business loans. In 2023, Regions ranked 18th out of 135 reporters with 1.1 percent of total small business loans. American Express was the top CRA reporter in the market for all three years.

AA Demographics, Population, and Income Characteristics

The AA has a population of approximately 1.3 million people. Between 2015 and 2020, the AA experienced a 0.5 percent increase in population, which was less than the state of Arkansas (1.8 percent increase) and Tennessee (6.3 percent increase) but greater than the state of Mississippi (0.9 percent decrease) during the same period. Within the AA, Shelby County, Tennessee is the most populous (910,042 residents)[135] while Tate County, Mississippi is the least populous (28,261 residents).[136]

In 2021, the AA contained 309 census tracts: 72 low-income tracts (23.3 percent), 64 moderate-income tracts (20.7 percent), 76 middle-income tracts (24.6 percent), 90 upper-income tracts (29.1 percent) and seven unknown income tracts (2.3 percent). In 2022, there was a census tract border change that increased the number of AA census tracts to 350: 57 low-income tracts (16.3 percent), 91 moderate-income tracts (26.0 percent), 90 middle-income tracts (25.7 percent), 98 upper-income tracts (28.0 percent) and 14 unknown income tracts (4.0 percent).

For purposes of classifying borrower income, this evaluation uses the FFIEC estimated median family income for the Memphis, TN-MS-AR MSA as shown in the following table. The table also provides a breakdown of the estimated annual income by category (low, moderate, middle, and upper). As shown, the median family income increased from $66,900 in 2021 to $79,200 in 2023.

Borrower Income Levels
Memphis, TN-MS-AR MSA

FFIEC Estimated Median Family Income		Low 0 - 49.99%	Moderate 50% - 79.99%	Middle 80% - 119.99%	Upper 120% - & above
2021	**$66,900**	0 - $33,449	$33,450 - $53,519	$53,520 - $80,279	$80,280 - & above
2022	**$76,200**	0 - $38,099	$38,100 - $60,959	$60,960 - $91,439	$91,440 - & above
2023	**$79,200**	0 - $39,599	$39,600 - $63,359	$63,360 - $95,039	$95,040 - & above

There were 324,979 families in the AA; 23.5 percent were low-income, 16.1 percent were moderate-income, 18.2 percent were middle-income, and 42.2 percent were upper-income. Of the total families, 13.0 percent had incomes below the poverty level, with the majority of families with incomes below the poverty level residing in

[135] "QuickFacts". *U.S. Census Bureau,* U.S. Census Bureau QuickFacts: United States. Accessed 12 Dec. 2024
[136] "QuickFacts". *U.S. Census Bureau,* U.S. Census Bureau QuickFacts: Tate County, Mississippi; Shelby County, Tennessee; Fayette County, Tennessee; Marshall County, Mississippi; DeSoto County, Mississippi; Crittenden County, Arkansas. Accessed 13 Dec. 2024

LMI census tracts. It is worth noting that 10.4 percent of all families in the AA reside in low-income tracts and 23.6 percent of families reside in moderate-income tracts. This data indicates that there are lending opportunities in the low- and moderate-income tracts.

Housing Characteristics

There are 564,977 housing units in the AA, of which 53.2 percent are owner-occupied, 35.5 percent are rental units, and 11.2 percent are vacant. As described, housing units in the AA are predominately owner-occupied, which indicates a variety of home lending opportunities available within the AA as a whole. However, fewer home lending opportunities exist in low-income tracts, where only 25.4 percent of housing units are owner-occupied and 52.6 percent of units are rentals.

The median age of the housing stock in the AA was 45 years, which is older than the statewide median age of homes in Arkansas, Mississippi and Tennessee (36 years). Within the AA, Desoto County (Mississippi) had the lowest median age of housing stock (25 years) while Shelby County (Tennessee) had the highest median age (44 years). Housing units in the LMI census tracts were even older, with the median age of housing at 60 years for low-income tracts and 56 years for moderate-income tracts. The older age of homes is an indicator of potential opportunity for home improvement loans in LMI tracts.

The median housing value in the AA was $161,598, which is below the median housing values in Tennessee ($177,600) but higher than Arkansas ($133,600) and Mississippi ($125,500). Moreover, median gross rent in the AA ($947 per month) is higher than the monthly median rents in Arkansas ($760), Mississippi ($789) and Tennessee ($897). Additionally, the affordability ratio of the AA (33.6 percent) is similar to Arkansas (37.0 percent), Mississippi (37.1 percent) and Tennessee (30.8 percent). The percentage of renters in the AA with rent costs greater than 30 percent of income (47.8 percent) is higher than the percentage in Arkansas, Mississippi, and Tennessee (38.4 percent, 41.4 percent and 42.4 percent respectively). This corresponds with the higher median gross rent in the AA compared to all three states.

Economic Conditions

The AA is located at the border of southwest Tennessee, northern Mississippi, and eastern Arkansas. The city of Memphis, located in Shelby County, Tennessee, is the largest city in the AA and lies on the Chickasaw bluffs above the Mississippi River where the borders of Arkansas, Mississippi and Tennessee meet.[137] Memphis's central location has helped make it one of the largest distribution centers in the United States.[138] Memphis connects companies to national and international markets with air, road, rail and port infrastructure and provides resources that serve a variety of sectors.[139] Memphis has the nation's busiest cargo airport[140] and is home to the world headquarters and world hub of FedEx and major UPS, DHL and U. S. Postal Service operations.[141] Additionally, Tennessee has the second lowest state and local tax burden per capita and no income tax on wages.[142] According to the Bureau of Labor Statistics during the first quarter of 2023, transportation and warehousing is the largest employer by industry (83,139 employees), followed by government (80,404 employees), and healthcare and social assistance (79,449 employees). Top employers in the Memphis MSA include, among others, FedEx, Autozone, First Horizon National Corporation and St. Jude Children's Research hospital.[143]

The following table shows the unemployment rates for the AA, the counties that comprise the AA, and the states of Arkansas, Mississippi and Tennessee for the review period. As shown, the AA's unemployment rate was higher than the unemployment rates for the states of Arkansas, Mississippi and Tennessee in 2021, 2022, and 2023. Within the AA, DeSoto County had the lowest unemployment rate in 2023 at 2.8 percent while Shelby County had the highest unemployment rate in 2023 at 4.4 percent..

Credit and CD Needs

As part of the CRA examination, information from a recently conducted interview with a contact specializing in small business development was referenced. The contact stated that there is a need for credit investment in affordable housing and providing small businesses with financial literacy training, especially for small business owners who are starting a business. There is also a need for development for business owners and prospective business owners to receive mentorship and guidance in starting and expanding a business. For families not able to afford housing, homeownership counseling would be helpful.

Another community contact who works closely with business and industry organizations and civic organizations also stated there is a need for affordable housing in the AA. New construction housing units are not affordable to young professionals who are starting out in the workforce.

CONCLUSIONS WITH RESPECT TO PERFORMANCE TESTS IN THE MEMPHIS MULTISTATE MSA

LENDING TEST

The Lending Test rating for the Memphis Multistate MSA is High Satisfactory.

Lending levels reflect adequate responsiveness to credit needs of the AA. The geographic distribution of loans reflects adequate penetration throughout the AA and the distribution of loans reflects excellent penetration among borrowers of different income levels and businesses of different revenue sizes. In addition, the bank made an adequate level of CD loans in the Memphis multistate AA.

The analysis included 3,357 HMDA-reportable loans and 1,789 small business loans reported by the bank in the AA during the review period. Therefore, HMDA-reportable lending received greater weight in determining conclusions. Additionally, during 2021, 2022, and 2023, the bank originated or purchased 1,204 home refinance loans, 848 home improvement loans, and 816 home purchase loans in the AA. Thus, when considering HMDA-reportable loan categories, greatest weight was assigned to home refinance loans given its relative share of the total HMDA-reportable lending in this AA, followed equally by home improvement loans and home purchase loans.

Details of the bank's mortgage and small business lending and information regarding lending by peers can be found in *Appendix F.*

Lending Activity

Lending activity is considered adequate. Overall, 2.0 percent of HMDA-reportable loans and 2.7 percent of small business loans were made in the AA. The percentage of the bank's HMDA-reportable lending, which is the most heavily weighted product in the AA, is below the percentage of its area deposits. In contrast, the percentage of small business lending is consistent with the percentage of its area deposits. The bank is an important contributor to HMDA-reportable lending in the area, which further supports the adequate conclusion.

Geographic Distribution of Loans

The bank's geographic distribution of loans reflects adequate penetration throughout the AA. As described in the following sections, overall performance for HMDA-reportable lending is adequate and small business lending performance is good.

While bank performance in the home refinance category was good, the bank's poor performance in the home purchase category was also considered in deriving an overall HMDA conclusion of adequate, especially when considering performance context. Specifically, community contacts noted the need and opportunities for home purchase loans in the AA and Regions Bank is a key contributor to HMDA-reportable lending and maintains a prominent market share in the Memphis AA.

Home Refinance Loans

Home refinance lending in low-income tracts is adequate. In 2021, the bank made 4.7 percent of its home refinance loans in low-income tracts, which was below the percentage of owner-occupied units in these tracts (10.2 percent) but more than double aggregate performance of 2.2 percent. In 2022 and 2023, the bank made 4.7 percent of its home refinance loans in low-income tracts, which was below the percentage of owner-occupied units in these tracts (6.6 percent). In 2022, the bank's lending (5.4 percent) was above aggregate performance (4.4 percent) and in 2023, the bank's lending (3.6 percent) was below aggregate performance (5.9 percent).

Home refinance lending in moderate-income tracts is adequate. In 2021, the bank made 10.8 percent of its home refinance loans in moderate-income tracts, which was below the percentage of owner-occupied units in these tracts (16.9 percent) but above aggregate performance of 7.3 percent. In 2022 and 2023, the bank made 17.3 percent of its home refinance loans in moderate-income tracts, which was below the percentage of owner-occupied units in these tracts (20.5 percent). In 2022, the bank's lending (16.2 percent) was similar to aggregate performance (16.4 percent) and in 2023, the bank's lending (19.1 percent) was similar to aggregate performance (19.7 percent).

Home Improvement Loans

Home improvement lending in low-income tracts is poor. In 2021, the bank made 6.6 percent of its home improvement loans in low-income tracts, which was below the percentage of owner-occupied units in these tracts (10.2 percent) but similar to aggregate performance of 7.2 percent. Performance declined in 2022 and 2023, with the bank making 3.0 percent of its home improvement loans in low-income tracts, which was below the percentage of owner-occupied units in these tracts (6.6 percent). In 2022, the bank's lending (3.5 percent) was below aggregate performance (6.3 percent) and in 2023, the bank's lending (2.4 percent) was below aggregate performance (4.5 percent).

Home improvement lending in moderate-income tracts is adequate. In 2021, the bank made 14.4 percent of its home improvement loans in moderate-income tracts, which was below the percentage of owner-occupied units in these tracts (16.9 percent) but above aggregate performance of 12.2 percent. In 2022 and 2023, the bank made 15.9 percent of its home improvement loans in moderate-income tracts, which was below the percentage of owner-occupied units in these tracts (20.5 percent). In 2022, the bank's lending (17.5 percent) was below aggregate performance (18.9 percent) and in 2023, the bank's lending (13.7 percent) was below aggregate performance (15.9 percent).

Home Purchase Loans

Home purchase lending in low-income tracts is poor. In 2021, the bank made 3.9 percent of its home purchase loans in low-income tracts, which was below the percentage of owner-occupied units in these tracts (10.2 percent) and below aggregate performance of 5.0 percent. In 2022 and 2023, the bank made 3.8 percent of its home purchase loans in low-income tracts, which was below the percentage of owner-occupied units in these tracts (6.6 percent). In 2022, the bank's lending (3.7 percent) was below aggregate performance (4.8 percent) and in 2023, the bank's lending (3.8 percent) was below aggregate performance (4.9 percent).

Home purchase lending in moderate-income tracts is poor. In 2021, the bank made 9.7 percent of its home purchase loans in moderate-income tracts, which was below the percentage of owner-occupied units in these tracts

(16.9 percent) and below aggregate performance of 11.7 percent. In 2022 and 2023, the bank made 16.8 percent of its home purchase loans in moderate-income tracts, which was below the percentage of owner-occupied units in these tracts (20.5 percent). In 2022, the bank's lending (18.3 percent) was above aggregate performance (16.9 percent) but in 2023, the bank's lending (15.1 percent) was below aggregate performance (18.4 percent).

Small Business Loans

Small business lending in low-income tracts is excellent. In 2021, the bank made 16.6 percent of its small business loans in low-income tracts, which was above the percentage of total businesses located in these tracts (12.9 percent) and above aggregate performance of 11.4 percent. In 2022 and 2023, the bank made 13.8 percent of its small business loans in low-income tracts, which was above the percentage of total businesses located in these tracts (9.2 percent). In addition, bank performance consistently exceeded aggregate performance. Specifically, in 2022, the bank's lending (10.6 percent) was above aggregate performance (7.7 percent) and in 2023, the bank's lending (16.2 percent) was more than double aggregate performance of 7.0 percent.

Small business lending in moderate-income tracts is good. In 2021, the bank made 16.6 percent of its small business loans in moderate-income tracts, which was similar to the percentage of total businesses located in these tracts (16.3 percent) and above aggregate performance of 15.6 percent. The bank's performance improved in 2022 and 2023, with the bank making 25.4 percent of its small business loans in moderate-income tracts, which was above the percentage of total businesses located in these tracts (22.9 percent). In 2022, the bank's lending (29.8 percent) was above aggregate performance (19.9 percent), and in 2023, the bank's lending (22.2 percent) was again above aggregate performance of 19.9 percent.

No conspicuous lending gaps were identified based on an analysis of the dispersion of the loan products reviewed. The bank had activity in over 85 percent of all census tracts throughout the review period. Furthermore, lending data and maps did not indicate an absence of loans across LMI tracts.

Lending to Borrowers of Different Incomes and Businesses of Different Sizes

The distribution of loans based on borrower income or gross annual revenues is excellent. As described in the following sections, overall performance for HMDA-reportable lending is excellent and small business lending performance is good.

Home Refinance Loans

Home refinance lending to low-income borrowers is excellent. In 2021, the bank made 10.2 percent of its home refinance loans to low-income borrowers, which was below the percentage of low-income families (24.5 percent) but more than double aggregate performance of 3.6 percent. In 2022 and 2023, the bank made 12.2 percent of its home refinance loans to low-income borrowers, which was below the percentage of low-income families (23.5 percent). In 2022, the bank's lending (11.5 percent) was above aggregate performance (7.3 percent) and in 2023, the bank's lending (13.4 percent) was above aggregate performance (7.4 percent).

Home refinance lending to moderate-income borrowers is excellent. In 2021, the bank made 20.1 percent of its home refinance loans to moderate-income borrowers, which was above the percentage of moderate-income families (15.7 percent) and nearly double aggregate performance of 10.6 percent. In 2022 and 2023, the bank made 26.8 percent of its home refinance loans to moderate-income borrowers, which was above the percentage of moderate-income families (16.1 percent). In 2022, the bank's lending (27.4 percent) was above aggregate performance (16.2 percent) and in 2023, the bank's lending (25.8 percent) was above aggregate performance (15.9 percent).

Home Improvement Loans

Home improvement lending to low-income borrowers is excellent. In 2021, the bank made 8.6 percent of its home improvement loans to low-income borrowers, which was below the percentage of low-income families (24.5 percent) but above aggregate performance of 5.4 percent. In 2022 and 2023, the bank made 12.4 percent of its home improvement loans to low-income borrowers, which was below the percentage of low-income families (23.5 percent). In 2022, the bank's lending (14.9 percent) was above aggregate performance (9.4 percent) and in 2023, the bank's lending (8.8 percent) was above aggregate performance (6.0 percent).

Home improvement lending to moderate-income borrowers is adequate. In 2021, the bank made 14.0 percent of its home improvement loans to moderate-income borrowers, which was below the percentage of moderate-income families (15.7 percent) and above aggregate performance of 12.0 percent. In 2022 and 2023, the bank made 18.1 percent of its home improvement loans to moderate-income borrowers, which was above the percentage of moderate-income families (16.1 percent). In 2022, the bank's lending (18.1 percent) was similar to aggregate performance (17.2 percent) and in 2023, the bank's lending (18.1 percent) was above aggregate performance (15.5 percent).

Home Purchase Loans

Home purchase lending to low-income borrowers is excellent. In 2021, the bank made 6.1 percent of its home purchase loans to low-income borrowers, which was below the percentage of low-income families (24.5 percent) but nearly double aggregate performance of 3.3 percent. In 2022 and 2023, the bank made 5.7 percent of its home purchase loans to low-income borrowers, which was below the percentage of low-income families (23.5 percent). In 2022, the bank's lending (7.1 percent) was nearly double aggregate performance (3.7 percent) and in 2023, the bank's lending (4.2 percent) was above aggregate performance (2.8 percent).

Home purchase lending to moderate-income borrowers is excellent. In 2021, the bank made 29.7 percent of its home purchase loans to moderate-income borrowers, which was above the percentage of moderate-income families (15.7 percent) and more than double aggregate performance of 13.8 percent. In 2022 and 2023, the bank made 23.7 percent of its home purchase loans to moderate-income borrowers, which was above the percentage of moderate-income families (16.1 percent). In 2022, the bank's lending (21.6 percent) was above aggregate performance (13.2 percent) and in 2023, the bank's lending (26.1 percent) was above aggregate performance (14.3 percent).

Small Business Loans

Small business lending to businesses of different sizes is good. In 2021, the bank made 81.4 percent of its small business loans to businesses with revenues of $1 million or less, which was below the percentage of total businesses with revenues of $1 million or less (91.1 percent). Bank performance is above aggregate performance of 39.2 percent in 2021. However, 2021 was a year in which many banks extended PPP loans as a result of the COVID-19 pandemic and were not required to capture and report the revenue of the businesses, which is reflected in the aggregate data. As a result, performance context and loan size data were considered. In 2021, the bank made loans of less than $250,000 to businesses at a similar rate (95.3 percent) as aggregate lenders (96.2 percent). In 2022 and 2023, the bank made 64.2 percent of its small business loans to businesses with revenues of $1 million or less, which was below the percentage of total businesses with revenues of $1 million or less (91.4 percent). In 2022, bank lending (66.2 percent) was above aggregate performance (47.0 percent) and in 2023, the bank's lending (62.8 percent) was above aggregate performance (49.3 percent). Moreover, the majority of the bank's small business loans were originated in amounts of $250,000 or less, indicating a willingness to lend in the smaller amounts that are typically requested by small businesses.

CD Lending

The bank makes an adequate level of CD loans in the Memphis Multistate AA. During the review period, the bank originated or renewed 19 qualified CD loans totaling $25.1 million in the AA. Specifically, the bank provided $15.9 million for affordable housing for LMI individuals, $6.6 million for community services that benefit LMI individuals, and $2.6 million to support economic development by financing small businesses.

While the dollar volume of CD loans is below performance of other banks in the area, several of the CD loans had qualitative features that were responsive to AA needs. These qualitative factors contributed to the overall adequate conclusion for this AA. The impactful and/or responsive loans directly benefiting the AA include:

- Two loans totaling $8.9 million for the rehab of 60 units of income-restricted multifamily housing in the Mississippi portion of the AA. All 60 units of housing continued to be occupied by LMI individuals or families.

- Two loans totaling $6 million for the acquisition of two NOAH properties. The properties were expected to be vacated; however, the acquisition by a seasoned property management company resulted in 90 LMI families being able to remain in affordable multifamily housing in the AA. Rents were not raised as a result of the acquisition, and rental rates remain below market rate.

- One SBA 504 loan totaling $2.6 million that provided financing to a small business.

- One loan totaling $1 million to a CDFI for home repairs to LMI families and in LMI tracts in Memphis.

- One loan totaling $500,000 to a nonprofit for the construction of a new workforce training center. The nonprofit offers training, job placement, and workforce development for unemployed individuals in the city of Memphis.

- Three LOCs totaling $300,000 to a nonprofit organization to ensure continuation of its programs throughout the Binghampton neighborhood – a neighborhood under formal revitalization plan and Tax Increment Financing. The entity offers essential services, including medical, legal, employment, and social services, to very low-income families throughout the area.

- One loan totaling $104,000 to a nonprofit providing after-school youth programs in low-income tracts throughout South Memphis. The loan for the purchase of a commercial van to continue its "drive children" initiative, which ensures that children in South Memphis have transportation from school to the facility and, subsequently, transportation from the facility to home.

Moreover, the Memphis AA positively benefited from two LOCs totaling $9.5 million to a national CDFI with prioritization in nine AAs, including Memphis. The CDFI LOCs were previously described under the *CD Lending* heading for the institution.

INVESTMENT TEST

The Investment Test rating for the Memphis Multistate AA is Low Satisfactory. The bank made an adequate level of qualified CD investments and grants in the Memphis multistate AA totaling $37.8 million. This amount includes three current period investments totaling $14.4 million, 27 prior period investments still outstanding with a balance of $22.2 million, and 92 donations totaling $1.2 million.

Investment types varied and addressed an adequate range of CD needs. These include investments in LIHTC projects to address affordable housing challenges, SBIC funds to address small business financing needs, CDFI investments to finance affordable housing, and SBA 504 allocations. The bank made occasional use of innovative and/or complex investments to support CD initiatives. Additionally, the bank exhibits adequate responsiveness to CD needs.

Examples of noteworthy investments and grants provided during the review period include:

- A $9.8 million current-period LIHTC investment for the creation of 60 units of affordable housing for LMI individuals and families.
- A $2.3 million current period SBIC allocation to finance a small business in the AA.
- A $2.4 million current period investment in a local CDFI focused on financing affordable housing.
- Three donations of $115,000 each to an organization providing free tax assistance to LMI households.
- Two donations totaling $200,000 to an organization providing job training for LMI individuals.
- A $20,000 donation to an organization focused on revitalization of low-income neighborhoods in West Memphis.

SERVICE TEST

The Service Test is rated Low Satisfactory for the Memphis Multistate MSA. Regions retail banking services were poor in the AA and the bank provided a relatively high level of CD services.

Retail Banking Services

Retail service delivery systems are unreasonably inaccessible to the bank's geographies and individuals of different income levels throughout the Memphis Multistate AA. In deriving this conclusion, the distribution of the bank's branches by census tract income level was compared to the distribution of households and businesses among the tract categories in the AA. As the following tables show, the bank operated branches and ATMs in all census tract categories throughout the review period, but the distribution shifted with the U.S. Census change in 2022. In 2021, the bank operated seven branches (16.7 percent) in low-income tracts, which was similar to the percentage of households (17.1 percent) and greater than the percentage of businesses (12.9 percent) located in these tracts. The bank operated five branches (11.9 percent) in moderate-income tracts, which was below the percentage of households (19.5 percent) and businesses (16.3 percent). In 2023, the number of branches in low-income tracts declined to three (7.3 percent) which was below the percentage of households (12.2 percent) and businesses (9.2 percent) in these tracts. The number of branches in moderate-income tracts increased to nine (22.0 percent), which was less than the percentage of households (25.0 percent) and similar to the percentage of businesses (22.9 percent) in these tracts.

Accessibility is reasonable in Crittenden, DeSoto, Tate, Fayette, and Tipton counties. However, there are portions of Shelby County, the largest county in the AA, where there are concentrations of LMI tracts without accessibility to any branches. The accessibility concerns in Shelby County were the primary driver of the conclusion for this component of the service test.

During the review period, the bank closed two branches that were in upper-income tracts in 2021, and one branch that was in a middle-income tract in 2023. The bank did not open any branches during the review period. The closure of the branches were consolidations into other branches in close proximity, as directed by the bank's branch closing process. While none of the branch closures were located in LMI tracts, two of the branch closures were located near the southwestern portion of the county where accessibility concerns were identified, so the branch closures did have an adverse impact on accessibility.

The bank's branch lobby hours are similar across all branches in the AA, opening at 9 a.m. and closing at 4:00 p.m. or 4:30 p.m. Monday through Thursday; all branches are open until 5:00 p.m. on Friday. The bank offers longer drive-through hours at some locations, either opening at 8:30 a.m. or staying open until 5:00 p.m. each weekday. The bank offers Saturday hours from 9:00 a.m. to 12:00 p.m. at a limited number of branches in the AA, but only at two branches located in moderate-income tracts. There are no weekend hours available at branches near downtown Memphis or in low-income tracts across the AA. Thus, hours and services vary in a way that inconveniences portions of the AA.

The tables below show the distribution of branches and ATMs along with households and businesses by tract category.

CD Services

Regions provides a relatively high level of CD services in Memphis. During the review period, bank employees provided 402 CD service activities totaling 2,363 hours to 53 organizations operating throughout the AA. Bank staff provided their financial expertise in a variety of ways, including financial literacy and homebuyer education, service on board of directors, and other technical assistance.

Noteworthy CD service activities in the Memphis AA include:

- Bank staff provided over 489 hours of board service for approximately 13 different nonprofit organizations.
- Bank staff conducted 1,500 hours of homebuyer counseling and financial education for youth and adults in partnership with 27 organizations throughout the review period.
- Bank staff volunteered approximately 45 hours to support the VITA initiative providing free tax preparation services for LMI individuals in Memphis.
- Bank staff offered 29 hours in technical assistance to the City of Memphis to assist with reviewing grant applications for housing and CD projects.
- Bank staff provided nine hours of financial counseling to displaced warehouse workers after a tornado destroyed their warehouse and forced the company to close.

CHATTANOOGA TN-GA MULTISTATE MSA

CRA RATING FOR CHATTANOOGA TN-GA MULTISTATE[144]: SATISFACTORY

The Lending Test is rated: **High Satisfactory**
The Investment Test is rated: **High Satisfactory**
The Service Test is rated: **Low Satisfactory**

Major factors contributing to this rating include:

- The geographic distribution of loans reflects adequate penetration throughout the multistate AA.
- The distribution of borrowers reflects good penetration throughout the multistate AA.
- The bank made a relatively high level of CD loans in the Chattanooga Multistate MSA.
- The bank made a significant level of qualified CD investments and grants in the Chattanooga Multistate AA.
- Retail banking services, which includes accessibility of delivery systems, changes in branch locations, and reasonableness of hours and services, are adequate.
- The bank provides a limited level of CD service activities in the Chattanooga Multistate MSA.

SCOPE OF EXAMINATION

The time period, products, and affiliates evaluated for the Chattanooga Multistate AA are consistent with the overall scope described in the Description of the Institution section of this report. Regions' performance in the Chattanooga Multistate AA area was evaluated using full-scope examination procedures.

DESCRIPTION OF INSTITUTION'S OPERATIONS IN THE CHATTANOOGA MULTISTATE MSA

Overview

The Chattanooga Multistate AA includes Hamilton County in Tennessee and Catoosa County and Walker County in Georgia. Chattanooga, the principal city, is in Hamilton County, Tennessee. The AA is part of the six-county Chattanooga, TN-GA MSA. As of December 31, 2023, Regions operated 18 branch offices in the AA. The bank's branch presence in the AA represents 1.4 percent of its branches and 1.3 percent of deposits for the institution. In addition, the market represents 1.2 percent of the combined HMDA-reportable and small business lending by dollar volume for the institution.

Chattanooga is an active and competitive banking market. According to the FDIC Summary of Deposits Report dated June 30, 2023, there are 25 financial institutions operating 115 branch locations in the AA with $13.6 billion in total deposits.[145] Regions Bank is ranked 4th in the market with 12.6 percent of deposits ($1.7 billion).[146] First

[144] This rating reflects performance within the multistate MSA. The statewide evaluations are adjusted and do not reflect performance in the parts of those states contained within the multistate MSA.
[145] "Offices and Deposits of All FDIC-Insured Institutions Deposit Market Share Report." *Federal Deposit Insurance Corporation*, https://www7.fdic.gov/sod/sodMarketBank.asp?barItem=2. Accessed 10 Jan. 2025.
[146] Ibid.

Horizon Bank has the largest deposit market share at 20.6 percent, followed by Truist and Pinnacle Bank with 17.4 percent and 14.3 percent, respectively.[147]

HMDA-reportable lending in the AA is similarly competitive. Regions originated or purchased 3.2 percent of loans during 2021 and ranked 6th out of 530 reporters. In 2022, Regions originated or purchased 4.3 percent of loans and ranked 3rd out of 530 reporters. Regions originated or purchased 3.9 percent of loans during 2023 and ranked 4th out of 496 reporters. During the review period, leading HMDA reporters in the AA included Rocket Mortgage, Tennessee Valley FCU, Movement Mortgage, Truist Bank, and Caliber Home Loans.

Small business lending is also competitive. Regions Bank ranked 10th out of 127 reporters in 2021 with 3.9 percent of reported loans. In 2022, the bank ranked 23rd out of 114 reporters with 0.5 percent of reported loans. In 2023, Regions Bank ranked 20th out of 105 reporters with 0.6 percent of reported loans. During the review period, leading CRA reporters in the AA included American Express, JPMorgan Chase, Capital One and Pinnacle Bank.

AA Demographics, Population, and Income Characteristics

The AA population was 518,263 as of July 1, 2023. This represented a 3.2 percent increase since the 2020 Census.[148] During the same period, the statewide populations in Tennessee and Georgia both increased by approximately 3 percent.[149] 73.3 percent of AA residents live in Hamilton County, which is home to the city of Chattanooga.[150]

According to 2023 FFIEC Census data, the AA is made up of 120 census tracts: eight tracts are low-income (6.7 percent), 26 tracts are moderate-income (21.7 percent), 51 tracts are middle-income (42.5 percent), 32 tracts are upper-income (26.7 percent), and three tracts have unknown income (2.5 percent).

For purposes of classifying borrower income, this evaluation uses the FFIEC estimated median family income for the Chattanooga, TN-GA MSA. The table below provides a breakdown of the estimated annual family income for each income category (low, moderate, middle, and upper). As shown, the median family income for the MSA increased from $71,300 in 2021 to $90,700 in 2023.

Borrower Income Levels
Chattanooga, TN-GA MSA

FFIEC Estimated Median Family Income		Low	Moderate	Middle	Upper
		0 - 49.99%	50% - 79.99%	80% - 119.99%	120% - & above
2021	**$71,300**	0 - $35,649	$35,650 - $57,039	$57,040 - $85,559	$85,560 - & above
2022	**$75,200**	0 - $37,599	$37,600 - $60,159	$60,160 - $90,239	$90,240 - & above
2023	**$90,700**	0 - $45,349	$45,350 - $72,559	$72,560 - $108,839	$108,840 - & above

There are 126,090 total families in the AA; 20 percent are low-income, 17.1 percent are moderate-income; 20.2 percent are middle-income, and 42.2 percent are upper-income. Of these families, 8.4 percent had incomes

[149] Ibid.
[150] Ibid.

below the poverty level during the review period, which is lower than the overall percentage of families below poverty for the states of Georgia and Tennessee (10.6 percent each). Poverty rates are highest in LMI tracts, with 37.9 percent of families in low-income tracts and 15.2 percent of families in moderate-income tract living below the poverty level.

Housing Characteristics

There are 221,641 housing units in the AA, of which 60.0 percent are owner-occupied, 30.2 percent are rental units, and 9.9 percent are vacant. Home ownership rates are lower in low-income tracts at 28.7 percent in and moderate-income tracts at 50.0 percent. This indicates limited opportunity for generating home purchase loans in LMI tracts.

The median age of housing stock across the AA was 46 years, which is older than the overall median in the states of Georgia (31 years) and Tennessee (36 years). Within the AA, the median age of housing stock was older in low-income tracts (61 years) and moderate-income tracts (58 years). This indicates potential opportunity for home improvement loans in LMI tracts.

The median housing value in the AA increased during the review period. As of January 2021, the median listing price for a home in the Chattanooga MSA was $319,450.[151] From January 2021 to December 2023, the median listing price for a home increased 28.3 percent to $409,900.[152]

According to 2023 FFIEC Census data, the median gross rent in the AA was $876 per month, which was similar to the median gross rent in the state of Tennessee ($897). Housing cost burden is a challenge in the AA. The data indicated that 42.9 percent of AA renters were cost-burdened, which is defined as spending more than 30 percent of gross income on rent. Although housing and rent prices remain somewhat affordable as compared to other MSAs in the region, cost increases during the review period made housing less affordable for LMI families.

Economic Conditions

The Chattanooga AA is located at the border of southeast Tennessee and northwest Georgia. Chattanooga has a favorable logistical location because it is at the cross section of three major interstates and within proximity to three other major interstates.[153] This infrastructure provides cost-effective ways for businesses to access various metropolitan areas in the Southeast, Midwest, and Mid Atlantic.[154] Chattanooga's employment landscape is diverse, with numerous job opportunities in key industries. The city's labor force participation rate is high, and employment opportunities are abundant, particularly in sectors like healthcare, manufacturing, and technology.[155] The top five employers by full-time employees in Chattanooga include BlueCross BlueShield of Tennessee, Hamilton County Schools, Erlanger Health System, Volkswagen Group of America Chattanooga Operations, and Tennessee Valley Authority.[156]

The following table displays the unemployment rate percentages for the Chattanooga AA, the counties that comprise the AA, and the states of Georgia and Tennessee. As shown, unemployment rates in the AA experienced a decrease and were similar to unemployment rates for the state of Georgia and Tennessee during the review

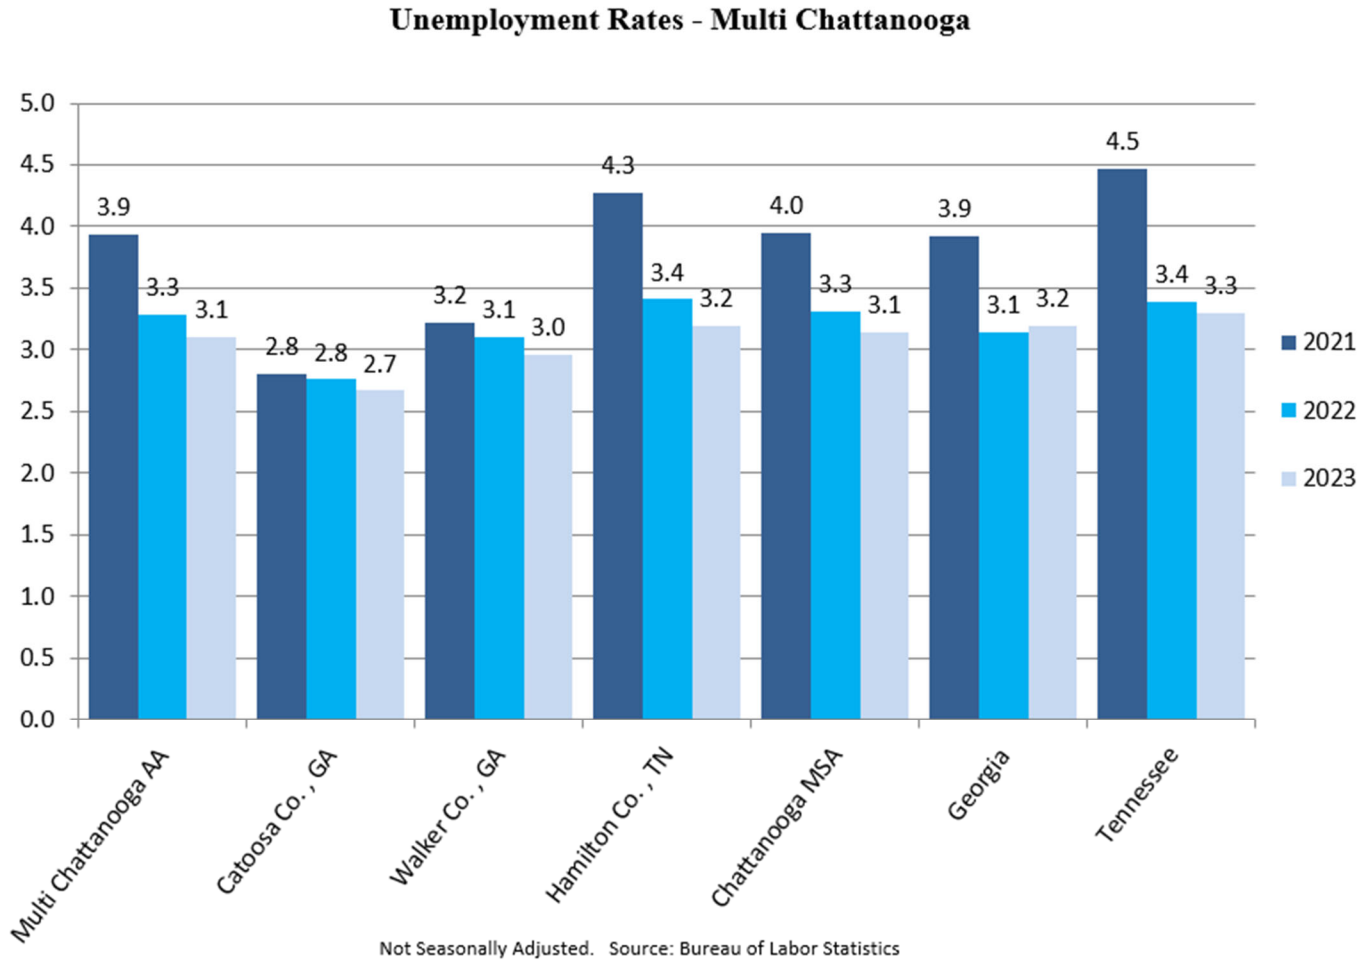
period. The AA unemployment rate decreased from 3.9 percent in 2021 to 3.1 percent in 2023. Similarly, the Georgia statewide unemployment rate decreased from 3.9 percent in 2021 to 3.2 percent in 2023 while the Tennessee statewide unemployment rate decreased from 4.5 percent in 2021 to 3.3 percent in 2023. Within the AA, Hamilton County TN had the highest unemployment rate during the review period and Catoosa County GA had the lowest.



Credit and CD Needs

To better understand the local CD and economic landscapes, information from a recently conducted interview with a Chattanooga-area community and economic development professional was referenced. This individual discussed the various needs and opportunities across the region as well as how financial institutions can be responsive to local CD needs. The contact mentioned financial and technical assistance for small businesses as the primary needs in the AA.

The contact also mentioned that the small businesses are in need of financial literacy training, especially for early-stage entrepreneurs. There is a need for development for business owners and prospective business owners to receive mentorship and guidance in starting and expanding a business. The contact stated that group business economics courses would be beneficial for the area. Lastly, the contact also mentioned that opportunities exist for financial institutions to connect with small businesses owners to help promote financial and economic growth in the area.

CONCLUSIONS WITH RESPECT TO PERFORMANCE TESTS IN THE CHATTANOOGA MULTISTATE MSA

LENDING TEST

The Lending Test rating for the Chattanooga Multistate MSA is High Satisfactory. Lending levels reflect adequate responsiveness to credit needs of the AA. The geographic distribution of loans reflects adequate penetration throughout the AA and the distribution of loans reflects good penetration among borrowers of different income levels and businesses of different revenue sizes. In addition, the bank made a relatively high level of CD loans in the Chattanooga multistate AA.

The analysis included 2,196 HMDA-reportable loans and 567 small business loans reported by the bank in the AA during the review period. Therefore, HMDA-reportable lending received greater weight in determining conclusions. Additionally, during 2021, 2022, and 2023 the bank originated or purchased 773 home refinance loans, 679 home improvement loans, and 392 home purchase loans in the AA. Thus, when considering HMDA-reportable loan categories, equal weight was assigned to home refinance loans and home improvement loans given their relative share of the total HMDA-reportable lending in this AA, followed by home purchase loans to a lesser extent.

Details of the bank's mortgage and small business lending and information regarding lending by peers can be found in *Appendix F*.

Lending Activity

Lending activity is considered adequate. Overall, 1.2 percent of HMDA-reportable loans and 1.1 percent of small business loans were made in the AA. The percentage of the bank's HMDA-reportable and small business lending is consistent with the percentage of its area deposits. In addition, the bank is an important contributor to HMDA-reportable lending in the area.

Geographic Distribution of Loans

The geographic distribution of loans reflects adequate penetration throughout the AA. As described in the following sections, overall performance for HMDA-reportable lending is adequate and small business lending performance is adequate.

Home Refinance Loans

Home refinance lending in low-income tracts is poor. In 2021, the bank made 2.0 percent of its home refinance loans in low-income tracts, which was below the percentage of owner-occupied units in these tracts (3.0 percent) but equal to aggregate performance. Bank performance declined in 2022 and 2023, with the bank making 1.2 percent of its home refinance loans in low-income tracts, which was below the percentage of owner-occupied units in these tracts (3.0 percent). In 2022, the bank's lending (0.9 percent) was below aggregate performance (3.0 percent) and in 2023, the bank's lending (1.8 percent) was below aggregate performance (2.8 percent).

Home refinance lending in moderate-income tracts is adequate. In 2021, the bank made 14.6 percent of its home refinance loans in moderate-income tracts, which was below the percentage of owner-occupied units in these tracts (17.0 percent) but above aggregate performance of 11.2 percent. In 2022 and 2023, the bank made 10.6 percent of its home refinance loans in moderate-income tracts, which was below the percentage of owner-occupied units in these tracts (15.7 percent). In 2022, the bank's lending (8.5 percent) was below aggregate

performance (14.6 percent) and in 2023, the bank's lending improved to 14.5 percent but was below aggregate performance (16.5 percent).

Home Improvement Loans

Home improvement lending in low-income tracts is adequate. In 2021, the bank made 5.2 percent of its home improvement loans in low-income tracts, which was above the percentage of owner-occupied units in these tracts (3.0 percent) and more than double aggregate performance of 2.1 percent. In 2022, the bank did not make any home improvement loans in low-income tracts. However, in 2023, the bank made 1.5 percent of its home improvement loans in low-income tracts, which was below the percentage of owner-occupied units in these tracts (3.0 percent) but similar to aggregate performance (2.1 percent).

Home improvement lending in moderate-income tracts is adequate. In 2021, the bank made 9.4 percent of its home improvement loans in moderate-income tracts, which was below the percentage of owner-occupied units in these tracts (17.0 percent) but similar to aggregate performance of 10.4 percent. In 2022 and 2023, the bank made 10.9 percent of its home improvement loans in moderate-income tracts, which was below the percentage of owner-occupied units in these tracts (15.7 percent). In 2022, the bank's lending (9.9 percent) was below aggregate performance (12.3 percent) and in 2023, the bank's lending (12.2 percent) was similar to aggregate performance (12.0 percent).

Home Purchase Loans

Home purchase lending in low-income tracts is poor. In 2021, the bank made 0.6 percent of its home purchase loans in low-income tracts, which was below the percentage of owner-occupied units in these tracts (3.0 percent) and below aggregate performance of 3.1 percent. In 2022 and 2023, the bank made 3.0 percent of its home purchase loans in low-income tracts, which matched the percentage of owner-occupied units in these tracts. In 2022, the bank's lending (2.0 percent) was below aggregate performance (3.4 percent) and in 2023, the bank's lending (4.8 percent) was above aggregate performance (3.3 percent).

Home purchase lending in moderate-income tracts is poor. In 2021, the bank made 11.3 percent of its home purchase loans in moderate-income tracts, which was below the percentage of owner-occupied units in these tracts (17.0 percent) and below aggregate performance of 14.8 percent. In 2022 and 2023, the bank made 12.9 percent of its home purchase loans in moderate-income tracts, which was below the percentage of owner-occupied units in these tracts (15.7 percent). In 2022, the bank's lending (12.1 percent) was below aggregate performance (16.6 percent) and in 2023, the bank's lending (14.3 percent) was below aggregate performance (19.5 percent).

Small Business Loans

Small business lending in low-income tracts is adequate. In 2021, the bank made 6.7 percent of its small business loans in low-income tracts, which was similar to the percentage of total businesses located in these tracts (6.9 percent) but below aggregate performance of 8.1 percent. In 2022 and 2023, the bank made 7.5 percent of its small business loans in low-income tracts, which was above the percentage of total businesses located in these tracts (6.5 percent). In 2022, the bank's lending (10.5 percent) was above aggregate performance (6.6 percent) and in 2023, the bank's lending (4.8 percent) was below aggregate performance of 6.4 percent.

Small business lending in moderate-income tracts is good. In 2021, the bank made 19.2 percent of its small business loans in moderate-income tracts, which was above the percentage of total businesses located in these tracts (16.9 percent) and above aggregate performance of 15.2 percent. In 2022 and 2023, the bank made 20.0 percent of its small business loans in moderate-income tracts, which was similar to the percentage of total businesses located in these tracts (19.7 percent). In 2022, the bank's lending (17.5 percent) was below aggregate performance (18.7 percent) and in 2023, the bank's lending (22.2 percent) was above aggregate performance of 18.0 percent.

No conspicuous lending gaps were identified based on an analysis of the dispersion of the loan products reviewed. The bank had activity in nearly all census tracts throughout the review period. Furthermore, lending data and maps did not indicate an absence of loans across LMI tracts.

Lending to Borrowers of Different Incomes and Businesses of Different Sizes

The distribution of loans based on borrower income or gross annual revenues is good. As described in the following sections, overall performance for HMDA-reportable lending is good while small business lending performance is adequate.

Home Refinance Loans

Home refinance lending to low-income borrowers is excellent. In 2021, the bank made 12.6 percent of its home refinance loans to low-income borrowers, which was below the percentage of low-income families (20.8 percent) but more than double aggregate performance of 5.5 percent. In 2022 and 2023, the bank made 15.2 percent of its home refinance loans to low-income borrowers, which was below the percentage of low-income families (20.0 percent). In 2022, the bank's lending (13.2 percent) was above aggregate performance (9.2 percent) and in 2023, the bank's lending (19.1 percent) was above aggregate performance (12.5 percent).

Home refinance lending to moderate-income borrowers is good. In 2021, the bank made 23.7 percent of its home refinance loans to moderate-income borrowers, which was above the percentage of moderate-income families (17.2 percent) and above aggregate performance of 16.4 percent. In 2022 and 2023, the bank made 25.2 percent of its home refinance loans to moderate-income borrowers, which was above the percentage of moderate-income families (17.7 percent). In 2022, the bank's lending (23.1 percent) was above aggregate performance (19.7 percent) and in 2023, the bank's lending (29.1 percent) was above aggregate performance (21.7 percent).

Home Improvement Loans

Home improvement lending to low-income borrowers is good. In 2021, the bank made 13.6 percent of its home improvement loans to low-income borrowers, which was below the percentage of low-income families (20.8 percent) but above aggregate performance of 9.6 percent. In 2022 and 2023, the bank made 11.9 percent of its home improvement loans to low-income borrowers, which was below the percentage of low-income families (20.0 percent). In 2022, the bank's lending (11.6 percent) was above aggregate performance (8.2 percent) and in 2023, the bank's lending (12.2 percent) was above aggregate performance (8.5 percent).

Home improvement lending to moderate-income borrowers is good. In 2021, the bank made 20.9 percent of its home improvement loans to moderate-income borrowers, which was above the percentage of moderate-income families (17.2 percent) and above aggregate performance of 17.3 percent. In 2022 and 2023, the bank made 21.5 percent of its home improvement loans to moderate-income borrowers, which was above the percentage of moderate-income families (17.7 percent). In 2022, the bank's lending (18.5 percent) was above aggregate performance (15.1 percent) and in 2023, the bank's lending (26.0 percent) was above aggregate performance (18.0 percent).

Home Purchase Loans

Home purchase lending to low-income borrowers is good. In 2021, the bank made 6.3 percent of its home purchase loans to low-income borrowers, which was below the percentage of low-income families (20.8 percent) but similar to aggregate performance of 5.5 percent. In 2022 and 2023, the bank made 6.0 percent of its home purchase loans to low-income borrowers, which was below the percentage of low-income families (20.0 percent). In 2022, the bank's lending (4.0 percent) was similar to aggregate performance (3.5 percent) while in 2023, the bank's lending (9.5 percent) was above aggregate performance (5.3 percent).

Home purchase lending to moderate-income borrowers is adequate. In 2021, the bank made 21.4 percent of its home purchase loans to moderate-income borrowers, which was above the percentage of moderate-income families (17.2 percent) and above aggregate performance of 19.7 percent. In 2022 and 2023, the bank made 17.6 percent of its home purchase loans to moderate-income borrowers, which was similar to the percentage of moderate-income families (17.7 percent). In 2022, the bank's lending (16.1 percent) was similar to aggregate performance (15.9 percent) and in 2023, the bank's lending (20.2 percent) was above aggregate performance (18.4 percent).

Small Business Loans

Small business lending to businesses of different sizes is adequate. In 2021, the bank made 73.4 percent of its small business loans to businesses with revenues of $1 million or less, which was below the percentage of total businesses with revenues of $1 million or less (91.8 percent). The bank's performance is above aggregate performance of 45.9 percent in 2021. However, 2021 was a year in which many banks extended PPP loans as a result of the COVID-19 pandemic and were not required to capture and report the revenue of the businesses, which is reflected in the aggregate data. As a result, performance context and loan size data were considered. In 2021, the bank made loans of less than $250,000 to businesses at a similar rate (91.8 percent) as aggregate lenders (93.1 percent). In 2022 and 2023, the bank made 53.3 percent of its small business loans to businesses with revenues of $1 million or less, which was below the percentage of total businesses with revenues of $1 million or less (91.7 percent). In 2022, the bank's lending (54.4 percent) was above aggregate performance (50.9 percent) and in 2023, the bank's lending (52.4 percent) was similar to aggregate performance (52.0 percent). Moreover, the majority of the bank's small business loans were originated in amounts of $250,000 or less, indicating a willingness to lend in the smaller amounts that are typically requested by small businesses.

CD Lending

The bank makes a relatively high level of CD loans in the Chattanooga Multistate AA. During the review period, the bank originated three qualified CD loans totaling $20.9 million in the AA, all of which were impactful and responsive to AA needs as described below.

- Two loans totaling $19.4 million for construction of apartments in the AA using LIHTCs, which are complex. The projects were designed to create 64 new units of affordable housing for LMI individuals and/or families, with at least 13 of those units being set aside for low-income individuals and/or families. These loans are responsive given the affordable housing challenges and the need for additional affordable housing units in the AA, as noted by community contacts.

- One loan totaling $1.5 million for the construction of a FQHC in the AA.

INVESTMENT TEST

The Investment Test rating for the Chattanooga Multistate AA is High Satisfactory.

The bank made a significant level of qualified CD investments and grants in the Chattanooga Multistate AA, totaling $26.5 million. This amount includes one current period investments totaling $11.2 million, eight prior period investments still outstanding with a balance of $14.9 million, and 51 donations totaling $447,000.

Investment types varied and addressed a range of CD needs. These include investments in LIHTC projects to address affordable housing challenges and MBS supporting LMI borrowers. The bank made significant use of innovative and/or complex investments to support CD initiatives. Additionally, the bank exhibits good responsiveness to CD needs.

Examples of noteworthy investments and grants provided during the review period include:

- An $11.2 million current-period LIHTC investment for the creation of 64 units of affordable housing for LMI individuals and families.
- A $7.6 million prior period Commercial MBS secured by a multifamily property primarily addressing affordable housing.
- A $50,000 donation to a veteran small business support organization that provides veterans with technical assistance to develop sound business plans.
- Three donations totaling $135,000 to an organization that supports LMI families with workforce training and financial literacy.
- A $20,000 donation to support education of LMI students through a teacher residency program.

SERVICE TEST

The Service Test is rated Low Satisfactory for the Chattanooga Multistate MSA. Regions retail banking services were adequate in the AA and the bank provided a limited level of CD services.

Retail Banking Services

Retail service delivery systems are reasonably accessible to the bank's geographies and individuals of different income levels throughout the Chattanooga AA. In deriving this conclusion, the distribution of the bank's branches by census tract income level was compared to the distribution of households and businesses among the tract categories in the AA. As the following tables show, the bank operated branches and ATMs in all census tract categories throughout the review period, with one branch (5.6 percent of total branches) in a low-income tract and three branches (16.7 percent of branches) in moderate-income tracts in 2023. The percentage of branches in low-income tracts is similar to the percentage of households (6.1 percent) and the percentage of businesses (6.5 percent) in those tracts. The percentage of branches in moderate-income tracts was below the percentage of households (18.0 percent) and the percentage of businesses (19.7 percent) in those tracts. The bank operated one additional branch in a moderate-income tract in 2021, but the tract was reclassified to income unknown after the updates to the U.S. Census in 2022. Regions did not open or close any branches during the review period.

Branch lobby and drive-through hours are similar across all branches in the AA, with most branches opening at 9 a.m. and closing at 4:00 p.m. or 5:00 p.m. Monday through Thursday; all branches are open until 5 p.m. on Fridays. The bank offers drive-through hours Monday through Thursday until 5 p.m. for the branches that close at 4 p.m. The bank offers Saturday hours from 9:00 a.m. to 12:00 p.m. on Saturdays at four branches, including one branch in a moderate-income census tract and one branch in a middle-income tract that was previously moderate-income. Thus, hours and services do not vary in a way that inconveniences the AA, particularly LMI geographies and LMI individuals.

The tables below show the distribution of branches and ATMs along with households and businesses by tract category.

CD Services

The bank provides a limited level of CD services in the AA. During the review period, bank employees provided 89 CD service activities totaling 327 hours to 24 organizations operating throughout the AA. Bank staff provided financial services in a variety of ways, including providing financial education; service on the board of directors and other advisory committees for nonprofit organizations; and providing various types of technical assistance to nonprofit and government agencies engaged in CD.

Noteworthy CD services include:

- Several staff members provided 138 hours of service to a local housing nonprofit offering a variety of services to LMI individuals, including education and homeownership assistance and affordable housing construction and rehabilitation for LMI individuals. Staff members served on the board and other committees for the organization, as well as providing financial education for the clients served by the organization.

- One bank employee served on the board for a foundation that provides grants to local nonprofit organizations that primarily serve LMI individuals.

- Bank employees provided 83 hours of financial education instruction to 16 different entities in the AA, including nonprofit organizations that serve a majority of LMI individuals and employers that have a majority of workers that would be considered LMI.

AUGUSTA GA-SC MULTISTATE MSA

CRA RATING FOR AUGUSTA GA-SC MULTISTATE[157]: SATISFACTORY

The Lending Test is rated: **Low Satisfactory**
The Investment Test is rated: **Low Satisfactory**
The Service Test is rated: **Low Satisfactory**

Major factors contributing to this rating include:

- The geographic distribution of loans reflects adequate penetration throughout the multistate AA.
- The distribution of borrowers reflects good penetration throughout the multistate AA.
- The bank made a low level of CD loans in the Augusta Multistate MSA.
- The bank made an adequate level of qualified CD investments and grants in the Augusta Multistate AA.
- Retail banking services, which includes accessibility of delivery systems, changes in branch locations, and reasonableness of hours and services, are adequate.
- The bank provides an adequate level of CD service activities in the Augusta Multistate MSA.

SCOPE OF EXAMINATION

The time period, products, and affiliates evaluated for the Augusta Multistate AA are consistent with the overall scope described in the Description of the Institution section of this report. Regions performance in the Augusta multistate AA was evaluated using full-scope examination procedures.

DESCRIPTION OF INSTITUTION'S OPERATIONS IN THE AUGUSTA MULTISTATE MSA

Overview
The Augusta AA spans two U.S. states, Georgia and South Carolina. It includes the Georgia counties of Columbia, McDuffie, and Richmond and the South Carolina counties of Aiken and Edgefield. As of December 31, 2023, the bank operated 11 branches in the AA representing 0.9 percent of its total branches. Branch distribution by tract category as of 2023 was as follows: one in a low-income tract (9.1 percent), five in middle-income tracts (45.5 percent), three in upper-income tracts (27.3 percent), and two in unknown-income tracts (18.2 percent). The Augusta AA accounts for 0.6 percent of the bank's deposit volume by dollar and 0.8 percent of the bank/s total HMDA-reportable and small business loan volume by number.

Augusta has an active banking market with presence of multiple national and regional banks. As of June 30, 2023, there were 21 financial institutions operating 101 branch locations within the AA. Regions ranked 7th with 7.2 percent deposit market share and approximately $803.1 million in deposits. The deposit market share leaders were Wells Fargo and Southstate Bank with 21.2 percent and 13.3 percent of deposits respectively.

[157] This rating reflects performance within the multistate MSA. The statewide evaluations are adjusted and do not reflect performance in the parts of those states contained within the multistate MSA.

For HMDA-reportable lending, Regions originated and/or purchased 1.5 percent, 1.7 percent, and 1.8 percent of total HMDA reportable loans in the AA in 2021, 2022, and 2023 respectively. Regions was ranked 21st out of 521 reporters in 2021; 17th out of 523 reporters in 2022; and 14th out of 440 reporters in 2023. Rocket Mortgage was the leading HMDA reporter in the market in 2021, 2022 and 2023.

For small business lending, Regions ranked 16th out of 118 reporters in 2021 with 1.6 percent of reported small business loans in the AA. In 2022, the bank ranked 22nd out of 106 reporters with 0.4 percent of loans. In 2023, the bank ranked 18th out of 94 reporters with 0.6 percent of loans.

AA Demographics, Population, and Income Characteristics

The Augusta AA is located along the banks of the Savannah River. Augusta is the second largest and oldest city in Georgia. Located in the east central section of the state, Augusta is approximately 150 miles east of Atlanta on Interstate 20. Augusta is also centrally located just two and a half hours from the beach and the mountains. Augusta is a township located in Columbia County, Georgia. The city of Augusta had a population of 200,512 as of 2024. Augusta's population is currently declining. The median age is 34.6 years: 32.2 years for males and 36.6 years for females.[158]

The AA contains 137 census tracts: 13 low-income tracts (9.5 percent), 35 moderate-income tracts (25.5 percent), 55 middle-income tracts (40.1 percent), 29 upper-income tracts (21.2 percent), and give unknown-income tracts (3.6 percent).

For the purposes of classifying borrower income, the chart below utilizes the FFIEC estimated median family income for the MSA. The chart provides a breakdown of estimated median family income by income category (low, moderate, middle and upper). As shown, the median family income increased from $70,000 in 2021 to $77,600 in 2023.

Borrower Income Levels
Augusta-Richmond County, GA-SC MSA

FFIEC Estimated Median Family Income		Low	Moderate	Middle	Upper
		0 - 49.99%	50% - 79.99%	80% - 119.99%	120% - & above
2021	**$70,000**	0 - $34,999	$35,000 - $55,999	$56,000 - $83,999	$84,000 - & above
2022	**$73,800**	0 - $36,899	$36,900 - $59,039	$59,040 - $88,559	$88,560 - & above
2023	**$77,600**	0 - $38,799	$38,800 - $62,079	$62,080 - $93,119	$93,120 - & above

There are 136,675 families in the AA. Of those families, 22.5 percent are low-income, 16.3 percent are moderate-income, 19.6 percent are middle-income, and 41.5 percent are upper-income.

Housing Characteristics

There are 245,745 housing units in the AA, of which 56.4 percent are owner-occupied, 27.6 percent are rental units, and 16.0 percent are vacant. Home ownership rates are lower in LMI census tracts, at 31.0 percent and 45.4 percent, respectively.

The AA's housing market is somewhat affordable. Augusta has affordable condo/townhomes and affordable 1–2-bedroom listings. The median listing home price in Augusta, GA was $215K in November 2024, trending

[158] Augusta, Georgia Population 2024. *World Population Review*. Retrieved January 16, 2025, from https://worldpopulationreview.com/us-cities/georgia/augusta

down 2.2% year-over-year.[159] Meanwhile, median gross rent per month in the AA is $908, which is slightly lower than the statewide median in Georgia ($1,042) and South Carolina ($918).[160]

The median age of housing stock in the AA is 40 years.[161] This is higher than the statewide median in Georgia (31 years) and South Carolina (31 years). The AA's housing stock is even older in low-income tracts (59 years) and moderate-income tracts (48 years). This is an indicator of potential opportunity for home improvement loans in LMI tracts.

Economic Conditions

The Augusta AA has a high-tech economy with a particularly strong presence in STEM industries, including cybersecurity, scientific research, manufacturing, and healthcare.[162] Major employers include the Savannah River Site (Department of Energy Nuclear Facility), Fort Gordon, the Medical College of Georgia, and Piedmont Hospital Augusta.[163]

The following table shows the unemployment rates for the AA, the counties that comprise the AA, and the states of Georgia and South Carolina during the review period. As shown, the AA's unemployment rate was slightly higher than the unemployment rates of Georgia and South Carolina during the review period. McDuffie and Richmond counties in Georgia had the highest unemployment rates in all three years. Meanwhile, Columbia County, GA had the strongest labor market in the AA, with unemployment rate at or below 3.0 percent in all three years.

Credit and CD Needs

As part of the CRA examination, information from a recently conducted interview with a local contact specializing in economic development was referenced. The contact noted that a large manufacturing plant was being constructed, and once completed, it is predicted to bring 1,000 jobs to the area. It was also noted that the healthcare industry is expanding. There are two emergency rooms and a military hospital under construction, also resulting in thousands of new jobs. Another growing field is cybersecurity. The U.S. Army Cyber Command will have 5,000 soldiers and there are currently 118 cyber companies in the area.

Richmond County and surrounding areas are growing in housing around the workforce job center. It is gaining population in recent years. 200 housing units are under construction. However, the area experienced damage due to Hurricane Helen. Older housing stock needs updating, upgrades, and repairs. In addition, with the growth there are still high poverty rates; over half of students in the local public school system are in poverty.

According to the contact, it is challenging for small businesses to gain capital because they may not have assets to collateralize the capital and lack of credit history. Banks could be more responsive to the needs of small businesses in the area by offering flexibility in underwriting requirements. Based on the contact's comments, there is need and opportunity for banks to finance small business and affordable housing in the assessment area.

CONCLUSIONS WITH RESPECT TO PERFORMANCE TESTS IN THE AUGUSTA MULTISTATE MSA

LENDING TEST

The Lending Test rating for the Augusta Multistate MSA is Low Satisfactory.

Lending levels reflect adequate responsiveness to credit needs of the AA. The geographic distribution of loans reflects adequate penetration throughout the AA and the distribution of loans reflects good penetration among borrowers of different income levels and businesses of different revenue sizes. In addition, the bank made a low level of CD loans in the Augusta multistate AA.

The analysis included 1,038 HMDA-reportable loans and 274 small business loans reported by the bank in the AA during the review period. Therefore, HMDA-reportable lending received greater weight in determining conclusions. Additionally, during 2021, 2022, and 2023, the bank originated or purchased 351 home purchase loans, 350 home refinance loans, and 211 home improvement loans in the AA. Thus, when considering HMDA-reportable loan categories, equal weight was assigned to home purchase loans and home refinance loans given their relative share of the total HMDA-reportable lending in this AA, followed by home improvement loans.

Details of the bank's mortgage and small business lending and information regarding lending by peers can be found in *Appendix F.*

Lending Activity

Lending activity is considered adequate. Overall, 0.7 percent of HMDA-reportable loans and 0.6 percent of small business loans were made in the AA. The percentage of the bank's HMDA-reportable and small business lending is consistent with the percentage of its area deposits.

Geographic Distribution of Loans

The bank's geographic distribution of loans reflects adequate penetration throughout the AA. As described in the following sections, overall performance for HMDA-reportable lending is adequate and small business lending performance is adequate.

Home Purchase Loans

Home purchase lending in low-income tracts is adequate. In 2021, the bank did not make any home purchase loans in low-income tracts despite opportunities for lending as reflected by demographic data and aggregate performance. Bank performance improved in 2022 and 2023, with the bank making 3.3 percent of its home purchase loans in low-income tracts, which was similar to the percentage of owner-occupied units in these tracts (3.9 percent). In 2022, the bank's lending (3.0 percent) was similar to aggregate performance (2.5 percent) and in 2023, the bank's lending (3.7 percent) was similar to aggregate performance (2.9 percent).

Home purchase lending in moderate-income tracts is adequate. In 2021, the bank made 7.4 percent of its home purchase loans in moderate-income tracts, which was below the percentage of owner-occupied units in these tracts (22.3 percent) and below aggregate performance of 14.6 percent. Bank performance improved in 2022 and 2023, with the bank making 15.3 percent of its home purchase loans in moderate-income tracts, which was below the percentage of owner-occupied units in these tracts (18.4 percent). In 2022, the bank's lending (14.2 percent) was above aggregate performance (13.1 percent) and in 2023, the bank's lending (17.3 percent) was above aggregate performance (13.9 percent).

Home Refinance Loans

Home refinance lending in low-income tracts is poor. In 2021, the bank made 0.9 percent of its home refinance loans in low-income tracts, which was below the percentage of owner-occupied units in these tracts (3.9 percent) but similar to aggregate performance of 1.3 percent. However, the bank made no home refinance loans in low-income tracts in 2022 or 2023 despite opportunities for lending as reflected by demographic data and aggregate performance.

Home refinance lending in moderate-income tracts is good. In 2021, the bank made 12.7 percent of its home refinance loans in moderate-income tracts, which was below the percentage of owner-occupied units in these tracts (22.3 percent) but above aggregate performance of 9.8 percent. In 2022 and 2023, the bank made 18.0 percent of its home refinance loans in moderate-income tracts, which was similar to the percentage of owner-occupied units in these tracts (18.4 percent). In 2022, the bank's lending (19.5 percent) was above aggregate performance (13.1 percent) and in 2023, the bank's lending (15.6 percent) was above aggregate performance (14.2 percent).

Home Improvement Loans

Home improvement lending in low-income tracts is poor. In 2021 and 2022, the bank made no home improvement loans in low-income tracts despite opportunities for lending as reflected by demographic data and aggregate performance. In 2023, the bank made 1.3 percent of its home improvement loans in low-income tracts, which was below the percentage of owner-occupied units in these tracts (3.9 percent) but similar to aggregate performance (1.6 percent).

Home improvement lending in moderate-income tracts is poor. In 2021, the bank made 20.3 percent of its home improvement loans in moderate-income tracts, which was below the percentage of owner-occupied units in these tracts (22.3 percent) but above aggregate performance of 13.8 percent. However, bank performance declined in 2022 and 2023, with the bank making 5.9 percent of its home improvement loans in moderate-income tracts, which was below the percentage of owner-occupied units in these tracts (18.4 percent). In 2022, the bank's

lending (6.8 percent) was below aggregate performance (11.5 percent) and in 2023, the bank's lending (5.1 percent) was below aggregate performance (9.9 percent).

Small Business Loans

Small business lending in low-income tracts is adequate. In 2021, the bank made 5.9 percent of its small business loans in low-income tracts, which was below the percentage of total businesses located in these tracts (7.2 percent) but similar to aggregate performance of 5.7 percent. In 2022 and 2023, the bank made 3.8 percent of its small business loans in low-income tracts, which was below the percentage of total businesses located in these tracts (7.5 percent). In 2022, the bank's lending (9.3 percent) was above aggregate performance (5.3 percent) while in 2023, the bank made no small business loans in low-income tracts despite opportunities for lending as reflected by demographic data and aggregate performance.

Small business lending in moderate-income tracts is adequate. In 2021, the bank made 19.5 percent of its small business loans in moderate-income tracts, which was below the percentage of total businesses located in these tracts (21.8 percent) and similar to aggregate performance of 18.5 percent. In 2022 and 2023, the bank made 20.0 percent of its small business loans in moderate-income tracts, which was above the percentage of total businesses located in these tracts (18.5 percent). In 2022, the bank's lending (14.0 percent) was below aggregate performance (16.3 percent) and in 2023, the bank's lending (24.2 percent) was above aggregate performance of 15.6 percent.

No conspicuous lending gaps were identified based on an analysis of the dispersion of the loan products reviewed. The bank had activity in approximately 80 percent of all census tracts throughout the review period. Furthermore, lending data and maps did not indicate an absence of loans across LMI tracts.

Lending to Borrowers of Different Incomes and Businesses of Different Sizes

The distribution of loans based on borrower income or gross annual revenues is good. As described in the following sections, overall performance for HMDA-reportable lending is good while small business lending performance is adequate.

Home Purchase Loans

Home purchase lending to low-income borrowers is adequate. In 2021, the bank made 4.4 percent of its home purchase loans to low-income borrowers, which was below the percentage of low-income families (23.8 percent) but similar to aggregate performance of 4.7 percent. In 2022 and 2023, the bank made 4.2 percent of its home purchase loans to low-income borrowers, which was below the percentage of low-income families (22.5 percent). In 2022, the bank's lending (6.7 percent) was above aggregate performance (3.8 percent). However, in 2023, the bank made no home-purchase loans to low-income borrowers despite opportunities for lending as reflected by demographic data and aggregate performance.

Home purchase lending to moderate-income borrowers is excellent. In 2021, the bank made 21.3 percent of its home purchase loans to moderate-income borrowers, which was above the percentage of moderate-income families (16.0 percent) and above aggregate performance of 16.8 percent. In 2022 and 2023, the bank made 26.0 percent of its home purchase loans to moderate-income borrowers, which was above the percentage of moderate-income families (16.3 percent). In 2022, the bank's lending (24.6 percent) was above aggregate performance (15.9 percent) and in 2023, the bank's lending (28.4 percent) was nearly double aggregate performance (14.4 percent).

Home Refinance Loans

Home refinance lending to low-income borrowers is excellent. In 2021, the bank made 8.3 percent of its home refinance loans to low-income borrowers, which was below the percentage of low-income families (23.8 percent) but more than double aggregate performance of 3.8 percent. In 2022 and 2023, the bank made 16.4 percent of its home refinance loans to low-income borrowers, which was below the percentage of low-income families (22.5 percent). In 2022, the bank's lending (14.3 percent) was nearly double aggregate performance (7.4 percent) and in 2023, the bank's lending (20.0 percent) was more than triple aggregate performance (6.5 percent).

Home refinance lending to moderate-income borrowers is excellent. In 2021, the bank made 20.2 percent of its home refinance loans to moderate-income borrowers, which was above the percentage of moderate-income families (16.0 percent) and nearly double aggregate performance of 10.7 percent. In 2022 and 2023, the bank made 24.6 percent of its home refinance loans to moderate-income borrowers, which was above the percentage of moderate-income families (16.3 percent). In 2022, the bank's lending (27.3 percent) was above aggregate performance (17.0 percent) and in 2023, the bank's lending (20.0 percent) was above aggregate performance (15.8 percent).

Home Improvement Loans

Home improvement lending to low-income borrowers is good. In 2021, the bank made 10.2 percent of its home improvement loans to low-income borrowers, which was below the percentage of low-income families (23.8 percent) but above aggregate performance of 6.0 percent. In 2022 and 2023, the bank made 7.9 percent of its home improvement loans to low-income borrowers, which was below the percentage of low-income families (22.5 percent). In 2022, the bank's lending (8.2 percent) was above aggregate performance (5.4 percent) and in 2023, the bank's lending (7.6 percent) was above aggregate performance (4.6 percent).

Home improvement lending to moderate-income borrowers is adequate. In 2021, the bank made 10.2 percent of its home improvement loans to moderate-income borrowers, which was below the percentage of moderate-income families (16.0 percent) but similar to aggregate performance of 10.5 percent. In 2022 and 2023, the bank made 15.1 percent of its home improvement loans to moderate-income borrowers, which was below the percentage of moderate-income families (16.3 percent). In 2022, the bank's lending matched aggregate performance (both 12.3 percent) and in 2023, the bank's lending (17.7 percent) was above aggregate performance (12.9 percent).

Small Business Loans

Small business lending to businesses of different sizes is adequate. In 2021, the bank made 77.5 percent of its small business loans to businesses with revenues of $1 million or less, which was below the percentage of total businesses with revenues of $1 million or less (93.3 percent). The bank's performance is above aggregate performance of 44.8 percent in 2021. However, 2021 was a year in which many banks extended PPP loans as a result of the COVID-19 pandemic and were not required to capture and report the revenue of the businesses, which is reflected in the aggregate data. As a result, performance context and loan size data were considered. In 2021, the bank made loans of less than $250,000 to businesses at a similar rate (92.9 percent) as aggregate lenders (97.2 percent). In 2022 and 2023, the bank made 61.0 percent of its small business loans to businesses with revenues of $1 million or less, which was below the percentage of total businesses with revenues of $1 million or less (93.7 percent). In 2022, the bank's lending (60.5 percent) was above aggregate performance (51.5 percent) and in 2023, the bank's lending (61.3 percent) was above aggregate performance (54.1 percent). Moreover, the majority of the bank's small business loans were originated in amounts of $250,000 or less, indicating a willingness to lend in the smaller amounts that are typically requested by small businesses.

CD Lending

The bank makes a low level of CD loans in the Augusta Multistate AA. During the review period, the bank originated or renewed four qualified CD loans totaling $6.4 million in the AA. Specifically, the bank provided $3.9 million in SBA 504 loans to support economic development by financing small businesses and $2.5 million for community services that benefit LMI individuals.

INVESTMENT TEST

The Investment Test rating for the Augusta Multistate AA is Low Satisfactory. The bank made an adequate level of qualified CD investments and grants in the Augusta Multistate AA totaling $5.9 million. This amount includes one current period investment totaling $323,700, five prior period investments still outstanding with a balance of $5.5 million, and seven donations totaling $55,800.

Investment types varied and addressed an adequate range of CD needs. These include investments in LIHTC projects to address affordable housing challenges and MBS supporting LMI borrowers. The bank made occasional use of innovative and/or complex investments to support CD initiatives. Additionally, the bank exhibits adequate responsiveness to CD needs.

Examples of noteworthy investments and grants provided during the review period include:

- A $323,700 current period MBS pool to support LMI borrowers.
- Two prior period LIHTC totaling $5.5 million, providing a total of 328 units of affordable housing.
- Three donations totaling $40,000 to support academic programs that primarily benefit LMI students.

SERVICE TEST

The Service Test is rated Low Satisfactory for the Augusta Multistate MSA. Regions retail banking services were adequate in the AA and the bank provided an adequate level of CD services.

Retail Banking Services

Retail service delivery systems are reasonably accessible to the bank's geographies and individuals of different income levels throughout the Augusta AA. In deriving this conclusion, the distribution of the bank's branches by census tract income level was compared to the distribution of households and businesses among the tract categories in the AA. As the following tables show, the bank operated 11 branches in the AA. In 2021, the bank had no branches in low-income tracts and four branches in moderate-income tracts (36.4 percent of total branches). By comparison, 7.0 percent of households and 7.2 percent of businesses were in low-income tracts and 25.7 of households and 21.8 percent of businesses were in moderate-income tracts. As a result of the census change in 2022, branch distribution changed such that the bank had one branch (9.1 percent of total branches) in a low-income tract and no branches in moderate-income tracts. This compares to 6.7 percent of households and 7.5 percent of businesses in low-income tracts, and 22.4 percent households and 18.5 percent of businesses in moderate-income tracts. Three branches that were previously in moderate-income tracts changed due to the census reclassification with two branches reclassified to middle-income tracts and one reclassified to income unknown. Given the bank did not open or close any branches during the review period and the change in the branch distribution was driven by the census changes in the middle of the review period, the accessibility of the bank's delivery systems is considered reasonable.

The bank's branch lobby and drive-through hours are similar across all branches in the AA, with all branches opening at 9:00 a.m. and closing at 4:00 p.m. or 5:00 p.m. Monday through Thursday; all branches are open until 5:00 p.m. on Fridays. The bank offers Saturday hours from 9:00 a.m. to 12:00 p.m. on Saturdays at three branches, including one branch in a low-income census tract and one branch in a middle-income tract that was previously moderate-income. Thus, hours and services do not vary in a way that inconveniences the AA, particularly LMI geographies and LMI individuals.

The tables below show the distribution of branches and ATMs along with households and businesses by tract category.

CD Services

Regions provides an adequate level of CD services in Augusta. During the review period, bank employees engaged in 72 CD service activities totaling 472 hours to 13 organizations operating throughout the AA. Bank staff shared their financial expertise by providing financial education to youth and adults and by serving on the board of directors for several nonprofit organizations engaged in CD.

Noteworthy CD services include:

- One bank employee provided 69 hours of service by serving on the board for a regional organization that provides SBA 504 and small business loans.
- Bank employees provided 34 hours of service by serving on the board for a nonprofit organization that is working to improve educational outcomes for LMI students.
- On bank employee gave 152 hours of service on the board of an organization that provides LMI youth with leadership development and golf instruction.

TEXARKANA TX-AR MULTISTATE MSA

CRA RATING FOR TEXARKANA TX-AR MULTISTATE[164]: SATISFACTORY

The Lending Test is rated: **Low Satisfactory**
The Investment Test is rated: **High Satisfactory**
The Service Test is rated: **High Satisfactory**

Major factors contributing to this rating include:

- The geographic distribution of loans reflects adequate penetration throughout the multistate AA.
- The distribution of borrowers reflects adequate penetration throughout the multistate AA.
- The bank made a low level of CD loans in the Texarkana Multistate MSA.
- The bank made a significant level of qualified CD investments and grants in the Texarkana Multistate AA.
- Retail banking services, which includes accessibility of delivery systems, changes in branch locations, and reasonableness of hours and services, are adequate.
- The bank is a leader in providing CD service activities in the Texarkana Multistate AA.

SCOPE OF EXAMINATION

The time period, products, and affiliates evaluated for the Texarkana Multistate AA are consistent with the overall scope described in the Description of the Institution section of this report. Regions' performance in the Texarkana Multistate AA was evaluated using full-scope examination procedures.

DESCRIPTION OF INSTITUTION'S OPERATIONS IN THE TEXARKANA MULTISTATE MSA

Overview
The Texarkana AA includes Bowie County in Texas and Little River and Miller counties in Arkansas, which comprise the entire Texarkana MSA. As of December 31, 2023, Regions operated three branches inside the AA, which represented 0.2 percent of the institution's total branches. In addition, 0.2 percent of the bank's deposits are in this market. The AA represents 0.1 percent of the institution's combined HMDA-reportable and small business lending by dollar volume.

Texarkana is a moderately competitive banking market. According to the FDIC Summary of Deposits Report as of June 30, 2023, there were 17 financial institutions operating 49 branch offices inside the AA with a total of $3.2 billion in deposits.[165] Banks holding the largest deposit market share in the AA include Farmers Bank & Trust (20.2 percent), Wells Fargo (19.3 percent), Cadence Bank (10.6 percent), and Guaranty Bank & Trust

[164] This rating reflects performance within the multistate MSA. The statewide evaluations are adjusted and do not reflect performance in the parts of those states contained within the multistate MSA.
[165] "Summary of Deposits – Market Share Reports." *Federal Deposit Insurance Corporation*, 30 June 2023, https://banks.data.fdic.gov/bankfind-suite/SOD/marketShare. Accessed 3 Dec. 2024.

(10.0 percent).[166] Regions Bank ranks 6th with $245.6 million in deposits, which is 7.7 percent of total AA deposits.[167]

HMDA-reportable lending in the AA is competitive. In 2021, Regions Bank originated or purchased 1.9 percent of total HMDA reportable loans in the AA, ranking 17th out of 228 reporters. In 2022, Regions Bank originated or purchased 1.5 percent of total HMDA reportable loans in the AA, ranking 18th out of 204 reporters. In 2023, Regions Bank originated or purchased 2.1 percent of total HMDA reportable loans in the AA, ranking 16th out of 186 reporters. During the review period, leading HMDA reporters in the AA included Rocket Mortgage, Mortgage Financial Services, Red River Credit Union, State Bank of Dekalb, and Farmers Bank & Trust Company.

Small business lending in the AA is also competitive. For small business lending, Regions Bank ranked 13th out of 82 reporters in 2021 with 1.5 percent of reported loans. In 2022, Regions Bank ranked 20th out of 80 reporters with 0.5 percent of reported loans. In 2023, Regions Bank ranked 17th out of 70 reporters with 0.9 percent of reported loans. Leading CRA small business reporters in the AA included American Express, Farmers Bank & Trust, and Cadence Bank.

AA Demographics, Population and Income Characteristics

The AA population was 145,907 as of July 1, 2023. This represented a 1.1 percent decrease since the 2020 census.[168] During the same period, the statewide populations in Texas and Arkansas increased by 4.7 percent and 1.9 percent, respectively.[169] 62.8 percent of AA residents live in Bowie County, which is home to the city of Texarkana.[170]

The AA consists of 46 census tracts. Per 2023 FFIEC Census data, four tracts are low-income (8.7 percent), seven tracts are moderate-income (15.2 percent), 23 tracts are middle-income (50.0 percent), 11 tracts are upper-income (23.91 percent), and one tract has an unknown income level (2.2 percent).[171]

For purposes of classifying borrower income, this evaluation uses the FFIEC estimated median family income for the Texarkana, TX-AR MSA. As shown, the median family income increased from $59,400 in 2021 to $70,900 in 2023.

Borrower Income Levels
Texarkana, TX-AR MSA

FFIEC Estimated Median Family Income		Low	Moderate	Middle	Upper
		0 - 49.99%	50% - 79.99%	80% - 119.99%	120% - & above
2021	**$59,400**	0 - $29,699	$29,700 - $47,519	$47,520 - $71,279	$71,280 - & above
2022	**$69,900**	0 - $34,949	$34,950 - $55,919	$55,920 - $83,879	$83,880 - & above
2023	**$70,900**	0 - $35,449	$35,450 - $56,719	$56,720 - $85,079	$85,080 - & above

[169] Ibid.
[170] Ibid.
[171] FRB Atlanta calculations of 2023 FFIEC Census Data

During the review period, 39.3 percent of AA families were considered LMI.[172] Elevated poverty rates are also a concern in the AA. Overall, 13.4 percent of AA families lived below the poverty level during the review period.[173] This percentage was higher in low-income tracts (39.4 percent) and moderate-income tracts (24.7 percent).[174]

Housing Characteristics

2023 FFIEC Census data indicates that there were 66,121 housing units in the AA, of which 55.5 percent were owner-occupied, 28.9 percent were rental units, and 15.6 percent were vacant. Home ownership rates were lower in low-income tracts, at 25.0 percent, and 42.9 percent in moderate-income tracts. This indicates limited opportunity for generating home purchase loans in LMI tracts.

The median age of housing stock across the AA was 44 years, which was older than the median in the states of Arkansas (36 years) and Texas (33 years). Within the AA, the median age of housing stock was older in low-income tracts (57 years) and moderate-income tracts (55 years). This indicates potential opportunity for home improvement loans in LMI tracts.

The median housing value in the AA increased during the review period. As of January 2021, the median listing price for a home in the Texarkana MSA was $184,900.[175] From January 2021 to January 2022, the median listing price for a home increased 5.5 percent to $195,000.[176] Between January 2022 and January 2023, the median listing price increased 6.3 percent to $207,225.[177] From January 2023 to December 2023, the median listing price increased 21.6 percent to $252,000.[178] This represented a cumulative increase of 36.3 percent across the three year review period.

According to 2023 FFIEC Census data, the median gross rent in the AA was $753 per month. The data also indicates that 40.6 percent of AA renters were cost-burdened, meaning they spend more than 30 percent of gross income on rent. Although housing and rent prices remain somewhat affordable as compared to other MSAs in the region, these cost increases during the review period made housing less affordable for LMI families.

Economic Conditions

The Texarkana economy is supported by a healthy manufacturing sector, including tire manufacturing, paper manufacturing, and a U.S. Army center for maintenance, and repair of tactical vehicles. The AA's largest industries by number of employees as of 2023 include government (11,915), healthcare/social assistance (9,253), retail (7,504), accommodation/food services (5,903), and manufacturing (5,644).[179] The largest employers in the MSA include Christus St. Michael Health System, Red River Army Depot, Cooper Tire & Rubber Company, Texarkana Independent School District, and Graphic Packaging.[180]

The following tables show the unemployment rate percentages for the bank's Texarkana AA, the counties that comprise the AA, and the states of Texas and Arkansas. As shown, unemployment rates in the AA were similar to unemployment rates for the state of Texas during the review period, but higher than unemployment rates for the state of Arkansas. The AA unemployment rate improved from 5.5 percent in 2021 to 4.0 percent in 2023. Meanwhile, the unemployment rate in the state of Texas improved from 5.6 percent to 4.0 percent, while the

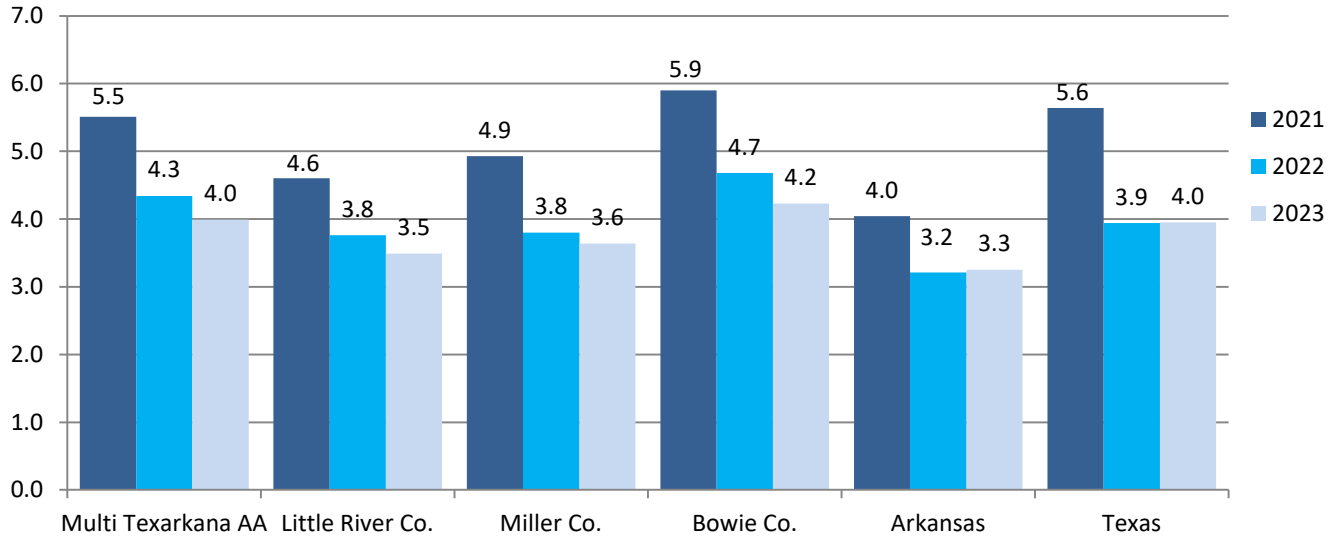
unemployment rate in the state of Arkansas improved from 4.0 percent to 3.3 percent. Bowie County had the highest unemployment rate during the review period, while Little River County had the lowest.

Unemployment Rates - Multi Texarkana



Not Seasonally Adjusted. Source: Bureau of Labor Statistics

Credit and CD Needs

To better understand the local landscape, information from a recently conducted interview with an individual engaged in Texarkana-area community and economic development was referenced. This individual discussed the various needs and opportunities across the region as well as how financial institutions can be responsive to local CD needs. The contact identified economic development and affordable housing as primary needs in the AA.

The contact stated that the AA is in a long-term trend of stagnation. The region's population continues to decrease. Although unemployment rates are relatively low, well-paying jobs are not in abundant supply. Increased economic development activity could bring additional residents and well-paying jobs to the area.

The contact also mentioned that the region has been somewhat insulated from the home price appreciation seen in many other parts of the country. Although housing values did increase during the review period, this increase was relatively modest. Nonetheless, the contact did mention that additional affordable housing supply for LMI residents is a high-priority community need.

CONCLUSIONS WITH RESPECT TO PERFORMANCE TESTS IN THE TEXARKANA MULTISTATE MSA

LENDING TEST

The Lending Test rating for the Texarkana Multistate MSA is Low Satisfactory. Lending levels reflect adequate responsiveness to credit needs of the AA. The geographic distribution of loans reflects adequate penetration throughout the AA and the distribution of loans reflects adequate penetration among borrowers of different

income levels and businesses of different revenue sizes. In addition, the bank made a low level of CD loans in the Texarkana multistate AA.

The analysis included 184 HMDA-reportable loans and 81 small business loans reported by the bank in the AA during the review period. Therefore, HMDA-reportable lending received greater weight in determining conclusions. Additionally, during 2021, 2022, and 2023, the bank originated or purchased 68 home refinance loans, 55 home purchase loans, and 38 home improvement loans in the AA. Thus, when considering HMDA-reportable loan categories, equal weight was assigned to home refinance loans and home purchase loans given their relative share of the total HMDA-reportable lending in this AA, followed by home improvement loans.

Details of the bank's mortgage and small business lending and information regarding lending by peers can be found in *Appendix F*.

Lending Activity

Lending activity is considered adequate. Overall, 0.1 percent of HMDA-reportable loans and 0.3 percent of small business loans were made in the AA. The percentage of the bank's HMDA-reportable and small business lending is consistent with the percentage of its area deposits.

Geographic Distribution of Loans

The geographic distribution of loans reflects adequate penetration throughout the AA. As described in the following sections, overall performance for HMDA-reportable lending is adequate and small business lending performance is good. Note that there was only one low-income tract in this AA in 2021 and only four low-income tracts in this AA in 2022 and 2023, and opportunities for lending are limited as reflected by demographic data and aggregate performance. Thus, lending in low-income tracts is not rated.

Home Refinance Loans

Home refinance lending in moderate-income tracts is adequate. In 2021, the bank made 15.8 percent of its home refinance loans in moderate-income tracts, which was above the percentage of owner-occupied units in these tracts (13.2 percent) and more than double aggregate performance of 6.7 percent. The bank made no home refinance loans in moderate-income tracts in 2022 despite opportunity for lending as reflected by demographic data and aggregate performance. However, in 2023, the bank made 11.8 percent of its home refinance loans in moderate-income tracts, which was similar to the percentage of owner-occupied units in these tracts (12.4 percent) and similar to aggregate performance (11.5 percent).

Home Purchase Loans

Home purchase lending in moderate-income tracts is adequate. In 2021, the bank made 14.8 percent of its home purchase loans in moderate-income tracts, which was above the percentage of owner-occupied units in these tracts (13.2 percent) and above aggregate performance of 11.8 percent. In 2022 and 2023, the bank made 7.1 percent of its home purchase loans in moderate-income tracts, which was below the percentage of owner-occupied units in these tracts (12.4 percent). In 2022, the bank's lending (6.3 percent) was below aggregate performance (14.1 percent) and in 2023, the bank's lending (8.3 percent) was below aggregate performance (13.8 percent).

Home Improvement Loans

Based on the low volume of loans made over the review period (six loans), home improvement lending in moderate-income tracts is adequate. In 2021, the bank made 16.7 percent of its home improvement loans in moderate-income tracts, which was above the percentage of owner-occupied units in these tracts (13.2 percent) and above aggregate performance of 12.5 percent. In 2022 and 2023, the bank made 15.4 percent of its home

improvement loans in moderate-income tracts, which was above the percentage of owner-occupied units in these tracts (12.4 percent). In 2022, the bank's lending (13.3 percent) was above aggregate performance (10.0 percent) and in 2023, the bank's lending (18.2 percent) was above aggregate performance (12.8 percent).

Small Business Loans
Small business lending in moderate-income tracts is good. In 2021, the bank made 27.3 percent of its small business loans in moderate-income tracts, which was above the percentage of total businesses located in these tracts (24.5 percent) and above aggregate performance of 18.0 percent. In 2022 and 2023, the bank made 18.9 percent of its small business loans in moderate-income tracts, which was above the percentage of total businesses located in these tracts (15.8 percent). In 2022, the bank's lending (21.4 percent) was above aggregate performance (15.7 percent) and in 2023, the bank's lending (17.4 percent) was above aggregate performance of 15.5 percent.

No conspicuous lending gaps were identified based on an analysis of the dispersion of the loan products reviewed. The bank had activity in over 70 percent of all census tracts throughout the review period. Furthermore, lending data and maps did not indicate an absence of loans across LMI tracts.

Lending to Borrowers of Different Incomes and Businesses of Different Sizes

The distribution of loans based on borrower income or gross annual revenues is adequate. As described in the following sections, overall performance for HMDA-reportable lending is good while small business lending performance is poor.

Home Refinance Loans
Home refinance lending to low-income borrowers is good. In 2021, the bank made 5.3 percent of its home refinance loans to low-income borrowers, which was below the percentage of low-income families (23.0 percent) but above aggregate performance of 2.8 percent. In 2022 and 2023, the bank made 20.0 percent of its home refinance loans to low-income borrowers, which was below the percentage of low-income families (22.0 percent). In 2022, the bank's lending (15.4 percent) was above aggregate performance (6.2 percent) and in 2023, the bank's lending (23.5 percent) was above aggregate performance (6.1 percent).

Home refinance lending to moderate-income borrowers is excellent. In 2021, the bank made 18.4 percent of its home refinance loans to moderate-income borrowers, which was above the percentage of moderate-income families (16.1 percent) and more than double aggregate performance of 7.4 percent. In 2022 and 2023, the bank made 23.3 percent of its home refinance loans to moderate-income borrowers, which was above the percentage of moderate-income families (17.3 percent). In 2022, the bank's lending (23.1 percent) was above aggregate performance (16.1 percent) and in 2023, the bank's lending (23.5 percent) was above aggregate performance (15.9 percent).

Home Purchase Loans
Home purchase lending to low-income borrowers is adequate, with the bank making six loans during the review period. In 2021, the bank made 14.8 percent of its home purchase loans to low-income borrowers, which was below the percentage of low-income families (23.0 percent) but above aggregate performance of 3.3 percent. In 2022 and 2023, the bank made 7.1 percent of its home purchase loans to low-income borrowers, which was below the percentage of low-income families (22.0 percent). When considering the low volume, the bank's lending (6.3 percent) was similar to aggregate performance (3.6 percent) in 2022. Similarly, in 2023, the bank's lending (8.3 percent) was similar to aggregate performance (3.6 percent).

Home purchase lending to moderate-income borrowers is excellent. In 2021, the bank made 44.4 percent of its home purchase loans to moderate-income borrowers, which was above the percentage of moderate-income families (16.1 percent) and above aggregate performance of 13.1 percent. In 2022 and 2023, the bank made 32.1 percent of its home purchase loans to moderate-income borrowers, which was above the percentage of moderate-income families (17.3 percent). In 2022, the bank's lending (37.5 percent) was more than double aggregate performance (15.0 percent) and in 2023, the bank's lending (25.0 percent) was nearly double aggregate performance (12.6 percent).

Home Improvement Loans

Home improvement lending to low-income borrowers is poor, with the bank making only one loan during the review period. In 2021, the bank's one home improvement loan to a low-income borrower was below the percentage of low-income families (23.0 percent) but similar to aggregate performance of 4.7 percent. The bank did not make any home improvement loans to low-income borrowers in 2022 or 2023 despite opportunities for lending as reflected by demographic data and aggregate performance.

Home improvement lending to moderate-income borrowers is good. In 2021, the bank made 16.7 percent of its home improvement loans to moderate-income borrowers, which was similar to the percentage of moderate-income families (16.1 percent) and above aggregate performance of 12.5 percent. In 2022 and 2023, the bank made 30.8 percent of its home improvement loans to moderate-income borrowers, which was above the percentage of moderate-income families (17.3 percent). In 2022, the bank's lending (33.3 percent) was more than double aggregate performance (14.3 percent) and in 2023, the bank's lending (27.3 percent) was above aggregate performance (19.8 percent).

Small Business Loans

Small business lending to businesses of different sizes is poor. In 2021, the bank made 68.2 percent of its small business loans to businesses with revenues of $1 million or less, which was below the percentage of total businesses with revenues of $1 million or less (91.0 percent). The bank's performance is above aggregate performance of 45.6 percent in 2021. However, 2021 was a year in which many banks extended PPP loans as a result of the COVID-19 pandemic and were not required to capture and report the revenue of the businesses, which is reflected in the aggregate data. As a result, performance context and loan size data were considered. In 2021, the bank made fewer loans of less than $250,000 to businesses (88.6 percent) compared to aggregate lenders (95.0 percent). In 2022 and 2023, the bank made 40.5 percent of its small business loans to businesses with revenues of $1 million or less, which was below the percentage of total businesses with revenues of $1 million or less (91.0 percent). In 2022, bank lending (50.0 percent) was below aggregate performance (53.5 percent) and in 2023, the bank's lending (34.8 percent) was below aggregate performance (54.8 percent).

CD Lending

The bank makes a low level of CD loans in the Texarkana Multistate AA. During the review period, the bank originated one qualified CD loan totaling $20,000 in the AA. The loan was a LOC for working capital to a nonprofit providing food to families qualifying for housing under HUD Section 8.

INVESTMENT TEST

The Investment Test rating for the Texarkana Multistate AA is High Satisfactory. The bank made a significant level of qualified CD investments and grants in the Texarkana multistate AA totaling $1.5 million. This amount includes one current period investment totaling $600,000, four prior period investments still outstanding with a balance of $801,800, and 31 donations totaling $116,500.

Investment types varied and addressed a range of CD needs. These include a CDFI investment to finance affordable housing and MBS supporting LMI borrowers. The bank made significant use of innovative and/or complex investments to support CD initiatives. Additionally, the bank exhibits good responsiveness to CD needs.

Examples of noteworthy investments and grants provided during the review period include:

- A $600,000 current period investment in a CDFI fund, used by the CDFI to provide financing for an affordable housing property in the AA.

- Five donations totaling $34,000 to an organization providing employment opportunities, day programs, and community homes for LMI individuals with intellectual and developmental disabilities.

SERVICE TEST

The Service Test rating for the Texarkana Multistate MSA is High Satisfactory. Regions Bank retail banking services were adequate in the AA and the bank is a leader in providing CD services.

Retail Banking Services

Retail service delivery systems are reasonably accessible to the bank's geographies and individuals of different income levels throughout the Texarkana AA. As the following tables show, the bank operated three branches in this AA during the review period. In 2021, the bank had one branch in a moderate-income tract but after the census changes in 2022, all of the bank's branches were in tracts classified as middle-income. By comparison, 21.6 percent of households and 25.1 percent of businesses are located in LMI tracts. While the bank does not have branches in LMI tracts, this is a small market for the bank and two of three branches are located on the border of moderate-income tracts, so they are reasonably accessible to households and businesses in these tracts. Regions did not open or close any branches during the review period.

Branch lobby and drive-through hours vary slightly across branches in Texarkana, but not in a way that inconveniences its AA, particularly LMI geographies and LMI individuals. Two branches are open from 9:00 a.m. to 5:00 p.m. each weekday, while one branch is open from 9:00 a.m. to 4:00 p.m. Monday through Thursday, and until 5:00 p.m. on Friday. The bank offers slightly longer hours for drive-through service at each branch. The bank also offers Saturday hours from 9:00 a.m. to 12:00 p.m. on Saturdays at two branches.

The tables below show the distribution of branches and ATMs along with households and businesses by tract category.

CD Services

The bank is a leader in providing CD services in the AA. During the review period, employees provided 128 CD service activities totaling 324 hours to 24 organizations operating throughout the AA. Staff provided financial services in a variety of ways, including financial education, service on the board of directors and other advisory committees for nonprofit organizations, and providing various types of technical assistance to nonprofit and government agencies engaged in CD.

Noteworthy CD services include:

- Several staff members provided 138 hours of service to a local housing nonprofit offering a variety of services to LMI individuals, including education and homeownership assistance and affordable housing construction and rehabilitation for LMI individuals. Staff members served on the board and other

committees for the organization, as well as providing financial education for the clients served by the organization.

- One employee served on the board for a foundation that provides grants to local nonprofit organizations that primarily serve LMI individuals.

- Employees provided 83 hours of financial education instruction to 16 different entities in the AA, including nonprofit organizations that serve a majority of LMI individuals and employers that have a majority of workers that would be considered LMI.

COLUMBUS GA-AL MULTISTATE MSA

CRA RATING FOR COLUMBUS GA-AL MULTISTATE[181]: SATISFACTORY

The Lending Test is rated: **Low Satisfactory**
The Investment Test is rated: **Outstanding**
The Service Test is rated: **Low Satisfactory**

Major factors contributing to this rating include:

- The geographic distribution of loans reflects adequate penetration throughout the multistate AA.
- The distribution of borrowers reflects adequate penetration throughout the multistate AA.
- The bank made few, if any CD loans in the Columbus Multistate MSA.
- The bank made an excellent level of qualified CD investments and grants in the Columbus Multistate AA.
- Retail banking services, which includes accessibility of delivery systems, changes in branch locations, and reasonableness of hours and services, are poor.
- The bank provides an adequate level of CD service activities in the Columbus Multistate MSA.

SCOPE OF EXAMINATION

The time period, products, and affiliates evaluated for the Columbus Multistate AA are consistent with the overall scope described in the Description of the Institution section of this report. Regions' performance in the Columbus Multistate AA was evaluated using full-scope examination procedures.

DESCRIPTION OF INSTITUTION'S OPERATIONS IN THE COLUMBUS MULTISTATE MSA

Overview

The Columbus AA includes Russell County Alabama and Muscogee County Georgia, which are two of the seven counties that comprise the Columbus, Georgia-Alabama MSA. As of December 31, 2023, the bank operated three branches in the AA, representing 0.2 percent of the bank's total branches. Of the branches in the AA, one is in a low-income census tract, one is in a middle-income census tract, and one is in an upper-income census tract.

The AA is a somewhat competitive banking market with several local, regional, and national institutions operating in the area and several local and regional institutions with headquarters in the area. According to the FDIC Summary of Deposits Report as of June 30, 2023, there were 12 depository institutions operating 39 branches in the AA. Regions ranked 6th in deposit market share with 2.8 percent of total deposits ($229 million). Synovus had the largest deposit market share with 58.5 percent, followed by Truist Bank and Wells Fargo Bank with 13.8 percent and 12.1 percent, respectively.

[181] This rating reflects performance within the multistate MSA. The statewide evaluations are adjusted and do not reflect performance in the parts of those states contained within the multistate MSA.

For HMDA-reportable lending, Regions originated and/or purchased 0.5 percent, 0.6 percent, and 0.7 percent of total HMDA-reportable loans in the AA in 2021, 2022 and 2023, respectively. Regions was ranked 35th out of 335 reporters in 2021; 34th out of 311 reporters in 2022; and 32nd out of 275 reporters in 2023. Rocket Mortgage (formally known as Quicken Loans) was the top HMDA reporter in the market in 2021, while Synovus Bank was the top HMDA reporter in 2022 and 2023.

For small business lending, Regions ranked 17th out of 93 reporters in 2021 with 1.3 percent of small business loans. In 2022, the bank ranked 29th out of 79 reporters with 0.1 percent of total small business loans. In 2023, Regions ranked 21st out of 74 reporters with 0.4 percent of total small business loans. American Express was the top small business reporter in the market for 2021, 2022, and 2023.

AA Demographics, Population, and Income Characteristics

The AA is located on the western boarder of central Georgia and Alabama and has a total population of 266,105 residents. The individual counties within the AA vary in size; Russell County, AL has a population of 59,183 and Muscogee County, GA has a population of 206,922.

The AA contains 77 census tracts: 11 low-income tracts (14.3 percent), 24 moderate-income tracts (31.2 percent), 21 middle-income tracts (27.3 percent), 19 upper-income tracts (24.7 percent), and two unknown-income tracts (2.6 percent).

For purposes of classifying borrower income, this evaluation uses the FFIEC estimated median family income for the relevant area. As the following table shows, the median family income increased from $60,900 in 2021 to $71,100 in 2023.

Borrower Income Levels
Columbus, GA-AL MSA

FFIEC Estimated Median Family Income		Low 0 - 49.99%	Moderate 50% - 79.99%	Middle 80% - 119.99%	Upper 120% - & above
2021	**$60,900**	0 - $30,449	$30,450 - $48,719	$48,720 - $73,079	$73,080 - & above
2022	**$67,500**	0 - $33,749	$33,750 - $53,999	$54,000 - $80,999	$81,000 - & above
2023	**$71,100**	0 - $35,549	$35,550 - $56,879	$56,880 - $85,319	$85,320 - & above

There were 59,905 total families in the AA; 25.6 percent were low-income, 16.1 percent were moderate-income, 19.1 percent were middle-income, and 39.1 percent were upper income. Of these families, 15.3 percent had incomes below the poverty level, which was higher than the 11.6 and 10.6 percent poverty levels for the states of Alabama and Georgia, respectively. Additionally, poverty rates are higher in LMI tracts, with 41.2 percent of the families residing in low-income tracts and 21.7 percent of the families residing in moderate-income tracts living below the poverty level. Additionally, 37.0 percent of low-income families and 39.2 percent of moderate-income families reside in moderate-income tracts.

Housing Characteristics

There are 112,924 total housing units in the AA, of which 44.7 percent are owner-occupied, 41.5 percent are rental units, and 13.8 percent are vacant. Fewer home ownership opportunities exist in low-income tracts as only 22.2 percent of housing units in low-income tracts are owner-occupied.

The median age of housing stock across the AA was 46 years, which is older than the median age of the housing stock for the state of Alabama (36 years) and for the state of Georgia (31 years). Housing units in LMI census tracts were older, with a median age of 58 years in low-income tracts and 54 years in moderate-income tracts. The older age of homes is an indicator of potential opportunity for home improvement loans in LMI tracts.

The median housing value across the AA is $137,786, which is lower than the median housing value in Alabama ($149,600) and Georgia ($190,200). Median gross rent in the AA was $902 per month, which is higher than the median gross rent in Alabama ($811 per month) but lower than the median gross rent in Georgia ($1,042 per month). Housing cost burden is a challenge in the AA. The percentage of renters with rent costs greater than 30 percent of income is 45.3 percent, which is higher than both Alabama (39.2 percent) and Georgia (43.3 percent).

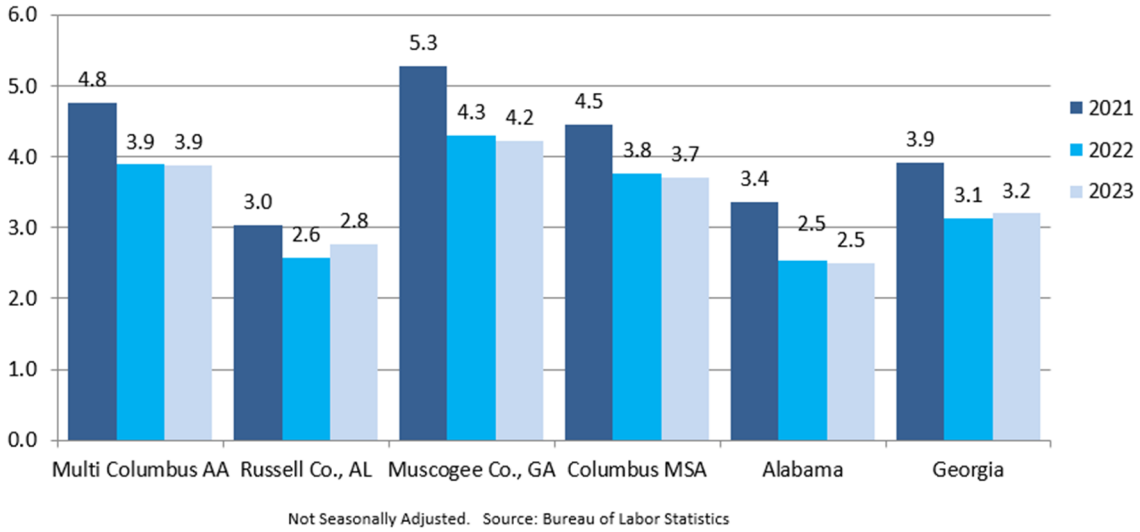
Housing data suggests that housing costs (median housing value) are lower in the AA than in both Alabama and Georgia. However, the AA has relatively low homeownership rates and a high share of cost burdened renters and owners.

Economic Conditions

Several large corporations are headquartered in the AA, including Synovus Financial Corporation, Aflac, and Total System Services Inc. According to the Bureau of Labor Statistics during the first quarter of 2023, the largest industries in the AA by number of employees include government (20,339), healthcare and social assistance (14,849), and accommodation and food services (12,339). Major employers in the area include the aforementioned companies, as well as US Army training base Fort Moore, healthcare provider Piedmont Columbus Regional, and the Pratt & Whitney Engine Center.[182]

The following table shows the unemployment rate percentages for the Columbus AA, the states that comprise the AA, and the states of Alabama and Georgia. As shown, unemployment rates in the AA were higher than unemployment rates for the states of Alabama and Georgia. The AA unemployment rate improved from 4.8 percent in 2021 to 3.9 percent in 2023, while Alabama's unemployment rate dropped from 3.4 to 2.5 percent and Georgia's unemployment rate dropped from 3.9 to 3.2 percent. Russell County, AL had the lowest unemployment rate during the review period, while Muscogee County, GA had the highest.

Unemployment Rates - Multi Columbus



Not Seasonally Adjusted. Source: Bureau of Labor Statistics

Credit and CD Needs

As part of the CRA examination, information from three recently conducted interviews with contacts engaged in Columbus-area workforce development, affordable housing, and economic development were referenced. A contact employed by a community and workforce development organization described the community as stable. The contact shared that there is a need for moderate-income housing and infrastructure improvements to the region. Additionally, the contact highlighted opportunities for financing from banks for both first-time homebuyer programs and small dollar loan programs.

According to a local affordable housing contact, conditions have not changed or improved a great deal over the last twenty years in Columbus. The contact spoke of limited quality affordable housing stock and mentioned Columbus' abundance of substandard housing and slum properties. The contact also stated that affordable housing is difficult to find in Columbus, with LMI families limited to either being cost-burdened by high rents or living in slum properties. It was noted that there is an abundance of luxury condos, multifamily, and single-family homes, but apartments are relatively new to the market. The contact stated that there is significant attention and development by wealthy investors and banks in Columbus's Mill district, which has started seeing a reduction in substandard housing. Another unique characteristic of Columbus is its large veteran population, which has led to transient families that become absentee landlords. Finally, the contact mentioned that gap financing is a new tool they are seeking from banks, but banks have tended to be slow to innovate.

A contact from an economic development organization suggested that community and regional banks are doing an excellent job fulfilling small business credit needs in the area, while participation from large and national banks is limited. The contact also indicated a need for more capital in general for businesses in the area as a great need and believes that banks could do more to encourage an entrepreneurial culture by providing technical assistance and education.

Based on the conversations with these CD contacts, opportunities are available in the AA for banks, including engaging with nonprofit and local organizations supporting and developing affordable housing as well as small business and entrepreneurship. There is a desire for more innovative financing practices to be adopted and tested out in this market, as well as a desire for larger institutions to engage.

CONCLUSIONS WITH RESPECT TO PERFORMANCE TESTS IN THE COLUMBUS MULTISTATE MSA

LENDING TEST

The Lending Test rating for the Columbus Multistate MSA is Low Satisfactory. Lending levels reflect adequate responsiveness to credit needs of the AA. The geographic distribution of loans reflects adequate penetration throughout the AA and the distribution of loans reflects adequate penetration among borrowers of different income levels and businesses of different revenue sizes. In addition, the bank made few, if any CD loans in the Columbus multistate AA.

The analysis included 120 HMDA-reportable loans and 86 small business loans reported by the bank in the AA during the review period. With volumes of the two products being similar, they received equal weight in determining conclusions in the AA. Additionally, during 2021, 2022, and 2023, the bank originated or purchased 37 home improvement loans, 36 home refinance loans, and 28 home purchase loans in the AA. Thus, because volumes are substantially similar, equal weight was given to each category in determining conclusions.

Details of the bank's mortgage and small business lending and information regarding lending by peers can be found in *Appendix F.*

Lending Activity

Lending activity is considered adequate. Overall, 0.1 percent of HMDA-reportable loans and 0.1 percent of small business loans were made in the AA. The percentage of the bank's HMDA-reportable and small business lending is consistent with the percentage of its area deposits.

Geographic Distribution of Loans

The geographic distribution of loans reflects adequate penetration throughout the AA. As described in the following sections, overall performance for HMDA-reportable lending is adequate and small business lending performance is adequate. Note that opportunities for HMDA-reportable lending in low-income tracts are limited as reflected by demographic data and aggregate performance. Thus, HMDA-reportable lending in low-income tracts is not rated.

Home Purchase Loans

Home purchase lending in moderate-income tracts is adequate. In 2021, the bank made 50.0 percent of its home purchase loans in moderate-income tracts, which was above the percentage of owner-occupied units in these tracts (27.9 percent) and more than double aggregate performance of 17.9 percent. However, bank performance declined in 2022 and 2023. In 2022, the bank made no home purchase loans in moderate-income tracts despite ample opportunities for lending as reflected by demographic data and aggregate performance. When considering low volume in 2023, the bank's one home purchase loan in a moderate-income tract was similar to the percentage of owner-occupied units in these tracts (27.1 percent) and similar to aggregate performance (21.2 percent).

Home Refinance Loans

Home refinance lending in moderate-income tracts is adequate. In 2021, the bank made 26.3 percent of its home refinance loans in moderate-income tracts, which was below the percentage of owner-occupied units in these tracts (27.9 percent) but above aggregate performance of 14.8 percent. In 2022 and 2023, the bank made 23.5 percent of its home refinance loans in moderate-income tracts, which was below the percentage of owner-occupied units in these tracts (27.1 percent). In 2022, the bank's lending (12.5 percent) was below aggregate performance (18.1 percent) but in 2023, the bank's lending (33.3 percent) was above aggregate performance (22.6 percent).

Home Improvement Loans

Home improvement lending in moderate-income tracts is good. In 2021, the bank made 30.8 percent of its home improvement loans in moderate-income tracts, which was above the percentage of owner-occupied units in these tracts (27.9 percent) and above aggregate performance of 14.0 percent. In 2022 and 2023, the bank made 41.7 percent of its home improvement loans in moderate-income tracts, which was above the percentage of owner-occupied units in these tracts (27.1 percent). In 2022, the bank's lending (28.6 percent) was above aggregate performance (17.0 percent) and in 2023, the bank's lending (60.0 percent) was above aggregate performance (16.7 percent).

Small Business Loans

Small business lending in low-income tracts is good. In 2021, the bank made 9.4 percent of its small business loans in low-income tracts, which matched the percentage of total businesses located in these tracts and was above aggregate performance of 7.4 percent. In 2022 and 2023, the bank made 22.7 percent of its small business loans in low-income tracts, which was above the percentage of total businesses located in these tracts (8.6 percent). In

2022, the bank's lending (20.0 percent) was above aggregate performance (7.1 percent) and in 2023, the bank's lending (23.5 percent) was above aggregate performance of 6.5 percent.

Small business lending in moderate-income tracts is poor. In 2021, the bank made 26.6 percent of its small business loans in moderate-income tracts, which was above the percentage of total businesses located in these tracts (23.3 percent) and above aggregate performance of 22.7 percent. However, performance declined in 2022 and 2023, with the bank making 13.6 percent of its small business loans in moderate-income tracts, which was below the percentage of total businesses located in these tracts (24.5 percent). In 2022, the bank's lending (20.0 percent) was similar too aggregate performance (20.9 percent) and in 2023, the bank's lending (11.8 percent) was below aggregate performance of 20.9 percent.

No conspicuous lending gaps were identified based on an analysis of the dispersion of the loan products reviewed. The bank had activity in 50 percent of all census tracts throughout the review period. Furthermore, lending data and maps did not indicate an absence of loans across LMI tracts.

Lending to Borrowers of Different Incomes and Businesses of Different Sizes

The distribution of loans based on borrower income or gross annual revenues is adequate. As described in the following sections, overall performance for HMDA-reportable lending is adequate while small business lending performance is good.

Home Purchase Loans

Home purchase lending to low-income borrowers is adequate, with the bank making six loans during the review period. In 2021, the bank made 35.7 percent of its home purchase loans to low-income borrowers, which was above the percentage of low-income families (23.8 percent) and above aggregate performance of 4.1 percent. Bank performance declined in 2022 and 2023, with the bank making no home purchase loans to low-income borrowers in 2022 despite opportunities for lending as reflected by demographic data and aggregate performance. In 2023, the bank made 20.0 percent of its home purchase loans to low-income borrowers, which was below the percentage of low-income families (25.6 percent) but above aggregate performance (3.3 percent).

Home purchase lending to moderate-income borrowers is good, with the bank making eight loans during the review period. In 2021, the bank made 28.6 percent of its home purchase loans to moderate-income borrowers, which was above the percentage of moderate-income families (18.3 percent) and above aggregate performance of 15.4 percent. In 2022 and 2023, the bank made 28.6 percent of its home purchase loans to moderate-income borrowers, which was above the percentage of moderate-income families (16.1 percent). In 2022, the bank's lending (33.3 percent) was above aggregate performance (13.2 percent) and in 2023, the bank's lending (20.0 percent) was above aggregate performance (12.9 percent).

Home Refinance Loans

Home refinance lending to low-income borrowers is good. In 2021, the bank made 21.1 percent of its home refinance loans to low-income borrowers, which was below the percentage of low-income families (23.8 percent) but above aggregate performance of 3.2 percent. In 2022 and 2023, the bank made 41.2 percent of its home refinance loans to low-income borrowers, which was above the percentage of low-income families (25.6 percent). In 2022, the bank's lending (25.0 percent) was above aggregate performance (6.3 percent) and in 2023, the bank's lending (55.6 percent) was above aggregate performance (6.8 percent).

Home refinance lending to moderate-income borrowers is adequate. In 2021, the bank made 15.8 percent of its home refinance loans to moderate-income borrowers, which was below the percentage of moderate-income families (18.3 percent) and above aggregate performance of 8.6 percent. In 2022 and 2023, the bank made

17.6 percent of its home refinance loans to moderate-income borrowers, which was above the percentage of moderate-income families (16.1 percent). In 2022, the bank's lending (25.0 percent) was above aggregate performance (14.8 percent) and in 2023, the bank's lending (11.1 percent) was similar to aggregate performance (11.9 percent).

Home Improvement Loans

Home improvement lending to low-income borrowers is adequate based on low volume with the bank making five loans during the review period. In 2021, the bank made 15.4 percent of its home improvement loans to low-income borrowers, which was below the percentage of low-income families (23.8 percent) but above aggregate performance of 7.9 percent. In 2022 and 2023, the bank made 12.5 percent of its home improvement loans to low-income borrowers, which was below the percentage of low-income families (25.6percent). In 2022, the bank's lending (14.3 percent) was above aggregate performance (8.5 percent) and in 2023, the bank's lending (10.0 percent) was above aggregate performance (4.2 percent).

Home improvement lending to moderate-income borrowers is adequate, with the bank making nine loans during the review period. In 2021, the bank made 15.4 percent of its home improvement loans to moderate-income borrowers, which was below the percentage of moderate-income families (18.3 percent) and above aggregate performance of 10.5 percent. In 2022 and 2023, the bank made 29.2 percent of its home improvement loans to moderate-income borrowers, which was above the percentage of moderate-income families (16.1 percent). In 2022, the bank's lending (28.6 percent) was above aggregate performance (13.9 percent) and in 2023, the bank's lending (30.0 percent) was above aggregate performance (15.6 percent).

Small Business Loans

Small business lending to businesses of different sizes is good. In 2021, the bank made 85.9 percent of its small business loans to businesses with revenues of $1 million or less, which was below the percentage of total businesses with revenues of $1 million or less (92.2 percent). Bank performance is above aggregate performance of 42.5 percent in 2021. However, 2021 was a year in which many banks extended PPP loans as a result of the COVID-19 pandemic and were not required to capture and report the revenue of the businesses, which is reflected in the aggregate data. As a result, performance context and loan size data were considered. In 2021, the bank made loans of less than $250,000 to businesses at a greater rate (98.4 percent) compared to aggregate lenders (96.1 percent). In 2022 and 2023, the bank made 59.1 percent of its small business loans to businesses with revenues of $1 million or less, which was below the percentage of total businesses with revenues of $1 million or less (92.5 percent). In 2022, bank lending (60.0 percent) was above aggregate performance (46.9 percent) and in 2023, the bank's lending (58.8 percent) was above aggregate performance (48.4 percent). Moreover, nearly all of the bank's small business loans were originated in amounts of $250,000 or less, indicating a willingness to lend in the smaller amounts that are typically requested by small businesses.

CD Lending

The bank makes few, if any CD loans in the Columbus Multistate AA. During the review period, the bank made no qualifying CD loans in the AA.

INVESTMENT TEST

The Investment Test rating for the Columbus Multistate AA is Outstanding. The bank made an excellent level of qualified CD investments and grants in the Columbus Multistate AA, totaling $11.5 million. This amount includes two current period investments totaling $591,300, three prior period investments still outstanding with a balance of $10.9 million, and nine donations totaling $10,800.

Investment types varied and addressed an excellent range of CD needs. These include investments in LIHTC projects to address affordable housing challenges and MBS supporting LMI borrowers. The bank made extensive use of innovative and/or complex investments to support CD initiatives. Additionally, the bank exhibits excellent responsiveness to CD needs.

Examples of noteworthy investments and grants provided during the review period include:

- Two current period MBS pools totaling $591,300 to support LMI borrowers.
- One prior period LIHTC of $10.7 million, supporting the building of 132 new units of affordable housing for LMI individuals and families.
- Three donations totaling $5,800 to support an after-school program that primarily benefits LMI youth.

SERVICE TEST

The Service Test is rated Low Satisfactory for the Columbus Multistate AA. Retail banking services were poor in the AA and the bank provided an adequate level of CD services.

Retail Banking Services

Retail service delivery systems are unreasonably inaccessible to portions of the bank's geographies and individuals of different income levels throughout the Columbus Multistate AA. In deriving this conclusion, the distribution of the bank's branches by census tract income level was compared to the distribution of households and businesses among the tract categories in the AA. As the following tables show, the bank operated three branches and ATMs in this AA during the review period, with one branch (33.0 percent of total branches) in a low-income tract and no branches in moderate-income tracts. The percentage of branches in low-income tracts exceeds the percentage of households (8.5 percent) and the percentage of businesses (8.6 percent) in those tracts. While the bank has no branches in moderate-income tracts, 29.3 percent of households and 24.5 percent of businesses are located in these tracts, indicating that there is demand for branches in these tracts. Accessibility to retail delivery systems is particularly limited for LMI tracts in Muscogee County. Regions did not open or close any branches during the review period.

The bank's branch lobby hours vary in a way that inconveniences portions of its AA, particularly LMI geographies and individuals. Weekday branch lobby and drive-through hours are consistent, opening at 9 a.m. and closing at 5:00 p.m. However, the bank only offers weekend hours at the branch located in an upper-income tract in Columbus, GA which particularly inconveniences residents of the Alabama portion of the AA, who would have to cross the state line for weekend lobby hours.

The tables below show the distribution of branches and ATMs along with households and businesses by tract category.

CD Services

The bank provides an adequate level of CD services in the AA given the bank's limited presence. During the review period, employees provided 36 CD service activities totaling 343 hours to seven organizations operating throughout the AA. Bank staff provided financial services in a variety of ways, including financial education and service on the board of directors for nonprofit organizations. The largest concentration of hours included board service with two nonprofit organizations, including one that provides services to LMI youth and one that assists youth who are victims of abuse.

UTAH

CRA RATING FOR UTAH: Outstanding

The following table shows the annual performance levels and overall CRA rating for the Salt Lake City AA with respect to the performance goals outlined in the bank's CRA Strategic Plan.[183]

Utah			
Performance Goals	**Performance Levels Met by Year**		
	Goal Not Met	**Satisfactory**	**Outstanding**
Qualified Investments		2023	2022, 2024
Qualified Grants			2022, 2023, 2024
Qualified Service Hours	2022	2023	2024
Overall Rating	**OUTSTANDING**		

The factors supporting the Utah rating are as follows:

- The bank made an outstanding level of qualified CD investments in 2022 and 2024 and a satisfactory level in 2023. The bank's efforts primarily targeted investments in SBICs that provide capital to small businesses and investments in MBS that promote affordable housing for LMI individuals.

- The bank made an outstanding level of qualified CD donations and grants in 2022, 2023, and 2024. The bank's donations were made to organizations that promote community service, affordable housing, and economic development needs of LMI individuals.

- Qualified CD services goals were not met in 2022 because most of the bank's staff in the Utah office were heavily involved with the transition after the Regions Bank acquisition of EnerBank. However, qualified service hours increased after the year of transition. In 2023, the bank provided a satisfactory level of CD services. In 2024 the bank provided an outstanding level of CD services. During the review period, the bank primarily engaged in qualified service activities focused on financial education for LMI youth and individuals, free tax assistance for LMI individuals, and board service for nonprofit organizations that provide affordable housing and CD targeted to LMI individuals.

SCOPE OF EXAMINATION

CRA performance in Utah used the Strategic Plan procedures for the Salt Lake City AA, which is the only AA in the state. The bank's 2021-2024 Strategic Plan was originally approved by the FDIC under the name of EnerBankUSA. Regions Bank acquired EnerBankUSA on October 1, 2021 and the Plan was approved by the Board of Governors of the Federal Reserve System on January 18, 2022. The Plan includes the following three performance goals for each year of the review period (2022, 2023, and 2024):

- Qualified Investments
- Qualified Grants
- Qualified Service Hours

[183] The goals are outlined in the EnerBankUSA Community Reinvestment Act Strategic Plan – Salt Lake AA ONLY January 1, 2021 through December 31, 2024.

The Plan establishes measurable levels of performance for each goal tied to performance ratings. See the Conclusions with Respect to Performance Goals in the Salt Lake City AA section for additional details and ratings.

DESCRIPTION OF INSTITUTION'S OPERATIONS IN THE SALT LAKE CITY AA

Overview

The Salt Lake City AA includes only Salt Lake County, which is one of the two counties that comprise the Salt Lake City, UT MSA. As of December 31, 2023, the bank operated one branch in the AA. This was the only branch operated by the bank in the state of Utah. The branch is an Operations Center which accepts employee deposits but does not accept deposits from the public. As such, deposits held at this branch were minimal.

The Salt Lake City AA is a competitive banking market where national, regional, and local banks have a presence. According to the FDIC Summary of Deposits Report as of June 30, 2023, there were 47 institutions operating 200 branches inside the AA. Banks with the largest deposit market share in the AA include Morgan Stanley Bank (19.5 percent), Ally Bank (17.7 percent), and American Express National Bank (15.1 percent). Regions Bank ranked last in deposit market share, with a small dollar volume due to only accepting employee deposits at this location.

Regions Bank is also a very small contributor to the HMDA-reportable and small business lending markets in the Salt Lake City AA. During the 2021-2023 review period, the bank made nine total HMDA-reportable loans and 51 total small business loans in the AA. Due to minimal lending and only accepting employee deposits, this AA and the state of Utah are weighted minimally in the institution's overall ratings.

AA Demographics, Population, and Income Characteristics

The AA population was 1,185,813 as of July 1, 2023.[184] This represented less than 0.1 percent growth since the 2020 census.[185] During the same period, the statewide population in Utah increased 4.5 percent.[186]

During 2021, the AA contained 212 census tracts: seven low-income tracts (3.3 percent), 51 moderate-income tracts (24.1 percent), 86 middle-income tracts (40.6 percent), 65 upper-income tracts (30.7 percent), and three unknown-income tracts (1.4 percent). For 2022 and 2023, a census tract remapping changed this distribution. The total census tracts in the AA increased to 251: five low-income tracts (2.0 percent), 56 moderate-income tracts (22.3 percent), 115 middle-income tracts (45.8 percent), 71 upper-income tracts (28.3 percent), and four unknown-income tracts (1.6 percent).

For purposes of classifying borrower income, this evaluation uses the FFIEC estimated median family income for the Salt Lake City AA. The table below provides a breakdown of the estimated annual family income for each income category (low, moderate, middle, and upper) in the MSA. As shown, median family income increased 15.9 percent during the review period, from $91,700 in 2021 to $106,300 in 2023.

[184] "QuickFacts." *United States Census Bureau*, https://www.census.gov/quickfacts/fact/table/UT,saltlakecountyutah,US/PST045224. Accessed 14 Jan. 2025.
[185] Ibid.
[186] Ibid.

Borrower Income Levels
Salt Lake City, UT MSA

FFIEC Estimated Median Family Income		Low 0 - 49.99%	Moderate 50% - 79.99%	Middle 80% - 119.99%	Upper 120% - & above
2021	**$91,700**	0 - $45,849	$45,850 - $73,359	$73,360 - $110,039	$110,040 - & above
2022	**$102,200**	0 - $51,099	$51,100 - $81,759	$81,760 - $122,639	$122,640 - & above
2023	**$106,300**	0 - $53,149	$53,150 - $85,039	$85,040 - $127,559	$127,560 - & above

As of 2023, there were 265,385 total families in the AA; 17.8 percent were low-income, 19.1 percent were moderate-income, 23.4 percent were middle-income, and 39.7 percent were upper-income. Of these families, 5.6 percent of families had incomes below the poverty level, which was lower than the 9.1 percent statewide level in Utah. However, poverty rates were elevated in LMI tracts, with 15.8 percent of families in low-income tracts and 11.7 percent of families in moderate-income tracts living below the poverty level.

Housing Characteristics

As of 2023, there were 404,550 housing units in the AA. Of these units, 64.0 percent were owner-occupied, 30.8 percent were rental units, and 5.2 percent were vacant. Homeownership rates in low-income and moderate-income tracts were lower, at 23.6 percent and 47.3 percent, respectively.

The median age of housing stock across the AA was 42 years, which was 11 years older than the statewide median in Utah. Moderate-income tracts had the oldest median housing stock at 49 years. The relatively old age of homes is an indicator of opportunity for home improvement loans in the AA including in moderate-income tracts.

The median housing value in the AA was approximately flat during the review period. In January 2021, the median home listing price in Salt Lake County was $600,000.[187] As of December 2023, the median home listing price had fallen slightly to $590,000.[188] Nonetheless, housing continues to be unaffordable in the AA. Using the assumption that a borrower can obtain a mortgage for approximately three times their annual income and using the 2023 FFIEC median family income for LMI families in the MSA, affordable homes would be less than $159,447 for low-income families and less than $255,117 for moderate-income families.[189] As such, much of the available housing supply in the AA is out of reach for LMI residents.

Rental prices are also elevated in the AA. According to FFIEC Census data, median gross rent in the AA is $1,176, which is higher than the Utah statewide median of $1,090 per month. Moreover, 43.1 percent of renters in the AA are cost-burdened (defined as spending more than 30 percent of their gross income on rent). This level is also higher than the Utah statewide level of 42.1 percent.

Economic Conditions

The AA has a robust economy which offers a variety of employment opportunities to local residents. As of Q1 2023, total employment in the AA was 774,855.[190] Industries employing the most residents included government,

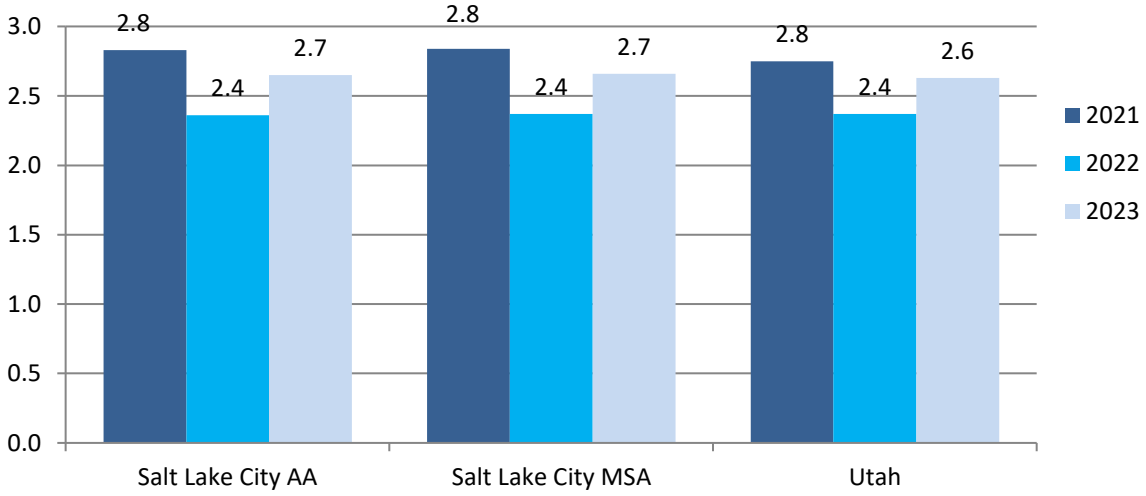
[188] Ibid.
[189] This calculation uses 2023 FFIEC income classifications for the assessment area. Incomes for low-income families range from $0-$53,149 and incomes for moderate income families range from $53,150 to $85,039.
[190] "Quarterly Census of Employment and Wages." *Bureau of Labor Statistics(BLS)*

professional and technical services, retail trade, healthcare/social assistance, and manufacturing.[191] The largest organizations by number of employees include the University of Utah, Intermountain Health Care, and the State of Utah government.[192]

The following table shows the unemployment rate percentages for the bank's Salt Lake City AA, the MSA, and the state of Utah overall. As shown, the unemployment rate in the AA was similar to the overall unemployment rate in the state of Utah during the review period. During the review period, the AA's unemployment rate dropped from 2.8 percent in 2021 to 2.7 percent in 2023. During the same timeframe, Utah's unemployment rate dropped from 2.8 percent in 2021 to 2.6 percent in 2023. These trends attest to the strength of the labor market in this AA and the state of Utah overall.

Unemployment Rates - UT Salt Lake City



Not Seasonally Adjusted. Source: Bureau of Labor Statistics

Credit and CD Needs

As part of the CRA examination, information from a recently conducted interview with a local economic development practitioner was referenced. This economic development professional mentioned that local economic conditions are strong. The Salt Lake City metro has one of the fastest growing economies in the nation. A well-diversified labor market led by higher education, healthcare, financial services, government, and information technology continues to drive low unemployment rates.

This contact also emphasized the effect of continued in-migration patterns in the area. Although this population inflow contributes to strong economic conditions, it also exacerbated a housing shortage and resulted in dramatically higher cost of living. There is an under-supply of both market rate housing and restricted affordable housing, which is especially harming LMI households. According to the contact, it could take years before the area's housing market is back in balance.

The economic development practitioner mentioned there is an opportunity for the financial industry to be more involved in small business technical assistance. The contact also mentioned that due to the recent cost of living

challenges, affordable mortgage products and HELOCs to fund improvements of existing homes are primary credit needs in the AA.

CONCLUSIONS WITH RESPECT TO PREFORMANCE GOALS IN THE SALT LAKE CITY AA

Regions Bank carried over a Strategic Plan from its acquisition of EnerBank by which its CRA performance in the Salt Lake City AA is to be evaluated. The bank established measurable levels of performance that are evaluated against annualized goals for years 2022, 2023, and 2024 to achieve either a Satisfactory or an Outstanding rating. Any performance below the Satisfactory goal is described as "Goal Not Met." As a part of the Strategic Plan approval process, the goals were determined to be reasonable relative to the bank's capacity and the needs of the AA compared to banks with similar CRA Strategic Plans.

Regions' CRA rating reflects Outstanding performance in helping to meet the credit needs of the Salt Lake City AA in a manner consistent with the goals established by its Strategic Plan. For 2022, the bank did not meet its goal for qualified service hours but exceeded its Outstanding goal for both qualified investments and qualified grants. In 2023, the bank exceeded its Satisfactory goals for qualified investments and qualified service hours and exceeded its Outstanding goal for qualified grants. In 2024, the bank exceeded its Outstanding goals for all three criteria (investments, grants, and service hours). Details of the bank's goals and performance are provided in the following sections.

Qualified Investments

Community Development Investments				
	Bank-Established Goals		Bank Actual Performance	Conclusion
Plan Year	Satisfactory Investment Goals	Outstanding Investment Goals	Qualified Investments	
2022	$14.3 million	$17.5 million	35.3 million	Outstanding
2023	$16.8 million	$20.5 million	19.4 million	Satisfactory
2024	$24.6 million	$30.1 million	34.7 million	Outstanding

As shown in the table above, the bank's total dollar of qualified CD investments represents Outstanding performance for 2022 and 2024 and Satisfactory performance for 2023. CD investments were largely targeted to investments in SBICs that provide capital to small businesses and in affordable housing for LMI individuals, primarily through investments in MBS. Notable CD investments made throughout the entire review period are detailed below:

- Four MBS investments totaling $72.9 million benefiting affordable housing projects within the AA.
- Eleven investments totaling $16.4 million promoting economic development by financing small businesses through SBICs.

Qualified Grants

Community Development Grants				
Plan Year	Bank-Established Goals		Bank Actual Performance	Conclusion
	Satisfactory Grant Goals	Outstanding Grant Goals	Qualified Grants	
2022	$65,000	$85,000	$85,000	Outstanding
2023	$70,000	$90,000	$125,000	Outstanding
2024	$75,000	$95,000	$95,000	Outstanding

As shown in the table above, the bank's total dollar of qualified CD grants represent outstanding performance in each year of the review period. The bank directed much of its donation funding to specifically target community service, affordable housing, and economic development needs of LMI individuals. The examples below highlight notable donations/grants made by the bank throughout the entire review period:

- Four donations totaling $47,500 were made to organizations providing HUD-approved homebuyer and financial education training to LMI individuals;
- Nineteen donations totaling $198,500 were made to various nonprofit organizations supporting community services such as education and workforce development for LMI women; free income tax assistance, and financial literacy for LMI individuals.
- Six donations totaling $59,000 were made to small businesses to promote entrepreneurship, some focusing on minority and underserved populations.

Qualified Service Hours

Community Development Service Hours				
Plan Year	Bank-Established Goals		Bank Actual Performance	Conclusion
	Satisfactory Service Hours	Outstanding Service Hours	Qualified Service Hours	
2022	1,473	1,705	1,087	Goal Not Met
2023	1,482	1,716	1,642	Satisfactory
2024	1,667	1,931	2,047	Outstanding

As shown in the table above, the bank did not meet their CD service hours goals in 2022. This was primarily due to the bank's staff in the Utah office being heavily involved with the transition after the Region's Bank acquisition of EnerBank in 2022. The bank, however, met the goals for Satisfactory performance in 2023 and met the Outstanding goals in 2024. During the review period, the bank primarily engaged in qualified service activities focused on financial education for LMI youth and individuals, free tax assistance for LMI individuals, and board service for nonprofit organizations that provide affordable housing and community services targeted to LMI individuals.

General Information

The CRA requires each federal financial supervisory agency to use its authority when examining financial institutions subject to its supervision to assess the institution's record of meeting the credit needs of its entire community, including low- and moderate-income neighborhoods, consistent with safe and sound operation of the institution. Upon conclusion of such examination, the agency must prepare a written evaluation of the institution's record of meeting the credit needs of its community.

This document is an evaluation of the CRA performance of Regions Bank prepared by the **Federal Reserve Bank of Atlanta**, the institution's supervisory agency, as of **February 24, 2025**. The agency rates the CRA performance of an institution consistent with the provisions set forth in Appendix A to 12 CFR Part 228.

APPENDIX D – GLOSSARY

Aggregate lending: The number of loans originated and purchased by all reporting lenders in specified income categories as a percentage of the aggregate number of loans originated and purchased by all reporting lenders in the metropolitan area/assessment area.

Census tract: A small subdivision of metropolitan and other densely populated counties. Census tract boundaries do not cross county lines; however, they may cross the boundaries of MSAs. Census tracts usually have between 2,500 and 8,000 persons, and their physical size varies widely depending upon population density. Census tracts are designed to be homogeneous with respect to population characteristics, economic status, and living conditions to allow for statistical comparisons.

Community development: All Agencies have adopted the following language. Affordable housing (including multi-family rental housing) for low- or moderate-income individuals; community services targeted to low- or moderate-income individuals; activities that promote economic development by financing businesses or farms that meet the size eligibility standards of the Small Business Administration's Development Company or Small Business Investment Company programs (13 CFR 121.301) or have gross annual revenues of $1 million or less; or, activities that revitalize or stabilize low- or moderate-income geographies.

Effective September 1, 2005, the Board of Governors of the Federal Reserve System (Board), Office of the Comptroller of the Currency (OCC), and the Federal Deposit Insurance Corporation (FDIC) have adopted the following additional language as part of the revitalize or stabilize definition of community development. Activities that revitalize or stabilize-

I. Low-or moderate-income geographies;
II. Designated disaster areas; or
III. Distressed or underserved nonmetropolitan middle-income geographies designated by the Board, FDIC, and OCC, based on-
    a. Rates of poverty, unemployment, and population loss; or
    b. Population size, density, and dispersion. Activities that revitalize and stabilize geographies designated based on population size, density, and dispersion if they help to meet essential community needs, including needs of low- and moderate-income individuals.

Consumer loan(s): A loan(s) to one or more individuals for household, family, or other personal expenditures. A consumer loan does not include a home mortgage, small business, or small farm loan. This definition includes the following categories: motor vehicle loans, credit card loans, home equity loans, other secured consumer loans, and other unsecured consumer loans.

Family: Includes a householder and one or more other persons living in the same household who are related to the householder by birth, marriage, or adoption. The number of family households always equals the number of families; however, a family household may also include nonrelatives living with the family. Families are classified by type as either a married-couple family or other family, which is further classified into 'male householder' (a family with a male householder and no wife present) or 'female householder' (a family with a female householder and no husband present).

Full-scope review: Performance under the Lending, Investment, and Service Tests is analyzed considering performance context, quantitative factors (for example, geographic distribution, borrower distribution, and total number and dollar amount of investments), and qualitative factors (for example, innovativeness, complexity, and responsiveness).

APPENDIX D – GLOSSARY (Continued)

Geography: A census tract delineated by the United States Bureau of the Census in the most recent decennial census.

Home Mortgage Disclosure Act (HMDA): The statute that requires certain mortgage lenders that do business or have banking offices in a MSA to file annual summary reports of their mortgage lending activity. The reports include such data as the race, gender, and the income of applications, the amount of loan requested, and the disposition of the application (for example, approved, denied, and withdrawn).

Home mortgage loans: Includes home purchase and home improvement loans as defined in the HMDA regulation. This definition also includes multi-family (five or more families) dwelling loans, loans for the purchase of manufactured homes and refinancings of home improvement and home purchase loans.

Household: Includes all persons occupying a housing unit. Persons not living in households are classified as living in group quarters. In 100 percent tabulations, the count of households always equals the count of occupied housing units.

Limited-scope review: Performance under the Lending, Investment, and Service Tests is analyzed using only quantitative factors (for example, geographic distribution, borrower distribution, total number and dollar amount of investments, and branch distribution).

Low-income: Individual income that is less than 50 percent of the area median income, or a median family income that is less than 50 percent, in the case of a geography.

Market share: The number of loans originated and purchased by the institution as a percentage of the aggregate number of loans originated and purchased by all reporting lenders in the metropolitan area/assessment area.

Metropolitan area (MA): A MSA or a metropolitan division (MD) as defined by the Office of Management and Budget. An MSA is a core area containing at least one urbanized area of 50,000 or more inhabitants, together with adjacent communities having a high degree of economic and social integration with that core. An MD is a division of an MSA based on specific criteria including commuting patterns. Only an MSA that has a population of at least 2.5 million may be divided into MDs.

Middle-income: Individual income that is at least 80 percent and less than 120 percent of the area median income, or a median family income that is at least 80 percent and less than 120 percent, in the case of a geography.

Moderate-income: Individual income that is at least 50 percent and less than 80 percent of the area median income, or a median family income that is at least 50 percent and less than 80 percent, in the case of a geography.

Multi-family: Refers to a residential structure that contains five or more units.

Other products: Includes any unreported optional category of loans for which the institution collects and maintains data for consideration during a CRA examination. Examples of such activity include consumer loans and other loan data an institution may provide concerning its lending performance.

APPENDIX D – GLOSSARY (Continued)

Owner-occupied units: Includes units occupied by the owner or co-owner, even if the unit has not been fully paid for or is mortgaged.

Qualified investment: A qualified investment is defined as any lawful investment, deposit, membership share, or grant that has as its primary purpose community development.

Rated area: A rated area is a state or multistate MA. For an institution with domestic branches in only one state, the institution's CRA rating would be the state rating. If an institution maintains domestic branches in more than one state, the institution will receive a rating for each state in which those branches are located. If an institution maintains domestic branches in two or more states within a multistate MA, the institution will receive a rating for the multistate MA.

Small loan(s) to business(es): A loan included in 'loans to small businesses' as defined in the Call Report and the Thrift Financial Reporting (TFR) instructions. These loans have original amounts of $1 million or less and typically are either secured by nonfarm or nonresidential real estate or are classified as commercial and industrial loans. However, thrift institutions may also exercise the option to report loans secured by nonfarm residential real estate as "small business loans" if the loans are reported on the TFR as nonmortgage, commercial loans.

Small loan(s) to farm(s): A loan included in 'loans to small farms' as defined in the instructions for preparation of the Call Report. These loans have original amounts of $500,000 or less and are either secured by farmland, or are classified as loans to finance agricultural production and other loans to farmers.

Upper-income: Individual income that is at least 120 percent of the area median income, or a median family income at least 120 percent, in the case of a geography.
