COMMUNITY REINVESTMENT ACT PERFORMANCE EVALUATION

SunTrust Bank 303 Peachtree Street, N.E. Atlanta, Georgia 30308

RSSD ID NUMBER: <u>675332</u>

FEDERAL RESERVE BANK OF ATLANTA 1000 Peachtree Street, N.E. Atlanta, Georgia 30309-4470

NOTE: This document is an evaluation of this institution's record of meeting the credit needs of its entire community, including low- and moderate-income neighborhoods, consistent with safe and sound operation of the institution. This evaluation is not, nor should it be construed as, an assessment of the financial condition of this institution. The rating assigned to the institution does not represent an analysis, conclusion or opinion of the federal financial supervisory agency concerning the safety and soundness of this financial institution.

INSTITUTION'S CRA RATING: SATISFACTORY

The following table indicates the performance level of SunTrust Bank with respect to the lending, investment and service tests.

PERFORMANCE LEVELS	PERFORMANCE TESTS				
	Lending Test*	Investment Test	Service Test		
Outstanding					
High Satisfactory	X	X			
Low Satisfactory			X		
Needs to Improve					
Substantial Noncompliance					

^{*}Note: The lending test is weighted more heavily than the investment and service tests when arriving at an overall rating.

Major factors supporting the institution's rating include:

- The overall geographic distribution of HMDA¹-reportable lending reflects adequate penetration in low- and moderate-income (LMI) geographies.
- The overall geographic distribution of small business lending reflects good penetration in LMI geographies.
- The overall distribution of HMDA-reportable lending among borrowers of different income levels is good.
- The overall distribution of small business lending among businesses of different sizes is adequate.
- The bank makes a relatively high level of community development loans.
- The bank makes a significant level of qualified community development investments in response to assessment area community development needs.
- Retail delivery systems are reasonably accessible to the geographies and individuals of different income levels in the bank's assessment areas.
- The bank provides a relatively high level of community development services.

¹ Home mortgage loans are reported by institutions on the Home Mortgage Disclosure Act (HMDA) Loan Application Register (LAR). The register includes home purchase, refinance, home improvement, and multifamily loans originated and purchased by the institution.

DESCRIPTION OF INSTITUTION

SunTrust Bank is a large, interstate bank headquartered in Atlanta, Georgia. As of December 31, 2015, the bank operates 1,437 branch offices across nine states including Alabama, Florida, Georgia, Maryland, North Carolina, South Carolina, Tennessee, Virginia, and West Virginia. Additionally, the bank has branches in four multistate Metropolitan Statistical Areas (MSAs), which are Charlotte, Chattanooga, Memphis, and Washington, DC. SunTrust received a "Satisfactory" rating at its previous Community Reinvestment Act (CRA) Performance Evaluation (PE) dated March 11, 2013. No known legal impediments exist that would restrain the bank from meeting the credit needs of its assessment areas.

For this examination, 107 assessment areas were reviewed. Deposits in these assessment areas totaled \$155.4 billion as of June 30, 2016. Descriptions of the full-scope assessment areas can be found in the applicable state or multistate sections of this report.

Business Structure

SunTrust Bank (STB) is an affiliate of SunTrust Banks, Inc. (STI), a \$199 billion single-bank financial holding company. SunTrust Bank had total assets of \$195 billion as of June 30, 2016. Through its subsidiaries, STI provides deposit, credit, trust and investment services to a broad range of retail, business and institutional clients. SunTrust Bank operates and wholly owns a mortgage affiliate, SunTrust Mortgage, Inc. (STM), which is headquartered in Richmond, Virginia. STM is the primary originator of home purchase and refinance loans for the organization. Other affiliates include SunTrust Community Capital, LLC (STCC) and SunTrust Community Development Enterprises (STCDE). STCC was organized to provide specialized community development lending and investments on behalf of SunTrust Bank, while STCDE was established to manage the bank's involvement in the New Markets Tax Credit (NMTC) Program. Additionally, other subsidiaries provide mortgage banking, brokerage, investment management, equipment leasing, and capital market services. Since the previous examination dated March 11, 2013, there have been no substantive changes to the bank's structure.

Credit Products and Loan Portfolio

SunTrust Bank offers a wide variety of consumer, residential real estate, commercial, and agricultural loan products to fulfill the credit needs of the residents and businesses in its assessment areas. Consumer loan products include auto loans, personal lines of credit, installment loans, home equity loans, mortgage loans, and student loans. The bank also offers construction and commercial loan products including lines of credit, business credit cards, and Small Business Administration (SBA) loans.

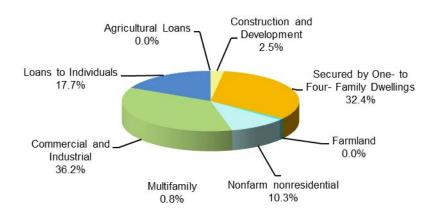

The following table shows the composition distribution of SunTrust Bank's loan portfolio as of December 31, 2014 and 2015. In 2014, commercial and industrial loans represented the largest volume of loans by dollar, followed closely by one- to four-family dwelling loans; in 2015, the volume of the loans in these two

categories was relatively the same. Nonfarm, nonresidential real estate represented about 10.0 percent of the bank's loans in 2015, followed by loans to individuals at 17.7 percent. Agricultural loans and farmland lending make up less than 1.0 percent of the loan portfolio.

COMPOSITION OF LOAN PORTFOLIO						
	12/31/20	015	12/31/2014			
Loan Type	\$ (000s)	Percent	\$ (000s)	Percent		
Construction and Development	3,066,062	2.5%	2,296,734	1.9%		
Secured by One- to Four- Family Dwellings	40,280,638	32.4%	40,615,159	33.5%		
Other Real Estate: Farmland	58,807	0.0%	87,247	0.1%		
Multifamily	998,140	0.8%	1,024,491	0.8%		
Nonfarm nonresidential	12,841,055	10.3%	13,517,215	11.1%		
Commercial and Industrial	44,971,538	36.2%	42,442,810	35.0%		
Loans to Individuals	22,004,112	17.7%	21,275,383	17.5%		
Agricultural Loans	27,721	0.0%	52,720	0.0%		
Total	\$124,248,073	100.00%	\$121,311,759	100.00%		

^{*}This table does not include the entire loan portfolio. Specifically, it excludes loans to depository institutions, bankers acceptances, lease financing receivables, obligations of state and political subdivisions, and other loans that do not meet any other category. Contra assets are also not included in this table.

SunTrust Bank's loan portfolio includes products that provide flexible repayment and/or underwriting guidelines to help meet the credit needs of LMI borrowers and small businesses. STM engages in affordable lending by providing a comprehensive suite of affordable housing products with a 95.0 percent or higher loan-to-value ratio. The bank is also a member of the Federal Home Loan Bank of Atlanta and sponsors the Affordable Home Loan program, which enables organizations to obtain loans to develop affordable homes and multifamily housing. In addition to federally insured or guaranteed and STM portfolio loan products,

STM offers numerous state Housing Finance Authority (HFA) programs to qualified borrowers. These programs may offer below-market rates which result in lower monthly principal and interest payments for LMI borrowers. Most of these programs have flexible underwriting guidelines and offer various down payment assistance and grant programs to be used in conjunction with related first lien products.

During the review period, STM made underwriting enhancements by instituting a formal Inclusive Lending Program with a dedicated leader and teammates who engaged in comprehensive reviews of affordable mortgage products in order to facilitate enhancements and reduce overlays. STM employees clarified and removed several mortgage approval standards for greater alignment with Government Sponsored Entity (GSE) guidelines to improve the originations process for the mortgage company and benefit LMI borrowers. Highlights from this project include the alignment with Fannie Mae to allow gifted reserve funds for the Agency Affordable product, alignment with Fannie Mae to allow sweat equity as an acceptable source of funds, and the expansion of the eligible types of secondary financing for Agency Affordable transactions to include institutional (including non-community second mortgages) and privately held second mortgages.

Notably, the bank offers a home improvement loan with flexible and innovative features tailored to fit the needs of LMI borrowers. The Affordable Home Improvement Program (AHIP) loan is available in counties where SunTrust Bank has deposit-taking branches or ATMs, to clients with properties located in designated low- or moderate-income census tracts and/or who have incomes below 80.0 percent of the area median income. AHIP loans tend to have lower rates and more flexible underwriting guidelines to make it easier for more borrowers to qualify for a home improvement loan. Additionally, the online application process is simple and streamlined, and because of the nature of the online application, borrowers don't need to return to a branch for loan closing. Applicants can borrow up to \$10,000 with some or all of the funds going to home improvement without any fees.

For small businesses, SunTrust Bank is an active SBA lender. The SBA ranked SunTrust Bank the 9th highest volume lender nationwide by dollar volume for its 7(a) loan program through the 4th quarter of fiscal year 2016.² The 7(a) program is the SBA's most common loan program, offering funds to small businesses with flexible repayment terms for multiple purposes.³

SCOPE OF EXAMINATION

For the purposes of this examination, SunTrust had a total of 107 CRA assessment areas across nine states and four multistate MSAs. SunTrust is an interstate bank; therefore, the scope of this evaluation includes a full-scope review of at least one assessment area in each state where the bank has branches. Each assessment area was reviewed for lending, investment, and service performance using either full-scope or limited-scope examination procedures; 18 assessment areas were chosen for a full-scope review, including the 4 multistate MSAs. Criteria used to select full-scope assessment areas include the volume of HMDA-reportable and CRA small business lending by number of loans and dollar amount, as a percentage of statewide lending activity; deposit market share; number of branches; percentage of deposits; amount of community development activity; and other non-financial considerations. Full-scope assessment areas represent the most active markets in each state based on these criteria. Where similar activity was noted, full-scope assessment areas were considered that were not selected at the previous examination.

Assessment areas receiving full-scope reviews are:

• Alabama: Florence

• Florida: Daytona, Miami, and Tampa

• Georgia: Atlanta and Macon

• Maryland: Baltimore

• North Carolina: Durham and Greensboro

• South Carolina: Greenville

Tennessee: Nashville

• Virginia: Hampton Roads and Richmond

• West Virginia: Charleston

 Multistates: Washington, DC-VA-MD; Memphis, TN-MS-AR; Chattanooga, TN-GA; Charlotte-Concord-Gastonia, NC-SC

The states of Florida and Georgia had the highest number of branches and largest concentration of lending and deposit activity; as a result, performance in these states received the greatest weight in determining the overall rating for each test and the institution overall. Each state, and the full-scope assessment areas within each state, is presented in alphabetical order. A description of each state, multistate, and full-scope assessment area is included in the applicable section of this report.

Examination Review Period and Products Reviewed

This evaluation included an analysis of SunTrust Bank and SunTrust Mortgage HMDA-reportable loans and SunTrust Bank CRA small business loans originated between January 1, 2014, and December 31, 2015. To determine the final lending test rating, equal weight was given to lending performance in 2014 and 2015. HMDA-reportable home purchase, refinance, and home improvement loans and CRA-reportable small business loans were the major lending products reviewed. CRA-reportable small farm loans and HMDA-reportable multifamily loans were not considered in the overall evaluation due to low activity levels. Retail banking services such as branch distribution and hours of operation were analyzed for the same review period.

The community development activity review period was January 1, 2013, to December 31, 2015. Community development loans originated within this timeframe were included in the lending test analysis, and community development investments funded during this period were analyzed as part of the investment test. Investments with community development as a primary purpose that were funded during a prior review period but still outstanding as of December 31, 2015, were also considered. Community development services that took place during the review period were included in the service test review. A loan, investment, or service has community development as a primary purpose when it is designed for the express purpose of revitalizing or stabilizing low- or moderate-income areas, designated disaster areas, or underserved or distressed nonmetropolitan middle-income areas; providing affordable housing for, or community services targeted to, low- or moderate-income persons; or promoting economic development by financing small businesses and farms that meet the requirements set forth in 12 CFR 228.12(g).

Examination Analysis

This evaluation of SunTrust Bank's record of lending in individual assessment areas includes the use of and comparison to demographic characteristics. The primary sources for demographic data are the 2015 FFIEC Census and 2015 Dun & Bradstreet data. Demographic characteristics of a particular assessment area are useful in analyzing a financial institution's record of lending since they provide a means of estimating loan demand and identifying lending opportunities. To understand small business demand, self-reported data on revenue size and geographic location from business entities is collected and published by Dun & Bradstreet. The demographic data should not be construed as defining an expected level of lending in a particular area or to a particular group of borrowers. The data, along with information about housing and economic conditions, is used to establish performance context and evaluate the bank accordingly.

Loans are evaluated to determine the lending activity inside and outside the bank's assessment areas. In addition, loans inside the assessment area are evaluated based on the geographic and borrower income distribution for each assessment area. The geographic distribution of HMDA-reportable loans is assessed by comparing the percentage of loans made in each geography type (low-, moderate-, middle-, and upperincome) to the percentage of owner-occupied units in each geography type. Small business loans are compared to the percentage of small businesses within each geographic income category.

The distribution of HMDA-reportable loans by borrower income is assessed by comparing the percentage of loans made to borrowers in each income category (low-, moderate-, middle-, and upper-income) to the percentage of families in each income category. The distribution of small business loans by borrower income is assessed by comparing the percentage of loans made to businesses in each revenue category (less than or equal to \$1 million and greater than \$1 million) to the percentage of total businesses in each revenue category.

SunTrust Bank's lending performance was also compared to the performance of aggregate lenders in 2014 and 2015. Aggregate lenders include all lenders required to report HMDA-reportable and CRA small business lending data within the respective assessment areas. Lending market share is also discussed to give a better understanding of where SunTrust ranks within the respective areas.

For retail services, the bank's branch distribution analysis was conducted using data as of December 31, 2015. Changes in the median family income level of branch locations that resulted from changes in census data were taken into consideration as part of this analysis.

Community development activities were reviewed to determine that they have community development as a primary purpose and meet the geographic requirements of the regulation. The eligibility of a loan, investment, or service is based on demographic information available to the bank at the time the community development activity was undertaken. Qualified community development activities were analyzed from both the quantitative and qualitative perspectives to better understand the volume of activity impacting a particular assessment area, the innovativeness of those activities, and their responsiveness to local community development and credit needs. When appropriate, peer comparisons were conducted using annualized metrics to gauge the relative performance of the institution in a particular assessment area.

In order to better understand assessment area community development and credit needs, several sources were used, including contacts with community development practitioners, review of publicly accessible data, information submitted by the institution, and plans that describe the community development environment in local markets. Community contact interviews were conducted with representatives from affordable housing, economic development, social service, and governmental organizations operating inside the bank's assessment areas. These individuals have expertise in their respective fields and are familiar with the economic, social, and demographic characteristics and community development opportunities in the assessment area. Information obtained from these interviews helped establish a context for the communities in which the bank operates and to gather information on the bank's performance.

In most of the bank's markets, community contacts noted that affordable housing was the biggest concern. In urban communities, homeownership is unattainable for many low-wage workers due to significant housing price increases, and many more LMI renters are paying a significantly higher share of their income for rent. Community contacts also identified the need for more technical assistance for small businesses. Another common concern noted by the contacts was the increased demand for highly skilled labor resulting in a need for workforce development. Finally, almost all of the community contacts stated that LMI families and communities are still struggling, and there is an ongoing need for programs to address financial stability and financial education. Contacts in each market identified opportunities in these key areas for bank participation. More detailed information obtained from individual community contacts is included in the Credit and Community Development Needs section for each assessment area.

CONCLUSIONS WITH RESPECT TO PERFORMANCE TESTS

LENDING TEST

Lending test performance is rated high satisfactory. Lending performance was good in Florida, Georgia, Maryland, North Carolina, South Carolina, Tennessee, Virginia, and the Charlotte, Chattanooga, Memphis, and Washington, DC multistate MSAs; performance was adequate in the remaining states. The geographic distribution of loans throughout the assessment areas was good while the penetration of loans among borrowers of different income levels and businesses of different sizes was adequate. Additionally, the bank made a relatively high level of community development loans. Community development lending was excellent in Georgia, Maryland, and the Charlotte, Chattanooga, Memphis, and Washington, DC multistate MSAs; good in Florida, North Carolina, South Carolina, Tennessee, and Virginia; adequate in Alabama; and poor in West Virginia. As discussed earlier, the bank's performance in Florida and Georgia had the greatest impact on the bank's overall lending test performance.

Detailed information about HMDA-reportable and CRA small business loans can be found in Appendices G and H for full-scope and limited-scope assessment areas, respectively. In some assessment areas and product discussions, specific numbers are quoted from these tables to support relevant points; otherwise, general references are made about performance and the reader should refer to the appendices for specific data.

Lending Activity

The following table summarizes the bank's lending activity for 2014 and 2015. SunTrust Bank originated more HMDA-related loans than small business loans by both number and dollar amount. Due to the higher percentage of loans by number, HMDA-reportable lending typically had a greater impact on lending ratings. Lending was responsive to credit needs in all states and commensurate with deposits in each state; no conspicuous gaps in lending activity by income category were identified. Detailed information about lending activity can be found in each of the state and multistate sections of this report.

Summary of Lending Activity

Loan Type	#	%	\$(000s)	%
Total Consumer related	0	0	\$0	0
Home Improvement	34,287		\$853,630	
Home Purchase	48,817		\$14,105,079

Refinancing	2,057	96.2	\$225,928	91	81	3.8	\$22,471	9
Total HMDA related	23,422	62.1	\$1,096,155	61	14,308	37.9	\$701,935	39
Small Business	74,947	94.5	\$3,762,694	87.4	4,338	5.5	\$544,240	12.6
Total Small Bus. related	74,947	94.5	\$3,762,694	87.4	4,338	5.5	\$544,240	12.6
Small Farm	64	90.1	\$13,774	89.7	7	9.9	\$1,578	10.3
Total Small Farm related	64	90.1	\$13,774	89.7	7	9.9	\$1,578	10.3
TOTAL LOANS	98,433	84.1	\$4,872,623	79.6	18,653	15.9	\$1,247,753	20.4

Note: Affiliate loans not included

The bank originated 62.1 percent of HMDA-related loans and 94.5 percent of small business loans, by number, to borrowers and businesses located inside the bank's assessment areas. This indicates SunTrust Bank's willingness to originate loans that meet the credit needs of its assessment areas.

Distribution of Lending by Geography, Borrower Income, and Business Revenue Size

The overall geographic distribution of HMDA-reportable and small business lending reflects good penetration in LMI geographies. Of the 18 full-scope and multistate assessment areas, 10 are considered good, 7 are considered adequate, and 1 is considered poor. While the overall geographic distribution of small business loans is good, the distribution of HMDA-reportable loans by geography is adequate.

The overall distribution of loans among borrowers of different income levels and businesses of different sizes is adequate. HMDA-reportable lending to borrowers of different income levels is good while small business lending to businesses of different revenue sizes is adequate. By assessment area, 11 full-scope assessment areas are considered good for overall borrower distribution and 7 are adequate.

The analyses of HMDA-reportable and small business lending within each assessment area are discussed in detail later in this report.

Community Development Lending

SunTrust Bank made a relatively high level of community development loans during the review period. Since the previous examination, the bank originated or renewed 673 community development loans totaling approximately \$4.6 billion. This volume of community development lending is considered good given the size and presence of the institution in its assessment areas and community development lending opportunities. Responsiveness to community development needs assessment area level is also good. As noted earlier, performance in Florida had the greatest

Community Development Loan Purpose	#	\$ ('000s)
Affordable Housing	100	\$579,027
Community Services	235	\$1,131,848
Economic Development	161	\$527,581
Revitalization & Stabilization	177	\$2,339,234
Total	673	\$4,577,690

impact on the performance assessment followed by Georgia.

Nearly 45.3 percent of the bank's community development lending in the review period took place in Florida and Georgia (\$1.1 billion and \$1.0 billion, respectively). Considering the bank's size and presence in these states, performance in the full-scope assessment areas, competition, and community development lending opportunities, the bank's performance was considered good in Florida and excellent in Georgia. The third largest concentration of community development loans by state was in Virginia with \$442.3 million, accounting for 9.7 percent of bank-wide community development lending, while the Washington, DC multistate assessment area accounted for \$539.1 million, or 11.8 percent of bank-wide community development lending. Performance in Virginia was considered good, and performance in the Washington, DC multi-state area was considered excellent. The remaining six states and three multistate assessment areas accounted for \$1.5 billion in community development loans.

The community development loans originated or renewed during the review period had a variety of purposes, including affordable housing for LMI individuals, community services targeted to LMI individuals, promotion of economic development by financing small businesses that resulted in permanent job creation and/or retention, and revitalization/stabilization of targeted LMI census tracts or other qualified geographies. The table above provides a breakdown of community development loans originated or renewed during the review period by community development purpose, number, and dollar amount.

More information on individual community development loans can be found in the full-scope assessment area sections of this report.

Investment Test

SunTrust's investment test performance is rated high satisfactory based on the overall level of qualified community development investments and contributions provided directly in the bank's assessment areas and across the institution's footprint. Specifically, the bank had excellent performance in Georgia, Maryland, and South Carolina, and the Memphis and Washington, DC multistate assessment areas. Performance was good in Florida, North Carolina, Tennessee, Virginia, West Virginia and the Charlotte multistate assessment area and adequate in Alabama and the Chattanooga multistate assessment area. The bank had the highest volume of qualified community development investments in Georgia, followed by Florida and the Washington, DC multistate assessment area.

Qualified investments totaled approximately \$2.2 billion; of that amount, \$1.4 billion in investments were obtained during the current review period. Approximately \$1.8 billion directly benefited the bank's assessment areas and \$302.5 million benefited a broader statewide or regional area that included one or more of the bank's assessment areas or the bank's entire footprint. The broader statewide and regional investments were primarily investments in Small Business Investment Companies (SBICs) that served multiple states, real estate investment funds that financed community development projects in several states, and bonds that

Investment Purpose	#	\$('000s)
Affordable Housing	688	\$1,700,020
Community Services	15	\$128,093
Economic Development	100	\$212,663
Revitalization & Stabilization	22	\$120,786
Total	825	\$2,161,561

financed affordable housing and community development. Finally, the bank had \$5.1 million in investments within the states it serves, but without a purpose, mandate or function of serving any of the bank's assessment areas.

Most of the bank's investments (by dollar and number) supported affordable housing, primarily through the purchase of government-guaranteed mortgage-backed securities and investments in Low-Income Housing Tax Credit (LIHTC) equity funds that financed affordable multifamily rental housing. Notably, the bank invested nearly \$1.0 billion in LIHTC projects and LIHTC equity funds during the review period. The bank invested \$212.6 million to support economic development by investing in SBICs, SBA funds, and NMTCs, which financed small businesses that created new job opportunities, including jobs for LMI individuals. The bank also invested \$128.1 million to finance community services for LMI individuals and \$120.8 million in projects that revitalize or stabilize LMI communities; the majority of these investments were NMTC.

SunTrust is a national leader in utilizing the NMTC Program. The bank created SunTrust Community Capital (STCC) to provide specialized community development lending and investments on behalf of the bank. In 2005, STCC established STCDE to manage the bank's involvement in the NMTC Program. STCDE has been awarded seven allocations of NMTCs totaling \$428 million including two awards during the review period for a total of \$88 million. Bank management reports that the bank has deployed all of its allocations, financing the development or redevelopment of more than 6.5 million square feet of commercial property and creating more

than 17,300 jobs, almost 2,500 new student spaces, approximately 460 housing units, and providing services to more than 190,000 health care patients (including actual and projected impacts).

Specific examples of NMTC transactions (including community development loans and investments) are highlighted in the relevant state and assessment area sections of the report.

SunTrust made qualified contributions totaling \$21.1 million to organizations with a purpose of community development. Of the total contributions, \$18.7 million directly benefited the bank's assessment areas and \$1.5 million benefited a broader statewide or regional area that included one or more of the bank's assessment areas. Finally, the bank had approximately \$950,000 in contributions that benefited the bank's entire footprint. The largest volume of contributions (by dollar) was in Georgia and Florida; 47.6 percent of all contributions during the review period were made to organizations in these two states.

The majority of the contributions provided support for organizations engaged in community services for LMI individuals or communities, including but not limited to financial education and literacy, youth and family programs, education and charter schools, emergency assistance including food and housing, assistance with the homeless, job training, and health services.

Total	2,675	\$21,169

affordable single-family and multifamily housing, as well as providing homeownership counseling. The bank also supported a number of statewide collaborations working to build capacity among affordable housing providers. SunTrust also provided support for economic development in many markets, with donations primarily to nonprofit organizations providing small business loans and technical assistance and support for entrepreneurs, primarily in disadvantaged communities.

SunTrust utilized a targeted contribution strategy for this review period, focusing specifically on a number of national organizations that work in LMI communities. The bank also dedicated community development service hours to many of these organizations in order to enhance the impact of the bank's financial support. A few of the significant partnerships are noted below, and additional detail is provided in subsequent sections of the report.

• The bank was a significant supporter of United Way in markets across its footprint, providing assistance to United Way agencies for programs that partner with local nonprofits and have a primary focus on programs that promote financial stability, health, and education for LMI individuals. During the review period, the bank supported 120 separate United Way agencies across its footprint, with 44 separate United Way affiliates receiving grants over \$10,000. SunTrust also provided significant financial support for an online portal developed by United Way Worldwide that provides resources and referrals

to help individuals address immediate and long-term financial concerns.

- SunTrust provided financial support for Operation HOPE to provide financial education to LMI communities and to place financial counselors in select SunTrust Bank branches in LMI communities in Atlanta, Memphis and Washington, DC, via the organization's "HOPE Inside" program. HOPE Inside provides a wide range of free counseling services to help individuals get out of debt, improve their credit scores, and reach their financial goals.
- The bank provided a \$230,000 grant to Catholic Charities USA to help build and strengthen communities nationwide. The funding will support a workforce development model being pioneered by Catholic Charities in Jacksonville, Florida, which helps low-income individuals develop the skills they need to compete for and attain jobs and towards the development of a bilingual financial education program for Latino parents.
- The bank supported a national advocacy organization that provides training, technical assistance, and other resources to over 600 community-based member organizations engaged in expanding banking access, affordable housing, and job development for LMI communities.

A summary of the bank's investments and contributions can be found in Appendix F; additional detail regarding specific investments and contributions can be found in the state and full-scope assessment area sections.

Service Test

SunTrust Bank's service test performance is rated low satisfactory. Performance was good in the Charlotte, Chattanooga, and Memphis multistate assessment areas and the states of Georgia, Maryland, North Carolina, Virginia, and West Virginia, and adequate in the remaining states of Alabama, Florida, South Carolina, Tennessee, and the Washington, DC multistate assessment area.

Retail Banking Services

Retail banking delivery systems are reasonably accessible to the bank's geographies and individuals of different income levels. During the review period, the bank opened 16 branches and closed 114. Eight branch closures were located in low-income tracts and 21 were in moderate-income tracts, which may have adversely affected the accessibility of banking services in some assessment areas. A specific listing of branches opened or closed can be found in the bank's CRA public file.

Banking services and business hours do not vary in a way that inconveniences the bank's assessment areas, including in LMI geographies. The majority of SunTrust Bank's branches offer extended or weekend hours, including those located in LMI geographies. The bank also offers a Consumer Omni Channel retail services framework consisting of ATM, branch, contact center, and digital services. The ATM retail service channel includes routine transactions while the branch channel includes transaction servicing and sales. The contact center retail service channel provides servicing, problem resolution and targeted sales while the digital channel provides basic transactions and ability for consumers to shop and browse available products and services online.

The geographic distribution of branches as of December 31, 2015, is below. The table also includes data related to branch openings and closures since the previous examination, ATMs, and demographics.

Community Development Services

SunTrust Bank provides a relatively high level of community development services throughout its assessment areas. Community development service performance was excellent in the state of North Carolina and the Charlotte multistate assessment area; good in the states of Georgia, Maryland, South Carolina, Tennessee, Virginia, West Virginia, and the Chattanooga and Memphis multistate assessment areas; and adequate in the states of Alabama and Florida, and the Washington, DC multistate assessment area. During the review period, employees engaged in 20,659 qualified community development services totaling 75,379 hours. Notably, the qualified community development services provided during this review period increased by more than 300.0 percent over qualified service hours provided during the last evaluation. Performance was most notable in the Durham and Charlotte full-scope assessment areas, where employees engaged in nearly 1,628 and 1,714 hours, respectively, of responsive community development service activity with a diverse group of organizations.

The table to the right provides a breakdown of qualified community development services by purpose, number, and hours. SunTrust Bank employees were involved with organizations and activities that promote or facilitate affordable housing for LMI individuals, community services targeted to LMI individuals, economic development by financing small businesses,

Community Development	#	Hours
Services Purpose		
Affordable Housing	2,311	4,697
Community Services	17,461	68,617
Economic Development	761	1,900
Revitalization & Stabilization	36	165
Total	20,569	75,379

and revitalization/stabilization of LMI areas. Notably, approximately 19.2 percent of total community development services by number and 12.5 percent by hours for the bank were board service at community

development organizations or committee memberships. This level of board commitment demonstrates an increased level of community involvement and willingness to take on leadership roles in community development organizations within the bank's assessment areas.

The following are examples of community development services provided during the review period.

- **Board service** More than 9,400 hours of SunTrust Bank's community development service activities were provided while serving on a community development organization's board of directors, as a board officer, or a member of a board of directors' subcommittee. Significant portions of these services were provided at organizations that provided mentoring services to at-risk youth; affordable housing agencies and coalitions; and CDFIs. Additionally, portions of these services also targeted workforce development and financial education and life skills development for LMI individuals.
- Financial education More than 20,000 hours of SunTrust Bank's community development service activities were focused on providing financial education. Curriculums included basic banking, financial literacy, homebuyer education, and small business development. A significant portion of financial literacy outreach was provided at schools where the majority of students qualify for free or reduced-price meals under the U.S. Department of Agriculture's National School Lunch Program and/or were located in low- or moderate-income geographies.
- Partnerships SunTrust Bank created partnerships with United Way and Junior Achievement. United Way partners with local nonprofits to provide community services to LMI individuals and primarily focuses on financial stability, health, and education. The bank sponsored a finance park where LMI students are able to interactively experience personal financial futures first-hand while participating in an immersive stimulation that helps develop financial management skills.

FAIR LENDING OR OTHER ILLEGAL CREDIT PRACTICES REVIEW

Pursuant to the Dodd-Frank Act, the Bureau of Consumer Financial Protection (BCFP) has examination and enforcement authority over insured depository institutions with total assets of more than \$10 billion, including SunTrust Bank, when assessing compliance with the requirements of many federal consumer protection laws. The Federal Reserve, however, retains responsibility for certain consumer protection laws and regulations and for the Community Reinvestment Act (CRA). Pursuant to 12 CFR §228.28(c), a state member bank's CRA performance is adversely affected by evidence of discriminatory or other illegal credit practices in any geography by the bank, or in any assessment area by any affiliate whose loans have been considered as part of the bank's lending performance in connection with any type of lending activity described in §228.22(a). As part of the CRA evaluation process for state member banks with assets of more than \$10 billion, the Federal Reserve considers information from the BCFP. The Federal Reserve also may consider information from other federal agencies that have enforcement responsibilities, such as the U.S. Department of Justice and the U.S. Department of Housing and Urban Development. The CRA evaluation and ratings process includes information that is public, as well as information that is made available to the Federal Reserve on a confidential basis.

The Federal Reserve Bank of Atlanta does not have public information regarding non-compliance with statutes and regulations prohibiting discriminatory or other illegal credit practices with respect to SunTrust Bank. In determining this institution's overall CRA rating, the Federal Reserve has considered information that was made available on a confidential basis during its consultations. The Federal Reserve has considered this information in conjunction with the factors in 12 CFR §228.28(c)(2) and has determined that an adjustment to the CRA Performance Evaluation rating is not warranted.

MULTISTATE METROPOLITAN AREA

CRA RATING FOR CHARLOTTE MULTISTATE: SATISFACTORY

The Lending Test is rated:

High Satisfactory

High Satisfactory

High Satisfactory

High Satisfactory

Major factors supporting the rating include the following:

- The geographic distribution of loans reflects adequate penetration throughout the assessment areas and the distribution of loans by borrower income also reflects adequate penetration among customers of different income levels and businesses of different revenue sizes.
- The bank is a leader in making community development loans in its Charlotte multistate assessment area.
- The bank provides significant level of qualified community development investments and grants that are responsive to several identified community development needs of the Charlotte multistate assessment area.
- Retail services are reasonably accessible to the bank's geographies and individuals of different income levels in the assessment area.
- The bank is a leader in providing community development services throughout the assessment area.

SCOPE OF EXAMINATION

The time period, products, and affiliates evaluated for the Charlotte multistate assessment area are consistent with the overall scope described in the Description of the Institution section of this report. SunTrust Bank's performance in the Charlotte multistate assessment area was evaluated using full-scope examination procedures.

DESCRIPTION OF INSTITUTION'S OPERATIONS IN CHARLOTTE, NC-SC MSA MULTISTATE ASSESSMENT AREA

Overview

The Charlotte multi-state assessment area consists of Cabarrus, Gaston, Iredell, Mecklenburg, Rowan, and Union counties in North Carolina, and York County in South Carolina. The assessment area represents 7 of the 10 counties that make up the Charlotte-Concord-Gastonia, NC-SC MSA. The city of Charlotte, located in Mecklenburg County, is the principal city for the area. As of December 2015, SunTrust Bank had 33 branches in the assessment area.

SunTrust Bank operates in a highly competitive environment in the Charlotte assessment area and has a small presence in the area. According to the June 30, 2015 FDIC Summary of Deposits Report, there are 43 financial institutions operating 509 branch locations in the Charlotte assessment area. Bank of America is the clear leader in the Charlotte market with 74.2 percent of total deposits in the assessment area, while Wells Fargo ranked 2nd with 17.2 percent. SunTrust Bank ranked 6th with deposit market share of 0.7 percent.

HMDA lending is competitive in the Charlotte area. SunTrust Bank and SunTrust Mortgage combined had an average of 2.1 percent of total HMDA-reportable lending in both 2014 and 2015. STB ranked 22nd while STM ranked 8th out of the 607 HMDA lenders in the market in 2014. In 2015, STM decreased slightly in ranking while STB remained the same. Wells Fargo, Movement Mortgage LLC, Quicken Loans, and Bank of America were the top HMDA lenders in the market in 2015.

SunTrust's CRA lending volume nearly doubled between 2014 and 2015 in the assessment area. In 2014, SunTrust ranked 10th out of 183 lenders with 2.6 percent of CRA loans. In 2015, SunTrust ranked 13th out of 140 lenders with 2.2 percent of all CRA loans. American Express is the dominant CRA reporter in the market, followed by Wells Fargo Bank, Bank of America, and BB&T.

Population and Income Characteristics

North Carolina has been one of the fastest growing states over the past decade, and the Charlotte area has been a significant contributor to that growth. In the prior decade, the population in North Carolina grew by 18.5 percent, while Mecklenburg County grew by 32.2 percent.⁴ Mecklenburg County has continued to grow in recent years, albeit at a slightly slower pace. Mecklenburg County's population as of 2015 was estimated at

⁴ QuickFacts. US Census Bureau, n.d. Web. 3 Nov. 2016. http://quickfacts.census.gov/qfd/index.html

approximately 1.0 million, which is a 12.4 percent increase between 2010 and 2015.⁵ The other six counties in the assessment area have seen continued growth as well, with Cabarrus, Union, and York counties having population growth above 10.0 percent for the same period.

The assessment area contains 496 census tracts; there were 45 (9.1 percent) low-income census tracts, 115 (23.2 percent) moderate-income tracts, 174 (35.1 percent) middle-income tracts, 157 (31.7 percent) upper-income tracts, and 5 (1.0 percent) unknown-income tracts.

For purposes of classifying borrower income, this evaluation uses the Federal Financial Institution Examination Council's (FFIEC) estimated median family income for the relevant area. The following table sets forth the estimated median family income for the Charlotte-Concord-Gastonia, NC-SC MSA and shows that the median family income increased slightly between 2014 and 2015.

Borrower Income Levels Charlotte-Concord-Gastonia, NC-SC MSA

FFIE	C Estimated		I	ow	M	ode	rate	N	Midd	lle	Ţ	Uppe	er		
Median Family Income		0	-	49.99%	50%	-	79.99%	80%	-	119.99%	120%	-	& above		
2014	\$65,500	0	-	\$32,749	\$32,750	-	\$52,399	\$52,400	-	\$78,599	\$78,600	-	& above		
2015	\$66,000	0	-	\$32,999	\$33,000	-	\$52,799	\$52,800	-	\$79,199	\$79,200	-	& above		

Poverty has been rising across the assessment area; in Mecklenburg County, 15.2 percent of the population lived in poverty between 2011 and 2015.⁶ For the same period, Union County had the lowest percent of its population in poverty at 10.2 percent, while Gaston and Rowan counties had the highest levels with 17.4 and 18.1 percent, respectively. Within the assessment area, 37.9 percent of families are considered LMI as compared to both state level rates of approximately 39.0 percent. 30.5 percent of the families living in low-income tracts and 16.6 percent of families in moderate-income tracts have income below the poverty level which may limit lending opportunities.

Economic Conditions

Charlotte is known as a banking hub and home to the headquarters of 17 Fortune 1000 companies including Bank of America, Lowe's Companies, and Duke Energy. The financial activities sector makes up 7.7 percent of the total nonfarm employment in the Charlotte MSA. While this concentration is significant, Charlotte has a diverse economy with substantial employment figures in the following industry sectors as well:

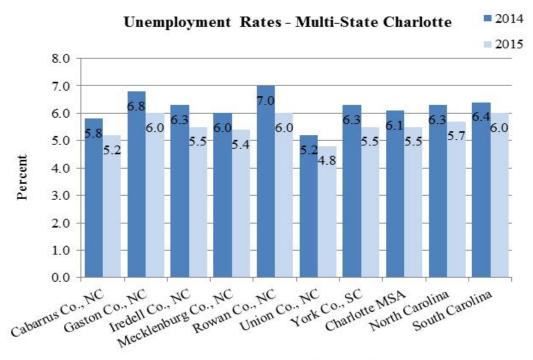

⁵ Ibid

⁶ "Charlotte, NC MSA (U.S. Census Bureau)." GIS Mapping and Geographic Information System Data. The Reinvestment Fund, n.d. Web. 12 Jun. 2017. http://www.policymap.com/>.

(transportation, and utilities; professional and business services; government; and leisure and hospitality.⁷ Carolinas HealthCare System, Wells Fargo, Wal-Mart, Bank of America, and Lowe's Companies, Inc., are among the top employers in the region.⁸

According to 2015 Dun & Bradstreet information, there were 103,524 businesses within the Charlotte assessment area, 92.2 percent of which had total annual revenues less than or equal to \$1 million, and were therefore considered to be small businesses. Nearly 25.0 percent of small businesses are located in low-to-moderate income (LMI) tracts.

As shown in the following chart, the unemployment rate continued to improve during the review period. As of 2015, the unemployment rate for the MSA was 5.5 percent, lower than the statewide rates of 5.7 percent for North Carolina and 6.0 percent for South Carolina but still slightly above the nationwide unemployment rate of 5.0 percent.⁹

Not Seasonally Adjusted. Source: Bureau of Labor Statistics

⁷ "At a Glance Tables." U.S. Bureau of Labor Statistics. U.S. Bureau of Labor Statistics, n.d. Web. 12 June 2017. http://www.bls.gov/eag/home.htm.

⁸ US Housing Market Conditions. Office of Policy Development and Research (PD&R), n.d. Web. 02 Nov. 2016. https://www.huduser.gov/portal/publications/pdf/CharlotteNC-comp-16.pdf

⁹ "Bureau of Labor Statistics Data." U.S. Bureau of Labor Statistics. U.S. Bureau of Labor Statistics, n.d. Web. 12 June 2017. https://data.bls.gov/timeseries/LNS14000000

There were approximately 829,700 housing units in the assessment area as of 2010, 61.9 percent of which were owner-occupied, 28.5 percent were rental units, and 9.6 percent were vacant. Rental and vacant units represent a disproportionate share of housing in LMI tracts. This could indicate limited lending opportunities in these areas.

The Charlotte metropolitan area has a strong housing market, with annual increases in home sales and home values. The area's job growth, increased net in-migration and low levels of new home construction have contributed to an overall improved housing market. For the 12 months ending October 2015, the average sales price of a new home increased 6.0 percent to nearly \$306,000, while the average sales price of an existing home increased to \$248,000, representing a 2.0 percent increase. For the same period, the number of new and existing homes sold totaled 28,925, up 7.7 percent from home sales for the prior year.

First-time homebuyers and LMI families may find it challenging to purchase homes at these prices. The percentage of homes affordable for a four-person family earning 80.0 percent of the area median income in 2015 ranges from 29.8 percent in Union County to 61.6 percent in Gaston County. In Mecklenburg County, where most of the employment is located, 36.5 percent of homes are affordable for a four-person family earning 80.0 percent of the area median income in 2015. In addition, low-income households who own their house spent 48.0 percent of their income on housing in 2014, as compared to 39.7 percent for moderate-income households. In addition, low-income households.

The market is also experiencing lower volumes of distressed home sales (REO and short sales) and fewer delinquencies. Bank-owned REO sales accounted for only 11.0 percent of existing home sales during the 12 months ending October 2015, down from 35.0 percent for the 12 months ending October 2011. Also, the percentage of mortgages considered seriously delinquent (defined as more than 90 days past due or in foreclosure) was 2.4 percent as of March 2016, compared to 2.8 percent for the state.

The multifamily housing market is also thriving with increased construction, rising rents and declining vacancy rates. The estimated vacancy rate for all rental units (including renter-occupied single-family homes and apartments) is 5.2 percent as of November 1, 2015, down from 11.1 percent in April 2010.¹⁴ The average monthly apartment rent was \$1,003 during the third quarter of 2015, representing an 8.0 percent increase when compared to the same time period a year earlier.¹⁵ During the third quarter of 2015, the highest average rent in

the market was \$1,435 in the Uptown-South End market area, where much of the new apartment construction is occurring, and the East Charlotte market area had the lowest average rent at \$759. Nearly all of the recent multifamily construction has occurred in Mecklenburg County and was concentrated in the city of Charlotte.

Demographic Characteristics by Census Tract

The following table based on 2015 FFIEC Census and 2015 Dun & Bradstreet data presents key demographic and business information used to help develop a performance context for the assessment area.

Combined Demographics Report

Credit and Community Development Needs

Although SunTrust has a small presence in the assessment area and the market is dominated by two national banks with extensive market saturation, community needs and opportunities for community development engagement still exist in the Charlotte market. One of main concerns by local officials and residents is the rising rental prices. In 2016, Habitat Charlotte and the Foundation for the Carolinas hosted a symposium in Charlotte, featuring a panel of affordable housing experts. Panelists discussed the city's increasing rental prices, gentrification, and the need for mixed-income developments. The symposium came amid reports that Charlotte needs about 34,000 additional affordable housing units, twice the deficit reported a few years ago. A community contact specializing in affordable housing in the Charlotte area echoed many of the sentiments shared at the symposium. However, she indicated that the urban center is saturated with affordable housing and that the suburbs should also be considered for additional affordable housing developments. The contact also noted that Charlotte has a good community development network in place for financial institutions to get involved and to support affordable housing initiatives; however, with the significant presence of several large national banks in the area, it may be more difficult for a bank with a smaller market share to get involved.

As rents continue to rise, it will be a challenge for LMI renters to find affordable housing options close to the employment centers. In the Charlotte MSA, a renter would need an hourly wage of \$16.62 to be able to afford a two-bedroom rental. While this housing wage is on par with the estimated average wage for a renter in the area of \$17.00, housing affordability remains an issue for minimum wage workers.¹⁷ One of the symposium panelists representing the North Carolina Housing Coalition focused on this issue and stated that 30.0 percent of women in the Charlotte region work for \$7.25 minimum wage.¹⁸

The prevalence of poverty and the need for social support services highlight the importance of community service organizations within the bank's communities. The ongoing demand for these services often results in needs for these organizations in terms of financial support and technical assistance as they attempt to serve significant LMI populations within the bank's assessment areas. Ultimately, this has the potential to create community development service or investment opportunities for financial institutions. Other opportunities may include helping organizations provide homebuyer and financial education, asset building initiatives, and job training programs. In addition, financial institutions may have opportunities to work collaboratively with city and county officials to address affordable housing and community development issues and to provide leadership in this regard.

CONCLUSIONS WITH RESPECT TO PERFORMANCE TESTS IN CHARLOTTE, NC-SC MSA MULTISTATE ASSESSMENT AREA

LENDING TEST

SunTrust Bank's lending performance in the Charlotte multistate assessment area is rated high satisfactory. The geographic distribution of loans reflects adequate penetration throughout the assessment area. The distribution of borrowers also reflects adequate penetration among borrowers of different income levels and businesses of different revenue sizes. Additionally, SunTrust Bank is a leader in making community development loans.

During the review period, SunTrust reported 4,153 HMDA-reportable loans compared to 1,465 small business loans in the Charlotte multistate assessment area. As such, HMDA-reportable lending was weighted more heavily than small business lending in determining the bank's lending test rating in the assessment area. In total, 3.0 percent of the bank's HMDA-reportable and small business lending by number of loans and 4.0 percent by dollar volume were originated in the Charlotte multistate assessment area compared to 1.0 percent of the bank's deposits in the assessment area.

For the lending test analysis, lending performance in low-, moderate-, middle-, and upper-income census tracts and to low-, moderate-, middle-, and upper-income borrowers was considered for each product; however, comments for activity in middle- and upper-income tracts and to middle- and upper-income borrowers are only included when they were material to the outcome of the analyses. Details of the bank's mortgage and small business lending and information regarding lending by peers can be found in Appendix G.

Geographic Distribution of Loans

For this analysis the geographic distribution of HMDA-reportable and small business lending, including both originations and purchases, was compared with available demographic information. Performance context information and aggregate lending data were also taken into consideration. Considering these factors, SunTrust Bank's geographic distribution of loans reflects adequate penetration throughout the assessment area.

Home Purchase Loans

Home purchase lending in low-income census tracts is adequate. During the review period, 2.3 percent of the bank's loans were originated in low-income census tracts. This performance was less than the percentage of owner-occupied units in low-income census tracts at 3.4 percent. However, the bank's performance was similar to the aggregate lending performance during the review period.

Home purchase lending in moderate-income census tracts is poor. SunTrust Bank originated 9.0 percent of home purchase loans in moderate-income tracts, compared to 17.9 percent of the owner-occupied units. Additionally, the bank's performance was less than the aggregate lending performance during the review period.

Home Refinance Loans

Home refinance lending in low-income tracts is adequate. The bank's percentage of home refinance loans in low-income tracts at 1.9 percent was less than the percentage of owner-occupied housing units in these tracts at 3.4 percent. The bank's home refinance lending in low-income tracts was slightly higher than aggregate lending performance in 2014, but slightly less than aggregate in 2015.

Home refinance lending in moderate-income tracts is also adequate. Although the bank's lending at 14.1 percent was less than the demographic at 17.9 percent, the bank's performance was greater than aggregate lending during the review period.

Home Improvement Loans

Home improvement lending in low-income tracts is adequate. SunTrust Bank's home improvement lending in low-income tracts was slightly less than the percentage of owner-occupied units in these tracts. Additionally, the bank's lending was greater than aggregate in 2014, but less than aggregate in 2015.

Home improvement lending in moderate-income tracts is good. During the review period, the percentage of home improvement lending in these tracts was greater than the percentage of owner-occupied units. Additionally, the bank outperformed aggregate lending performance during the review period.

Small Business Loans

Small business lending in low-income census tracts is good. The percentage of small business loans in low-income census tracts was greater than the percentage of small businesses located in these tracts. This performance exceeded aggregate lending performance in 2014, but was less than the aggregate lending performance in 2015.

Small business lending in moderate-income census tracts is also good. SunTrust Bank originated 19.7 percent of its small business loans in moderate-income census tracts, where 17.1 percent of small businesses in the assessment area operate. The bank outperformed aggregate lenders during the review period.

Lending to Borrowers of Different Incomes and Businesses of Different Sizes

The distribution of loans by borrower income or revenue size of businesses is adequate. For this analysis, the distribution of HMDA-reportable lending across borrower income levels and small business lending across business revenue sizes was compared to available demographic information.

Home Purchase Loans

Home purchase lending to low-income borrowers is adequate. During the review period, low-income families represented 26.1 percent of total families and received 5.4 percent of the bank's home purchase loans. Additionally, the distribution of the bank's loans to low-income borrowers was slightly less than aggregate lenders for both years.

Home purchase lending to moderate-income borrowers is also adequate. The bank's lending to moderate-income borrowers was slightly greater than the percentage of moderate-income families in the assessment area. However, the distribution of the bank's loans to moderate-income borrowers was slightly less than aggregate lending during the review period.

Home Refinance Loans

Home refinance lending to low-income borrowers is adequate. Although the percentage of home refinance loans to low-income borrowers was less than the percentage of low-income families in the assessment area, the bank's lending performance was better than aggregate lending performance during the review period.

Home refinance lending to moderate-income borrowers is good. The percentage of home refinance loans to moderate-income borrowers was less than the percentage of moderate-income families in the assessment area; however, the bank's lending performance was greater than the aggregate lenders during the review period.

Home Improvement Loans

Home improvement lending to low-income borrowers is good. SunTrust Bank's home improvement lending to low-income borrowers was less than the percentage of families classified as low-income; however, the bank's lending was greater than aggregate lending performance during the review period.

Home improvement lending to moderate-income borrowers is also good. SunTrust Bank's home improvement lending to moderate-income borrowers was greater than the percentage of families classified as moderate-income. Additionally, the bank's performance was greater than aggregate lending performance in 2014, but less in 2015.

Small Business Loans

The distribution of small business lending by business revenue size is adequate considering the bank's performance relative to the aggregate. The bank's lending to small businesses exceeded the aggregate in both 2014 and 2015, but was below the percentage of small businesses in the assessment area during the review period. However, of the 1,465 small business loans originated during the review period, 1,341 loans (91.5 percent) were in amounts of \$250,000 or less, which typically represent loan amounts requested by very small businesses.

Community Development Lending

SunTrust is a leader in making community development loans in the Charlotte multistate assessment area. The bank originated 19 community development loans totaling \$79.9 million during the review period. Loans were responsive to many community development needs in the assessment area, including the provision of affordable housing, community services targeted to LMI individuals, promoting economic development by financing small business, and revitalizing and stabilizing low- or moderate-income geographies. The bank provided \$41.5 million in loans to revitalize and stabilize LMI geographies; \$20.8 million towards economic development activities: \$16.8 million in support of affordable housing; and \$799,000

supporting community services to LMI individuals. SunTrust Bank's community development lending exhibits excellent responsiveness to the community development and credit needs of the assessment area.

Examples of community development lending include but are not limited to:

- Several loans to small businesses that anticipate creating over 160 jobs for LMI individuals;
- Three loans totaling \$16.6 million to support three LIHTC projects with 584 total units of affordable housing;
- A loan for \$300,000 to finance the expansion of a rehabilitation center that provides drug and alcohol recovery programs to homeless or about to become homeless men and women. The loan funds will enable the center to expand its women's housing accommodations from 12 women to 90 women and 30 children.

INVESTMENT TEST

SunTrust Bank's performance under the investment test is rated high satisfactory, as evidenced by the significant level of qualified investment and grants in the Charlotte multistate assessment area relative to the bank's presence in this highly competitive market.

The bank made investments (excluding contributions) totaling \$14.6 million in the assessment area; of that, \$10.1 million was invested during the review period. All of the investments provided financing for affordable housing and included investments in LIHTC funds and MBS, primarily backed by mortgages on affordable multifamily properties.

SunTrust Bank also contributed \$228,700 to nonprofit organizations and community development initiatives during the review period. Specifically, the bank provided grants totaling \$212,200 to nonprofits that offer community services to LMI individuals and \$16,500 for affordable housing. The bank's donations supported nonprofits addressing a range of important community needs, including support for schools and afterschool programs that serve primarily LMI youth, affordable housing, access to healthy foods and affordable healthcare, support services for the homeless and the provision of emergency assistance, and financial education. As noted earlier, the bank also had investments and contributions that served the state of North Carolina and a broader regional area that includes the bank's assessment area.

The bank's investments and contributions helped address the need for affordable housing and community services for LMI individuals. However, investment support for other community development needs, including revitalization and stabilization of LMI communities and small business assistance, was limited.

SERVICE TEST

SunTrust Bank's service test performance in the Charlotte multistate assessment area is rated high satisfactory based on the accessibility of the bank's retail services and the bank's leadership in providing community development services.

Retail Services

SunTrust Bank's delivery systems in the assessment area are reasonably accessible to the bank's geographies and individuals of different income levels. The distribution of 33 branch offices and 44 ATMs as of December 31, 2015, was compared to the distribution of households and businesses among the tract categories within the assessment area. The bank has one branch located in a low-income tract, representing 3.0 percent of total branches compared to 6.8 percent of households and 7.5 percent of businesses located in low-income tracts. The bank has eight branches located in moderate-income tracts, representing 24.2 percent of total branches compared to 22.0 percent of households and 17.3 percent of businesses located in moderate-income tracts. Alternative delivery systems, such as ATMs, toll-free telephone and text banking, and online banking, were also considered in determining accessibility. During the review period, three branches were closed in moderate-income tracts; however, two branches were opened and two branches were closed in middle- and upper-income tracts. The branch closures generally did not adversely affect the accessibility of the bank's delivery systems, particularly to LMI geographies and/or LMI individuals.

Banking services and hours of operation do not vary in a way that inconveniences the assessment area, including in LMI geographies or to LMI individuals. SunTrust Bank provides extended hours at all branch offices located in LMI tracts. The bank does not offer weekend hours at branch offices located in LMI tracts, but does provide weekend hours at a few branch offices located in middle- and upper-income tracts in the Charlotte multistate assessment area. Bank products, services and standard business hours are consistent throughout the assessment area.

SA = Stand Alone ATM is a subset of total ATMs

Community Development Services

SunTrust Bank is a leader in providing community development services in the Charlotte assessment area. During the review period, SunTrust Bank employees provided 1,714 service hours in various capacities for community development organizations, including 31 economic development service hours, 190 affordable housing hours, and approximately 1,493 community service hours. Approximately 15.3 percent of service hours were board service at community development organizations or committee memberships.

SunTrust employees were active in providing a variety of services to a diverse group of local organizations. Bank employees served on the board of a workforce development agency for LMI women providing financial education and home buying classes; offered mentoring services to at-risk youth; and volunteered at a workforce development organization, multiple community shelters, and a food bank. The bank also benefited from community development service activities with statewide organizations that serve the assessment area. This performance is considered excellent given SunTrust Bank's size and presence in the Charlotte multistate assessment area and the opportunities that exist for community development service.

MULTISTATE METROPOLITAN AREA

CRA RATING FOR CHATTANOOGA MULTISTATE: <u>SATISFACTORY</u>

The Lending Test is rated:

High Satisfactory
Low Satisfactory
The Service Test is rated:

High Satisfactory
High Satisfactory

Major factors supporting the rating include the following:

- The geographic distribution of loans reflects good penetration throughout the assessment area, and the distribution of loans by borrower income also reflects good penetration among customers of different income levels and businesses of different revenue sizes.
- The bank is a leader in making community development loans in its Chattanooga multistate assessment area.
- The bank provides an adequate level of qualified community development investments and grants that are responsive to several identified community development needs of the Chattanooga multistate assessment area.
- Retail services are reasonably accessible to the bank's geographies and individuals of different income levels in the assessment area.
- The bank provides a relatively high level of community development services throughout the assessment area.

SCOPE OF EXAMINATION

The time period, products, and affiliates evaluated for the Chattanooga multistate assessment area are consistent with the overall scope described in the Description of the Institution section of this report. SunTrust Bank's performance in the Chattanooga multistate assessment area was evaluated using full-scope examination procedures.

DESCRIPTION OF INSTITUTION'S OPERATIONS IN CHATTANOOGA, TN-GA MSA MULTISTATE ASSESSMENT AREA

Overview

The Chattanooga multistate assessment area is made up of Hamilton County in Tennessee and Catoosa County in Georgia. Chattanooga, the principal city, is located in Hamilton County, Tennessee. The assessment area is part of the six-county Chattanooga multistate MSA, which also includes Marion and Sequatchie counties in Tennessee, and Dade and Walker counties in Georgia. SunTrust Bank operates 25 branches in the assessment area, which represent 1.7 percent of the institution's branches and 1.2 percent of its deposits.

SunTrust Bank is a market leader in the assessment area. Overall, there are 20 financial institutions operating 119 branches and holding \$7.9 billion in deposits. According to the June 30, 2015 FDIC Summary of Deposits Report, SunTrust Bank holds \$1.8 billion in deposits inside the assessment area with 22.2 percent deposit market share, making it the 2nd largest deposit holder. First Tennessee Bank, NA is the largest deposit holder with 26.8 percent deposit market share.

SunTrust Mortgage and SunTrust Bank originated 3.4 percent and 1.4 percent of the HMDA-reportable loans in the Chattanooga assessment area in 2014, respectively. In 2014, SunTrust Mortgage ranked 5th and SunTrust Bank ranked 20th out of the 343 HMDA lenders in the market. HMDA-reportable loan production for both the bank and mortgage company decreased slightly in rank in 2015. Wells Fargo, Regions Bank, Mortgage Investors Group, and Quicken Loans were the top HMDA lenders in the market in 2015.

SunTrust is also a leading CRA small business lender in the assessment area. SunTrust Bank ranked 7th out of 65 CRA reporters in 2014 but increased its 2015 ranking to 2nd out of 67 CRA reporters in the market. American Express Bank FSB was the top CRA lender in the market, followed by several other national credit card lenders.

Population and Income Characteristics

The assessment area population in 2015 was 413,496, representing a 3.3 percent increase since 2010. The population in Hamilton County, Tennessee grew the fastest during this time period, increasing from 336,464 residents in 2010 to 348,121 in 2015. The city of Chattanooga, located in Hamilton County, is the 4th largest city in the state of Tennessee; 84.2 percent of the assessment area population lives in Hamilton County. ¹⁹

10

¹⁹ "Chattanooga (US Census)." GIS Mapping and Geographic Information System Data. The Reinvestment Fund, n.d. Web. 13 Sept. 2016. <ww.policymap.com/>.

For purposes of classifying borrower income, this evaluation uses the FFIEC estimated median family income for the Chattanooga, TN-GA MSA. As shown in the following table, between 2014 and 2015, the estimated median family income increased by \$4,800, or 8.9 percent.

Borrower Income Levels Chattanooga, TN-GA MSA

FFIEC Estimated		Low			Moderate			l	lle	Upper			
Median Family Income		0	-	49.99%	50%	-	79.99%	80%	-	119.99%	120%	-	& above
2014	\$54,200	0	-	\$27,099	\$27,100	-	\$43,359	\$43,360	-	\$65,039	\$65,040	-	& above
2015	\$59,000	0	-	\$29,499	\$29,500	-	\$47,199	\$47,200	-	\$70,799	\$70,800	-	& above

Poverty is on the rise across the assessment area. Of the two counties in the assessment area, Hamilton County had the higher poverty rate as of 2015, with 16.0 percent of the population living in poverty. Hamilton County's poverty rate is alarming because the county is so densely populated, meaning that more than 55,000 people are living below the poverty line. This places a heavy burden on the local network of supportive services for low-income individuals and means that a large percentage of people inside the assessment area do not have enough money to meet their basic needs. At 12.5 percent, Catoosa County's poverty rate was less as of 2015.²⁰

Economic Conditions

Hamilton County is the larger county in the assessment area by population and economic activity. The local economy is diverse and thriving, despite the most recent recession. Since 2008, companies including Volkswagen, Alstom, Amazon, and Sanofi Aventis have invested more than \$3 billion in the area. Chattanooga has spent decades building the city its planners describe as "authentic and evolving, lively and attractive, diverse and engaging, dignified and celebratory. 2015 was dubbed as "The Year of the Crane" as \$480 million in private investment fueled the construction of hundreds of hotel rooms and thousands of apartments (a portion of which will be affordable due to city tax incentives).

A key catalyst for the city's economic revival has been the Electric Power Board of Chattanooga (EPB), the city's public utility. EPB deployed \$228 million in local revenue bonds and \$111.6 million in funding from the Department of Energy's Smart Grid Investment. This allowed the city to build one of the world's most extensive municipal high-speed internet networks. This effort has had positive effects on the local economy.²¹

²¹ Katz, Bruce. "An Innovation District Grows in Chattanooga." The Brookings Institution, 29 Sept. 2015. Web. 7 Sept. 2016. https://www.brookings.edu/blog/the-avenue/2015/09/29/an-innovation-district-grows-in-chattanooga/.

In addition, the city recently opened the Edney Innovation Center, which is a ten-story 90,000 square-foot community and accelerator space for startups. The building also hosts events and workshops for small businesses.²²

In May 2011, Volkswagen Group of America opened a \$1.0 billion dollar car manufacturing facility located in Chattanooga, employing 3,200 and attracting many new auto suppliers. More recently, Volkswagen announced plans to expand the plant with plans to hire 2,000 more employees. This is a \$900 million factory expansion on the Chattanooga plant which will begin assembly of the midsize seven-seat SUV.²³

In 2016, the largest employment sectors were government, education and health services, and manufacturing. Top employers in the area include the Hamilton County Department of Education, BlueCross BlueShield of Tennessee, the Tennessee Valley Authority, and Erlanger Health System.²⁴ Combined, these businesses provide employment to more than 17,000 people.²⁵ There are also various institutions of higher learning located in the assessment area, including the University of Tennessee at Chattanooga, Chattanooga State Community College, and a branch of the University of Tennessee College of Medicine.

Small businesses play an important role in the local economy, a point that was stressed by community contacts and bank management, but credit remains tight, creating an opportunity for banks to increase financing for small businesses. As of 2014, there were over 43,000 jobs at firms with fewer than 50 employees throughout the assessment area.²⁶

According to 2015 Dun & Bradstreet information, there were 20,828 businesses within the Chattanooga multistate assessment area, 91.9 percent of which had total annual revenues less than or equal to \$1 million and were therefore considered to be small businesses. Of the total small businesses in the assessment area, 26.5 percent were in LMI tracts.

The number of small business loan originations in the assessment area declined drastically during the recession but has since stabilized and is showing signs of improvement. Small business lending activity to businesses with revenues less than or equal to \$1 million has been steadily increasing since 2012. Approximately 48.8 percent of business loans in the assessment area were provided to small businesses located in Hamilton County, while 50.2 percent were made to businesses in Catoosa County as of 2015.²⁷

The following chart provides unemployment rates for the two counties in the assessment area, the MSA and the states of Georgia and Tennessee in 2014 and 2015. Unemployment rates across the assessment area were below both states during this time period, with Catoosa County having the lowest rate of unemployment during the review period.

Unemployment Rates - Multi-State Chattanooga

Not Seasonally Adjusted. Source: Bureau of Labor Statistics

Census data indicates there were 175,417 housing units in the assessment area, of which 60.5 percent were owner-occupied, 29.6 percent were rental units, and 9.9 percent were vacant. Rental units are more concentrated in the LMI census tracts; 56.0 percent of all housing units in low-income tracts and 44.5 percent of housing units in moderate-income tracts are rental. The median age of housing stock is 36 years, though housing is much older in LMI census tracts compared to the assessment area overall.²⁸ These factors indicate that lending opportunities in LMI census tracts may be more limited than in other areas.

The Chattanooga area housing market is continuing to recover from the recent economic downturn. In 2014, the median home sales price was \$142,000, increasing by 7.0 percent to \$152,000 in 2015. During this same time period, the number of closed sales increased by 11.4 percent.²⁹ The assessment area's housing affordability ratio is 31.5, compared to the state of Tennessee at 32.3 and state of Georgia at 30.6, indicating that housing in the assessment area is relatively affordable but slightly less affordable than elsewhere in Tennessee and slightly more affordable than elsewhere in Georgia.³⁰

²⁸ "Chattanooga (US Census)." GIS Mapping and Geographic Information System Data. The Reinvestment Fund, n.d. Web. 13 Sept. 2016. http://www.policymap.com/>.

²⁹ "Annual Report on the Greater Chattanooga Housing Market." Greater Chattanooga Association of Realtors (2016): np. Web. 6 Sept. 2016. http://www.gcar.net/images/uploads/subpage/gcar_ANN_2015.pdf.

³⁰ Based on 2010 census data, the affordability ratio is defined as the median household income divided by the median housing value. A higher ratio means housing is considered more affordable and a lower ratio means the housing is considered less affordable.

The number of single-family permit issuances is also on the rise, although activity remains well below peak volumes from 2005. In 2015, 1,344 new single-family permits were issued across the assessment area, the highest level since 2008 but still about half of the 2,684 permits issued in 2005. Hamilton County has the most activity by far, accounting for 89.2 percent of permit activity in 2015.³¹

Loan origination volumes have also improved in recent years. After peaking at 6,466 loans in 2006, the number of annual home purchase loan originations across the assessment area continuously declined through 2011, bottoming at 2,878. From 2012 to 2015, production improved, with 5,019 home purchase loans originated across the assessment area in 2015. For loan refinances, activity exhibited the same declining trend through 2008, but then spiked in 2009 and 2012 to 3,347 and 6,430 loan refinances, respectively, a level of activity not seen since 2005. Refinance numbers have declined since 2012, with the total number of refinances in the assessment area at 3,356 in 2015.³²

Mortgage delinquency rates in the assessment area have improved. Overall, the percentage of seriously delinquent mortgages, defined as those 90 days past due and in the foreclosure process, declined between January 2014 and December 2015. Within the assessment area, the mortgage delinquency rate is higher in Catoosa County at 3.4 percent compared to Hamilton at 2.7 percent as of December 2015.³³

Housing costs are significant for many homeowners and renters living in the assessment area. In densely populated Hamilton County, 22.0 percent of homeowners and 45.9 percent of renters are considered costburdened, meaning that homeownership or rental costs account for more than 30.0 percent of household income. This places Hamilton County in the top 25.0 percent of counties in the nation for cost-burdened renters. Furthermore, many households in the area are considered severely cost-burdened, meaning they spend more than 50.0 percent of household income on homeownership or rental costs. In Hamilton County, 8.4 percent of homeowners and 23.4 percent of renters are severely cost-burdened.³⁴ While Catoosa County had lower levels of severely cost-burden for homeowners and renters than Hamilton County and the state of Georgia, there is an acute need for innovative housing solutions that reduce the cost burden on homeowners and renters in both counties.

Housing affordability challenges in the assessment area are further highlighted by the lack of affordable units available for LMI earners. In 2015, only 13.6 percent of owner-occupied housing units in Hamilton County and 20.6 percent in Catoosa County are considered affordable to a low-income family of four, which is lower than the statewide affordability rate of 21.8 percent in Tennessee and 22.0 percent in Georgia.

³⁴ "Chattanooga (US Census)." GIS Mapping and Geographic Information System Data. The Reinvestment Fund, n.d. Web. 13 Sept. 2016. .

For moderate-income families, the situation is similar, with about 23.0 percent of housing units in Hamilton County considered affordable, compared to 31.8 percent statewide. Catoosa County has more affordable housing units for moderate-income families than Hamilton County and is similar to the state at 31.8 percent.³⁵

Demographic Characteristics by Census Tract

The following table based on 2015 FFIEC Census and 2015 Dun & Bradstreet data presents key demographic and business information used to help develop a performance context for the assessment area.

2015 FFIEC Census Data and 2015 D&B Information

Credit and Community Development Needs

To better understand the community development and economic landscapes, community development experts were contacted. These individuals discussed the various opportunities and challenges across the region as well as how financial institutions can be responsive to local community development needs through lending, investment and/or service activities. Bank management also provided input on the performance context issues impacting the assessment area. This information is reflected in the appropriate sections below.

Generally, community contacts stated that banks are not as proactive in the Chattanooga market in addressing community development needs or in engaging in more innovative or complex financing tools. One contact also noted that banks need more education on community investment needs in the market. Additionally, the contact stated that the highest priority community development needs for the area are jobs, education, and affordable housing.

There are several nonprofit housing and community development organizations active in the region that develop affordable housing and provide housing counseling to prospective buyers, though additional investment in capacity is needed as discussed by community contacts and detailed in the Chattanooga Housing Study. The study found that housing affordability, particularly for the lowest-income residents, is a significant issue. Affordable single-family homes, particularly in neighborhoods with better schools, are also a need. In response, the planning commission developed a strategy to increase housing options throughout the region, with different proposals for suburban and urban areas. Within the urban core of Chattanooga, there is a multi-pronged strategy that focuses on targeted neighborhood revitalization; increasing the number of affordable rental and homeownership units; developing incentives to encourage mixed-income developments; creating incentives to include affordable units in any new development; creating a financing mechanism to help with owner-occupied rehabilitation of substandard housing units or to assist first time homebuyers with purchasing and revitalizing homes; and increasing nonprofit capacity to develop affordable rental housing.³⁶ The housing strategy requires participation from public, private, and nonprofit partners, and offers a number of opportunities for banks to engage.

Other opportunities in which financial institutions can engage include the Chattanooga 2.0 community-led program and other job training and affordable housing initiatives that are underway and in need of financing and/or support. The Chattanooga 2.0 initiative seeks to transform education and workforce opportunities in the area by evaluating the current education system and strategizing long-term goals to improve students' academic success and to ensure that by 2025, 75.0 percent of the adult population attains post-secondary education to prepare them for higher-skilled jobs.

The Chattanooga market has fared better than other metropolitan areas since the recession, but in certain neighborhoods, foreclosures and abandoned homes are a concern. One of the community contacts stated that the urban neighborhoods of Chattanooga with the exception of Southside and Northshore were all low- or

_

³⁶ Chattanooga-Hamilton County, Regional Planning Agency "Chattanooga Housing Study." Accessed on September 7, 2016; Available from http://www.chcrpa.org/HousingStudy.htm

moderate-income neighborhoods. In downtown Chattanooga, the River City Company is a key player for revitalization initiatives. The organization works in partnership with local government, the private sector, and the philanthropic sector to perpetuate downtown Chattanooga's growth, from creating urban housing and entertainment venues to encouraging private commercial investment. The River City Company is currently working on projects in downtown Chattanooga to revitalize specific areas and increase economic activity, presenting a number of opportunities for institutions looking to partner on downtown commercial and residential redevelopment projects via loans and investments.³⁷

Financial education and access to affordable financial services are another priority in the local market. Financial institutions can be responsive to the financial needs of the unbanked and underbanked by providing education on bank accounts and increasing access to mainstream financial products such as deposit and savings accounts. United Way of Greater Chattanooga has a program called Creating Assets, Savings and Hope (CASH), which helps families and individuals increase their financial stability through better financial literacy, while increasing access to tax credits, income supports and asset development. Training sessions are open to any organization that provides services to people who may find themselves in stressful financial situations.

CONCLUSIONS WITH RESPECT TO PERFORMANCE TESTS IN CHATTANOOGA, TN-GA MSA MULTISTATE ASSESSMENT AREA

LENDING TEST

SunTrust Bank's lending performance in the Chattanooga multistate assessment area is rated high satisfactory. The geographic distribution of loans reflects good penetration throughout the assessment area. The distribution of borrowers also reflects good penetration among borrowers of different income levels and businesses of different revenue sizes. Additionally, SunTrust Bank is a leader in making community development loans.

During the review period, SunTrust reported 1,116 HMDA-reportable loans compared to 879 small business loans in the Chattanooga multistate assessment area. As such, HMDA-reportable lending was weighted more heavily than small business lending in determining the bank's lending test rating in the assessment area. In total, 1.1 percent of the bank's HMDA-reportable and small business lending by number of loans and 0.7 percent by dollar volume were originated in the Chattanooga multistate assessment area compared to 1.2 percent of the bank's deposits in the assessment area.

For the lending test analysis, lending performance in low-, moderate-, middle-, and upper-income census tracts and to low-, moderate-, middle-, and upper-income borrowers was considered for each product; however, comments for activity in middle- and upper-income tracts and to middle- and upper-income borrowers are only included when they were material to the outcome of the analyses. Details of the bank's mortgage and small business lending and information regarding lending by peers can be found in Appendix G.

³⁷ River City Company. Accessed on September 7, 2016; available from http://www.rivercitycompany.com/new/rcc

Geographic Distribution of Loans

For this analysis the geographic distribution of HMDA-reportable and small business lending, including both originations and purchases, was compared with available demographic information. Performance context information and aggregate lending data were also taken into consideration. Considering these factors, SunTrust Bank's geographic distribution of loans reflects good penetration throughout the assessment area.

Home Purchase Loans

Home purchase lending in low-income tracts is poor. During the review period, the bank originated five (1.3 percent) of its home purchase loans in low-income tracts, which was less than the share of owner-occupied units in these tracts. Additionally, the bank's performance was less than aggregate lender performance during the review period.

Home purchase lending in moderate-income tracts is adequate. During the review period, the bank originated 9.6 percent of its home purchase loans in moderate-income tracts, where 10.1 percent of the owner-occupied units are located. Additionally, SunTrust Bank's performance was similar to aggregate lender performance in 2014 and greater than aggregate lender performance in 2015.

Home Refinance Loans

Home refinance lending in low-income tracts is adequate. During the review period, the bank originated 2.2 percent of its home refinance loans in low-income tracts, where 33.3 percent of the owner-occupied units are located. Additionally, SunTrust Bank's performance was similar to aggregate lender performance during the review period.

Home refinance lending in moderate-income tracts is good. During the review period, the bank originated 10.6 percent of its refinance loans in moderate-income tracts, which compares favorably to the 10.1 percent of owner-occupied units. Additionally, the bank's performance was greater than aggregate lenders during the review period.

Home Improvement Loans

Home improvement lending in both LMI tracts is excellent. During the review period, the bank's lending exceeded both the demographic and aggregate lending performance.

Small Business Loans

The bank's small business lending in low-income tracts is excellent. The bank's lending during the review period at 9.4 percent was greater than the percentage of small businesses located in these tracts at 6.1 percent. Additionally, the bank outperformed aggregate lenders in 2014, but was similar to aggregate in 2015.

SunTrust Bank's small business lending in moderate-income tracts is good. During the review period, the bank originated 25.5 percent of its small business loans in moderate-income tracts, compared to 20.4 percent of the small businesses located in the moderate-income tracts. The bank's performance was greater than aggregate lenders in 2014, but less than aggregate lenders in 2015.

Lending to Borrowers of Different Incomes and Businesses of Different Sizes

The distribution of loans based on borrower income or gross annual revenues is good. For this analysis, the distribution of HMDA-reportable lending across borrower income levels and small business lending across business revenue sizes was compared to available demographic information.

Home Purchase Loans

Home purchase lending to low-income borrowers is good. Although the bank's lending at 7.5 percent was less than the demographic at 20.3 percent, the bank's performance was significantly greater than aggregate lending during the review period.

Home purchase lending to moderate-income borrowers is also good. The bank's percentage of home purchase lending to moderate-income borrowers at 18.4 percent exceeded the percentage of moderate-income families in the assessment area at 16.2 percent. However, the bank's performance was less than aggregate lending performance in 2014, but exceeded aggregate lending performance in 2015.

Home Refinance Loans

Home refinance lending to low-income borrowers is excellent. Although the bank's lending to low-income borrowers at 13.0 percent was less than the demographic at 20.3 percent, the bank's performance significantly exceeded aggregate lending during the review period.

Home refinance lending to moderate-income borrowers is also excellent. The bank's percentage of home refinance lending to moderate-income borrowers at 16.7 percent was slightly greater than the percentage of moderate-income families in the assessment area at 16.2 percent. Additionally, the bank's performance was greater than aggregate lending performance during the review period.

Home Improvement Loans

Home improvement lending to low-income borrowers is excellent. Although the bank's lending to low-income borrowers at 17.2 percent was less than the demographic at 20.3 percent, the bank's lending outperformed aggregate lenders during the review period.

Home improvement lending to moderate-income borrowers is also excellent. SunTrust Bank's percentage of home improvement loans to moderate-income borrowers at 22.8 percent exceeded the percentage of moderate-income families in the assessment area at 16.2 percent. The bank's home improvement lending to moderate-income borrowers was better than the aggregate performance in 2014, but less than the aggregate lending performance in 2015.

Small Business Loans

The distribution of small business lending by business revenue size is good considering the bank's performance relative to the aggregate. The bank's lending to small businesses exceeded the aggregate in both 2014 and

2015, but was below the percentage of small businesses in the assessment area. However, of the 879 small business loans originated during the review period, 827 (94.1 percent) were in amounts of \$250,000 or less, which typically represent loan amounts requested by small businesses.

Community Development Lending

SunTrust is a leader in making community development loans in the Chattanooga multistate assessment area. The bank originated 14 community development loans totaling \$79.6 million during the review period. Loans were responsive to many community development needs in the assessment area, including the provision of affordable housing, community services targeted to LMI individuals, promoting economic development by financing small business, and revitalizing and stabilizing low- or moderate-income geographies. The bank provided \$56.6 million towards economic development activities; \$18.6 million in loans to revitalize and stabilize LMI geographies; \$2.2 million supporting community services to LMI individuals; and \$2.1 million in support of affordable housing. SunTrust Bank's community development lending exhibits excellent responsiveness to the community development and credit needs of the assessment area.

Examples of community development lending include but are not limited to:

- A NMTC loan for \$525,000 financing a small business located in a highly distressed geography with a 60.0 percent poverty rate and an unemployment rate 4.8 times the national average;
- A \$9.3 million loan to support a low-income housing tax credit (LIHTC) project, consisting of 80 units of senior housing, all of which are restricted for senior tenants earning below 60.0 percent of the area median income (AMI);
- Three loans totaling \$15.5 million to help relocate a distribution center, which will create 50 new jobs for LMI individuals; and
- Two loans totaling \$2 million to a nonprofit organization that provides education and outreach programs for children and adults with disabilities including developmental delays, cerebral palsy, and autism spectrum conditions. It offers a lending library, community workshops, training and consultation services for professionals in education, health care, and related fields. The organization receives over 50.0 percent of its revenue from Medicaid.

INVESTMENT TEST

The bank's investment test performance is rated low satisfactory. SunTrust Bank makes an adequate level of qualified investments and grants relative to the bank's presence in the assessment area and available community development investment opportunities.

The bank made investments (excluding contributions) totaling \$14.2 million in the assessment area; of that, \$1.4 million was invested during the review period in a security backed by a Ginnie Mae mortgage on an affordable multifamily project in the assessment area. The prior period investments provided financing for affordable housing through investments in LIHTC projects and mortgage-backed securities, and support for economic development through investments in securities backed by SBA 504 loans.

SunTrust Bank also contributed \$563,400 to various community development organizations during the review period. Nearly all of the contributions supported community services, including \$225,000 to United Way for programs targeting LMI individuals. Other donations supported nonprofits addressing a range of important community needs, such as financial education, homeownership counseling, and free tax assistance; support for schools and afterschool programs that serve primarily LMI youth; workforce development; affordable healthcare for LMI individuals; support services for the homeless; and the provision of emergency assistance. These donations helped many organizations that are working to address the critical needs facing the lowest-income residents in the assessment area.

Overall, the bank's investment activity during the review period was adequate but does not demonstrate a significant level of responsiveness to a range of community needs, including different types of affordable housing, small business financial assistance, and revitalization of LMI neighborhoods.

SERVICE TEST

SunTrust Bank's service test performance in the Chattanooga multistate assessment area is rated high satisfactory based on the accessibility of the bank's retail services and the relatively high level of community development services.

Retail Services

SunTrust Bank's delivery systems in the assessment area are reasonably accessible to the bank's geographies and individuals of different income levels. The distribution of 25 branch offices and 30 ATMs as of December 31, 2015, was compared to the distribution of households and businesses among the tract categories within the assessment area. The bank has one branch located in a low-income tract, representing 4.0 percent of total branches compared to 6.8 percent of households and 6.9 percent of businesses located in these tracts. The bank has six branches located in moderate-income tracts, representing 24.0 percent of total branches compared to 14.1 percent of households and 21.7 percent of businesses located in moderate-income tracts. Alternative delivery systems, such as ATMs, toll-free telephone and text banking, and online banking, were also considered in determining accessibility. During the review period, one branch was closed in a low-income tract; however, one branch was opened and one branch was closed in upper-income tracts. The record of opening and closing of branches has generally not adversely affected the accessibility of the bank's delivery systems, particularly to LMI geographies and individuals in the assessment area.

Banking services and hours of operations do not vary in a way that inconveniences the assessment area, particularly LMI geographies or to LMI individuals. SunTrust Bank provides extended hours in all branch offices located in LMI tracts. The bank offers weekend hours at two branch offices located in moderate-income tracts; however, the bank offers weekend hours more frequently at branches in middle- and upper-income tracts. Bank products, services and standard business hours are consistent throughout the assessment area.

Community Development Services

SunTrust Bank provides a relatively high level of community development services in the Chattanooga multistate assessment area. During the review period, SunTrust Bank employees provided 1,355 service hours in various capacities for community development organizations. Bank employees engaged in providing approximately 220 economic development service hours, 23 affordable housing hours, and approximately 1,112 community service hours. Notably, approximately 30.0 percent of service hours were board service at community development organizations or committee memberships. SunTrust employees were active in volunteering with a healthcare organization providing services to indigent patients; local neighborhood associations; and providing financial education. This performance is considered good given SunTrust Bank's size and presence in the assessment area and the opportunities that exist for community development service.

MULTISTATE METROPOLITAN AREA

CRA RATING FOR MEMPHIS MULTISTATE: SATISFACTORY

The Lending Test is rated: High Satisfactory

The Investment Test is rated: Outstanding

The Service Test is rated: <u>High Satisfactory</u>

Major factors supporting the rating include the following:

- The geographic distribution of loans reflects good penetration throughout the assessment area, and the distribution of loans by borrower income reflects adequate penetration among customers of different income levels and businesses of different revenue sizes.
- The bank is a leader in making community development loans in its Memphis multistate assessment area.
- The bank provides an excellent level of qualified community development investments and grants that are responsive to several identified community development needs of the Memphis multistate assessment area.
- Retail services are reasonably accessible to the bank's geographies and individuals of different income levels in the assessment area.
- The bank provides a relatively high level of community development services throughout the assessment area.

SCOPE OF EXAMINATION

The time period, products, and affiliates evaluated for the Memphis multistate assessment area are consistent with the overall scope described in the Description of the Institution section of this report. SunTrust Bank's performance in the Memphis multistate assessment area was evaluated using full-scope examination procedures.

DESCRIPTION OF INSTITUTION'S OPERATIONS IN MEMPHIS, TN-MS-AR MULTISTATE MSA ASSESSMENT AREA

Overview

The Memphis multistate assessment area includes Crittenden County in Arkansas, Desoto County in Mississippi, and Shelby County in Tennessee. The assessment area is part of the nine-county Memphis TN-MS-AR multistate MSA, which also includes Benton, Marshall, Tate, and Tunica counties in Mississippi and Fayette and Tipton counties in Tennessee.³⁸ As of December 2015, SunTrust Bank operated 30 branches in the assessment area.

According to the June 30, 2015 FDIC Summary of Deposits Report, SunTrust ranked 3rd out of 47 banks in the assessment area with an 11.0 percent deposit market share and \$2.8 billion in deposits. First Tennessee Bank NA, based in Memphis, is the dominant financial institution, holding 32.2 percent of all deposits.

HMDA lending is competitive in the Memphis area. SunTrust Bank and SunTrust Mortgage combined had an average of 4.2 percent of total HMDA-reportable lending in both 2014 and 2015. STB ranked 28th while STM ranked 31st out of the 431 HMDA lenders in the market in 2014. In 2015, STM increased in ranking while STB remained the same. Wells Fargo, IberiaBank Mortgage Company, Quicken Loans, and Community Mortgage Corporation were the top HMDA lenders in the market in 2015.

Regarding CRA lending, SunTrust Bank ranked 12th with 395 or 2.6 percent of total CRA-reportable loans in 2015. That marks an increase from the 290 CRA small business loans originated in 2014. American Express is the dominant CRA reporter in the market, followed by Capital One Bank and GE Capital Bank.

Population and Income Characteristics

The estimated population in 2015 for the Memphis assessment area was approximately 1.2 million people, representing a 1.8 percent increase from 2010.³⁹ Memphis, the principal city of the area, is located in Shelby County and is the largest city in Tennessee. Over 81.0 percent of the assessment area population lives in Shelby County. DeSoto County is the only county in the Memphis metro area to have significant growth since 2010 resulting from in-migration as opposed to naturally occurring population shifts.

³⁹ QuickFacts. US Census Bureau, n.d. Web. 10 Jun. 2017. http://quickfacts.census.gov

³⁸ Greater Memphis Chamber, n.d. Web. 6 Jun. 2017. http://www.memphischamber.com/Community/Live/About-Memphis

The assessment area contains 274 census tracts; 2010 census data indicates that there were 59 (21.5 percent) low-income census tracts, 61 (22.3 percent) moderate-income tracts, 69 (25.2 percent) middle-income tracts, 80 (29.2 percent) upper-income tracts, and 5 (1.9 percent) unknown-income tracts.

For purposes of classifying borrower income, this evaluation uses the FFIEC estimated median family income. The following table sets forth the estimated median family income for the Memphis, TN-MS-AR MSA in 2014 and 2015, and indicates that the estimated median family income increased by \$600, or 1.0 percent, during the review period.

Borrower Income Levels Memphis TN-MS-AR, MSA

FFIEC Estimated		Low			Low			w Moderate			N	lle	Upper			
Median	0	-	49.99%	50%	-	79.99%	80%	-	119.99%	120%	-	& above				
2014	\$59,800	0	-	\$29,899	\$29,900	-	\$47,839	\$47,840	-	\$71,759	\$71,760	-	& above			
2015	\$60,400	0	-	\$30,199	\$30,200	-	\$48,319	\$48,320	-	\$72,479	\$72,480	-	& above			

Poverty and financial instability is a concern in the assessment area, particularly in Memphis and Shelby County, where the percentage of families living below the poverty level continues to increase each year. For the Memphis MSA, the percentage of families in poverty was 14.9 percent between 2011 and 2015, while the poverty rate was 22.7 percent and 16.7 percent in Memphis and Shelby County, respectively.⁴⁰ This rate, however, increases drastically to almost 50.0 percent in both jurisdictions for families headed by a single female with children.

Within the assessment area, 40.0 percent of families are considered LMI, which is comparable to the percentage of LMI families in the MSA and in each state. 41.7 percent of the families living in low-income tracts and 24.1 percent of families in moderate-income tracts have incomes below the poverty level, which may limit lending opportunities.

Economic Conditions

Strategically located on the Mississippi River, Memphis is one of the nation's most significant distribution and logistics hubs. It is served by five major freight railroads, two national interstate highways, an inland port, and more than 400 trucking companies. In addition, it is home to the world's second busiest airport in terms of cargo tonnage, and FedEx is the region's largest employer. Transportation and wholesale trade represent 27.4 percent of the employment base and are clearly vital components of the local economy. The other significant employment sectors include professional and business services, education and health services, and government.

⁴⁰ "Memphis, GA (US Census)." *GIS Mapping and Geographic Information System Data*. The Reinvestment Fund, n.d. Web. 10 June. 2017. http://www.policymap.com/>.

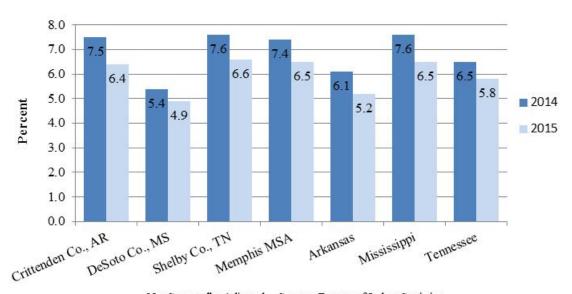

⁴¹ Beem, Richard. "Memphis, TN-MS-AR." Moody's Analytics. IHS Economics, Fall 2016. Web. 12 June 2017. https://www.economy.com/>.

Besides FedEx, other major employers include Methodist Healthcare, Baptist Memorial Health Care Corporation, First Horizon National Corporation, University of Tennessee Health Science Center, and St. Jude Children's Research Hospital.⁴² It is worth noting that the trade and transportation sector provides decent paying jobs without the need of a post-high school degree. The average annual wage in warehousing and transportation is \$59,551 as compared to \$48,838 for all industries in the Memphis MSA.⁴³

Small businesses also play an important role in the Memphis economy. According to 2015 Dun & Bradstreet information, there were 45,342 businesses in the assessment area, of which 90.6 percent had total annual revenues less than or equal to \$1 million and were therefore considered to be small businesses.⁴⁴ Additionally, 28.2 percent of small businesses in the assessment area are located in LMI tracts. Lending opportunities to this segment increased by 34.2 percent between 2013 and 2015 in Shelby County, with 5,971 loans made in 2015. During this same period, loans made to firms with revenues under \$1.0 million represented a 49.6 percent share of total small business loans, which is a higher proportion than previous years and an indication that there may be fewer obstacles for smaller firms to access credit in the market.

The following graph illustrates the unemployment rates for each county within the assessment area, the relevant statewide rates and the Memphis MSA. Overall, unemployment rates declined during the review period for all three counties, but remained high relative to their state rates, with the exception of Desoto County, Mississippi, which had the lowest unemployment rate in 2015.

Unemployment Rates - Multi-State Memphis

Not Seasonally Adjusted. Source: Bureau of Labor Statistics

⁴³ "Memphis, GA (US Census)." GIS Mapping and Geographic Information System Data. The Reinvestment Fund, n.d. Web. 10 June. 2017. .

⁴⁴ FRB Atlanta Calculations of Dun & Bradstreet, 2010 American Community Survey data

Census data indicates there were 477,545 housing units in the assessment area in 2010, of which 55.3 percent were owner-occupied, 31.6 percent were rental units, and 13.1 percent were vacant. In low-income tracts, only 29.4 percent of housing units were owner-occupied. In moderate-income tracts, 43.3 percent of housing units were owner-occupied. Rental and vacant units are highly concentrated in LMI tracts, and housing is much older in these areas compared to the assessment area overall. These factors suggest that lending may be more challenging in LMI areas than in other areas.

The housing market in the Memphis metropolitan area is stable, with modest annual increases in home sales and home values. The median home price for the assessment area in December 2016 was \$169,300, representing an increase of 14.3 percent from January 2013.⁴⁵ Median home prices in Shelby and Desoto counties are nearly \$7,000 higher than in the assessment area overall, while Crittenden County had the lowest median home price at approximately \$156,000. For the 12 months ending December 2016, annual home sales increased by 11.0 percent and home values appreciated by 7.0 percent. In terms of affordability, the Memphis assessment area had a Housing Affordability Index (HAI) of 158.0.⁴⁶ The affordability index measures how affordable the median home price is to households earning the median income, assuming current mortgage rates. A baseline of 100 indicates that median home prices are in line with median household income; an index greater than 100 indicates the housing is more affordable.

The market is also experiencing lower delinquency levels. The percentage of seriously delinquent mortgages in the assessment area (defined as more than 90 days past due or in foreclosure) fell from 6.0 percent in December 2013 to 5.0 percent in December of 2015, but remains higher than the national rate.⁴⁷ All counties in the assessment area exhibit similar elevated delinquency rates, with Crittenden County having the highest at 7.0 percent in December 2015.⁴⁸ Furthermore, the Memphis Area Association of Realtors reports that foreclosed properties continue to decline as a proportion of residential total sales.⁴⁹ Also, Zillow.com reports that 13.1 percent of homeowners in Shelby County were still underwater with their mortgages as of September 2016, down from 25.0 percent in September 2014, meaning that although improving, foreclosures continued to pose risks to the recovery of the housing market in the assessment area.⁵⁰ While many homeowners lacked the equity needed to borrow against their homes for many years, the rise in home values in recent years has resulted in increased borrowing ability for many residents.

Demographic Characteristics by Census Tract

The following table based on 2015 FFIEC Census and 2015 Dun & Bradstreet data presents key demographic and business information used to help develop a performance context for the assessment area.

Credit and Community Development Needs

According to a local community contact, current economic conditions appear to be stable in the aggregate; however, conditions have deteriorated for LMI segments of the community over the last two years, and there are well-defined neighborhoods with more pressing investment needs than others. Within the greater Memphis area, many neighborhoods located both north and south of what is known locally as "Poplar Corridor" make up a substantial part of the MSA's LMI areas. North of Poplar Corridor, neighborhoods such as Raleigh, Frayser, North Memphis, Smokey City, Douglass, and New Chicago are among the more depressed LMI neighborhoods. South of the corridor are located Westview, Parkway Village, Hickory Hill, and Southeast Memphis, which are among the neighborhoods having the greatest investment and development needs. There are multiple opportunities for lending institutions to partner with Memphis area nonprofit organizations, to invest in these LMI neighborhoods, or to otherwise support the work of community development corporations (CDCs) serving these neighborhoods. However, local community contacts indicate that receiving support has been limited, and the corporate community, including financial institutions, has opportunity for improvement in order to foster community development on a meaningful scale.

A report entitled "Community Development in Memphis" reviews CDC capacity, performance, and resources of CD organizations serving the Memphis community.⁵¹ Based on survey responses, it reports that the relative share of CDC financial support derived from corporations, which includes support from depository institutions, makes up merely two percent of Memphis Area CDC funding. This amount is considerably less in the Memphis area compared to corporate and financial sector funding of CDCs in comparable metropolitan areas. While the existing CDC and nonprofit organizations in Memphis are well-established and knowledgeable, this report along with community contacts state that without infrastructure and operational support they cannot produce the volume of projects necessary to profoundly improve conditions in LMI neighborhoods.

In a September 2016 article titled "All Low- and Moderate-Income Areas Are Not Created Equal," the author reports that 77.4 percent of the population in LMI neighborhoods in Memphis (nearly eight out of every 10 people) are credit constrained. Credit constrained neighborhoods are described as having poor, fair, or no credit history. The author also indicates that these credit constrained neighborhoods are usually located in the south and they tend to have relatively high poverty rates. The prevalence of poverty and economic challenges facing LMI residents and neighborhoods in Memphis, in particular, highlight the importance of strategic partnerships with community service organizations within the assessment area. Financial institutions have aggressively participated with BankOn Memphis to increase access to mainstream banking products. However, there are a great deal of other opportunities in which financial institutions can partake, such as helping organizations provide homebuyer and financial education, supporting asset and credit building initiatives, and underwriting job training programs. Therefore, financial institutions must remain engaged with local community-based organizations, nonprofit credit unions, and community development financial institutions (CDFIs) to create and contribute to community development service or investment opportunities that support more innovative, comprehensive financial stability efforts that are responsive and sustainable.

CONCLUSIONS WITH RESPECT TO PERFORMANCE TESTS IN MEMPHIS, TN-MS-AR MULTISTATE MSA ASSESSMENT AREA

LENDING TEST

SunTrust Bank's lending performance in the Memphis multistate assessment area is rated high satisfactory. The geographic distribution of loans reflects good penetration throughout the assessment area. The distribution of borrowers reflects adequate penetration among borrowers of different income levels and businesses of different revenue sizes. Additionally, SunTrust Bank is a leader in making community development loans.

During the review period, SunTrust reported 1,037 HMDA-reportable loans compared to 684 small business loans in the Memphis multistate assessment area. As such, HMDA-reportable lending was weighted more heavily than small business lending in determining the bank's lending test rating in the assessment area. In total, 0.9 percent of the bank's HMDA-reportable and small business lending by number of loans and 0.7 percent by dollar volume were originated in the Memphis multistate assessment area, compared to 1.9 percent of the bank's deposits in the assessment area.

For the lending test analysis, lending performance in low-, moderate-, middle-, and upper-income census tracts and to low-, moderate-, middle-, and upper-income borrowers was considered for each product; however, comments for activity in middle- and upper-income tracts and to middle- and upper-income borrowers are only included when they were material to the outcome of the analyses. Details of the bank's mortgage and small business lending and information regarding lending by peers can be found in Appendix G.

Geographic Distribution of Loans

For this analysis the geographic distribution of HMDA-reportable and small business lending, including both originations and purchases, was compared with available demographic information. Performance context information and aggregate lending data were also taken into consideration. Considering these factors, SunTrust Bank's geographic distribution of loans reflects good penetration throughout the assessment area.

Home Purchase Loans

Home purchase lending in low-income tracts is very poor. During the review period, the bank originated three (1.0 percent) home purchase loans in low-income tracts, which was less than the percentage of owner-occupied units located in these tracts. Also, the bank's home purchase lending in low-income tracts was less than the aggregate lenders for both years of the review period.

Home purchase lending in moderate-income tracts is poor. During the review period, SunTrust originated 3.8 percent of its home purchase loans in moderate-income tracts, which contain 17.2 percent of the owner-occupied units. Additionally, the bank's performance was also less than aggregate lenders during the review period.

Home Refinance Loans

Home refinance lending in low-income tracts is poor. SunTrust originated seven (2.3 percent) home refinance loans in low-income tracts, compared to 9.1 percent of owner-occupied units in these tracts. The bank's performance was also less than aggregate lender performance during the review period.

Home refinance lending in moderate-income tracts is adequate. During the review period, SunTrust originated 10.4 percent of its home refinance loans in moderate-income tracts, where 17.2 percent of the owner-occupied units are located. However, the bank's performance was greater than aggregate lenders during the review period.

Home Improvement Loans

Home improvement lending in low-income tracts is good. The bank's percentage of home improvement loans in low-income tracts at 11.7 percent exceeded the percentage of owner-occupied housing units in these tracts at 9.1 percent. The bank's home improvement lending in these tracts exceeded aggregate in 2014, but was slightly less than aggregate in 2015.

Home improvement lending in moderate-income tracts is also good. The bank's percentage of home improvement loans in moderate-income tracts exceeded the percentage of owner-occupied housing units in these tracts. The bank also outperformed the aggregate lenders in moderate-income tracts during the review period.

Small Business Loans

Small business lending in both LMI census tracts is excellent. During the review period, the percentage of small business loans in both these tracts exceeded the percentage of small businesses located in these tracts. Additionally, the bank's performance was also greater than aggregate lenders during the review period.

Lending to Borrowers of Different Incomes and Businesses of Different Sizes

The distribution of loans by borrower income or revenue size of businesses is adequate. For this analysis, the distribution of HMDA-reportable lending across borrower income levels and small business lending across business revenue sizes was compared to available demographic information.

Home Purchase Loans

Home purchase lending to low-income borrowers is poor. SunTrust Bank's home purchase lending to low-income borrowers was substantially less than the percentage of families classified as low-income in these tracts. The bank's performance at 3.6 percent was comparable to the aggregate lender performance at 3.9 percent in 2014, but less than aggregate lenders in 2015.

Home purchase lending to moderate-income borrowers is good. Lending to moderate-income borrowers was greater than the percentage of moderate-income families in the assessment area and also greater than aggregate lenders during the review period.

Home Refinance Loans

Home refinance lending to low-income borrowers is adequate. The percentage of home refinance loans to low-income borrowers was less than the percentage of low-income families in the assessment area. However, the bank's lending performance was similar to the aggregate in 2014 and slightly greater than aggregate in 2015.

Home refinance lending to moderate-income borrowers is also adequate. The percentage of home refinance loans to moderate-income borrowers was less than the percentage of moderate-income families in the assessment area; the bank's lending performance was similar to the aggregate in 2014, but less than the aggregate lending performance in 2015.

Home Improvement Loans

Home improvement lending to low-income borrowers is adequate. SunTrust Bank's home improvement lending to low-income borrowers was less than the percentage of families classified as low-income; the bank's lending performance was slightly greater than aggregate lenders in 2014, but less in 2015.

Home improvement lending to moderate-income borrowers is good. SunTrust Bank's home improvement lending to moderate-income borrowers exceeded the percentage of families classified as moderate-income. Additionally, the bank's performance was greater than aggregate lending performance during the review period.

Small Business Loans

The distribution of small business lending by business revenue size is good. While the percentage of small business loans to businesses with revenues of \$1 million or less was less than the percentage of small businesses in the assessment area during the review period, SunTrust Bank's performance was significantly greater than the aggregate lending performance. Additionally, of the 684 small business loans originated during the review period, 604 loans (88.3 percent) were in amounts of \$250,000 or less, which typically represent loan amounts requested by small businesses.

Community Development Lending

SunTrust is a leader in making community development loans in the Memphis multistate assessment area. The bank originated 24 community development loans totaling \$162.3 million during the review period. Loans were responsive to many community development needs in the assessment area, including the provision of affordable housing, community services targeted to LMI individuals, promoting economic development by financing small businesses, and revitalizing and stabilizing low- or moderate-income geographies. The bank provided \$121.7 million in loans to revitalize and stabilize LMI geographies; \$29.2 million supporting community services to LMI individuals; \$6.5 million in support of affordable housing; and \$4.9 million towards economic development activities. SunTrust Bank's community development lending exhibits excellent responsiveness to the community development and credit needs of the assessment area.

Examples of community development lending include but are not limited to:

- Three loans for a total of \$60 million to redevelop a major building located in an Empowerment Zone and eligible for NMTCs that had been empty and distressed for over 20 years. The redevelopment is anticipated to create 2,500 jobs. The project will house a charter school, a Goodwill Adult School, and various nonprofits that will serve a large volume of LMI individuals with healthcare, education, and other services.
- Three loans totaling \$3.9 million for financing energy conservation installations and improvements to an office building in a low-income geography. Among other tenants, the building houses the City of Memphis Renaissance Business Center, which provides training, counseling, and assistance to small businesses. The Renaissance Business Center offers access to a wide variety of loans to meet small businesses' needs, including loan programs to provide financing to assist small, minority and womenowned businesses having difficulty qualifying for business loans.
- A loan for \$7.3 million for the construction of a 64-unit LIHTC multifamily development. The development will serve tenants earning less than 60.0 percent of the area median income (AMI). Some of the units are reserved for tenants earning less than 50.0 percent of AMI. Furthermore, 23 units will be fully equipped to serve persons with disabilities in accordance with the American Disabilities Act and the Fair Housing Act.
- Two loans totaling \$8.6 million to support a private ministry that operates a food pantry, clothes closet, career center, and a 24-unit affordable senior housing complex. The career center offers programs targeted to LMI individuals that include computer classes, free income tax preparation, and resume writing.

INVESTMENT TEST

SunTrust Bank's performance under the investment test is rated outstanding, as evidenced by the excellent level of qualified investment and grants in the Memphis multistate assessment area coupled with the responsiveness of the bank's activities to a number of community development needs. The bank demonstrated leadership by supporting several significant community development efforts in the assessment area.

The bank made investments (excluding contributions) totaling \$53.9 million in the assessment area; of that, \$44.2 million was invested during the review period. The investment portfolio includes a number of investment vehicles, including, but not limited to, Low Income Housing Tax Credits, LIHTC investment funds, NMTCs, securities backed by government guaranteed mortgages on multifamily properties, and bonds that finance HUD and SBA programs. During the current review period, the bank invested nearly \$29.8 million to create or preserve affordable housing and \$14.9 million to support revitalization and stabilization of LMI communities.

SunTrust Bank also contributed \$728,500 to nonprofit organizations and community development initiatives during the review period. Specifically, the bank provided grants totaling \$632,000 to nonprofits that offer community services to LMI individuals, \$80,000 for economic development initiatives, and \$16,500 for affordable housing. As noted earlier, the bank also had investments and contributions that served a broader regional area that includes the bank's assessment area.

The bank's investments and contributions addressed several community development needs in the assessment area, including affordable housing and revitalization and stabilization of LMI communities, specifically in the core of downtown Memphis. Several noteworthy investments are highlighted below.

- An \$11.0 million investment in a new LIHTC property, which is part of a larger effort led by the Memphis Housing Authority to redevelop a distressed 460-unit public housing community. The redevelopment project, which will include a mix of public housing, LIHTC and other affordable housing, and market rate rental units, is funded by a wide variety of public and private funding sources, including SunTrust Bank. This project represents an innovative strategy to eliminate the concentration of poverty in traditional public housing projects by encouraging mixed-income housing, which in turn will help stabilize the surrounding low-income neighborhoods.
- A \$7.7 million LIHTC investment to support the construction of low-income apartments in a low-income census tract in downtown Memphis. The project not only provides quality affordable housing, but also helps to revitalize a low-income community.
- A NMTC transaction totaling about \$14.0 million that helps finance a \$40.0 million renovation of a regional medical center in a low-income census tract near downtown Memphis. The medical center renovation will support a number of new business units, which will create more jobs and help stabilize the surrounding LMI geographies. Additionally, the medical center serves a majority of LMI patients in the region, and the renovation will help expand access to patient care.

SERVICE TEST

SunTrust Bank's service test performance in the Memphis multistate assessment area is rated high satisfactory based on the accessibility of the bank's retail services and the relatively high level of community development services.

Retail Services

SunTrust Bank's delivery systems in the assessment area are reasonably accessible to the bank's geographies and individuals of different income levels. The distribution of 30 branch offices and 49 ATMs as of December 31, 2015, was compared to the distribution of households and businesses among the tract categories within the assessment area. The bank has four branches located in low-income tracts representing 13.3 percent of total branches compared to 15.1 percent of households and 10.2 percent of businesses located in these tracts, and five branches located in moderate-income tracts representing 16.7 percent of total branches compared to 20.9 percent of households and 18.0 percent of businesses located in moderate-income tracts. Alternative delivery systems, such as ATMs, toll-free telephone and text banking, and online banking, were also considered in determining accessibility. During the review period, no branches were opened and two branches were closed in LMI tracts. However, the record of opening and closing of branches has generally not adversely affected the accessibility of the bank's delivery systems, particularly to LMI geographies or LMI individuals in the assessment area.

Banking services and hours of operations do not vary in a way that inconveniences the assessment area, including LMI geographies and/or LMI individuals. SunTrust Bank provides extended hours at the majority of branch offices, including those located in LMI tracts. The bank offers weekend hours at six of nine branches in LMI tracts in the Memphis multistate assessment area. Bank products, services and business hours are consistent throughout the assessment area.

Closed branches/ATMs are only included in "closed" columns and are not included in any other totals.

Community Development Services

SunTrust Bank provides a relatively high level of community development services in the Memphis multistate assessment area. During the review period, SunTrust Bank employees provided 1,337 service hours in various capacities for over 55 different community development organizations. Bank employees engaged in providing approximately 140 economic development service hours, 94 affordable housing hours, and approximately 1,100 community service hours. Financial education hours were approximately 35.3 percent of service activity. Notably, approximately 29.2 percent of service hours were board service at community development organizations or committee memberships. Bank employees provided community development services working on a small business council, volunteering at a children's shelter, mentoring at-risk youth, volunteering with affordable housing organizations, and providing financial education. This performance is considered good given SunTrust Bank's size and presence in the assessment area and the opportunities that exist for community development service.

MULTISTATE METROPOLITAN AREA

CRA RATING FOR WASHINGTON MULTISTATE: SATISFACTORY

The Lending Test is rated: High Satisfactory

The Investment Test is rated: Outstanding

The Service Test is rated: Low Satisfactory

Major factors supporting the rating include the following:

- The geographic distribution of loans reflects good penetration throughout the assessment area, and the distribution of loans by borrower income also reflects good penetration among customers of different income levels and businesses of different revenue sizes.
- The bank is a leader in making community development loans in its Washington multistate assessment area.
- The bank provides an excellent level of qualified community development investments and grants that are responsive to several identified community development needs of the Washington multistate assessment area.
- Retail services are reasonably accessible to the bank's geographies and individuals of different income levels in the assessment area.
- The bank provides an adequate level of community development services throughout the assessment area.

SCOPE OF EXAMINATION

The time period, products, and affiliates evaluated for the Washington multistate assessment area are consistent with the overall scope described in the Description of the Institution section of this report. SunTrust Bank's performance in the Washington multistate assessment area was evaluated using fullscope examination procedures.

DESCRIPTION OF INSTITUTION'S OPERATIONS IN WASHINGTON, DC-VA-MD MSA MULTISTATE ASSESSMENT AREA

Overview

The Washington, DC assessment area consists of the District of Columbia and the following counties in Virginia - Arlington, Culpeper, Fairfax, Fauquier, Loudoun, Prince William, Spotsylvania, Stafford and Warren as well as the cities of Alexandria, Fairfax, Falls Church, Fredericksburg, Manassas, and Manassas Park in their entirety. Additionally, the Maryland counties of Calvert, Charles, Frederick, Montgomery and Prince George are in the bank's assessment area. The bank's assessment area makes up part of the Washington-Arlington-Alexandria, DC-VA-MD-WV multistate MSA. As of December 2015, SunTrust operated 170 branch offices in the multistate assessment area.

The banking market in the Washington, DC multistate assessment area is dominated by a few large regional and national banks. According to the June 30, 2015 FDIC Summary of Deposits Report, 72 financial institutions operated 1,444 offices in the assessment area. SunTrust had a deposit market share of 7.9 percent (\$13.3) billion) and 148 offices. The top five banks holding nearly 65.0 percent of the market share rank are E-TRADE Bank, Wells Fargo, Capital One, Bank of America, and SunTrust.

HMDA-reportable and CRA lending is similarly competitive. SunTrust Bank and SunTrust Mortgage combined had an average of 4.2 percent of total HMDA-reportable lending in both 2014 and 2015. STB ranked 24th while STM ranked 6th out of the 773 HMDA lenders in the market in 2014. In 2015, STM increased slightly in ranking while STB dropped to 25th. Wells Fargo, JPMorgan Chase, Quicken Loans, and SunTrust Mortgage were the top HMDA lenders in the market in 2015.

SunTrust Bank ranked 11th out of 180 CRA reporters in 2014 with 2.4 percent of the CRA loans. In 2015, SunTrust increased its ranking to 7th out of 196 CRA reporters with 4.8 percent of the CRA loans. American Express Bank, Capital One and Bank of America were the top three CRA lenders in the market in 2015.

Population and Income Characteristics

The Washington metro area grew by more than 5.6 percent between 2010 and 2015.⁵³ It is currently home to over 5.9 million people, making it the sixth largest metropolitan area in the United States. Between 2010 and

^{53 &}quot;Washington, DC MSA (U.S. Census Bureau)." GIS Mapping and Geographic Information System Data. The Reinvestment Fund, n.d. Web. 13 Mar. 2017. http://www.policymap.com/>.

2015, the region added almost 313,400 new residents.⁵⁴ Loudoun County was one of the fastest growing jurisdictions in the region during the last decennial census with 84.0 percent growth. The area continued its growth with a 12.4 percent population increase from 2010 to 2015. Fairfax County, the largest jurisdiction in Northern Virginia, grew by over 4.0 percent during the five-year period, and is home to more than one million residents. Montgomery and Prince George's counties are the largest jurisdictions in suburban Maryland with approximately 972,000 and 863,000 residents, respectively, and grew about 4.0 percent during the same period. The District of Columbia also grew between 2010 and 2015, adding about 46,000 residents, or approximately 7.6 percent.

The assessment area contains 1,339 census tracts; 2010 census data indicates that there were 121 (9.0 percent) low-income census tracts, 330 (24.6 percent) moderate-income tracts, 471 (35.2 percent) middle-income tracts, 404 (30.2 percent) upper-income tracts, and 13 (1.0 percent) tracts were not categorized by income level.

For purposes of classifying borrower income, this evaluation uses the FFIEC estimated median family income for the Washington, DC MSA. As shown in the following table, the median family income increased by 2.1 percent between 2014 and 2015. There is considerable variation in the median family income in the cities and counties throughout the assessment area. The city of Fredericksburg, Virginia had the lowest median family income between 2011 and 2015 at about \$62,400, while Falls Church County, Virginia had the highest at \$165,400.

Borrower Income Levels
Washington-Arlington-Alexandria, DC-VA-MD-WV MSA

FFIEC Estimated			L	ow	M	odei	rate	N	Mide	dle	J	Jpper

Poverty and financial instability are major concerns throughout the assessment area. The percentage of families living below the poverty level continues to increase each year. For the assessment area, the percentage of families in poverty ranged from 0.8 percent to 14.3 percent between 2011 and 2015.⁵⁵ The rates were highest in the District of Columbia (14.3 percent), followed by Fredericksburg (12.6 percent) and Warren (7.4 percent). The areas with the lowest poverty rates were Falls Church (0.8 percent), City of Fairfax (2.1 percent), and Loudon (2.6 percent). Within the assessment area, 38.5 percent of families are considered LMI as compared to the states of Maryland at 39.7 percent and Virginia at 36.5 percent. 20.3 percent of families living in low-income tracts and 7.3 percent of families in moderate-income tracts have incomes below the poverty level.

⁵⁵ "Washington DC Metro (US Census)." *GIS Mapping and Geographic Information System Data*. The Reinvestment Fund, n.d. Web. 12 Sept. 2016. http://www.policymap.com/>.

Another indicator of financial distress is the number students eligible for free and reduced price lunch. In 2014, more than 50.0 percent of the students were eligible for free and reduced price lunch in the public school districts of Prince George's County, Alexandria, Manassas City, Manassas Park, and Fredericksburg; the District of Columbia Public Schools had nearly 100.0 percent of the students eligible.

Economic Conditions

After two years of slow economic growth due to a decline in government spending and layoffs, the Washington, DC metro area recovered in 2015. Total nonfarm employment for the Washington MSA was 3,171,500 in January 2016, up 70,600, or 2.3 percent, over the prior year. The majority of the region's employment is in the Washington-Arlington-Alexandria, DC-VA-MD-WV Metropolitan Division, which accounts for 82.0 percent of the area's employment. The Silver Spring-Frederick-Rockville, MD Metropolitan Division represented the remaining 18.0 percent of area employment.

Besides government, which accounts for 21.7 percent of jobs, the region's economy has become more diverse, with growth in the professional and business services sector as well as the health and education sector. Today, nearly 23.0 percent of jobs in the region are in professional and business services, while 13.2 percent are in health and education. The diversity of the economy is evident in looking at the largest employers in the region. The top employers represent multiple sectors, including energy, information and communication technology, aerospace, defense, security and intelligence, biotechnology and life sciences, healthcare, and hospitality. Some of the largest employers include Lockheed Martin, George Mason University, United Air Lines Inc., Inova Health System, Booz Allen Hamilton, Wal-Mart Stores and Computer Sciences Corporation.

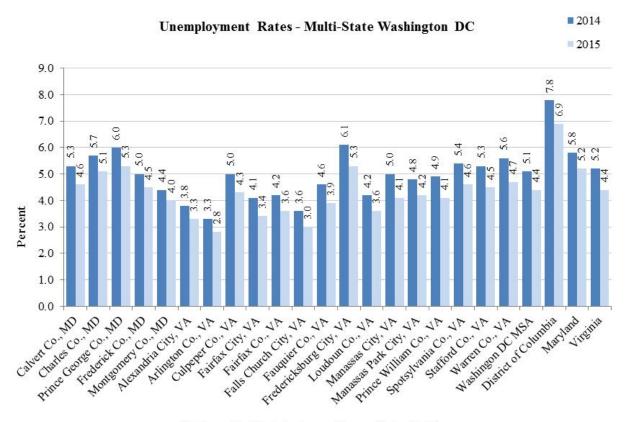

According to 2015 Dun & Bradstreet information, there were 324,886 businesses within the Washington, DC assessment area, 91.4 percent of which had total annual revenues less than or equal to \$1 million and were therefore considered to be small businesses. Within the assessment area, small business lending increased by 13.8 percent between 2012 and 2014, with nearly 109,000 loans originated. During this same period, loans made to firms with revenues under \$1.0 million also increased by 4.0 percentage points, representing a 51.1 percent share of total small business loans. This may be an indication that there are fewer obstacles for smaller firms to access credit in the market.⁵⁷ The majority of the small business lending occurred in the following jurisdictions: Fairfax County, Virginia; Montgomery County, Maryland; District of Columbia; and Prince George's County, Maryland.

Over the review period, the unemployment rate in all of the geographies that make up the MSA improved as shown in the following chart. However, the District of Columbia's unemployment rate of 6.9 percent in 2015 was the highest among the 21 areas in the assessment area, and it was the only area to consistently exceed the U.S. national unemployment rate in both years. In some of the District's neighborhoods, official estimates of unemployment in 2015 were still above 10.0 percent. For example, the neighborhoods east of the Anacostia

⁵⁶ "Washington Area Employment – January 2016" Bureau of Labor Statistics, 24 Mar. 2016. Web. 1 May. 2017. https://www.bls.gov/regions/mid-atlantic/news-release/2016/areaemployment_washingtondc_20160324.htm.

⁵⁷ Analysis of CRA loan data through Policy Map. The Reinvestment Fund, n.d. Web. 13 Mar. 2017. http://www.policymap.com/>.

River, Ward 7 and Ward 8, experienced unemployment rates of 11.2 percent and 14.4 percent, respectively. The rates for the remaining areas ranged from 5.3 percent in Prince George's County, Maryland, and Fredericksburg City, Virginia, to 2.8 percent in Arlington County, Virginia.⁵⁸

Not Seasonally Adjusted. Source: Bureau of Labor Statistics

Census data indicates there were approximately 2.1 million housing units in 2010, 61.1 percent of which were owner-occupied, 31.3 percent were rental units and 7.6 percent were vacant. LMI tracts had the highest concentration of rental units at 62.5 percent and 43.0 percent, respectively. The median age of housing stock in the assessment area is 34 years, though the housing stock is older in LMI census tracts at 47 years and 39 years, respectively. The following counties had the highest homeownership rates (at or above 77.0 percent) in the assessment area: Calvert, Maryland; Fauquier, Virginia; Loudoun, Virginia; and Charles, Maryland. The District and Fredericksburg, Virginia, had the lowest rates at 41.2 percent and 34.5 percent, respectively.

⁵⁸ Unemployment Data for DC Wards. DC Government, Department of Employment Services. nd. Web. 20 Mar. 2017. http://does.dc.gov/page/unemployment-data-dc-wards#overlay-context=page/labor-statistics

In June 2016, the median home price in the region was \$446,000, representing a 1.6 percent increase from June 2015.⁵⁹ This price, which was \$6,000 higher than the pre-recession peak price in June 2007, set a record according to data provided by ShowingTime RBI. In addition, closed sales in June 2016 were up 5.1 percent compared to June 2015 and were at the highest monthly level since June 2006.

Not all areas, however, saw price increases. The largest median-price gains came in Maryland's Prince George's, Frederick, and Anne Arundel counties and Virginia's Arlington, Fairfax, and Prince William counties. Montgomery County, the District and Loudoun County had more modest increases (under 2.5 percent) while Fairfax and Alexandria cities and Howard County saw their median prices fall. According to Real Estate Business Intelligence, Falls Church City remains the most expensive location in the region, with a median sale price of \$737,500, an 11.8 percent increase over the prior 12-month period. Washington, DC, and Alexandria City are the next highest-priced markets with a median sales price of \$591,750. Prince George's County is the most affordable area with a median home price of \$260,000, while Frederick County is the second most affordable area with a median home price of \$295,000.

Recent data shows that the region's average permitting of 12,755 new housing units in 2014 and 2015 fell short of the number of units needed to meet future demand.⁶¹ ⁶² In addition, there are fewer affordable units comprising the overall rental stock, particularly in the District. Between 2002 and 2013, affordable units (those priced under \$800 per month) went from making up 40.0 percent of the rental stock to slightly above 20.0 percent, while the share of high-priced units (over \$1,600) expanded from under 15.0 percent of all rental units to 35.0 percent.⁶³

Nationally, the foreclosure and delinquency rates continue to trend downward, and there is no exception in the DC metropolitan region. The percentage of seriously delinquent mortgages (those more than 90 days past due and in foreclosure) was 2.4 percent for the Washington, DC MSA, compared to 2.6 percent for the nation. As of December 2016, the foreclosure inventory as a percentage of mortgaged homes was 0.7 percent in the region; this is down 29.4 percent from a year ago and much lower than the state with the highest rate of 2.9 percent (New Jersey).⁶⁴ It is important to note that the District of Columbia was among the top five areas with the highest foreclosure inventory as a percentage of mortgaged homes.

While the housing values and homes sales in the Greater Washington MSA continue to climb, portions of the assessment area have a significant percentage of homeowners with negative equity. According to Realty Trac data, the top 10 cities in Greater Washington with the largest percentage of mortgages "seriously underwater" — where the combined loan amount secured by the property is at least 25.0 percent higher than the property's estimated market value — are all located within Prince George's County with rates ranging from 20.0 percent to 35.0 percent of mortgages. Overall, Greater Washington has 9.1 percent of its mortgages seriously underwater, which falls in the middle of rates among urban areas throughout the country.

Demographic Characteristics by Census Tract

The following table based on 2015 FFIEC Census and 2015 Dun & Bradstreet data presents key demographic and business information used to help develop a performance context for the assessment area.

2015 FFIEC Census Data and 2015 D&B Information

Credit and Community Development Needs

The community development environment in the Greater Washington area has a sophisticated affordable housing and community development industry, with strong engagement from nonprofits, government agencies, foundations, and financial institutions. There are numerous opportunities for banks to partner with nonprofits, developers and CDFIs to engage in a wide range of community development activities, including affordable housing development, neighborhood revitalization, small business lending, financial education, or providing technical assistance to the organizations or those they serve.

The Washington, DC region is one of the least affordable places in the country to own and rent property. In recent years, several factors have contributed to the lack of housing affordability in the area, such as a limited supply of housing; a growing population; a slower pace in residential construction post-recession; and more residential activity skewed toward higher-end units. One study reports that the Washington, DC MSA will need approximately 548,300 units (344,600 single-family units and more than 203,700 multifamily units) from 2012 to 2032 or 27,415 units per year to absorb the demand.

With high housing costs, LMI residents in particular experience housing cost burdens. In terms of rental housing affordability, nearly half of all renters in the DC region were cost burdened, meaning that they paid more than 30.0 percent of their income on housing during the period from 2011 to 2015. That share translates to approximately 363,000 households. The 2016 Out of Reach report by the National Low-Income Housing Coalition reports that the annual income needed to afford the fair market rent for a two- bedroom apartment is \$64,920, which is more than a low-income family's annual income of \$54,699 per 2015 FFIEC income data. Moreover, in Washington-Arlington-Alexandria, a renter household earning a mean wage of \$22 per hour would have to work the equivalent of 1.4 jobs to afford a two-bedroom apartment (\$1,623 fair market rent) and not be cost burdened. It is also important to note that lower-income renters in the region face enormous competition from higher-income households for scarce affordable units. Higher-income households occupied approximately 69.0 percent of units affordable to the very low-income and 66.0 percent of those affordable to the low-income.

As living costs soar in Washington, DC, especially, homelessness grows and remains problematic. A survey prepared by the United States Conference of Mayors showed that Washington had the highest rate of homelessness out of 32 major cities. There are 124 homeless people for every 10,000 residents, which is more than twice the national average.⁶⁹ A report prepared by the Urban Institute suggests that increasing the supply of rental housing affordable for extremely low-income households would reduce homelessness in the region.⁷⁰

⁷⁰ Housing Security in the Washington Region. Urban Institute and the Metropolitan Washington Council of Governments, July 2014. Web. 1 May. 2017. http://www.urban.org/research/publication/housing-security-washington-region.

Access to affordable bank accounts is also an important building block for LMI individuals trying to achieve financial stability. According to the FDIC's 2015 National Survey of Unbanked and Underbanked Households, 3.9 percent of households in the Washington, DC MSA are unbanked, meaning they have no type of deposit account with a mainstream financial institution.⁷¹ This figure is considerably lower than the national rate of 7.0 percent. While the unbanked rate has declined since 2009, the underbanked rate, or households with a deposit account that also rely on alternative financial services providers on a regular basis, has steadily increased. It stands at 21.5 percent of households as compared to 15.1 percent in 2009. There are a number of initiatives in the region working on household financial stability, including BankOn DC, the Capital Area Asset Builders, Community Tax Aid, Inc., Operation Hope and numerous other community organizations that provide financial education, matched savings accounts, and other programs.

CONCLUSIONS WITH RESPECT TO PERFORMANCE TESTS IN WASHINGTON, DC-VA-MD MSA MULTISTATE ASSESSMENT AREA

LENDING TEST

SunTrust Bank's lending performance in the Washington multistate assessment area is rated high satisfactory. The geographic distribution of loans reflects good penetration throughout the assessment area. The distribution of borrowers also reflects good penetration among borrowers of different income levels and businesses of different revenue sizes. Additionally, SunTrust Bank is a leader in making community development loans.

During the review period, SunTrust reported 17,128 HMDA-reportable loans compared to 9,021 small business loans in the Washington multistate assessment area. As such, HMDA-reportable lending was weighted more heavily than small business lending in determining the bank's lending test rating in the assessment area. In total, 14.2 percent of the bank's HMDA-reportable and small business lending, by number of loans and 22.9 percent by dollar volume, were originated in the Washington multistate assessment area compared to 9.3 percent of the bank's deposits in the assessment area.

For the lending test analysis, lending performance in low-, moderate-, middle-, and upper-income census tracts and to low-, moderate-, middle-, and upper-income borrowers was considered for each product; however, comments for activity in middle- and upper-income tracts and to middle- and upper-income borrowers are only included when they were material to the outcome of the analyses. Details of the bank's mortgage and small business lending and information regarding lending by peers can be found in Appendix G.

Geographic Distribution of Loans

For this analysis the geographic distribution of HMDA-reportable and small business lending, including both originations and purchases, was compared with available demographic information. Performance context information and aggregate lending data were also taken into consideration. Considering these factors, SunTrust Bank's geographic distribution of loans reflects good penetration throughout the assessment area.

⁷¹ 2015 FDIC National Survey of Unbanked and Underbanked Households, n.d. Web 13 Mar. 2017. http://economicinclusion.gov/

Home Purchase Loans

Home purchase lending in low-income census tracts is good. During the review period, the bank originated 4.7 percent of its loans in low-income census tracts. This level of lending was greater than the percentage of owner-occupied units in low-income tracts at 3.6 percent. Additionally, the bank's performance was slightly greater than the aggregate lenders during the review period.

Home purchase lending in moderate-income census tracts is adequate. During the review period, 18.6 percent of the bank's loans were originated in moderate-income census tracts. This performance was less than the percentage of owner-occupied units in moderate-income census tracts at 19.7 percent. Additionally, the bank's performance was slightly less than the aggregate lenders during the review period.

Home Refinance Loans

Home refinance lending in low-income census tracts is adequate. SunTrust Bank originated 3.3 percent of its home refinance loans in these tracts during the review period, which was comparable to the percentage of owner-occupied units in low-income tracts at 3.6 percent. Additionally, the bank's performance was similar to aggregate lenders during the review period.

Home refinance lending in moderate-income tracts is also adequate. The percentage of home refinance loans originated in moderate-income census tracts was less than the percentage of owner-occupied units in these tracts. However, the bank's performance was similar to the aggregate lending performance in 2014, but less than the aggregate lenders in 2015.

Home Improvement Loans

Home improvement lending in both LMI census tracts is excellent. During the review period, the percentage of home improvement lending in both these tracts significantly exceeded the percentage of owner-occupied units in these tracts. The bank's performance in these tracts was also significantly greater than aggregate lenders during the review period.

Small Business Loans

Small business lending in low-income census tracts is good. The percentage of small business loans in low-income census tracts was equal to the percentage of small businesses located in these tracts. This performance was greater than aggregate lending performance in 2014, but slightly less than the aggregate lenders in 2015.

Small business lending in moderate-income census tracts is also good. SunTrust Bank originated 22.2 percent of its small business loans in moderate-income census tracts, where 19.9 percent of small businesses in the assessment area are operating. SunTrust outperformed aggregate lenders in 2014, but was slightly less than the aggregate lenders in 2015.

Lending to Borrowers of Different Incomes and Businesses of Different Sizes

The distribution of loans based on borrower income or gross annual revenues is also good. For this analysis, the distribution of HMDA-reportable lending across borrower income levels and small business lending across business revenue sizes was compared to available demographic information.

Home Purchase Loans

Home purchase lending to low-income borrowers is adequate. During the review period, low-income families represented 21.0 percent of total families and received 7.6 percent of the bank's home purchase loans. Additionally, the distribution of the bank's loans to low-income borrowers was less than aggregate lenders for both years.

Home purchase lending to moderate-income borrowers is good. The bank's lending to moderate-income borrowers exceeded the percentage of moderate-income families in the assessment area and was also greater than aggregate lending during the review period.

Home Refinance Loans

Home refinance lending to low-income borrowers is good. Although the percentage of home refinance loans to low-income borrowers was less than the percentage of low-income families in the assessment area, the bank's lending performance was better than aggregate lending performance during the review period.

Home refinance lending to moderate-income borrowers is also good. The percentage of home refinance loans to moderate-income borrowers was comparable to the percentage of moderate-income families in the assessment area; however, the bank's lending performance was greater than the aggregate lenders during the review period.

Home Improvement Loans

Home improvement lending to both LMI borrowers is excellent. During the review period, the percentage of the bank's lending to these borrowers exceeded the percentage of LMI families in the assessment area. Additionally, the bank's home improvement lending to these borrowers was better than aggregate lending performance during the review period.

Small Business Loans

The distribution of small business lending by business revenue size is adequate considering the bank's performance relative to the aggregate. The bank's lending to small businesses exceeded the aggregate in both 2014 and 2015, but was below the percentage of small businesses in the assessment area during the review period. However, of the 9,021 small business loans originated during the review period, 8,545 loans (94.7 percent) were in amounts of \$250,000 or less, which typically represent loan amounts requested by small businesses.

Community Development Lending

SunTrust is a leader in making community development loans in the Washington multistate assessment area. The bank originated 57 community development loans totaling \$539.1 million during the review period. Loans were responsive to many community development needs in the assessment area, including the provision of affordable housing, community services targeted to LMI individuals, promoting economic development by financing small business, and revitalizing and stabilizing low- or moderate-income geographies. The bank provided \$280.3 million in loans to support community services to LMI individuals; \$177.9 million in loans to revitalize and stabilize LMI geographies; \$59.3 million in support of affordable housing; and \$21.6 million towards economic development activities. SunTrust Bank's community development lending exhibits excellent responsiveness to the community development and credit needs of the assessment area.

Examples of community development lending include but are not limited to:

- A \$22.9 million loan financing construction of a HOPE VI multifamily housing development with 133 affordable units, located within walking distance of a Metro station;
- Three loans for a total of \$29.5 million to a private charity that specializes in programs such as Head Start, services for the disabled, meals for the hungry, job placement, shelters, assisted living and senior housing;
- A loan for \$36.8 million to finance a multi-use development project in a moderate-income geography, anchored with a large retail grocery-supercenter anticipated to create approximate 300 permanent minimum wage positions;
- Three loans for a total of \$161.6 million to finance an administrator of Medicaid and CHIP (Children's Health Insurance Program) services to LMI individuals.

INVESTMENT TEST

SunTrust Bank's performance under the investment test is rated outstanding, as evidenced by the excellent level of qualified investments and grants in the Washington, DC multistate assessment area coupled with the responsiveness of the bank's activities to a number of community development needs. The bank demonstrated leadership in several significant community development efforts throughout the assessment area.

The bank made investments (excluding contributions) totaling \$252.7 million in the assessment area; of that, \$187.1 million was invested during the review period. The investment portfolio includes a number of investment vehicles, including, but not limited to, Low Income Housing Tax Credits (LIHTCs), NMTCs, LIHTC investment funds, securities backed by government-guaranteed mortgages on multifamily properties, and bonds that finance HUD and SBA programs. Most of the bank's investments provided support for affordable housing, including \$130.9 million in LIHTC investment funds and LIHTC projects that preserved or created new affordable housing units.

SunTrust Bank also contributed \$913,500 to nonprofit organizations and community development initiatives during the review period. Specifically, the bank provided grants totaling \$764,500 to nonprofits that offer community services to LMI individuals, \$105,000 to support affordable housing, and \$44,000 to support economic development and revitalization and stabilization programs. The bank's financial support addressed a wide variety of critical community needs, such as job skills training and workforce development, particularly for LMI individuals and youth; financial education, free tax assistance and asset building programs; assistance for the homeless; health care; access to emergency services; youth and family services; educational support programs; and community development capacity building. As noted earlier, the bank also had investments and contributions that served a broader regional area that includes the bank's assessment area.

The bank's diverse investments and contributions impact several community development needs in the assessment area, including affordable housing, community services, and economic development, as evidenced in the several examples highlighted below.

- An investment in a fund that will invest in expiring LIHTC or other subsidized housing properties in Washington, DC, and other markets nationwide. Preserving subsidized affordable housing is considered a high priority need, particularly in major markets like Washington, DC, where there is a limited supply of affordable housing and there is a significant financial opportunity for developers to convert expiring LIHTC projects to market rate rental housing. SunTrust will receive credit for several investments within the Greater Washington, DC assessment area.
- Almost \$100,000 in grant funding to a nonprofit organization that uses running and community to motivate and support formerly incarcerated and homeless individuals moving towards independence. The program includes case management and provides educational support, job training, employment referrals and housing resources in addition to financial education. SunTrust helped facilitate a partnership with another local nonprofit to allow program individuals access to an 8:1 Individual Development Account (IDA) program for homeownership, education, and entrepreneurship.
- In-kind donation of branch space in an LMI community for the HOPE Inside program and additional support for financial empowerment programming offered by Operation HOPE across the assessment area.
- A \$10,000 grant to support a veterans' business assistance organization that provides the resources veterans need to start or grow a business or to explore a new career.

SERVICE TEST

SunTrust Bank's performance under the service test in the Washington multistate assessment area is rated low satisfactory based on the accessibility of the bank's retail services and the adequate level of community development services.

Retail Services

SunTrust Bank's delivery systems in the assessment area are reasonably accessible to the bank's geographies and individuals of different income levels. The distribution of 170 branch offices and 311 ATMs as of December 31, 2015, was compared to the distribution of households and businesses among the tract categories

within the assessment area. The bank has 13 branches located in low-income tracts, representing 7.7 percent of total branches compared to 8.2 percent of households and 4.2 percent of businesses located in low-income tracts. The bank has 41 branches located in moderate-income tracts, representing 24.1 percent of total branches compared to 24.6 percent of households and 20.0 percent of businesses located in moderate-income tracts. Alternative delivery systems, such as ATMs, toll-free telephone and text banking, and online banking, were also considered in determining accessibility. During the review period, no branches were opened and two branches were closed in moderate-income tracts; however, three branches were opened and five branches were closed in middle- and upper-income tracts. The branch closures generally did not adversely affect the accessibility of the bank's delivery systems, particularly to LMI geographies and/or LMI individuals in the assessment area.

Banking services and hours of operations do not vary in a way that inconveniences the assessment area, particularly in LMI geographies and/or to LMI individuals. SunTrust Bank provides extended hours at all branch offices located in LMI tracts. The bank offers weekend hours at the majority of branches in low-income and moderate-income tracts in the Washington DC multistate assessment area. Bank products, services and standard business hours are consistent throughout the assessment area.

2015 FFIEC Census Data, 2010 ACS Data, and 2015 D&B Information

Closed branches/ATMs are only included in "closed" columns and are not included in any other totals.

DTO - Drive thru only is a subset of total branches

SA = Stand Alone ATM is a subset of total ATMs

Community Development Services

SunTrust Bank provides an adequate level of community development services in the Washington multistate assessment area. During the review period, SunTrust Bank employees provided 3,453 service hours in various capacities, by participating in community development services with over 40 different organizations. Bank employees engaged in providing 402 affordable housing service hours and over 3,000 community service hours. Approximately 13.0 percent of service hours were board service at community development organizations or committee membership. This performance is considered adequate given SunTrust Bank's size and presence in the assessment area and the opportunities that exist for community development service.

CRA RATING FOR ALABAMA: Satisfactory

The Lending Test is rated:

Low Satisfactory

Low Satisfactory

Low Satisfactory

Low Satisfactory

Low Satisfactory

Major factors supporting the rating include the following:

- The geographic distribution of loans reflects adequate penetration throughout the assessment area, and the distribution of loans by borrower income reflects good penetration among customers of different income levels and businesses of different revenue sizes.
- The bank makes an adequate level of community development loans in its Alabama assessment area.
- The bank provides an adequate level of qualified community development investments and grants.
- Retail services are reasonably accessible to the bank's geographies and individuals of different income levels in the assessment area.
- The bank provides an adequate level of community development services throughout the assessment

SCOPE OF EXAMINATION

A full-scope review was conducted for the following assessment area in the State of Alabama:

Florence

The Florence assessment area is the only assessment area in the state, thus no limited-scope review was conducted in the State of Alabama. The time period, products, and affiliates evaluated for this assessment area are consistent with the scope discussed in the institution section of this report.

DESCRIPTION OF INSTITUTION'S OPERATIONS IN ALABAMA

As of June 30, 2015, SunTrust Bank had \$243.3 million in deposits in Alabama accounting for 0.2 percent of the bank's total deposits. SunTrust Bank operated four branch offices in Alabama as of December 31, 2015, representing 0.3 percent of the bank's total branches. HMDA-reportable and CRA small business lending in Alabama each accounted for 0.1 percent of total institutional HMDA-reportable and CRA small business lending by number of loans and less than 0.1 percent by dollar volume. Overall, the bank's HMDA-reportable and CRA lending activity was slightly less than the percentage of total institutional deposits.

The following table shows lending activity from January 1, 2014, through December 31, 2015.

Statewide Summary of Lending Activity Assessment Areas Located in Alabama

Loan Type	#	%	\$ (000s)	%
HMDA Home Purchase	22	9.7%	\$3,119	27.7%
HMDA Refinance	53	23.5%	\$5,029	44.7%

CONCLUSIONS WITH RESPECT TO PERFORMANCE TESTS IN ALABAMA

LENDING TEST

The lending test rating in the State of Alabama is low satisfactory. Overall, performance in Alabama with regard to the geographic distribution of loans reflects adequate penetration throughout the assessment area. The distribution of loans by borrower income reflects good penetration among customers of different income levels and businesses of different sizes. Additionally, SunTrust Bank made an adequate level of community development loans in Alabama.

During the review period, SunTrust reported 114 HMDA-reportable loans and 112 small business loans in Alabama. As such, HMDA-reportable lending and small business lending were given equal weight when determining the lending test rating for Alabama. The rating for Alabama is based on performance in the Florence full-scope assessment area.

Details of the bank's HMDA-reportable lending, small business lending, and peer lending data can be found in Appendix G.

Geographic and Borrower Distribution

The geographic distribution of SunTrust's HMDA-reportable and small business loans is adequate, and the distribution of loans by borrower income and revenue size of businesses is good. As noted above, the rating for the state of Alabama is derived from the Florence assessment area. A detailed discussion of the borrower and geographic distribution of lending for the Florence assessment area is included in the next section of this report.

Community Development Lending

Sun Trust Bank makes an adequate level of community development loans in the state of Alabama. The bank originated three community development loans totaling \$3.9 million in Alabama during the review period, all of which were in the Florence full-scope assessment area. Overall, this level of statewide community development lending is considered adequate based on the bank's size and presence in its Alabama assessment area and the availability of community development lending opportunities. More information on community development loans can be found in the full-scope assessment area section of this report.

Investment Test

The investment test rating for Alabama is low satisfactory.

The bank makes an adequate level of qualified investments and contributions in the Alabama assessment area. During the review period, the bank had qualified investments of \$2.6 million and contributions of \$29,400 in the Florence assessment area. This level of investment activity is considered adequate given the bank's presence in the state and the availability of community development opportunities in the bank's assessment

area. Additional details regarding specific investments and contributions can be found in the full-scope assessment area section, and a summary of the bank's investments and contributions for the state can be found in Appendix F.

Service Test

The service test rating for Alabama is low satisfactory.

Retail Services

Delivery systems, including ATMs and branch office locations, are reasonably accessible to the bank's geographies and individuals of different income levels in the assessment area. Statewide, banking services and hours of operation do not vary in a way that inconveniences the assessment area, including LMI geographies or LMI individuals. The bank's record of opening and closing of branches has generally not adversely affected the accessibility of its delivery systems for LMI geographies and/or LMI individuals. Additional detail on the bank's retail services can be found in the full-scope assessment area section of this report.

Community Development Services

SunTrust Bank provides an adequate level of community development services in the Florence assessment area. No statewide community development services were qualified during this examination. In the Florence assessment area during the review period, employees engaged in 59 qualified community service activities totaling 136 hours that positively impacted the assessment area. Approximately 22 service hours were related to United Way and 25 hours were related to financial education. Approximately 33.1 percent of service hours were board service at community development organizations or committee membership. This performance is considered adequate given SunTrust Bank's size and presence in the assessment area and the opportunities that exist for community development service.

Additional detail on the bank's retail and community development services can be found in the full-scope assessment area section of this report.

METROPOLITAN AREA

(Full Scope Review)

DESCRIPTION OF INSTITUTION'S OPERATIONS IN THE FLORENCE, ALABAMA ASSESSMENT AREA

Overview

SunTrust Bank's Florence assessment area consists of Colbert and Lauderdale counties in northwest Alabama. which make up the entire Florence-Muscle Shoals MSA. As of December 2015, SunTrust Bank had four branches in the assessment area which held 0.2 percent of the bank's total deposits. Of the bank's total combined HMDA-reportable and CRA small business lending, 0.1 percent was originated in the assessment area. Florence is the bank's only assessment area in Alabama.

The assessment area is an active banking market with financial institutions of various asset sizes. Large national banks have a strong presence. According to the June 30, 2015 FDIC Summary of Deposits Report, SunTrust Bank ranked 5th out 13 financial institutions operating in the assessment area with a 9.6 percent deposit market share and \$243.3 million in deposits. Bank Independent had the largest deposit market share with 22.6 percent and 14 branches, followed by First Metro Bank and Compass Bank.

HMDA-reportable lending is competitive in the assessment area. SunTrust Bank and SunTrust Mortgage combined had an average of 1.3 percent of total HMDA-reportable lending in both 2014 and 2015. SunTrust Bank ranked 35th while SunTrust Mortgage ranked 26th out of the 175 HMDA lenders in the market in 2014. The bank's ranking decreased slightly in 2015, but the mortgage company increased in ranking. Bank Independent, Listerhill Credit Union and Regions Bank were the top HMDA lenders in the market in 2014 and 2015.

Small business lending is equally competitive. In 2014, SunTrust Bank ranked 13th out of 35 CRA reporters with 1.7 percent of all CRA small business loans. In 2015, SunTrust Bank ranked 7th out of 41 CRA reporters with 4.3 percent of all CRA small business loans. Bank Independent was the dominant CRA lender in the market in 2014 and 2015.

Population and Income Characteristics

The Florence-Muscle Shoals MSA has a population of 146,950.⁷² Lauderdale County, home to the city of Florence, represents the largest population center in the assessment area with nearly 92,600 residents as of July 2015.73 Overall, the population declined in the MSA by 0.1 percent between 2010 and 2015, driven primarily by population loss in Lauderdale County. The median age in the assessment area is 41, and 19.2 percent of its population is 65 years or older.⁷⁴

^{74 &}quot;Advantage Alabama." Florence-Muscle Shoals, AL MSA Profile -- Advantage Alabama. N.p., n.d. Web. 20 May 2017.

http://advantagealabama.com/msa/2650/florence-muscle-shoals-al/edpa-advantage-alabama-msa.html>.

The assessment area contains 36 census tracts; 2010 census data indicates that there were 4 (11.1 percent) low-income census tracts, 5 (13.9 percent) moderate-income tracts, 22 (61.1 percent) middle-income tracts, and 5 (13.9 percent) upper-income tracts.

For purposes of classifying borrower income, this evaluation uses the FFIEC estimated median family income for the relevant area. The following table sets forth the estimated median family income for 2014 and 2015 for the Florence MSA and shows that the median family income increased considerably between 2014 and 2015.

Borrower Income Levels Florence-Muscle Shoals, AL MSA

FFIE	FFIEC Estimated			Low			Moderate			lle	Upper		
Median	0	-	49.99%	50%	-	79.99%	80%	-	119.99%	120%	-	& above	
2014	\$52,100	0	-	\$26,049	\$26,050	-	\$41,679	\$41,680	-	\$62,519	\$62,520	-	& above
2015	\$58,600	0	-	\$29,299	\$29,300	-	\$46,879	\$46,880	-	\$70,319	\$70,320	-	& above

Poverty and financial instability are concerns in the assessment area. The percentage of families living below the poverty level was 17.7 percent between 2011 and 2015, while the poverty rate was 18.8 percent statewide. However, this figure increases to 53.8 percent in poverty for single female-headed families with children. Within the assessment area, 39.6 percent of families are considered LMI as compared to the state level of 40.9 percent, and 41.7 percent of the families living in low-income tracts and 27.0 percent of families living in moderate-income tracts have incomes below the poverty level.⁷⁵

Economic Conditions

During the review the period, several manufacturing plants closed including International Paper's Courtland Plant, Hon Corp, and Hillshire Brands. However, manufacturing remains the largest private employment sector in the Florence MSA representing 16.8 percent of total employment. There are also high concentrations of workers in government, retail trade, education and health services, and leisure and hospitality. While the manufacturing sector currently supports an above average employment rate, the industry is not expected to be a lasting source of employment given trends in automation and globalization. There has been an expansion in tourism arising from an expansion of projects relating to Florence's musical roots in the blues genre. Such projects include renovating and reopening the historic Muscle Shoals Sound Studios and hosting the annual W.C. Handy Music Festival, both of which have boosted the leisure and hospitality sector.

http://advantagealabama.com/msa/2650/florence-muscle-shoals-al/edpa-advantage-alabama-msa.html>.

Major employers in the assessment area include North American Lighting, Freight Car America, Constellium, and Helen Keller Hospital.⁷⁸ Another major employer and anchor institution in Lauderdale County is the University of North Alabama, which enrolls nearly 7,500 students and employs over 700 full-time staff.⁷⁹

According to 2015 Dun & Bradstreet information, there were 5,809 businesses within the Florence assessment area, 91.8 percent of which had total annual revenues less than or equal to \$1 million and were therefore considered to be small businesses. Of the total small businesses in the assessment area, 21.9 percent were in LMI tracts. Lending volume for the review period was unavailable at the time of this review.

As shown in the following chart, the unemployment rate in the MSA decreased slightly from 7.6 percent to 7.3 percent between 2014 and 2015; the manufacturing job losses are reflected in the modest unemployment decline. The unemployment rate in the MSA, however, was still higher than the statewide unemployment rate of 6.1 percent in 2015. Colbert County has the highest unemployment rate in the state, while Alabama has the third highest unemployment rate in the nation.⁸⁰ It is worth noting that less than one-fifth of the adult population holds a bachelor's degree or higher, which is significantly below state and national rates, and may impact employment opportunities.⁸¹

Unemployment Rates - AL Florence

Not Seasonally Adjusted. Source: Bureau of Labor Statistics

There were approximately 69,000 housing units in 2010, 63.5 percent of which were owner-occupied, 23.3 percent were rental units and 13.2 percent were vacant.⁸² The 2010 census shows 5.7 percent of the housing

⁸² FRB Atlanta Calculations of Dun & Bradstreet, 2010 American Community Survey data.

stock in the assessment area is located in low-income tracts with 37.8 percent owner-occupied housing. In addition, the 2010 census shows 11.6 percent of the housing stock in the assessment area is located in moderate-income tracts with only 47.7 percent owner-occupied housing. Rental and vacant units are highly concentrated in LMI tracts, and the housing is much older in these areas compared to the assessment area overall. These factors suggest that lending may be more challenging in LMI areas than in other areas.

Housing in the assessment area is stable, with home prices trending upward. The estimated median value of an owner-occupied housing unit between 2011 and 2015 was \$112,300, which was lower than the median housing value in the state at \$125,500.⁸³ The housing affordability ratio for the assessment area is 38.4. By comparison, the affordability ratio for Alabama is 35.8.⁸⁴ This shows that housing is slightly more affordable in the Florence MSA than in the state.⁸⁵ Given its affordability, less than 19.0 percent of homeowners are cost-burdened in the assessment area, meaning that homeownership costs account for more than 30 percent of household income.⁸⁶ In terms of homebuilding activity, new residential permitting has remained low due to a continuing decline of the population growth.

Demographic Characteristics by Census Tract

The following table based on 2015 FFIEC Census and 2015 Dun & Bradstreet data presents key demographic and business information used to help develop a performance context for the assessment area.

⁸³ "Florence-Muscle Shoals MSA (U.S. Census Bureau)." *GIS Mapping and Geographic Information System Data*. The Reinvestment Fund, n.d. Web. 19 May 2016. http://www.policymap.com/>.

⁸⁴ FRB Atlanta Calculations of Dun & Bradstreet, 2010 American Community Survey data.

⁸⁵ The affordability ratio is defined as the median household income divided by the median housing value. A higher ratio means the housing is considered more affordable while a lower ratio means the housing is considered less affordable.

⁸⁶ "Florence-Muscle Shoals MSA (U.S. Census Bureau)." *GIS Mapping and Geographic Information System Data*. The Reinvestment Fund, n.d. Web. 19 May 2016. http://www.policymap.com/>.

2015 FFIEC Census Data and 2015 D&B Information

Credit and Community Development Needs

The prevalence of poverty, a high unemployment rate, and a low-skilled population highlight the importance of workforce development initiatives and financial counseling and education within the assessment area. There are several community service organizations working in the Florence MSA that offer services to LMI residents facing these issues, but the organizations need financial support, technical assistance and volunteers from local financial institutions to keep pace with the ongoing demand for their services. For banks, partnering with these organizations has the potential to create community development service or investment opportunities. According to one community contact, her clients require financial education on savings, overdraft payment services, and first-time home ownership. The contact also indicated that her clients need an alternative to checking accounts, such as low-cost savings accounts, while they learn to manage money and develop better financial habits.

CONCLUSIONS WITH RESPECT TO PERFORMANCE TESTS IN THE FLORENCE, ALABAMA ASSESSMENT AREA

LENDING TEST

SunTrust Bank's lending performance in the Florence assessment area is adequate. The geographic distribution of loans reflects adequate penetration throughout the assessment area. Additionally, the distribution of borrowers reflects good penetration among borrowers of different income levels and businesses of different revenue sizes. In addition, the bank makes an adequate level of community development loans.

SunTrust Bank reported 114 (50.4 percent) HMDA-reportable loans and 112 (49.6 percent) CRA small business loans in the Florence assessment area during the review period. Therefore, HMDA-reportable lending and small business lending were given similar weighting in determining the bank's lending test rating in the assessment area. The Florence assessment area accounted for 0.1 percent of SunTrust Bank's total HMDA-reportable and small business lending by number of loans and less than 0.1 percent by dollar volume during the review period. In comparison, 0.2 percent of SunTrust Bank's deposits are in the Florence assessment area. Given that the Florence assessment area is the bank's only assessment area in the state, this assessment area was the primary factor on statewide performance ratings across the three performance tests.

For the lending test analysis, performance in low-, moderate-, middle-, and upper-income census tracts and to low-, moderate-, middle-, and upper-income borrowers was considered for each product; however, comments for activity in middle- and upper-income tracts and to middle- and upper-income borrowers are only included when they were material to the outcome of the analyses. Details of the bank's mortgage and small business lending and information regarding lending by peers can be found in Appendix G.

Geographic Distribution of Loans

For this analysis the geographic distribution of small business and HMDA-reportable lending, including both originations and purchases, was compared with available demographic information. Performance context information and aggregate lending data were also taken into consideration. For instance, unemployment rates,

poverty rates, the level of owner-occupied units, and the volume of small businesses in LMI census tracts were issues considered when assessing the bank's lending performance. Considering all of these factors, SunTrust Bank's geographic distribution of loans reflects adequate penetration throughout the assessment area.

Home Purchase Loans

Home purchase lending in low-income census tracts is adequate. During the review period, only one home purchase loan was made in 2014 and none in 2015 in low-income census tracts. This level of lending represented 4.5 percent of the bank's home purchase loans in the assessment area, which exceeded the 3.1 percent of owner-occupied units in low-income tracts. Additionally, the bank's performance significantly exceeded aggregate lenders in low-income tracts in 2014, and with no lending in 2015, the bank's performance was similar to aggregate lending performance.

Home purchase lending in moderate-income census tracts is also adequate. During the review period, only two home purchase loans were originated in moderate-income census tracts. This level of lending represented 9.1 percent of the bank's home purchase loans in the assessment area, which was slightly greater than the 8.8 percent level of owner-occupied units in moderate-income census tracts. Additionally, the bank's performance exceeded aggregate lenders throughout the review period.

Home Refinance Loans

Home refinance lending in low-income census tracts is very poor. SunTrust Bank originated no home refinance loans in low-income census tracts during the review period. As a result, the bank's home refinance lending was less than the level of owner-occupied units in these tracts and underperformed aggregate lenders during the review period.

Home refinance lending in moderate-income census tracts is adequate. The percentage of home refinance loans originated in moderate-income census tracts was slightly greater than the percentage of owner-occupied units in these tracts; however, performance was on par with aggregate lending performance during the review period.

Home Improvement Loans

Home improvement lending in low-income census tracts is adequate. SunTrust Bank originated only two home improvement loans in low-income census tracts in 2015 and no loans in 2014. Despite the minimal number of loans, the bank's lending performance in low-income census tracts was greater than the percentage of owner-occupied units in these tracts and significantly exceeded aggregate lenders in 2015.

Home improvement lending in moderate-income census tracts is good based on limited production of seven loans in the assessment area during the review period. The percentage of home improvement loans in moderate-income census tracts at 17.9 percent greatly exceeded the percentage of owner-occupied units at 8.8 percent in these tracts. Additionally, the bank's performance was also significantly greater than the aggregate lending performance during the review period.

Small Business Loans

Small business lending in low-income census tracts is poor. The percentage of small business loans in low-income census tracts was less than the percentage of small businesses located in these tracts. Furthermore, performance in these tracts was also less than aggregate lending performance during the review period.

Small business lending in moderate-income census tracts is excellent. SunTrust Bank originated 19.6 percent of its small business loans in moderate-income census tracts, where 10.6 percent of small businesses in the assessment area are operating. SunTrust also outperformed aggregate lenders during the review period.

Lending to Borrowers of Different Incomes and Businesses of Different Sizes

The distribution of loans by borrower income or revenue size of businesses is good. For this analysis, the distribution of small business lending across business revenue sizes and HMDA-reportable lending across borrower income levels was compared to available demographic information. Performance context issues were also considered as well as the performance of other banks.

Home Purchase Loans

Home purchase lending to low-income borrowers is adequate based on limited production of two loans during the review period. While the percentage of home purchase loans to low-income borrowers was much less than the percentage of low-income families located in the assessment area, SunTrust Bank's lending was on par with the aggregate lending performance to low-income borrowers during the review period.

Home purchase lending to moderate-income borrowers is good. The bank's percentage of home purchase loans at 27.3 percent exceeded the percentage of moderate-income families located in the assessment area at 17.9 percent. The bank's home purchase lending was comparable to the aggregate lenders in 2014 and significantly greater than aggregate lenders in 2015.

Home Refinance Loans

Home refinance lending to low-income borrowers is good. The bank's percentage of home refinance loans to low-income borrowers was less than the percentage of low-income families in the assessment area throughout the review period. However, with only nine loans originated during the review period, SunTrust Bank's lending exceeded aggregate lending performance throughout the review period.

Home refinance lending to moderate-income borrowers is adequate. The bank's home refinance lending to moderate-income borrowers was comparable to the percentage of moderate-income families in the assessment area. Lending to moderate-income borrowers was significantly less than the aggregate lenders in 2014 but significantly greater in 2015.

Home Improvement Loans

Home improvement lending to low-income borrowers is adequate. The bank's home improvement lending to low-income borrowers was less than the percentage of low-income families in the assessment area throughout the review period. However, the bank's lending was double that of the aggregate lenders in 2014 and was less than the aggregate in 2015.

Home improvement lending to moderate-income borrowers is good. The percentage of home improvement loans to moderate-income borrowers was greater than the percentage of moderate-income families in the assessment area throughout the review period. Additionally, the bank's performance also exceeded the aggregate lending performance during the review period.

Small Business Loans

The distribution of small business loans to businesses of different sizes is good. While the percentage of small business loans to businesses with revenues of \$1 million or less was less than the percentage of small businesses in the assessment area during the review period, SunTrust Bank's performance exceeded aggregate lending performance. Additionally, 98.2 percent of small business loans were originated in amounts of \$250,000 or less, indicating a willingness to lend in the smaller amounts that are typically requested by small businesses.

Community Development Lending

Sun Trust Bank made an adequate level of community development loans in the Florence assessment area. The bank originated three community development loans totaling \$3.9 million during the review period. Loans were responsive to several community development needs in the assessment area, including the provision of affordable housing and community services targeted to LMI individuals. Sun Trust Bank's community development lending exhibits adequate responsiveness to the community development and credit needs of the assessment area.

Examples of community development lending include but are not limited to:

- Approximately \$3.5 million in financing to support two LIHTC housing developments where all units are affordable to LMI individuals; and
- A loan to a nonprofit organization that provides a soup kitchen serving LMI individuals.

INVESTMENT TEST

SunTrust Bank's performance under the investment test is adequate, as demonstrated by the volume of qualified investments and grants in the Florence assessment area coupled with the level of responsiveness to community development needs.

The bank's investments (excluding contributions) totaled \$2.6 million in the assessment area; all investments were made in a prior review period. The bank's investment portfolio includes securities backed by government-guaranteed single-family mortgages and bonds that finance HUD and SBA programs. The bank contributed \$29,400 during the review period to nonprofit organizations that provide community services to LMI

individuals. Donations included \$10,000 to help construct a new emergency shelter to serve the region. The Florence assessment area also benefits from investments and contributions that serve the bank's entire footprint, including the assessment area.

Most of the bank's investments were made prior to 2012 and demonstrate limited responsiveness to current community development needs in the market, including economic development and affordable housing. However, the bank's performance is considered adequate given the bank's presence in this market and available community development opportunities.

SERVICE TEST

SunTrust Bank's service test performance in the Florence assessment area is adequate based on the accessibility of the bank's retail services and the adequate level of community development services.

Retail Services

Delivery systems are reasonably accessible to the bank's geographies and individuals of different income levels in the Florence assessment area. The distribution of the four branch offices and four ATMs as of December 31, 2015, was compared to the distribution of households and businesses among the tract categories within the assessment area. The bank has one branch in a low-income census tract representing 25.0 percent of total branches in the assessment area and no branches in moderate-income census tracts. For comparison purposes, 5.1 percent of households and 11.4 percent of businesses were located in low-income census tracts and 11.1 percent of households and 10.5 percent of businesses were located in moderate-income tracts. During the review period, no branches were opened in any census tracts and one branch was closed in a middle-income census tract. The bank's record of opening and closing of branches has generally not adversely affected the accessibility of its delivery systems, particularly to LMI geographies and individuals in the assessment area.

SunTrust Bank offers extended hours at the branch in a low-income tract, but does not offer weekend hours. The bank offers extended hours in its middle- and upper-income census tract branches and weekend hours in its upper-income census tract branch. However, banking hours of operation do not vary in a way that inconveniences the assessment area, particularly LMI geographies and/or LMI individuals.

Community Development Services

SunTrust Bank provides an adequate level of community development services in the Florence assessment area. During the review period, employees engaged in 59 qualified community service activities totaling 136 hours that positively impacted the assessment area. Approximately 22 service hours were related to United Way and 25 hours were related to financial education. Approximately 33.1 percent of service hours were board service at community development organizations or committee memberships. This performance is considered adequate given SunTrust Bank's size and presence in the assessment area and the opportunities that exist for community development service.

CRA RATING FOR FLORIDA: <u>SATISFACTORY</u>

The Lending Test is rated:

High Satisfactory

High Satisfactory

High Satisfactory

Low Satisfactory

Major factors supporting the rating include the following:

- The geographic distribution of loans reflects good penetration throughout the assessment areas, and the distribution of loans by borrower income also reflects good penetration among customers of different income levels and businesses of different revenue sizes.
- The bank makes a relatively high level of community development loans in its Florida assessment areas.
- The bank provides a significant level of qualified community development investments and grants
 that are responsive to several identified community development needs of the Florida assessment
 areas.
- Retail services are reasonably accessible to the bank's geographies and individuals of different income levels in the Florida assessment areas.
- The bank provides an adequate level of community development services throughout the Florida assessment areas.

SCOPE OF EXAMINATION

A full-scope review was conducted for the following assessment areas in the State of Florida:

- Daytona
- Miami
- Tampa

Limited-scope reviews were conducted for the remaining 21 assessment areas:

- Fort Myers
- Fort Walton
- Gainesville
- Homosassa Springs
- Jackson (non-MSA)
- Jacksonville
- Lakeland
- Melbourne
- Middle Florida (non-MSA)
- Naples
- Ocala

- Orlando
- Panama City
 - Pensacola
 - Port St. Lucie
 - Punta Gorda
 - Sarasota
- Sebring
- Tallahassee
- The Villages
- Vero Beach

The time period, products, and affiliates evaluated for these assessment areas are consistent with the scope discussed in the institution section of this report.

DESCRIPTION OF INSTITUTION'S OPERATIONS IN FLORIDA

As of June 30, 2015, SunTrust Bank had \$46.3 billion in deposits in Florida accounting for 32.5 percent of SunTrust's total deposits. SunTrust Bank operated 492 branch offices in Florida as of December 31, 2015, representing 34.2 percent of the bank's total branches. HMDA-reportable lending in Florida accounted for 25.4 percent of total institutional HMDA-reportable lending by number of loans, and CRA small business lending in Florida accounted for 40.1 percent of the bank's total CRA small business lending. Lending overall in the state accounted for 31.4 percent of the bank's total lending activity by number of loans and 21.6 percent by dollar volume, which was slightly less than the percentage of total deposits at 32.5 percent.

The following table shows lending activity from January 1, 2014, through December 31, 2015.

Originations and Purchases

CONCLUSIONS WITH RESPECT TO PERFORMANCE TESTS IN FLORIDA

LENDING TEST

The lending test rating in Florida is high satisfactory. Overall, performance in Florida with regard to the geographic distribution of loans reflects good penetration throughout the assessment areas. The distribution of loans by borrower income also reflects good penetration among customers of different income levels and businesses of different sizes. Additionally, SunTrust Bank makes a relatively high level of community development loans in Florida.

During the review period, SunTrust Bank reported 27,822 HMDA-reportable loans and 30,025 small business loans in Florida. As such, small business lending was given greater weight when determining the lending test rating for the state. The rating for Florida is based on the full-scope review of the Daytona, Miami, and Tampa assessment areas, which represent 45.3 percent of the bank's statewide HMDA-reportable and small business lending.

Details of the bank's HMDA-reportable lending, small business lending, and peer lending data can be found in Appendix G.

Geographic and Borrower Distribution

The geographic distribution of SunTrust's HMDA-reportable and small business loans is good, and the distribution of loans by borrower income and revenue size of businesses is also good. As noted above, the

rating for the state of Florida is derived from the Daytona, Miami, and Tampa assessment areas. A detailed discussion of the borrower and geographic distribution of lending for these assessment areas is included in the next sections of this report.

Community Development Lending

Sun Trust Bank makes a relatively high level of community development loans in the state of Florida. The bank originated 199 community development loans totaling \$1.1 billion in Florida during the review period, including 112 loans for \$558.8 million in the Daytona, Miami, and Tampa full-scope assessment areas. Performance in Miami was excellent, while performance in Daytona and Tampa was good. The total state community development lending also includes three loans totaling \$49 million serving the broader statewide area that included the bank's assessment areas. The loans serving the statewide area provided financing for a nonprofit organization whose mission is to administer tax credit donations in the form of scholarships to low-income K-12 students in Florida. Overall, this level of statewide community development lending is considered good based on the bank's size and presence in its Florida assessment areas and the availability of community development lending opportunities. More information on community development loans can be found in the full-scope assessment area sections of this report.

INVESTMENT TEST

The investment test rating for Florida is high satisfactory.

The bank made a significant level of qualified investments and contributions totaling \$512.1 million that directly benefited the Florida assessment areas. The bank's investment portfolio for the state included direct LIHTC and NMTC project investments, LIHTC and NMTC investment funds, mortgage-backed securities and other bonds, and contributions. The bank also had had \$98.3 million in investments that benefited the broader statewide area, including all of the bank's assessment areas. During the review period, the bank invested \$8.3 million in SBA bonds; the remaining investments remain on the books from prior review periods and are largely SBA and HUD bonds and mortgage-backed securities. Statewide investments include contributions of \$223,600 to organizations that provide affordable housing, community services, and economic development programs that benefit the entire state. Notably, the bank provided \$100,000 over the review period to support two CDFIs that finance affordable housing and small businesses statewide.

Approximately 60.2 percent of total statewide investments benefited the three full-scope assessment areas; performance was excellent in Miami, good in Tampa, and poor in Daytona. The bank's performance in limited-scope assessment areas varied; investment activity was excellent in the Melbourne and Pensacola assessment areas, and the volume of investments was good in Ft. Walton, Port St. Lucie, Sarasota, and Tallahassee. Investment performance was adversely rated in 12 of the 21 limited-scope assessment areas.

Additional details regarding specific investments and contributions can be found in the full-scope assessment area sections, and a summary of the bank's investments and contributions for all assessment areas can be found in Appendix F.

SERVICE TEST

The service test rating for Florida is low satisfactory.

Retail Services

Delivery systems, including ATMs and branch office locations, are reasonably accessible to the bank's geographies and individuals of different income levels in the assessment areas. Statewide, the bank's record of opening and closing of branches has generally not adversely affected the accessibility of its delivery systems, particularly to LMI geographies and/or LMI individuals. Overall, banking services and hours of operation do not vary in a way that inconveniences the assessment areas, including LMI geographies and/or LMI individuals. Additional detail on the bank's retail services can be found in the full-scope assessment area sections of this report.

Community Development Services

SunTrust Bank provided an adequate level of community development services that benefit LMI residents and small businesses in Florida. The bank provided a total of 17,281 qualified service hours during the examination period, including 6,379 total hours in the Daytona, Miami, and Tampa full-scope assessment areas. Performance in Miami, the largest full-scope assessment area in the state, was good, while performance in Daytona and Tampa was adequate. Additionally, employees engaged in 10,902 service hours in limited-scope assessment areas. Performance in limited-scope assessment areas was generally less than the full-scope performance, with 13 out of 21 (61.9 percent) limited-scope assessment areas exhibiting very poor or poor performance. Overall performance is considered adequate given SunTrust Bank's size and presence in Florida and the opportunities that exist for community development service.

Additional detail on the bank's retail and community development services can be found in the full-scope assessment area sections of this report.

METROPOLITAN AREA

(Full Scope Review)

DESCRIPTION OF INSTITUTION'S OPERATIONS IN THE DAYTONA, FLORIDA ASSESSMENT **AREA**

Overview

The Daytona, Florida assessment area consists of Flagler and Volusia counties, which make up the entire Deltona-Daytona Beach-Ormond Beach MSA (Daytona MSA). As of December 31, 2015, SunTrust operated 27 branch offices in the assessment area, which represent 5.5 percent of the branches statewide. Additionally, Daytona represents the 5th largest concentration of deposits and 4th largest combined HMDA-reportable and CRA small business lending in the state.

The Daytona assessment area is a highly competitive market dominated by national and regional banks. According to the June 30, 2015 FDIC Summary of Deposits Report, SunTrust Bank ranks 1st out of 27 financial institutions operating in the assessment area with 21.2 percent deposit market share. The other top two financial institutions by deposit market share are Wells Fargo Bank with 19.3 percent, followed by Bank of America with 19.0 percent.

SunTrust Bank and SunTrust Mortgage combined had an average of 4.8 percent of total HMDA-reportable lending in both 2014 and 2015. STB ranked 8th while STM ranked 6th out of the 505 HMDA lenders in the market in 2014. In 2015, both STM and STB decreased slightly in ranking. Wells Fargo Bank was the leading HMDA lender in the market in 2015, followed by Quicken Loans, Inc. and Freedom Mortgage.

In 2015, SunTrust Bank ranked 2nd out of 89 lenders with 13.0 percent of the CRA loans. American Express Bank was the leading CRA lender in the market. Capital One and Bank of America were the other dominant CRA lenders in the market.

Population and Income Characteristics

The total population in the assessment area in 2015 was 604,502. Volusia County accounts for most of the population, with 503,719 residents.⁸⁷ All three of the MSA's principle cities, Daytona Beach, Deltona, and Ormond Beach, are located in Volusia County. Between 2010 and 2015, the population growth in Volusia County was 1.8 percent; the population growth in Deltona, the largest city in the assessment area, was 1.5 percent. Population growth for Daytona Beach, the second largest city, was 2.8 percent. 88 Daytona Beach is the main attraction for tourists.

⁸⁷ "Daytona, FL (U.S. Census Bureau)." GIS Mapping and Geographic Information System Data. The Reinvestment Fund, n.d. Web.17 May 2017. http://www.policymap.com/

The assessment area is made up of 135 census tracts: 5 tracts (3.7 percent) are low-income, 24 tracts (17.8 percent) are moderate-income, 75 tracts (55.6 percent) are middle-income, 29 tracts (21.5 percent) are upper-income, and 2 tracts (1.5 percent) have unknown income levels.

For purposes of classifying borrower income, this evaluation uses the FFIEC estimated median family income. The following table sets forth the estimated median family income in 2014 and 2015 for the Deltona-Daytona Beach-Ormond Beach MSA and shows that the median family income decreased slightly between 2014 and 2015.

Borrower Income Levels Deltona-Daytona Beach-Ormond Beach, FL MSA

FFIE	FFIEC Estimated			Low			rate	N	lle	Upper			
Median	0	-	49.99%	50%	-	79.99%	80%	-	119.99%	120%	-	& above	
2014	\$52,600	0	-	\$26,299	\$26,300	-	\$42,079	\$42,080	-	\$63,119	\$63,120	-	& above
2015	\$51,500	0	-	\$25,749	\$25,750	-	\$41,199	\$41,200	-	\$61,799	\$61,800	-	& above

Poverty and financial instability are concerns throughout the assessment area. The percentage of people living in poverty increased between 2009 and 2015 throughout the assessment area. In 2015, the poverty rate for the assessment area was 17.0 percent, slightly higher than the state rate of 16.5 percent. The poverty rate in the city of Daytona Beach is extremely high at 31.7 percent.⁸⁹ Within the assessment area, 37.9 percent of families are considered LMI, slightly lower than the state level of 39.0 percent. Additionally, 47.5 percent of families in low-income tracts and 16.8 percent of families in moderate-income tracts have incomes below the poverty level, which may limit lending opportunities.

Economic Conditions

Volusia County is known worldwide for the surf and sand of Daytona Beach. It is equally known for its popular events surrounding Bikeweek, which attract over 500,000 visitors annually, and the Daytona 500 – the most prestigious and important race on the NASCAR calendar each year. The Greater Daytona Beach area is positioned at the apex of two major interstate highways, I-95 and I-4, creating a central hub for highway access to the major metropolitan areas of the state and beyond. This prime geographic location makes Volusia County the perfect location for both business and tourism.

Economic conditions in the Daytona MSA strengthened during the review period. During 2016, nonfarm payrolls in the MSA increased by 7,700 jobs, or 4.1 percent, to 195,800 jobs. By comparison, payrolls increased by an average of 3,100 jobs, or 1.8 percent, from 2011 through 2015. Employment in the assessment area is concentrated in the following industries: education and health services, retail trade, leisure

_

⁸⁹ Ibio

⁹⁰ "Market at a Glance." HUD PD&R / Economic & Market Analysis Division (EMAD) Southeast/Caribbean Regional Office. N.p., n.d. Web. 17 May 2017. https://www.huduser.gov/portal/ushmc/mag.html

and hospitality services, professional and business services, and local government. It is worth noting that the retail trade, and leisure and hospitality services sectors account for 30.8 percent of the total employment in the MSA, with average annual earnings of \$26,662.⁹¹ According to Moody's Analytics, industries at the lower end of the pay scale continue to outperform in the MSA and as a result, average hourly earnings are stuck about 30.0 percent below their prerecession level.

The largest employers in the assessment area are Halifax Medical Center, Publix Super Markets, Inc., Florida Hospital – Ormond Memorial, Wal-Mart Stores Inc., and the National Association for Stock Car Racing. The healthcare sector will continue to grow and create opportunities over the next several years given the increase in the aging population in the area. Several healthcare construction and expansion projects are underway within the assessment area, including the Halifax Health emergency room. The same group also has plans to build a medical office building and a 96-bed hospital tower at the site. More importantly, once the hospitals are built, the services must be affordable to large number of LMI populations residing within the area.

According to 2015 Dun & Bradstreet information, there were 42,262 businesses within the Daytona assessment area, of which 96.1 percent had total annual revenues less than or equal to \$1 million and were therefore considered to be small businesses. Low-income tracts contained 2.7 percent of businesses in the assessment area, while 18.0 percent of businesses were located in moderate-income tracts. Small business lending continued to improve during review period. The number of loans to small businesses increased by 32.1 percent between 2013 and 2015 in Volusia and Flagler counties, with 11,221 loans made in 2015. During this same period, loans made to firms with revenues under \$1.0 million represented 57.9 percent and 61.2 percent of total small business loans in Volusia and Flagler counties, respectively. This lending activity is an increase from previous years and an indication that there may be fewer obstacles for smaller firms to access credit in the market.⁹⁴

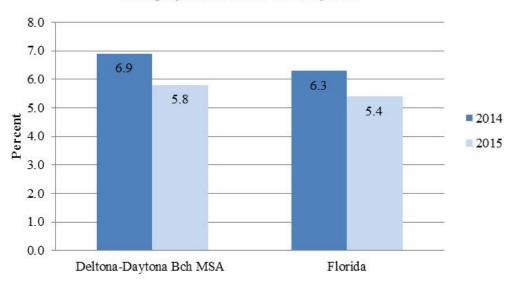

The unemployment rate in the area has significantly decreased since 2010, when both counties posted rates over 12.0 percent. As shown in the following chart, the unemployment rate in the Daytona assessment area continued to trend downward in 2015 and is only slightly higher than the unemployment rate for the state, with an unemployment rate at 5.8 percent compared to 5.4 statewide in 2015.

Unemployment Rates - FL Daytona

Not Seasonally Adjusted. Source: Bureau of Labor Statistics

Census data indicates there were approximately 298,700 housing units located in the assessment area, of which 60.8 percent were owner-occupied, 18.4 percent were rental units, and 20.8 percent were vacant. Rental and vacant units represent a disproportionate share of housing in LMI tracts. These factors suggest that lending may be more challenging in LMI areas than in other areas.

The Daytona housing market has experienced a steady rise in home sales and home values since early 2012. The median home price for Volusia County in December 2015 was approximately \$157,000, an increase of 9.4 percent from December 2013. For the 12 months ending December 2015, annual home sales increased by 13.0 percent, and home values appreciated by 6.0 percent. In terms of affordability, the Daytona assessment area had a Housing Affordability Index (HAI) of 141.0. For existing homeowners in the assessment area, less than a third are considered cost-burdened, meaning homeownership or rental costs account for more than 30.0 percent of household income. For comparison, in markets such as Tampa and Atlanta, about half of the residents are considered cost-burdened.

Renters in the assessment area are far more cost-burdened than homeowners; 44.4 percent of renters in Flagler County and 56.2 percent in Volusia County are cost-burdened.⁹⁹ A report by the National Low Income Housing Coalition confirmed housing affordability is a problem for renters in the Daytona MSA. According to the study, in 2016, a minimum wage worker would have to work 86 hours a week in order to afford the fair market

⁹⁵ Federal Reserve Bank of Atlanta calculations of data provided by CoreLogic

⁹⁶ Ibid

⁹⁷ The affordability index measures how affordable the median home price is to households earning the median income, assuming current mortgage rates. A baseline of 100 indicates that median home prices are in line with median household income; an index greater than 100 indicates the housing is more affordable. Source: Federal Reserve Bank of Atlanta calculations of data provided by Moody's Analytics.

⁹⁸ "Daytona, FL." GIS Mapping and Geographic Information System Data. The Reinvestment Fund, n.d. Web.17 May 2017. http://www.policymap.com/

rent (\$896) for a two-bedroom apartment in the area. In the assessment area, a renter would need an hourly wage of \$17.23 to be able to afford a two-bedroom rental. This will continue to be an issue for lower income renters as apartment vacancy rates decline and rents rise. 101

Demographic Characteristics by Census Tract

The following table based on 2015 FFIEC Census Data and 2015 Dun & Bradstreet information presents key demographic and business information used to help develop a performance context for the assessment area.

Credit and Community Development Needs

The prevalence of poverty and the need for social support services highlight the importance of community service organizations within the bank's markets. The ongoing demand for these services often results in needs for these organizations in terms of financial support and technical assistance as they attempt to serve significant LMI populations within the bank's assessment areas. Ultimately, this has the potential to create community development service or investment opportunities for financial institutions. Other opportunities may include helping organizations provide homebuyer, foreclosure prevention, and financial education classes, and supporting down payment assistance programs and asset building initiatives.

Information and opportunities shared by community contacts are highlighted below:

- Mortgage products, banking services and financial support from local financial institutions have been limited. In particular, the contact noted that underwriting standards have tightened and it is taking longer to qualify borrowers for mortgages. The contact suggested that more flexible financing and innovative mortgage products be considered.
- Local financial institutions are encouraged to extend credit to small businesses and start-ups through innovative small dollar programs or through Enterprise Florida's state guaranteed product for small business financing. One contact noted that although banks are underwriters for the Enterprise Florida product, lenders are not taking advantage of it, and it appears to have gotten lost or ignored. This has driven many entrepreneurs and small business owners to turn to online, non-depository financial institutions.
- The area has a great deal of vacant lots and blighted structures. There are also five community redevelopment areas (CRAs) in Daytona Beach. Financial institutions may have opportunities to work collaboratively with city and county officials to address redevelopment strategies that encourage job creation and create or retain residents.
- Community contacts stated that while the tourism industry is important to the area, this industry relies on low-wage labor, which does not help the community. They echoed the need for good paying jobs to retain a younger and diversified workforce. Financial institutions have the opportunity to respond to this identified need by partnering with local organizations to provide workforce development opportunities to LMI residents who are unemployed or underemployed. A higher skilled workforce will be needed to attract major employers and create higher wage jobs for the area.
- Nearly one-third of Daytona Beach residents live at or below the poverty line and are presumably uninsured or on Medicaid. There is a need for more funding to support community health centers whose primary mission is to provide healthcare services to underserved, low-income, or uninsured people at a low cost or on a sliding scale.

CONCLUSIONS WITH RESPECT TO PERFORMANCE TESTS IN THE DAYTONA, FLORIDA ASSESSMENT AREA

LENDING TEST

SunTrust Bank's lending performance in the Daytona assessment area is good. The geographic distribution of loans reflects good penetration throughout the assessment area. Also, the distribution of borrowers reflects good penetration among borrowers of different income levels and businesses of different revenue sizes. In addition, the bank makes a relatively high level of community development loans.

SunTrust Bank reported 2,012 (56.0 percent) CRA small business loans and 1,582 (44.0 percent) HMDA-reportable loans in the Daytona assessment area during the review period. Therefore, CRA small business lending received greater weight in determining the bank's lending test rating in the assessment area. Notably, the bank's volume of CRA loans in 2015 at 1,505 was a 196.8 percent increase from its 2014 originations at 507 loans. The Daytona assessment area accounted for 3.5 percent of SunTrust Bank's total HMDA-reportable lending in Florida and 4.5 percent of its statewide CRA small business lending by dollar volume during the review period. In comparison, 4.5 percent of SunTrust Bank's Florida deposits are in the Daytona assessment area.

For the lending test analysis, lending performance in low-, moderate-, middle-, and upper-income census tracts and to low-, moderate-, middle-, and upper-income borrowers was considered for each product; however, comments for activity in middle- and upper-income tracts and to middle- and upper-income borrowers are only included when they were material to the outcome of the analyses. Details of the bank's mortgage and small business lending and information regarding lending by peers can be found in Appendix G.

Geographic Distribution of Loans

For this analysis the geographic distribution of small business and HMDA-reportable lending, including both originations and purchases, was compared with available demographic information. Performance context information and aggregate lending data were also taken into consideration. Unemployment rates, poverty rates, the level of owner-occupied units, and the volume of small businesses in LMI census tracts are examples of issues considered when assessing the bank's lending performance. Considering all of these factors, SunTrust Bank's geographic distribution of loans reflects good penetration throughout the assessment area.

SunTrust Bank did not originate any HMDA-reportable loans in low-income census tracts during the review period, where only 1.1 percent of owner-occupied units were located. Aggregate lenders also exhibited low lending levels for HMDA-reportable loans compared to the percentage of owner-occupied units in low-income census tracts. The demographic table for the Daytona assessment area shows that 47.5 percent of the families in low-income census tracts live below the poverty level and that 49.5 percent of housing units in low-income tracts are rental. Opportunity for lending in low-income census tracts appears to be limited given the relatively small percentage of owner-occupied housing units, the high level of poverty, and the lack of lending by the

aggregate lenders. As such, no mention of HMDA-reportable lending in low-income tracts is included below and more weight was given to HMDA-reportable lending performance in moderate-income tracts.

Small Business Loans

Small business lending in low-income census tracts is excellent. SunTrust Bank originated 4.6 percent of its small business loans in low-income census tracts, where 2.6 percent of small businesses in the assessment area are located. Additionally, SunTrust Bank's performance exceeded aggregate lending performance during the review period.

Small business lending in moderate-income census tracts is good. SunTrust Bank originated 22.5 percent of its small business loans in moderate-income census tracts where 17.6 percent of small businesses in the assessment area are located. SunTrust Bank's performance was greater than aggregate lending performance in 2014, but was equivalent to aggregate performance in 2015.

Home Purchase Loans

Home purchase lending in moderate-income census tracts is adequate. The bank's home purchase lending in moderate-income census tracts was less than the percentage of owner-occupied units in these tracts. SunTrust originated 12.1 percent of its home purchase loans in moderate-income census tracts, where 14.0 percent of owner-occupied units are located. However, the bank's performance exceeded aggregate lending performance during the review period.

Home Refinance Loans

Home refinance lending in moderate-income census tracts is poor. Lending performance in moderate-income census tracts was less than the percentage of owner-occupied units located in these tracts and less than aggregate lending performance during the review period.

Home Improvement Loans

Home improvement lending in moderate-income census tracts is good. The bank's home improvement lending in moderate-income census tracts exceeded the percentage of owner-occupied units these tracts during the review period. SunTrust Bank originated 22.9 percent of its home improvement loans in moderate-income census tracts, where 14.0 percent of owner-occupied units are located. Additionally, the bank's performance was greater than aggregate lender performance during the review period.

Lending to Borrowers of Different Incomes and Businesses of Different Sizes

The distribution of loans by borrower income and revenue size of businesses is good. For this analysis, the distribution of small business lending across business revenue sizes and HMDA-reportable lending across borrower income levels was compared to available demographic information. Performance context issues were also considered as well as the performance of other banks.

Small Business Loans

The distribution of small business loans to businesses of different sizes is good. While the percentage of small business loans to businesses with revenues of \$1 million or less was less than the percentage of small businesses in the assessment area during the review period, SunTrust Bank's performance was greater than aggregate lending performance. Additionally, 97.3 percent of small business loans were originated in amounts of \$250,000 or less, indicating a willingness to lend in the smaller amounts that are typically requested by small businesses.

Home Purchase Loans

Home purchase lending to low-income borrowers is adequate. During the review period, home purchase lending to low-income borrowers was less than the percentage of low-income families in the assessment area. However, 4.2 percent of home purchase loans went to low-income borrowers in 2014, which was on par with aggregate lenders at 4.7 percent. In 2015, 4.7 percent of the bank's home purchase loans went to low-income borrowers; this was slightly greater than the aggregate at 3.4 percent.

Home purchase lending to moderate-income borrowers is also adequate. Lending to moderate-income borrowers was comparable to the percentage of moderate-income families in the assessment area. Additionally, the bank's lending was greater than the aggregate lenders in 2014, but slightly less in 2015.

Home Refinance Loans

Home refinance lending to low-income borrowers is adequate. Lending to low-income borrowers was significantly less than the percentage of low-income families in the assessment area. However, the bank's lending was greater than the aggregate lending performance during the review period.

Home refinance lending to moderate-income borrowers is good. The percentage of home refinance loans to moderate-income borrowers was less than the percentage of moderate-income families in the assessment area; however, the bank's lending exceeded aggregate lenders throughout the review period.

Home Improvement Loans

Home improvement lending to low-income borrowers is good. SunTrust Bank's home improvement lending to low-income borrowers was less than the percentage of low-income families in the assessment area. However, the bank's lending was similar to aggregate lenders in 2014, and exceeded aggregate lenders in 2015.

Home improvement lending to moderate-income borrowers is also good. SunTrust Bank's home improvement lending to moderate-income borrowers was greater than the percentage of moderate-income families in the assessment area. Additionally, the bank's lending was greater than aggregate lenders in 2014, but comparable to aggregate lenders in 2015.

Community Development Lending

SunTrust Bank made a relatively high level of community development loans in the Daytona assessment area. The bank originated 10 community development loans totaling \$161.3 million during the review period. Loans were responsive to several community development needs in the assessment area, including the provision of affordable housing, promoting economic development by financing small businesses, and revitalizing and stabilizing low- or moderate-income geographies. SunTrust Bank's community development lending exhibits good responsiveness to the community development and credit needs of the assessment area.

Examples of community development lending include but are not limited to:

- Three loans totaling \$7.4 million for the construction of a new car dealership located in a low-income geography designated as a Florida Enterprise Zone; and
- A loan for \$231,000 to an affordable housing builder to purchase a 21-lot subdivision to build housing affordable to LMI individuals.

INVESTMENT TEST

SunTrust Bank makes a poor level of qualified investments and grants in the Daytona assessment given the bank's presence in the assessment area; investments demonstrate limited responsiveness to community development needs.

The bank's investments (excluding contributions) totaled \$6.4 million in the assessment area. During the review period, the bank invested \$5.0 million in two GNMA bonds secured by affordable multifamily housing. Prior period investments included securities that financed affordable multifamily housing and SBA 504 loans. The bank also donated almost \$100,000 during the review period, primarily to nonprofit organizations that provide community services to LMI individuals. The bank contributed \$63,500 to United Way during the review period, of which \$20,000 was directed towards the Campaign for Working Families, which is a financial empowerment initiative that supports BankOn, free tax assistance, and other financial education programs.

The Daytona assessment area also benefits from investments and contributions that cover the State of Florida and a broader regional area, which includes this assessment area.

SERVICE TEST

SunTrust Bank's service test performance in the Daytona assessment area is good based on the accessibility of the bank's retail services and the adequate level of community development services.

Retail Services

Delivery systems are accessible to the bank's geographies and individuals of different income levels in the Daytona assessment area. The distribution of 27 branch offices and 31 ATMs as of December 31, 2015, was compared to the distribution of households and businesses among the tract categories within the assessment

area. The bank has one branch in a low-income census tract representing 3.7 percent of total branches in the assessment area and six branches in moderate-income census tracts representing 22.2 percent of total branches in the assessment area. For comparison purposes, 2.5 percent of households and 2.7 percent of businesses were located in low-income census tracts, and 18.4 percent of households and 18.0 percent of businesses were located in moderate-income tracts. During the review period, no branches were opened in low- or moderate-income census tracts, but one branch was closed in a moderate-income census tract. No other branch locations were opened or closed in middle- and upper-income census tracts during this review period. The bank's record of opening and closing of branches has generally not adversely affected the accessibility of its delivery systems, particularly to LMI geographies and individuals in the assessment area.

SunTrust Bank offers extended hours in all of its branches in LMI census tracts and weekend hours in the majority of branches in moderate-income census tracts. Weekend hours appear to be offered at higher rates in LMI census tracts than in middle- and upper-income census tracts. Banking hours of operation do not vary in a way that inconveniences LMI geographies and /or LMI individuals in the assessment area.

Community Development Services

SunTrust Bank provides an adequate level of community development services in the Daytona assessment area. During the review period, SunTrust Bank employees provided 268 service hours in various capacities for community development organizations. The majority of service hours were provided for the community development purpose of community services. Notably, approximately 27.2 percent of service hours were board service at community development organizations or committee memberships. The bank's performance is considered adequate given SunTrust Bank's size and presence in the assessment area and the opportunities that exist for community development service.

METROPOLITAN AREA

(Full Scope Review)

DESCRIPTION OF INSTITUTION'S OPERATIONS IN THE MIAMI, FLORIDA ASSESSMENT AREA

Overview

The Miami, Florida assessment area includes Broward, Miami-Dade, and Palm Beach counties, which together make up the Miami-Fort Lauderdale-West Palm Beach, Florida MSA. SunTrust Bank operates 100 branches in the assessment area, representing 20.3 percent of its Florida branches. Approximately 26.1 percent of SunTrust Bank's Florida deposits are held inside this assessment area; this is also its largest deposit concentration in the state. Additionally, Miami represents the largest concentration of combined HMDA-reportable and CRA small business lending at 19.7 percent in Florida.

The assessment area is an active banking market with financial institutions of many different sizes, and large national banks have a strong presence. According to the June 30, 2015 FDIC Summary of Deposits Report, Wells Fargo held the highest deposit market share with 17.0 percent of deposits and 203 branches in the market area, followed by Bank of America, Citibank, and JPMorgan Chase Bank. SunTrust Bank ranked 5th with a 5.8 percent deposit market share (\$12.1 billion).

SunTrust Bank and SunTrust Mortgage combined had an average of 2.4 percent of total HMDA-reportable lending in both 2014 and 2015. STB ranked 27th while STM ranked 18th out of the 891 HMDA lenders in the market in 2014. In 2015, STM increased in ranking to 11th place and STB decreased in ranking to 30th. Wells Fargo Bank, Quicken Loans, and JPMorgan Chase were the top HMDA lenders in the market in 2014 and 2015.

CRA small business lending is equally competitive. In 2014, SunTrust Bank ranked 11th out of 192 CRA reporters with 1.6 percent of all CRA small business loans. In 2015, SunTrust Bank ranked 7th out of 220 CRA reporters with 2.2 percent of all CRA small business loans. American Express Bank was the dominant CRA lender in the market in 2014 and 2015.

Population and Income Characteristics

The Miami-Fort Lauderdale-West Palm Beach, Florida MSA is composed of three metropolitan divisions (MDs): Miami Division (Miami-Dade County), Fort Lauderdale Division (Broward County), and West Palm Beach-Boca Raton Division (Palm Beach County). Miami-Dade County is the most populous county in the state with a population of 2.6 million. In 2015, the assessment area's population was 6.0 million, representing an 8.0 percent increase from 2010. The statewide population grew by 7.8 percent during this five-year period. West Palm Beach, Fort Lauderdale, and Miami rank in the top ten of metropolitan divisions throughout the country with people 65 or older. The West Palm Beach MD ranks 1st with 22.4 percent of its population 65 or older, while the other two areas have 15.0 percent of their population 65 or older.

102 QuickFacts. US Census Bureau, n.d. Web. 8 Sep. 2016. http://quickfacts.census.gov

¹⁰³ "Miami, GA (US Census)." GIS Mapping and Geographic Information System Data. The Reinvestment Fund, n.d. Web. 23 Jun. 2016. http://www.policymap.com/

Besides retirees, Miami's population growth is also fueled by immigration, particularly from Latin America. South Florida's foreign-born residents represent 39.2 percent of its population, compared to 13.3 percent nationally.¹⁰⁴

The assessment area contains 1,219 census tracts; 2010 census data indicates that there were 71 (5.8 percent) low-income census tracts, 315 (25.8 percent) moderate-income tracts, 405 (33.2 percent) middle-income tracts, 399 (32.7 percent) upper-income tracts, and 29 (2.4 percent) unknown-income tracts.

For purposes of classifying borrower income, this evaluation uses the FFIEC's estimated median family income for the three metropolitan divisions. The following tables show the estimated median family income for 2014 and 2015 for the three MDs that make up the MSA. The tables also provide a range of the estimated annual family income for each income category (low, moderate, middle, and upper). From 2014 to 2015, the estimated median family incomes increased by \$1,500, or 2.4 percent, for the Fort Lauderdale MD; \$1,500, or 3.1 percent, for the Miami-Miami Beach MD; and \$1,600, or 2.5 percent, for the West Palm Beach MD. The Miami-Miami Beach MD has the lowest median family income of all three at \$49,900 for 2015, which is driven by a larger percentage of its workforce in lower paying leisure/hospitality and retail trade sectors. As noted earlier, the other two areas have significant retirement populations which may contribute to higher median incomes.

Poverty is an issue in the assessment area, particularly in Miami-Dade County. For the Miami MSA, the percentage of people in poverty was 17.2 percent between 2011 and 2015, while the poverty rate was 20.4 percent in Miami-Dade County. This rate balloons to almost 28.0 percent in the city of Miami, compared to a state rate of 16.5 percent.¹⁰⁵ For the same period, poverty rates in Broward and Palm Beach counties increased to approximately 14.5 percent.¹⁰⁶

Within the assessment area, 39.7 percent of families are considered LMI, which is comparable to the percentages of LMI families in the state. Additionally, 34.4 percent of families living in low-income census tracts live below the poverty level, while 17.7 percent of families living in moderate-income census tracts live below the poverty level.

Economic Conditions

The Miami MSA is known for its diverse population, tropical climate, and miles of coastline. Appropriately, tourism is a primary economic driver in the area, attracting an estimated 15.8 million visitors in 2016.¹⁰⁷ The trade and transportation sector is another top contributor to the economy, representing 23.1 percent of the employment base. Miami is the seventh largest export market in the United States and a gateway to Latin America. The other significant employment sectors include professional and business services, education and health services, and leisure and hospitality.¹⁰⁸

The metropolitan divisions of the Miami MSA each have distinct economies with job concentrations in the following: trade (Miami-Dade), financial services (Fort Lauderdale) and business services (Palm Beach). For Miami-Dade, the city is a hub for transportation and shipping as well as being a dominant U.S. trading partner with Latin America. In addition, Miami-Dade County is home to the Miami International Airport (MIA), which is a major passenger and trade outlet for the state. Fort Lauderdale has a heavy concentration of financial

services providers. It is also known for tourism, boasting a busy cruise-ship industry and its international airport. As for the Palm Beach metro division, it has a well-developed hospitality industry and a heavy concentration of professional/business service jobs.¹⁰⁹

Small businesses play a vital role in the greater Miami economy. According to 2015 Dun & Bradstreet information, there were 480,550 businesses in the assessment area, of which 94.4 percent had total annual revenues less than or equal to \$1 million and were therefore considered to be small businesses. Additionally, 25.7 percent of small businesses in the assessment area are located in LMI tracts, with a much greater concentration in moderate-income tracts (22.3 percent). Lending opportunities to this segment increased by 33.9 percent between 2012 and 2015 in the assessment area, with 187,341 loans made in 2015. During this same period, loans made to firms with revenues under \$1.0 million represented a 58.0 percent share of total small business loans in each metropolitan division, which is a higher proportion than previous years and an indication that there may be fewer obstacles for smaller firms to access credit in the market.

The following chart illustrates the unemployment rates for the assessment area and the State of Florida in 2014 and 2015. The unemployment rate improved for both the assessment area and State of Florida from 2014 to 2015, although the rate for the Miami MSA remained slightly higher than the state.

Not Seasonally Adjusted. Source: Bureau of Labor Statistics

Census data indicates there were approximately 2,444,500 housing units in the assessment area in 2010, of which 54.4 percent were owner-occupied, 28.2 percent were rental units and 17.4 percent were vacant. In low-income tracts, 22.6 percent of housing units were owner-occupied. In moderate-income tracts, 45.8 percent of housing units were owner-occupied. While a majority of units are owner-occupied, a higher percentage of housing units in LMI tracts are rental units, indicating reduced opportunities for mortgage origination in these geographies.

¹⁰⁹ Ibid

¹¹⁰ FRB Atlanta Calculations of Dun & Bradstreet, 2010 American Community Survey data

The assessment area's housing market is improving with higher home prices and lower foreclosure activity, which is promising for the broader economy. Prices for single-family homes and condos have stabilized and increased in value in recent years. In the assessment area, the median sales price for a single-family home in 2016 was \$305,000, representing an 8.9 percent increase relative to the same time the year before; for condos and townhomes, the median sales price was \$165,000, or a 7.1 percent increase from a year before. Unlike 2014 and 2015, home sales in 2016 declined overall, decreasing by 2.2 percent for single-family homes and 7.0 percent for condos and townhomes when compared to the same time the prior year. As a result of rising sales prices, housing remains unaffordable for many residents, particularly in Miami-Dade County. An affordability index, which compares the median home price to median household income, indicates that a median income household cannot afford to purchase a median priced home in Miami-Dade County. Housing affordability is especially challenging for the county's LMI population, as only 32.7 percent of homes were affordable to a LMI family of four in 2015.

Following the housing downturn, a large number of foreign buyers and cash transactions impacted the housing market in the Miami-Dade area, with particular implications on the supply of affordable housing due to the above-market prices these buyers were willing to pay. Foreign buyers accounted for 22.0 percent of unit sales in South Florida¹¹⁵, or 10,600 homes for the 12 months ending in August 2015. Moreover, Miami-Dade County had the most cash sales of any other region in the country during September 2015. Among all the county's home purchases that month, 50.8 percent were completed without financing, according to CoreLogic, and close behind were Palm Beach County with a 50.6 percent ratio of cash sales and Broward County with 47.9 percent. Cash sales activity, however, has been trending downward as a result of the slowdown in the major economies of South America, rising home values in the area, and declining foreclosure activity.

Florida is still one of the states with elevated foreclosure activity, and Miami has consistently ranked above most other large metropolitan areas for the number of properties in the foreclosure process. In the past several years, the percentage of seriously delinquent mortgages (defined as mortgages more than 90 days past due or in the foreclosure process, has finally started to decline. In 2012, 23.1 percent of mortgages were seriously delinquent, falling to 5.0 percent in December 2015.¹¹⁸

^{111 &}quot;Florida Residential Market Sales Activity Closed Sales and Median Sales Prices - Statewide by MSA 2016." Florida Market Reports. Florida Realtors, 9 Feb. 2017. Web. 23 June 2017. https://www.floridarealtors.org/ResearchAndStatistics/Florida-Market-Reports/Index.cfm

¹¹³ The affordability index measures how affordable the median home price is to households earning the median income, assuming current mortgage rates. A baseline of 100 indicates that median home prices are in line with median household income; an index greater than 100 indicates the housing is more affordable. According to Federal Reserve Bank of Atlanta calculations, the affordability index in 2015 was 85 in Miami-Dade County, 128 in Broward County and 129 in Palm Beach County. 2015 FFIEC Census Data and 2015 D&B Information

Credit and Community Development Needs

Rental housing costs are significant for many renters across the assessment area. For the assessment area, 59.4 percent of renters are considered cost-burdened, meaning that rental costs account for more than 30.0 percent of household income. Miami-Dade County had the highest percentage with 61.8 percent of renters who are considered as cost-burdened. The challenges in Miami-Dade County are also notable because of the high percentage (34.8 percent) of extremely cost-burdened renters, or those renters for whom housing costs account for more than 50.0 percent of household income.¹¹⁹ Local officials fear that low-income workers could be pushed out of Miami-Dade County if public officials and local developers do not work together to build more affordable housing. Florida ranks in the top 5 states with the highest percentage of cost-burdened and extremely cost-burdened renters in the nation.

While these findings impact other areas of community development needs such as income growth, financial stability, and workforce development, they show an acute need for the development of affordable housing that is close to employment centers. CDFIs and other community development organizations have programs in place to increase the supply of affordable housing. However, access to flexible, affordable financing is a continuous need. Financial institutions have an opportunity to engage in the development of this housing, assist in the provision of supportive services for the local residents, and support the sustainability of these organizations.

Access to capital for small business owners is another high priority in the Miami assessment area. According to a community contact that specializes in micro enterprises and self-employed entrepreneurs, business owners need access to revolving credit lines, which are difficult to obtain without significant collateral. Since many emerging business owners do not meet bank underwriting standards, alternative financing providers are needed, such as CDFIs. There are several CDFIs in South Florida that provide financial products, technical assistance, and basic financial education to small businesses. Therefore, banks have a number of different opportunities to work with CDFIs, such as providing technical assistance to the organization, lending or investing in the organization to provide additional lending capital, or purchasing their loans to help CDFIs recycle lending capital. A CDFI that specializes in micro lending stated that banks are interested in purchasing loans, but often the credit scores of their borrowers do not meet the bank's risk profile. The contact urges financial institutions to consider a modified risk profile and underwriting model for these types of loan purchases. Given the average dollar size of the underlying loans and the extensive technical assistance provided to small businesses by CDFIs, the mitigated risk should be considered, as stated by the contact.

Additional information and opportunities shared by community contacts are highlighted below:

• Within the MSA, the highest percentage of unbanked households resides in Miami-Dade County. In the city of Miami, 11.6 percent of households are unbanked, while 15.6 percent are unbanked in Miami-Dade County¹²⁰ BankOn Miami was recently launched in a collaborative effort between Miami-Dade

^{120 2015} Assets & Opportunities Local Data Center. Calculations by CFED of data from 2013 FDIC National Survey of Unbanked and Underbanked Households. N.p. Web. 12 Sept. 2016. http://localdata.assetsandopportunity.org/map

County, United Way of Miami-Dade, financial institutions, and other government entities and nonprofits. The program creates opportunities for financial institutions to help improve the financial stability of LMI families across in the area.¹²¹

• Targeted redevelopment areas present opportunities for banks to engage in community revitalization and stabilization activities that attract new residents and businesses to the area. For example, the city of Miami has opted to target funding to certain areas: Neighborhood Development Zones (NDZs) and Model Blocks. The NDZs represent the most distressed neighborhoods in which the city seeks to bring about improvements that can create a notable and sustainable impact in these communities. The Model Block concept enables the city to advance the principle of NDZs by focusing resources in areas within the NDZs that are most in need of revitalization. Similar to the city, Miami-Dade County has established Targeted Urban Areas that serve as economic development priority areas and the focus of public resources.

CONCLUSIONS WITH RESPECT TO PERFORMANCE TESTS IN THE MIAMI, FLORIDA ASSESSMENT AREA

LENDING TEST

SunTrust Bank's lending performance in the Miami assessment area is good. The geographic distribution of loans reflects good penetration throughout the assessment area. Also, the distribution of borrowers reflects adequate penetration among borrowers of different income levels and businesses of different revenue sizes. Additionally, SunTrust Bank is a leader in making community development loans in this assessment area.

SunTrust Bank reported 6,263 (54.9 percent) CRA small business loans and 5,144 (45.1 percent) HMDA-reportable loans in the Miami assessment area during the review period. As such, CRA small business lending received greater weight for the lending test rating in Miami. The Miami assessment area accounted for 25.2 percent of SunTrust Bank's total HMDA-reportable lending in Florida and 25.3 percent of its CRA small business lending by dollar volume during the review period. In comparison, 26.1 percent of SunTrust Bank's Florida deposits are in the Miami assessment area. The Miami assessment area continues to represent the highest concentration of deposits, branches, and combined lending in the state of Florida; therefore, this assessment area had the greatest impact on statewide performance ratings across the three tests.

For the lending test analysis, lending performance in low-, moderate-, middle-, and upper-income census tracts and to low-, moderate-, middle-, and upper-income borrowers was considered for each product; however, comments for activity in middle- and upper-income tracts and to middle- and upper-income borrowers are only included when they were material to the outcome of the analyses. Details of the bank's mortgage and small business lending and information regarding lending by peers can be found in Appendix G.

Geographic Distribution of Loans

For this analysis the geographic distribution of small business and HMDA-reportable lending, including both originations and purchases, was compared with available demographic information. Performance context information and aggregate lending data were also taken into consideration. Unemployment rates, poverty rates, the level of owner-occupied units, and the volume of small businesses in LMI census tracts are examples of issues considered when assessing lending performance. Considering all of these factors, SunTrust Bank's geographic distribution of loans reflects good penetration throughout the assessment area.

Small Business Loans

Small business lending in low-income census tracts is excellent. SunTrust Bank originated 4.7 percent of its small business loans in low-income census tracts, where 3.3 percent of small businesses in the assessment area are operating. Additionally, SunTrust Bank's performance was significantly greater than aggregate lenders in 2014 and slightly better than aggregate lenders in 2015.

Small business lending in moderate-income census tracts is good. SunTrust Bank originated 24.1 percent of its small business loans in moderate-income census tracts, where 22.0 percent of small businesses in the assessment area are operating. SunTrust Bank's performance was also greater than aggregate lenders in 2014 and similar to aggregate lenders in 2015.

Home Purchase Loans

Home purchase lending in low-income census tracts is adequate. Lending performance in low-income census tracts was less than the percentage of owner-occupied units located in these tracts throughout the review period. However, the bank's home purchase lending in these tracts was similar to aggregate lending in 2014 and equal to aggregate lending in 2015.

Home purchase lending in moderate-income census tracts is good. The bank's home purchase lending in moderate-income census tracts was similar to the percentage of owner-occupied units in these tracts during the review period. Additionally, the bank's home purchase lending in these tracts exceeded aggregate lending during the review period.

Home Refinance Loans

Home refinance lending in low-income census tracts is adequate. Lending performance in low-income census tracts was less than the percentage of owner-occupied units located in low-income census tracts. However, SunTrust Bank's performance was greater than aggregate lending performance in 2014 and equal to aggregate lending performance in 2015.

Home refinance lending in moderate-income tracts is also adequate. SunTrust Bank originated 13.1 percent of its home purchase loans in moderate-income census tracts, where 23.1 percent of owner-occupied units are located. SunTrust Bank's home refinance lending in these tracts was also less than the aggregate lenders throughout the review period.

Home Improvement Loans

Home improvement lending in low-income census tracts is excellent. Lending performance in low-income tracts exceeded the percentage of owner-occupied units located in these tracts. SunTrust Bank's home improvement lending was also greater than aggregate lending performance during the review period.

Home improvement lending in moderate-income census tracts is good. SunTrust Bank's home improvement lending in moderate-income census tracts was similar to the percentage of owner-occupied units in these tracts during the review period. Additionally, SunTrust Bank's home improvement lending in these tracts exceeded aggregate lending throughout the review period

Lending to Borrowers of Different Incomes and Businesses of Different Sizes

The distribution of loans by borrower income or revenue size of businesses is adequate. For this analysis, the distribution of small business lending across business revenue sizes and HMDA-reportable lending across borrower income levels was compared to available demographic information. Performance context issues were also considered as well as the performance of other banks.

Small Business Loans

The distribution of small business loans to businesses of different sizes is adequate. While the percentage of small business loans to businesses with revenues of \$1 million or less was less than the percentage of small businesses in the assessment area, SunTrust Bank's performance was greater than aggregate lending performance. Additionally, 94.9 percent of small business loans were originated in amounts of \$250,000 or less, indicating a willingness to lend in the smaller amounts that are typically requested by small businesses.

Home Purchase Loans

Home purchase lending to low-income borrowers is adequate. The bank's percentage of home purchase loans to low-income borrowers was less than the percentage of low-income families in the assessment area during the review period. However, the bank's home purchase lending to low-income borrowers was comparable to aggregate lending performance throughout the review period.

Home purchase lending to moderate-income borrowers is excellent. SunTrust Bank's home purchase lending to moderate-income borrowers was comparable to the percentage of moderate-income families located in the assessment area. Additionally, the bank's home purchase lending exceeded aggregate lending throughout the review period.

Home Refinance Loans

Home refinance lending to low-income borrowers is adequate. The bank's percentage of home refinance loans to low-income borrowers was significantly less than the percentage of low-income families in the assessment area during the review period. However, the bank's home refinance lending to low-income borrowers exceeded aggregate lending in 2014 and was comparable to aggregate lending in 2015.

Home refinance lending to moderate-income borrowers is also adequate. The bank's percentage of home refinance loans to moderate-income borrowers was less than the percentage of moderate-income families in the assessment area during the review period. However, the bank's home refinance lending to moderate-income borrowers was comparable to aggregate lending performance throughout the review period.

Home Improvement Loans

Home improvement lending to low-income borrowers is good. The bank's percentage of home improvement loans to low-income borrowers was less than the percentage of low-income families in the assessment area during the review period. However, the bank's home improvement lending to low-income borrowers exceeded aggregate lending throughout the review period.

Home improvement lending to moderate-income borrowers is also good. The bank's percentage of home improvement loans to moderate-income borrowers was less than the percentage of moderate-income families in the assessment area during the review period. However, the bank's home improvement lending to moderate-income borrowers exceeded aggregate lending in 2014 and was comparable to aggregate lending in 2015.

Community Development Lending

SunTrust Bank is a leader in making community development loans in the Miami assessment area. The bank originated 64 community development loans totaling \$307.2 million during the review period. Loans were responsive to many community development needs in the assessment area, including the provision of affordable housing, community services targeted to LMI individuals, promoting economic development by financing small businesses, and revitalizing and stabilizing LMI geographies. The bank provided \$107 million towards economic development activities; \$93 million supporting community services to LMI individuals; \$57 million in loans to revitalize and stabilize LMI geographies; and \$50 million in support of affordable housing. SunTrust Bank's community development lending exhibits excellent responsiveness to the community development and credit needs of the assessment area.

Examples of community development lending include but are not limited to:

• A loan for \$7.5 million to a NMTC qualified Community Development Entity (CDE) to make Qualified Low Income Community Investments. The CDE used the funds to invest in two small businesses and an elementary school located in a low-income geography.

- A loan for approximately \$18 million to finance the construction of a 77-unit Low Income Housing Tax Credit (LIHTC) project. The loan will help provide permanent financing to support dedicating 90.0 percent of the units to be reserved for individuals or families whose income is no greater than 60.0 percent of the area median income (AMI) and 10.0 percent reserved for individuals or families whose income is no greater than 33.0 percent of AMI.
- Four loans for a total of \$23 million to help finance a not-for-profit geriatric care center. The center provides three Housing and Urban Development (HUD) Section 202 facilities, specifically designated for low-income, independent elderly residents (below 50.0 percent of AMI). Additionally, 70.0 percent of the center's patients receive Medicaid.
- Two loans for a total of \$2.9 million to finance a startup manufacturer creating 30 jobs in a moderate-income geography.

INVESTMENT TEST

SunTrust Bank makes an excellent level of qualified investments and grants in the Miami assessment area given the bank's presence and competition in the assessment area. The bank's investments were responsive to several identified needs, including affordable rental housing, access to healthcare, and increased financial stability through support of critical community services.

The bank made investments (excluding contributions) totaling \$230.7 million in the assessment area; of that, \$188.2 million was invested during the review period. The investment portfolio includes a number of investment vehicles, including, but not limited to, Low Income Housing Tax Credits, LIHTC investment funds, NMTC funds, securities backed by government-guaranteed mortgages on multifamily properties, and bonds that finance HUD and SBA programs. The majority of new investments during the review period financed affordable housing, and the bank provided funding to support nearly 1,000 units of affordable housing through LIHTC-related investments alone.

In addition, through \$11.0 million in two NMTC investments, the bank provided financing for several community services projects. Notably, the bank provided NMTC financing (and a related community development loan) to help finance a 50,000-square-foot expansion of a public health center that serves a majority of LMI individuals. The clinic is similar to a Federally Qualified Health Center and will provide comprehensive health care and social services to senior, disabled, and low-income individuals. The organization reports that 98.0 percent of patients served are living below the poverty line; therefore, this investment will have a significant impact in the community by increasing access to affordable health care.

SunTrust Bank also contributed \$964,000 to nonprofit organizations and community development projects during the review period. Specifically, the bank provided grants totaling \$888,000 to nonprofits that offer community services to LMI individuals, including \$342,000 to United Way affiliates to support programs and organizations that serve primarily LMI individuals and \$50,000 to Junior Achievement to provide programming at schools that serve a majority of LMI children. The bank gave to organizations that provide assistance to the homeless, immigrant support services, youth development, public school support, financial counseling,

workforce development, financial support for seniors, health care and support for individuals with disabilities, and a range of other needed community services. Remaining donations included \$49,000 for affordable housing and \$22,000 for economic development.

As noted earlier, the bank also had investments and contributions that served the entire state of Florida and a broader regional area that includes the bank's assessment area.

SERVICE TEST

SunTrust Bank's service test performance in the Miami assessment area is good based on the relatively high level of community development services and adequate retail services performance. The accessibility of the bank's delivery systems in this assessment area was rated poor and impacted the overall retail services rating.

Retail Services

Although overall retail services are considered adequate, delivery systems may be unreasonably inaccessible to portions of the bank's geographies and individuals of different income levels in the Miami assessment area. The distribution of 100 branch offices and 121 ATMs as of December 31, 2015, was compared to the distribution of households and businesses among the tract categories within the assessment area. The bank has 4 branches in low-income census tracts representing 4.0 percent of total branches in the assessment area and 10 branches in moderate-income census tracts representing 10.0 percent of total branches in the assessment area. For comparison purposes, 4.8 percent of households and 3.4 percent of businesses were located in low-income census tracts, and 27.8 percent of households and 22.3 percent of businesses were located in moderate-income tracts. During the review period, no branches were opened or closed in low- or moderate-income census tracts, but four branches were opened and six branch locations were closed in middle- and upper-income census tracts. The bank's record of opening and closing of branches has generally not adversely affected the accessibility of its delivery systems, particularly to LMI geographies or LMI individuals in the assessment area.

SunTrust Bank offers extended hours in all of its LMI census tract branch locations. Weekend hours are offered in half of the branch locations in low-income census tracts, and the majority of branch locations in moderate-income census tracts offer weekend hours as well. Extended and weekend hours are offered at higher rates at branches in LMI tracts than at branch locations in middle- and upper-income census tracts. Banking hours of operation and retail services do not vary in a way that inconveniences the assessment area, particularly LMI geographies and individuals in the assessment area.

Community Development Services

SunTrust Bank provides a relatively high level of community development services in the Miami assessment area. During the review period, SunTrust Bank employees provided 4,162 service hours in various capacities for community development organizations, by participating in different community development services with over 100 different organizations. Bank employees provided 218 affordable housing hours, 148 economic development hours, and 3,797 community service hours.

SunTrust employees were active in a significant number of organizations. Employees supported a youth and teen service agency; provided financial expertise for state-funded family support programs; provided lending technical assistance to minority-owned small businesses; served on an affordable housing task force; participated in an elderly housing program board; and supported workforce development for a vocational organization serving individuals with developmental disabilities. The bank's performance is good given its size, strong branch presence, market share in the Miami assessment area, and the opportunities that exist for community development services.

METROPOLITAN AREA

(Full Scope Review)

DESCRIPTION OF INSTITUTION'S OPERATIONS IN THE TAMPA, FLORIDA ASSESSMENT AREA

Overview

The Tampa, Florida assessment area includes Hernando, Hillsborough, Pasco, and Pinellas counties, which together make up the Tampa-St. Petersburg-Clearwater, Florida MSA (Tampa MSA). As of June 30, 2015, SunTrust Bank operated 93 branches in the assessment area, representing 18.9 percent of its Florida branches.

The Tampa MSA is a competitive banking market dominated by several large institutions. According to the June 30, 2015 FDIC Summary of Deposits Report, there are 66 financial institutions operating 751 branches in the MSA with a total of \$69.8 billion in deposits. SunTrust Bank ranks 4th in deposit market share with 12.1 percent of total deposits (\$8.5 billion). Bank of America has the largest deposit market share at 17.3 percent, followed by Raymond James Bank at 16.5 percent and Wells Fargo Bank at 13.5 percent.

For HMDA-reportable lending, SunTrust Mortgage ranked 6th while SunTrust Bank ranked 18th in 2014 with 2.2 percent and 1.6 percent market share, respectively. Wells Fargo Bank, Quicken Loans, and JPMorgan Chase Bank were the top HMDA lenders in the assessment area. Both SunTrust Mortgage and SunTrust Bank dropped in rank in 2015 to 8th and 20th place with 2.2 percent and 1.3 percent of all HMDA-reportable loans, respectively.

In 2014, SunTrust Bank ranked 9th out of 154 CRA reporters with 3.2 percent of all CRA loans. American Express Bank, Wells Fargo Bank, and Citibank dominate the assessment area's CRA loan production. The bank's CRA market share rank improved in 2015 to 7th out of 148 reporters with 6.7 percent of CRA loans in the market.

Population and Income Characteristics

The assessment area is located in central Florida and borders the Gulf of Mexico. As of July 1, 2015, the assessment area had an estimated population of 2.9 million people, a growth rate of 6.9 percent since the last census in 2010.¹²⁴ Hillsborough County, home to the city of Tampa, is the most densely populated county in the assessment area, with approximately 1.3 million residents, and represents about 45.0 percent of the assessment area's total population. 125

The assessment area contains 746 census tracts; 2010 census data indicates that there were 33 (4.4 percent) lowincome census tracts, 191 (25.6 percent) moderate-income tracts, 306 (41.0 percent) middle-income tracts, 203 (27.2 percent) upper-income tracts, and 13 (1.7 percent) unknown-income tracts.

For purposes of classifying borrower income, this evaluation uses the FFIEC estimated median family income. The following table sets forth the estimated median family income for the years 2014 and 2015 for the MSA, which increased by \$1,600, or 2.8 percent, during the review period. It also provides a range of the estimated median family income for each income category (low, moderate, middle, and upper).

Borrower Income Levels
Tampa-St. Petersburg-Clearwater, FL MSA

FFIE	C Estimated		I	ow	M	odeı	rate	N	Mida	ile		Uppe	er
Median	Family Income	0	-	49.99%	50%	-	79.99%	80%	-	119.99%	120%	-	& above
2014	\$57,400	0	-	\$28,699	\$28,700	-	\$45,919	\$45,920	-	\$68,879	\$68,880	-	& above
2015	\$59,000	0	-	\$29,499	\$29,500	-	\$47,199	\$47,200	-	\$70,799	\$70,800	-	& above

Poverty and financial instability are major concerns throughout the assessment area. From 2011 to 2015, poverty rates increased in all counties in the assessment area. Poverty rates ranged from a low of 14.0 percent in Pasco County to a high of 17.0 percent in Hillsborough County. The 2015 statewide poverty rate was 16.5 percent. For the city of Tampa, the percentage of people in poverty between 2011 and 2015 was 21.8 percent. Within the assessment area, 39.2 percent of families are considered LMI, and 36.2 percent of the families living in low-income tracts and 15.4 percent of families in moderate-income tracts have incomes below the poverty level.

Economic Conditions

The city of Tampa is Florida's third most populous city, and Hillsborough County is Florida's fourth most populous county. The Tampa area is a tourist destination, with an estimated 21 million people visiting Tampa/Hillsborough County in 2014, spending approximately \$5.4 billion dollars. Top employers in the MSA include BayCare Health Systems, MacDill Air Force Base, Home Shopping Network, the University of South Florida (USF), and Tampa General Hospital. As of March 2015, total nonfarm employment in the assessment area was nearly 1.2 million jobs. Industries with the largest number of employees include trade, professional and business services, education and health services, and leisure and hospitality. Government also has a large presence in the MSA, providing nearly 152,000 jobs. From March 2014 to July 2015, the largest job gains were in the leisure and hospitality sector, and the greatest job losses were in the information sector.

¹²⁹ Ibid

¹³⁰ Tampa Area Economic Summary. US Bureau of Labor Statistics, n.d. Web. 8 Oct. 2014. http://www.bls.gov/ro4/blssummary_tampa.pdf

The assessment area contains two sea ports and two commercial airports. The Port of Tampa is Florida's largest port by cargo tonnage and in physical area. It has an annual economic impact of \$15 billion and generates nearly 100,000 jobs by handling nearly 40.0 percent of all cargo moving in and out of the state of Florida.¹³¹ Tampa International Airport is also a major employer and economic engine for the region, supporting more than 80,000 jobs with a total annual economic impact of \$7.8 billion.¹³²

MacDill Air Force Base (AFB) is a major economic engine for the Tampa area. The military estimates that the economic impact of MacDill AFB on the Greater Tampa Bay Region was \$2.9 billion as of 2010. Additionally, retiree populations within approximately 50 miles of the base add another \$2.1 billion, for a total annual economic impact of \$5.0 billion. 133

Small businesses play an important role in the Tampa economy. According to 2015 Dun & Bradstreet information, there were 194,920 businesses within the assessment area, of which 94.7 percent had total annual revenues less than or equal to \$1 million and were therefore considered small businesses. Of the small businesses in the assessment area, 23.9 percent were located in LMI tracts. Concerning small business lending trends, the number of small business loans increased by 33.1 percent between 2012 and 2015. Additionally, in 2015, 97.0 percent of small business loans were in amounts less than \$250,000, which indicates that banks are providing the types of loans most small businesses require. 134

The Tampa assessment area is home to three enterprise zones (EZs): two in Hillsborough County and one in Pinellas County. An EZ is a specific geographic area targeted for economic revitalization. EZs encourage economic growth and investment in distressed areas by offering tax advantages and incentives to businesses locating within the zone boundaries. Some of the targeted industries in Florida EZs include but are not limited to financial services, life sciences, manufacturing, and information technology. The Florida EZ Program expired on December 31, 2015, and while it is still relevant for the bank's review period, its expiration is a concern within the community and has implications on the area's needs for the next CRA exam cycle. ¹³⁵

The Tampa area unemployment rate increased sharply during the recent recession due to the area's dependence on residential construction jobs. While the local economy continues to be challenged with unemployment and housing-related issues similar to many other Florida markets, it is exhibiting signs of improvement. As shown

in the following chart, the unemployment rate decreased from 6.0 percent in 2014 to 5.1 percent in 2015 in the Tampa MSA, which is slightly better than the statewide trend. In fact, job growth in Tampa was the second largest in any Florida metro area since 2015, with a 3.0 percent boost in jobs. 136

Florida

Census data indicates there are approximately 1,336,500 housing units in the assessment area, of which 58.5 percent are owner-occupied, 25.5 percent are rental units and 16.0 percent are vacant. While a majority of units are owner-occupied, more than half of housing units in low-income tracts and nearly one-third of units in moderate-income tracts are rental units, indicating reduced opportunities for mortgage originations in these geographies. The median age of housing stock across the assessment area is 29 years, although units in low-income tracts are considerably older.

Recovery from the effects of the nationwide housing crisis has defined the Tampa housing market in recent years. As a result of plummeting housing values in 2008 and 2009, large institutional investors moved into the market and purchased homes in bulk. It is estimated that these investors bought more than \$800 million in distressed residential properties during and after the recession. Many of these units have been renovated and converted into rentals to produce income for the investors, thereby reducing the supply of housing units available for sale. While this helped stabilize the area's housing market overall and individual neighborhoods affected by falling housing values, there are now concerns about the impact to the housing market if these investors begin selling properties en masse in order to realize a profit as real estate values rise. Additionally,

¹³⁶ O'Donnell, Christopher. "Study: Tampa Area Fourth Fastest-growing Job Market in U.S." TBO. Tampa Bay Times, 19 May 2016. Web. 17 June 2017. http://www.tbo.com/news/business/study-tampa-area-fourth-fastest-growing-job-market-in-us-20160419/

some local affordable housing advocates argue that these bulk property purchases have artificially raised housing prices, making homeownership unaffordable for many lower-income and first-time homebuyers. As of 2015, 35.4 percent of homes sold in the Tampa Bay area were cash sales, one of the highest in the nation.

During the 12 months ending March 2015, new and existing home sales rose 3.0 percent to 73,000 homes, which is on par with the average number of homes sold from 2009 through 2014.¹³⁹ Prices for new and existing home sales have trended upward as well. According to the Greater Tampa Association of Realtors, the median sales price was \$180,000 in December 2015, representing an 11.0 percent increase over the prior year.¹⁴⁰ The improving sales market has led to more new home construction activity in 2014 and 2015. In 2015, new home permits increased by 32.2 percent from 2013 levels, with 9,981 new permits issued.¹⁴¹ While this figure remains just a fraction of the pre-recessionary peak of 27,600, it does suggest improving conditions. The improving housing market is further evidenced in the continued decline in seriously delinquent mortgages. The percentage of mortgages considered seriously delinquent (defined as more than 90 days past due or in foreclosure) fell from 10.2 percent in January 2014 to 5.2 percent in March 2016. Delinquency rates were highest in Pasco County at 5.9 percent as of March 2016. By comparison, the state figure for the same period was 4.6 percent.¹⁴²

The rental market in the Tampa assessment area is significantly influenced by MacDill AFB and the two largest universities in the assessment area, USF and the University of Tampa. While MacDill provides some on-base housing, approximately 7,000 households reside off base in the private housing market. The universities in the market have approximately 48,000 students that reside in the local housing market, with student households accounting for up to 12.0 percent of overall renter households in the assessment area. The overall residential vacancy rate was highest in Pinellas County at 5.2 percent in the first quarter of 2016. Overall residential vacancy rates in the remaining counties in the assessment area were under 3.0 percent. The median gross apartment rent in the assessment area in 2015 ranged between \$884 in Hernando County to \$965 in Hillsborough County. A minimum wage worker, however, would have a challenge with housing affordability in the Tampa MSA. According to a housing study in 2016, a minimum wage worker would have to work 95 hours a week in order to afford the fair market rent for a two-bedroom apartment in the area. 144

As previously mentioned, the Tampa MSA was challenged with a high concentration of vacant and abandoned housing units. In fact, Tampa was ranked 5th in the country for metro areas for the number of "zombie" properties, which are vacant properties in the foreclosure process. Many municipalities in the MSA began requiring the registration of vacant and foreclosed properties to ensure properties were maintained during the foreclosure process, in order to reduce blight within the community. The city of St. Petersburg, Florida, located in Pinellas County, utilized this list to launch programs and incentives to attract buyers and nonprofits to the vacant homes. By 2016, the city was able to reduce the number of vacant properties listed by 50.0 percent. 146

2015 FFIEC Census Data and 2015 D&B Information

Credit and Community Development Needs

Several community contacts described the local economy as showing improvement since recession lows, some attributing it to growth in the healthcare and technology sectors. One community development expert noted there is still a high demand for affordable housing, including single-family homes for sale and multifamily rental housing. The community is concerned with the number of investors flipping properties for profit which is driving up the price of housing in the area and further restricting supply of housing for low-income individuals and families. Another contact noted that there was a recent increase in the number of Hispanic residents which in turn has increased the demand for bilingual services. The same contact also listed transportation as a community need within the assessment area as transportation is not easily accessible and getting around the area requires a car; the contact feels the local government does not seem to be prioritizing this issue. The biggest credit need for the area is affordable banking products because many area residents are relying on predatory payday lending and pawn shops as alternatives to traditional banking in seeking out small dollar loans and check cashing services. As noted earlier, because transportation is an issue, LMI people need help with car loans, which are also difficult for them to obtain. The contact indicated there is an opportunity for banks in the area to strengthen relationships with residents so that they do not have to resort to predatory lending alternatives.

In its Consolidated Plan prepared for HUD, Hillsborough County lists affordable housing needs for LMI individuals and elderly homeowners as top priorities. According to the report, approximately 25.6 percent of households in Hillsborough County have housing problems, whether cost-burdened, overcrowded or lacking complete kitchen or plumbing facilities.¹⁴⁷ In addition, over 30,000 Tampa residents are on the waitlist for Section 8 or public housing. The affordability issue is underscored by the percentage of renters in the Tampa MSA that are considered cost-burdened, meaning that homeownership or rental costs account for more than 30.0 percent of household income; 51.1 percent of renters were considered cost-burdened as of 2015, slightly higher than the national rate of 47.9 percent.¹⁴⁸ Concerning elderly homeowners, Hillsborough County places a priority on assisting the elderly, many of whom are living on a fixed income, with maintaining owner-occupied residences within the community to prevent homes falling into disrepair and adversely impacting the neighborhood's stability.¹⁴⁹

Additional information and opportunities shared by community contacts are highlighted below:

• There is still a critical need for technical assistance and alternative financing for small business owners who are unable to qualify for bank financing. Several community contacts noted that banks are

¹⁴⁷ Five Year Consolidated Plan. Hillsborough County, FL., n.d. Web. 10 Apr. 2017.

- aggressively competing for small business loans for financially stable businesses, but for those businesses that are still struggling, credit access is limited. Banks can engage with small business CDFIs and loan funds to help meet this important community credit need.
- There are opportunities to partner with local school districts to provide financial literacy. Of the four school districts inside the assessment area in 2014, three had more than 50.0 percent of students participating in the free and reduced-price school lunch program. The Hernando County School District had the highest participation rate at 63.7 percent, and Pinellas County had the lowest at 42.6 percent. All four school districts had less than 50.0 percent of students eligible for the program in 2000. 150

CONCLUSIONS WITH RESPECT TO PERFORMANCE TESTS IN THE TAMPA, FLORIDA ASSESSMENT AREA

LENDING TEST

SunTrust Bank's lending performance in the Tampa assessment area is good. The geographic distribution of loans reflects good penetration throughout the assessment area. Also, the distribution of borrowers reflects good penetration among borrowers of different income levels and businesses of different revenue sizes. In addition, the bank makes a relatively high level of community development loans.

SunTrust Bank reported 6,011 (53.6 percent) CRA small business loans and 5,212 (46.4 percent) HMDA-reportable loans in the Tampa assessment area during the review period. Therefore, CRA small business lending received greater weight in determining the bank's lending test rating. The Tampa assessment area accounted for 17.5 percent of SunTrust Bank's total HMDA-reportable lending in Florida and 19.4 percent of its total statewide CRA small business lending by dollar volume during the review period. In comparison, 18.3 percent of SunTrust Bank's Florida deposits are in this assessment area.

For the lending test analysis, lending performance in low-, moderate-, middle-, and upper-income census tracts and to low-, moderate-, middle-, and upper-income borrowers was considered for each product; however, comments for activity in middle- and upper-income tracts and to middle- and upper-income borrowers are only included when they were material to the outcome of the analyses. Details of the bank's mortgage and small business lending and information regarding lending by peers can be found in Appendix G.

Geographic Distribution of Loans

For this analysis the geographic distribution of small business and HMDA lending, including both originations and purchases, was compared with available demographic information. Performance context information and aggregate lending data were also taken into consideration. Unemployment rates, poverty rates, the level of

Tampa, FL." GIS Mapping and Geographic Information System Data. The Reinvestment Fund, n.d. Web. 12 Apr. 2017. http://www.policymap.com/

owner-occupied units, and the volume of small businesses in LMI census tracts are examples of issues that were considered when assessing the bank's lending performance. Considering all of these factors, SunTrust Bank's geographic distribution of loans reflects good penetration throughout the assessment area.

Small Business Loans

Small business lending in low-income census tracts is good. The percentage of small business loans in these tracts was greater than the percentage of small businesses operating in low-income census tracts. Additionally, SunTrust Bank's performance was greater than aggregate lenders in 2014 and was comparable to the aggregate lenders in 2015.

Small business lending in moderate-income census tracts is excellent. SunTrust Bank originated 26.8 percent of its small business loans in moderate-income census tracts, where 20.9 percent of small businesses in the assessment area are located. Additionally, SunTrust Bank's performance was greater than aggregate lending in these tracts during the review period.

Home Purchase Loans

Home purchase lending in low-income census tracts is poor. The bank's home purchase lending in low-income census tracts was significantly less than the percentage of owner-occupied units in those tracts throughout the review period. SunTrust Bank originated 0.5 percent of its home purchase loans in low-income census tracts, where 1.8 percent of owner-occupied units are located. Moreover, SunTrust Bank underperformed compared to aggregate lenders during the review period.

Home purchase lending in moderate-income census tracts is adequate. SunTrust Bank's home purchase lending in moderate-income census tracts was less than the percentage of owner-occupied units in these tracts. However, the bank's performance was similar to aggregate lenders in 2014, but less than aggregate in 2015.

Home Refinance Loans

Home refinance lending in low-income census tracts is poor. The bank's home refinance lending in low-income census tracts was significantly less than the percentage of owner-occupied units in those tracts throughout the review period. SunTrust Bank originated 0.8 percent of its home refinance loans in these tracts, where 1.8 percent of owner-occupied units are located. Moreover, SunTrust Bank underperformed compared to aggregate lenders during the review period.

Home refinance lending in moderate-income census tracts is adequate. Lending performance in moderate-income census tracts was less than the percentage of owner-occupied units located in these tracts. However, this performance was greater than aggregate lenders in 2014 and comparable to aggregate lenders in 2015.

Home Improvement Loans

Home improvement lending in low-income census tracts is good. SunTrust Bank's home improvement lending in low-income census tracts was comparable to the percentage of owner-occupied units in these tracts. Additionally, the bank's performance was greater than aggregate lending performance throughout the review period.

Home improvement lending in moderate-income census tracts is excellent. SunTrust Bank's home improvement lending in these tracts was greater than the percentage of owner-occupied units. Additionally, the bank's performance exceeded aggregate lenders throughout the review period.

Lending to Borrowers of Different Incomes and Businesses of Different Sizes

The distribution of loans by borrower income and revenue size of businesses is good. For this analysis, the distribution of small business lending across business revenue sizes and HMDA lending across borrower income levels was compared to available demographic information. Performance context issues were also considered as well as the performance of other banks.

Small Business Loans

The distribution of small business loans to businesses of different sizes is good. While the percentage of small business loans to businesses with revenues of \$1 million or less was less than the percentage of small businesses in the assessment area, SunTrust Bank's performance was greater than aggregate lending performance. Additionally, 95.8 percent of small business loans were originated in amounts of \$250,000 or less, indicating a willingness to lend in the smaller amounts that are typically requested by small businesses.

Home Purchase Loans

Home purchase lending to low-income borrowers is adequate. SunTrust Bank's home purchase lending to low-income borrowers was significantly less than the percentage of low-income families located in the assessment area. However, the bank's home purchase lending was greater than aggregate lending performance throughout the review period.

Home purchase lending to moderate-income borrowers is also adequate. SunTrust Bank's home purchase lending to moderate-income borrowers was less than the percentage of moderate-income families in the assessment area. However, the bank's performance was comparable to aggregate lenders throughout the review period.

Home Refinance Loans

Home refinance lending to low-income borrowers is adequate. The bank's home refinance lending to low-income borrowers was significantly less than the percentage of low-income families in the assessment area; however, the bank's home refinance lending to low-income borrowers exceeded aggregate lending throughout the review period.

Home refinance lending to moderate-income borrowers is good. The bank's percentage of home refinance loans to moderate-income borrowers was less than the percentage of moderate-income families in the assessment area; however, the bank's home refinance lending to moderate-income borrowers exceeded aggregate lending throughout the review period.

Home Improvement Loans

Home improvement lending to low-income borrowers is good. The bank's home improvement lending to low-income borrowers was less than the percentage of low-income families in the assessment area; however, the bank's performance exceeded aggregate lending performance throughout the review period.

Home improvement lending to moderate-income borrowers is also good. The bank's home improvement lending to moderate-income borrowers was greater than the percentage of moderate-income families in the assessment area. Additionally, the bank's performance was also greater than aggregate lending performance throughout the review period.

Community Development Lending

SunTrust Bank makes a relatively high level of community development loans in the Tampa assessment area. The bank originated 38 community development loans totaling \$90.3 million during the review period. Loans were responsive to many community development needs in the assessment area, including the provision of affordable housing, community services targeted to LMI individuals, promoting economic development by financing small businesses, and revitalizing and stabilizing LMI geographies. The bank provided \$63 million in loans to support community services to LMI individuals; \$12 million towards economic development activities; \$11 million in support of affordable housing; and \$4 million in loans to revitalize and stabilize LMI geographies. SunTrust Bank's community development lending exhibits good responsiveness to the community development and credit needs of the assessment area.

Examples of community development lending include but are not limited to:

- Two loans totaling approximately \$662,000 to a CDFI, whose primary mission is to provide financing to developers of affordable housing and community revitalization within the state. These loans funded a 196-unit LIHTC senior apartment complex within the assessment area.
- Two loans for \$200,000 to help finance an Urban League that provides programs that serve at-risk youth, families, single parents, the economically disadvantaged, the elderly, and the disabled. Examples of the services the organization provides include career connections to help individuals gain employment, youth crime prevention and intervention services, low-income home energy and weatherization assistance, and free tax assistance program.
- A loan for \$5 million to a NMTC qualified Community Development Entity (CDE) to make Qualified Low Income Community Investments. The CDE used the funds to invest in a start-up business located adjacent to a moderate-income geography.

• A loan for \$10 million to support a nonprofit charity whose mission is to serve LMI persons. Services include disaster relief, mobile medical services, child placement services, services for the elderly, services to individuals with AIDS, adoption services, a disabilities program, and programs for providing low-cost housing.

INVESTMENT TEST

SunTrust Bank makes a significant level of qualified investments and grants in the Tampa assessment area given the bank's presence and area competition. Investments demonstrated responsiveness to several local community development needs.

The bank made investments (excluding contributions) totaling \$69.3 million in the assessment area; of that, \$58.4 million was invested during the review period, and all current investments supported affordable housing for LMI individuals. The investment portfolio includes a number of investment vehicles, including, but not limited to, Low Income Housing Tax Credits, LIHTC investment funds, NMTC funds, securities backed by government-guaranteed mortgages on multifamily properties, and bonds that finance HUD and SBA programs.

SunTrust Bank also contributed \$814,000 to nonprofit organizations and community development projects during the review period. Specifically, the bank provided grants totaling \$751,000 to nonprofits that offer community services to LMI individuals, including \$261,000 to United Way to support programs and organizations that serve primarily LMI individuals. The bank's donations assisted organizations that provide financial counseling, youth services, workforce development, educational support services in LMI schools, college financial assistance to LMI students, and a range of other needed community services. Remaining donations included \$30,000 for economic development, \$17,000 for affordable housing, and \$16,000 for revitalization and stabilization.

As noted earlier, the bank also had investments and contributions that served the entire state of Florida and a broader regional area that includes the bank's assessment area.

The bank's investments and contributions addressed several community development needs in the assessment area, including affordable housing (rental and homeownership) and improving the financial stability of LMI individuals through a range of community services. Several noteworthy investments are highlighted below:

• An investment in an NMTC fund that is providing financing for Habitat for Humanity Affiliates in selected markets (including Tampa) to develop and sell homes to LMI borrowers. This investment fund is an innovative approach utilizing the NMTC program to creating more liquidity for Habitat for Humanity affiliates, allowing them to expand the reach of their programs and to provide more housing opportunities to low-income homeowners.

- Donations totaling \$50,000 to a local community college foundation to support a scholarship program that aims to improve the numbers of African American and Latino males who graduate high school and attend college.
- A grant totaling \$15,000 to a nonprofit organization that is leading the revitalization of an abandoned mill town in northeast Pasco County, which is one of the poorest communities in the state.

SERVICE TEST

SunTrust Bank's service test performance in the Tampa assessment area is adequate based on the accessibility of the bank's retail services and the adequate level of community development services.

Retail Services

Delivery systems are reasonably accessible to the bank's geographies and individuals of different income levels in the Tampa assessment area. The distribution of 93 branch offices and 116 ATMs as of December 31, 2015, was compared to the distribution of households and businesses among the tract categories within the assessment area. The bank has three branches in low-income census tracts representing 3.2 percent of total branches in the assessment area, and 28 branches in moderate-income census tracts representing 30.1 percent of total branches in the assessment area. For comparison purposes, 3.3 percent of households and 2.7 percent of businesses were located in low-income census tracts, and 25.5 percent of households and 21.2 percent of businesses were located in moderate-income tracts.

During the review period, no branches were opened in the assessment area; however, two branches in moderate-income census tracts and three branches in middle- and upper-income census tracts were closed. The bank's record of opening and closing of branches has generally not adversely affected the accessibility of its delivery systems, particularly to LMI geographies and LMI individuals in the assessment area.

SunTrust Bank offers extended hours in almost all of its branches in LMI tracts. Weekend hours are offered at higher rates at branches in LMI tracts than at branches in middle- and upper-income census tracts. Banking hours of operation do not vary in a way that inconveniences LMI geographies and individuals in the assessment area.

Community Development Services

SunTrust Bank provides an adequate level of community development services in the Tampa assessment area. During the review period, SunTrust bank employees provided 1,949 service hours in various capacities for community development organizations. Bank employees provided over 310 affordable housing service hours, 47 economic development service hours, and 1,592 community service hours. Notably, approximately 27.2 percent of service hours were board service at community development organizations or committee memberships. The bank's performance is considered adequate given SunTrust Bank's size and presence in the assessment area and the opportunities that exist for community development service.

Metropolitan Areas (Limited Review)

The following metropolitan assessment areas were reviewed using limited-scope examination procedures.

DESCRIPTION OF INSTITUTION'S OPERATIONS IN THE FLORIDA METROPOLITAN ASSESSMENT AREAS

• Fort Myers Assessment Area (Lee County)

- o As of December 31, 2015, SunTrust Bank operated 22 branches in the assessment area, representing 4.5 percent of its branches in **Florida**.
- O As of June 30, 2015, the bank had \$2.0 billion in deposits in this assessment area, representing a market share of 14.2 percent and 4.3 percent of SunTrust Bank's total deposits in **Florida**.

• Fort Walton Assessment Area (Okaloosa and Walton counties)

- As of December 31, 2015, SunTrust Bank operated four branches in the assessment area, representing 0.8 percent of its branches in <u>Florida</u>.
- o As of June 30, 2015, the bank had \$175.4 million in deposits in this assessment area, representing a market share of 3.8 percent and 0.4 percent of SunTrust Bank's total deposits in **Florida**.

• Gainesville Assessment Area (Alachua County)

- o As of December 31, 2015, SunTrust Bank operated five branches in the assessment area, representing 1.0 percent of its branches in **Florida**.
- o As of June 30, 2015, the bank had \$290.5 million in deposits in this assessment area, representing a market share of 7.7 percent and 0.6 percent of SunTrust Bank's total deposits in **Florida**.

• Homosassa Springs Assessment Area (Citrus County)

- As of December 31, 2015, SunTrust Bank operated seven branches in the assessment area, representing 1.4 percent of its branches in <u>Florida</u>.
- o As of June 30, 2015, the bank had \$523.6 million in deposits in this assessment area, representing a market share of 24.8 percent and 1.1 percent of SunTrust Bank's total deposits in **Florida**.

• Jacksonville Assessment Area (Clay, Duval, Nassau, and St. John's counties)

- As of December 31, 2015, SunTrust Bank operated 27 branches in the assessment area, representing 5.5 percent of its branches in <u>Florida</u>.
- O As of June 30, 2015, the bank had \$2.2 billion in deposits in this assessment area, representing a market share of 3.9 percent and 4.7 percent of SunTrust Bank's total deposits in **Florida**.

• Lakeland Assessment Area (Polk County)

- o As of December 31, 2015, SunTrust Bank operated 19 branches in the assessment area, representing 3.9 percent of its branches in **Florida**.
- o As of June 30, 2015, the bank had \$846.3 million in deposits in this assessment area, representing a market share of 14.8 percent and 1.8 percent of SunTrust Bank's total deposits in **Florida**.

Metropolitan Areas (Limited Review)

• Melbourne Assessment Area Brevard County)

- o As of December 31, 2015, SunTrust Bank operated 19 branches in the assessment area, representing 3.9 percent of its branches in **Florida**.
- O As of June 30, 2015, the bank had \$1.1 billion in deposits in this assessment area, representing a market share of 13.8 percent and 2.3 percent of SunTrust Bank's total deposits in **Florida**.

• Naples Assessment Area (Collier County)

- o As of December 31, 2015, SunTrust Bank operated nine branches in the assessment area, representing 1.8 percent of its branches in **Florida**.
- o As of June 30, 2015, the bank had \$411.3 million in deposits in this assessment area, representing a market share of 2.9 percent and 0.9 percent of SunTrust Bank's total deposits in **Florida**.

• Ocala Assessment Area (Marion County)

- o As of December 31, 2015, SunTrust Bank operated 12 branches in the assessment area, representing 2.4 percent of its branches in **Florida**.
- O As of June 30, 2015, the bank had \$1.0 billion in deposits in this assessment area, representing a market share of 19.1 percent and 2.2 percent of SunTrust Bank's total deposits in **Florida**.

• Orlando Assessment Area (Lake, Orange, Osceola, and Seminole counties)

- o As of December 31, 2015, SunTrust Bank operated 63 branches in the assessment area, representing 12.8 percent of its branches in **Florida**.
- O As of June 30, 2015, the bank had \$9.7 billion in deposits in this assessment area, representing a market share of 22.8 percent and 21.0 percent of SunTrust Bank's total deposits in **Florida**.

• Panama City Assessment Area (Bay County)

- As of December 31, 2015, SunTrust Bank operated five branches in the assessment area, representing 1.0 percent of its branches in <u>Florida</u>.
- o As of June 30, 2015, the bank had \$172.7 million in deposits in this assessment area, representing a market share of 7.1 percent and 0.4 percent of SunTrust Bank's total deposits in **Florida**.

Pensacola Assessment Area (Escambia and Santa Rosa counties)

- o As of December 31, 2015, SunTrust Bank operated six branches in the assessment area, representing 1.2 percent of its branches in **Florida**.
- As of June 30, 2015, the bank had \$241.1 million in deposits in this assessment area, representing a market share of 4.7 percent and 0.5 percent of SunTrust Bank's total deposits in Florida.

• Port St. Lucie Assessment Area (Martin and St. Lucie counties)

- As of December 31, 2015, SunTrust Bank operated 10 branches in the assessment area, representing 2.0 percent of its branches in <u>Florida</u>.
- o As of June 30, 2015, the bank had \$664.7 million in deposits in this assessment area, representing a market share of 8.7 percent and 1.4 percent of SunTrust Bank's total deposits in **Florida**.

Metropolitan Areas (Limited Review)

• Punta Gorda Assessment Area (Charlotte County)

- As of December 31, 2015, SunTrust Bank operated eight branches in the assessment area, representing 1.6 percent of its branches in <u>Florida</u>.
- o As of June 30, 2015, the bank had \$412.7 million in deposits in this assessment area, representing a market share of 12.5 percent and 0.9 percent of SunTrust Bank's total deposits in **Florida**.

• Sarasota Assessment Area (Manatee and Sarasota counties)

- o As of December 31, 2015, SunTrust Bank operated 31 branches in the assessment area, representing 6.3 percent of its branches in **Florida**.
- o As of June 30, 2015, the bank had \$2.1 billion in deposits in this assessment area, representing a market share of 11.6 percent and 4.5 percent of SunTrust Bank's total deposits in **Florida**.

• Sebring Assessment Area (Highlands County)

- As of December 31, 2015, SunTrust Bank operated four branches in the assessment area, representing 0.8 percent of its branches in <u>Florida</u>.
- As of June 30, 2015, the bank had \$200.8 million in deposits in this assessment area, representing a market share of 13.7 percent and 0.4 percent of SunTrust Bank's total deposits in Florida.

• Tallahassee Assessment Area (Gadsden and Leon counties)

- As of December 31, 2015, SunTrust Bank operated eight branches in the assessment area, representing 1.6 percent of its branches in <u>Florida</u>.
- o As of June 30, 2015, the bank had \$874.9 million in deposits in this assessment area, representing a market share of 14.4 percent and 1.9 percent of SunTrust Bank's total deposits in **Florida**.

• Vero Beach Assessment Area (Indian River County)

- As of December 31, 2015, SunTrust Bank operated five branches in the assessment area, representing 1.0 percent of its branches in <u>Florida</u>.
- As of June 30, 2015, the bank had \$275.2 million in deposits in this assessment area, representing a market share of 7.0 percent and 0.6 percent of SunTrust Bank's total deposits in Florida.

• The Villages Assessment Area (Sumter County)

- As of December 31, 2015, SunTrust Bank operated three branches in the assessment area, representing 0.6 percent of its branches in <u>Florida</u>.
- o As of June 30, 2015, the bank had \$223.6 million in deposits in this assessment area, representing a market share of 10.4 percent and 0.5 percent of SunTrust Bank's total deposits in **Florida**.

Metropolitan Areas (Limited Review)

CONCLUSIONS WITH RESPECT TO PERFORMANCE TESTS

Through the use of available facts and data, including performance and demographic information, each assessment area's performance was evaluated and compared with the bank's performance in the state. The conclusions regarding performance are provided in the table below. Please refer to the tables in Appendix H for information regarding these areas.

	Metropolitan A	Assessment Areas				
Assessment Areas	Lending Test	Investment Test	Service Test			
Fort Myers	Not Consistent (Below)	Not Consistent (Below)	Not Consistent (Below)			
Fort Walton	Not Consistent (Below)	Consistent	Not Consistent (Below)

Jacksonville	<u>Consistent</u>	Not Consistent (Below)	Not Consistent (Above)			
Lakeland	Not Consistent (Below)	Not Consistent (Below)	Not Consistent (Below)			
Melbourne	<u>Consistent</u>	Not Consistent (Above)	Not Consistent (Below)			
Naples	<u>Consistent</u>	Not Consistent (Below)	Consistent			
Ocala	Consistent	Not Consistent (Below)	Not Consistent (Below)			
Orlando	Consistent	Not Consistent (Below)	Consistent			
Panama City	Consistent	Not Consistent (Below)	Not Consistent (Below)			
Pensacola	Not Consistent (Below)	Not Consistent (Above)	<u>Consistent</u>			
Port St. Lucie	Not Consistent (Below)	Consistent	<u>Consistent</u>			
Punta Gorda	<u>Consistent</u>	Not Consistent (Below)	Not Consistent (Above)			
Sarasota	Not Consistent (Below)	Consistent	<u>Consistent</u>			
Sebring	Not Consistent (Below)	Not Consistent (Below)	Not Consistent (Below)			
Tallahassee	Not Consistent (Below)	Consistent	Not Consistent (Above)			
Vero Beach	Not Consistent (Below)	Not Consistent (Below)	Not Consistent (Below)			
The Villages	Not Consistent (Below)	Not Consistent (Below)	Not Consistent (Below)			

For the lending test, SunTrust Bank received a High Satisfactory rating for the State of Florida. Performance in 9 of the 19 metropolitan limited-scope assessment areas was consistent with SunTrust Bank's performance. Although performance in 10 of the metropolitan limited-scope assessment areas was weaker than the statewide lending test performance, all 10 assessment areas were still considered adequate. The weaker performance in the limited-scope assessment areas was primarily because the bank made few, if any, community development loans in these areas. There were no community development loans made in Pensacola, Sebring, The Villages, and Vero Beach limited-scope assessment areas.

For the investment test, SunTrust Bank received a High Satisfactory rating for the State of Florida. Investment activity in the Fort Walton, Port St. Lucie, Sarasota, and Tallahassee assessment areas was consistent with the statewide performance. However, performance in the Melbourne and Pensacola assessment area exceeded the statewide performance; strong performance in these two assessment areas was driven by significant NMTC investments during the review period. Performance in the remaining 13 limited-scope assessment areas was

Metropolitan Areas (Limited Review)

weaker than the bank's performance for the state due to lower levels of investment activity relative to the bank's operational presence in the assessment areas. However, performance in the Fort Myers, Orlando, and Vero Beach limited-scope assessment areas was still considered adequate.

For the overall service test, SunTrust Bank received a rating of Low Satisfactory for the state of Florida. Service test performance in the Jacksonville, Punta Gorda, and Tallahassee assessment areas exceeded the bank's performance for the state due to stronger community development service performance in those markets, while performance was consistent in the Naples, Orlando, Pensacola, Port St. Lucie and Sarasota assessments areas. Performance in the Fort Meyers, Fort Walton, Gainesville, Homosassa Springs, Lakeland, Melbourne, Ocala, Panama City, Sebring, Vero Beach and The Villages was weaker than statewide performance, primarily due to limited community development services. Retail banking services were weaker than the state in Panama City and Vero Beach, while they were stronger in Pensacola and Port St. Lucie. Retail banking services in the remaining limited-scope assessment areas were consistent with the state.

The performance in the metropolitan limited-scope assessment areas did not affect the overall state rating.

Nonmetropolitan Areas (Limited Review)

The following nonmetropolitan assessment areas were reviewed using limited-scope examination procedures.

DESCRIPTION OF INSTITUTION'S OPERATIONS IN THE <u>FLORIDA</u> NONMETROPOLITAN ASSESSMENT AREAS

Jackson Assessment Area (Jackson County)

- o As of December 31, 2015, SunTrust Bank operated three branches in the assessment area, representing 0.6 percent of its branches in **Florida**.
- O As of June 30, 2015, the bank had \$96.0 million in deposits in this assessment area, representing a market share of 19.1 percent and 0.2 percent of SunTrust Bank's total deposits in **Florida**.

• Middle Florida Assessment Area (Desoto and Okeechobee counties)

- o As of December 31, 2015, SunTrust Bank operated two branches in the assessment area, representing 0.4 percent of its branches in **Florida**.
- o As of June 30, 2015, the bank had \$152.6 million in deposits in this assessment area, representing a market share of 19.3 percent and 0.3 percent of SunTrust Bank's total deposits in **Florida**.

CONCLUSIONS WITH RESPECT TO PERFORMANCE TESTS

Through the use of available facts and data, including performance and demographic information, each assessment area's performance was evaluated and compared with the bank's performance in the state. The conclusions regarding performance are provided in the table below. Please refer to the tables in Appendix H for information regarding these areas.

Nonmetropolitan Assessment Areas											
Assessment Areas	Lending Test	Investment Test	Service Test								
Jackson	Consistent	Not Consistent (Below)	<u>Consistent</u>								
Middle Florida	Not Consistent (Below)	Not Consistent (Below)	Not Consistent (Below)								

For the lending test, the bank's performance in Jackson was consistent with the bank's statewide performance; however, community development lending was stronger than the bank's performance in the state. Although performance in the Middle Florida assessment area was considered weaker than the state, the performance was still considered adequate. Weaker performance was attributable to the absence of community development lending in the Middle Florida assessment area.

For the investment test, performance in both limited-scope nonmetropolitan assessment areas was weaker than the bank's performance in the state due to minimal levels of qualified investments relative to the bank's operations in the assessment area.

Nonmetropolitan Areas (Limited Review)

For the service test, performance in the Jackson nonmetropolitan limited-scope assessment area was consistent with the statewide performance, while performance in the Middle Florida assessment area was below the statewide performance due to limited qualified community development service hours. Retail banking services in both assessment areas were consistent with the state's performance.

The performance in the nonmetropolitan limited-scope assessment areas did not affect the overall state rating.

CRA RATING FOR GEORGIA: <u>SATISFACTORY</u>

The Lending Test is rated: High Satisfactory
The Investment Test is rated: Outstanding

The Service Test is rated: High Satisfactory

Major factors supporting the rating include the following:

- The geographic distribution of loans reflects adequate penetration throughout the assessment areas, and the distribution of loans by borrower income also reflects adequate penetration among customers of different income levels and businesses of different revenue sizes.
- The bank is a leader in making community development loans in its Georgia assessment areas.
- The bank made an excellent level of qualified community development investments and grants that are responsive to several identified community development needs of the Georgia assessment areas.
- Retail services are reasonably accessible to the bank's geographies and individuals of different income levels in the assessment areas.
- The bank provides a relatively high level of community development services throughout the assessment areas.

SCOPE OF EXAMINATION

A full-scope review was conducted for the following assessment areas in the State of Georgia:

Atlanta

Macon

Limited-scope reviews were conducted for the remaining 19 assessment areas:

- Albany
- Appling Wayne (non-MSA)
- Athens
- Augusta
- Brunswick
- Cedartown (non-MSA)
- Central Georgia (non-MSA)
- Coffee Ware (non-MSA)
- Columbus
- Dalton

- Fannin Lumpkin (non-MSA)
- Gainesville
- LaGrange (non-MSA)
- Rome
- Savannah
- South Georgia (non-MSA)
- Statesboro (non-MSA)
- Valdosta
- Warner Robbins

The time period, products, and affiliates evaluated for these assessment areas are consistent with the scope discussed in the institution section of this report.

DESCRIPTION OF INSTITUTION'S OPERATIONS IN GEORGIA

As of June 30, 2015, SunTrust Bank had \$45.1 billion in deposits in Georgia accounting for 31.7 percent of SunTrust's total deposits. SunTrust Bank operated 244 branch offices in Georgia as of December 31, 2015, representing 17.0 percent of the bank's total branches. HMDA-reportable lending in Georgia accounted for 16.9 percent of total institutional HMDA-reportable lending by number of loans, and CRA small business lending in Georgia accounted for 16.6 percent of the bank's total CRA small business lending. Overall, HMDA-reportable and CRA small business lending in Georgia accounted for 17.1 percent of the bank's total lending activity by dollar volume, which was substantially less than the percentage of total deposits at 31.7 percent.

The following table shows lending activity from January 1, 2014, through December 31, 2015.

Originations and Purchases

CONCLUSIONS WITH RESPECT TO PERFORMANCE TESTS IN GEORGIA

LENDING TEST

The lending test rating in the State of Georgia is high satisfactory. Overall, performance in Georgia with regard to the geographic distribution of loans reflects adequate penetration throughout the assessment areas. The distribution of loans by borrower income also reflects adequate penetration among customers of different income levels and businesses of different sizes. Additionally, SunTrust Bank is a leader in making community development loans in Georgia.

During the review period, SunTrust Bank reported 18,545 HMDA-reportable loans and 12,411 small business loans in Georgia. As such, HMDA-reportable lending was given greater weight than small business lending when determining the lending test rating for Georgia. The rating for Georgia is based on the full-scope review of the Atlanta and Macon assessment areas, which represent 74.2 percent of the bank's statewide HMDA-reportable and small business lending. However, approximately 71.9 percent of the bank's HMDA-reportable and small business lending (by number of loans) in Georgia occurred within the Atlanta assessment area, thus making this the largest concentration of lending activity in the state. Additionally, 86.3 percent of the bank's total deposits in Georgia are in this assessment area.

Details of the bank's HMDA-reportable, small business, and peer lending data can be found in Appendix G.

Geographic and Borrower Distribution

The geographic distribution of SunTrust's HMDA-reportable and small business loans is adequate, and the distribution of loans by borrower income and revenue size of businesses is also adequate. As noted above, the rating for the state of Georgia is derived from the Atlanta and Macon assessment areas. A detailed discussion of the borrower and geographic distribution of lending for the assessment areas is included in the next sections of this report.

Community Development Lending

SunTrust Bank is a leader in making community development loans in the state of Georgia. The bank originated 108 community development loans totaling \$1 billion in Georgia during the review period, including 71 loans for \$739 million in the two full-scope assessment areas, Atlanta and Macon. Performance in Atlanta was outstanding, while performance in Macon was adequate. Overall, this level of statewide community development lending is considered excellent based on the bank's size and presence in its Georgia assessment areas and the availability of community development lending opportunities. More information on community development loans can be found in the full-scope assessment area sections of this report.

INVESTMENT TEST

The investment test rating for Georgia is outstanding.

The bank made an excellent level of qualified investments and contributions totaling \$537.6 million that directly benefited the Georgia assessment areas. The bank's investment portfolio for the state included direct LIHTC and NMTC project investments, LIHTC investment funds, SBICs, mortgage-backed securities and other bonds, and contributions. The bank also had \$53.5 million in investments that benefited the broader statewide area, including all of the bank's assessment areas. Most of the statewide investments remain on the books from prior review periods and are largely SBA and HUD bonds and MBS. Statewide investments include contributions of \$410,000 to organizations that provide community services, and primarily financial education, for LMI communities across the entire state. Notably, the bank provided \$185,000 over the review period to support an annual day of giving to nonprofits statewide. Lastly, the state benefitted from regional investments of approximately \$27.6 million that are described in the institution overview.

Atlanta and Macon were the two full-scope assessment areas reviewed; nearly 80.0 percent of total statewide investments benefited the Atlanta assessment area compared to 86.3 percent of deposits in this market, while investments and deposits in the Macon assessment area were similar at approximately 1.0 percent of the statewide total. Performance in Atlanta was excellent while Macon was considered adequate. The bank's performance in limited-scope assessment areas varied; investment activity was considered excellent in the Athens, Augusta and Valdosta assessment areas and good in Savannah. However, investment activity was poor or very poor in 15 of the 19 limited-scope assessment areas. The bank has a small branch presence in most of the adversely rated limited-scope assessment areas, and community development investment opportunities are limited; therefore performance in these assessment areas did not negatively impact the overall state performance.

Additional details regarding specific investments and contributions can be found in the full-scope assessment area sections, and a summary of the bank's investments and contributions for all assessment areas can be found in Appendix F.

SERVICE TEST

The service test rating for Georgia is high satisfactory.

Retail Services

Delivery systems, including ATMs and branch office locations, are reasonably accessible to the bank's geographies and individuals of different income levels in the assessment areas. Overall, banking services and hours of operation do not vary in a way that inconveniences the assessment areas, including LMI geographies or to LMI individuals. Statewide, the bank's record of opening and closing of branches has generally not adversely affected the accessibility of its delivery systems for LMI geographies and/or LMI individuals. Additional detail on the bank's retail services can be found in the full-scope assessment area sections.

Community Development Services

SunTrust Bank provided a relatively high level of community development services that benefit LMI residents and small businesses in the state of Georgia. The bank provided a total of 23,748 qualified service hours during the examination period, including 21,328 total hours in the Atlanta and Macon full-scope assessment areas. Performance in Atlanta, the largest full-scope assessment area in the state, was good, while performance in Macon was adequate. Additionally, employees provided 100 service hours to organizations that serve the entire state and benefit all of the bank's assessment areas. Specifically, the bank provided leadership with statewide entities including an economic development council providing financial education for public schools. This performance is considered good given SunTrust Bank's size and presence in the state of Georgia and the opportunities that exist for community development service.

Additional detail on the bank's retail and community development services can be found in the full-scope assessment area sections of this report.

METROPOLITAN AREA

(Full Scope Review)

DESCRIPTION OF INSTITUTION'S OPERATIONS IN THE ATLANTA, GEORGIA ASSESSMENT AREA

Overview

SunTrust Bank's Atlanta assessment area consists of 19 counties that are part of the 29-county Atlanta-Sandy Springs-Roswell, Georgia MSA, including Barrow, Bartow, Carroll, Cherokee, Clayton, Cobb, Coweta, Dawson, DeKalb, Douglas, Fayette, Forsyth, Fulton, Gwinnett, Henry, Morgan, Paulding, Rockdale, and Walton. As of December 2015, SunTrust had 164 branches in the Atlanta assessment area, which represent 67.2 percent of the branches statewide and 86.3 percent of its deposits in Georgia. Additionally, the market represents the largest concentration of combined HMDA-reportable and CRA small business lending in the state at 80.2 percent.

The assessment area's banking market is competitive with a significant presence of national and multi-regional banks. According to the June 30, 2015 FDIC Summary of Deposits Report, there are 88 financial institutions operating 1,223 branch locations in the assessment area. SunTrust Bank holds the largest deposit market share with approximately \$39.0 billion, or 27.4 percent of total deposits, followed by Bank of America (19.7 percent), Wells Fargo Bank (19.3 percent), and BB&T (5.5 percent).

HMDA-reportable lending and CRA lending are similarly competitive. SunTrust Bank and SunTrust Mortgage combined had an average of 4.4 percent of total HMDA-reportable lending in both 2014 and 2015. STB ranked 23rd while STM ranked 5th out of the 747 HMDA lenders in the market in 2014. Both STB and STM increased slightly in rank in 2015. Wells Fargo Bank was the dominant HMDA reporter in both 2014 and 2015, followed by Quicken Loans and JPMorgan Chase.

SunTrust's CRA lending volume doubled between 2014 and 2015 in the assessment area. In 2014, SunTrust ranked 10th out of 183 lenders with 2.6 percent of CRA loans. In 2015, SunTrust ranked 7th out of 183 lenders with 4.8 percent of all CRA loans. American Express is the dominant CRA reporter in the market, followed by Wells Fargo Bank, Bank of America, and Capital One.

Population and Income Characteristics

The Atlanta MSA is now the 9th largest region in the U.S with a population of 5.7 million as of 2015.¹⁵¹ Fulton County, home to the City of Atlanta, was the most populous county in the assessment area with over 983,900 people.¹⁵² The other large population centers are in Gwinnett, Cobb, and DeKalb counties. While Fulton is the largest county in the assessment area, Cherokee, Forsyth, Henry, and Paulding counties have experienced the most growth over the past several years.

151 Select Georgia. Georgia Power. Web. 13 Mar. 2017. http://selectgeorgia.com/publications/atlanta-overview.pdf.

¹⁵² "Atlanta, GA MSA (U.S. Census Bureau)." *GIS Mapping and Geographic Information System Data*. The Reinvestment Fund, n.d. Web. 13 Mar. 2017. http://www.policymap.com/>.

The assessment area contains 895 census tracts; 2010 census data indicates that there were 89 (9.9 percent) low-income census tracts, 206 (23.0 percent) moderate-income tracts, 308 (34.0 percent) middle-income tracts, 287 (32.1 percent) upper-income tracts, and 5 (0.6 percent) unknown-income tracts.

For purposes of classifying borrower income, this evaluation uses the FFIEC's estimated median family income for each relevant area. The following table sets forth the estimated median family income for the Atlanta MSA and shows that the median family income increased slightly between 2014 and 2015.

Borrower Income Levels Atlanta-Sandy Springs-Roswell, GA MSA

FFIE	Low			M	rate	l	lle	Upper					
Median Family Income		0	-	49.99%	50%	-	79.99%	80%	-	119.99%	120%	-	& above
2014	\$70,100	0	-	\$35,049	\$35,050	-	\$56,079	\$56,080	-	\$84,119	\$84,120	-	& above
2015	\$70,700	0	-	\$35,349	\$35,350	-	\$56,559	\$56,560	-	\$84,839	\$84,840	-	& above

There is considerable variation in the median family income in the counties throughout the assessment area. Clayton County had the lowest median family income between 2011 and 2015 at \$45,700, while Forsyth County had the highest at \$101,200.

Poverty and financial instability are major concerns throughout the assessment area. The percentage of families living below the poverty level continues to increase each year. For metro Atlanta, the percentage of families in poverty was 15.6 percent between 2011 and 2015, while the poverty rate was 18.4 percent statewide. However, there were several counties with rates above the state level. Within the assessment area, the rates were highest in Clayton County (25.1 percent), followed by Carroll County (20.7 percent). Moreover, the Corporation for Enterprise Development's (CFED) Asset & Opportunity Scorecard, which measures asset poverty, found that 40.2 percent of metro Atlanta households are liquid asset poor, meaning that they lack the savings to cover basic expenses or live at the poverty level for three months if a crisis led to a loss of stable income. In addition, 38.1 percent of families within the assessment area are considered LMI as compared to the state level of 39.4 percent, and almost 20.0 percent of the families living in LMI tracts have incomes below the poverty level.

Economic Conditions

Metro Atlanta has experienced significant job growth since the recession and is now the 9th largest employment center in the country. The metropolitan area added an average of 61,850 jobs per year from the end of 2010

¹⁵³ "Atlanta, GA MSA (U.S. Census Bureau)." *GIS Mapping and Geographic Information System Data*. The Reinvestment Fund, n.d. Web. 13 Mar. 2017. http://www.policymap.com/>.

¹⁵⁴ Corporation for Enterprise Development (CFED). Asset and Opportunity Scorecard, n.d. Web. 17 May. 2017. http://assetsandopportunity.org/.

through 2015, representing a 2.6 percent average annual increase.¹⁵⁵ Every industry sector added jobs except for the information sector, and the greatest growth occurred in the wholesale and retail trade, and professional and business services sectors.¹⁵⁶ Excluding government, the region's largest industry sectors are professional and business services, wholesale and retail trade, and education and health services. Delta Airlines, Emory Healthcare, Home Depot, AT&T, Wellstar Health System, UPS, Northside Hospital, and Piedmont Healthcare are among the top employers in the region.¹⁵⁷ Fulton, Gwinnett, DeKalb, and Cobb counties are the largest employment centers.¹⁵⁸

According to 2015 Dun & Bradstreet information, there were 314,523 businesses within the Atlanta assessment area, 93.5 percent of which had total annual revenues less than or equal to \$1 million and were therefore considered to be small businesses. Between 2012 and 2014, small business lending increased by 12.7 percent, with 103,400 loans made in 2014. During this same period, loans made to firms with revenues under \$1.0 million steadily increased, representing a 52.8 percent share of total small business loans; this may also indicate that there are fewer obstacles for smaller firms to access credit in the market. This data also agrees with a Dun & Bradstreet and Pepperdine University study that shows that the small business sector ended 2015 with access to capital at its highest level since 2012 and a heightened level of optimism about small businesses' health and growth. 160

As shown in the following chart, the economy has improved across the assessment area, with the unemployment rate falling for all counties between 2014 and 2015. In the Atlanta MSA, the unemployment rate was 5.6 percent for 2015, compared to a high of 10.2 percent in 2010. The highest unemployment rates were in Clayton County (7.5 percent) and Carroll County (6.6 percent), while Forsyth and Cherokee had the lowest unemployment rates (4.4 percent and 4.6 percent, respectively) in 2015. Statewide, the unemployment rate was 5.9 percent.

¹⁶⁰ "Access to Funding Up but Demand Is Down for the Small Business Sector." Dun & Bradstreet, 17 Dec. 2015. Web. 13 Mar. 2017.http://investor.dnb.com/releasedetail.cfm?releaseid=947339.

Census data indicates there were approximately 2.0 million housing units in 2010, of which 59.5 percent were owner-occupied, 28.6 percent were rental units, and 12.0 percent were vacant. Cherokee, Fayette, Forsyth, and Paulding counties have the highest homeownership rates (at or above 75.0 percent in all counties) and Fulton County, the most urban county, had the lowest rate at 46.5 percent. Rental and vacant units are highly concentrated in LMI tracts, and the housing is much older in these areas compared to the assessment area overall. These factors suggest that lending may be more challenging in LMI areas than in other areas.

The Atlanta metro housing market is strong, with yearly increases in home sales and home values, and is now surpassing market highs experienced in the last decade. The shortage of housing inventory is placing upward pressure on new and existing home prices. During the 12 months ending March 2016, the average sales price for new homes was \$318,500, representing a 4.0 percent increase over the prior 12 month period, while the average sales price for existing homes was \$225,000, representing an increase of 7.0 percent since March 2015. The number of new and existing homes sold totaled 117,400 units, up 8.0 percent from home sales for the prior year. 164

The improving sales market has led to more new home construction. For the period ending April 2016, new home permits increased 16.0 percent to approximately 21,150 homes. Most of the recent home building activity has been occurring in Cherokee, Forsyth, and Henry counties, but most of the new home construction is at the upper end of the market, making it difficult for first-time homebuyers and LMI families to purchase in

¹⁶² Ibid

¹⁶³ US Housing Market Conditions. Office of Policy Development and Research (PD&R), n.d. Web. 12 Sept. 2016. https://www.huduser.gov/portal/periodicals/USHMC/reg//AtlantaGA-HMP-June16.pdf

these communities. 166 Over the past four years, the number of entry-level homes for sale – defined as those priced in the lower third of a local market – has fallen by 34.0 percent on a national level, according to a Reuter's analysis of data compiled by listings firm Trulia. 167 The percentage of homes affordable for a fourperson family earning 80.0 percent of the area median income in 2015 varies by county. Only 15.4 percent of all homes are affordable to those earning 80.0 percent of the area median income in Forsyth County, but increases drastically to 83.3 percent in Clayton County. Home ownership affordability increases in counties farther away from the employment centers. 168

The market is also experiencing lower delinquency levels. The percentage of home loans in the Atlanta metropolitan area that were seriously delinquent (90 or more days delinquent or in foreclosure) or had transitioned into Real Estate Owned status declined to 2.9 percent in March 2016, which is slightly below the 3.0 percent rate for both Georgia and the U.S. 169 Although the market is experiencing lower levels of delinquency, the high percentage of underwater homeowners is still of concern. Atlanta ranks 3rd in the nation in the percentage of homeowners owing more on their mortgages than their homes are worth. At the end of 2015, 17.6 percent of Atlanta homeowners were underwater, compared to a national average of 13.0 percent. ¹⁷⁰

The multifamily housing market is also thriving with increased construction, rising rents and declining vacancy rates. The estimated vacancy rate for all rental units (including renter-occupied, single-family homes, and apartments) was 6.2 percent as of May 1, 2016, down from 12.7 percent in 2010. The average monthly apartment rent was \$1,018 in the first quarter of 2016, representing an 8.1 percent increase from the first quarter of 2015 and a 32.0 percent increase from the first quarter of 2010. The vast majority of new rental housing in Atlanta is Class A luxury rentals, and the construction of new affordable rental housing is limited.

As rents continue to rise, it will be a challenge for LMI renters to find affordable housing options in counties closest to the urban core and job centers. Renters are currently struggling with high housing costs in several counties, with 56.0 percent of renters in Clayton, 54.0 percent in Rockdale, and nearly 52.0 percent in DeKalb and Gwinnett counties considered housing cost-burdened. Rental households are considered cost-burdened if their rental costs account for more than 30.0 percent of household income. In the Atlanta-Sandy Springs-Roswell MSA, a renter would need an hourly wage of \$18.25 to afford a two-bedroom rental.

Due to the increasing rent and the high housing cost burdens on working families, Atlanta's economic development authority passed a new affordable housing policy, the Workforce Housing Policy, which would increase the availability of affordable housing throughout the city by requiring real estate developers receiving

government subsidies to make units available to persons making lower incomes. In addition, the City of Atlanta passed an ordinance also effective July 1, 2016, that requires a set percentage of residential real estate units from any development receiving public funds to be leased to working households whose income falls below 80.0 percent of the area median income (AMI).

Demographic Characteristics by Census Tract

The following table based on 2015 FFIEC Census and 2015 Dun & Bradstreet data presents key demographic and business information used to help develop a performance context for the assessment area.

Credit and Community Development Needs

The community development environment in the Atlanta region is sophisticated, with strong engagement from nonprofits, government agencies, foundations and financial institutions. There are numerous opportunities for banks to partner with nonprofits, developers and CDFIs to engage in a wide range of community development activities, including affordable housing development, neighborhood revitalization, small business lending, financial education, or provision of technical assistance to the organizations or those they serve.

According to a community contact engaged in affordable housing and foreclosure advocacy, the biggest housing challenge in metro Atlanta is the large number of homeowners with negative home equity. As a result, the contact stated that the majority of housing activity in underwater communities is left to investors. Moreover, the contact mentioned that home sales in affordable neighborhoods are not increasing, and the availability of mortgage credit is deficient. While federal and state housing tax credit programs are available for affordable multi-housing development, there is also a need for the construction and rehabilitation of single-family homes, and there is no tax credit program in place to encourage a shift in focus to this type of activity. Bank capital does not seem to be available for these single-family projects, according to the contact. Other challenges in the region, such as homeowner and rental affordability, were discussed above.

Regarding neighborhood stabilization activities in metro Atlanta, there are opportunities for financial institutions to partner with local municipalities and developers focused on revitalizing distressed neighborhoods and communities. For instance, within the city limits of Atlanta there are currently 10 designated Tax Allocation Districts (TADs) that are used to incentivize a variety of developments, such as housing and commercial development in areas that have experienced years of disinvestment. Second, there are several designated "Opportunity Zones" to aid local governments with job creation and redevelopment efforts in several jurisdictions throughout Georgia. This designation is for any area that is within or adjacent to one or more contiguous census block groups with a poverty rate of 15.0 percent or greater, where the area is also included within a state enterprise zone, or where a redevelopment plan exists.

The prevalence of poverty and the need for social support services highlight the importance of community service organizations within the bank's communities. The ongoing demand for these services often results in needs for these organizations in terms of financial support and technical assistance as they attempt to serve significant LMI populations within the bank's assessment area. Ultimately, this has the potential to create community development service or investment opportunities for financial institutions. Other opportunities may include helping organizations provide homebuyer and financial education, asset building initiatives, and job training programs. In addition, financial institutions may have opportunities to work collaboratively with city and county officials to address affordable housing and community development issues and to provide leadership in this regard.

CONCLUSIONS WITH RESPECT TO PERFORMANCE TESTS IN THE ATLANTA, GEORGIA ASSESSMENT AREA

LENDING TEST

SunTrust Bank's lending performance in the Atlanta assessment area is good. The geographic distribution of loans reflects adequate penetration throughout the assessment area. Also, the distribution of borrowers reflects adequate penetration among borrowers of different income levels and businesses of different revenue sizes. In addition, the bank is a leader in making community development loans.

SunTrust Bank reported 13,555 (60.9 percent) HMDA-reportable loans and 8,703 (39.1 percent) CRA small business loans in the Atlanta assessment area during the review period. Therefore, HMDA-reportable lending received greater weight in determining the bank's lending test rating in the assessment area. The Atlanta assessment area accounted for 82.3 percent of SunTrust Bank's total HMDA-reportable lending in Georgia and 69.7 percent of its total statewide CRA small business lending by dollar volume during the review period. In comparison, 86.3 percent of SunTrust Bank's statewide deposits are in this assessment area.

For the lending test analysis, lending performance in low-, moderate-, middle-, and upper-income census tracts and to low-, moderate-, middle-, and upper-income borrowers was considered for each product; however, comments for activity in middle- and upper-income tracts and to middle- and upper-income borrowers are only included when they were material to the outcome of the analyses. Details of the bank's mortgage and small business lending and information regarding lending by peers can be found in Appendix G.

Geographic Distribution of Loans

For this analysis the geographic distribution of small business and HMDA-reportable lending, including both originations and purchases, was compared with available demographic information. Performance context information and aggregate lending data were also taken into consideration. For instance, unemployment rates, poverty rates, the level of owner-occupied units, and the volume of small businesses in LMI census tracts were issues considered when assessing the bank's lending performance. Considering all of these factors, SunTrust Bank's geographic distribution of loans reflects adequate penetration throughout the assessment area.

Home Purchase Loans

Home purchase lending in low-income census tracts is adequate. During the review period, the bank originated 2.0 percent of its loans in low-income census tracts. This level of lending was slightly less than the 2.8 percent of owner-occupied units in low-income tracts. Additionally, the bank's performance was comparable to that of the aggregate lenders in 2014 but greater than the aggregate lending performance in 2015.

Home purchase lending in moderate-income census tracts is also adequate. During the review period, 13.6 percent of the bank's loans were originated in moderate-income census tracts. This level of lending was less than the 16.8 percent of owner-occupied units in moderate-income census tracts. Additionally, the bank's performance was on par with aggregate lenders in 2014, but slightly greater in 2015.

Home Refinance Loans

Home refinance lending in low-income census tracts is adequate. SunTrust Bank originated 1.4 percent of its home refinance loans in these tracts during the review period. As a result, the bank's home refinance lending was less than the percentage of owner-occupied units in these tracts and on par with the aggregate in 2014 and 2015.

Home refinance lending in moderate-income census tracts is adequate. The percentage of home refinance loans originated in moderate-income census tracts was less than the percentage of owner-occupied units in these tracts; however, performance was on par with aggregate lending performance in 2014, but less than the aggregate lenders in 2015.

Home Improvement Loans

Home improvement lending in low-income census tracts is excellent. SunTrust Bank originated 4.4 percent of its home improvement loans in low-income census tracts. This performance was greater than the percentage of owner-occupied units and significantly exceeded aggregate lenders.

Home improvement lending in moderate-income census tracts is also excellent. The percentage of home improvement loans in moderate-income census tracts at 21.8 percent exceeded the percentage of owner-occupied units at 16.8 percent in these tracts. The bank's performance was also greater than aggregate lenders during the review period.

Small Business Loans

Small business lending in low-income census tracts is adequate. The percentage of small business loans in low-income census tracts was comparable to the percentage of small businesses located in low-income census tracts. The bank's performance was greater than aggregate lending performance in 2014, but slightly less than the aggregate lenders in 2015.

Small business lending in moderate-income census tracts is good. SunTrust Bank originated 21.0 percent of its small business loans in moderate-income census tracts, where 19.6 percent of small businesses in the assessment area are operating. SunTrust outperformed aggregate lending performance in 2014, but was on par with the aggregate lenders in 2015.

Lending to Borrowers of Different Incomes and Businesses of Different Sizes

The distribution of loans by borrower income or revenue size of businesses is adequate. For this analysis, the distribution of small business lending across business revenue sizes and HMDA-reportable lending across borrower income levels was compared to available demographic information. Performance context issues were also considered as well as the performance of other banks.

Home Purchase Loans

Home purchase lending to low-income borrowers is adequate. While the percentage of home purchase loans to low-income borrowers was less than the percentage of low-income families located in the assessment area, SunTrust Bank's lending performance was greater than aggregate lending performance during the review period.

Home purchase lending to moderate-income borrowers is good. The bank's percentage of home purchase loans was greater than the percentage of moderate-income families located in the assessment area. The bank's home purchase lending was also greater than the aggregate lending performance during the review period.

Home Refinance Loans

Home refinance lending to low-income borrowers is adequate. The bank's percentage of home refinance loans to low-income borrowers was less than the percentage of low-income families in the assessment area throughout the review period. However, SunTrust Bank's lending exceeded the aggregate lenders throughout the review period.

Home refinance lending to moderate-income borrowers is adequate. The bank's home refinance lending to moderate-income borrowers was less than the percentage of moderate-income families in the assessment area. However, lending to moderate-income borrowers was greater than the aggregate lenders for both years.

Home Improvement Loans

Home improvement lending to low-income borrowers is adequate. The bank's home improvement lending to low-income borrowers was less than the percentage of low-income families in the assessment area throughout the review period. The bank's lending performance was greater than aggregate lenders in 2014 but slightly less than aggregate in 2015.

Home improvement lending to moderate-income borrowers is good. The percentage of home improvement loans to moderate-income borrowers was greater than the percentage of moderate-income families in the assessment area throughout the review period. Additionally, the bank's performance was greater than the aggregate lending performance in 2014 and comparable to the aggregate lenders in 2015.

Small Business Loans

The distribution of small business loans to businesses of different sizes is adequate. While the percentage of small business loans to businesses with revenues of \$1 million or less was less than the percentage of small businesses in the assessment area during the review period, SunTrust Bank's performance was greater than the aggregate lending performance. Additionally, 92.3 percent of small business loans were originated in amounts of \$250,000 or less, indicating a willingness to lend in the smaller amounts that are typically requested by small businesses.

Community Development Lending

SunTrust Bank is a leader in making community development loans in the Atlanta assessment area. The bank originated 67 community development loans totaling \$732.4 million during the review period. Loans were responsive to several community development needs in the assessment area, including the provision of affordable housing, community services targeted to LMI individuals, promoting economic development by financing small business, and revitalizing and stabilizing LMI geographies. The bank provided \$432 million in loans to revitalize and stabilize LMI geographies; \$142 million supporting community services to LMI individuals; \$133 million in support of affordable housing; and \$25 million towards economic development activities. SunTrust Bank's community development lending exhibits excellent responsiveness to the community development and credit needs of the assessment area.

Examples of community development lending include but are not limited to:

- Two loans totaling \$46.5 million for a 260-unit low-income housing tax credit (LIHTC) apartment complex, in which 90.0 percent of the units are for residents with income levels at or below 50.0 percent of the area median income. The complex also provides support for a total living environment through services such as afterschool activities, continuing education, and recreation;
- a \$13 million loan financing a NMTC project, where over 2,750 new jobs are expected to be created on the site through workforce development partnerships with several non-profit groups;
- a \$60 million loan financing a project to revitalize an area approved for the Georgia Opportunity Zone, based on its proximity to high poverty and the project's proposal for creating 3,000 new jobs;
- a \$2.8 million loan to finance the development of a multi-use facility in a moderate-income geography that will employ approximately 140-150 at the onset, growing by another 20-30 employees over the next 3-5 years. The organization serves people from metro Atlanta and surrounding communities who have difficulty entering or returning to the workforce because of physical limitations, mental retardation, or chronic mental illness;
- a \$2.5 million loan that finances three group homes servicing foster care youth, one home that serves single mothers in the foster care system, and one home that supports formerly homeless teen mothers and their children; and
- a \$15 million loan to an organization to help revitalize one of the most highly disadvantaged areas in metropolitan Atlanta, which recently lost a major employer and approximately 1,000 jobs. Upon full implementation of the revitalization project, 15,000 new permanent jobs will be created along with substantial space dedicated for apartments and homes, and retail/office, which has already secured a major grocery store.

INVESTMENT TEST

SunTrust Bank makes an excellent level of qualified investment and grants in the Atlanta assessment and is responsive to a number of community development needs. The bank was a leader in several significant community development efforts throughout the assessment area.

The bank made investments (excluding contributions) totaling \$421.3 million in the assessment area; of that, \$327.8 million was invested during the review period. The bank's investment portfolio includes a multitude of investment vehicles, including, but not limited to, Low Income Housing Tax Credits (LIHTCs), NMTCs, Historic Tax Credits, Small Business Investment Companies, LIHTC investment funds, securities backed by government-guaranteed mortgages on multifamily properties, and bonds that finance HUD and SBA programs. During the review period, the bank invested nearly \$150.0 million to support affordable housing, including \$105.1 million in LIHTC projects or funds that invest in LIHTC projects. The bank's LIHTC investments provided financing for 1,700 units of affordable housing. The bank also provided \$71.8 million in investments for community services for LMI individuals, \$58.7 million towards economic development activities, and \$47.7 million in projects that revitalize and stabilize LMI geographies.

SunTrust Bank also contributed nearly \$4.8 million to nonprofit organizations and community development initiatives during the review period. Specifically, the bank provided grants totaling \$4.4 million to nonprofits that offer community services to LMI individuals and \$367,500 to support affordable housing. The bank's financial support addressed a wide variety of critical community needs, such as assistance for the homeless, workforce development and financial education, charter schools, healthcare, youth and family services, educational support programs and scholarships for LMI individuals. As noted earlier, the bank also had investments and contributions that served a broader regional area that includes the bank's assessment area.

The bank's use of diverse investment vehicles allows the bank to impact community development needs in the assessment area, as evidenced in the examples highlighted below:

- A \$2.6 million NMTC investment, coupled with a \$4.4 million loan, to an entity that will create a new funding resource for businesses in qualified LMI census tracts and will provide access to non-traditional sources of financing that are not readily available in the market. This loan fund is being created to support broader revitalization efforts in LMI communities in Atlanta.
- A \$71.4 million NMTC investment to support the rehabilitation and expansion of a major hospital that serves a majority of LMI patients and is located in a distressed and Medically Underserved Area. The bank also provided a community development loan for this project and a significant contribution to this institution; the bank's support is helping meet a critical need for quality health care for underserved populations.
- A \$47.7 million Historic Tax Credit investment to support a significant redevelopment project that has been a catalyst for additional revitalization efforts in the surrounding community, including an adjacent low-income census tract. The project is located in a Georgia Opportunity Zone, and new businesses

located in the project will be eligible for additional tax credits for creating new jobs. In addition, the developer created a workforce development program to assist LMI individuals in the surrounding neighborhoods.

- Contributions to support United Way of Metropolitan Atlanta's development of a free mobile application to help people improve their financial well-being; this project is important for helping address the high rate of asset poverty among LMI households and reducing the number of unbanked and underbanked people in the Atlanta area.
- \$150,000 to support the construction of a new, full-service health clinic located in a low-income tract in northern Atlanta, which will serve primarily uninsured and low-income individuals who do not currently have access to affordable health care.
- \$50,000 to a nonprofit organization to acquire and rehabilitate houses to create new affordable housing options and to help stabilize a neighborhood in South Atlanta characterized by high rates of vacancies and foreclosures.

SERVICE TEST

SunTrust Bank's service test performance in the Atlanta assessment area is good based on the accessibility of the bank's retail services and the relatively high level of community development services.

Retail Services

The bank's retail delivery systems are reasonably accessible to SunTrust Bank's geographies and individuals of different income levels. The distribution of 164 branch offices and 275 ATMs as of December 31, 2015, was compared to the distribution of households and businesses among the tract categories within the assessment area. The percentage of branches in low-income tracts was lower than the percentage of households and businesses in the same geography; 6.6 percent of households and 4.5 percent of businesses were located in low-income census tracts compared to 4.3 percent of the bank's branches.

The distribution of the bank's branches in moderate-income tracts exceeded the percentage of households and businesses in the same geography; 25.0 percent of total branches were in moderate-income tracts compared to 22.4 percent of households and 19.9 percent of businesses.

During the examination period, there were no branch openings and nine branch closures, including one closure in a low-income tract and two closures in moderate-income tracts. The bank opened three and closed two full-service ATMs in low-income tracts and opened seven and closed one full-service ATMs in moderate-income tracts. Overall, the bank's record of opening and closing of branches generally did not adversely affect the accessibility of its delivery systems, particularly to LMI geographies and individuals in the assessment area.

Branch hours and services are similar across locations in different income level geographies. The bank offers extended hours at about 73.0 percent and weekend hours at about 63.0 percent of branches in moderate-income tracts, which is consistent with branch hours in middle- and upper-income census tracts. Additionally, extended and weekend hours in low-income tracts are consistent with the demographics. Overall, retail services do not

vary in a way that inconveniences any portion of the bank's assessment area, including LMI geographies and/or LMI individuals.

Community Development Services

SunTrust Bank provided a relatively high level of community development services in the Atlanta assessment area, with employees providing more than 21,000 community development service hours to qualified organizations in the assessment area.

Overall, the bank provided 20,500 community development service hours with organizations that provide community services to LMI individuals. Of that total, staff participated in nearly 11,500 community development service hours with Junior Achievement, providing financial education for LMI youth, and 550 hours with United Way for various activities that benefit primarily LMI individuals. Bank staff also engaged in over 500 hours of community development services to support affordable housing programs for LMI individuals. Bank employees provided 1,265 hours of board service or committee memberships to qualified nonprofit organizations. The bank's community development services touched a number of other community needs, including financial education and financial empowerment for LMI individuals, workforce development, educational and leadership programs for LMI youth and affordable health care.

The bank's performance is considered good given its market share and extensive branch network in the assessment area, along with available community development service activities. The bank's community development services demonstrated strong engagement with community services, but activities were limited relative to the needs in the community for small business assistance and affordable housing.

The following are notable examples of community development services during the review period.

- SunTrust employees were very active in workforce development service activities. Employees provided technical expertise, financial education, and leadership expertise supporting volunteer programs related to mock interviewing and financial education, including workforce development for people with disabilities receiving SSI or Medicaid benefits. Employees also provided mentoring, job readiness skills, and financial education with job readiness centers who support women who are homeless, recovering from alcohol and drug dependency, in transition from the penal system, recovering from domestic violence, or living in poverty.
- SunTrust was a premier sponsor and volunteer with Junior Achievement Discovery Center, winning the prestigious Silver U.S. President's Volunteer Service Award companywide volunteer award with the national Junior Achievement organization. Employees volunteered at Title I schools where at least 51.0 percent of the students received free or reduced-price lunches.
- SunTrust employees participated in the United Way Financial Capability Network and family self-sufficiency program as financial coaches engaging students and working families. The program promotes personal financial well-being. Additionally, the bank co-created a Financial Well Being app entitled "Money Game 2" using adapted SunTrust Financial Education curriculum. The app was available on the Google Play Store and the Apple Store for consumers.

METROPOLITAN AREA

(Full Scope Review)

DESCRIPTION OF INSTITUTION'S OPERATIONS IN THE MACON, GEORGIA ASSESSMENT AREA

Overview

The Macon assessment area consists of Bibb County, which is one of five counties that make up the Macon MSA. As of December 2015, SunTrust operated seven branch offices in the assessment area, which represent 2.9 percent of the branches statewide and 1.2 percent of its deposits in Georgia.

The banking market in the Macon assessment area is dominated by a few large regional and national banks. According to the June 30, 2015 FDIC Summary of Deposits Report, 11 financial institutions operated 51 offices in the assessment area. SunTrust had a deposit market share of 20.2 percent (\$562.9 million) and 7 offices. The top four banks holding nearly 78.0 percent of the market share rank as follows: State Bank & Trust, SunTrust, Bank of America, and BB&T.

HMDA-reportable lending and CRA lending are similarly competitive. SunTrust Bank and SunTrust Mortgage combined had an average of 7.2 percent of total HMDA-reportable lending in both 2014 and 2015. STB ranked 8th while STM ranked 3rd out of the 195 HMDA lenders in the market in 2014. Both STB and STM decreased slightly in rank in 2015. Wells Fargo Bank was the dominant HMDA reporter in both 2014 and 2015, followed by Robins Financial Credit Union, State Bank & Trust Company, and Quicken Loans.

SunTrust Bank ranked 7th out of 45 CRA reporters in 2014 with 5.7 percent of the CRA loans. In 2015, SunTrust increased its ranking to 3rd out of 56 CRA reporters with 10.5 percent of the CRA loans. American Express Bank and US Bank were the top two CRA lenders in the market for both years.

Population and Income Characteristics

The population in the assessment area was an estimated 153,721 persons in 2015, representing a 1.2 percent decrease from 2010.¹⁷¹ Population growth in the assessment area lagged relative to the state, which experienced an increase of 5.4 percent over the same time period. Macon is the largest city in Bibb County. To improve political representation in government and in response to the shrinking population and tax base, Macon-Bibb County was consolidated into one jurisdiction on January 1, 2014.

The assessment area contains 44 census tracts; 2010 census data indicates that there were 11 (25.0 percent) low-income census tracts, 8 (18.2 percent) moderate-income tracts, 12 (27.3 percent) middle-income tracts, and 13 (29.5 percent) upper-income tracts.

https://www.census.gov/quickfacts/table/PST045215/13021,00.

^{171 &}quot;QuickFacts: Bibb County, Georgia." US Census Bureau. N.p., n.d. Web. 13 Dec. 2016.

For purposes of classifying borrower income, this evaluation uses the FFIEC estimated median family income for the Macon MSA. As shown in the following table, the median family income increased between 2014 and 2015, from \$49,800 in 2014 to \$52,700 in 2015.

Borrower Income Levels Macon, GA MSA

FFIEC Estimated		Low			M	rate	N	lle	Upper				
Median Family Income		0	-	49.99%	50%	-	79.99%	80%	-	119.99%	120%	-	& above
2014	\$49,800	0	-	\$24,899	\$24,900	-	\$39,839	\$39,840	-	\$59,759	\$59,760	-	& above
2015	\$52,700	0	-	\$26,349	\$26,350	-	\$42,159	\$42,160	-	\$63,239	\$63,240	-	& above

Poverty and financial instability are major concerns throughout the assessment area. The percentage of families living below the poverty level continues to increase each year. For Bibb County, the estimated percentage of families in poverty was 22.7 percent between 2011 and 2015, while the poverty rate was 14.2 percent statewide. Within the assessment area, 41.7 percent of families are considered LMI as compared to the state level of 39.4 percent. 46.2 percent of the families living in low-income tracts and 22.3 percent of families in moderate-income tracts have incomes below the poverty level, which may limit lending opportunities.

Economic Conditions

Over the last decade, the assessment area was impacted by several factories, plants, and manufacturing firms shutting down operations and eliminating a sizeable portion of jobs from the community. However, economic conditions in the Macon region are improving, and there appears to be an intensive effort from local government and private companies to recruit new businesses and industry to the area. The total non-farm employment for the Macon area was approximately 102,100 for 2015, which is slightly higher than pre-recession figures and 3.6 percent higher than 2013.¹⁷³

The large employment sectors include trade, transportation and utilities; education and health services; government; professional and business services; and leisure and hospitality.¹⁷⁴ GEICO is currently the largest employer in the county, followed by Navicent Health Medical Center. Other major employers include Macon-Bibb County Board of Education, Macon-Bibb County, Coliseum Health Systems, and Mercer University.¹⁷⁵ Warner Robins Air Force Base, approximately 18 miles south of Macon, has brought significant economic growth to the region through its employment of over 20,000 residents. Additionally, the growth and expansion

of colleges and universities in the area, including Mercer University and Wesleyan College, have promoted development in the community, as approximately 50,000 students live in the greater Macon area.¹⁷⁶

According to 2015 Dun & Bradstreet information, there were 7,393 businesses within the Macon assessment area, 90.8 percent of which had total annual revenues less than or equal to \$1 million and were therefore considered to be small businesses. Small business lending has remained relatively stable between 2012 and 2014, with 2,175 loans made in 2014 within the assessment area. During this same period, loans made to firms with revenues under \$1.0 million have steadily increased, representing a 50.6 percent share of total small business loans, an indication that there may be fewer obstacles for smaller firms to access credit in the market.¹⁷⁷

The following graph illustrates the unemployment rates for Bibb County, the Macon MSA, and the state of Georgia. Overall, unemployment in the Macon MSA improved during the review period but remains slightly higher than the state with an unemployment rate at 6.3 percent compared to 5.9 statewide in 2015.

Unemployment Rates - GA Macon

Not Seasonally Adjusted. Source: Bureau of Labor Statistics

Census data indicates there were 69,675 housing units in the assessment area in 2015, of which 48.0 percent were owner-occupied, 34.1 percent were rental units and 17.9 percent were vacant. The percentages of owner-occupied housing units located in LMI census tracts were 24.3 percent and 45.7 percent, respectively. Despite the high percentage of vacant units in the assessment area, it should be noted that rental and vacant units are highly concentrated in low-income tracts. In addition, the median age of housing in low-income tracts is 52

¹⁷⁶ "Overview-Existing Industry Review." Macon Economic Development Commission. N.p., n.d. Web. 14 Dec. 2016.

years, as compared to 38 years for the assessment area. There appears to be greater residential lending opportunities in moderate-income tracts than in the low-income tracts.

The median housing value in the assessment area was \$118,700 between 2011 and 2015, which is considerably lower than the statewide median of \$148,100, but a 3.0 percent increase from 2009 values.¹⁷⁸ New home construction in the assessment area increased only slightly during the review period, with 2015 single-family permits representing 18.0 percent of 2006 levels.¹⁷⁹

Only 26.4 percent of homeowners were cost-burdened in Bibb County, which is comparable to national and state levels. Census data also confirms that 40.5 percent of all homes in Bibb County are likely affordable for a four-person family earning 80.0 percent of the area median income; however, that number drops to 17.9 percent for families earning 50.0 percent of the area median income. Therefore, it appears that affordable housing options are available for LMI families given the median home prices and family income for LMI families in the assessment area.

Home Mortgage Disclosure Act (HMDA) data for the assessment area confirms that the demand for home purchase loans and refinance loans of owner-occupied, one- to four-family dwellings is still soft. The number of home loans made in 2014 represents one-third of the number of loans made in 2005. 181

Rental housing costs are a challenge for families in Bibb County, where over 54.8 percent of renters are cost-burdened. A household is considered cost-burdened if homeownership or rental costs account for more than 30.0 percent of household income. In Bibb County, only 19.5 percent of all rental units are likely affordable for a four-person family earning 50.0 percent of the area median income in 2014. This figure increases to 55.0 percent and 89.4 percent for those earning 60.0 to 80.0 percent of the area median income, respectively. Clearly, there are affordable housing needs for those families earning less than 60.0 percent of area median income. In Bibb County, the monthly fair market rent (FMR) for a two-bedroom apartment is \$705, according to the 2016 *Out of Reach* study. 183

2015 FFIEC Census Data and 2015 D&B Information

Credit and Community Development Needs

While access to quality, affordable rental housing for lower-income individuals is an ongoing need in the Macon area, the issue receiving the most attention by Macon-Bibb County officials and other stakeholders is neighborhood revitalization and the elimination of blight in the central city. In 2015, the Macon-Bibb County Urban Development Authority approved a bond resolution for \$14 million to fund blight reduction activities. In addition, the city has also set up Shalom Zones in 10 distressed neighborhoods; Shalom Zones are neighborhoods the city has designated for redevelopment with local residents leading planned initiatives. One major blight removal project underway is in Mill Hill, a Fort Hawkins neighborhood in East Macon that has 46.0 percent of vacant homes in the neighborhood. The Macon Arts Alliance and other community stakeholders have decided to undertake a revitalization effort in this neighborhood and create an "arts village." 185

According to one housing contact, the other LMI neighborhoods with the most need of assistance include Lynmore Estates, Pleasant Hill, Napier Heights, Cherokee Heights, Huguenin Heights, and a large portion of East Macon. The Macon Housing Authority and Habitat for Humanity have primarily focused their development and revitalization efforts on Lynmore Estates, while Historic Macon has concentrated on Beall's Hill, Huguenin Heights and Tattnall Square Heights.

In recent years, local officials and community stakeholders have embraced the importance small businesses can have on a local economy rife with job losses and have targeted resources to further economic development in the region. One such initiative is the SimpleSTEPS Entrepreneur's Academy, a course designed to cover start-up basics, business concepts, marketing plans, financial projections, and funding sources. This initiative is offered in partnership between NewTown Macon, the Greater Macon Chamber of Commerce, and SCORE. Another recent development includes a new business incubator on the campus of Mercer University. Mercer will collaborate with other Middle Georgia organizations that support entrepreneurship as part of their programming. Therefore, there are several potential partners in the area for financial institutions to engage with for qualified economic development activities.

Additionally, Macon-Bibb County currently has several approved Opportunity Zones (OZs) that do not expire until 2021 and 2022. OZs are designated zones that are within or near 15.0 percent or greater poverty and where an Enterprise Zone or Urban Redevelopment Plan exists. These zones are all located within the former City of Macon boundaries.

¹⁸⁵ Harwell-Dye, Jonathan. "Residents will help turn 'Birthplace of Macon' into an arts village." The Knight Foundation, 6 July 2016. Web. 15 December 2016; http://www.knightfoundation.org/articles/residents-will-help-turn-birthplace-macon-arts-village

A significant number of Macon MSA residents are struggling financially as evidenced by elevated poverty levels. In light of increasing poverty and economic challenges for LMI individuals, there exist opportunities for banks to support activities that improve financial capability and household financial stability. Financial institutions can support financial stability and asset accumulation efforts in the assessment area, through sponsorships and volunteer involvement with the volunteer income tax assistance (VITA) program and Operation Hope's HOPE Inside. HOPE Inside is a financial empowerment program of Operation HOPE that provides free credit and money management, homeownership, and small business counseling. Hope Inside Macon-Bibb is located at the Buck Melton Community Center, an one-stop resource for Macon Housing Authority clients and others in the community who are working their way toward economic independence.

CONCLUSIONS WITH RESPECT TO PERFORMANCE TESTS IN THE MACON, GEORGIA ASSESSMENT AREA

LENDING TEST

SunTrust Bank's lending performance in the Macon assessment area is adequate. The geographic distribution of loans reflects poor penetration throughout the assessment area. Also, the distribution of borrowers reflects adequate penetration among borrowers of different income levels and businesses of different revenue sizes. In addition, the bank makes an adequate level of community development loans.

SunTrust Bank reported 314 (44.7 percent) HMDA-reportable loans and 388 (55.3 percent) CRA small business loans in the Macon assessment area during the review period. Therefore, CRA small business lending received slightly greater weight in determining the bank's lending test rating in the assessment area. The Macon assessment area accounted for 1.1 percent of SunTrust Bank's total HMDA-reportable lending in Georgia and 4.8 percent of its total statewide CRA small business lending by dollar volume during the review period. In comparison, 1.2 percent of SunTrust Bank's Georgia deposits are in this assessment area.

For the lending test analysis, lending performance in low-, moderate-, middle-, and upper-income census tracts and to low-, moderate-, middle-, and upper-income borrowers was considered for each product; however, comments for activity in middle- and upper-income tracts and to middle- and upper-income borrowers are only included when they were material to the outcome of the analyses. Details of the bank's mortgage and small business lending and information regarding lending by peers can be found in Appendix G.

Geographic Distribution of Loans

For this analysis the geographic distribution of small business and HMDA-reportable lending, including both originations and purchases, was compared with available demographic information. Performance context information and aggregate lending data were also taken into consideration. For instance, unemployment rates, poverty rates, the level of owner-occupied units, and the volume of small businesses in LMI census tracts were issues considered when assessing the bank's lending performance. Considering all of these factors, SunTrust Bank's geographic distribution of loans reflects poor penetration throughout the assessment area.

Small Business Loans

Small business lending in low-income census tracts is adequate. The percentage of small business loans in low-income census tracts was less than the percentage of small businesses located in low-income census tracts. However, performance in these tracts was greater than aggregate lending performance during the review period.

Small business lending in moderate-income census tracts is also adequate. SunTrust Bank originated 16.8 percent of its small business loans in moderate-income census tracts, where 17.7 percent of small businesses in the assessment area are operating. SunTrust's performance was slightly greater than aggregate lending performance in 2014, but slightly below the aggregate lenders in 2015.

Home Purchase Loans

Home purchase lending in low-income census tracts is very poor. The bank originated only one home purchase loan in a low-income census tract in 2015 and none in 2014. This level of lending represented 1.0 percent of the bank's home purchase loans in the assessment area, which was less than the 8.6 percent level of owner-occupied units in low-income tracts. Additionally, with no lending in 2014, the bank's performance was less than aggregate lenders in low-income tracts, but its performance was greater than aggregate lending performance in 2015.

Home purchase lending in moderate-income census tracts is also very poor. During the review period, four home purchase loans were originated in moderate-income census tracts. This level of lending represented 4.0 percent of the bank's home purchase loans in the assessment area, which was less than the 19.2 percent level of owner-occupied units in moderate-income census tracts. Additionally, the bank's performance was less than the aggregate lenders throughout the review period.

Home Refinance Loans

Home refinance lending in low-income census tracts is very poor. SunTrust Bank originated one home refinance loan in low-income census tracts during the review period. As a result, the bank's home refinance lending was less than the level of owner-occupied units in these tracts and underperformed aggregate lenders during the review period.

Home refinance lending in moderate-income census tracts is very poor. The percentage of home refinance loans originated in moderate-income census tracts was less than the percentage of owner-occupied units in these tracts; additionally, performance was less than aggregate lending performance during the review period.

Home Improvement Loans

Home improvement lending in low-income census tracts is adequate. SunTrust Bank originated 13.2 percent of its home improvement loans in these tracts during the review period. This performance was greater than the percentage of owner-occupied units and also greater than the aggregate lending performance in 2015. The bank's performance was slightly less than the aggregate in 2014.

Home improvement lending in moderate-income census tracts is good. The percentage of the bank's home improvement loans in moderate-income census tracts at 27.6 percent was greater than the percentage of owner-occupied units at 19.2 percent in these tracts. Additionally, the bank's performance also significantly exceeded aggregate lending performance in 2014 and was slightly less than the aggregate lending performance in 2015.

Lending to Borrowers of Different Incomes and Businesses of Different Sizes

The distribution of loans by borrower income or revenue size of businesses is adequate. For this analysis, the distribution of small business lending across business revenue sizes and HMDA-reportable lending across borrower income levels was compared to available demographic information. Performance context issues were also considered as well as the performance of other banks.

Small Business Loans

The distribution of small business loans to businesses of different sizes is adequate. While the percentage of small business loans to businesses with revenues of \$1 million or less was less than the percentage of small businesses in the assessment area during the review period, SunTrust Bank's performance was on par with the aggregate lending performance in 2014, but slightly less in 2015. Additionally, 86.6 percent of small business loans were originated in amounts of \$250,000 or less, indicating a willingness to lend in the smaller amounts that are typically requested by small businesses.

Home Purchase Loans

Home purchase lending to low-income borrowers is poor based on limited production of three loans during the review period. While the percentage of home purchase loans to low-income borrowers was much less than the percentage of low-income families located in the assessment area, SunTrust Bank's lending performance was slightly greater than the aggregate lending performance in 2014. The bank made no loans in 2015; thus, performance was less than the aggregate lenders for that year.

Home purchase lending to moderate-income borrowers is adequate. The bank's percentage of home purchase loans at 15.8 percent exceeded the percentage of moderate-income families located in the assessment area at 14.5 percent. The bank's home purchase lending was slightly less than the aggregate lenders during the review period.

Home Refinance Loans

Home refinance lending to low-income borrowers is adequate. The bank's percentage of home refinance loans to low-income borrowers was less than the percentage of low-income families in the assessment area throughout the review period. However, with only a total of five loans originated during the review period, SunTrust Bank's lending exceeded aggregate lending in 2015 and was on par with the aggregate lenders in 2014.

Home refinance lending to moderate-income borrowers is adequate. The bank's home refinance lending to moderate-income borrowers was slightly less than the percentage of moderate-income families in the assessment area. The bank's lending to moderate-income borrowers was less than aggregate lenders in 2014 but greater in 2015.

Home Improvement Loans

Home improvement lending to low-income borrowers is poor. The bank's home improvement lending to low-income borrowers was less than the percentage of low-income families in the assessment area throughout the review period. However, the bank's lending in 2014 was significantly greater than the aggregate lending performance. The bank made no loans in 2015, and this performance was less than aggregate lenders.

Home improvement lending to moderate-income borrowers is adequate. The percentage of home improvement loans to moderate-income borrowers was greater than the percentage of moderate-income families in the assessment area throughout the review period. However, the bank's performance was slightly less than the aggregate lending performance during the review period.

Community Development Lending

SunTrust Bank made an adequate level of community development loans in the Macon assessment area; the bank originated four community development loans totaling \$6.6 million during the review period. Loans were responsive to several community development needs in the assessment area, including the provision of affordable housing, community services targeted to LMI individuals, and promoting economic development by financing small business. SunTrust Bank's community development lending exhibits adequate responsiveness to the community development and credit needs of the assessment area.

Examples of community development lending include but are not limited to:

- Approximately \$2.7 million in financing to support a LIHTC housing development where all units are affordable to LMI individuals; and
- Several loans financing the public transportation system serving the area, especially LMI individuals.

INVESTMENT TEST

SunTrust Bank makes an adequate level of qualified investment and grants in the Macon assessment area that exhibit an adequate level of responsiveness to community development needs.

The bank's investments (excluding contributions) totaled \$4.3 million in the assessment area; of that amount, \$2.8 million were current period investments; \$1.5 million in prior period investments remained on the books. The two current period investments were government-guaranteed securities that supported affordable multifamily housing, including one LIHTC project. The bank contributed \$113,750 during the review period; the majority of grants targeted nonprofit organizations that provide community services to LMI individuals. The Macon assessment area also benefits from investments and contributions that serve the state of Georgia and the bank's entire footprint, including the assessment area.

The bank's investments narrowly address the needs for affordable housing and community services in the assessment area and demonstrate limited engagement with nonprofits and other organizations actively addressing the array of community development needs.

SERVICE TEST

SunTrust Bank's service test performance in the Macon assessment area is adequate based on the accessibility of the bank's retail services and the adequate level of community development services.

Retail Services

SunTrust Bank's delivery systems are reasonably accessible to the bank's geographies and individuals of different income levels. Overall, the bank has a small number of branches, totaling seven offices in the assessment area and 12 ATMs as of December 31, 2015. Branch distribution was compared to the distribution of households and businesses among various income tract categories within the assessment area. The bank has no branches in a low-income census tract. Low-income census tracts made up 25.0 percent of the assessment area. The bank has two branches in moderate-income census tracts representing 28.6 percent of total branches in the assessment area. Moderate-income census tracts made up 18.2 percent of the assessment area. For comparison purposes, 15.1 percent of households and 9.3 percent of businesses were located in low-income census tracts while 19.7 percent of households and 18.5 percent of businesses were located in moderate-income tracts.

The bank's record of opening and closing of branches has generally not adversely affected the accessibility of its delivery systems, particularly to LMI geographies and/or low- and moderate- individuals in the assessment area as there were no branch openings or closings in low- or moderate-income tracts, although the bank did close one branch in an upper-income tract. The bank's retail service hours are reasonable and do not vary in a way that inconveniences its assessment area, particularly LMI geographies and/or LMI individuals. Both branches in moderate-income tracts offer extended hours, and one of the two branches offers weekend business hours.

Community Development Services

SunTrust Bank provides an adequate level of community development services in the Macon assessment area. During the review period, bank employees provided 219 community development service hours in the assessment area. The majority of the service hours were community services, and nearly 20.0 percent of all service hours involved financial education. The bank also engaged in affordable housing, economic development, and revitalization and stabilization activities. Approximately 14.2 percent of service hours were board service at community development organizations or committee memberships. The bank's performance is considered adequate given its size and presence in the Macon assessment area and the opportunities that exist for community development service.

The following metropolitan assessment areas were reviewed using limited-scope examination procedures.

DESCRIPTION OF INSTITUTION'S OPERATIONS IN THE <u>GEORGIA</u> METROPOLITAN ASSESSMENT AREAS

• Albany Assessment Area (Dougherty, Lee, and Worth counties)

- o As of December 31, 2015, SunTrust Bank operated five branches in the assessment area, representing 2.0 percent of its branches in **Georgia**.
- o As of June 30, 2015, the bank had \$342.9 million in deposits in this assessment area, representing a market share of 18.7 percent and 0.8 percent of SunTrust Bank's total deposits in **Georgia**.

• Athens Assessment Area (Clarke and Oconee counties)

- o As of December 31, 2015, SunTrust Bank operated six branches in the assessment area, representing 2.5 percent of its branches in **Georgia**.
- O As of June 30, 2015, the bank had \$456.6 million in deposits in this assessment area, representing a market share of 13.2 percent and 1.0 percent of SunTrust Bank's total deposits in **Georgia**.

Augusta Assessment Area (Columbia, McDuffie, and Richmond counties)

- As of December 31, 2015, SunTrust Bank operated eight branches in the assessment area, representing 3.3 percent of its branches in <u>Georgia</u>.
- O As of June 30, 2015, the bank had \$712.0 million in deposits in this assessment area, representing a market share of 12.8 percent and 1.6 percent of SunTrust Bank's total deposits in **Georgia**.

• Brunswick Assessment Area (Glynn County)

- o As of December 31, 2015, SunTrust Bank operated six branches in the assessment area, representing 2.5 percent of its branches in **Georgia**.
- o As of June 30, 2015, the bank had \$236.2 million in deposits in this assessment area, representing a market share of 15.6 percent and 0.5 percent of SunTrust Bank's total deposits in **Georgia**.

• Columbus Assessment Area (Muscogee County)

- o As of December 31, 2015, SunTrust Bank operated seven branches in the assessment area, representing 2.9 percent of its branches in **Georgia**.
- O As of June 30, 2015, the bank had \$713.3 million in deposits in this assessment area, representing a market share of 12.7 percent and 1.6 percent of SunTrust Bank's total deposits in **Georgia**.

• Dalton Assessment Area (Whitfield County)

- o As of December 31, 2015, SunTrust Bank operated one branch in the assessment area, representing 0.4 percent of its branches in **Georgia**.
- O As of June 30, 2015, the bank had \$20.3 million in deposits in this assessment area, representing a market share of 1.0 percent and less than 1.0 percent of SunTrust Bank's total deposits in **Georgia**.

• Gainesville Assessment Area (Hall County)

- o As of December 31, 2015, SunTrust Bank operated seven branches in the assessment area, representing 2.9 percent of its branches in **Georgia**.
- o As of June 30, 2015, the bank had \$320.0 million in deposits in this assessment area, representing a market share of 10.8 percent and 0.7 percent of SunTrust Bank's total deposits in **Georgia**.

• Rome Assessment Area (Floyd County)

- o As of December 31, 2015, SunTrust Bank operated two branches in the assessment area, representing 0.8 percent of its branches in **Georgia**.
- O As of June 30, 2015, the bank had \$265.7 million in deposits in this assessment area, representing a market share of 18.9 percent and 0.6 percent of SunTrust Bank's total deposits in **Georgia**.

• Savannah Assessment Area (Chatham County)

- o As of December 31, 2015, SunTrust Bank operated 13 branches in the assessment area, representing 5.3 percent of its branches in **Georgia**.
- O As of June 30, 2015, the bank had \$1.8 billion in deposits in this assessment area, representing a market share of 30.6 percent and 3.9 percent of SunTrust Bank's total deposits in **Georgia**.

• Valdosta Assessment Area (Lowndes County)

- o As of December 31, 2015, SunTrust Bank operated one branch in the assessment area, representing 0.4 percent of its branches in **Georgia**.
- As of June 30, 2015, the bank had \$12.9 million in deposits in this assessment area, representing a market share of 0.8 percent and less than 1.0 percent of SunTrust Bank's total deposits in Georgia.

• Warner Robbins Assessment Area (Houston County)

- o As of December 31, 2015, SunTrust Bank operated four branches in the assessment area, representing 1.6 percent of its branches in **Georgia**.
- As of June 30, 2015, the bank had \$146.9 million in deposits in this assessment area, representing a market share of 11.6 percent and 0.3 percent of SunTrust Bank's total deposits in Georgia.

CONCLUSIONS WITH RESPECT TO PERFORMANCE TESTS

Through the use of available facts and data, including performance and demographic information, each assessment area's performance was evaluated and compared with the bank's performance in the state. The conclusions regarding performance are provided in the table below. Please refer to the tables in Appendix H for information regarding these areas.

	Metropolitan	Assessment Areas			
Assessment Areas	Lending Test	Investment Test	Service Test		
Albany	Not Consistent (Above)	Not Consistent (Below)	Not Consistent (Below)		
Athens	<u>Consistent</u>	<u>Consistent</u>	Not Consistent (Below)		
Augusta	Consistent	Consistent	Not Consistent (Below)		
Brunswick	Not Consistent (Below)	Not Consistent (Below)	Not Consistent (Below)		
Columbus	Not Consistent (Below)	Not Consistent (Below)	Not Consistent (Below)		
Dalton	Not Consistent (Below)	Not Consistent (Below)	Not Consistent (Below)		
Gainesville	Not Consistent (Below)	Not Consistent (Below)	Not Consistent (Below)		
Rome	Not Consistent (Below)	Not Consistent (Below)	Not Consistent (Below)		
Savannah	Consistent	Not Consistent (Below)	<u>Consistent</u>		
Valdosta	Not Consistent (Below)	Consistent	Not Consistent (Below)		
Warner Robbins	Not Consistent (Below)	Not Consistent (Below)	Not Consistent (Below)		

For the lending test, SunTrust Bank received a High Satisfactory rating for the State of Georgia. Performance in the Albany metropolitan limited-scope assessment area outperformed the bank's performance for the state. Community development lending in Albany, Athens, Savannah, and Valdosta was excellent. Performance in Athens, Augusta, and Savannah metropolitan limited-scope assessment areas was consistent with the bank's performance in the state. Performance in the remaining seven metropolitan limited-scope assessment areas was weaker than overall performance in the state. However, performance in all seven assessment areas, except Dalton, was still considered adequate. Weaker performance was primarily attributable to poor and very poor community development lending in Brunswick, Columbus, Dalton, Gainesville, Rome, and Warner Robbins. Also, contributing to weaker performance in the Dalton and Valdosta assessment areas was the poor geographic distribution of loans. The poor distribution of loans by borrower income was an additional factor contributing to weaker performance in the Valdosta assessment area.

For the investment test, SunTrust Bank received an Outstanding rating for the state of Georgia. Performance in Athens, Augusta, and Valdosta metropolitan limited-scope assessment areas was consistent with statewide performance due to excellent levels of investment activity in these assessment areas. Performance was weaker than the state in all remaining assessment areas due to lower levels of qualified investments relative to the bank's operational presence in the assessment areas.

For the service test, SunTrust Bank received a rating of High Satisfactory for the state of Georgia. Service test performance in the Savannah assessment area was consistent with the bank's performance for the state due to strong community development services performance. Service test performance in the Albany, Athens, Augusta, Brunswick, Columbus, Dalton, Gainesville, Rome, Valdosta, and Warner Robins assessment areas was weaker than the bank's statewide performance. Community development services performance was

consistent with the statewide performance in Columbus, and weaker performance was noted in the remaining assessment areas. Retail banking services were weaker than the state in Albany, Columbus, Dalton, and Warner Robbins, consistent in Augusta and Savannah, and stronger in the remaining assessment areas.

The performance in the metropolitan limited-scope assessment areas did not affect the overall state rating.

The following nonmetropolitan assessment areas were reviewed using limited-scope examination procedures.

DESCRIPTION OF INSTITUTION'S OPERATIONS IN THE <u>GEORGIA</u> NONMETROPOLITAN ASSESSMENT AREAS

• Appling Wayne Assessment Area (Appling and Wayne counties)

- o As of December 31, 2015, SunTrust Bank operated two branches in the assessment area, representing 0.8 percent of its branches in **Georgia**.
- O As of June 30, 2015, the bank had \$79.0 million in deposits in this assessment area, representing a market share of 16.5 percent and 0.2 percent of SunTrust Bank's total deposits in **Georgia**.

• Cedartown Assessment Area (Baldwin and Putnam counties)

- As of December 31, 2015, SunTrust Bank operated two branches in the assessment area, representing 0.8 percent of its branches in <u>Georgia</u>.
- o As of June 30, 2015, the bank had \$102.9 million in deposits in this assessment area, representing a market share of 28.9 percent and 0.2 percent of SunTrust Bank's total deposits in **Georgia**.

• Central Georgia Assessment Area (Baldwin and Putnam counties)

- As of December 31, 2015, SunTrust Bank operated two branches in the assessment area, representing 0.8 percent of its branches in <u>Georgia</u>.
- o As of June 30, 2015, the bank had \$77.9 million in deposits in this assessment area, representing a market share of 8.7 percent and 0.2 percent of SunTrust Bank's total deposits in **Georgia**.

• Coffee Ware Assessment Area (Coffee and Ware counties)

- As of December 31, 2015, SunTrust Bank operated two branches in the assessment area, representing 0.8 percent of its branches in <u>Georgia</u>.
- o As of June 30, 2015, the bank had \$134.0 million in deposits in this assessment area, representing a market share of 10.1 percent and 0.3 percent of SunTrust Bank's total deposits in **Georgia**.

• Fannin Lumpkin Assessment Area (Fannin and Lumpkin counties)

- As of December 31, 2015, SunTrust Bank operated one branch in the assessment area, representing 0.4 percent of its branches in <u>Georgia</u>.
- O As of June 30, 2015, the bank had \$35.2 million in deposits in this assessment area, representing a market share of 4.4 percent and 0.1 percent of SunTrust Bank's total deposits in **Georgia**.

• LaGrange Assessment Area (Troup County)

- As of December 31, 2015, SunTrust Bank operated one branch in the assessment area, representing 0.4 percent of its branches in <u>Georgia</u>.
- O As of June 30, 2015, the bank had \$70.4 million in deposits in this assessment area, representing a market share of 6.6 percent and 0.2 percent of SunTrust Bank's total deposits in **Georgia**.

• South Georgia Assessment Area (Colquitt, Thomas, and Tift counties)

- o As of December 31, 2015, SunTrust Bank operated three branches in the assessment area, representing 1.2 percent of its branches in **Georgia**.
- o As of June 30, 2015, the bank had \$98.0 million in deposits in this assessment area, representing a market share of 3.7 percent and 0.2 percent of SunTrust Bank's total deposits in **Georgia**.

• Statesboro Assessment Area (Bulloch County)

- o As of December 31, 2015, SunTrust Bank operated one full-service ATM and no branch offices in the assessment area.
- o As of June 30, 2015, the bank had no deposits in this assessment area.

CONCLUSIONS WITH RESPECT TO PERFORMANCE TESTS

Through the use of available facts and data, including performance and demographic information, each assessment area's performance was evaluated and compared with the bank's performance in the state. The conclusions regarding performance are provided in the table below. Please refer to the tables in Appendix H for information regarding these areas.

	Nonmetropolita	an Assessment Areas									
Assessment Areas Lending Test Investment Test Service											
Appling Wayne	Not Consistent (Below)	Not Consistent (Below)	Not Consistent (Below)								
Cedartown	Not Consistent (Below)	Not Consistent (Below)	Not Consistent (Below)								
Central Georgia	Not Consistent (Below)	Not Consistent (Below)	Not Consistent (Below)								
Coffee Ware	Not Consistent (Below)	Not Consistent (Below)	Not Consistent (Below)								
Fannin Lumpkin	Not Consistent (Below)	Not Consistent (Below)	Not Consistent (Below)								
LaGrange	Consistent	Not Consistent (Below)	Not Consistent (Below)								
South Georgia	Not Consistent (Below)	Not Consistent (Below)	Not Consistent (Below)								
Statesboro	Not Consistent (Below)	Not Consistent (Below)	Not Consistent (Below)								

While lending performance in the LaGrange nonmetropolitan limited-scope assessment area was consistent with the institution's performance for the state, the remaining seven nonmetropolitan limited-scope assessment areas' performance was weaker than the institution's performance for the state. However, with the exception of Fannin Lumpkin and Statesboro, performance in all the remaining nonmetropolitan assessment areas was still considered adequate. Weaker performance was primarily attributable to very poor community development lending in Appling Wayne, Cedartown, Central Georgia, Fannin Lumpkin, and Statesboro. Community development lending in the Coffee Ware and South Georgia nonmetropolitan limited-scope assessment areas was excellent, while community development lending in LaGrange was good. Also, contributing to weaker performance in the Coffee Ware, South Georgia, and Statesboro assessment areas was the poor geographic distribution of loans. The poor distribution of loans by borrower income was an additional factor contributing to weaker performance in the Statesboro assessment area.

Investment activity in all nonmetropolitan limited-scope assessment areas was weaker than the bank's performance for the state. Performance in each of these markets was below due to low levels of investment and contribution activity relative to the bank's size of operational presence in the assessment areas.

For the service test, performance in nonmetropolitan limited-scope assessment areas was weaker than statewide performance due to weaker community development service activities. Appling Wayne, Fannin Lumpkin, and Statesboro reported no community development activities, while only four community development service activity hours were submitted for the Cedartown assessment area. Additionally, retail banking services were weaker than the state in Appling Wayne, Cedartown, Central Georgia, LaGrange, and South Georgia assessment areas, while the remaining assessment areas were consistent with statewide performance.

The performance in the nonmetropolitan limited-scope assessment areas did not affect the overall state rating.

CRA RATING FOR MARYLAND: <u>Satisfactory</u>

The Lending Test is rated: <u>High Satisfactory</u>

The Investment Test is rated: Outstanding

The Service Test is rated: High Satisfactory

Major factors supporting the rating include the following:

- The geographic distribution of loans reflects adequate penetration throughout the assessment areas, and the distribution of loans by borrower income reflects good penetration among customers of different income levels and businesses of different revenue sizes.
- The bank is a leader in making community development loans in its Maryland assessment areas.
- The bank provides an excellent level of qualified community development investments and grants
 that are responsive to several identified community development needs of the Maryland assessment
 areas.
- Although retail banking services are adequate, delivery systems may be unreasonably inaccessible
 to portions of the bank's geographies and individuals of different income levels in the assessment
 areas.
- The bank provides a relatively high level of community development services throughout the assessment areas.

SCOPE OF EXAMINATION

A full-scope review was conducted for the following assessment area in the State of Maryland:

Baltimore

Limited-scope reviews were conducted for the remaining four assessment areas:

- Eastern Shore of Maryland (non-MSA)
- Salisbury

• Kent (non-MSA)

• St. Mary's

The time period, products, and affiliates evaluated for this assessment area are consistent with the scope discussed in the institution section of this report.

DESCRIPTION OF INSTITUTION'S OPERATIONS IN MARYLAND

As of June 30, 2015, SunTrust Bank had \$2.5 billion in deposits in Maryland accounting for 1.8 percent of the bank's total deposits. SunTrust Bank operated 51 branch offices in Maryland as of December 31, 2015, representing 3.5 percent of the bank's total branches. HMDA-reportable lending in Maryland accounted for 6.6 percent of total institutional HMDA-reportable lending by number of loans, and CRA small business lending in Maryland accounted for 3.6 percent of the bank's total CRA small business lending. Overall, HMDA-reportable and CRA lending in Maryland accounted for 7.6 percent of the bank's total lending activity by dollar volume, which was greater than the percentage of total deposits at 1.8 percent.

The following table shows lending activity from January 1, 2014, through December 31, 2015.

Statewide Summary of Lending Activity Assessment Areas Located in

Maryland

	112002 3 200

Originations and Purchases

CONCLUSIONS WITH RESPECT TO PERFORMANCE TESTS IN MARYLAND

LENDING TEST

The lending test rating in the state of Maryland is high satisfactory. Overall, performance in Maryland with regard to the geographic distribution of loans reflects adequate penetration throughout the assessment areas. The distribution of loans by borrower income reflects good penetration among customers of different income levels and businesses of different sizes. Additionally, SunTrust Bank is a leader in making community development loans in Maryland.

During the review period, SunTrust reported 7,252 HMDA-reportable loans and 2,686 CRA small business loans in Maryland. As such, HMDA-reportable lending was given greater weight when determining the lending test rating for Maryland. The rating for Maryland is based on performance in the Baltimore full-scope assessment area. Approximately 89.2 percent of the bank's HMDA-reportable and CRA small business lending (by number of loans) in Maryland occurred within the Baltimore assessment area, thus making this the largest concentration of lending activity in the state. Additionally, 89.1 percent of the bank's total deposits in Maryland are in this assessment area.

Details of the bank's HMDA-reportable and small business lending and information regarding lending by peers can be found in Appendix G.

Geographic and Borrower Distribution

The geographic distribution of SunTrust's HMDA-reportable and CRA small business loans is adequate, and the distribution of loans by borrower income and revenue size of businesses is good. As noted above, the rating for the state of Maryland is derived from the Baltimore assessment area. A detailed discussion of the borrower and geographic distribution of lending for this assessment area is included in the next section of this report.

Community Development Lending

SunTrust Bank is a leader in making community development loans in the state of Maryland. The bank originated 35 community development loans totaling \$297 million in Maryland during the review period, including 31 loans for \$281.6 million in the Baltimore full-scope assessment area. Performance in Baltimore was excellent. Overall, this level of statewide community development lending is considered excellent based on the bank's size and presence in its Maryland assessment areas and the availability of community development lending opportunities. More information on community development loans can be found in the full-scope assessment area section of this report.

INVESTMENT TEST

The investment test rating for Maryland is outstanding.

The bank made an excellent level of qualified investments and contributions with total investments of \$116.1 million directly benefiting the assessment areas in the state. Baltimore was the only full-scope assessment area reviewed, and investments in this assessment area represented approximately 58.7 percent of statewide investments compared to 89.1 percent of deposits. Performance in Baltimore was excellent. The bank's performance was also considered excellent in Salisbury, and in the Eastern Shore of Maryland limited-scope assessment area, where the bank had investments totaling \$35.3 million in LIHTC projects. The bank's investment portfolio for the state included direct LIHTC and NMTC project investments, LIHTC investment funds, mortgage-backed securities and other bonds, and contributions.

In addition to the investments directly benefiting the bank's assessment areas, the bank had broader statewide or regional investments totaling \$1.0 million and contributions of \$122,000 with a purpose, mandate, or function that includes serving the bank's assessment areas. Notably, the bank provided a grant to a CDFI to be used to help reduce the interest rates for developers building or preserving quality affordable rental housing in certain transit-oriented neighborhoods across the state and in the District of Columbia. The bank also provided \$25,000 to a statewide organization providing small business loans.

Finally, the bank has approximately \$17.6 million invested in SBICs that benefit multiple states within the bank's footprint, including Maryland.

Additional details regarding specific investments and contributions can be found in the full-scope assessment area section, and a summary of the bank's investments and contributions for all assessment areas can be found in Appendix F.

SERVICE TEST

The service test rating for Maryland is high satisfactory.

Retail Services

Overall, retail services for the state were considered adequate. However, delivery systems, including ATMs and branch office locations, may be unreasonably inaccessible to portions of the bank's geographies and individuals of different income levels in the assessment areas. The bank's record of opening and closing of branches has generally not adversely affected the accessibility of its delivery systems, particularly to LMI geographies and/or LMI individuals. Retail banking services and hours of operation do not vary in a way that inconveniences the assessment areas, including LMI geographies or LMI individuals. Additional detail on the bank's retail services can be found in the full-scope assessment area section of this report.

Community Development Services

SunTrust Bank provided a relatively high level of community development services that benefited LMI residents and small businesses in the state of Maryland. The bank provided a total of 2,978 qualified service hours during the examination period, including 2,942 hours in the Baltimore full-scope assessment area.

Performance in Baltimore was good, while performance in the limited-scope assessment areas was limited. Due to SunTrust Bank's performance in its full-scope assessment area, the bank's statewide performance is considered good given its size and presence in the state of Maryland and the opportunities that exist for community development service.

Additional detail on the bank's retail and community development services can be found in the full-scope assessment area section of this report.

METROPOLITAN AREA

(Full Scope Review)

DESCRIPTION OF INSTITUTION'S OPERATIONS IN THE BALTIMORE, MARYLAND ASSESSMENT AREA

Overview

The Baltimore assessment area consists of the entire Baltimore-Columbia-Towson MSA, which includes Anne Arundel, Baltimore, Carroll, Harford, Howard, and Queen Anne's counties, as well as Baltimore City. As of December 31, 2015, SunTrust Bank operated 45 branch offices in the assessment area, representing 88.2 percent of its branches in Maryland. The Baltimore assessment area represents 89.1 percent of statewide deposits and 89.2 percent statewide HMDA-reportable and CRA loans (by number of loans).

Baltimore's banking market is led by national and regional banks, including Bank of America, Manufacturers and Traders Trust Company (M&T), PNC, and Wells Fargo. According to the June 30, 2015 FDIC Summary of Deposits Report, there were 65 financial institutions serving the market, operating 747 branch locations with \$67.5 billion in total deposits. SunTrust ranked 6th in deposit market share with \$2.2 billion or 3.3 percent of total deposits.

HMDA-reportable lending and CRA lending are competitive. SunTrust Bank and SunTrust Mortgage combined had 4.1 percent of total HMDA-reportable lending in the assessment area in 2014 and 4.3 percent of total HMDA-reportable lending in 2015. SunTrust Mortgage was ranked 7th and SunTrust Bank was ranked 25th out of 585 lenders in 2014. In 2015, SunTrust Mortgage ranked 5th and SunTrust Bank ranked 29th out of 626 lenders. Wells Fargo Bank was the dominant HMDA reporter in both 2014 and 2015, followed by Quicken Loans, JPMorgan Chase, and BB&T.

For CRA lending, SunTrust Bank ranked 14th out of 122 lenders in 2014 with 1.7 percent of CRA loans. The bank's CRA lending increased by over 100.0 percent between 2014 and 2015; in 2015, the bank ranked 11th out of 126 lenders with 3.1 percent of total CRA loans. American Express Bank was the leading CRA lender in the market, followed by Capital One, JPMorgan Chase, and Wells Fargo. Regional banks, including PNC and BB&T, were also significant CRA lenders in the Baltimore area.

Population and Income Characteristics

The population for the Baltimore MSA was estimated at approximately 2.8 million in 2015, representing an increase of 2.2 percent since 2010; population in Maryland increased by 2.7 percent over this time period. The most significant growth in the past few years has been in suburban Howard and Anne Arundel counties. The City of Baltimore has experienced decades of population loss since it peaked in 1950 at 950,000; as of 2010, the

population was 620,000.¹⁸⁶ Since 2010, population in the city has been relatively stable, largely due to the national trend of millennials and young professionals choosing to reside in city centers as opposed to suburban areas. However, the decades of population loss and disinvestment have taken a significant toll on the city.

The assessment area contains 683 census tracts; 2010 census data indicates that there were 100 (14.6 percent) low-income census tracts, 147 (21.5 percent) moderate-income tracts, 227 (33.2 percent) middle-income tracts, 197 (28.8 percent) upper-income tracts, and 12 (1.8 percent) tracts not categorized by income level.

For purposes of classifying borrower income, this evaluation uses the FFIEC estimated median family income for the Baltimore-Columbia-Towson MSA. As shown, the median family income increased from \$83,500 in 2014 to \$89,600 in 2015.

Borrower Income Levels Baltimore-Columbia-Towson, MD MSA

FFIEC Estimated		Low			M	odeı	rate	N	Mide	dle	J	Јрре	er
Median	0	-	49.99%	50%	-	79.99%	80%	-	119.99%	120%	-	& above	
2014	\$83,500	0	-	\$41,749	\$41,750	-	\$66,799	\$66,800	-	\$100,199	\$100,200	-	& above
2015	\$89,600	0	-	\$44,799	\$44,800	-	\$71,679	\$71,680	-	\$107,519	\$107,520	-	& above

There is substantial variation in the median family income throughout the assessment area, ranging from \$51,032 in Baltimore City to \$128,504 in Howard County in 2015; the median family income exceeded \$100,000 in four of the seven counties within the assessment area. The detailed median family income figures provide some additional perspective on the economic diversity within the assessment area, which has implications for lending opportunities.

Poverty and economic instability are significant concerns in the city of Baltimore. In 2015, the percentage of families in poverty was estimated at almost 19.0 percent, while the poverty rate was approximately 7.6 percent for the entire MSA and 7.0 percent statewide. A 2016 study found that 55.0 percent of households in Baltimore were considered liquid asset poor, meaning they lacked the financial reserves to live above the poverty level for three months if they experienced any type of economic disruption; 85.0 percent of households with income under \$25,000 were consider asset liquid poor. Throughout the assessment area, census data shows that 38.7 percent of families were considered LMI in 2010. Additionally, 21.4 percent of families in low-income tracts and 17.3 percent of families in moderate-income tracts have incomes below the poverty level.

¹⁸⁹ "FAMILY ASSETS COUNT: BALTIMORE." Family Assets Count. CFED (Corporation for Enterprise Development) and the Assets & Opportunity Initiative, 2016. Web. 12 July 2017. http://familyassetscount.org/baltimore

The financial instability of low-income households and the concentration of families living below the poverty level will make lending in LMI tracts challenging, particularly in the city of Baltimore, where the concentration of poverty is greatest.

Economic Conditions

Baltimore's economy has been slowly improving. The region had largely recovered from the recession by 2012 and has been experiencing modest growth since that time. The government and education and health services sectors largely drive the economy, and the eight largest employers in the region fall within these two sectors. There is also a significant employment concentration in professional and business services. Between 2011 and 2015, nonfarm payrolls increased by an average of 18,500 jobs, or 1.4 percent annually compared with a nationwide growth rate of 1.7 percent. Job gains were greatest in the professional and business services, leisure and hospitality, and education and health services sectors, which increased by 3.9, 3.6, and 1.8 percent, respectively.¹⁹⁰

Two of the four largest employers in the region are military bases, including Fort George G. Meade military base with 55,000 employees, and Aberdeen Proving Ground with 16,800 employees. Johns Hopkins University and Johns Hopkins Health are the largest private sector employers in the Baltimore MSA.¹⁹¹ The heavy reliance on the military bases, and government spending more generally, is an ongoing risk to the economic health of the region.

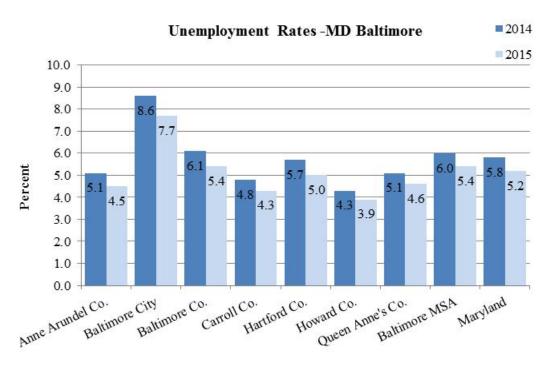

Baltimore was historically a manufacturing center. However, between 2000 and 2010, the manufacturing sector in Baltimore declined at an average annual rate of 4.2 percent. A downside to this trend is that the manufacturing and services jobs that have replaced jobs in the manufacturing sector typically pay much less, which dampens opportunities for middle- and working-class income earners. Another issue is that new manufacturing jobs are often located away from the city's core, in Howard or Harford County, while the low-skilled, low-wage workforce lives in Baltimore City and Baltimore County. 192

Unemployment in the Baltimore MSA has been generally improving, and between 2014 and 2015, the unemployment rate decreased from 6.0 percent to 5.4 percent. Baltimore City continues to struggle with elevated unemployment, though conditions did improve during the review period, with the unemployment rate falling from 8.6 percent to 7.7 percent. Unemployment was lowest in Howard County at 3.9 percent in 2015. 193

Not Seasonally Adjusted. Source: Bureau of Labor Statistics

According to 2015 Dun & Bradstreet information, there were 137,239 businesses within the Baltimore assessment area, 91.8 percent of which had total annual revenues less than or equal to \$1 million and were therefore considered to be small businesses. Between 2012 and 2015, small business lending increased by 22.1 percent, with 49,740 loans made in 2015. During this same period, loans made to firms with revenues under \$1.0 million increased by 45.2 percent, representing 52.3 percent of total small business loans in 2015; this may indicate that there are fewer obstacles for smaller firms to access credit in the market.¹⁹⁴

Census data indicates that there were 1.1 million housing units located in the assessment area in 2010, 61.7 percent of which were owner-occupied, 29.0 percent were rental units, and 9.3 percent were vacant. Rental and vacant housing is disproportionally concentrated in Baltimore City and Baltimore County. Baltimore City accounts for 26.4 percent of total housing units, 36.8 percent of all the rental units, and 55.6 percent of all vacant units in the assessment area. Housing stock in the assessment area is older, with a median age of 40 years; however, older housing stock is a particular concern in Baltimore City, where the median age of the housing is 64 years. These factors indicate that HMDA-reportable lending may be challenging, particularly in Baltimore City, which has the majority of the LMI tracts and is where many of the LMI residents live.

¹⁹⁴ "Baltimore, MD (CRA Loan Data)." GIS Mapping and Geographic Information System Data. The Reinvestment Fund, n.d. Web. 07 July Sept. 2017. http://www.policymap.com/.

The housing market in the Baltimore MSA is considered soft. There was a significant uptick in home sales across the region after the recession, but the pace of sales was not sustainable given the current level of population growth. However, most counties in the assessment area experienced an increase in annual home sales in 2016 compared to 2015. The rate of annual home price appreciation across the entire assessment area declined during the review period, and at the end of 2016, home values were not much above the home values in 2012, when recovery in the market was just beginning. The small change in the median home values is largely due to the high number of low-priced REO sales and a low number of higher priced new construction sales during the past few years. He median home price in the assessment area in December 2016 was \$296,571, though home prices varied widely throughout the assessment area. In December 2016, Howard County had the highest median home price of \$387,903 while the median home price in Baltimore City was \$208,629.

Single-family home construction has been on the rise for the past few years, though it remains well below peak levels of the early 2000s. On average, 4,625 homes were permitted annually from 2013 through 2015 in the Baltimore MSA. The greatest number of new single-family units is being built in the southern part of the assessment area, including Anne Arundel and Howard counties, which are closest to the Washington, DC metro area.¹⁹⁸ In Baltimore City, where demand for affordable housing is greatest, available land for new construction is limited, particularly in the areas where population growth is occurring. Therefore, new housing construction is mostly limited to in-fill development units or units in small subdivisions. Most of the new single-family construction occurring within Baltimore City is high-end housing, with prices that far exceed what is affordable to LMI residents living in the city.¹⁹⁹

Declining mortgage delinquencies are another indication that the housing market is improving. The percentage of seriously delinquent mortgages (defined as mortgages that are 90 days past due or in foreclosure) peaked in 2013 in the Baltimore assessment area at 8.0 percent; delinquency rates were significantly higher in Baltimore City, which peaked at 13.0 percent in early 2013. Across the assessment area, the percentage of seriously delinquent mortgages fell to 3.0 percent in December 2016. Mortgage delinquencies remain elevated in Baltimore City at approximately 5.0 percent, due in part to the high rate of unemployment that persists in the city.²⁰⁰

¹⁹⁹ "COMPREHENSIVE HOUSING MARKET ANALYSIS Baltimore-Columbia-Towson, Maryland." USHMC Regional Page | HUD USER. U.S. Department of Housing and Urban Development, Office of Policy Development and Research, 01 Apr. 2016. Web. 14 July 2017.

²⁰⁰ FRB Atlanta calculations of data provided by McDash Analytics, LLC, a wholly owned subsidiary of Black Knight Financial Services.

The affordability ratio for the assessment area indicates that the housing market is generally in line with household incomes when the median home price is compared to median household income. However, the affordability ratio in Baltimore City is declining and is much lower than the affordability ratio for the Baltimore MSA overall, indicating that median household income is not keeping up with increasing median housing prices.²⁰¹

Apartment market conditions in the Baltimore metropolitan area are balanced. During the first quarter of 2016, the apartment vacancy rate was 4.7 percent, unchanged from the first quarter of 2015. The average rent increased 3.0 percent, to \$1,249 in the first quarter of 2016, compared with the average rent during the first quarter of 2015. Rents are highest in the downtown Baltimore area due to its desirable location near the Inner Harbor and because of the strong demand for living in central Baltimore City in recent years. Driven by the development in the city of Baltimore, multifamily construction activity in the MSA during the past three years has been the highest since the early 1990s.²⁰² However, most of the new multifamily development is high-end luxury apartments; the need for more affordable rental housing persists, particularly in the city of Baltimore.

²⁰¹ The affordability index measures how affordable the median home price is to households earning the median income, assuming current mortgage rates. A baseline of 100 indicates that median home prices are in line with median household income; an index greater than 100 indicates the housing is more affordable. According to Federal Reserve Bank of Atlanta calculations, the affordability index for the assessment area in December 2016 was 149. The affordability ratio for Baltimore City was 117, though as recently as January 2014 the affordability ratio was less than 100, indicating the median priced home was not affordable to a household earning the median income. Source: Federal Reserve Bank of Atlanta calculations of data provided by Moody's Analytics.

2015 FFIEC Census Data and 2015 D&B Information

Credit and Community Development Needs

Interviews with Federal Reserve staff and community contacts along with information provided by bank management indicate that there is a robust community development environment in the Baltimore assessment area, with numerous community development organizations targeting LMI individuals and families. Baltimore is also home to several very large foundations, including the Annie E. Casey Foundation. Many of these organizations have focused very significant philanthropic resources to support community development efforts, primarily in the city of Baltimore. Additionally, there are several active national and regional CDFIs specializing in affordable housing finance, neighborhood revitalization, and small business lending. These assets create a favorable environment and opportunities for banks to partner with local government, nonprofits, developers, and CDFIs to provide affordable housing, neighborhood revitalization, and small business development by investing, lending directly, or providing technical assistance to the organizations or those they serve.

Community revitalization, primarily within Baltimore City, is one of the most pressing community development needs in the assessment area. As noted earlier, the city has experienced decades of population and job loss and as a result, there are a number of highly distressed neighborhoods across the city. Vacant and blighted properties are a major obstacle for the city's revitalization, and in 2010, the city started the "Vacants to Value" program to target thousands of vacant homes for renovation and transfer to new owners. The city's strategy focuses primarily on vacant buildings in neighborhoods where there is a perceived market demand, and through targeted incentives, demolitions and other services, the city has had success in stabilizing some communities. However, the number of vacant buildings continues to grow, and as of 2014 there were still nearly 17,000 vacant buildings, with many of them located in the city's lowest-income communities. Due to the lack of jobs and other financial challenges in these neighborhoods, community revitalization is a significant challenge.²⁰³

There are several large redevelopment projects underway in Baltimore. Most notably is the 20-year \$1.8 billion mixed-use revitalization project targeting a very distressed community in East Baltimore, adjacent to the recently expanded Johns Hopkins medical campus. East Baltimore Development, Inc., (EBDI) was the nonprofit created to manage this initiative; EBDI is supported by public and private partners, including the U.S. government, the State of Maryland, the City of Baltimore, the Annie E. Casey Foundation, Johns Hopkins Institutions, The Harry and Jeanette Weinberg Foundation, and the Atlantic Philanthropies. When completed, the redevelopment project will include 2,100 units of mixed-income homeownership and rental housing units, 1.7 million square feet of life sciences research and office space, a new 7-acre community learning campus with an early childhood center, a public K-8 elementary school, fresh food stores and other neighborhood-serving retail amenities, green spaces, and a new community park.²⁰⁴ This is a multi-phase project that provides numerous opportunities for community development lending, investments, and services for financial institutions.

²⁰⁴ East Baltimore Development Inc. / About. N.p., n.d. Web. 17 July 2017.

²⁰³ "Vacants to Value." The Abell Foundation. N.p., n.d. Web. 17 July 2017. http://www.abell.org/publications/vacants-value.

Increasing access to affordable housing, particularly close to transit and jobs, is another priority in the assessment area. The majority of the affordable housing opportunities are in Baltimore City, yet most of the new jobs are located outside of the city, and transit options are limited. One study noted that Baltimore's affordable housing crisis is a double crisis—one crisis is rising rents, and the second is the high number of Baltimore residents living in poverty and unable to afford anything other than subsidized housing.²⁰⁵ In Baltimore City, an estimated 51.6 percent of renters in 2015 were paying more than 30.0 percent of their income for housing and are therefore considered cost-burdened; 72.0 percent of renters earning less than \$20,000 are considered cost-burdened.²⁰⁶ With nearly 35.0 percent of renters in Baltimore City living below the poverty level, much of the available private rental housing in the city is unaffordable. Therefore, not only is there a need for more affordable housing, but there is also a significant need for workforce development programs and other support services needed to help LMI individuals access and maintain jobs and to address the overall poverty crisis in the city.

The Baltimore CASH (Creating Assets Savings and Hope) Campaign is a citywide effort launched in 2001 to increase the financial security of low-income individuals and families by providing direct services and leading a coalition of partners, which include foundations, nonprofits, community-based organizations, local government, and the IRS. Since its inception, Baltimore CASH has served over 190,000 families through its free tax preparation and financial education programs, resulting in over \$200 million in refunds and tax credits. Baltimore CASH relies on financial support from local government, foundations, and financial institutions and offers many community development service opportunities, including serving as financial coaches or free tax assistance preparers, and providing leadership by serving on the various coalition committees.²⁰⁷

Finally, access to banking services has been identified as a challenge in Baltimore. In 2016, 14.5 percent of households were unbanked and 25.4 percent were underbanked, meaning they relied on alternative financial services to meet their banking needs. There are many reasons why individuals may be outside the mainstream banking system. However, a recent study noted that Baltimore County lost more than 25.0 percent of bank branches between 2008 and 2016, reducing access to financial services and potentially reducing the availability of credit in LMI communities. Therefore, there is an opportunity for banks to consider new branches or alternative delivery services to better serve communities that may be at risk of becoming "banking deserts." ²⁰⁸

CONCLUSIONS WITH RESPECT TO PERFORMANCE TESTS IN THE BALTIMORE, MARYLAND ASSESSMENT AREA

LENDING TEST

SunTrust Bank's lending performance in the Baltimore assessment area is good. The geographic distribution of loans reflects adequate penetration throughout the assessment area. Also, the distribution of borrowers reflects good penetration among borrowers of different income levels and businesses of different revenue sizes. In addition, the bank is a leader in making community development loans.

SunTrust Bank reported 6,442 (72.7 percent) HMDA-reportable loans and 2,422 (27.3 percent) CRA small business loans in the Baltimore assessment area during the review period. Therefore, HMDA-reportable lending received greater weight in determining the bank's lending test rating in the assessment area. The Baltimore assessment area accounted for 91.9 percent of SunTrust Bank's total HMDA-reportable lending in Maryland and 95.7 percent of its total statewide CRA small business lending by dollar volume during the review period. In comparison, 89.1 percent of SunTrust Bank's Maryland deposits are in this assessment area.

For the lending test analysis, lending performance in low-, moderate-, middle-, and upper-income census tracts and to low-, moderate-, middle-, and upper-income borrowers was considered for each product; however, comments for activity in middle- and upper-income tracts and to middle- and upper-income borrowers are only included when they were material to the outcome of the analyses. Details of the bank's mortgage and small business lending and information regarding lending by peers can be found in Appendix G.

Geographic Distribution of Loans

For this analysis the geographic distribution of small business and HMDA-reportable lending, including both originations and purchases, was compared with available demographic information. Performance context information and aggregate lending data were also taken into consideration. For instance, unemployment rates, poverty rates, the concentration of owner-occupied units, and the volume of small businesses in LMI census tracts were factors considered when assessing the bank's lending performance. Considering all of these factors, SunTrust Bank's geographic distribution of loans reflects adequate penetration throughout the assessment area.

Home Purchase Loans

Home purchase lending in low-income census tracts is adequate. During the review period, the bank originated 3.2 percent of its loans in low-income census tracts. The bank's amount of lending was less than the percentage of owner-occupied units in low-income tracts at 5.6 percent. However, the bank's performance was comparable to aggregate lenders during the review period.

Home purchase lending in moderate-income census tracts is also adequate. The bank's home purchase lending in moderate-income census tracts was less than the percentage of owner-occupied units in these tracts during the review period. However, the bank's performance was similar to aggregate performance in 2014 and greater than aggregate performance in 2015.

Home Refinance Loans

Home refinance lending in low-income census tracts is adequate. The percentage of home refinance loans originated in low-income census tracts was less than the percentage of owner-occupied units in these tracts; however, performance was equal to the aggregate lending performance in 2014 and slightly less than the aggregate lenders in 2015.

Home refinance lending in moderate-income census tracts is poor. SunTrust Bank originated 9.5 percent of its home refinance loans in moderate-income census tracts during the review period. As a result, the bank's performance was less than the percentage of owner-occupied units in these tracts at 16.6 percent. However, the bank's lending at 13.9 percent was comparable to the aggregate lenders in 2014 at 14.1 percent, and at 6.9 percent in 2015 was significantly less than aggregate lenders at 11.6 percent.

Home Improvement Loans

Home improvement lending in low-income census tracts is adequate. SunTrust Bank originated 5.2 percent of its home improvement loans in low-income census tracts. The bank's performance was slightly less than the percentage of owner-occupied units in these tracts at 5.6 percent. However, the bank's performance in 2014 at 6.3 percent was greater than aggregate lenders at 5.3 percent, but the bank's performance in 2015 at 4.3 percent was slightly less than aggregate lenders at 4.8 percent.

Home improvement lending in moderate-income census tracts is good. SunTrust Bank originated 17.9 percent of its home improvement loans in moderate-income census tracts. The bank's performance was slightly greater than the percentage of owner-occupied units at 16.6 percent and greater than the aggregate lenders during the review period.

Small Business Loans

Small business lending in both LMI census tracts is adequate. The percentage of small business loans in both LMI census tracts was less than the percentage of small businesses located in these tracts. However, the bank outperformed aggregate lenders in 2014, but underperformed aggregate lenders in 2015. For example, in 2015 the bank made 14.9 percent of its loans to small businesses in moderate-income tracts, which is greater than the aggregate lenders at 12.1 percent; however the bank's performance in 2015 at 7.8 percent was less than the aggregate lenders at 12.0 percent.

Lending to Borrowers of Different Incomes and Businesses of Different Sizes

The distribution of loans by borrower income or revenue size of businesses is good. For this analysis, the distribution of small business lending across business revenue sizes and HMDA-reportable lending across borrower income levels was compared to available demographic information. Performance context factors were also considered as well as the performance of other banks.

Home Purchase Loans

Home purchase lending to low-income borrowers is good. Although the bank's home purchase lending to low-income borrowers was less than the percentage of low-income families in the assessment area, SunTrust Bank performed better than aggregate lenders during the review period.

Home purchase lending to moderate-income borrowers is excellent. The bank's percentage of home purchase loans exceeded the percentage of moderate-income families in the assessment area. The bank's home purchase lending was also greater than the aggregate lending performance during the review period.

Home Refinance Loans

Home refinance lending to low-income borrowers is adequate. The bank's percentage of home refinance loans to low-income borrowers was less than the percentage of low-income families in the assessment area throughout the review period. However, SunTrust Bank's lending exceeded aggregate lenders in 2014, but was comparable to aggregate lenders in 2015.

Home refinance lending to moderate-income borrowers is good. The bank's home refinance lending to moderate-income borrowers was less than the percentage of moderate-income families in the assessment area; however, the bank's lending performance exceeded aggregate lenders during the review period.

Home Improvement Loans

Home improvement lending to both LMI borrowers is adequate. The bank's home improvement lending to both LMI borrowers was less than the percentage of LMI families in the assessment area throughout the review period. However, the bank's lending to these borrowers was greater than aggregate lenders in 2014, but less than aggregate lenders in 2015.

Small Business Loans

The distribution of small business loans to businesses of different sizes is adequate. While the percentage of small business loans to businesses with revenues of \$1 million or less was less than the percentage of small businesses in the assessment area, SunTrust Bank's performance was better than aggregate lending performance. Additionally, 93.1 percent of small business loans were originated in amounts of \$250,000 or less, indicating a willingness to lend in the smaller amounts that are typically requested by small businesses.

Community Development Lending

SunTrust Bank is a leader in making community development loans in the Baltimore assessment area. The bank originated 31 community development loans totaling \$281.6 million during the review period. Loans were responsive to many community development needs in the assessment area, including community services targeted to LMI individuals, promoting economic development by financing small businesses, and revitalizing and stabilizing low- or moderate-income geographies. The bank provided \$194 million in loans to revitalize and stabilize LMI geographies; \$46 million in support of affordable housing; \$29 million supporting community services to LMI individuals; and \$12 million for economic development activities. SunTrust Bank's community development lending exhibits excellent responsiveness to the community development and credit needs of the assessment area.

Examples of community development lending include but are not limited to:

- Two loans for \$30 million to a nonprofit organization to fund the up-front costs of a HUD Section 202 Supportive Housing for the Elderly project, which provides capital advances to finance the construction, rehabilitation, and acquisition of properties that will serve as supportive housing for very low-income elderly persons and provides rent subsidies to help make them affordable;
- Three loans for a total of \$80 million to expand a company's headquarters located in the Tide Point Enterprise Zone and create over 600 new jobs;
- A loan for \$1 million to a small business to finance the purchase of a new plant that will create 100 new jobs for LMI workers; and
- Two loans for approximately \$10 million to finance a comprehensive nursing care center that treats primarily low-income seniors and receives 70.0 percent of its revenue from Medicaid.

INVESTMENT TEST

SunTrust Bank makes an excellent level of qualified investments and grants in the Baltimore assessment area given the bank's presence and competition in the assessment area. The bank took a leadership role with several community development efforts in the assessment area, and investments demonstrated responsiveness to a number of community development needs.

The bank made investments (excluding contributions) totaling \$66.8 million in the assessment area; of that, \$25.5 million was invested during the review period. Current investments supported affordable housing for LMI individuals and revitalization and stabilization of an LMI community. The investment portfolio includes a number of investment vehicles, including, but not limited to, Low Income Housing Tax Credits, LIHTC investment funds, securities backed by government-guaranteed mortgages on multifamily properties, and bonds that finance HUD programs.

SunTrust Bank also contributed about \$1.4 million to nonprofit organizations and community development projects during the review period. Nearly all of the bank's contributions provided support to nonprofits that offer community services to LMI individuals, with limited donations to organizations engaged in affordable housing, economic development, or revitalization/stabilization. The bank's donations were responsive to the

need for many different community services, including, but not limited to, financial education and financial empowerment, access to banking services and free tax assistance, youth and education support services, mentoring, workforce development, affordable healthcare, and homeless services.

As noted earlier, the bank also had \$1.1 million in investments and \$122,000 in contributions that benefited all assessment areas in the state of Maryland.

Several noteworthy investments are highlighted below.

- \$54.5 million in seven LIHTC projects that provided about 800 affordable housing units for LMI individuals across the assessment area.
- A \$500,000 grant to a regional foundation that works to strengthen communities by providing experiential learning experiences for youth. The foundation works with local schools providing educational enrichment programs and workforce development. SunTrust is partnering with this foundation to create a financial education center in order to integrate financial education into existing programming.
- \$240,000 to support a community center located in Baltimore's largest public housing community. The center offers year-round out-of-school time programming for youth and families residing in the public housing project, including workforce development, financial education, GED classes, and many other essential community services.
- \$25,000 to a nonprofit that provides health care of the homeless in Baltimore City; the nonprofit serves 6,400 individuals each year, with more than 70,000 patient visits.

SERVICE TEST

SunTrust Bank's service test performance in the Baltimore assessment area is good based on the relatively high level of community development services and the adequate retail services performance. The accessibility of the bank's delivery systems in this assessment area was rated poor and impacted the overall retail services rating.

Retail Services

Although overall retail services are considered adequate, the bank's delivery systems may be unreasonably inaccessible to portions of the bank's geographies and individuals of different income levels in the assessment area. The distribution of 45 branch offices and 62 ATMs as of December 31, 2015, was compared to the distribution of households and businesses among the tract categories within the assessment area. The bank has two branches in low-income census tracts representing 4.4 percent of total branches in the assessment area and six branches in moderate-income census tracts representing 13.3 percent of total branches in the assessment area. For comparison purposes, 10.4 percent of households and 6.7 percent of businesses were located in low-income census tracts, and 21.3 percent of households and 13.8 percent of businesses were located in moderate-income tracts.

During the review period, no branches were opened in low- or moderate-income census tracts, but one branch was closed in a low-income census tract. Additionally, no branches were opened in middle- or upper-income census tracts, but two upper-income census tract branch locations were closed during the review period. The bank's record of opening and closing of branches generally did not adversely affect the accessibility of its delivery systems, particularly to LMI geographies and individuals in the assessment area.

The bank offers extended hours at all of its branches in LMI tracts and offers weekend hours in a majority of these branch locations. Extended and weekend hours offered in branch locations in LMI branch locations are comparable to those hours offered at branch locations in middle- and upper-income census tracts. Banking hours of operation do not vary in a way that inconveniences LMI geographies and individuals in the assessment area.

2016 FFIEC Census Data, 2010 ACS Data, and 2015 D&B Information

Closed branches/ATMs are only included in "closed" columns and are not included in any other totals.

DTO - Drive thru only is a subset of total branches

SA = Stand Alone ATM is a subset of total ATMs

Community Development Services

SunTrust Bank provides a relatively high level of community development services in the Baltimore assessment area. During the review period, SunTrust Bank employees provided 2,942 service hours in various capacities with over 80 different organizations. Bank employees provided 161 affordable housing hours, 20 economic development service hours, 20 revitalization/stabilization service hours, and 2,741 community service hours. Notably, approximately 24.3 percent of service hours were board service at community development organizations or committee memberships. Financial education hours were 28.7 percent of service activity. SunTrust employees were active in board representation on a community development organization working to prevent job losses due to urban population decline and a housing and family services organization; financial education; volunteering at an employment center; affordable housing initiatives; and a local homeless life skills program. The bank's community development services performance is good given SunTrust Bank's size and market share in the assessment area and the opportunities that exist for community development service.

The following metropolitan assessment areas were reviewed using limited-scope examination procedures.

DESCRIPTION OF INSTITUTION'S OPERATIONS IN THE <u>MARYLAND</u> METROPOLITAN ASSESSMENT AREAS

- Salisbury Assessment Area (Wicomico and Worcester counties)
 - o As of December 31, 2015, SunTrust Bank operated two branches in the assessment area, representing 3.9 percent of its branches in **Maryland**.
 - o As of June 30, 2015, the bank had \$90.4 million in deposits in this assessment area, representing a market share of 2.9 percent and 3.6 percent of SunTrust Bank's total deposits in **Maryland**.
- St. Mary's Assessment Area (St. Mary's County)
 - o As of December 31, 2015, SunTrust Bank operated two branches in the assessment area, representing 3.9 percent of its branches in **Maryland**.
 - o As of June 30, 2015, the bank had \$96.6 million in deposits in this assessment area, representing a market share of 7.7 percent and 3.8 percent of SunTrust Bank's total deposits in **Maryland**.

CONCLUSIONS WITH RESPECT TO PERFORMANCE TESTS

Through the use of available facts and data, including performance and demographic information, each assessment area's performance was evaluated and compared with the bank's performance in the state. The conclusions regarding performance are provided in the table below. Please refer to the tables in Appendix H for information regarding these areas.

	Metropolitan Assessment Areas											
Assessment Areas Lending Test Investment Test Service Test												
Salisbury	Not Consistent (Below)	Consistent	Not Consistent (Below)									
St. Mary's	Not Consistent (Below)	Not Consistent (Below)	Not Consistent (Below)									

For the lending test, SunTrust Bank received a High Satisfactory rating for the State of Maryland. Performance in both limited-scope metropolitan assessment areas was weaker than the bank's performance in the state; however, the performance in both assessment areas was still considered adequate. Community development lending in the Salisbury assessment area was considered excellent.

For the investment test, SunTrust Bank received an Outstanding rating for the State of Maryland. Performance in the Salisbury assessment area was consistent with the bank's performance in the state, while the performance in the St. Mary's metropolitan assessment area was weaker.

For the overall service test, SunTrust Bank received a rating of High Satisfactory for the State of Maryland. Service test performance in the Salisbury and St. Mary's assessment areas was weaker than the bank's performance for the state due to limited community development service hours in these assessment areas. Additionally, retail banking services were weaker in the Salisbury and St. Mary's assessment areas.

The performance in the metropolitan limited-scope assessment areas did not affect the overall state rating.

The following nonmetropolitan assessment areas were reviewed using limited-scope examination procedures.

DESCRIPTION OF INSTITUTION'S OPERATIONS IN THE <u>MARYLAND</u> NONMETROPOLITAN ASSESSMENT AREAS

• Eastern Shore of Maryland Assessment Area (Dorchester and Talbot counties)

- o As of December 31, 2015, SunTrust Bank operated two branches in the assessment area, representing 3.9 percent of its branches in **Maryland**.
- o As of June 30, 2015, the bank had \$61.2 million in deposits in this assessment area, representing a market share of 3.1 percent and 2.4 percent of SunTrust Bank's total deposits in **Maryland**.

• Kent Assessment Area (Kent County)

- o As of December 31, 2015, SunTrust Bank operated no branches in the assessment area as a result of closing one branch during the review period.
- o As of June 30, 2015, the bank had \$25.8 million in deposits in this assessment area, representing a market share of 4.6 percent and 1.0 percent of SunTrust Bank's total deposits in **Maryland**.

CONCLUSIONS WITH RESPECT TO PERFORMANCE TESTS

Through the use of available facts and data, including performance and demographic information, each assessment area's performance was evaluated and compared with the bank's performance in the state. The conclusions regarding performance are provided in the table below. Please refer to the tables in Appendix H for information regarding these areas.

	Nonmetropolitan Assessment Areas												
Assessment Areas Lending Test Investment Test Service Test													
Eastern Shore of Maryland	Not Consistent (Below)	<u>Consistent</u>	Not Consistent (Below)										
Kent	Not Consistent (Below)	Not Consistent (Below)	Consistent										

Lending test performance in both limited-scope nonmetropolitan assessment areas was weaker than SunTrust Bank's performance in the state; however, the performance in both assessment areas was still considered adequate. Weaker performance was due to the absence of community development lending in these assessment areas. The poor geographic distribution of loans was an additional factor contributing to weaker performance in the Eastern Shore of Maryland assessment area.

For the investment test, performance in the Eastern Shore of Maryland assessment area was consistent with SunTrust Bank's performance in the state while performance in the Kent assessment area was weaker due to lower levels of qualified investments relative to the bank's operations in the assessment area.

For the overall service test, performance in the Eastern Shore of Maryland assessment area was weaker than statewide performance, while performance in the Kent assessment area was consistent. Community development services in the Eastern Shore of Maryland and Kent assessment areas were weaker than the state. Additionally, retail banking services were weaker than the state in the Eastern Shore of Maryland.

The performance in the nonmetropolitan limited-scope assessment areas did not affect the overall state rating.

CRA RATING FOR NORTH CAROLINA: <u>SATISFACTORY</u>

The Lending Test is rated:

The Investment Test is rated:

High Satisfactory

High Satisfactory

High Satisfactory

Major factors supporting the rating include the following:

- The geographic distribution of loans reflects adequate penetration throughout the assessment areas, and the distribution of loans by borrower income reflects good penetration among customers of different income levels and businesses of different revenue sizes.
- The bank makes a relatively high level of community development loans in its North Carolina assessment areas given its presence in these markets.
- The bank provides a significant level of qualified community development investments and grants
 that are responsive to several identified community development needs of the North Carolina
 assessment areas.
- Retail services are reasonably accessible to the bank's geographies and individuals of different income levels in the assessment areas.
- The bank is a leader in providing community development services throughout the assessment areas.

SCOPE OF EXAMINATION

A full-scope review was conducted for the following assessment areas in the State of North Carolina:

Durham
 Greensboro

Limited-scope reviews were conducted for the remaining 13 assessment areas:

- Asheville
- Brunswick
- Burlington
- Cleveland (non-MSA)
- Granville (non-MSA)
- Harnett Moore (non-MSA)
- Hickory

- Jackson (non-MSA)
- Raleigh
- Stanly (non-MSA)
- Wilkes (non-MSA)
- Wilmington
- Winston-Salem

The time period, products, and affiliates evaluated for these assessment areas are consistent with the scope discussed in the institution section of this report.

DESCRIPTION OF INSTITUTION'S OPERATIONS IN NORTH CAROLINA

As of June 30, 2015, SunTrust Bank had \$5.9 billion in deposits in North Carolina accounting for 4.2 percent of SunTrust's total deposits. The bank operated 109 branch offices in North Carolina as of December 31, 2015, representing 7.6 percent of the bank's total branches. HMDA-reportable lending in the state accounted for 8.3 percent of total institutional HMDA-reportable lending by number of loans, and CRA small business lending in the state accounted for 6.4 percent of the bank's total CRA small business lending. Overall, HMDA-reportable and CRA small business lending in North Carolina accounted for 7.0 percent of the bank's total lending activity by dollar volume, which was greater than the percentage of total deposits at 4.2 percent.

The following table shows lending activity from January 1, 2014, through December 31, 2015.

Statewide Summary of Lending Activity

Assessment Areas Located in North Carolina

Loan Type	#	%	\$ (000s)	%

Originations and Purchases

CONCLUSIONS WITH RESPECT TO PERFORMANCE TESTS IN NORTH CAROLINA

LENDING TEST

The lending test rating in North Carolina is high satisfactory. Overall, performance in the state with regard to the geographic distribution of loans reflects adequate penetration throughout the assessment areas, and the distribution of loans by borrower income reflects good penetration among customers of different income levels and businesses of different sizes. Additionally, the bank makes a relatively high level of community development loans in the state given its market presence.

During the review period, SunTrust reported 9,143 HMDA-reportable loans and 4,813 small business loans in North Carolina. As such, HMDA-reportable lending was given greater weight when determining the lending test rating for the state. The state rating is based on the Durham and Greensboro full-scope assessment areas. Approximately 30.7 percent of the bank's statewide HMDA-reportable and small business lending occurred within these assessment areas.

Details of the bank's HMDA-reportable and small business lending and information regarding lending by peers can be found in Appendix G.

Geographic and Borrower Distribution

The geographic distribution of SunTrust's HMDA-reportable and small business loans is adequate, and the distribution of loans by borrower income and revenue size of businesses is good. As noted above, the rating for the state of North Carolina is derived from the Durham and Greensboro assessment areas. A detailed discussion of the borrower and geographic distribution of lending for these assessment areas is included in the next sections of this report.

Community Development Lending

SunTrust Bank makes a relatively high level of community development loans in the state of North Carolina. The bank originated 44 community development loans totaling \$296.2 million in North Carolina during the review period, including 19 loans for \$85.4 million in the Durham and Greensboro full-scope assessment areas. Performance in Durham was good, while performance in Greensboro was adequate. Overall, this level of statewide community development lending is considered good based on the bank's size and presence in its North Carolina assessment areas and the availability of community development lending opportunities. More information on community development loans can be found in the full-scope assessment area sections of this report.

INVESTMENT TEST

The investment test rating for North Carolina is high satisfactory.

The bank made a significant level of qualified investments and contributions totaling \$83.9 million that directly benefited the North Carolina assessment areas; of that total, \$74.1 million was invested during the review period. The bank's investment portfolio for the state included direct LIHTC and NMTC project investments, LIHTC investment funds, mortgage-backed securities and other bonds, and \$669,000 in contributions to nonprofits engaged in a variety of community development activities. The bank also had \$26.7 million in investments that benefited the broader statewide area, including all of the bank's assessment areas. Most of the statewide investments remain on the books from prior review periods and are largely SBA and HUD bonds, and mortgage-backed securities. Statewide investments include contributions of \$371,000 to organizations that serve the entire state, providing affordable housing, legal aid, and other community services for LMI individuals. Lastly, the state benefited from approximately \$30.8 million invested in SBICs and real estate investment funds that serve a broader regional area, including all assessment areas in the state of North Carolina.

Durham and Greensboro were the two full-scope assessment areas reviewed. Approximately 14.0 percent of total statewide investments benefitted the Durham assessment area compared to 31.0 percent of statewide deposits in this market while investments in Greensboro represented 4.0 percent of statewide investments versus 18.0 percent of statewide deposits. Performance was adequate in both Durham and Greensboro. The bank's investment performance in limited-scope assessment areas was generally stronger than the full-scope assessment areas, with the level of investment activity considered excellent in 6 of 13 limited-scope assessment areas. Strong limited-scope performance positively impacted the overall state investment test rating.

Due to the bank's overall state rating of high satisfactory, the bank was considered responsive to assessment area credit and community development needs. Therefore, positive consideration was given to a \$5.1 million NMTC investment for a project outside the bank's North Carolina assessment areas. The bank's investment will support the expansion of an existing manufacturing business located along the state line in North Carolina that will help stabilize a rural community by retaining and creating regional employment opportunities in both Virginia and North Carolina.

Additional details regarding specific investments and contributions can be found in the full-scope assessment area sections, and a summary of the bank's investments and contributions for all assessment areas can be found in Appendix F.

SERVICE TEST

The service test rating for North Carolina is high satisfactory.

Retail Services

Delivery systems, including ATMs and branch office locations, are reasonably accessible to the bank's geographies and individuals of different income levels in the assessment areas. The bank's record of opening and closing of branches has generally not adversely affected the accessibility of its delivery systems, particularly to LMI geographies or LMI individuals. Overall, banking services and hours of operation do not vary in a way that inconveniences the assessment areas, including LMI geographies or LMI individuals. Additional detail on the bank's retail services can be found in the full-scope assessment area sections of this report.

Community Development Services

SunTrust Bank is a leader in providing community development services that benefit LMI residents and small businesses in North Carolina. The bank provided a total of 7,060 qualified service hours during the examination period, including 2,261 total hours in the Durham and Greensboro full-scope assessment areas. Performance in Durham, the largest full-scope assessment area in the state, was excellent, while performance in Greensboro was good. Notably, employees engaged in 4,496 service hours in limited-scope assessment areas. Performance in limited-scope assessment areas was generally comparable to full-scope performance, with 6 limited-scope assessment areas exhibiting good or excellent performance, 4 adequate, and 4 with poor or very poor performance. Additionally, the bank had 300 community development service hours with statewide organizations that served all of the bank's assessment areas in the state; employees provided leadership with multiple statewide entities including economic development, affordable housing, and financial education organizations. This performance is considered excellent given SunTrust Bank's size and presence in the state of North Carolina and the opportunities that exist for community development service.

Additional detail on the bank's retail and community development services can be found in the full-scope assessment area sections of this report.

METROPOLITAN AREA

(Full Scope Review)

DESCRIPTION OF INSTITUTION'S OPERATIONS IN THE DURHAM, NORTH CAROLINA ASSESSMENT AREA

Overview

The Durham, North Carolina assessment area consists of Chatham, Durham, Orange, and Person counties, which make up the entire Durham-Chapel Hill MSA. As of December 31, 2015, SunTrust operated 26 branch offices in the assessment area, which represent 23.9 percent of the branches statewide. Additionally, Durham represents the largest concentration of deposits and the 2nd largest combined HMDA-reportable and CRA small business lending in the state.

The Durham assessment area is a competitive market occupied by national and regional banks. According to the June 30, 2015 FDIC Summary of Deposits Report, SunTrust Bank ranks 3rd out of 19 financial institutions operating in the assessment area with a 16.5 percent deposit market share. The top two financial institutions by deposit market share are Square 1 Bank with 31.9 percent, followed by Wells Fargo Bank with 16.9 percent.

SunTrust Bank and SunTrust Mortgage combined had an average of 6.4 percent of total HMDA-reportable lending in both 2014 and 2015. STB ranked 11th while STM ranked 4th out of the 371 HMDA lenders in the market in 2014. In 2015, both STM and STB dropped slightly in ranking. Wells Fargo Bank was the leading HMDA lender in the market in 2015, followed by State Employees Credit Union, Corporate Investors Management Group, and BB&T.

SunTrust Bank ranked 4th out of 83 CRA lenders in 2015 with 7.6 percent of the loans. American Express Bank was the dominant CRA lender in the market. Wells Fargo Bank and BB&T were the other leading CRA lenders in the market.

Population and Income Characteristics

The total population in the assessment area for 2015 was 534,154. Durham County accounts for most of the population, with 288,817 residents.²⁰⁹ Between 2010 and 2015, the combined population growth in Durham County was 7.9 percent; the population growth in the city of Durham, the largest city in the assessment area, was 7.8 percent. Population growth for Chapel Hill, the second largest city, was 2.7 percent.²¹⁰ Duke University and the University of North Carolina at Chapel Hill are two significant institutions within the assessment area.

The assessment area is made up of 108 census tracts: 14 tracts (13.0 percent) are low-income, 23 tracts (21.3 percent) are moderate-income, 34 tracts (31.5 percent) are middle-income, 34 tracts (31.5 percent) are upper-income, and 3 tracts (2.8 percent) have unknown income levels.

 210 Ibid

²⁰⁹ US Census Bureau. Accessed through PolicyMap. Available at: www.policymap.com. Accessed June 20, 2017.

For purposes of classifying borrower income, this evaluation uses the FFIEC estimated median family income. The following table sets forth the estimated median family income in 2014 and 2015 for the Durham-Chapel Hill MSA and shows that the median family income increased by \$1,700 between 2014 and 2015.

Borrower Income Levels Durham-Chapel Hill, NC MSA

FFIEC Estimated Median Family Income		Low			Moderate			ľ	Midd	lle	Upper			
		0	-	49.99%	50%	-	79.99%	80%	-	119.99%	120%	-	& above	
2014	\$65,700	0	-	\$32,849	\$32,850	-	\$52,559	\$52,560	-	\$78,839	\$78,840	-	& above	
2015	\$67,400	0	-	\$33,699	\$33,700	-	\$53,919	\$53,920	-	\$80,879	\$80,880	-	& above	

Poverty and financial instability are concerns throughout the assessment area. The percentage of people living in poverty increased between 2009 and 2015 throughout the assessment area. In 2015, the poverty rate for the assessment area was 17.0 percent, which was slightly lower than the state rate of 17.4 percent. The poverty rate in the city of Durham is even higher at 19.2 percent.²¹¹ In the assessment area, 40.1 percent of families are considered LMI. 37.1 percent of families living in low-income tracts and 15.0 percent of families in moderateincome tracts have incomes below the poverty level, which may limit lending opportunities.

Economic Conditions

The Durham MSA includes Research Triangle Park, Duke University, the University of North Carolina at Chapel Hill, and North Carolina Central University. These institutions provide a strong employment base for the community and employment opportunities for residents of the community as well as individuals from other counties in the surrounding region. The Durham MSA has successfully transformed its business and economic landscape from one based on tobacco and textile products to a modern, cutting-edge economy. The Research Triangle Park is one of the largest research parks in the world, home to more than 200 global companies including IBM, GlaxoSmithKline, RTI International, and Cisco.

Economic conditions in the Durham MSA continue to strengthen. In March 2017, nonfarm payrolls in the MSA had increased by 6,967 jobs, or 2.3 percent, relative to the year before, for a total of 306,300 jobs. By comparison, payrolls increased by 5,233 jobs, or 1.8 percent, from March 2015 to March 2016.²¹² Employment in the assessment area is diversified among the following industries: life sciences (including pharmaceuticals, human and agricultural biotechnology, and medical instruments), financial services, IT, hospitality and retail,

²¹¹ Ibid

²¹² "Market at a Glance." HUD PD&R / Economic & Market Analysis Division (EMAD) Southeast/Caribbean Regional Office. N.p., n.d. Web. 17 May 2017. https://www.huduser.gov/portal/ushmc/mag.html

electronics/green technology, education, and transportation. It is worth noting that the transportation and hospitality and retail trade sectors accounted for only 8.0 percent of jobs created in 2013 for a total of 367 jobs.²¹³

The largest employers in the assessment area are Duke University and Duke University Health System, IBM, Durham Public Schools, GlaxoSmithKline, and Blue Cross & Blue Shield of North Carolina²¹⁴ Life science has seen increases in medical-related research and product development, but funding cuts at the national level may require a more entrepreneurial approach to its development and commercialization. Technology is rapidly evolving, and Durham has been one of the leaders in creating a technology entrepreneurial ecosystem that continues to generate startups and related talent. Finding ways to appropriately scale these startups is important to the continued success of this sector.²¹⁵

According to 2015 Dun & Bradstreet information, there were 26,069 businesses within the Durham assessment area, 93.3 percent of which had total annual revenues less than or equal to \$1 million and were therefore considered to be small businesses. 5.7 percent of businesses were located in low-income tracts, while 19.9 percent of businesses were located in moderate-income tracts. Small business lending continued to improve during the review period. The number of loans to small businesses increased by 33.6 percent between 2013 and 2015 in Durham County and 24.2 percent in Orange County. In 2015, loans made to firms with revenues under \$1.0 million represented 57.4 percent of total small business loans in Durham County and 58.2 percent in Orange County. This lending activity is an increase from previous years and an indication that there may be fewer obstacles for smaller firms to access credit in the market.²¹⁶

The unemployment rate in the assessment area has decreased significantly since 2010, when the rate was 8.1 percent. As shown in the following chart, the unemployment rate in the Durham assessment area continued to trend downward in 2015 and at 5.0 percent was lower than the unemployment rate for the state at 5.7 percent.

Unemployment Rates - NC Durham

Not Seasonally Adjusted. Source: Bureau of Labor Statistics

Census data indicates there were approximately 217,889 housing units located in the assessment area, 55.0 percent of which were owner-occupied, 34.7 percent were rental units, and 10.3 percent were vacant. Rental and vacant units represent a disproportionate share of housing in LMI tracts. These factors suggest that lending may be more challenging in LMI areas than in other areas.

The Durham housing market has experienced a steady rise in home sales and home values since early 2012. The median home price for Durham County in December 2015 was approximately \$206,000, representing an increase of 10.6 percent from December 2013.²¹⁷ For the 12 months ending December 2015, annual home sales increased by 18.0 percent, and home values appreciated by 4.0 percent. In terms of affordability, the Durham assessment area had a Housing Affordability Index (HAI) of 122.0. The affordability index measures how affordable the median home price is to households earning the median income, assuming current mortgage rates. A baseline of 100 indicates that median home prices are in line with median household income; an index greater than 100 indicates the housing is more affordable.²¹⁸ For existing homeowners in the assessment area, just over 23.0 percent are considered cost-burdened, meaning homeownership or rental costs account for more than 30.0 percent of household income. For comparison, in markets such as Tampa and Atlanta, about half of the residents are considered cost-burdened.²¹⁹

²¹⁸ Ibid

²¹⁹ "Durham, NC." GIS Mapping and Geographic Information System Data. The Reinvestment Fund, n.d. Web.22 June 2017. http://www.policymap.com/

Renters in the assessment area are far more cost-burdened than homeowners; over 46.0 percent of renters in Durham and Orange counties are cost-burdened.²²⁰ A report by the National Low Income Housing Coalition confirmed that housing affordability is a problem for renters in the Durham MSA. According to the study, in 2016, a minimum wage worker would have to work 104 hours a week in order to afford the fair market rent (\$978) for a two-bedroom apartment in the area. A renter would need an hourly wage of \$18.81 to be able afford a two-bedroom rental.²²¹

Demographic Characteristics by Census Tract

The following table based on 2015 FFIEC Census Data and 2015 Dun & Bradstreet information presents key demographic and business information used to help develop a performance context for the assessment area.

Credit and Community Development Needs

To better understand the community development and economic landscapes, community development experts were contacted. These individuals discussed the various opportunities and challenges across the region as well as how financial institutions can be responsive to local community development needs through lending, investment and/or service activities. Bank management also provided input on the performance context issues impacting the assessment area.

As previously noted, despite being home to several universities and a highly educated workforce, the assessment area's poverty rate and the people living below the poverty level are a concern in the area. It is essential that community development organizations provide community services in areas with a large percentage of very LMI residents in order for many of them to meet their basic living needs. In addition, it is important that local leaders and organizations collaborate to develop ways to address and counter the cycle of poverty in the area. Several organizations in the Durham assessment area are taking steps to do this by providing Individual Development Account (IDA) Programs and Taxpayer Opportunity Network VITA Programs. These organizations include the Durham Regional Community Development Group, Self Help Credit Union, Partners for Youth Opportunity, and Durham Kids Save. The Durham Kids Save program allows for parents and children at local elementary schools to contribute money to a savings account, and the program matches deposits made 1:1 up to \$100 each year. This children's savings initiative has an element of financial education while helping families begin saving for college and matches funds through the fifth grade. Similarly, the Durham Regional Community Development Group has a down payment assistance program which matches IDA funds and secondary mortgage funds for first-time homebuyers to use towards down payment and closing costs, without repayment. Financial institutions can collaborate with these organizations to support these programs to address poverty and financial instability in the assessment area.

During the review period, SunTrust Bank's community development lending activity supported the Self Help Ventures Fund, which is affiliated with and supports Self Help Credit Union. The nonprofit loan fund is capitalized with loans and grants from foundations, religious organizations, corporations, and government sources. It manages the organization's higher-risk business loans, real estate development, and home loan secondary market programs. The mission of the Self Help family of nonprofits is to create and protect ownership and economic opportunity for all by providing responsible financial services, lending to small businesses and nonprofits, developing real estate, and promoting fair financial practices.

According to Prosperity Now data, 57.0 percent of Durham County residents have subprime credit scores.²²² This is yet another obstacle for LMI borrowers to overcome in building assets and becoming first-time homebuyers. This coupled with the percentage of cost-burdened renters, yields opportunities for financial institutions to get involved and be responsive to community development needs. Programs that offer financial education and assist LMI residents in rebuilding credit would be responsive to community development needs in the assessment area.

_

²²² "Prosperity Now Formerly CFED." Durham Local Assets & Opportunity Profile | Prosperity Now. N.p., Mar. 2012. Web. 26 June 2017. https://prosperitynow.org/resources/durham-local-assets-opportunity-profile.

Information and opportunities shared by community contacts are highlighted below:

- An affordable housing community contact noted that her organization sold mortgage loans to financial institutions and that the continued purchase of these loans would be a good way to allow the organization to continue its work in creating and financing affordable housing.
- One community contact specializing in small business and entrepreneur support services stated that
 financial institutions support organizations like his by providing technical expertise in the form of
 community development services and often help by performing credit analyses and serving on loan
 review committees that make credit accessible.

CONCLUSIONS WITH RESPECT TO PERFORMANCE TESTS IN THE DURHAM, NORTH CAROLINA ASSESSMENT AREA

LENDING TEST

SunTrust Bank's lending performance in the Durham assessment area is adequate. The geographic distribution of loans reflects adequate penetration throughout the assessment area. Also, the distribution of borrowers reflects good penetration among borrowers of different income levels and businesses of different revenue sizes. In addition, the bank makes a relatively high level of community development loans.

SunTrust Bank reported 1,745 (60.3 percent) HMDA-reportable loans and 1,150 (39.7 percent) CRA small business loans in the Durham assessment area during the review period. Therefore, HMDA-reportable lending received greater weight in determining the bank's lending test rating in the assessment area. The Durham assessment area accounted for 22.1 percent of SunTrust Bank's total HMDA-reportable lending in North Carolina and 21.4 percent of its total statewide CRA small business lending by dollar volume during the review period. In comparison, 31.1 percent of SunTrust Bank's North Carolina deposits are in this assessment area.

For the lending test analysis, lending performance in low-, moderate-, middle-, and upper-income census tracts and to low-, moderate-, middle-, and upper-income borrowers was considered for each product; however, comments for activity in middle- and upper-income tracts and to middle- and upper-income borrowers are only included when they were material to the outcome of the analyses. Details of the bank's mortgage and small business lending and information regarding lending by peers can be found in Appendix G.

Geographic Distribution of Loans

For this analysis the geographic distribution of small business and HMDA-reportable lending, including both originations and purchases, was compared with available demographic information. Performance context information and aggregate lending data were also taken into consideration. For instance, unemployment rates, poverty rates, the level of owner-occupied units, and the volume of small businesses in LMI census tracts were issues considered when assessing the bank's lending performance. Considering all of these factors, SunTrust Bank's geographic distribution of loans reflects adequate penetration throughout the assessment area.

Home Purchase Loans

Home purchase lending in low-income census tracts is poor. The bank's home purchase lending in low-income census tracts was less than the percentage of owner-occupied units in those tracts throughout the review period. SunTrust Bank originated 1.9 percent of its home purchase loans in low-income census tracts, where 3.2 percent of owner-occupied units are located. Moreover, SunTrust Bank's performance was less than the aggregate performance in low-income census tracts in 2014, but similar to aggregate performance in 2015.

Home purchase lending in moderate-income census tracts is also poor. The bank's home purchase lending in moderate-income census tracts was less than the percentage of owner-occupied units in moderate-income census tracts. SunTrust Bank originated 9.8 percent of its home purchase loans in moderate-income census tracts, where 17.1 percent of owner-occupied units are located. Additionally, the bank's performance was less than aggregate lenders during the review period.

Home Refinance Loans

Home refinance lending in low-income census tracts is poor. The bank's lending performance in low-income census tracts was less than the percentage of owner-occupied units located in low-income census tracts. However, the bank's performance was similar to the aggregate performance in 2014, but less than the aggregate performance in 2015.

Home refinance lending in moderate-income census tracts is adequate. Lending performance in moderate-income census tracts was less than the percentage of owner-occupied units located in moderate-income census tracts. However, the bank's lending was slightly greater than aggregate lending performance in 2014, but less than aggregate performance in 2015.

Home Improvement Loans

Home improvement lending in low-income census tracts is adequate based on eight loan originations during the review period. Lending performance in low-income census tracts was slightly greater than the percentage of owner-occupied units located in low-income census tracts. However, SunTrust Bank's home improvement lending in these tracts was less than aggregate lending performance during the review period.

Home improvement lending in moderate-income census tracts is good. SunTrust Bank's home improvement lending in moderate-income census tracts was greater than the percentage of owner-occupied units in those tracts during the review period. Additionally, SunTrust Bank's performance was greater than the aggregate lenders during the review period.

Small Business Loans

Small business lending in low-income census tracts is adequate. The percentage of small business loans in low-income census tracts was similar to the distribution of small businesses operating in low-income census tracts. However, the bank's performance was greater than aggregate lending performance in 2014, but less than the aggregate lending performance in 2015.

Small business lending in moderate-income census tracts is good. The percentage of small business loans in moderate-income census tracts was greater than the distribution of small businesses operating in moderate-income census tracts. The bank's performance substantially exceeded aggregate lending performance in 2014, but was comparable to aggregate lending performance in 2015.

Lending to Borrowers of Different Incomes and Businesses of Different Sizes

The distribution of loans by borrower income or revenue size of businesses is good. For this analysis, the distribution of small business lending across business revenue sizes and HMDA-reportable lending across borrower income levels was compared to available demographic information. Performance context issues were also considered as well as the performance of other banks.

Home Purchase Loans

Home purchase lending to low-income borrowers is poor. During the review period, low-income families represented 23.2 percent of total families and received only 4.1 percent of the bank's home purchase loans. Additionally, the distribution of the bank's loans to low-income borrowers was less than aggregate lenders for both years.

Home purchase lending to moderate-income borrowers is good. SunTrust Bank's lending to moderate-income borrowers was slightly greater than the percentage of moderate-income families in the assessment area. However, the distribution of the bank's home purchase loans was comparable to aggregate lending in 2014, but greater than aggregate lending in 2015.

Home Refinance Loans

Home refinance lending to low-income borrowers is good. Although the percentage of home refinance loans to low-income borrowers was considerably less than the percentage of low-income families in the assessment area, the bank's lending performance was greater than aggregate lending performance during the review period.

Home refinance lending to moderate-income borrowers is also good. The percentage of home refinance loans to moderate-income borrowers was less than the percentage of moderate-income families in the assessment area. However, the bank originated 16.4 percent of its home refinance loans to moderate-income borrowers, compared to the aggregate at 13.1 percent in 2014. The bank's lending performance was similar to aggregate lending in 2015.

Home Improvement Loans

Home improvement lending to LMI borrowers is excellent. The bank's home improvement lending to LMI borrowers was greater than the percentage of LMI families in the assessment area. Moreover, SunTrust Bank outperformed aggregate lenders during the review period.

Small Business Loans

The distribution of small business loans to businesses of different sizes is good. The bank's lending to small businesses exceeded the aggregate in both 2014 and 2015, but was below the percentage of small businesses in the assessment area during the review period. However, of the 1,150 small business loans originated during the review period, 1,089 (94.7 percent) were in amounts of \$250,000 or less, which typically represent loan amounts requested by very small businesses.

Community Development Lending

SunTrust Bank makes a relatively high level of community development loans in the Durham assessment area. The bank originated 15 community development loans totaling \$72.3 million during the review period. Loans were responsive to many community development needs in the assessment area, including community services targeted to LMI individuals, promoting economic development by financing small businesses, and revitalizing and stabilizing low- or moderate-income geographies. The bank provided \$42.4 million in loans to revitalize and stabilize LMI geographies; \$28.6 million in support of community services to LMI individuals; and \$1.2 million towards economic development activities. SunTrust Bank's community development lending exhibits good responsiveness to the community development and credit needs of the assessment area.

Examples of community development lending include but are not limited to:

- Two loans for \$17.4 million to finance a NMTC project to rehabilitate an abandoned tobacco warehouse located in a targeted redevelopment and North Carolina Urban Progress Zone area and convert it into an office space;
- A loan for \$500,000 to a nonprofit organization for the construction of a new men's shelter with the mission of providing shelter, food, direct services, advocacy, and information to people in need; and
- A \$1.2 million SBA 504 loan to a small business for the purpose of constructing a new warehouse.

INVESTMENT TEST

SunTrust Bank makes an adequate level of qualified investments and grants in the Durham assessment area relative to the bank's presence in the assessment area and community development investment opportunities.

The bank made investments (excluding contributions) totaling \$11.6 million in the assessment area; of that, \$7.4 million was invested during the review period, and all current investments supported affordable housing for LMI individuals. The remaining investment portfolio in Durham included securities backed by government-guaranteed mortgages on multifamily properties, bonds to finance HUD projects, and LIHTC funds.

SunTrust Bank also contributed \$135,500 to nonprofit organizations and community development projects during the review period. Specifically, the bank provided grants totaling \$125,000 to nonprofits that offer community services to LMI individuals and \$10,500 for affordable housing. Additionally, the bank also gave nearly \$280,000 to a United Way affiliate that serves the broader Triangle region, including the Durham

assessment area. The bank's donations responded to the need for community services and assisted organizations that provide programs involving the homeless, workforce development, educational and youth support services, literacy programs, access to affordable medicine and healthcare, and other needed community services.

The Durham assessment area was also positively impacted by investments and contributions to organizations that served all markets in the state, described in the state overview section of the report.

Notable investments include:

- An investment of approximately \$1.9 million in an NMTC fund that is providing financing for Habitat for Humanity affiliates in selected markets (including Durham) to develop and sell homes to LMI borrowers. This investment fund is an innovative approach utilizing the NMTC program to creating more liquidity for Habitat for Humanity affiliates, allowing them to expand the reach of their programs and to provide more housing opportunities to low-income homeowners; and
- A \$10,000 grant to a nonprofit organization, working in partnership with the Duke University Homebuyers Club, to provide the match funding for an IDA program for first-time homebuyers.

SERVICE TEST

SunTrust Bank's service test performance in the Durham assessment area is good based on the accessibility of the bank's retail services and its leadership in providing community development services.

Retail Services

Delivery systems are reasonably accessible to the bank's geographies and individuals of different income levels in the Durham assessment area. The distribution of 26 branch offices and 44 ATMs as of December 31, 2015, was compared to the distribution of households and businesses among the tract categories within the assessment area. The bank has one branch in a low-income census tract, representing 3.9 percent of total branches in the assessment area, and eight branches in moderate-income census tracts, representing 30.8 percent of total branches in the assessment area. For comparison purposes, 8.5 percent of households and 5.7 percent of businesses were located in low-income census tracts, and 21.8 percent of households and 19.9 percent of businesses were located in moderate-income tracts. During the review period, no branches were opened or closed in low- or moderate-income census tracts. However, two branches were opened and three branches were closed in middle- and upper-income census tracts. The bank's record of opening and closing of branches has generally not adversely affected the accessibility of its delivery systems, particularly to LMI geographies or LMI individuals in the assessment area.

SunTrust Bank offers extended hours in all of its branches in LMI tracts and only offers weekend hours in a small portion of these locations. However, extended and weekend hours offered in branch locations in LMI tracts are comparable to those hours offered at branch locations in middle- and upper-income census tracts. Banking hours of operation and services do not vary in a way that inconveniences the assessment area, particularly LMI geographies or LMI individuals.

SA = Stand Alone ATM is a subset of total ATMs

Community Development Services

SunTrust Bank is a leader in providing community development services in the Durham assessment area. During the review period, SunTrust Bank employees provided 1,628 service hours in various capacities with over 50 different community development organizations. Bank employees provided 342 affordable housing hours, 6 economic development hours, and 1,280 community service hours. Financial education hours were approximately 15.7 percent of service activity. Notably, approximately 20.1 percent of service hours were board service at community development organizations or committee memberships.

SunTrust employees were active in providing a variety of services to a diverse group of local organizations. Bank employees served on the boards of a workforce development agency for LMI women, a single-family affordable housing development and homeownership organization, and a workforce development organization; supported a homeless shelter; and helped to provide books to LMI youth through support of an arts education initiative. The bank also initiated a partnership with a local university to support the educational institution's LMI employees with home buyer education and assistance. The impact of this partnership resulted in four employee home purchases, six mortgage qualifications, and three applications for affordable housing programs. The bank's performance is excellent given SunTrust Bank's size and market share in the Durham assessment area and the opportunities that exist for community development service.

METROPOLITAN AREA

(Full Scope Review)

DESCRIPTION OF INSTITUTION'S OPERATIONS IN THE GREENSBORO, NORTH CAROLINA ASSESSMENT AREA

Overview

The Greensboro assessment area consists of Guilford and Randolph counties, which are two of the three counties that make up the Greensboro-High Point, North Carolina MSA. As of December 31, 2015, SunTrust operated 13 branches in the assessment area, which represent 11.9 percent of the branches statewide and 18.4 percent of its deposits in North Carolina. Additionally, the Greensboro assessment area represents the fourth largest concentration of combined HMDA-reportable and CRA small business lending at 10.0 percent in the state.

The Greensboro assessment area is a highly competitive market dominated by national and regional banks. According to the June 30, 2015 FDIC Summary of Deposits Report, SunTrust Bank ranks 4th out of 22 financial institutions operating in the assessment area with 10.2 percent deposit market share. The top financial institution by deposit market share is BB&T with 18.9 percent, followed by Wells Fargo Bank and Bank of America.

SunTrust Bank and SunTrust Mortgage combined had an average of 3.4 percent of total HMDA-reportable lending in both 2014 and 2015. STB ranked 24th while STM ranked 8th out of the 338 HMDA lenders in the market in 2014. In 2015, STB dropped in ranking to 29th place while STM remained the same. Wells Fargo Bank was the leading HMDA lender in the market in 2015, followed by State Employees Credit Union, Quicken Loans, and BB&T.

SunTrust Bank ranked 12th out of 77 CRA lenders in 2015 with 2.4 percent of the CRA loans. American Express Bank, BB&T, Wells Fargo Bank, and CitiBank NA were the dominant CRA lenders in the market. The bank originated 290 CRA loans in 2015, a 101.4 percent increase from its 2014 performance.

Population and Income Characteristics

The total population in the assessment area for 2015 was approximately 649,100, representing a 3.0 percent increase from the last census in 2010. The city of Greensboro accounts for most of the population, with over 279,400 residents, followed by High Point (104,400).²²³ As the county seat for Guilford, Greensboro is the 3rd most populated city in North Carolina, and behind Mecklenburg and Wake, Guilford County is the 3rd largest county in the state.²²⁴ ²²⁵

²²⁵ Troyer, Rebecca. "UNC Report: Half of N.C. Residents Live in These 13 Counties." Triad Business Journal, 16 Dec. 2014. Web. 19 June 2017. http://www.bizjournals.com/triad/news/2014/12/16/unc-report-half-of-n-c-residents-live-in-these-13.html

The assessment area is made up of a total of 147 census tracts: 13 tracts (8.8 percent) are low-income, 34 tracts (23.1 percent) are moderate-income, 52 tracts (35.4 percent) are middle-income, 47 tracts (32.0 percent) are upper-income, and one tract (0.7 percent) has an unknown income level.

For purposes of classifying borrower income, this evaluation uses the FFIEC estimated median family income. The following table sets forth the estimated median family income in 2014 and 2015 for the Greensboro-High Point MSA and shows that the FFIEC estimated median family income for the area decreased by \$1,100, or 2.0 percent, from 2014 to 2015.

Borrower Income Levels Greensboro-High Point, NC MSA

FFIEC Estimated		Low			Moderate			N	Midd	lle	Upper			
Median Family Income		0	-	49.99%	50%	-	79.99%	80%	-	119.99%	120%	-	& above	
2014	\$55,100	0	-	\$27,549	\$27,550	-	\$44,079	\$44,080	-	\$66,119	\$66,120	-	& above	
2015	\$54,000	0	-	\$26,999	\$27,000	-	\$43,199	\$43,200	-	\$64,799	\$64,800	-	& above	

Poverty and financial instability are concerns throughout the assessment area. The percentage of people living in poverty increased between 2009 and 2015 in both counties in the assessment area and is slightly higher than the poverty rate for the state. In 2015, the poverty rate was 17.6 percent in both Randolph and Guilford counties. In the city of Greensboro, the poverty rate was estimated at 19.3 percent.²²⁶ Of the families living in the assessment area, 39.0 percent are considered LMI, slightly lower than the state level of 39.1 percent, and 44.8 percent of families living in low-income tracts and 18.8 percent of families in moderate-income tracts have incomes below the poverty level, which may limit lending opportunities.

Economic Conditions

Textiles, tobacco, and furniture manufacturing were historically the primary sources of employment in the Greensboro-High Point MSA, but employment in these industries has steadily declined since the 1980's due to increased international competition and the use of labor-saving technology. Despite these declines, manufacturing still accounts for 15.0 percent of all nonfarm payrolls in the Greensboro MSA, and it is the region's second largest economic sector. Present day manufacturing in the area, however, has shifted to more capital-intensive manufacturing such as aviation, electronics, and consumer goods.²²⁷ The Honda Aircraft Company, Lenovo, and Procter & Gamble are among some of the manufacturing companies that have contributed to this growth. In addition, the proximity of the assessment area to major markets in the South,

²²⁶ "Greensboro, NC (US Census)." GIS Mapping and Geographic Information System Data. The Reinvestment Fund, n.d. Web. 19 June. 2017. http://www.policymap.com/>.

https://www.huduser.gov/portal/publications/pdf/GreensboroNC-comp-16.pdf>.

Midwest, and Mid-Atlantic regions of the country has attracted a cluster of firms that specialize in transportation and logistics which, in turn, has encouraged manufacturing, wholesale, and retail trade firms to locate their warehousing and logistics operations in the Greensboro-High Point area.

During the 12 months ending September 2015, total employment in the assessment area was approximately 356,500 jobs with employment concentrated in the following industries: wholesale and retail trade, manufacturing, professional and business services, and education and health services.²²⁸ The largest employers in the assessment area are Moses H. Cone Health System, University of North Carolina at Greensboro, Bank of America, Lorillard Tobacco Co., North Carolina A&T University, United Parcel Service, Inc., and Procter & Gamble Co.²²⁹

According to 2015 Dun & Bradstreet information, there were 33,895 businesses within the assessment area, 92.1 percent of which had total annual revenues less than or equal to \$1 million and were therefore considered to be small businesses. There were 7.0 percent of businesses in low-income tracts, while 19.7 percent of businesses were located in moderate-income tracts. Small business lending continued to improve during the review period. Loans to small businesses increased by 24.0 percent between 2013 and 2015 in the assessment area, with 11,356 loans made in 2015. During this same period, loans made to firms with revenues under \$1.0 million represented 55.0 percent of total small business loans, which is a higher proportion than previous years and an indication that there may be fewer obstacles for smaller firms to access credit in the market.²³⁰

From 2010 to 2015, the unemployment rate decreased significantly from 11.1 percent to 5.9 percent in Guilford County and from 12.0 percent to 5.7 percent in Randolph County.²³¹ As noted in the following chart, the unemployment rate in the Greensboro MSA trended downward in 2015 and at 5.9 percent was only slightly higher than the unemployment rate for the state at 5.7 percent.

Unemployment Rates - NC Greensboro

Not Seasonally Adjusted. Source: Bureau of Labor Statistics

Census data indicates there were approximately 273,900 housing units located in the assessment area, of which 58.3 percent were owner-occupied, 31.0 percent were rental units, and 10.7 percent were vacant. Rental and vacant units represent a disproportionate share of housing in LMI tracts. Of the 18,822 housing units in low-income tracts, 23.9 percent of the housing was owner-occupied, while 57.3 percent and 18.8 percent were rental and vacant units, respectively. In moderate-income tracts, 45.1 percent of units were owner-occupied while 41.9 percent were rental and 13.0 percent were vacant. These factors indicate that lending in the LMI tracts may be more challenging than in other areas.

According to data from the Greensboro-High Point Comprehensive Housing Market Analysis, the area has an overall estimated sales vacancy rate of 1.8 percent, down from 2.7 percent in 2010, suggesting that the sales housing market is currently balanced.²³² Since 2012, home sales have increased faster than available homes have come on the market, lowering the sales vacancy rate and creating upward pressure on home prices. During the 12 months ending August 2015, total sales of new and existing homes increased 11.0 percent to 10,700 homes and the average home sales price increased 3.0 percent to \$157,200 when compared to the same last year.²³³ The median home price in Randolph County was \$133,854 as compared to \$167,792 for Guilford County as of August 2015.²³⁴

²³³ Ibid

²³⁴ Federal Reserve Bank of Atlanta calculations of data provided by LPS.

The percentage of seriously delinquent mortgages (defined as more than 90 days past due or in foreclosure) was 3.9 percent during September 2015, down from 4.7 percent in September 2014. By comparison, 3.6 and 4.2 percent of loans in North Carolina and the nation, respectively, were seriously delinquent or in bank-owned REO status in 2015.²³⁵ In September 2015, the city of Greensboro had the second highest rate of foreclosures in the state.²³⁶

Demographic Characteristics by Census Tract

The following table based on 2015 FFIEC Census and 2015 Dun & Bradstreet data presents key demographic and business information used to help develop a performance context for the assessment area.

Credit and Community Development Needs

While housing is not an urgent need in the assessment area overall, there is increasing concern in the principal cities of Greensboro and High Point. There is currently a waiting list of over 12,000 families for public housing units and vouchers at the Greensboro Housing Authority.²³⁷ In addition, the High Point Housing Agency has 942 households on the waiting list for public housing and 1,437 households on the waiting list for Section 8 vouchers as of 2015.²³⁸ This suggests that there is an unmet need for housing for low- and very low-income residents. The average asking rent in the market was \$725 as of the second quarter of 2015.²³⁹

There may be continued pressure on households seeking affordable rental units in the assessment area, as the rental market has tightened in the last few years because of an increasing preference for renting. Therefore, financial institutions can support affordable housing needs in the assessment area by participating in public-private projects that leverage other investments, such as the North Carolina Housing Trust Fund, to increase the availability of affordable units. Other opportunities may include supporting or partnering with agencies that offer low-cost mortgages and down-payment assistance; financing affordable homes and apartments developed by local governments and nonprofits; and providing loans for the rehabilitation of substandard owner-occupied or vacant homes.

As noted earlier, the employment trends in the area indicate that the local economy is shifting into other sectors which require a higher skilled workforce. Hence, financial institutions can partner with and support organizations that provide workforce development and technical training to help unskilled or under-skilled workers gain access to higher-paying jobs. Bank involvement may include financial support or community development services, such as providing interview assistance, resume workshops, and technical training.

Two community contacts specializing in economic development in the area were interviewed to gather a sense of the small business environment and observed needs. One contact discussed the advantages of the SBA loan programs to support local businesses and encouraged local financial institutions to continue their participation in the programs. Another contact who provides consulting services to small businesses noted that financial institutions have an opportunity to sponsor loan events, small business workshops, and conferences in the assessment area. Overall, both contacts noted that continued collaboration and partnerships would support small businesses in the area.

CONCLUSIONS WITH RESPECT TO PERFORMANCE TESTS IN THE GREENSBORO, NORTH CAROLINA ASSESSMENT AREA

LENDING TEST

SunTrust Bank's lending performance in the Greensboro assessment area is good. The geographic distribution of loans reflects good penetration throughout the assessment area. Also, the distribution of borrowers reflects good penetration among borrowers of different income levels and businesses of different revenue sizes. In addition, the bank makes an adequate level of community development loans.

SunTrust Bank reported 960 (68.9 percent) HMDA-reportable loans and 434 (31.1 percent) CRA small business loans in the Greensboro assessment area during the review period. Therefore, HMDA-reportable lending received greater weight in determining the bank's lending test rating in the assessment area. The Greensboro assessment area accounted for 7.9 percent of SunTrust Bank's total HMDA-reportable lending in North Carolina and 12.5 percent of its total statewide CRA small business lending by dollar volume during the review period. In comparison, 18.4 percent of SunTrust Bank's North Carolina deposits are in this assessment area.

For the lending test analysis, lending performance in low-, moderate-, middle-, and upper-income census tracts and to low-, moderate-, middle-, and upper-income borrowers was considered for each product; however, comments for activity in middle- and upper-income tracts and to middle- and upper-income borrowers are only included when they were material to the outcome of the analyses. Details of the bank's mortgage and small business lending and information regarding lending by peers can be found in Appendix G.

Geographic Distribution of Loans

For this analysis the geographic distribution of small business and HMDA-reportable lending, including both originations and purchases, was compared with available demographic information. Performance context information and aggregate lending data were also taken into consideration. For instance, unemployment rates, poverty rates, the level of owner-occupied units, and the volume of small businesses in LMI census tracts were factors considered when assessing the bank's lending performance. Considering all of these factors, SunTrust Bank's geographic distribution of loans reflects good penetration throughout the assessment area.

Home Purchase Loans

Home purchase lending in low-income census tracts is adequate based on four loan originations during the review period. Lending performance in low-income census tracts was less than the percentage of owner-occupied units located in these tracts. However, SunTrust Bank's performance was similar to aggregate lending performance during the review period.

Home purchase lending in moderate-income census tracts is also adequate. The bank's home purchase lending in moderate-income census tracts was less than the percentage of owner-occupied units in these tracts. SunTrust Bank originated 10.7 percent of its home purchase loans in moderate-income census tracts, where 18.0 percent of owner-occupied units are located. SunTrust Bank's performance was also less than the aggregate performance in 2014, but greater than aggregate performance in 2015.

Home Refinance Loans

Home refinance lending in low-income census tracts is excellent. Lending performance in this category was greater than both the percentage of owner-occupied units located in moderate-income tracts and aggregate lending performance during the review period.

Home refinance lending in moderate-income census tracts is adequate. SunTrust Bank's home refinance lending in moderate-income tracts was less than the percentage of owner-occupied units and also less than aggregate lending performance during the review period.

Home Improvement Loans

Home improvement lending in low-income census tracts is good based on six loan originations during the review period. Lending performance in low-income census tracts was greater than the percentage of owner-occupied units located in these tracts. Moreover, SunTrust Bank's home improvement lending in low-income census tracts exceeded aggregate lending performance in 2014, but was similar to aggregate lending performance in 2015.

Home improvement lending in moderate-income census tracts is excellent. Lending performance in this category exceeded both the percentage of owner-occupied units located in moderate-income tracts and aggregate lending performance during the review period.

Small Business Loans

Small business lending in both LMI census tracts is excellent. The percentage of small business loans in both LMI census tracts exceeded the percentage of small businesses located in these tracts. Additionally, performance in these tracts was greater than aggregate lending performance during the review period.

Lending to Borrowers of Different Incomes and Businesses of Different Sizes

The distribution of loans by borrower income or revenue size of businesses is good. For this analysis, the distribution of small business lending across business revenue sizes and HMDA-reportable lending across borrower income levels was compared to available demographic information. Performance context issues were also considered as well as the performance of other banks.

Home Purchase Loans

Home purchase lending to low-income borrowers is good. The bank's home purchase lending to low-income borrowers was less than the percentage of low-income families in the assessment area. However, the bank's lending outperformed the aggregate lenders during the review period.

Home purchase lending to moderate-income borrowers is adequate. The bank's home purchase lending to moderate-income borrowers was comparable to the percentage of moderate-income families in the assessment area throughout the review period. However, the bank's performance was less than aggregate lenders in 2014, but almost equal to aggregate lenders in 2015.

Home Refinance Loans

Home refinance lending to low-income borrowers is adequate. The bank's home refinance lending to low-income borrowers was less than the percentage of low-income families in the assessment area throughout the review period. However, SunTrust Bank's performance was similar to aggregate lenders during the review period.

Home refinance lending to moderate-income borrowers is good. The bank's home refinance lending to moderate-income borrowers was less than the percentage of moderate-income families in the assessment area throughout the review period. However, the bank's lending performance exceeded aggregate lenders during the review period.

Home Improvement Loans

Home improvement lending to low-income borrowers is good. Although, the bank's home improvement lending to low-income borrowers was less than the percentage of low-income families located in the assessment area, the bank performed better than aggregate lenders during the review period.

Home improvement lending to moderate-income borrowers is excellent. The bank's home improvement lending to moderate-income borrowers was greater than the percentage of moderate-income families in the assessment area, and the bank outperformed aggregate lenders during the review period.

Small Business Loans

The distribution of small business loans to businesses of different sizes is good. While the percentage of small business loans to businesses with revenues of \$1 million or less was less than the percentage of small businesses in the assessment area, SunTrust Bank's performance was greater than aggregate lending performance during the review period. Additionally, 91.3 percent of small business loans were originated in amounts of \$250,000 or less, indicating a willingness to lend in the smaller amounts that are typically requested by small businesses.

Community Development Lending

SunTrust Bank makes an adequate level of community development loans in the Greensboro assessment area. The bank originated four community development loans totaling \$13.2 million during the review period. Loans were responsive to several community development needs in the assessment area, including revitalizing and stabilizing low- or moderate-income geographies and promoting economic development by financing small business. The bank provided \$10 million in loans to revitalize and stabilize LMI geographies and \$3.2 million towards economic development activities. SunTrust Bank's community development lending exhibits adequate responsiveness to the community development and credit needs of the assessment area.

Examples of community development lending include but are not limited to:

- Two loans totaling \$10 million to a major university in the area, where 57.0 percent of the student body receives federal Pell Grants, to construct a new student center located in a low-income geography designated as a North Carolina Urban Progress Zone.
- A loan for \$1.6 million to a small business to relocate and expand production, creating 20 new LMI jobs.

INVESTMENT TEST

SunTrust Bank makes an adequate level of qualified investments and grants in the Greensboro assessment area relative to the bank's presence in the assessment area and community development investment opportunities.

The bank made investments (excluding contributions) totaling \$3.2 million in the assessment area; of that, \$3.0 million was invested during the review period, and all current investments supported affordable housing for LMI individuals. The investment portfolio in Greensboro is made up of securities backed by government-guaranteed mortgages on multifamily properties and a LIHTC fund.

SunTrust Bank also contributed \$149,150 to nonprofit organizations and community development projects during the review period. Specifically, the bank provided grants totaling \$120,650 to nonprofits that offer community services to LMI individuals, including \$77,600 to United Way to support programs and organizations that serve primarily LMI individuals. Remaining donations included \$22,500 for affordable housing and \$6,000 for economic development. The bank's donations assisted organizations that provide financial education, homeownership counseling, youth services and educational support programs, workforce development, homeless assistance, and other needed community services.

The Greensboro assessment area was also positively impacted by investments and contributions to organizations that that served all markets in the state, described in the state overview section of the report.

SERVICE TEST

SunTrust Bank's service test performance in the Greensboro assessment area is good based on the accessibility of the bank's retail services and the relatively high level of community development services.

Retail Services

Delivery systems are reasonably accessible to the bank's geographies and individuals of different income levels in the Greensboro assessment area. The distribution of 13 branch offices and 13 ATMs as of December 31, 2015, was compared to the distribution of households and businesses among the tract categories within the assessment area. The bank has no branches in low-income census tracts and three branches in moderate-income census tracts representing 23.1 percent of total branches in the assessment area. For comparison purposes, 6.2 percent of households and 7.0 percent of businesses were located in low-income census tracts, and 22.7 percent of households and 19.7 percent of businesses were located in moderate-income tracts.

During the review period, no branches were opened or closed in low- or moderate-income census tracts. One branch was opened in an upper-income census tract, and three branches were closed in middle-income census tracts. The bank's record of opening and closing of branches has generally not adversely affected the accessibility of its delivery systems, particularly to LMI geographies and/or LMI individuals.

SunTrust Bank offers extended and weekend hours in its branches in moderate-income tracts. Extended and weekend hours are offered at higher rates in branches in moderate-income tracts than at branch locations in middle- and upper-income census tracts. Banking hours of operation and services do not vary in a way that inconveniences the assessment area, particularly LMI geographies and/or LMI individuals.

Closed branches/ATMs are only included in "closed" columns and are not included in any other totals.

DTO - Drive thru only is a subset of total branches SA = Stand Alone ATM is a subset of total ATMs

Community Development Services

SunTrust Bank provides a relatively high level of community development services in the Greensboro assessment area. During the review period, SunTrust Bank employees provided 633 service hours in various capacities for community development organizations. Bank employees provided 190 affordable housing hours and 440 community service hours. Notably, approximately 21.5 percent of service hours were board service at community development organizations or committee memberships. SunTrust employees were active in mentoring programs for LMI youth, family services organizations, local affordable housing organizations, community development funds, and a food bank. The bank's performance is good given SunTrust Bank's size and market share in the assessment area and the opportunities that exist for community development service.

Metropolitan Areas (Limited Review)

The following metropolitan assessment areas were reviewed using limited-scope examination procedures.

DESCRIPTION OF INSTITUTION'S OPERATIONS IN THE <u>NORTH CAROLINA</u> METROPOLITAN ASSESSMENT AREAS

• Asheville Assessment Area (Buncombe, Haywood, and Henderson counties)

- o As of December 31, 2015, SunTrust Bank operated 10 branches in the assessment area, representing 9.2 percent of its branches in **North Carolina**.
- As of June 30, 2015, the bank had \$487.1 million in deposits in this assessment area, representing a market share of 7.0 percent and 8.2 percent of SunTrust Bank's total deposits in North Carolina.

• Brunswick Assessment Area (Brunswick County)

- o As of December 31, 2015, SunTrust Bank operated one branch in the assessment area, representing 0.9 percent of its branches in **North Carolina**.
- O As of June 30, 2015, the bank had \$19.9 million in deposits in this assessment area, representing a market share of 1.1 percent and 0.3 percent of SunTrust Bank's total deposits in **North Carolina**.

• Burlington Assessment Area (Alamance County)

- o As of December 31, 2015, SunTrust Bank operated six branches in the assessment area, representing 5.5 percent of its branches in **North Carolina**.
- As of June 30, 2015, the bank had \$196.5 million in deposits in this assessment area, representing a market share of 10.1 percent and 3.3 percent of SunTrust Bank's total deposits in North Carolina.

Hickory Assessment Area (Burke, Caldwell, and Catawba counties)

- o As of December 31, 2015, SunTrust Bank operated three branches in the assessment area, representing 2.8 percent of its branches in **North Carolina**.
- As of June 30, 2015, the bank had \$127.2 million in deposits in this assessment area, representing a market share of 3.3 percent and 2.1 percent of SunTrust Bank's total deposits in North Carolina.

• Raleigh Assessment Area (Franklin and Wake counties)

- o As of December 31, 2015, SunTrust Bank operated 28 branches in the assessment area, representing 25.7 percent of its branches in **North Carolina**.
- As of June 30, 2015, the bank had \$997.8 million in deposits in this assessment area, representing a market share of 4.3 percent and 16.8 percent of SunTrust Bank's total deposits in North Carolina.

• Wilmington Assessment Area (New Hanover County)

- o As of December 31, 2015, SunTrust Bank operated three branches in the assessment area, representing 2.8 percent of its branches in **North Carolina**.
- As of June 30, 2015, the bank had \$208.8 million in deposits in this assessment area, representing a market share of 4.3 percent and 3.5 percent of SunTrust Bank's total deposits in North Carolina.

• Winston-Salem Assessment Area (Davidson, Davie, Forsyth, Stokes, and Yadkin counties)

o As of December 31, 2015, SunTrust Bank operated 11 branches in the assessment area, representing 10.1 percent of its branches in **North Carolina**.

Metropolitan Areas (Limited Review)

As of June 30, 2015, the bank had \$656.2 million in deposits in this assessment area, representing a market share of 1.9 percent and 11.1 percent of SunTrust Bank's total deposits in North Carolina.

CONCLUSIONS WITH RESPECT TO PERFORMANCE TESTS

Through the use of available facts and data, including performance and demographic information, each assessment area's performance was evaluated and compared with the bank's performance in the state. The conclusions regarding performance are provided in the table below. Please refer to the tables in Appendix H for information regarding these areas.

	Metropolitan	Assessment Areas	
Assessment Areas	Lending Test	Investment Test	Service Test
Asheville	Consistent	Not Consistent (Below)	Not Consistent (Above)
Brunswick	Not Consistent (Below)	Not Consistent (Below)	Not Consistent (Below)
Burlington	Not Consistent (Below)	Not Consistent (Above)	Not Consistent (Below)
Hickory	<u>Consistent</u>	<u>Consistent</u>	Not Consistent (Below)
Raleigh	Not Consistent (Below)	Not Consistent (Above)	Not Consistent (Below)
Wilmington	Consistent	Not Consistent (Above)	Consistent
Winston-Salem	Not Consistent (Below)	Not Consistent (Below)	<u>Consistent</u>

For the lending test, SunTrust Bank received a High Satisfactory rating for the State of North Carolina. Performance in the Asheville, Hickory, and Wilmington assessment areas was consistent with SunTrust Bank's statewide performance. Community development lending was excellent in all three of these assessment areas. Performance in the remaining four metropolitan limited-scope assessment areas was weaker than the bank's performance in the state. However, with the exception of Brunswick, performance was still considered adequate. Weaker performance was primarily attributable to poor and very poor community development lending in Brunswick, Burlington, Raleigh, and Winston-Salem. Also, contributing to weaker performance in the Brunswick assessment area was the poor distribution of loans by borrower income.

For the investment test, SunTrust Bank received a High Satisfactory rating for the State of North Carolina. The performance in the Burlington, Raleigh, and Wilmington assessment areas exceeded SunTrust Bank's performance for the state. Strong performance in Raleigh and Wilmington was attributable to excellent levels of qualified community development investments that were responsive to community development and credit needs in the assessment areas; for example, in Wilmington, the bank provided an NMTC investment to support a new solar electricity generation facility, creating jobs in a rural community. Performance in the Hickory assessment area was consistent with the bank's statewide performance while performance in the Asheville, Brunswick, and Winston-Salem metropolitan limited-scope assessment areas was weaker due to lower levels of qualified investments relative to SunTrust Bank's operations in the assessment areas.

For the service test, SunTrust Bank received a rating of High Satisfactory for the State of North Carolina. Overall service test performance in the Asheville assessment area was stronger than the bank's performance for

Metropolitan Areas (Limited Review)

the state, and performance in the Wilmington and Winston-Salem assessment areas was consistent. Performance in the remaining assessment areas was weaker than the statewide performance. Community development service performance was excellent in the Asheville and Wilmington assessment areas, but poor in the Brunswick and Hickory assessment areas due to a low number of qualified community development services; community development services in the remaining assessment areas were adequate or good. Additionally, retail banking services were stronger in Asheville but weaker than the state in the Brunswick and Wilmington assessment areas; performance was consistent in the remaining assessment areas.

The performance in the metropolitan limited-scope assessment areas positively impacted the investment test rating, but did not affect the overall service test or lending test ratings.

Nonmetropolitan Areas (Limited Review)

The following nonmetropolitan assessment areas were reviewed using limited-scope examination procedures.

DESCRIPTION OF INSTITUTION'S OPERATIONS IN THE <u>NORTH CAROLINA</u> NONMETROPOLITAN ASSESSMENT AREAS

• Cleveland Assessment Area (Cleveland County)

- o As of December 31, 2015, SunTrust Bank operated one branch in the assessment area, representing 0.9 percent of its branches in **North Carolina**.
- O As of June 30, 2015, the bank had \$50.4 million in deposits in this assessment area, representing a market share of 4.9 percent and 0.8 percent of SunTrust Bank's total deposits in **North Carolina**.

• Granville Assessment Area (Granville County)

- o As of December 31, 2015, SunTrust Bank operated three branches in the assessment area, representing 2.8 percent of its branches in **North Carolina**.
- o As of June 30, 2015, the bank had \$100.8 million in deposits in this assessment area, representing a market share of 20.4 percent and 1.7 percent of SunTrust Bank's total deposits in **North Carolina**.

• Harnett Moore Assessment Area (Harnett and Moore counties)

- O As of December 31, 2015, SunTrust Bank operated two branches in the assessment area, representing 1.8 percent of its branches in **North Carolina**.
- As of June 30, 2015, the bank had \$36.2 million in deposits in this assessment area, representing a market share of 1.3 percent and 0.6 percent of SunTrust Bank's total deposits in <u>North</u> Carolina.

Jackson Assessment Area (Jackson County)

- o As of December 31, 2015, SunTrust Bank operated one full-service ATM and no branch offices in **North Carolina**.
- O As of June 30, 2015, the bank had \$16.7 million in deposits in this assessment area, representing a market share of 4.0 percent and 0.3 percent of SunTrust Bank's total deposits in **North Carolina**.

• Stanly Assessment Area (Stanly County)

- o As of December 31, 2015, SunTrust Bank operated two branches in the assessment area, representing 1.8 percent of its branches in **North Carolina**.
- O As of June 30, 2015, the bank had \$80.6 million in deposits in this assessment area, representing a market share of 8.9 percent and 1.4 percent of SunTrust Bank's total deposits in **North Carolina**.

• Wilkes Assessment Area (Wilkes County)

- o As of December 31, 2015, SunTrust Bank operated no branches in **North Carolina**. One branch was closed during the review period.
- O As of June 30, 2015, the bank had \$15.1 million in deposits in this assessment area, representing a market share of 2.1 percent and 0.3 percent of SunTrust Bank's total deposits in **North Carolina**.

Nonmetropolitan Areas (Limited Review)

CONCLUSIONS WITH RESPECT TO PERFORMANCE TESTS

Through the use of available facts and data, including performance and demographic information, each assessment area's performance was evaluated and compared with the bank's performance in the state. The conclusions regarding performance are provided in the table below. Please refer to the tables in Appendix H for information regarding these areas.

	Nonmetropolitan Assessment Areas											
Assessment Areas	Lending Test	Investment Test	Service Test									
Cleveland	Consistent	Not Consistent (Above)	Not Consistent (Below)									
Granville	Consistent	Not Consistent (Below)	<u>Consistent</u>									
Harnett Moore	Not Consistent (Below)	Not Consistent (Above)	<u>Consistent</u>									
Jackson	Not Consistent (Below)	Not Consistent (Below)	<u>Consistent</u>									
Stanly	Not Consistent (Below)	Not Consistent (Below)	Not Consistent (Below)									
Wilkes	Not Consistent (Below)	Not Consistent (Above)	Not Consistent (Below)									

For the lending test, performance in the Cleveland and Granville assessment areas was consistent with the bank's statewide performance. The remaining four nonmetropolitan limited-scope assessment areas' lending performance was weaker than the bank's performance in the state; however, all four assessment areas were still considered satisfactory. Community development lending was excellent in all nonmetropolitan limited-scope assessment areas, except in the Stanly and Wilkes assessment areas, where the bank made no community development loans. The very poor geographic distribution of loans was also a factor in the weaker performance for the Harnett Moore assessment area.

For the investment test, the level of community development investment activity in Cleveland, Harnett Moore, and Wilkes was excellent and exceeded SunTrust Bank's performance in the state. Performance in Granville, Jackson, and Stanly was weaker than SunTrust Bank's performance in the state due to lower levels of qualified investments relative to SunTrust Bank's operations in the assessment area.

For the service test, performance was consistent with the statewide performance in Granville, Harnett Moore, and Jackson, while it was weaker in the remaining assessment areas. Community development service performance was excellent in Granville and Jackson assessment areas, good in Harnett Moore, and adequate in Cleveland. Performance was weaker in the Stanly and Wilkes assessment areas as the bank had no qualified community development services in these assessment areas. Additionally, retail banking services were weaker than the state in the Cleveland and Wilkes assessment areas, but consistent in the remaining assessment areas.

The performance in the nonmetropolitan limited-scope assessment areas positively impacted the investment test rating, but did not affect the overall service test or lending test ratings.

CRA RATING FOR SOUTH CAROLINA: Satisfactory

The Lending Test is rated: <u>High Satisfactory</u>

The Investment Test is rated: Outstanding

The Service Test is rated: <u>Low Satisfactory</u>

Major factors supporting the rating include the following:

- The geographic distribution of loans reflects adequate penetration throughout the assessment areas, and the distribution of loans by borrower income also reflects adequate penetration among customers of different income levels and businesses of different revenue sizes.
- The bank makes a relatively high level of community development loans in its South Carolina assessment areas.
- The bank provides an excellent level of qualified community development investments and grants that are responsive to the need for affordable housing and community services in the South Carolina assessment areas.
- Retail services are reasonably accessible to the bank's geographies and individuals of different income levels in the assessment areas.
- The bank provides a relatively high level of community development services throughout the assessment areas.

SCOPE OF EXAMINATION

A full-scope review was conducted for the following assessment area in the State of South Carolina:

Greenville

Limited-scope reviews were conducted for the remaining six assessment areas:

• Beaufort

• Charleston

• Columbia

• Greenwood (non-MSA)

• Oconee (non-MSA)

Spartanburg

The time period, products, and affiliates evaluated for these assessment areas are consistent with the scope discussed in the institution section of this report.

DESCRIPTION OF INSTITUTION'S OPERATIONS IN SOUTH CAROLINA

As of June 30, 2015, SunTrust Bank had \$2.4 billion in deposits in South Carolina accounting for 1.7 percent of SunTrust's total deposits. SunTrust Bank operated 45 branch offices in South Carolina as of December 31, 2015, representing 3.1 percent of the bank's total branches. HMDA-reportable lending in South Carolina accounted for 4.9 percent of total institutional HMDA-reportable lending by number of loans, and CRA small business lending accounted for 1.6 percent of the bank's total CRA small business lending. Overall, HMDA-reportable and CRA small business lending accounted for 4.4 percent of the bank's total lending activity by dollar volume, which was slightly greater than the percentage of total deposits at 1.7 percent.

The following table shows lending activity from January 1, 2014, through December 31, 2015.

Statewide Summary of Lending Activity Assessment Areas Located in South Carolina

Loan Type	#	%	\$ (000s)	%
HMDA Home Purchase	2,695	40.8%	\$750,945	61.1%
HMDA Refinance	1,737	26.3%	\$388,920	31.6%
HMDA Home Improvement	945	14.3%	\$13,142	1.1%
HMDA Multi-Family	1	0.0%	\$3,500	0.3%

TOTAL LOANS	6,608	100.0%	\$1,229,937	100.0%

Originations and Purchases

CONCLUSIONS WITH RESPECT TO PERFORMANCE TESTS IN SOUTH CAROLINA

LENDING TEST

The lending test rating in the State of South Carolina is high satisfactory. Overall, performance in South Carolina with regard to the geographic distribution of loans reflects adequate penetration throughout the assessment areas. The distribution of loans by borrower income reflects adequate penetration among customers of different income levels and businesses of different sizes. Additionally, SunTrust Bank makes a relatively high level of community development loans in South Carolina.

During the review period, SunTrust Bank reported 5,378 HMDA-reportable loans and 1,230 small business loans in South Carolina. As such, HMDA-reportable lending was given greater weight when determining the lending test rating for South Carolina. The rating for South Carolina is based on performance in the Greenville full-scope assessment area. Approximately 36.5 percent of the bank's HMDA-reportable and small business lending (by number of loans) in South Carolina occurred within this assessment area, thus making this the largest concentration of lending activity in the state. Additionally, 36.4 percent of the bank's total deposits in South Carolina are in this assessment area.

Details of the bank's HMDA-reportable and small business lending and information regarding lending by peers can be found in Appendix G.

Geographic and Borrower Distribution

The geographic distribution of SunTrust's HMDA-reportable and small business loans is adequate, and the distribution of loans by borrower income and revenue size of businesses is also adequate. As noted above, the rating for the state of South Carolina is derived from the Greenville assessment area. A detailed discussion of the borrower and geographic distribution of lending for this assessment area is included in the next section of this report.

Community Development Lending

SunTrust Bank makes a relatively high level of community development loans in the state of South Carolina. The bank originated 27 community development loans totaling \$171 million in South Carolina during the review period, including two loans for \$4.6 million in the Greenville full-scope assessment area. Performance in Greenville was adequate. The bank made an excellent level of community development loans in the Charleston and Spartanburg limited-scope assessment areas. Lending in the limited-scope assessment areas included support for affordable housing, promoting economic development by financing small businesses, and revitalizing and stabilizing low- or moderate-income geographies. Additionally, the bank originated three loans worth \$20 million serving the broader statewide area that includes the bank's assessment areas. The loans serving the statewide area provided financing for utility construction in designated disaster zones. The strong performance in the limited-scope assessment areas and across the state positively impacted the evaluation of the bank's community development lending statewide. Overall, this level of statewide community development lending is considered

good based on the bank's size and presence in its South Carolina assessment areas and the availability of community development lending opportunities. More information on community development loans can be found in the full-scope assessment area section of this report.

Investment Test

The investment test rating for South Carolina is outstanding.

The bank made an excellent level of qualified investments and contributions with total investments of \$66.0 million directly benefiting the assessment areas in the state. Greenville was the only full-scope assessment area reviewed, and investments in this assessment area represented approximately 44.1 percent of annualized statewide investments compared to 36.4 percent of deposits in this market. Performance in the Greenville assessment area was excellent. The bank's performance was also considered excellent in the Charleston and Spartanburg limited-scope assessment areas; performance in the other limited-scope areas was poor due to limited investment activity. Given the bank's small branch presence and deposit share in these assessment areas, limited-scope performance did not impact the statewide investment test rating.

In addition to the investments directly benefiting the bank's assessment areas, the bank had investments totaling \$5.2 million and contributions of \$37,100 that benefitted all assessment areas in the state. The bank provided financial support for several statewide affordable housing and community development associations; bank staff also dedicated significant community development service hours to these initiatives. Finally, the bank has approximately \$27.6 million in investments that benefit multiple states in the bank's footprint, including South Carolina. The majority of these regional investments are in SBICs.

Additional details regarding specific investments and contributions can be found in the full-scope assessment area section, and a summary of the bank's investments and contributions for all assessment areas can be found in Appendix F.

Service Test

The service test rating for South Carolina is low satisfactory.

Retail Services

Delivery systems, including ATMs and branch office locations, are reasonably accessible to the bank's geographies and individuals of different income levels in the assessment areas. Overall, banking services and hours of operation do not vary in a way that inconveniences the assessment areas, including low- and moderate-income geographies or LMI individuals. Statewide, the bank's record of opening and closing of branches has generally not adversely affected the accessibility of its delivery systems for LMI geographies and/or LMI individuals. Additional detail on the bank's retail services can be found in the full-scope assessment area section.

Community Development Services

SunTrust Bank provided a relatively high level of community development services that benefit LMI residents and small businesses in the state of South Carolina. The bank provided a total of 1,907 qualified service hours during the examination period, including 406 total hours in the Greenville full-scope assessment area. Performance in Greenville was adequate. Overall statewide performance was positively impacted by good community development services performance in the Charleston and Spartanburg limited-scope assessment areas. In addition, employees engaged in 155 service hours with statewide organizations engaged in affordable housing, community services, and economic development that benefit all assessment areas in the state. Most notably, SunTrust Bank employees provided leadership with statewide entities including an affordable housing coalition, a community development services corporation, a community loan fund, and CDFIs. This performance is considered good given SunTrust Bank's size and presence in the state of South Carolina and the opportunities that exist for community development service.

Additional detail on the bank's retail and community development services can be found in the full-scope assessment area section of this report.

Greenville, South Carolina

METROPOLITAN AREA

(Full Scope Review)

DESCRIPTION OF INSTITUTION'S OPERATIONS IN THE GREENVILLE, SOUTH CAROLINA ASSESSMENT AREA

Overview

The Greenville assessment area includes Anderson, Greenville, Laurens, and Pickens counties, which make up the entirety of the Greenville-Anderson-Mauldin MSA. Anderson County was added to the Greenville MSA in 2013 when the Office of Management and Budget (OMB) revised its delineation of metropolitan areas. As of December 2015, SunTrust had 20 branches in the Greenville assessment area, which represent 44.4 percent of the branches in the state. 36.5 percent of combined HMDA-reportable and CRA small business lending in the state was originated in this assessment area.

The Greenville assessment is a competitive market with large and regional banks located within it. According to the June 30, 2015 FDIC Summary of Deposits Report, SunTrust Bank ranks 5th out of 36 financial institutions operating in the assessment area with a 6.0 percent market share. The top financial institution by deposit market share is Well Fargo Bank with 18.1 percent, followed by Bank of America, BB&T, and TD Bank.

HMDA-reportable lending and CRA small business lending are similarly competitive. SunTrust Bank and SunTrust Mortgage combined had an average of 4.2 percent of total HMDA-reportable lending in both 2014 and 2015. STB ranked 17th while STM ranked 9th out of the 415 HMDA lenders in the market in 2014. Both STB and STM decreased slightly in rank in 2015. Wells Fargo Bank was the dominant HMDA reporter in both 2014 and 2015, followed by Quicken Loans and BB&T.

The bank made 1.2 percent of CRA-reportable lending activity in the assessment area in 2014 and 2.9 percent in 2015. The bank ranked 12th out of 83 CRA reporters in 2015. Assessment area lending is led by a few large volume lenders, including the banks mentioned above.

Population and Income Characteristics

Greenville is the largest city within the South Carolina Upstate region, which is defined as a ten-county area in the northwestern portion of the state along the I-85 corridor. The city's population is estimated at 64,579, and the city also serves as the county seat of Greenville County. The Greenville assessment area had a total population of 874,869 persons in 2015, representing a 6.2 percent increase from 2010. The most populous county in the assessment area is Greenville County at approximately 491,900, followed by Anderson County.²⁴⁰

The assessment area contains 901 census tracts; 2010 census data indicate that there were 13 (6.7 percent) low-income census tracts, 49 (25.1 percent) moderate-income tracts, 86 (44.1 percent) middle-income tracts, and 47 (24.1 percent) upper-income tracts.

²⁴⁰ QuickFacts. US Census Bureau, n.d. Web. 20 May. 2017. http://quickfacts.census.gov

For purposes of classifying borrower income, this evaluation uses the FFIEC estimated median family income. The following table sets forth the estimated median family income in 2014 and 2015 for the Greenville MSA and shows that the estimated median family income decreased by \$1,500 or approximately 2.6 percent, from 2014 to 2015.

Borrower Income Levels Greenville-Anderson-Mauldin, SC MSA

FFIE	FFIEC Estimated			Low			rate	N	lle	Upper			
Median	Family Income	0	-	49.99%	50%	-	79.99%	80%	-	119.99%	120%	-	& above
2014	\$57,200	0	-	\$28,599	\$28,600	-	\$45,759	\$45,760	-	\$68,639	\$68,640	-	& above
2015	\$55,700	0	-	\$27,849	\$27,850	-	\$44,559	\$44,560	-	\$66,839	\$66,840	-	& above

The percentage of families in poverty was 13.8 percent between 2011 and 2015, while the poverty rate was 13.5 percent statewide. 38.9 percent of families are considered LMI as compared to the state level of 40.9 percent, and 40.1 percent of families living in low-income tracts and 18.9 percent of families living in moderate-income tracts have incomes below the poverty level.²⁴¹

Economic Conditions

Manufacturing has been a major economic driver in South Carolina and continues to be a significant component of the Greenville regional economy, in both durable and nondurable manufacturing. The area has a heavy presence in textiles, particularly fabric mills. Other nondurables manufacturing includes apparel, plastic materials, synthetic fibers, rubber, and tires. Additionally, the region has benefited from the southern migration of the automotive industry. In 1993, BMW built its first plant outside of Germany in Spartanburg, which is nearby, and has since invested more than \$2 billion. Several expansions have increased capacity and employment at the facility, which continues to attract suppliers to the area. These jobs have helped raise local wages and incomes. More importantly, the region's location between Atlanta and Charlotte on the Interstate I-85 corridor makes it an important transportation and distribution channel in the southeast.

Besides manufacturing, the region's largest industry sectors are trade, transportation and utilities, government, and professional and business services. The area is also home to several universities, such as Clemson University (Pickens County) and Furman University (Greenville County), which supplies a significant number of jobs and a significant college-educated population.²⁴²

²⁴¹ "Greenville, SC MSA (US Census)." *GIS Mapping and Geographic Information System Data*. The Reinvestment Fund, n.d. Web. 22 May. 2017. http://www.policymap.com/>.

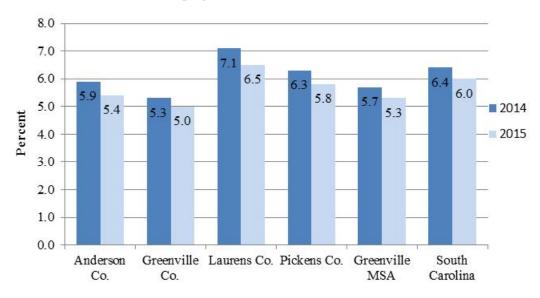

²⁴² Beem, Richard. "US Markets Metro Economies, Greenville, SC." IHS Economics. N.p., Fall 2016. Web. 18 May 2017.

https://www.ihs.com/products/us-industry-economic-regional-forecasts.html.

According to 2015 Dun & Bradstreet information, there were 36,071 businesses within the Greenville assessment area, 92.1 percent of which had total annual revenues less than or equal to \$1 million and were therefore considered to be small businesses. Of the total small businesses in the assessment area, 23.7 percent were in low- or moderate-income tracts.

The Greenville assessment area has seen steady improvement in unemployment rates since the recession. Unemployment rates surged as high as 9.7 percent in 2010. As shown in the following table, rates have declined to 5.3 percent in 2015, which is 0.7 percent lower than the statewide rate. More recent unemployment data confirms that the Greenville metropolitan area has the second lowest rate among all eight metropolitan areas in South Carolina.

Unemployment Rates - SC Greenville

Not Seasonally Adjusted. Source: Bureau of Labor Statistics

Census data indicates there were 356,522 total housing units in the assessment area, 61.4 percent of which were owner-occupied, 26.3 percent were rental units, and 12.3 percent were vacant. The 2010 census shows that 5.3 percent of the housing stock in the assessment area is located in low-income tracts, 31.6 percent of which is owner-occupied housing. In addition, the 2010 census data shows that 22.8 percent of the housing stock in the assessment area is located in moderate-income tracts, only 47.5 percent of which is owner-occupied housing. Rental and vacant units represent a disproportionate share of housing in LMI tracts, and the housing is much older in these areas compared to the assessment area overall. These factors suggest that lending may be more challenging in LMI areas than in other areas.

The Greenville housing market is currently strong, with increasing housing demand and low inventory levels. Data shows that home sales increased by 77.0 percent between 2011 and 2015, and sales volume increased by 110.0 percent for the same period. Home prices have also increased. In 2015, the average sale price of a home had risen 18.9 percent to \$204,447, while the median sale price had risen by more than 21.0 percent to \$172,000.²⁴³

The Greenville assessment area has a lower percentage of homeowners who are cost-burdened, meaning that homeownership costs account for more than 30.0 percent of household income, when compared to the state. The Greenville MSA has a percentage of cost-burdened homeowners under 20.0 percent, whereas the state of South Carolina is at 23.1 percent.²⁴⁴ However, 24.2 percent and 37.8 percent of all homes are likely affordable for a four-person family earning 80.0 percent of the area median income in 2015 in Greenville and Anderson counties, respectively.²⁴⁵ Given the increasing home prices in the area and the average annual wage across all industries in 2015 of \$42,386 for the Greenville MSA, it appears that purchasing a home may be a challenge for average wage workers.²⁴⁶ Using the assumption that a borrower can obtain a loan for approximately three times the borrower's annual income, average wage workers would be able to afford homes at or below \$127,158.

Renters are currently struggling with high housing costs with 43.8 percent of renters in the metropolitan area considered housing cost-burdened, compared to the statewide level of 45.7 percent.²⁴⁷ Rental households are considered cost-burdened if their rental costs account for more than 30.0 percent of household income. According to a report released by the National Low Income Housing Coalition titled Out of Reach 2016, the Greenville MSA has a housing wage of \$14.02, or \$29,160 annual income. This represents the hourly wage necessary to afford a two-bedroom apartment at the HUD estimated Fair Market Rent (FMR) of \$729, while spending no more than 30.0 percent of income on housing costs. The estimated mean renter wage in the Greenville MSA was listed at \$11.93, meaning that monthly rent would be considered affordable at \$621 per month given the mean renter wage.²⁴⁸

Demographic Characteristics by Census Tract

The following table based on 2015 FFIEC Census and 2015 Dun & Bradstreet data presents key demographic and business information used to help develop a performance context for the assessment area.

Credit and Community Development Needs

There are a variety of community development needs impacting the LMI residents of the assessment area and numerous organizations serving those needs. To better understand the community development and economic landscapes, community development professionals were contacted. These individuals discussed the various needs and opportunities across the region as well as how financial institutions can be responsive to local community development needs. Information from these conversations is included below.

According to bank management and community contacts, the highest priority community development need in the region is better job readiness training and employment opportunities in sectors other than food service and hospitality. There are available jobs in the market, but those jobs require a stronger skill set for individuals to qualify, and those skills are not typically characteristic of most individuals in LMI communities, according to bank management.

Another community contact noted that banking institutions have sufficient financial capacity to invest in and help create additional community development projects. The contact added that while financial institutions are providing a great deal of support in financial education and small business coaching, they could get more involved in supporting larger scale and scattered-site affordable development. The contact stated that this represents a more effective use of construction and rehabilitation dollars. Additionally, a community contact noted that the biggest problem in the area when it comes to the provision of additional affordable housing options is the diminishing amount of grants to make the projects feasible. This contact stated that banks are competing to lend for the limited number of development projects.

CONCLUSIONS WITH RESPECT TO PERFORMANCE TESTS IN THE GREENVILLE, SOUTH CAROLINA ASSESSMENT AREA

LENDING TEST

SunTrust Bank's lending performance in the Greenville assessment area is adequate. The geographic distribution of loans reflects adequate penetration throughout the assessment area. Also, the distribution of borrowers reflects adequate penetration among borrowers of different income levels and businesses of different revenue sizes. In addition, the bank makes an adequate level of community development loans.

SunTrust Bank reported 1,875 (77.6 percent) HMDA-reportable loans and 540 (22.4 percent) CRA small business loans in the Greenville assessment area during the review period. Therefore, HMDA-reportable lending received greater weight in determining the bank's lending test rating in the assessment area. The Greenville assessment area accounted for 25.5 percent of SunTrust Bank's total HMDA-reportable lending in South Carolina and 27.4 percent of its total statewide CRA small business lending by dollar volume during the review period. In comparison, 36.4 percent of SunTrust Bank's South Carolina deposits are in this assessment area.

For the lending test analysis, lending performance in low-, moderate-, middle-, and upper-income census tracts and to low-, moderate-, middle-, and upper-income borrowers was considered for each product; however, comments for activity in middle- and upper-income tracts and to middle- and upper-income borrowers are only included when they were material to the outcome of the analyses. Details of the bank's mortgage and small business lending and information regarding lending by peers can be found in Appendix G.

Geographic Distribution of Loans

For this analysis the geographic distribution of small business and HMDA-reportable lending, including both originations and purchases, was compared with available demographic information. Performance context information and aggregate lending data were also taken into consideration. For instance, unemployment rates, poverty rates, the level of owner-occupied units, and the volume of small businesses in LMI census tracts were issues considered when assessing the bank's lending performance. Considering all of these factors, SunTrust Bank's geographic distribution of loans reflects adequate penetration throughout the assessment area.

Home Purchase Loans

Home purchase lending in low-income census tracts is adequate. During the review period, the bank originated 1.2 percent of its loans in low-income census tracts. This level of lending was slightly less than the percentage of owner-occupied units in low-income tracts at 2.7 percent. Additionally, the bank's performance was less than the aggregate lenders in 2014 but comparable in 2015.

Home purchase lending in moderate-income census tracts is also adequate. During the review period, 10.4 percent of the bank's loans were originated in moderate-income census tracts. This performance was less than the percentage of owner-occupied units in moderate-income census tracts at 17.7 percent. Additionally, the bank's performance was slightly less than the aggregate lenders during the review period.

Home Refinance Loans

Home refinance lending in low-income census tracts is poor. SunTrust Bank originated 0.8 percent of its home refinance loans in these tracts during the review period. As a result, the bank's performance was less than the percentage of owner-occupied units in these tracts and also slightly less than the aggregate lenders in 2014 and 2015.

Home refinance lending in moderate-income census tracts is adequate. The percentage of home refinance loans originated in moderate-income census tracts was less than the percentage of owner-occupied units in these tracts; however, performance was greater than the aggregate lending performance in 2014, but less than the aggregate lenders in 2015.

Home Improvement Loans

Home improvement lending in low-income census tracts is good. SunTrust Bank originated 2.9 percent of its home improvement loans in low-income census tracts. This performance was slightly greater than the percentage of owner-occupied units and greater than the aggregate lenders during the review period.

Home improvement lending in moderate-income census tracts is excellent. The percentage of home improvement loans in moderate-income census tracts at 24.3 percent exceeded the percentage of owner-occupied units at 17.7 percent in these tracts. Additionally, the bank's performance was also significantly greater than aggregate lenders during the review period.

Small Business Loans

Small business lending in low-income census tracts is adequate. The percentage of small business loans in low-income census tracts was slightly less than the percentage of small businesses located in these tracts. This performance was greater than aggregate lending performance in 2014, but slightly less than the aggregate lenders in 2015.

Small business lending in moderate-income census tracts is good. SunTrust Bank originated 21.7 percent of its small business loans in moderate-income census tracts, where 19.2 percent of small businesses in the assessment area are operating. SunTrust outperformed aggregate lenders in 2014, but performance was slightly less than the aggregate lenders in 2015.

Lending to Borrowers of Different Incomes and Businesses of Different Sizes

The distribution of loans by borrower income or revenue size of businesses is adequate. For this analysis, the distribution of small business lending across business revenue sizes and HMDA-reportable lending across borrower income levels was compared to available demographic information. Performance context issues were also considered as well as the performance of other banks.

Home Purchase Loans

Home purchase lending to low-income borrowers is poor. The percentage of home purchase loans to low-income borrowers was significantly less than the percentage of low-income families located in the assessment area. Furthermore, SunTrust Bank's lending performance was slightly less than aggregate lending performance during the review period.

Home purchase lending to moderate-income borrowers is also poor. The bank's percentage of home purchase loans was significantly less than the percentage of moderate-income families located in the assessment area. The bank's home purchase lending was also less than the aggregate lending performance during the review period.

Home Refinance Loans

Home refinance lending to low-income borrowers is adequate. The bank's percentage of home refinance loans to low-income borrowers was less than the percentage of low-income families in the assessment area throughout the review period. However, SunTrust Bank's lending exceeded aggregate lending performance throughout the review period.

Home refinance lending to moderate-income borrowers is adequate. The bank's home refinance lending to moderate-income borrowers was less than the percentage of moderate-income families in the assessment area. However, lending to moderate-income borrowers was greater than the aggregate lenders for both years.

Home Improvement Loans

Home improvement lending to low-income borrowers is excellent. The bank's home improvement lending to low-income borrowers was greater than the percentage of low-income families in the assessment area throughout the review period. Additionally, the bank's lending performance was significantly greater than aggregate lenders during the review period.

Home improvement lending to moderate-income borrowers is also excellent. The percentage of home improvement loans to moderate-income borrowers at 26.0 percent was greater than the percentage of moderate-income families in the assessment area at 16.9 percent. Additionally, the bank's performance was significantly greater than the aggregate lending performance during the review period.

Small Business Loans

The distribution of small business loans to businesses of different sizes is good. While the percentage of small business loans to businesses with revenues of \$1 million or less was less than the percentage of small businesses in the assessment area during the review period, SunTrust Bank's performance was significantly greater than the aggregate lending performance in 2014 and 2015. Additionally, 96.0 percent of small business loans were originated in amounts of \$250,000 or less, indicating a willingness to lend in the smaller amounts that are typically requested by small businesses.

Community Development Lending

SunTrust Bank made an adequate level of community development loans in the Greenville assessment area. The bank originated two community development loans totaling \$4.6 million during the review period. Loans were responsive to several community development needs in the assessment area, including the provision of affordable housing and promoting economic development by financing small businesses. SunTrust Bank's community development lending exhibits adequate responsiveness to the community development and credit needs of the assessment area.

These loans were as follows:

- Approximately \$3.5 million in financing to support a LIHTC housing development where all units are affordable to LMI individuals; and
- A loan to a small business targeted to create new jobs for LMI individuals.

INVESTMENT TEST

SunTrust Bank's performance under the investment test is excellent, as evidenced by the excellent level of qualified investment and grants in the Greenville assessment area. The bank made investments (excluding contributions) totaling \$29.0 million in the assessment area; of that, \$24.4 million was invested during the

review period. All of the current period investments supported affordable housing, including \$20.8 million in LIHTC investments that financed over 400 affordable housing units. The bank also invested approximately \$2.2 million in a fund to help preserve deteriorating housing projects or projects at risk of converting to market rate, therefore preserving 200 Section 8 housing units in the assessment area.

SunTrust Bank contributed \$147,900 to nonprofit organizations in the assessment area; nearly \$145,000 was directed to nonprofits that offer community services to LMI individuals. The majority of the bank's contributions were directed to an organization that provides funding and other support to a number of community organizations in the assessment area. The bank also provided contributions to two local universities to support programs designed to help LMI and first generation college students attend and achieve college graduation.

Finally, as described in the state overview section, the bank made donations to statewide organizations that serve the Greenville assessment area, which contributed to the excellent performance in the assessment area.

SERVICE TEST

SunTrust Bank's service test performance in the Greenville assessment area is adequate based on the accessibility of the bank's retail services and the adequate level of community development services.

Retail Services

SunTrust Bank's retail delivery systems are reasonably accessible to the bank's geographies and individuals of different income levels in the Greenville assessment area. The distribution of 20 branch offices and 22 ATMs as of December 31, 2015, was compared to the distribution of households and businesses among the tract categories within the assessment area. During the examination period, the bank had one branch in a low-income census tract representing 5.0 percent of total branches in the assessment area. Low-income census tracts comprised 6.7 percent of the assessment area. The bank had four branches in moderate-income census tracts representing 20.0 percent of total branches in the assessment area. Moderate-income census tracts made up 25.1 percent of the assessment area. For comparison purposes, 4.9 percent of households and 4.2 percent of businesses were located in low-income census tracts while 22.1 percent of households and 19.5 percent of businesses were located in moderate-income tracts.

The record of opening and closing branches generally did not adversely affect the accessibility of the bank's delivery systems, particularly to LMI geographies and individuals in the assessment area.

Retail services do not vary in a way that inconveniences the assessment area, particularly LMI geographies and/or LMI individuals. All branches in LMI tracts offer extended hours; however, while one branch in a moderate-income tract offers weekend hours, the branch in a low-income tract does not offer weekend hours.

Community Development Services

SunTrust Bank provides an adequate level of community development services in the Greenville assessment area. During the review period, the bank provided 406 community development service hours in the assessment area; all service hours were for community services benefiting LMI individuals. The bank focused community development services on financial education and working with United Way. The bank's service activities also supported private foundations, youth associations, municipalities, and housing ministries. Bank employees demonstrated leadership through some board service at community development organizations or committee memberships though these community development service hours were limited. Bank employees also engaged with a number of statewide affordable housing and community development organizations that benefited all assessment areas in the state, including Greenville.

The bank's performance is considered adequate given its size and presence in the Greenville assessment area and the opportunities that exist for community development service.

Metropolitan Areas (Limited Review)

The following metropolitan assessment areas were reviewed using limited-scope examination procedures.

DESCRIPTION OF INSTITUTION'S OPERATIONS IN THE <u>SOUTH CAROLINA</u> METROPOLITAN ASSESSMENT AREAS

• Beaufort Assessment Area (Beaufort County)

- o As of December 31, 2015, SunTrust Bank operated four branches in the assessment area, representing 8.9 percent of its branches in **South Carolina**.
- As of June 30, 2015, the bank had \$216.7 million in deposits in this assessment area, representing a market share of 5.7 percent and 8.9 percent of SunTrust Bank's total deposits in South Carolina.

• Charleston Assessment Area (Berkley, Charleston, and Dorchester counties)

- o As of December 31, 2015, SunTrust Bank operated 13 branches in the assessment area, representing 28.9 percent of its branches in **South Carolina**.
- As of June 30, 2015, the bank had \$342.9 million in deposits in this assessment area, representing a market share of 3.0 percent and 14.1 percent of SunTrust Bank's total deposits in South Carolina.

• Columbia Assessment Area (Saluda County)

- o As of December 31, 2015, SunTrust Bank operated one branch in the assessment area, representing 2.2 percent of its branches in **South Carolina**.
- As of June 30, 2015, the bank had \$56.6 million in deposits in this assessment area, representing a market share of 40.1 percent and 2.3 percent of SunTrust Bank's total deposits in <u>South</u> Carolina.

• Spartanburg Assessment Area (Spartanburg County)

- o As of December 31, 2015, SunTrust Bank operated six branches in the assessment area, representing 13.3 percent of its branches in **South Carolina**.
- As of June 30, 2015, the bank had \$893.1 million in deposits in this assessment area, representing a market share of 19.9 percent and 36.6 percent of SunTrust Bank's total deposits in South Carolina.

CONCLUSIONS WITH RESPECT TO PERFORMANCE TESTS

Through the use of available facts and data, including performance and demographic information, each assessment area's performance was evaluated and compared with the bank's performance in the state. The conclusions regarding performance are provided in the table below. Please refer to the tables in Appendix H for information regarding these areas.

Metropolitan Assessment Areas										
Assessment	Lending Test	Investment Test	Service Test							
Areas										
Beaufort	Not Consistent (Below)	Not Consistent (Below)	<u>Consistent</u>							
Charleston	Not Consistent (Below)	Consistent	Not Consistent (Above)							
Columbia	Not Consistent (Below)	Not Consistent (Below)	<u>Consistent</u>							
Spartanburg	Consistent	<u>Consistent</u>	Not Consistent (Above)							

Metropolitan Areas (Limited Review)

For the lending test, SunTrust Bank received a High Satisfactory rating for the State of South Carolina. Performance in the Spartanburg assessment area was consistent with SunTrust Bank's performance in the state. The performance in the remaining three metropolitan limited-scope assessment areas was weaker than statewide performance; however, these assessment areas were still considered satisfactory except for Columbia. Community development lending was considered excellent in the Charleston and the Spartanburg assessment areas, which impacted the overall community development lending performance for the state. No community development loans were made in the Beaufort and Columbia assessment areas.

For the investment test, SunTrust Bank received an Outstanding rating for the State of South Carolina. The performance in the Charleston and Spartanburg assessment areas was excellent, which positively impacted the overall investment test performance for the state. The performance in Beaufort and Columbia assessment areas was weaker than the bank's performance in the state due to lower levels of qualified investments relative to SunTrust Bank's operations in the assessment areas.

For the overall service test, SunTrust Bank received a rating of Low Satisfactory for the State of South Carolina. Performance in the Charleston and Spartanburg assessment areas was good while performance in Beaufort and Columbia was adequate. Community development service performance was similar to the state in Charleston and Spartanburg and weaker in the Beaufort and Columbia assessment areas. Retail services performance in Charleston, Columbia, and Spartanburg was similar to the state, but weaker in Beaufort.

The performance in the metropolitan limited-scope assessment areas positively impacted the state community development lending performance and the investment test rating, but did not affect the overall service test rating.

Nonmetropolitan Areas (Limited Review)

The following nonmetropolitan assessment areas were reviewed using limited-scope examination procedures.

DESCRIPTION OF INSTITUTION'S OPERATIONS IN THE <u>SOUTH CAROLINA</u> NONMETROPOLITAN ASSESSMENT AREAS

- Greenwood Assessment Area (Greenwood County)
 - o As of December 31, 2015, SunTrust Bank operated one full-service ATM and no branches in the assessment area.
 - o As of June 30, 2015, the bank had no deposits in this assessment area.
- Oconee Assessment Area (Oconee County)
 - o As of December 31, 2015, SunTrust Bank operated one branch in the assessment area, representing 2.2 percent of its branches in **South Carolina**.
 - As of June 30, 2015, the bank had \$41.7 million in deposits in this assessment area, representing a market share of 3.7 percent and 1.7 percent of SunTrust Bank's total deposits in <u>South</u> Carolina.

CONCLUSIONS WITH RESPECT TO PERFORMANCE TESTS

Through the use of available facts and data, including performance and demographic information, each assessment area's performance was evaluated and compared with the bank's performance in the state. The conclusions regarding performance are provided in the table below. Please refer to the tables in Appendix H for information regarding these areas.

Nonmetropolitan Assessment Areas										
Assessment Areas Lending Test Investment Test Service Test										
Greenwood	Not Consistent (Below)	Not Consistent (Below)	<u>Consistent</u>							
Oconee	Not Consistent (Below)	Not Consistent (Below)	Not Consistent (Below)							

For the lending test, performance in both limited-scope nonmetropolitan assessment areas was weaker than SunTrust Bank's performance in the state. Weaker performance was primarily attributable to the absence of community development lending in these assessment areas. The poor distribution of loans by borrower income was an additional factor contributing to weaker performance in both assessment areas, and the very poor geographic distribution of loans impacted the Greenwood assessment area.

For the investment test, performance in both limited-scope nonmetropolitan assessment areas was weaker than SunTrust Bank's performance in the state due to very poor levels of qualified investments relative to the bank's operations in the assessment areas.

For the service test, performance in the nonmetropolitan limited-scope assessment area was divided; service test performance in Greenwood and in Oconee was below the statewide performance. Community development service activities were limited in these assessment areas. Additionally, retail banking services were consistent with the state in Oconee, but weaker in the Greenwood assessment area.

The performance in the nonmetropolitan limited-scope assessment areas did not affect the overall state rating.

CRA RATING FOR TENNESSEE: <u>SATISFACTORY</u>

The Lending Test is rated:

High Satisfactory

High Satisfactory

High Satisfactory

Low Satisfactory

Major factors supporting the rating include the following:

- The geographic distribution of loans reflects good penetration throughout the assessment areas, and the distribution of loans by borrower income reflects adequate penetration among customers of different income levels and businesses of different revenue sizes.
- The bank makes a relatively high level of community development loans in its Tennessee assessment areas.
- The bank provides a significant level of qualified community development investments and grants that are responsive to several identified community development needs of the Tennessee assessment areas.
- Retail services are reasonably accessible to the bank's geographies and individuals of different income levels in the Tennessee assessment areas.
- The bank provides a relatively high level of community development services throughout the Tennessee assessment areas.

SCOPE OF EXAMINATION

Johnson City

A full-scope review was conducted for the following assessment area in the State of Tennessee:

Nashville

Limited-scope reviews were conducted for the remaining 10 assessment areas:

• Cleveland

Cookeville (non-MSA)
 Kingsport

Franklin (non-MSA) • Knoxville

Giles Lawrence (non-MSA)
 Morristown

Hardin (non-MSA)Sevier (non-MSA)

The time period, products, and affiliates evaluated for this assessment area are consistent with the scope discussed in the institution section of this report.

DESCRIPTION OF INSTITUTION'S OPERATIONS IN TENNESSEE

As of June 30, 2015, SunTrust Bank had \$9.2 billion in deposits in Tennessee, accounting for 6.5 percent of the bank's total deposits. SunTrust Bank operated 94 branch offices in Tennessee as of December 31, 2015, representing 6.5 percent of the bank's total branches. HMDA-reportable lending in Tennessee accounted for 5.0 percent of total institutional HMDA-reportable lending by number of loans, and CRA small business lending in Tennessee accounted for 5.4 percent of the bank's total CRA small business lending. Overall, HMDA-reportable and CRA lending in Tennessee accounted for 4.2 percent of the bank's total lending activity by dollar volume, which was less than the percentage of total deposits at 6.5 percent.

The following table shows lending activity from January 1, 2014, through December 31, 2015.

Statewide Summary of Lending Activity

Assessment Areas Located in

Tennessee

Loan Type	#	%	\$ (000s)	%

Originations and Purchases

CONCLUSIONS WITH RESPECT TO PERFORMANCE TESTS IN TENNESSEE

LENDING TEST

The lending test rating in the state of Tennessee is high satisfactory. Overall, performance in Tennessee with regard to the geographic distribution of loans reflects good penetration throughout the assessment areas. The distribution of loans by borrower income reflects adequate penetration among customers of different income levels and businesses of different sizes. Additionally, SunTrust Bank makes a relatively high level of community development loans in Tennessee.

During the review period, SunTrust reported 5,433 HMDA-reportable loans and 4,079 CRA small business loans in Tennessee. As such, HMDA-reportable lending was given greater weight when determining the lending test rating for Tennessee. The rating for Tennessee is based on performance in the Nashville full-scope assessment area. Approximately 60.2 percent of the bank's HMDA-reportable and CRA small business lending (by number of loans) in Tennessee occurred within the Nashville assessment area, thus making this the largest concentration of lending activity in the state. Additionally, 64.4 percent of the bank's total deposits in Tennessee are in the Nashville assessment area.

Details of the bank's HMDA-reportable and CRA small business lending and information regarding lending by peers can be found in Appendix G.

Geographic and Borrower Distribution

The geographic distribution of SunTrust's HMDA-reportable and CRA small business loans is good, and the distribution of loans by borrower income and revenue size of businesses is adequate. As noted above, the rating for the state of Tennessee is derived from the Nashville assessment area. A detailed discussion of the borrower and geographic distribution of lending for the Nashville assessment area is included in the next section of this report.

Community Development Lending

SunTrust Bank makes a relatively high level of community development loans in the state of Tennessee. The bank originated 42 community development loans totaling \$388.4 million that directly benefited the assessment areas in Tennessee during the review period, including 22 loans for \$197.3 million in the Nashville full-scope assessment area. Performance in Nashville was good. The bank also originated two loans for \$1.3 million serving the broader statewide area that includes the bank's assessment areas. The loans serving the statewide area provided financing for a health care provider that receives over 50.0 percent of its revenue from TennCare, the state's Medicaid program.

SunTrust was considered responsive to the community development and credit needs of its Tennessee assessment areas and therefore statewide performance was enhanced by an additional loan for \$6.4 million to a borrower located outside the bank's assessment areas. This loan did not directly serve the assessment areas but did benefit portions of the broader statewide area. This activity financed a 60-unit LIHTC project located in Lafayette, Tennessee, restricted to individuals earning less than 60.0 percent of AMI.

Overall, this level of statewide community development lending is considered good based on the bank's size and presence in its Tennessee assessment areas and the availability of community development lending opportunities. More information on community development loans can be found in the full-scope assessment area section of this report.

INVESTMENT TEST

The investment test rating for Tennessee is high satisfactory.

The bank made a significant level of qualified investments and contributions totaling \$133.0 million that directly benefited the Tennessee assessment areas. The bank's investment portfolio for the state included direct LIHTC and NMTC project investments, LIHTC investment funds, mortgage-backed securities and other bonds, and contributions. The bank also had \$23.4 million in investments that benefited the broader statewide area, including all of the bank's assessment areas. Most of the statewide investments remain on the books from prior review periods and are largely SBA and HUD bonds and mortgage-backed securities.

Nashville was the only full-scope assessment area reviewed; approximately 53.5 percent of total statewide investments benefitted this assessment area while this market accounted for 64.4 percent of statewide deposits. Performance in Nashville was considered adequate relative to the bank's significant market presence in the assessment area. The bank had excellent investment activity in five limited-scope assessment areas, including Cleveland, Franklin, Kingsport, Morristown, and Sevier. Of particular note, in Sevier County the bank invested \$18.0 million in NMTCs in a supermarket-anchored shopping center in a high poverty census tract, which will create 350 new jobs and needed retail services in the community. The investment will also be a catalyst for additional revitalization projects in the area. The strong limited-scope assessment area performance positively impacted the overall statewide investment test rating.

Additional details regarding specific investments and contributions can be found in the full-scope assessment area section, and a summary of the bank's investments and contributions for all assessment areas can be found in Appendix F.

SERVICE TEST

The service test rating for Tennessee is low satisfactory.

Retail Services

Delivery systems, including ATMs and branch office locations, are reasonably accessible to the bank's geographies and individuals of different income levels in the assessment areas. The bank's record of opening and closing of branches has generally not adversely affected the accessibility of its delivery systems, particularly for LMI geographies and/or LMI individuals. Statewide, banking services and hours of operation do not vary in a way that inconveniences the assessment areas, particularly LMI geographies or LMI individuals. However, within the Nashville full-scope assessment area, the bank does not offer extended and

weekend hours at its branches in low-income census tracts at comparable rates as those provided in the middleand upper-income census tract branch locations. Additional detail on the bank's retail services can be found in the full-scope assessment area section of this report.

Community Development Services

SunTrust Bank provided a relatively high level of community development services that benefited LMI residents and small businesses in the state of Tennessee. The bank provided a total of 5,127 qualified service hours during the examination period, including 2,514 hours in the Nashville full-scope assessment area. Performance in Nashville, the largest and only full-scope assessment area, was good. Additionally, employees engaged in 2,180 service hours in limited-scope assessment areas; 7 out of 10 limited-scope assessment areas exhibited adequate performance while 3 limited-scope assessment areas exhibited good or excellent performance. Bank employees also engaged in 435 service hours with statewide organizations, which positively impacted the full-scope assessment area and overall statewide service test rating. Notably, SunTrust Bank employees provided service leadership with statewide entities including the Tennessee Affordable Housing Coalition, the Tennessee Housing Development Agency and advisory committees for the Tennessee Department of Education. This performance is considered good given SunTrust Bank's size and presence in the state of Tennessee.

Additional detail on the bank's retail and community development services can be found in the full-scope assessment area section of this report.

METROPOLITAN AREA

(Full Scope Review)

DESCRIPTION OF INSTITUTION'S OPERATIONS IN THE NASHVILLE, TENNESSEE ASSESSMENT AREA

Overview

The Nashville assessment area consists of Davidson, Robertson, Rutherford, Sumner, Williamson and Wilson counties, which are part of the 14-county Nashville-Davidson-Murfreesboro-Franklin Metropolitan Statistical Area (MSA). As of December 31, 2015, SunTrust Bank operated 51 branch offices in the assessment area, representing 54.3 percent of its branches in Tennessee. The Nashville assessment area represents 64.4 percent of statewide deposits and 60.2 percent statewide HMDA-reportable and CRA loans (by number of loans).

Nashville has a competitive banking market where national and regional banks have a significant presence, but there are also a number of local community banks. According to the June 30, 2015 FDIC Summary of Deposits Report, there were 58 financial institutions operating 508 branch locations across the assessment area with \$44.3 billion in total deposits. SunTrust ranked 3rd in deposit market share with \$5.9 billion or 13.4 percent of total deposits. Bank of America held the largest deposit market share at 18.9 percent followed by Regions Bank at 14.9 percent of total deposits.

HMDA-reportable lending and CRA lending are similarly competitive. SunTrust Bank and SunTrust Mortgage combined had 2.9 percent of total HMDA-reportable lending in the assessment area in both 2014 and 2015. SunTrust Mortgage ranked 12th and SunTrust Bank ranked 29th out of 614 lenders in 2014. In 2015, SunTrust Mortgage ranked 13th and SunTrust Bank again ranked 29th out of 636 lenders. Wells Fargo Bank was the dominant HMDA reporter in both 2014 and 2015, followed by Franklin American Mortgage, JPMorgan Chase, US Bank, and Quicken Loans.

For CRA lending, SunTrust Bank ranked 10th out of 111 lenders in 2014 with 2.7 percent of CRA loans. The bank's CRA lending increased by over 150.0 percent between 2014 and 2015; in 2015, the bank ranked 7th out of 130 lenders with 6.2 percent of total CRA loans. American Express Bank was the leading CRA lender in the market, though US Bank, JPMorgan Chase, and Pinnacle also had a significant share of CRA loans.

Population and Income Characteristics

The Nashville MSA has grown rapidly in the past several years. Population in the Nashville assessment was estimated at 1.5 million in 2015, representing an increase of 6.1 percent since 2010; population in Tennessee increased by 2.4 percent over this time period. Nashville, located in Davidson County, is the principal city in

the assessment area with an estimated population in 2015 of 634,500. The highest population growth rates in the assessment area are in the suburban counties; between 2010 and 2015, population increased by 14.5 percent in Williamson County and by 12.8 percent in Rutherford County.²⁴⁹

The assessment area contains 324 census tracts; 2010 census data indicates that there were 31 (9.6 percent) low-income census tracts, 61 (18.8 percent) moderate-income tracts, 128 (39.5 percent) middle-income tracts, 100 (30.9 percent) upper-income tracts, and 4 (1.2 percent) tracts that were not categorized by income level. The majority of LMI tracts were located in Davidson and Rutherford counties.

For purposes of classifying borrower income, this evaluation uses the FFIEC estimated median family income for the Nashville-Davidson-Murfreesboro-Franklin MSA. As shown, the median family income increased from \$65,600 in 2014 to \$67,100 in 2015.

Borrower Income Levels
Nashville-Davidson-Murfreesboro-Franklin TN, MSA

FFIE	Low			M	rate	N	lle	Upper					
Median	Family Income	0	-	49.99%	50%	-	79.99%	80%	-	119.99%	120%	-	& above
2014	\$65,600	0	-	\$32,799	\$32,800	-	\$52,479	\$52,480	-	\$78,719	\$78,720	-	& above
2015	\$67,100	0	-	\$33,549	\$33,550	-	\$53,679	\$53,680	-	\$80,519	\$80,520	-	& above

There is substantial variation in the median family income throughout the assessment area. Williamson County is one of the wealthiest counties in the country with an estimated median family income of \$108,990 in 2015, while the median family income in Davidson County was \$60,398.²⁵⁰ The detailed median family income figures provide some additional perspective on the economic diversity across the assessment area, which has implications for lending opportunities.

The rapid growth in the assessment area is contributing to greater income disparities, and poverty is a significant concern. In Davidson County, the percentage of families in poverty was estimated at 14.1 percent in 2015, while the poverty rate was 13.2 percent statewide.²⁵¹ Throughout the assessment area, 36.8 percent of families were considered LMI in 2010. Additionally, 36.9 percent of families in low-income tracts and 17.8 percent of families in moderate-income tracts have incomes below the poverty level. The high poverty rates and the concentration of families living below the poverty level in LMI tracts will make lending in these tracts more challenging.

Economic Conditions

Nashville has ranked as one of the top 10 large metropolitan areas for population and job growth for the past few years. While known as the country music capital, Nashville is also a leading national hub for the health care industry and a thriving tourism center. From 2012 through 2016, total nonfarm payrolls grew an average of 4.5 percent annually, triple the 1.5 percent annual rate for the nation during the same period. Job growth has occurred in every sector in the three months ending February 2017, with the largest growth occurring in the professional and business services, leisure and hospitality, and construction sectors. The largest employment concentrations are in government, health care and social assistance, retail trade, accommodations and food services, and manufacturing. Apart from state government, the leading private sector employers are Vanderbilt University, Nissan North America, HCA Holdings, Inc., and St. Thomas Health. The sector is the past of the past payrent and provide sector employers are vanderbilt University, Nissan North America, HCA Holdings, Inc., and St. Thomas Health.

The robust economic climate in middle Tennessee is evident in the falling unemployment rates. Between 2014 and 2015, the unemployment rate in the Nashville MSA decreased from 5.2 percent to 4.6 percent. Within the assessment area, the lowest unemployment rate is in Williamson County, at 4.1 percent. Employment conditions in the MSA compare very favorably to the state, with unemployment at 5.8 percent in 2015, and nationwide, with an unemployment rate of 5.0 percent.²⁵⁵

²⁵⁵ "2015 Home." U.S. Bureau of Labor Statistics. U.S. Bureau of Labor Statistics, n.d. Web. 10 July 2017.

According to 2015 Dun & Bradstreet information, there were 72,660 businesses within the Nashville assessment area, 91.6 percent of which had total annual revenues less than or equal to \$1 million and were therefore considered to be small businesses. Between 2012 and 2015, small business lending increased by 16.5 percent, with 26,940 loans made in 2015. During this same period, loans made to firms with revenues under \$1.0 million increased by 47.0 percent, representing 52.6 percent of total small business loans; this may indicate that there are fewer obstacles for smaller firms to access credit in the market.²⁵⁶

Census data indicates that there were 579,110 housing units located in the assessment area in 2010, of which 61.8 percent were owner-occupied, 30.1 percent were rental units, and 8.2 percent were vacant. Rental housing was disproportionally concentrated in Davidson County, which had 48.4 percent of total housing units but 61.4 percent of all the rental units in the assessment area. The median age of the housing stock across the assessment area was 28 years, though housing in Davidson County was much older (35 years) compared to Williamson County (17 years). Housing units in the LMI census tracts were also older compared to the assessment area overall. These factors indicate that HMDA-reportable lending may be more limited in LMI tracts, particularly in Davidson County.

Population and employment growth is driving a very hot real estate market in Nashville. Home values rose, on average, by 6.0 to 7.0 percent across the entire assessment area during the review period. Home price appreciation was much greater in Davidson County, where prices increased 9.0 to 11.0 percent during the review period. The median home price in the assessment area in December 2016 was \$239,731, though home prices varied widely throughout the assessment area. In December 2016, Williamson County had the highest median home price of \$391,279, while housing in Robertson County was most affordable with a median home price of \$175,658. The median home price in Davidson County was \$222,696. Home sales increased in most counties in the assessment area in 2015 but slowed, and even declined, in some counties in 2016.²⁵⁷ The slowing sales are driven by the disparity between supply and demand, particularly in certain counties and at certain price points. Declining supply relative to demand is also contributing to rising home prices.

To meet rising demand, new home construction is underway, and the number of permits for new single-family homes increased by 155.0 percent between 2011 and 2015; more than 75.0 percent of the new home building is occurring in Davidson, Williamson, and Rutherford counties.²⁵⁸ Land prices in Davidson and Williamson counties are also increasing, which is driving up home prices and reducing the inventory of vacant lots for future development, which will make meeting demand for new housing, and particularly affordable housing, a bigger challenge in the near future.²⁵⁹

²⁵⁹ Ward, Gethan. "Nashville struggling to meet demand for new homes." The Tennessean, 22 Aug. 2016. Print. 08 July 2017.

The affordability ratio for entire the assessment area indicates that the housing market in the assessment area is generally in line with household incomes when the median home price is compared to median household income. However, housing in the region is significantly less affordable than elsewhere in the state, and home values continue to rise much faster than incomes; therefore, affordability is declining rapidly in certain communities within the assessment area.

Much of the population growth in Davidson County has been driven by millennials, who want to live in the urban center. This trend has fueled a particularly robust multifamily housing market in the Nashville MSA. During the fourth quarter of 2016, the apartment vacancy rate in the metropolitan area was 4.2 percent, up from 3.6 percent during the fourth quarter of 2015. The average rent was \$1,104, an increase of more than 7.0 percent over the year before; nationally, rents increased by 3.0 percent during this time period. An estimated 7,900 units were added to the apartment inventory in the metropolitan area from the fourth quarter of 2015 to the fourth quarter of 2016, which represents a 6.0 percent expansion of the existing inventory during the period. An estimated 13,400 apartment units are currently under construction in the metropolitan area, including 9,075 units in Davidson County; construction is particularly active in and around downtown Nashville. ²⁶¹ Most of the new development is high-end or luxury apartments. Simultaneously, as existing income-affordable housing is being demolished to make way for new housing or converted to market rate units, the supply of affordable housing that is located near job centers, transit, and services is dwindling.

Demographic Characteristics by Census Tract

The following table based on 2015 FFIEC Census Data and 2015 Dun & Bradstreet information presents key demographic and business information used to help develop a performance context for the assessment area.

²⁶⁰ The affordability index measures how affordable the median home price is to households earning the median income, assuming current mortgage rates. A baseline of 100 indicates that median home prices are in line with median household income; an index greater than 100 indicates the housing is more affordable. According to Federal Reserve Bank of Atlanta calculations, the affordability index for the assessment area in December 2016 was 153, though there was variation across the counties, with Davidson, Williamson and Wilson counties relatively less affordable than elsewhere in the region. Source: Federal Reserve Bank of Atlanta calculations of data provided by Moody's Analytics.

Credit and Community Development Needs

Interviews with Federal Reserve staff and community contacts along with information provided by bank management indicate that the Nashville market has a relatively strong community development environment with numerous community service organizations targeting LMI individuals and families. In addition, there are several active CDFIs specializing in affordable housing finance and small business lending, as well as an effective network of nonprofits providing financial counseling. These assets create a favorable environment and opportunity for banks to partner with nonprofits, developers and CDFIs to provide affordable housing, neighborhood revitalization, and small business development by investing, lending directly, or providing technical assistance to the organizations or those they serve. It is also important to note that the community development industry is most established in Davidson County, but many of the organizations serve a broader regional area. In the suburban counties, additional nonprofit capacity is needed to address community development needs.

Increasing the supply of affordable housing, and specifically affordable rental housing, is one of the primary community development needs throughout the assessment area but particularly in Davidson County. A recent report showed that in 2015 there was a shortage of 17,754 affordable rental housing units to meet the demand for households that earn 60.0 percent or below of the median household income. The shortage is expected to increase to more than 31,000 units by 2025 if current trends continue.²⁶² The rental gap is driven in part by the decline in affordable rental units. A report by the Federal Reserve Bank of Atlanta found that in Davidson County, there had been a 17.0 percent decline between 2010 and 2014 in the number of units with rent under \$750; the loss of units was much greater in certain communities and particularly those close to downtown and other job centers.²⁶³ Approximately 47.3 percent of renters in Davidson County between 2011 and 2015 were paying more than 30.0 percent of their income for housing and are therefore considered to be cost-burdened; while the issue is less acute in other counties, the number of cost-burdened renters in the assessment area has increased significantly.²⁶⁴ A report by the National Low Income Housing Coalition confirmed housing affordability is a problem for renters in Nashville. According to the study, in 2016, a minimum wage worker would have to work 98 hours a week in order to afford the fair market rent for a two-bedroom apartment in the Nashville MSA.²⁶⁵

The public and private sectors have both engaged in efforts to increase the supply of affordable housing. In 2013, the City of Nashville created an affordable housing trust fund, The Barnes Fund for Affordable Housing. The City has recently adopted a housing strategy, focused on funding, building, retaining, and preserving affordable housing and will rely on public and private sector partnerships to implement the plan.

²⁶⁵ "Out of Reach 2016 Report." National Low Income Housing Coalition, n.d. Web. 10 July 2017.

There are other opportunities for banks to support affordable housing, by lending or contributing to local nonprofit developers or by investing in one of the housing-related CDFIs serving the region. The limited number of nonprofit affordable housing developers is a challenge in implementing the mayor's affordable housing plan, and building capacity of nonprofits through technical assistance and funding is an important opportunity for banks. Additionally, banks can support affordable housing and neighborhood revitalization efforts by participating in the Low Income Housing Tax Credit (LIHTC) program. Between 2014 and 2015, the LIHTC program allocated nearly \$230 million in tax credits for an approximate 4,300 affordable housing units in the assessment area, with the majority of the units located in Davidson and Rutherford counties. ²⁶⁶ It is important to note that LIHTC projects in Davidson County are historically very competitive for bank investors.

Community contacts with local nonprofit organizations that assist small businesses addressed opportunities available to local financial institutions to participate in activities related to small business development and lending. Contacts stated that the economy is thriving in Nashville and banks are engaged in lending. However, they felt there are still credit gaps for minority and women-owned businesses, as well as financing for start-up businesses. A CDFI noted that direct investments and contributions to their organization are one of the biggest opportunities for bank participation since they serve small businesses that are unable to get bank financing due to underwriting constraints and suitability. Furthermore, local financial institutions can support their work by serving on loan or advisory committees, sending referrals, and sponsoring business support programming for current and prospective entrepreneurs.

There is an ongoing need for bank support of programs that are working to improve the financial stability of LMI individuals. In the assessment area, there are several initiatives underway including a free tax assistance program and BankOn Music City, led by United Way of Metropolitan Nashville. In addition, the City of Nashville operates Financial Empowerment Centers (FECs), which are resource centers created to help residents reduce debt and build assets through free, one-on-one financial counseling. All three of these programs rely on volunteer support and provide community development service and investment opportunities for financial institutions.

²⁶⁶ 2014, 2015 and 2016 Program Summary and Economic Impact Report. Tennessee Housing Development Agency. n.d. Web. 08 July 2017. https://thda.org/research-planning/program-summary.

CONCLUSIONS WITH RESPECT TO PERFORMANCE TESTS IN THE NASHVILLE, TENNESSEE ASSESSMENT AREA

LENDING TEST

SunTrust Bank's lending performance in the Nashville assessment area is good. The geographic distribution of loans reflects good penetration throughout the assessment area. Also, the distribution of borrowers reflects adequate penetration among borrowers of different income levels and businesses of different revenue sizes. In addition, the bank makes a relatively high level of community development loans.

SunTrust Bank reported 3,342 (58.3 percent) HMDA-reportable loans and 2,387 (41.7 percent) CRA small business loans in the Nashville assessment area during the review period. Therefore, HMDA-reportable lending received greater weight in determining the bank's lending test rating in the assessment area. The Nashville assessment area accounted for 71.3 percent of SunTrust Bank's total HMDA-reportable lending in Tennessee and 63.5 percent of its total statewide CRA small business lending by dollar volume during the review period. In comparison, 64.4 percent of SunTrust Bank's Tennessee deposits are in this assessment area.

For the lending test analysis, lending performance in low-, moderate-, middle-, and upper-income census tracts and to low-, moderate-, middle-, and upper-income borrowers was considered for each product; however, comments for activity in middle- and upper-income tracts and to middle- and upper-income borrowers are only included when they were material to the outcome of the analyses. Details of the bank's mortgage and small business lending and information regarding lending by peers can be found in Appendix G.

Geographic Distribution of Loans

For this analysis the geographic distribution of small business and HMDA-reportable lending, including both originations and purchases, was compared with available demographic information. Performance context information and aggregate lending data were also taken into consideration. For instance, unemployment rates, poverty rates, the level of owner-occupied units, and the volume of small businesses in LMI census tracts were factors considered when assessing the bank's lending performance. Considering all of these factors, SunTrust Bank's geographic distribution of loans reflects good penetration throughout the assessment area.

Home Purchase Loans

Home purchase lending in low-income census tracts is excellent. SunTrust Bank's home purchase lending in low-income census tracts was greater than the percentage of owner-occupied units in these tracts. The bank's performance also exceeded the aggregate lending performance during the review period.

Home purchase lending in moderate-income census tracts is adequate. Lending performance in these tracts was similar to the percentage of owner-occupied units during the review period. However, the bank's performance at 13.5 percent in 2014 and 13.3 percent in 2015 was only slightly greater than the aggregate lender performance at 11.9 percent and 11.8 percent, respectively.

Home Refinance Loans

Home refinance lending in low-income census tracts is adequate. Lending performance in low-income census tracts was comparable to the percentage of owner-occupied units in these tracts during the review period. However, the bank's performance was slightly greater than aggregate performance in low-income census tracts during the review period. For example, the bank made 3.1 percent of its home refinance loans in these tracts in 2015 compared to the aggregate lender performance at 2.9 percent.

Home refinance lending in moderate-income census tracts is also adequate. Lending performance in moderate-income census tracts was less than the percentage of owner-occupied units located in these tracts. The bank's home refinance lending in moderate-income census tracts was also slightly less than aggregate lending performance during the review period.

Home Improvement Loans

Home improvement lending in both LMI census tracts is excellent. The percentage of home improvement loans in both LMI census tracts exceeded the percentage of owner-occupied units in these tracts. The bank's performance was also greater than aggregate lenders during the review period.

Small Business Loans

Small business lending in low-income census tracts is excellent. SunTrust Bank originated 12.0 percent of its small business loans in low-income census tracts, where 7.2 percent of small businesses in the assessment area are located. The bank's performance was also greater than aggregate lenders.

Small business lending in moderate-income census tracts is good. The percentage of small business loans in moderate-income census tracts was greater than the distribution of small businesses operating in moderate-income census tracts. The bank's performance was also greater than aggregate lending in these tracts in 2014, but less than aggregate lending in 2015.

Lending to Borrowers of Different Incomes and Businesses of Different Sizes

The distribution of loans by borrower income or revenue size of businesses is adequate. For this analysis, the distribution of small business lending across business revenue sizes and HMDA-reportable lending across borrower income levels was compared to available demographic information. Performance context issues were also considered as well as the performance of other banks.

Home Purchase Loans

Home purchase lending to low-income borrowers is adequate. SunTrust Bank's home purchase lending to low-income borrowers was less than the percentage of low-income families located in the assessment area. However, the bank's home purchase lending to low-income borrowers was comparable to aggregate lending performance during the review period.

Home purchase lending to moderate-income borrowers is also adequate. The bank's home purchase lending to moderate-income borrowers was greater than the percentage of moderate-income families in the assessment area during the review period. Additionally, the bank's home purchase lending to moderate-income borrowers was slightly greater than aggregate lending performance during the review period.

Home Refinance Loans

Home refinance lending to low-income borrowers is adequate. SunTrust Bank's home refinance lending to low-income borrowers was less than the percentage of low-income families in the assessment area throughout the review period. However, the bank's lending performance in this category was greater than aggregate lending performance during the review period.

Home refinance lending to moderate-income borrowers is good. The bank's percentage of home refinance loans to moderate-income borrowers was slightly less than the percentage of moderate-income families in the assessment area throughout the review period. However, the bank's home refinance lending to moderate-income borrowers was greater than aggregate lending during the review period.

Home Improvement Loans

Home improvement lending to low-income borrowers is good. The bank's home improvement lending to low-income borrowers was less than the percentage of low-income families in the assessment area throughout the review period. However, the bank's lending exceeded aggregate lending performance during the review period.

Home improvement lending to moderate-income borrowers is also good. The percentage of home improvement loans made to moderate-income borrowers was greater than the percentage of moderate-income families in the assessment area throughout the review period. Additionally, the bank's performance was greater than aggregate lenders in 2014, but slightly less than aggregate lenders in 2015.

Small Business Loans

The distribution of small business loans to businesses of different sizes is adequate. While the percentage of small business loans to businesses with revenues of \$1 million or less was less than the percentage of small businesses in the assessment area, SunTrust Bank's performance was greater than aggregate lending performance during the review period. Additionally, 94.2 percent of small business loans were originated in amounts of \$250,000 or less, indicating a willingness to lend in smaller amounts that are typically requested by small businesses.

Community Development Lending

SunTrust Bank makes a relatively high level of community development loans in the Nashville assessment area. The bank originated 22 community development loans totaling \$197.3 million during the review period. Loans were responsive to several community development needs in the assessment area, including the provision of affordable housing, community services targeted to LMI individuals, and revitalizing and stabilizing low- or moderate-income geographies. The bank provided \$123 million in loans to revitalize and stabilize LMI

geographies; \$60 million in support of affordable housing; and \$15 million supporting community services to LMI individuals. SunTrust Bank's community development lending exhibits good responsiveness to the community development and credit needs of the assessment area.

Examples of community development lending include but are not limited to:

- Two loans totaling \$22 million to support two low-income housing tax credit (LIHTC) projects, in which 22 units will be subsidized by Section 8 vouchers, 23 units restricted to individuals earning less than 50.0 percent of the area median income (AMI), and 131 units restricted to those earning less than 60.0 percent of AMI;
- Three loans for a total of \$31 million to finance an affordable housing builder. The builder specializes in building homes and closing loans using Tennessee Housing Development Agency mortgages, available only to borrowers earning up to 80.0 percent of AMI. The builder has been recognized for providing quality, affordable housing.
- A loan for \$475,000 to support a nonprofit organization offering programs for the LMI mentally ill population, including a homeless outreach program, and assistance in obtaining employment and job retention; and
- Three loans totaling \$13 million for financing the public transportation system serving the area, especially LMI individuals. The loans support a program that enables employers to provide transportation as a benefit to their LMI employees.

INVESTMENT TEST

SunTrust Bank makes an adequate level of qualified investment and grants relative to the bank's presence in the Nashville assessment area; investments demonstrate responsiveness to several assessment area needs.

The bank made investments (excluding contributions) totaling \$70.5 million in the assessment area; of that, \$46.6 million was invested during the review period. All of the current period investments were responsive to the need across the region for affordable rental housing, including \$28.5 million in three LIHTC projects that provided 240 new affordable units. The other current period investments were securities backed by GNMA mortgages on affordable multifamily projects. All prior period investments provided financing for affordable multifamily housing through investments in LIHTC projects and investment funds as well as mortgage-backed securities. As noted earlier, the assessment area also benefits from an SBA 504 loan fund investment that covers a broader regional area, including the assessment area.

SunTrust Bank also contributed \$663,500 to nonprofit organizations during the review period. Nearly all of the contributions supported community services, including \$450,000 to United Way for programs targeting LMI individuals. Other donations supported nonprofit capacity building, scholarships for LMI youth, youth development and school support programs, assistance for the homeless and other community services for LMI individuals.

SunTrust is considered a leader in the Nashville market in terms of deposit market share and branches yet the bank's investments did not reflect this level of leadership. Investments demonstrate a low level of responsiveness to a range of community needs, including affordable homeownership, small business financial assistance, or the revitalization and stabilization of LMI neighborhoods. As noted in the performance context, opportunities for bank investments to address these needs do exist in the assessment area.

SERVICE TEST

SunTrust Bank's service test performance in the Nashville assessment area is adequate based on the accessibility of the bank's retail services and the relatively high level of community development services.

Retail Services

Delivery systems are reasonably accessible to the bank's geographies and individuals of different income levels in the Nashville assessment area. The distribution of 51 branch offices and 89 ATMs as of December 31, 2015, was compared to the distribution of households and businesses among the tract categories within the assessment area. The bank has five branches in a low-income census tract representing 9.8 percent of total branches in the assessment area and eight branches in moderate-income census tracts representing 15.7 percent of total branches in the assessment area. For comparison purposes, 7.7 percent of households and 7.5 percent of businesses were located in low-income census tracts, and 18.8 percent of households and 17.6 percent of businesses were located in moderate-income tracts. During the review period, no branches were opened or closed in LMI census tracts; however, two branches were closed in middle- and upper-income census tracts. The bank's record of opening and closing of branches has generally not adversely affected the accessibility of its delivery systems, particularly to LMI geographies and individuals in the assessment area.

SunTrust Bank offers extended and weekend hours at some of the branches in LMI tracts. The bank offers extended and weekend hours at lower rates in its low-income census tract branch locations than at those located in middle- and upper-income census tracts. However, banking hours of operation do not vary in a way that inconveniences LMI geographies and individuals in the assessment area.

Community Development Services

SunTrust Bank provides a relatively high level of community development services in the Nashville area. During the review period, SunTrust Bank employees provided 2,514 service hours in various capacities with over 65 different organizations. Bank employees engaged in providing 81 affordable housing service hours and 2,425 community service hours. The bank focused heavily on financial education, and nearly 47.0 percent of the community development service hours were dedicated to providing financial education services for youth in partnership with Junior Achievement. As noted earlier, bank employees also engaged in 435 service hours with statewide organizations, which positively impacted the full-scope assessment area and overall statewide service test rating. The bank's performance is considered good given SunTrust Bank's size and presence in the assessment area.

Metropolitan Areas (Limited Review)

The following metropolitan assessment areas were reviewed using limited-scope examination procedures.

DESCRIPTION OF INSTITUTION'S OPERATIONS IN THE <u>TENNESSEE</u> METROPOLITAN ASSESSMENT AREAS

• Cleveland Assessment Area (Bradley County)

- o As of December 31, 2015, SunTrust Bank operated two branches in the assessment area, representing 2.1 percent of its branches in **Tennessee**.
- O As of June 30, 2015, the bank had \$90.4 million in deposits in this assessment area, representing a market share of 6.0 percent and 1.0 percent of SunTrust Bank's total deposits in **Tennessee**.

Johnson City Assessment Area (Washington County)

- o As of December 31, 2015, SunTrust Bank operated four branches in the assessment area, representing 4.3 percent of its branches in **Tennessee**.
- As of June 30, 2015, the bank had \$208.0 million in deposits in this assessment area, representing a market share of 10.9 percent and 2.3 percent of SunTrust Bank's total deposits in Tennessee.

• Kingsport Assessment Area (Hawkins and Sullivan counties)

- o As of December 31, 2015, SunTrust Bank operated one branch in the assessment area, representing 1.1 percent of its branches in **Tennessee**.
- o As of June 30, 2015, the bank had \$56.2 million in deposits in this assessment area, representing a market share of 2.4 percent and 0.6 percent of SunTrust Bank's total deposits in **Tennessee**.

Knoxville Assessment Area (Anderson, Blount, Knox, and Loudoun counties)

- o As of December 31, 2015, SunTrust Bank operated 29 branches in the assessment area, representing 30.9 percent of its branches in **Tennessee**.
- O As of June 30, 2015, the bank had \$2.5 billion in deposits in this assessment area, representing a market share of 17.9 percent and 26.7 percent of SunTrust Bank's total deposits in **Tennessee**.

• Morristown Assessment Area (Hamblen County)

- o As of December 31, 2015, SunTrust Bank operated two branches in the assessment area, representing 2.1 percent of its branches in **Tennessee**.
- As of June 30, 2015, the bank had \$162.3 million in deposits in this assessment area, representing a market share of 19.1 percent and 1.8 percent of SunTrust Bank's total deposits in Tennessee.

Metropolitan Areas (Limited Review)

CONCLUSIONS WITH RESPECT TO PERFORMANCE TESTS

Through the use of available facts and data, including performance and demographic information, each assessment area's performance was evaluated and compared with the bank's performance in the state. The conclusions regarding performance are provided in the table below. Please refer to the tables in Appendix H for information regarding these areas.

Metropolitan Assessment Areas										
Assessment	Lending Test	Investment Test	Service Test							
Areas										
Cleveland	<u>Consistent</u>	Not Consistent (Above)	<u>Consistent</u>							
Johnson City	Not Consistent (Below)	Not Consistent (Below)	Consistent							
Kingsport	Not Consistent (Below)	Not Consistent (Above)	Not Consistent (Below)							
Knoxville	Consistent	Not Consistent (Below)	Not Consistent (Above)							
Morristown	<u>Consistent</u>	Not Consistent (Above)	<u>Consistent</u>							

For the lending test, SunTrust Bank received a High Satisfactory rating for the State of Tennessee. Performance in the Cleveland, Knoxville, and Morristown assessment areas was consistent with the bank's performance in the state. Performance in Johnson City and Kingsport was weaker than overall performance in the state primarily due to the absence of community development loans in these assessment areas; however, both assessment areas were still considered adequate.

For the investment test, SunTrust Bank received a High Satisfactory rating for the state of Tennessee. Performance in Cleveland, Kingsport, and Morristown was excellent, thus performance in these assessment areas was stronger that the bank's statewide performance. Performance in the Johnson City and Knoxville assessment areas was weaker than the bank's performance in the state due to poor levels of investment and contribution activity relative to the bank's size of operational presence in the assessment area.

For the service test, SunTrust Bank received a rating of Low Satisfactory for the State of Tennessee. Service test performance in all metropolitan assessment areas was consistent with the bank's performance for the state with the exception of Kingsport and Knoxville which were below and above the state performance, respectively. Community development service performance was consistent with the statewide performance in Cleveland and Knoxville assessment areas, while it was below statewide performance in Johnson City and Kingsport due to a limited number of qualified community development services. Community development performance in Morristown was adequate. Additionally, retail banking services were weaker in Cleveland and Kingsport assessment areas compared to the state, consistent in Knoxville, and stronger in Johnson City and Morristown.

The performance in the metropolitan limited-scope assessment areas did not affect the overall state rating, with the exception of the investment test, which was positively impacted by strong limited-scope assessment area performance.

Nonmetropolitan Areas (Limited Review)

The following nonmetropolitan assessment areas were reviewed using limited-scope examination procedures.

DESCRIPTION OF INSTITUTION'S OPERATIONS IN THE <u>TENNESSEE</u> NONMETROPOLITAN ASSESSMENT AREAS

• Cookeville Assessment Area (Putnam County)

- o As of December 31, 2015, SunTrust Bank operated one full-service ATM and no branches in the assessment area.
- o As of June 30, 2015, the bank had no deposits in this assessment area.

• Franklin Assessment Area (Franklin County)

- o As of December 31, 2015, SunTrust Bank operated one branch in the assessment area, representing 1.1 percent of its branches in **Tennessee**.
- o As of June 30, 2015, the bank had \$43.4 million in deposits in this assessment area, representing a market share of 8.5 percent and 0.5 percent of SunTrust Bank's total deposits in **Tennessee**.

• Giles Lawrence Assessment Area (Giles and Lawrence counties)

- o As of December 31, 2015, SunTrust Bank operated two branches in the assessment area, representing 2.1 percent of its branches in **Tennessee**.
- As of June 30, 2015, the bank had \$138.4 million in deposits in this assessment area, representing a market share of 11.0 percent and 1.5 percent of SunTrust Bank's total deposits in Tennessee.

• Hardin Assessment Area (Hardin County)

- o As of December 31, 2015, SunTrust Bank operated one branch in the assessment area, representing 1.1 percent of its branches in **Tennessee**.
- o As of June 30, 2015, the bank had \$50.6 million in deposits in this assessment area, representing a market share of 9.8 percent and 0.5 percent of SunTrust Bank's total deposits in **Tennessee**.

• Sevier Assessment Area (Sevier County)

- o As of December 31, 2015, SunTrust Bank operated one branch in the assessment area, representing 1.1 percent of its branches in **Tennessee**.
- o As of June 30, 2015, the bank had \$68.5 million in deposits in this assessment area, representing a market share of 3.3 percent and 0.7 percent of SunTrust Bank's total deposits in **Tennessee**.

Nonmetropolitan Areas (Limited Review)

CONCLUSIONS WITH RESPECT TO PERFORMANCE TESTS

Through the use of available facts and data, including performance and demographic information, each assessment area's performance was evaluated and compared with the bank's performance in the state. The conclusions regarding performance are provided in the table below. Please refer to the tables in Appendix H for information regarding these areas.

Nonmetropolitan Assessment Areas									
Assessment Areas Lending Test Investment Test Service Test									
Cookeville	Not Consistent (Below)	Not Consistent (Below)	Not Consistent (Above)						
Franklin	Not Consistent (Below)	Not Consistent (Above)	Not Consistent (Below)						
Giles Lawrence	Not Consistent (Below)	Not Consistent (Below)	Not Consistent (Below)						
Hardin	Not Consistent (Below)	Not Consistent (Below)	Not Consistent (Below)						
Sevier	Consistent	Not Consistent (Above)	<u>Consistent</u>						

For the lending test, performance in the Cookeville, Franklin, Giles Lawrence, and Hardin limited-scope assessment areas was weaker than the bank's performance in the state; however, performance in these assessment areas was still satisfactory except in the Franklin assessment area. Community development lending was excellent in Cookeville and Sevier. Very poor and poor community development lending in the Franklin, Giles Lawrence, and Hardin assessment areas contributed to the weaker performance. The poor geographic distribution of loans and the poor distribution of loans by borrower income also contributed to the weaker performance in the Cookeville assessment area.

For the investment test, performance in the Cookeville, Giles Lawrence, and Hardin limited-scope assessment areas was weaker than the bank's performance in the state due to very poor and poor levels of qualified investments relative to the bank's operations. The performance in the Franklin and Sevier assessment areas was excellent, which was stronger than the bank's performance in the state. The bank had a significant NMTC investment in the Sevier assessment area, which is described in more detail in the State of Tennessee section.

For the service test, performance in the nonmetropolitan limited-scope assessment areas was generally below the statewide performance. The service test performance in the Cookeville assessment area was stronger than the statewide performance while performance in the Franklin, Giles Lawrence, and Hardin assessment areas was below the statewide performance, and Sevier was consistent with statewide performance. Community development service performance was excellent in the Cookeville assessment area but weaker than the statewide performance in the other four assessment areas. Additionally, retail banking services were weaker than the statewide performance in the Cookeville and Sevier assessment areas, while performance was consistent in the remaining assessment areas.

The performance in the nonmetropolitan limited-scope assessment areas did not affect the overall state rating, with the exception of the investment test, which was positively impacted by strong limited-scope assessment area performance.

CRA RATING FOR VIRGINIA: <u>SATISFACTORY</u>

The Lending Test is rated: High Satisfactory
The Investment Test is rated: High Satisfactory
The Service Test is rated: High Satisfactory

Major factors supporting the rating include the following:

- The geographic distribution of loans reflects good penetration throughout the assessment areas, and the distribution of loans by borrower income reflects good penetration among customers of different income levels and businesses of different revenue sizes.
- The bank makes a relatively high level of community development loans in its Virginia assessment areas.
- The bank provides a significant level of qualified investments and grants in response to the community development needs of the Virginia assessment areas.
- Retail services are reasonably accessible to the bank's geographies and individuals of different income levels in the assessment areas.
- The bank provides a relatively high level of community development services throughout the assessment areas.

SCOPE OF EXAMINATION

A full-scope review was conducted for the following assessment areas in the State of Virginia:

Hampton Roads

Richmond

Limited-scope reviews were conducted for the remaining 15 assessment areas:

- Charlottesville
- Eastern Shore of Virginia (non-MSA)
- Franklin City (non-MSA)
- Harrisonburg
- Lynchburg
- Orange (non-MSA)
- Radford
- Roanoke

- Rockbridge (non-MSA)
- Shenandoah (non-MSA)
- Smyth (non-MSA)
- South Boston (non-MSA)
- Staunton
- West Piedmont (non-MSA)
- Winchester

The time period, products, and affiliates evaluated for these assessment areas are consistent with the scope discussed in the institution section of this report.

DESCRIPTION OF INSTITUTION'S OPERATIONS IN VIRGINIA

As of June 30, 2015, SunTrust Bank had \$11.3 billion in deposits in Virginia accounting for 7.9 percent of the bank's total deposits. SunTrust Bank operated 134 branch offices in Virginia as of December 31, 2015, representing 9.3 percent of the bank's total branches. HMDA-reportable lending in Virginia accounted for 11.1 percent of total institutional HMDA-reportable lending by number of loans, and CRA small business lending in Virginia accounted for 10.0 percent of the bank's total CRA small business lending. Overall, HMDA-reportable and CRA lending in Virginia accounted for 9.7 percent of the bank's total lending activity by dollar volume, which was greater than the percentage of total deposits at 7.9 percent.

The following table shows lending activity from January 1, 2014, through December 31, 2015.

Statewide Summary of Lending Activity

Assessment Areas Located in

Virginia

	· 8			
Loan Type	#	%	\$ (000s)	%

Originations and Purchases

CONCLUSIONS WITH RESPECT TO PERFORMANCE TESTS IN VIRGINIA

LENDING TEST

The lending test rating in the State of Virginia is high satisfactory. Overall, performance in Virginia with regard to the geographic distribution of loans reflects good penetration throughout the assessment areas. The distribution of loans by borrower income also reflects good penetration among customers of different income levels and businesses of different sizes. Additionally, SunTrust Bank made a relatively high level of community development loans in Virginia.

During the review period, SunTrust reported 12,156 HMDA-reportable loans and 7,490 small business loans in Virginia. As such, HMDA-reportable lending was given greater weight when determining the lending test rating for Virginia. The rating for Virginia is based on performance in the Hampton Roads and Richmond full-scope assessment areas. 66.4 percent of the bank's combined HMDA-reportable and small business lending in Virginia occurred within these two assessment areas.

Details of the bank's HMDA-reportable and small business lending and information regarding lending by peers can be found in Appendix G.

Geographic and Borrower Distribution

The geographic distribution of SunTrust's HMDA-reportable and small business loans is good, and the distribution of loans by borrower income and revenue size of businesses is also good. As noted above, the rating for the state of Virginia is derived from the Hampton Roads and Richmond full-scope assessment areas. A detailed discussion of the borrower and geographic distribution of lending for both assessment areas is included in the full-scope sections of this report.

Community Development Lending

Sun Trust Bank makes a relatively high level of community development loans in the state of Virginia. The bank originated 97 community development loans totaling \$442 million in Virginia during the review period, including 52 loans totaling \$370 million in the Hampton Roads and Richmond full-scope assessment areas. Performance in Hampton Roads was good; performance in Richmond was excellent. Lending in the limited-scope assessment areas was generally below the performance of the full-scope assessment areas. Of the 15 limited-scope areas, 11 exhibited either poor or very poor performance.

SunTrust was considered responsive to the community development and credit needs of its Virginia assessment areas and, therefore, statewide performance includes one additional loan for \$18.1 million to a borrower located outside the bank's assessment areas. This loan did not directly serve the assessment areas but did benefit portions of the broader statewide area. This activity consisted primarily of financing the revitalization and stabilization of a rural area in Abingdon, creating about 120 full-time jobs in an area that experienced over 8.1 percent unemployment in 2013.

Overall, this level of statewide community development lending is considered good based on the bank's size and presence in its Virginia assessment areas, enhanced by activity in the broader statewide area, and the availability of community development lending opportunities. More information on community development loans can be found in the full-scope assessment area sections of this report.

INVESTMENT TEST

The investment test rating for the state of Virginia is high satisfactory.

The bank made a significant level of qualified investments and contributions totaling \$72.1 million that directly benefited the Virginia assessment areas; of that total, \$52.8 million was invested during the review period. The bank's investment portfolio for the state included direct LIHTC and NMTC project investments, LIHTC investment funds, mortgage-backed securities and other bonds, and contributions. During the review period, the bank contributed \$2.5 million to nonprofits engaged in a variety of community development activities. The bank also had \$64.2 million in investments that benefited the broader statewide area, including all of the bank's assessment areas. Most of the statewide investments remain on the books from prior review periods and are largely SBA and HUD bonds and MBS. Statewide investments include contributions of \$220,000 to organizations that provide community services and affordable housing for LMI communities across the entire state. Lastly, the state benefitted from regional investments of approximately \$30.8 million that are described in the institution overview.

Hampton Roads and Richmond were the two full-scope assessment area reviewed. Approximately 48.1 percent of total statewide investments benefitted the Hampton Roads assessment area compared to 33.9 percent of statewide deposits in this market while investments in Richmond represented 36.6 percent of statewide investments versus 34.4 percent of statewide deposits. Performance was good in both Hampton Roads and Richmond. The bank's investment performance in limited-scope assessment areas was weaker than the full-scope assessment areas; investment activity was considered poor or very poor in 13 of the 15 limited-scope assessment areas. Weak performance in the limited-scope assessment areas was a consideration in assessing the statewide investment performance; however, in many of the limited-scope markets, the bank has a very small branch presence and community development opportunities are limited. Therefore, limited-scope performance did not negatively impact the overall state performance.

Due to the bank's overall state rating of high satisfactory, the bank was considered responsive to assessment area credit and community development needs. Therefore, positive consideration was given to a \$5.1 million NMTC investment for a project outside the bank's Virginia assessment areas. The bank's investment will support the expansion of an existing manufacturing business located across the state line in North Carolina that will help stabilize a rural community by retaining and creating regional employment opportunities in both Virginia and North Carolina.

Additional details regarding specific investments and contributions can be found in the full-scope assessment area sections, and a summary of the bank's investments and contributions for all assessment areas can be found in Appendix F.

SERVICE TEST

The service test rating for the state of Virginia is high satisfactory based on the overall retail services rating of low satisfactory and the relatively high level of community development services.

Retail Services

Delivery systems, including ATMs and branch office locations, are reasonably accessible to the bank's geographies and individuals of different income levels in the assessment areas. Statewide, banking services and hours of operation do not vary in a way that inconveniences the assessment areas, including LMI geographies or LMI individuals. In the full-scope assessment areas, SunTrust Bank offers extended hours in all of its LMI census tract branches, but offers weekend hours at a lower rate in low-income census tracts than at other branch locations. The bank's record of opening and closing of branches has generally not adversely affected the accessibility of its delivery systems for LMI geographies and/or LMI individuals. Additional detail on the bank's retail services can be found in the full-scope assessment area sections.

Community Development Services

SunTrust Bank provides a relatively high level of community development services in Virginia. Employees engaged in qualified service activities totaling 8,744 hours that positively impacted Virginia assessment areas. Performance in both full-scope assessment areas was good as a result of responsive service activities that included board service, technical assistance, committee membership, and financial education outreach. Performance in limited-scope assessment areas was generally weaker than the performance in the full-scope assessment areas, with 9 of 15 (60.0 percent) limited-scope assessment areas exhibiting very poor or poor performance. Conversely, several markets (33.3 percent) exhibited outstanding or good performance due to the volume of service activity. Performance in limited-scope assessment areas did not change the statewide rating. SunTrust Bank employees also engaged in an additional 32 hours of qualified service activity with organizations that served the broader statewide or regional area.

Additional detail on the bank's retail and community development services can be found in the full-scope assessment area sections of this report.

METROPOLITAN AREA

(Full Scope Review)

DESCRIPTION OF INSTITUTION'S OPERATIONS IN THE HAMPTON ROADS, VIRGINIA ASSESSMENT AREA

Overview

The Hampton Roads, Virginia assessment area is located in the Virginia Beach-Norfolk-Newport News, VA-NC MSA (Virginia Beach MSA). The assessment area includes the cities of Chesapeake, Hampton, Newport News, Norfolk, Poquoson, Portsmouth, Suffolk, Virginia Beach, and Williamsburg, and the counties of Gloucester, Isle of Wright, James City, and York in Virginia. The assessment area makes up most of the Virginia Beach MSA with the exception of Matthews, Currituck, and Gates counties. As of December 2015, SunTrust had 39 branches in the assessment area, which represent 29.1 percent of the branches statewide. These branches hold 33.9 percent of the bank's statewide deposits. Additionally, the Hampton Roads assessment area represents the bank's largest concentration of combined HMDA-reportable and CRA small business lending in the state.

The Hampton Roads assessment area is a competitive market with national and regional banks. According to the June 30, 2015 FDIC Summary of Deposits Report, SunTrust Bank ranked 2nd out of 28 financial institutions operating in the assessment area with 17.1 percent deposit market share. The top financial institution by deposit market share is Wells Fargo Bank at 20.0 percent.

HMDA-reportable lending and CRA lending are similarly competitive. SunTrust Bank and SunTrust Mortgage combined had an average of 3.8 percent of total HMDA-reportable lending in both 2014 and 2015. STB ranked 27th while STM ranked 9th out of the 462 HMDA lenders in the market in 2014. In 2015, STM increased slightly in ranking while STB dropped to 30th. Wells Fargo Bank was the dominant HMDA reporter in both 2014 and 2015, followed by Navy Federal Credit Union, Pennymac Loan Services, and Atlantic Bay Mortgage Group.

Population and Income Characteristics

The Hampton Roads assessment area had a total population of 1,661,782 persons in 2015, representing a 1.8 percent increase from 2010. Hampton Roads is situated in the middle of the Eastern seaboard where the James, Nansemond and Elizabeth rivers pour into the mouth of the Chesapeake Bay. The MSA is recognized as the 33rd largest MSA in the United States, eighth largest metro area in the Southeast United States and the second largest between Atlanta and Washington, DC.²⁶⁷ The city of Virginia Beach, Virginia, is the largest city in the assessment area. According to the U.S. Census Bureau, the principal cities as of July 2015 in the MSA were Hampton, Newport News, Norfolk, Portsmouth, and Virginia Beach.²⁶⁸ The second most populous city is Norfolk with 245,452 persons in 2015.²⁶⁹

²⁶⁷ Hampton Roads Chamber. "Hampton Roads". Available at: http://www.hamptonroadschamber.com/page/hampton-roads/. Accessed May 23, 2017.

²⁶⁹ US Census Bureau. Accessed through PolicyMap. Available at http://www.policymap.com. Accessed May 23, 2017.

²⁶⁸ US Census Bureau. Delineation Files – Principal cities of metropolitan and micropolitan statistical areas. Available at: https://www.census.gov/geographies/reference-files/time-series/demo/metro-micro/delineation-files.html. Accessed May 23, 2017.

The assessment area consists of 408 census tracts; 27 (6.6 percent) are low-income, 100 (24.5 percent) are moderate-income, 148 (36.3 percent) are middle-income, 124 (30.4 percent) are upper-income, and 9 (2.2 percent) have unknown income levels.

For purposes of classifying borrower income, this evaluation uses the FFIEC's estimated median family income for the relevant area. The following table sets forth the estimated median family income for 2014 and 2015 for the Virginia Beach MSA and shows that the estimated median family income increased by \$1,800, or approximately 2.5 percent, from 2014 to 2015. The families residing in Poquson, York, and James City counties had the highest estimated median family incomes at \$97,684, \$94,141, and \$90,901, respectively. The three areas with the lowest median family incomes were Norfolk, Portsmouth, and Newport News with incomes at \$51,578, \$54,547, and \$58,040, respectively.²⁷⁰

Borrower Income Levels
Virginia Beach-Norfolk-Newport News, VA-NC MSA

FFIE	C Estimated		I	ow	M	ode	rate	N	Midd	lle	1	Uppe	er
Median	Family Income	0	-	49.99%	50%	-	79.99%	80%	-	119.99%	120%	-	& above
2014	\$72,200	0	-	\$36,099	\$36,100	-	\$57,759	\$57,760	-	\$86,639	\$86,640	-	& above
2015	\$74,000	0	-	\$36,999	\$37,000	-	\$59,199	\$59,200	-	\$88,799	\$88,800	-	& above

Poverty and financial instability are concerns within a few of the cities and counties that make up the assessment area. The percentage of families living at or below the poverty level has increased within the last few years. The percentage of families in poverty was highest in Norfolk, Portsmouth, and Newport News at 16.2 percent, 14.9 percent, and 12.7 percent, respectively; these rates are significantly greater than the poverty rate for the state at 8.2 percent.²⁷¹ However, there were several counties with rates below the state level. The rates were comparable to the state in Suffolk (8.9 percent), followed by Chesapeake (8.1 percent), while they were lower in a few other areas including Virginia Beach (6.6 percent). Within the assessment area, 37.2 percent of families are considered LMI as compared to the state level of 36.5 percent, and about 35.7 percent of the families living in low-income tracts and 13.5 percent of families in moderate-income tracts have incomes below the poverty level.

Economic Conditions

The Virginia Beach-Norfolk-Newport News MSA centers on Hampton Roads, the world's largest natural deep water harbor. An integrated transportation network of interstate highways, air, rail, and sea services provides excellent access between the communities in this MSA and world markets. According to The Brookings Institution, the MSA was the second best performing metro economy in the nation during the recession. With a civilian labor force of more than 800,000 and 20,000 individuals graduating from Hampton Roads' eight

²⁷¹ Ibid

²⁷⁰ Ibid

universities and four community colleges each year, there are a great number of skilled individuals entering the workforce. Over 60.0 percent of the population of the U.S. is located within 750 miles of Hampton Roads, and the region's accessible transportation infrastructure provides several options for transporting goods between national and international markets.²⁷²

The Virginia Beach MSA has the largest concentration of military personnel outside of the Pentagon, with more than 86,000 active-duty military personnel. More than 75 federal facilities, including nine defense installations, are located in the Virginia Beach MSA, including the world's largest naval base and the home of the Atlantic Fleet. The two largest employers in Virginia Beach are Joint Expeditionary Base (JEB) Little Creek-Fort Story and Naval Air Station (NAS) Oceana. JEB Little Creek-Fort Story employs 17,629 active-duty personnel and 4,688 civilians, making it one of the largest military bases on the East Coast as well as one of Virginia's largest employers. NAS Oceana, the second largest employer in Virginia Beach, employs 11,891 active-duty personnel, as well as 7,427 civilians.²⁷³

As of 2015, total employment in the assessment area was approximately 777,211 jobs with employment concentrated in the following industries: government and government enterprises, military, health care and social science, and retail trade. In addition to the U.S. Department of Defense, other major employers in the area include Huntington Ingalls Industries Inc., Sentara Healthcare, City of Virginia Beach Schools, Wal-Mart, and Riverside Regional Medical Center.

According to 2015 Dun & Bradstreet information, there were 71,186 businesses within the Hampton Roads assessment area, 92.8 percent of which had total annual revenues less than or equal to \$1 million and were therefore considered to be small businesses. The percentage of business loans made to small businesses with the respective annual revenues in 2015 in the assessment area ranged from 44.7 percent in Portsmouth to 52.9 percent in James City County and Suffolk. The assessment area has seen a general increase in the volume of loans to small businesses every year since 2012.²⁷⁴

The Virginia Beach economy has seen steady improvement in unemployment rates since the recession. As shown in the following chart, the unemployment rate in the MSA dropped from 5.7 percent to 4.9 percent from 2014 to 2015. Additionally, these rates are lower than in previous years, when unemployment in the assessment area was as high as 7.3 percent in 2010 and 6.6 percent in 2012.

Local economists expect that the Virginia Beach MSA will continue to see positive growth. In 2015, regional employment grew better than expected with the creation of 6,400 jobs. In 2016, the MSA was expected to add over 7,000 jobs with the growth coming from the health-care sector, tourism and the port. Despite the growth, the MSA lags behind other parts of Virginia and cities in North Carolina, with Raleigh adding 52,300 jobs while

Northern Virginia added 76,500 jobs since the recession. But in 2015, Hampton Roads still had yet to recover 15,300 jobs the region lost during the recession. While there has been growth in recent years, it has been slower than other in surrounding regions.²⁷⁵

While employment rates have steadily improved over the previous years, job growth has reportedly been disappointing due in large part to the deceleration of defense spending. The federal budget cuts have had an impact on the local economy since such a large part of the workforce is employed by the Department of Defense. Economic activity connected to the Port of Virginia has also been an important contributor to the region's economic well-being. While the recent recession adversely impacted the port and the cargo flowing through it, the volume of general cargo flowing through the port has increased every year, 2009 through 2015, a promising trend for the region.²⁷⁶

Not Seasonally Adjusted. Source: Bureau of Labor Statistics

Census data indicates there were 656,900 housing units in the assessment area, 59.2 percent were owner-occupied, 32.9 percent were rental units, and 7.9 percent were vacant. While a majority of units were owner-occupied throughout the assessment area, rental units comprised 64.8 percent and 48.5 percent of the units in LMI tracts, respectively, indicating reduced opportunities for mortgage origination in these geographies.

The housing market in the Virginia Beach MSA has strengthened over the past few years. New home residential permits increased from recession levels in 2011. For instance, there were 3,694 housing permits issued in 2015 compared to 2,777 in 2011, approximately a 33.0 percent increase. For the same timeframe, the state of Virginia had an approximate 27.1 percent increase in new home residential permits.²⁷⁷

Home prices have risen over the past few years. According to the National Association of Realtors, home prices in the Virginia Beach MSA increased between 2014 and 2016 from \$196,000 to \$212,300, representing an increase of 8.3 percent. The number of existing homes sold and average sale prices remain below the peak levels recorded during the early 2000s. During 2015, existing home sales totaled 25,750, representing a 9.0 percent increase from the 23,600 home sales recorded during 2014. By comparison, an average of 35,250 existing homes sold annually from 2002 through 2006. Similar to existing home sales, new home sales and average sales prices remain below the peak levels recorded during the early 2000s. During 2015, new home sales totaled 3,075, which represented a 19.0 percent increase from the 2,575 new homes sold during 2014. By comparison, from 2001 through 2006, the peak period for new home sales in the Virginia Beach MSA, an average of 4,475 new homes sold annually, accounting for 12.0 percent of all home sales. The median housing value in the assessment area is \$244,840, but values are much lower in the LMI tracts at \$139,561 and \$171,196.

The rental housing market conditions in the Virginia Beach MSA are balanced. As of January 1, 2016, the rental vacancy rate is estimated at 6.5 percent, down from 7.6 percent in April 2010 but up from 5.6 percent in April 2000. Approximately 41.0 percent of all renter households in the Virginia Beach MSA live in singlefamily homes, compared with an average of 35.0 percent nationally. The rental market for single-family homes is balanced but is considered tighter than in many places nationwide because civilian renters choose, in increasing numbers, to rent single-family homes with lower monthly costs. By contrast, during the fourth quarter of 2015 the apartment vacancy rate was 5.7 percent, unchanged from a year earlier. The average rent for apartments increased 2.0 percent, to \$987 from a year earlier.²⁷⁸ New construction has remained flat following the economic recovery.²⁷⁹

The assessment area's overall affordability ratio is 23.5 compared to the state of Virginia at 24.1, indicating that housing is slightly less affordable in the assessment area when compared to the state. The affordability ratio is defined as the median household income divided by the median housing value. A higher ratio means the housing is considered more affordable while a lower ratio means the housing is considered less affordable.

Demographic Characteristics by Census Tract

The following table based on 2015 FFIEC Census Data and 2015 Dun & Bradstreet information presents key demographic and business information used to help develop a performance context for the assessment area.

Credit and Community Development Needs

Affordable housing appears to be an issue in the Virginia Beach MSA. The City of Virginia Beach's Department of Housing and Neighborhood Preservation completed a 5 Year Consolidated Strategy and Plan from July 1, 2015, through June 30, 2020. The plan stated that affordable rental housing is by far the most critical need in Virginia Beach. Unfortunately, continued demand for rental housing has impacted the area's affordability as well as the stagnation of household income. Other factors that have influenced affordability include the lack of affordable property or land, particularly in areas that would meet requirements for the integration of LMI housing, and the lack of reasonable appropriate permanent financing beyond the highly competitive Low Income Housing Tax Credit (LIHTC) Program.²⁸⁰ It is worth noting that the estimated mean renter wage in the Virginia Beach MSA was listed at \$13.70, meaning that rent which would be considered affordable at the mean renter wage is \$713.²⁸¹

A local community contact indicated that there are limited affordable housing opportunities in Gloucester County, despite a portion of its residents living below the poverty level. She indicated that Gloucester County does not currently have any affordable housing units and that the local government does not have a housing authority. Moreover, recent reduction in funding from multiple sources has occurred that may impact housing organizations' ability to maintain their current level of services to low-income homeowners. The contact also mentioned that her organization would be interested in finding a corporate sponsor or creating partnerships in order to close the funding gap. The perception by this contact is that many financial institutions and funders donate heavily to larger, nationally known organizations such as Habitat and United Way, while there is a need to support smaller, more local affordable housing efforts.

A new report from Dun & Bradstreet and Pepperdine University shows that at the end of 2015, the small business sector had access to capital at its highest level since 2012. The small firms in the survey have maintained an upward trend in accessing capital over the year, with increases in approval rates on bank loans as well as alternative business financing options, such as business credit cards, merchant cash advances, and business online marketplace lenders. The report indicates that small business owners are optimistic about their businesses' health and growth for the coming year while continuing to have concerns about the state of the These findings confirm sentiments expressed by a local small business development overall economy. organization representative. The contact feels that the economic condition is improving, albeit slowly, and attributed this to a greater confidence on the part of small business owners and knowledge in the community of opportunities for small business owners. The contact added that there are numerous programs in the area that allow for local financial institution involvement.

CONCLUSIONS WITH RESPECT TO PERFORMANCE TESTS IN THE HAMPTON ROADS, VIRGINIA ASSESSMENT AREA

LENDING TEST

SunTrust Bank's lending performance in the Hampton Roads assessment area is good. The geographic distribution of loans reflects good penetration throughout the assessment area. Also, the distribution of borrowers reflects good penetration among borrowers of different income levels and businesses of different revenue sizes. In addition, the bank makes a relatively high level of community development loans.

SunTrust Bank reported 4,258 HMDA-reportable loans (64.2 percent) and 2,377 (35.8 percent) CRA small business loans in the Hampton Roads assessment area during the review period. Therefore, HMDA-reportable lending received greater weight in determining the bank's lending test rating in the assessment area. The Hampton Roads assessment area accounted for 37.3 percent of SunTrust Bank's total HMDA-reportable lending in Virginia and 32.5 percent of its total statewide CRA small business lending by dollar volume during the review period. In comparison, 17.1 percent of SunTrust Bank's Virginia deposits are in this assessment area.

For the lending test analysis, lending performance in low-, moderate-, middle-, and upper-income census tracts and to low-, moderate-, middle-, and upper-income borrowers was considered for each product; however, comments for activity in middle- and upper-income tracts and to middle- and upper-income borrowers are only included when they were material to the outcome of the analyses. Details of the bank's mortgage and small business lending and information regarding lending by peers can be found in Appendix G.

Geographic Distribution of Loans

For this analysis the geographic distribution of small business and HMDA-reportable lending, including both originations and purchases, was compared with available demographic information. Performance context information and aggregate lending data were also taken into consideration. For instance, unemployment rates, poverty rates, the level of owner-occupied units, and the volume of small businesses in LMI census tracts were issues considered when assessing the bank's lending performance. Considering all of these factors, SunTrust Bank's geographic distribution of loans reflects good penetration throughout the assessment area.

Home Purchase Loans

Home purchase lending in low-income census tracts is adequate. During the review period, the bank originated 1.4 percent of its loans in low-income census tracts. This level of lending was slightly less than the 1.9 percent of owner-occupied units in these tracts. Additionally, the bank's performance was slightly less than the aggregate lenders in 2014 but comparable to the aggregate lending performance in 2015.

Home purchase lending in moderate-income census tracts is also adequate. During the review period, 14.7 percent of the bank's loans were originated in moderate-income census tracts. This performance was less than the 16.9 percent of owner-occupied units in moderate-income census tracts. Additionally, the bank's performance was less than the aggregate lenders in 2014, but greater in 2015.

Home Refinance Loans

Home refinance lending in low-income census tracts is adequate. SunTrust Bank originated 1.4 percent of its home refinance loans in these tracts during the review period. As a result, the bank's lending was slightly less than the percentage of owner-occupied units in these tracts. The bank's performance was comparable to the aggregate lenders in 2014 and slightly less in 2015.

Home refinance lending in moderate-income census tracts is adequate. The percentage of home refinance loans originated in moderate-income census tracts was less than the percentage of owner-occupied units in these tracts; furthermore, performance was less than the aggregate lending performance during the review period.

Home Improvement Loans

Home improvement lending in low-income census tracts is good. SunTrust Bank originated 2.8 percent of its home improvement loans in low-income census tracts. This performance was greater than the percentage of owner-occupied units and slightly greater than the aggregate lenders during the review period.

Home improvement lending in moderate-income census tracts is good. The percentage of home improvement loans in moderate-income census tracts at 24.7 percent exceeded the percentage of owner-occupied units at 16.9 percent in these tracts. Additionally, the bank's performance was also significantly greater than aggregate lenders during the review period.

Small Business Loans

Small business lending in low-income census tracts is good. The percentage of small business loans in low-income census tracts was slightly greater than the percentage of small businesses located in low-income census tracts. This performance was greater than aggregate lending performance in 2014, but slightly less than the aggregate lenders in 2015.

Small business lending in moderate-income census tracts is excellent. SunTrust Bank originated 24.1 percent of its small business loans in these tracts, where 18.0 percent of small businesses in the assessment area are operating. SunTrust significantly outperformed aggregate lenders in 2014 and 2015.

Lending to Borrowers of Different Incomes and Businesses of Different Sizes

The distribution of loans by borrower income or revenue size of businesses is good. For this analysis, the distribution of small business lending across business revenue sizes and HMDA-reportable lending across borrower income levels was compared to available demographic information. Performance context issues were also considered as well as the performance of other banks.

Home Purchase Loans

Home purchase lending to low-income borrowers is good. The percentage of home purchase loans to low-income borrowers was significantly less than the percentage of low-income families located in the assessment area; however, lending performance was greater than aggregate lending performance during the review period.

Home purchase lending to moderate-income borrowers is excellent. The bank's percentage of home purchase loans was greater than the percentage of moderate-income families located in the assessment area. The bank's home purchase lending was also greater than the aggregate lending performance during the review period.

Home Refinance Loans

Home refinance lending to low-income borrowers is good. The bank's percentage of home refinance loans to low-income borrowers was less than the percentage of low-income families in the assessment area. However, SunTrust Bank's lending exceeded aggregate lending performance throughout the review period.

Home refinance lending to moderate-income borrowers is excellent. The bank's home refinance lending to moderate-income borrowers was greater than the percentage of moderate-income families in the assessment area. Additionally, lending to moderate-income borrowers was greater than the aggregate lenders for both years.

Home Improvement Loans

Home improvement lending to low-income borrowers is poor. The bank's home improvement lending to low-income borrowers was slightly greater than the percentage of low-income families in the assessment area throughout the review period. However, the bank's lending performance was significantly less than aggregate lenders during the review period.

Home improvement lending to moderate-income borrowers is excellent. The percentage of home improvement loans to moderate-income borrowers at 23.4 percent was greater than the percentage of moderate-income families in the assessment area at 18.1 percent. Additionally, the bank's performance was significantly greater than the aggregate lending performance during the review period.

Small Business Loans

The distribution of small business loans to businesses of different sizes is adequate. While the percentage of small business loans to businesses with revenues of \$1 million or less was less than the percentage of small businesses in the assessment area during the review period, SunTrust Bank's performance was greater than the aggregate lending performance in 2014 and 2015. Additionally, 91.8 percent of small business loans were originated in amounts of \$250,000 or less, indicating a willingness to lend in the smaller amounts that are typically requested by small businesses.

Community Development Lending

SunTrust Bank made a relatively high level of community development loans in the Hampton Roads assessment area. The bank originated 18 community development loans totaling \$202 million during the review period. Loans were responsive to several community development needs in the assessment area, including community services targeted to LMI individuals, promoting economic development by financing small business, and revitalizing and stabilizing low- or moderate-income geographies. SunTrust Bank's community development lending exhibits good responsiveness to the community development and credit needs of the assessment area.

Examples of community development lending include but are not limited to:

- A \$44.9 million loan financing a new grocery-anchored retail shopping center located in a low-income geography. The project is estimated to create 570 jobs, 80.0 percent of which will be retail jobs for LMI individuals from the surrounding community.
- Two loans for a total of \$17 million in support of the area's public transportation system, which is predominately used by LMI individuals.
- Three loans for a total of \$15 million to help stabilize the employment of LMI production line workers for a business located in an Enterprise Zone.
- A \$1.4 million loan to a small business to purchase a building located in a moderate-income geography in order to expand production and its workforce comprising mostly low- to- moderate-income employees.

INVESTMENT TEST

SunTrust Bank's performance under the investment test is good, as evidenced by the significant level of qualified investments and grants in the Hampton Roads assessment area coupled with the responsiveness of the bank's activities to a number of community development needs.

The bank's investments (excluding contributions) totaled \$33.8 million in the assessment area; of that, \$28.5 million was invested during the review period. All of the current period investments addressed the need for affordable multifamily housing in the assessment area and included direct LIHTC investments and investments in multi-investor LIHTC funds, and mortgage-backed securities that finance affordable multifamily housing. All prior period investments also funded affordable housing, primarily through investments in LIHTC funds and multifamily mortgage-backed securities.

SunTrust Bank contributed about \$931,100 to nonprofit organizations and community development initiatives during the review period. Nearly all of these contributions supported organizations that provide community services to LMI individuals. The bank provided approximately \$350,000 to United Way affiliates for work with nonprofits that primarily serve LMI individuals. The bank's financial support addressed a variety of community services needs although responsiveness to other community development issues, including economic

development and small business assistance, was limited. The bank's donations provided support for activities including youth development, educational services and scholarships for LMI students, workforce development, healthcare for low-income and uninsured individuals, financial education and free tax assistance and emergency services. Notable contributions include:

- A grant of \$250,000 (\$150,000 payable during the review period) to support the operation of the Health Outreach Partnership of EVMS Students Clinic, operated by the Eastern Virginia Medical School. The HOPES Clinic is the first and only student-run free clinic in Virginia, and it provides health care services to LMI individuals who are uninsured and/or have chronic diseases.
- \$60,000 to a health foundation that provides grants to nonprofit organizations that provide medical care for homeless individuals, low-income and uninsured patients, as well as other disadvantaged populations.
- \$38,000 for a college access program that specifically targets LMI students in area high schools and provides a one-stop resource center to help students interested in attending college with college entrance exams, scholarship applications and other services. The organization estimates that each \$1 spent on college readiness programs leverages \$20 in financial aid scholarships.

SERVICE TEST

SunTrust Bank's service test performance in the Hampton Roads assessment area is good based on the relatively high level of community development services and adequate retail services performance. The accessibility of the bank's retail services in this assessment area was rated poor and impacted the overall retail services rating.

Retail Services

Although overall retail services are considered adequate, delivery systems may be unreasonably inaccessible to portions of the bank's geographies and individuals of different income levels in the Hampton Roads assessment area. The distribution of 39 branch offices and 69 ATMs as of December 31, 2015, was compared to the distribution of households and businesses among the tract categories within the assessment area. The bank has two branches in low-income census tracts representing 5.1 percent of total branches in the assessment area and five branches in moderate-income census tracts representing 12.8 percent of total branches in the assessment area. For comparison purposes, 4.5 percent of households and 4.4 percent of businesses were located in low-income census tracts, and 23.6 percent of households and 18.4 percent of businesses were located in moderate-income tracts. During the review period, two branches were closed in upper-income census tracts. The bank's record of opening and closing of branches has generally not adversely affected the accessibility of its delivery systems, particularly to LMI geographies and individuals in the assessment area.

SunTrust Bank offers extended hours in all of its LMI census tract branches and weekend hours in all of its moderate-income census tract branches. Therefore, banking services and hours of operations do not vary in a way that inconveniences the assessment area, particularly LMI geographies and/or LMI individuals.

Community Development Services

SunTrust Bank provides a relatively high level of community development services in the Hampton Roads assessment area. During the review period, employees engaged in 371 qualified community service activities totaling 1,364 hours that positively impacted the assessment area. The majority of service hours were for a community service purpose; bank employees also provided 30 hours to support affordable housing and 64 hours for economic development purposes. SunTrust Bank employees engaged with over 60 community development organizations in rendering services, and 25.1 percent of service hours were board service at community development organizations or committee memberships. Financial education hours represented approximately 24.0 percent of service activity. This performance is good given SunTrust Bank's size and presence in the assessment area and the opportunities that exist for community development service.

METROPOLITAN AREA

(Full Scope Review)

DESCRIPTION OF INSTITUTION'S OPERATIONS IN THE RICHMOND, VIRGINIA ASSESSMENT AREA

Overview

The Richmond, Virginia assessment area includes the following five counties and four cities: Chesterfield County, Goochland County, Hanover County, Henrico County, Prince George County, Colonial Heights City, Hopewell City, Petersburg City, and Richmond City. The assessment area makes up a portion of the Richmond MSA, which includes four cities and thirteen counties. As of December 31, 2015, SunTrust operated 43 branch offices, which represent 32.1 percent of the branches statewide. The branches hold 34.5 percent of the deposits in Virginia. Additionally, the market represents the bank's second largest concentration of combined HMDA-reportable and CRA small business lending in the state at 35.3 percent.

The Richmond assessment area is a highly competitive market dominated by national and regional banks. According to the June 30, 2015 FDIC Summary of Deposits Report, SunTrust Bank ranked 4th out of 32 financial institutions operating in the assessment area with a 4.3 percent deposit market share. The top financial institution by deposit market share is Capital One with 62.1 percent, followed by Bank of America and Wells Fargo Bank.

HMDA-reportable lending and CRA lending are similarly competitive. SunTrust Bank and SunTrust Mortgage combined had an average of 5.7 percent of total HMDA-reportable lending in both 2014 and 2015. STB ranked 20th while STM ranked 3rd out of the 458 HMDA lenders in the market in 2014. STM increased slightly in ranking to 2nd place in 2015 while STB dropped to 21st. Wells Fargo Bank was the leading HMDA lender in the market in 2015, followed by SunTrust Mortgage, Capital Center LLC, and Quicken Loans. The bank's performance was similar in 2014.

Sun Trust Bank ranked 4th out of 107 CRA lenders in 2015 with 8.2 percent of the CRA loans. American Express Bank, Wells Fargo Bank, and CitiBank NA were the other dominant CRA lenders in the market. The bank originated 1,709 small business and small farm loans in 2015, a 112.6 percent increase from its 2014 performance.

Population and Income Characteristics

The assessment area population is growing at an average rate. From 2010 to 2015, the assessment area had a population growth rate of 3.4 percent, which slightly outpaced the statewide rate of 3.1 percent. As of 2015, the assessment area's population was 1,093,133, representing 13.7 percent of the statewide population and 87.7 percent of the MSA population. Chesterfield County had the largest population in the assessment area as of

²⁸² US Census Bureau. Accessed through PolicyMap (www.policymap.com)

2015 with 328,176 residents, followed by Henrico (318,864). While Prince George County experienced the largest population growth rate from 2010 to 2015 at 4.6 percent, the cities of Petersburg and Hopewell experienced nominal population declines during the same period.²⁸³

The assessment area is made up of 259 census tracts: 29 tracts (11.0 percent) are low-income and 61 tracts (24.0 percent) are moderate-income. Of the families living in the assessment area, 38.0 percent are considered LMI, slightly higher than the state level of 36.5 percent. 34.6 percent of families in low-income tracts and 12.5 percent of families in moderate-income tracts have incomes below the poverty level. This disproportionate level of poverty in LMI tracts may suggest limited lending opportunities.

For purposes of classifying borrower income, this evaluation uses the FFIEC estimated median family income. The following table sets forth the estimated median family income in 2014 and 2015 for the Richmond MSA and provides a breakdown of the estimated annual family income for each income category (low, moderate, middle, and upper). The table indicates that the FFIEC estimated median family income for the Richmond area increased by \$1,200, or 1.6 percent, from 2014 to 2015. The Richmond MSA median family income is on par with Virginia and notably higher than the nation's median income of \$66,000; this suggests that the region has a skilled and highly paid workforce.

There is considerable variation in the median family income in the counties and cities throughout the assessment area, with incomes being significantly higher in the counties. Median family incomes range from \$71,600 in Prince George County to \$91,800 in Goochland County. Regarding the cities in the assessment area, Petersburg had the lowest median family income at \$38,400, while Colonial Heights had the highest at \$63,700 between 2011 and 2015.²⁸⁴

Borrower Income Levels Richmond, VA MSA

FFIE	FFIEC Estimated			ow	M	ode	rate	N	Midd	lle	Ţ	Jppe	er
Median	Family Income	0	-	49.99%	50%	-	79.99%	80%	-	119.99%	120%	-	& above
2014	\$76,400	0	-	\$38,199	\$38,200	-	\$61,119	\$61,120	-	\$91,679	\$91,680	-	& above
2015	\$77,600	0	-	\$38,799	\$38,800	-	\$62,079	\$62,080	-	\$93,119	\$93,120	-	& above

Poverty and financial instability are concerns throughout the assessment area. The percentage of people living in poverty between 2011 and 2015 within the assessment area cities is 19.4 percent in Hopewell, 25.5 percent in Richmond and 28.0 percent in Petersburg.²⁸⁵ The Commonwealth of Virginia had a poverty rate of 11.5 percent for this same period. In comparison, the poverty rates for assessment area counties are significantly lower.

²⁸⁴ Ibid

²⁸⁵ "Richmond, VA (US Census)." *GIS Mapping and Geographic Information System Data.* The Reinvestment Fund, n.d. Web. 6 Mar. 2017. http://www.policymap.com/>.

However, there are more people now living in poverty in the suburban counties than inside the city limits. Additional indicators of financial distress are food stamp usage and free and reduced-price lunch recipients. In the cities within the assessment area, both indicators are high with the percentage of the population that received food stamps in 2014 exceeding 22.0 percent for Hopewell, Richmond, and Petersburg. Additionally, the percentage of students eligible for free and reduced-price lunch in Hopewell and Richmond is above 70.0 percent.²⁸⁶

Economic Conditions

The Richmond metropolitan area has been described as having a diverse and robust economy. Besides being the state capital, the area is home to the Federal Reserve Bank of Richmond, the United States Court of Appeals for the Fourth Circuit, Fort Lee Army Base (AB), and several health care facilities. The largest employers in the assessment area are Capital One Corporation, Virginia Commonwealth University Health System Authority, Hospital Corporation of America Virginia Health System, and Bon Secours Richmond Health System.²⁸⁷ It is also important to note that the Fort Lee AB in the city of Petersburg and the Defense Supply Center in Chesterfield County employ nearly 15,000 military and civilian personnel and contractors.²⁸⁸

From 2011 through 2015, nonfarm employment increased by an average of 1.9 percent annually, with all job losses from the recession recovered by 2014. According to the U.S. Bureau of Labor Statistics, total nonfarm employment in the assessment area was approximately 662,600 jobs as of May 2016. Employment is concentrated in the following industries: professional and business services; government; wholesale and retail trade; and education and health services.²⁸⁹

According to 2015 Dun & Bradstreet data, there were 56,860 businesses within the assessment area, 92.4 percent of which had total annual revenues less than or equal to \$1 million and were therefore considered to be small businesses. A local small business contact stated that while banks are doing a better job with lending in the current economic environment as opposed to several years ago, banks need to build better relationships with both customers and other financial providers in order to make appropriate referrals. Additionally, the contact mentioned that the level of opportunity for bank involvement rests with having better relationships with businesses, even those that are not current clients.

The Richmond MSA has a relatively low unemployment rate that has been below the national average since 2000.²⁹⁰ As seen in the following chart, the unemployment rate for the metropolitan area was 4.6 percent in 2015, as compared to 4.4 percent for Virginia and 5.3 percent for the nation. In addition, the unemployment rate for each locality in the assessment area declined during the review period and trended below or equal to the national rate as of 2015, with the exception of Hopewell and Petersburg.²⁹¹

Not Seasonally Adjusted. Source: Bureau of Labor Statistics

Census data indicates there were approximately 438,900 housing units located in the assessment area; of those, 60.9 percent were owner-occupied, 30.2 percent were rental units, and 9.0 percent were vacant. The median age of housing stock across the assessment area is 34 years, with housing being considerably older in low-income census tracts at 50 years. In addition, rental and vacant units represent a disproportionate share of housing in LMI tracts. Of the 40,224 housing units in low-income tracts, 28.0 percent of the housing was owner-occupied, while 54.1 percent and 18.0 percent were rental and vacant units, respectively. In moderate-income tracts, there were rental and vacant units and a greater percentage of owner-occupied units. These factors indicate that lending opportunities may be more challenging in low-income tracts than in other areas.

According to data from the Richmond, Virginia Comprehensive Housing Market Analysis, the sales housing market has gradually increased since 2011. During the 12 months ending April 2016, total homes sales increased 10.0 percent to 22,900, and the average home sales price increased 5.0 percent to \$243,600. Conditions have improved significantly from October 2010, when the market was softer and the supply of homes peaked at an average of 5.6 months. Since then, the supply of homes has trended downward to an average of 1.9 months in April 2016. Although the housing market improved from 2010 through 2015, building

permits remained low throughout the period. Builders, however, seem more confident lately, as the number of single-family home permits increased to 20.0 percent, to 2,225, during the 12 months ended May 2016, compared with the number permitted during the previous 12 months.²⁹²

In April 2016, the percentage of seriously delinquent mortgages (defined as more than 90 days past due or in foreclosure) was 3.0 percent, down from 7.1 percent in April 2010. It should also be noted that the share of homes with negative equity in the Richmond market remained elevated at 7.0 percent in the first quarter of 2016.²⁹³ While the supply of homes is low (1.9 months) and would typically characterize a tight housing market, the share of negative equity homes and bank-owned real estate owned (REO) properties remains a negative factor in the overall condition of the housing market.

Demographic Characteristics by Census Tract

The following table based on 2015 FFIEC Census and 2015 Dun & Bradstreet data presents key demographic and business information used to help develop a performance context for the assessment area.

Credit and Community Development Needs

In order to better understand the community development and economic landscapes, community development professionals were contacted. These individuals discussed the various needs and opportunities across the region as well as how financial institutions can be responsive to local community development needs. Information from these conversations is included in the appropriate sections below.

The Capital Region Collaborative (CRC), comprising the Richmond Planning District Commission and the Greater Richmond Chamber, is a joint effort underway to address affordable housing issues in the area. Many jurisdictions in the Richmond Planning District overlap with the assessment area, namely Chesterfield, Goochland, Hanover, and Henrico counties and the City of Richmond. The CRC asked the Partnership for Housing Affordability (PHA) to develop a plan to achieve the region's housing goals. As a result, PHA assembled a group of local housing and data experts to form the Regional Housing Alliance. The Virginia Center for Housing Research at Virginia Tech (VCHR) and the Virginia Commonwealth University Center for Urban and Regional Analysis (VCU CURA) collaborated with PHA to conduct a housing study.²⁹⁴

The study found that within the Richmond Regional Planning District, there is an annual housing affordability deficit of \$862 million (or \$6,422 per cost-burdened household) and nearly 132,000 new housing units will be needed to meet housing demand in the next 20 years.²⁹⁵ The study also indicated that low-income households carry 80.0 percent of the region's affordable housing income deficit, and approximately 35.0 percent of all households in the planning district are cost-burdened, including 15.0 percent who are severely cost-burdened. The study concludes there is not enough physical stock to accommodate households with incomes less than 50.0 percent of the area median income, and higher income households prefer to spend much less for housing, i.e., less than 30.0 percent of their incomes. As a result, higher earning households "crowd out" many lower income households that need more affordable housing.

A community contact engaged in affordable housing programs for LMI residents echoed the findings in the study, that additional affordable housing and rental units are needed in the Richmond MSA. The contact also expressed an interest in increased participation from local financial institutions with home ownership counseling seminars and down payment assistance programs. Given the attention around housing affordability in the assessment area, financial institutions may have opportunities to work collaboratively with city and county officials to address affordable housing issues and to provide leadership in this regard.

Further insight on small business conditions can be found in two recent Federal Reserve reports. More specifically, the Federal Reserve's 2015 Small Business Credit Survey on Employer Firms found that a majority of employer firms reported improved financing success rates, profitable operations, revenue growth, and

²⁹⁴ Housing the Richmond Region: Needs, Impediments, and Strategies. Partnership for Housing Affordability, 16 Apr 2015. Web. 6 Mar 2017. http://www.vchr.vt.edu/housing-the-richmond-region-needs-impediments-and-strategies/

²⁹⁵ Housing Affordability Deficit is the amount of additional money needed to completely eliminate the region's housing cost burdens (the gap between actual gross housing costs and 30.0 percent of the household's income).

employee additions in 2015.²⁹⁶ The firms, however, frequently reported that they face challenges in accessing capital, with 50.0 percent of small businesses employers reportedly receiving less than the full amount of financing for which they applied. Microbusinesses and start-ups had the largest unmet financing needs with 63.0 percent and 58.0 percent, respectively, reporting a financing shortfall. A subsequent survey examined business conditions and the credit environment of non-employer firms: small businesses with no employees other than the business owners. In this report, a notable portion of non-employer firms were not profitable in 2015, elected to apply for financing through banks rather than online lenders and, similar to employer firms, received less than the full amount of financing for which they applied. It is worth noting that non-employer businesses represent 80.0 percent of all U.S. businesses.²⁹⁷ Overall, results from both reports suggest that traditional bank lending continues to be the primary source of financing for small businesses, but online lenders are a growing source of funding both firm types.

Regarding local resources for small business owners and financial institutions, the City of Richmond has financial resources and incentives available for individuals and small businesses to stimulate revitalization and promote permanent job creation for LMI citizens. The Citywide Revolving Loan Program (RLP) and the Economic Development RLP provide access to capital for small businesses, entrepreneurs, developers, and nonprofits that are seeking to revitalize Richmond's neighborhoods. Other programs available to attract and grow businesses include the Mayor's Opportunity Fund, Enterprise Zones, and the Tax Abatement Incentive Program.²⁹⁸ In addition to the City of Richmond's programs, there are numerous small business development resources throughout the assessment area that serve business owners and that provide ample opportunities for bank engagement, such as serving on loan or advisory committees, sending referrals, and sponsoring business support programming for current and prospective entrepreneurs.

The City of Richmond and community stakeholders have engaged in efforts to address poverty reduction for the past several years, starting with the formation of the Mayor's Anti-Poverty Commission in 2011. The City also announced its goals of a 40.0 percent reduction in poverty by 2030, including a 50.0 percent reduction in child poverty. To that end, the Richmond City Council established the Office of Community Wealth Building (OCWB) in December 2015. OCWB is charged with advancing five policy priorities: expanded workforce development, targeted job creation, development of a regional transportation system, improved educational outcomes, and redevelopment of one or more public housing communities.²⁹⁹

Given the concerted attention to poverty in the assessment area, there are several organizations within metropolitan Richmond that financial institutions can partner with on poverty reduction initiatives to help LMI families develop better money habits, maintain financial stability, and save for future financial goals. These can include, but are not limited to, financial literacy programs, job training programs and asset building initiatives.

CONCLUSIONS WITH RESPECT TO PERFORMANCE TESTS IN THE RICHMOND, VIRGINIA ASSESSMENT AREA

LENDING TEST

SunTrust Bank's lending performance in the Richmond assessment area is good. The geographic distribution of loans reflects good penetration throughout the assessment area. Also, the distribution of borrowers reflects good penetration among borrowers of different income levels and businesses of different revenue sizes. In addition, the bank is a leader in making community development loans.

SunTrust Bank reported 3,904 (60.8 percent) HMDA-reportable loans and 2,512 (39.2 percent) CRA small business loans in the Richmond assessment area during the review period. Therefore, HMDA-reportable lending received greater weight in determining the bank's lending test rating in the assessment area. The Richmond assessment area accounted for 34.2 percent of SunTrust Bank's total HMDA-reportable lending in Virginia and 39.9 percent of its total statewide CRA small business lending by dollar volume during the review period. In comparison, 34.5 percent of SunTrust Bank's Virginia deposits are in this assessment area.

For the lending test analysis, lending performance in low-, moderate-, middle-, and upper-income census tracts and to low-, moderate-, middle-, and upper-income borrowers was considered for each product; however, comments for activity in middle- and upper-income tracts and to middle- and upper-income borrowers are only included when they were material to the outcome of the analyses. Details of the bank's mortgage and small business lending and information regarding lending by peers can be found in Appendix G.

Geographic Distribution of Loans

For this analysis the geographic distribution of small business and HMDA-reportable lending, including both originations and purchases, was compared with available demographic information. Performance context information and aggregate lending data were also taken into consideration. For instance, unemployment rates, poverty rates, the level of owner-occupied units, and the volume of small businesses in LMI census tracts were issues considered when assessing the bank's lending performance. Considering all of these factors, SunTrust Bank's geographic distribution of loans reflects good penetration throughout the assessment area.

Home Purchase Loans

Home purchase lending in low-income census tracts is adequate. During the review period, the bank originated 3.0 percent of its loans in low-income census tracts. This level of lending was slightly less than the 4.2 percent of owner-occupied units in these tracts. Additionally, the bank's performance was slightly less than the aggregate lenders in 2014 but greater than the aggregate lending performance in 2015.

Home purchase lending in moderate-income census tracts is also adequate. During the review period, 13.0 percent of the bank's loans were originated in moderate-income census tracts. This performance was less than the 15.5 percent of owner-occupied units in moderate-income census tracts. Additionally, the bank's performance was slightly greater than the aggregate lenders during the review period.

Home Refinance Loans

Home refinance lending in low-income census tracts is adequate. SunTrust Bank originated 3.1 percent of its home refinance loans in these tracts during the review period. As a result, the bank's lending was slightly less than the percentage of owner-occupied units in these tracts. The bank's performance was slightly greater than the aggregate lenders during the review period.

Home refinance lending in moderate-income census tracts is adequate. The percentage of home refinance loans originated in moderate-income census tracts was less than the percentage of owner-occupied units in these tracts; furthermore, performance was slightly less than the aggregate lending performance during the review period.

Home Improvement Loans

Home improvement lending in low-income census tracts is excellent. SunTrust Bank originated 6.2 percent of its home improvement loans in low-income census tracts. This performance was greater than the percentage of owner-occupied units and significantly greater than the aggregate lenders during the review period.

Home improvement lending in moderate-income census tracts is excellent. The percentage of home improvement loans in moderate-income census tracts at 25.8 percent was significantly greater than the percentage of owner-occupied units in these tracts at 15.5 percent. Additionally, the bank's performance was also significantly greater than aggregate lenders during the review period.

Small Business Loans

Small business lending in low-income census tracts is excellent. The percentage of small business loans in low-income census tracts was greater than the percentage of small businesses located in low-income census tracts. This performance was significantly greater than aggregate lending performance during the review period.

Small business lending in moderate-income census tracts is also excellent. SunTrust Bank originated 23.3 percent of its small business loans in these tracts, where 18.3 percent of small businesses in the assessment area are operating. SunTrust significantly outperformed aggregate lenders in 2014 and 2015.

Lending to Borrowers of Different Incomes and Businesses of Different Sizes

The distribution of loans by borrower income or revenue size of businesses is good. For this analysis, the distribution of small business lending across business revenue sizes and HMDA-reportable lending across borrower income levels was compared to available demographic information. Performance context issues were also considered as well as the performance of other banks.

Home Purchase Loans

Home purchase lending to low-income borrowers is good. The percentage of home purchase loans to low-income borrowers was less than the percentage of low-income families located in the assessment area. However, SunTrust Bank's lending performance was greater than aggregate lending performance during the review period.

Home purchase lending to moderate-income borrowers is good. The bank's percentage of home purchase loans was greater than the percentage of moderate-income families located in the assessment area. The bank's home purchase lending was also greater than the aggregate lending performance during the review period.

Home Refinance Loans

Home refinance lending to low-income borrowers is good. The bank's percentage of home refinance loans to low-income borrowers was less than the percentage of low-income families in the assessment area. However, SunTrust Bank's lending exceeded aggregate lending performance throughout the review period.

Home refinance lending to moderate-income borrowers is good. The bank's home refinance lending to moderate-income borrowers was greater than the percentage of moderate-income families in the assessment area. Additionally, lending to moderate-income borrowers was greater than the aggregate lenders for both years.

Home Improvement Loans

Home improvement lending to low-income borrowers is excellent. The bank's home improvement lending to low-income borrowers was slightly greater than the percentage of low-income families in the assessment area. Additionally, the bank's lending performance was significantly greater than aggregate lenders during the review period.

Home improvement lending to moderate-income borrowers is excellent. The percentage of home improvement loans to moderate-income borrowers at 26.8 percent was greater than the percentage of moderate-income families in the assessment area at 17.6 percent. Additionally, the bank's performance was greater than the aggregate lending performance during the review period.

Small Business Loans

The distribution of small business loans to businesses of different sizes is adequate. While the percentage of small business loans to businesses with revenues of \$1 million or less was less than the percentage of small businesses in the assessment area during the review period, SunTrust Bank's performance was slightly greater than the aggregate lending performance in 2014 and 2015. Additionally, 89.7 percent of small business loans were originated in amounts of \$250,000 or less, indicating a willingness to lend in the smaller amounts that are typically requested by small businesses.

Community Development Lending

SunTrust Bank is a leader in making community development loans in the Richmond assessment area. The bank originated 34 community development loans totaling \$168 million during the review period. Loans were responsive to many community development needs in the assessment area, including the provision of affordable housing, community services targeted to LMI individuals, promoting economic development by financing small business, and revitalizing and stabilizing low- or moderate-income geographies. SunTrust

Bank's community development lending exhibits excellent responsiveness to the community development and credit needs of the assessment area.

Examples of community development lending include but are not limited to:

- Two loans totaling \$13.4 million for a 50-unit low-income housing tax credit (LIHTC) apartment complex, in which all units are reserved for residents with income levels at or below 50.0 percent of the area median income.
- A \$25 million loan to a small business to expand production and increase its workforce of mostly production line workers. The firm anticipates hiring an additional 113 employees.
- Four loans for a total of \$31.2 million to help stabilize two local municipalities and to allow them to continue providing essential services such as public safety, health and human services, public works and public schools during an economic hardship. In one municipality, 100.0 percent of public school students received free or reduced-price lunch, while 77.0 percent of students did so in the other municipality.
- Two loans for a total of \$3.6 million to the public entity responsible for providing mental health and substance abuse and prevention services to the citizens of the City of Richmond. Amongst those receiving treatment, 89.0 percent of the children and 64.0 percent of the adults served were Medicaid recipients.

INVESTMENT TEST

SunTrust Bank's performance under the investment test is good, as evidenced by the significant level of qualified investment and grants in the Richmond assessment area coupled with the responsiveness of the bank's activities to a number of community development needs.

The bank's investments (excluding contributions) totaled \$25.5 million in the assessment area; of that, \$14.0 million was invested during the review period. All of the current period investments addressed the need for affordable multifamily housing in the assessment area and included direct LIHTC investments, investments in single-investor and multi-investor LIHTC funds, and mortgage-backed securities. All prior period investments also funded affordable housing, primarily through multifamily mortgage-backed securities.

SunTrust Bank contributed about \$879,000 to nonprofit organizations and community development initiatives during the review period. The bank's donations primarily supported organizations that provide community services to LMI individuals, and nearly half of the donations were directed to United Way to facilitate financial and other support to local nonprofit organizations that serve a majority of LMI families. The bank also provided grants totaling \$44,000 to support affordable housing. The bank's financial support addressed a wide variety of critical community needs including financial education and homeownership counseling, healthcare for low-income and uninsured individuals, affordable childcare, homeless assistance and other emergency services, educational support programs and scholarships for LMI individuals. Notable contributions include:

- \$50,000 to a program that invests in talented individuals from low-income communities and connects them to the resources, training, and the support needed to become successful entrepreneurs.
- \$25,000 to support a program that offers an alternative to payday lending coupled with financial education and coaching. The program has proven highly effective in helping individuals transition away from the use of high cost payday lenders and helping them acquire fundamental skills needed to improve their long-term financial management.
- \$15,000 grant to the Science Museum of Virginia to support Science, Technology, Engineering and Mathematics (STEM) programs for youth in the Richmond Redevelopment & Housing Authority's properties.

Assessment area performance was further enhanced by investments and contributions of about \$64.2 million that benefitted the entire state, including the Richmond assessment area.

SERVICE TEST

SunTrust Bank's service test performance in the Richmond assessment area is good based on the accessibility of the bank's retail services and the relatively high level of community development services.

Retail Services

Delivery systems are reasonably accessible to portions of the bank's geographies and individuals of different income levels in the Richmond assessment area. The distribution of 43 branch offices and 97 ATMs as of December 31, 2015, was compared to the distribution of households and businesses among the tract categories within the assessment area. The bank has five branches in low-income census tracts representing 11.6 percent of total branches in the assessment area and nine branches in moderate-income census tracts representing 20.9 percent of total branches in the assessment area. For comparison purposes, 8.3 percent of households and 5.8 percent of businesses were located in low-income census tracts, and 21.8 percent of households and 18.7 percent of businesses were located in moderate-income tracts. During the review period, three branches were closed: one in a low-income census tract, one in a middle-income census tract, and one in an upper-income census tract. The bank's record of opening and closing of branches has generally not adversely affected the accessibility of its delivery systems, particularly to LMI geographies and individuals in the assessment area.

SunTrust Bank offers extended hours in all of its LMI census tract branches, but offers weekend hours at a lower rate in LMI census tracts as compared to middle- and upper-income census tracts. However, banking services and hours of operations do not vary in a way that inconveniences the assessment area, particularly LMI geographies and/or LMI individuals.

DTO - Drive thru only is a subset of total branches

SA = Stand Alone ATM is a subset of total ATMs

Community Development Services

SunTrust Bank provides a relatively high level of community development services in the Richmond assessment area. During the review period, employees engaged in qualified community service activities totaling 5,419 hours. This is a dramatic improvement over qualified service hours rendered during the last review period. The majority of service hours were for a community service purpose, but 206 hours supported affordable housing. SunTrust Bank employees engaged with over 100 different community development organizations in rendering services. More than 30.0 percent of the community development service hours were dedicated to Junior Achievement, and about 7.0 of service hours were board service at community development organizations or committee memberships. SunTrust employees were active with family services organizations; a community development organization with a focus on local minority groups; workforce development; providing services to the homeless; affordable housing education; and providing financial education. This performance is good given SunTrust Bank's size and presence in the assessment area and the opportunities that exist for community development service.

Metropolitan Areas (Limited Review)

The following metropolitan assessment areas were reviewed using limited-scope examination procedures.

DESCRIPTION OF INSTITUTION'S OPERATIONS IN THE <u>VIRGINIA</u> METROPOLITAN ASSESSMENT AREAS

• Charlottesville Assessment Area (Charlottesville City and Albemarle County)

- o As of December 31, 2015, SunTrust Bank operated five branches in the assessment area, representing 3.7 percent of its branches in **Virginia**.
- O As of June 30, 2015, the bank had \$562.5 million in deposits in this assessment area, representing a market share of 14.8 percent and 5.0 percent of SunTrust Bank's total deposits in **Virginia**.

• Harrisonburg Assessment Area (Harrisonburg City and Rockingham County)

- o As of December 31, 2015, SunTrust Bank operated four branches in the assessment area, representing 3.0 percent of its branches in **Virginia**.
- O As of June 30, 2015, the bank had \$128.9 million in deposits in this assessment area, representing a market share of 6.0 percent and 1.1 percent of SunTrust Bank's total deposits in **Virginia**.

• Lynchburg Assessment Area (Bedford and Lynchburg cities and Amherst, Bedford, and Campbell counties)

- o As of December 31, 2015, SunTrust Bank operated seven branches in the assessment area, representing 5.2 percent of its branches in **Virginia**.
- As of June 30, 2015, the bank had \$725.8 million in deposits in this assessment area, representing a market share of 16.1 percent and 6.4 percent of SunTrust Bank's total deposits in <u>Virginia</u>.

• Radford Assessment Area (Radford City and Montgomery and Pulaski counties)

- O As of December 31, 2015, SunTrust Bank operated three branches in the assessment area, representing 2.2 percent of its branches in **Virginia**.
- As of June 30, 2015, the bank had \$149.5 million in deposits in this assessment area, representing a market share of 6.0 percent and 1.3 percent of SunTrust Bank's total deposits in <u>Virginia</u>.

• Roanoke Assessment Area (Roanoke and Salem cities and Botetourt, Franklin, and Roanoke counties)

- As of December 31, 2015, SunTrust Bank operated 18 branches in the assessment area, representing 13.4 percent of its branches in <u>Virginia</u>.
- o As of June 30, 2015, the bank had \$1.3 billion in deposits in this assessment area, representing a market share of 17.4 percent and 11.1 percent of SunTrust Bank's total deposits in **Virginia**.

• Staunton Assessment Area (Staunton and Waynesboro cities and Augusta County)

- O As of December 31, 2015, SunTrust Bank operated two branches in the assessment area, representing 1.5 percent of its branches in **Virginia**.
- O As of June 30, 2015, the bank had \$99.6 million in deposits in this assessment area, representing a market share of 6.9 percent and 0.9 percent of SunTrust Bank's total deposits in **Virginia**.

• Winchester Assessment Area (Winchester City and Frederick County)

- o As of December 31, 2015, SunTrust Bank operated one branch in the assessment area, representing 0.7 percent of its branches in **Virginia**.
- o As of June 30, 2015, the bank had \$47.4 million in deposits in this assessment area, representing a market share of 2.4 percent and 0.4 percent of SunTrust Bank's total deposits in **Virginia**.

Metropolitan Areas (Limited Review)

CONCLUSIONS WITH RESPECT TO PERFORMANCE TESTS

Through the use of available facts and data, including performance and demographic information, each assessment area's performance was evaluated and compared with the bank's performance in the state. The conclusions regarding performance are provided in the table below. Please refer to the tables in Appendix H for information regarding these areas.

	Metropolitan Assessment Areas											
Assessment	Lending Test	Lending Test Investment Test										
Areas												
Charlottesville	Not Consistent (Below)	Not Consistent (Below)	Not Consistent (Below)									
Harrisonburg	Not Consistent (Below)	Not Consistent (Below)	Not Consistent (Below)									
Lynchburg	Consistent	Not Consistent (Below)	<u>Consistent</u>									
Radford	Consistent	Not Consistent (Below)	Not Consistent (Below)									
Roanoke	Consistent	Not Consistent (Below)	<u>Consistent</u>									
Staunton	Not Consistent (Below)	Not Consistent (Below)	Not Consistent (Below)									
Winchester	Consistent	Not Consistent (Below)	Not Consistent (Below)									

For the lending test, SunTrust Bank received a High Satisfactory rating for the State of Virginia. Performance in the Lynchburg, Radford, Roanoke, and Winchester assessment areas was consistent with the bank's performance for the state. Community development lending was excellent in Lynchburg, Radford, and Winchester. Charlottesville, Harrisonburg, and Staunton assessment areas exhibited weaker performance than the state; however, performance in all three assessment areas was still considered satisfactory. Weaker performance was primarily attributable to very poor or poor community development lending

For the investment test, SunTrust Bank received a High Satisfactory rating for the State of Virginia. Performance in all limited-scope assessment areas was weaker than the bank's performance for the state due to low levels of qualified investments and contributions relative to the bank's operational presence in all of these markets.

For the service test, SunTrust Bank received a rating of High Satisfactory for the State of Virginia. Service test performance in the Lynchburg and Roanoke assessment areas was consistent with the statewide performance while performance in the remaining metropolitan limited-scope assessment areas was weaker. The overall service test performance was below the state in the Charlottesville, Harrisonburg, and Radford assessment areas due in part to weaker retail banking services. Limited community development services also contributed to weaker performance in the Harrisonburg and Winchester assessment areas. Community development services performance in the Charlottesville, Lynchburg, Radford, and Roanoke assessment areas was consistent with the bank's statewide community development services performance.

The performance in the metropolitan limited-scope assessment areas did not affect the overall state rating.

Nonmetropolitan Areas (Limited Review)

The following nonmetropolitan assessment areas were reviewed using limited-scope examination procedures.

DESCRIPTION OF INSTITUTION'S OPERATIONS IN THE <u>VIRGINIA</u> NONMETROPOLITAN ASSESSMENT AREAS

• Eastern Shore of Virginia Assessment Area (Accomack and Northampton counties)

- o As of December 31, 2015, SunTrust Bank operated two branches in the assessment area, representing 1.5 percent of its branches in **Virginia**.
- As of June 30, 2015, the bank had \$111.9 million in deposits in this assessment area, representing a market share of 17.8 percent and 1.0 percent of SunTrust Bank's total deposits in <u>Virginia</u>.

• Franklin City Assessment Area (Franklin City and Southampton counties)

- o As of December 31, 2015, SunTrust Bank operated one branch in the assessment area, representing 0.7 percent of its branches in **Virginia**.
- O As of June 30, 2015, the bank had \$26.9 million in deposits in this assessment area, representing a market share of 13.1 percent and 0.2 percent of SunTrust Bank's total deposits in **Virginia**.

• Orange Assessment Area (Orange County)

- o As of December 31, 2015, SunTrust Bank operated no branches in the assessment area, because the bank closed one branch during the review period.
- o As of June 30, 2015, the bank had no deposits in this assessment area.

• Rockbridge Assessment Area (Buena Vista and Lexington cities and Rockbridge County)

- o As of December 31, 2015, SunTrust Bank operated one branch in the assessment area, representing 0.7 percent of its branches in **Virginia**.
- O As of June 30, 2015, the bank had \$54.9 million in deposits in this assessment area, representing a market share of 8.3 percent and 0.5 percent of SunTrust Bank's total deposits in **Virginia**.

• Shenandoah Assessment Area (Page and Shenandoah counties)

- o As of December 31, 2015, SunTrust Bank operated two branches in the assessment area, representing 1.5 percent of its branches in **Virginia**.
- o As of June 30, 2015, the bank had \$93.5 million in deposits in this assessment area, representing a market share of 8.3 percent and 0.8 percent of SunTrust Bank's total deposits in **Virginia**.

• Smyth Assessment Area (Smyth County)

- o As of December 31, 2015, SunTrust Bank operated one branch in the assessment area, representing 0.7 percent of its branches in **Virginia**.
- O As of June 30, 2015, the bank had \$48.7 million in deposits in this assessment area, representing a market share of 11.3 percent and 0.4 percent of SunTrust Bank's total deposits in **Virginia**.

• South Boston Assessment Area (Halifax County)

- o As of December 31, 2015, SunTrust Bank operated one branch in the assessment area, representing 0.7 percent of its branches in **Virginia**.
- O As of June 30, 2015, the bank had \$65.8 million in deposits in this assessment area, representing a market share of 12.8 percent and 0.6 percent of SunTrust Bank's total deposits in **Virginia**.

Nonmetropolitan Areas (Limited Review)

- West Piedmont Assessment Area (Martinsville City and Henry and Patrick counties)
 - o As of December 31, 2015, SunTrust Bank operated four branches in the assessment area, representing 3.0 percent of its branches in **Virginia**.
 - As of June 30, 2015, the bank had \$212.8 million in deposits in this assessment area, representing a market share of 13.8 percent and 1.9 percent of SunTrust Bank's total deposits in Virginia.

CONCLUSIONS WITH RESPECT TO PERFORMANCE TESTS

Through the use of available facts and data, including performance and demographic information, each assessment area's performance was evaluated and compared with the bank's performance in the state. The conclusions regarding performance are provided in the table below. Please refer to the tables in Appendix H for information regarding these areas.

	Nonmetropolita	n Assessment Areas	
Assessment Areas	Lending Test	Investment Test	Service Test
Eastern Shore of VA	Not Consistent (Below)	Not Consistent (Below)	Not Consistent (Below)
Franklin City	Not Consistent (Below)	Not Consistent (Below)	Not Consistent (Below)
Orange	Not Consistent (Below)	Not Consistent (Below)	<u>Consistent</u>
Rockbridge	Not Consistent (Below)	Not Consistent (Below)	Not Consistent (Below)
Shenandoah	Consistent	Consistent	Not Consistent (Below)
Smyth	Not Consistent (Below)	Not Consistent (Below)	Not Consistent (Below)
South Boston	Not Consistent (Below)	Not Consistent (Below)	Not Consistent (Below)
West Piedmont	Not Consistent (Below)	Not Consistent (Below)	Not Consistent (Below)

For the lending test, performance in the Shenandoah assessment area was consistent with SunTrust Bank's statewide performance. Performance in the remaining seven limited-scope nonmetropolitan assessment areas was weaker than the bank's performance in the state; however, four of these assessment areas were still considered satisfactory. Weaker performance was primarily attributable to very poor or poor community development lending in these assessment areas. Also contributing to weaker performance was the distribution of loans by borrower income in the Franklin City, Orange, and Rockbridge assessment areas. The geographic distribution of loans was also a factor in the Franklin City assessment area.

For the investment test, performance in most nonmetropolitan limited-scope assessment areas was weaker than the bank's statewide performance due to lower levels of qualified investments relative to SunTrust Bank's operations in the assessment areas. Performance in the Shenandoah assessment area was consistent with statewide performance.

For the service test, performance in the nonmetropolitan limited-scope assessment areas was generally below the statewide performance. Service test performance in the Orange assessment area was consistent with the statewide performance primarily due to excellent community development services in the assessment area. The bank had no qualified community development services in the Franklin City, Shenandoah, Smyth, and South

Nonmetropolitan Areas (Limited Review)

Boston assessment areas. Additionally, retail banking services were weaker than the state in the Eastern Shore, Shenandoah, Smyth, and South Boston assessment areas, stronger in Franklin City and West Piedmont, and consistent in the remaining assessment areas.

The performance in the nonmetropolitan limited-scope assessment areas did not affect the overall state rating.

CRA RATING FOR WEST VIRGINIA: <u>SATISFACTORY</u>

The Lending Test is rated:

Low Satisfactory

High Satisfactory

High Satisfactory

High Satisfactory

Major factors supporting the rating include the following:

- The geographic distribution of loans reflects adequate penetration throughout the assessment areas, and the distribution of loans by borrower income reflects good penetration among customers of different income levels and businesses of different revenue sizes.
- The bank made no community development loans in its West Virginia assessment areas; this low level of lending is poor given the bank's size and presence in its assessment areas.
- The bank provides a significant level of qualified community development investments and grants
 that are responsive to several identified community development needs of the West Virginia
 assessment areas.
- Retail services are reasonably accessible to the bank's geographies and individuals of different income levels in the assessment areas.
- The bank provides a relatively high level of community development services throughout the assessment areas.

SCOPE OF EXAMINATION

A full-scope review was conducted for the following assessment area in the State of West Virginia:

• Charleston

A limited-scope review was conducted for the remaining assessment area:

• Huntington

The time period, products, and affiliates evaluated for this assessment area are consistent with the scope discussed in the institution section of this report.

DESCRIPTION OF INSTITUTION'S OPERATIONS IN WEST VIRGINIA

As of June 30, 2015, SunTrust Bank had \$93.8 million in deposits in West Virginia, accounting for 0.1 percent of the bank's total deposits. SunTrust Bank operated six branch offices in West Virginia, as of December 31, 2015, representing 0.4 percent of the bank's total branches. HMDA-reportable lending in West Virginia accounted for 0.2 percent of total institutional HMDA-reportable lending by number of loans, and CRA small business lending in West Virginia accounted for 0.1 percent of the bank's total CRA small business lending. Overall, HMDA-reportable and CRA lending in West Virginia accounted for 0.1 percent of the bank's total lending activity by dollar volume, which was equal to the percentage of total deposits at 0.1 percent.

The following table shows lending activity from January 1, 2014, through December 31, 2015.

Statewide Summary of Lending Activity Assessment Areas Located in West Virginia

Loan Type	#	%	\$ (000s)	%

Originations and Purchases

CONCLUSIONS WITH RESPECT TO PERFORMANCE TESTS IN WEST VIRGINIA

LENDING TEST

The lending test rating in the state of West Virginia is low satisfactory. Overall, performance in West Virginia with regard to the geographic distribution of loans reflects adequate penetration throughout the assessment areas. The distribution of loans by borrower income reflects good penetration among customers of different income levels and businesses of different sizes. Additionally, SunTrust Bank made no community development loans in West Virginia.

During the review period, SunTrust reported 224 HMDA-reportable loans and 52 CRA small business loans in West Virginia. As such, HMDA-reportable lending was given greater weight when determining the lending test rating for West Virginia. The rating for West Virginia is based on performance in the Charleston full-scope assessment area. Approximately 63.4 percent of the state's HMDA-reportable and small business lending occurred in this assessment area, thus making this the largest concentration of lending activity in the state. Additionally, 82.8 percent of the bank's total deposits in West Virginia are in this assessment area.

Details of the bank's HMDA-reportable and small business lending and information regarding lending by peers can be found in Appendix G.

Geographic and Borrower Distribution

The geographic distribution of SunTrust's HMDA-reportable and small business loans is adequate, and the distribution of loans by borrower income and revenue size of businesses is good. As noted above, the rating for the state of West Virginia is derived from the Charleston assessment area. A detailed discussion of the borrower and geographic distribution of lending for the Charleston assessment area is included in the next section of this report.

Community Development Lending

Sun Trust Bank made no community development loans in the state of West Virginia during the review period. The low level of statewide community development lending is considered poor based on the bank's size and presence in its West Virginia assessment areas.

INVESTMENT TEST

The investment test rating for West Virginia is high satisfactory.

The bank makes a significant level of qualified investments and contributions in the West Virginia assessment areas. Charleston was the only full-scope assessment area reviewed, and performance in this assessment area was good. During the review period, the bank had qualified investments of \$2.6 million and contributions of \$44,500 in the West Virginia assessment areas. Additionally, the bank had statewide investments of

approximately \$28,000 and contributions of \$66,000 to organizations that serve the entire state. All statewide contributions supported affordable housing initiatives, including an annual statewide affordable housing conference.

This level of investment activity is considered good given the bank's presence in the state and the availability of community development opportunities in the bank's assessment areas. Additional details regarding specific investments and contributions can be found in the full-scope assessment area section, and a summary of the bank's investments and contributions for the state can be found in Appendix F.

SERVICE TEST

The service test rating for West Virginia is high satisfactory.

Retail Services

Delivery systems, including ATMs and branch office locations, are reasonably accessible to the bank's geographies and individuals of different income levels in the assessment areas. Statewide, the bank did not open or close any branches during the review period; therefore, the record of opening and closing of branches has generally not adversely affected the accessibility of its delivery systems, particularly to LMI geographies and/or LMI individuals. Statewide, banking services and hours of operation do not vary in a way that inconveniences the assessment areas, particularly LMI geographies or LMI individuals. Additional detail on the bank's retail services can be found in the full-scope assessment area section of this report.

Community Development Services

SunTrust Bank provided a relatively high level of community development services that benefited LMI residents and small businesses in the state of West Virginia. The bank provided a total of 354 qualified service hours during the examination period, including 284 hours in the Charleston full-scope assessment area. Performance in Charleston was good, and performance in the limited-scope assessment area was consistent. Given the bank's size and presence in the state of West Virginia and the opportunities that exist for community development services, the bank's performance is considered good.

Additional detail on the bank's retail and community development services can be found in the full-scope assessment area section of this report.

METROPOLITAN AREA

(Full Scope Review)

DESCRIPTION OF INSTITUTION'S OPERATIONS IN THE CHARLESTON, WEST VIRGINIA ASSESSMENT AREA

Overview

The Charleston assessment area consists of Kanawha County, which is part of the three-county Charleston, West Virginia MSA. The other two counties that make up the Charleston MSA are Boone and Clay. As of December 2015, SunTrust had five branches in the Charleston assessment area, which represent 83.3 percent of the branches statewide and hold 82.8 percent of its deposits in West Virginia. Additionally, the market represents the largest concentration of combined HMDA-reportable and CRA small business lending in the state at 59.3 percent.

The assessment area is an active banking market that includes various financial institutions ranging from community banks to large national financial institutions. According to the June 30, 2015 FDIC Summary of Deposits Report, BB&T holds the highest deposit market share with nearly 33.1 percent of the deposits and has ten branches in the market area. SunTrust holds nearly 1.6 percent of the deposit market share with five branches in the market area.

SunTrust Bank and SunTrust Mortgage combined had an average of 1.8 percent of total HMDA-reportable lending in both 2014 and 2015. STB ranked 29th while STM ranked 20th out of the 144 HMDA lenders in the market in 2014. In 2015, STM dropped in ranking to 23rd place while STB remained the same. City National Bank of West Virginia, Quicken Loans, BB&T, Huntington National Bank, and JPMorgan Chase Bank were the top HMDA lenders in the market.

SunTrust Bank ranked 21st out of 45 CRA reporters in 2014 with less than 1.0 percent of the CRA loans in the market area. In 2015, the bank ranked 18th out of 46 CRA reporters with 1.0 percent of the CRA loans. BB&T was the top CRA lender in the market for both years.

Population and Income Characteristics

The county seat of Kanawha County is Charleston, West Virginia, the state capital. Charleston is the largest city in SunTrust Bank's assessment area, with a population estimate of 49,138 as of July 1, 2016. Kanawha County is also the most populous county in West Virginia with an estimated population of 186,241. Both Charleston and Kanawha County experienced population loss between 2010 and 2016, with a 4.3 percent and 3.5 percent population decline, respectively.³⁰⁰ It is important to note that population loss affects housing, healthcare, and consumer industries.

³⁰⁰ QuickFacts. US Census Bureau, n.d. Web. 10 July 2017. http://quickfacts.census.gov

The assessment area is made up of 53 census tracts: 12 tracts (22.6 percent) are moderate-income, 30 tracts (56.6 percent) are middle-income, and 11 tracts (20.8 percent) are upper-income.

For purposes of classifying borrower income, this evaluation uses the FFIEC estimated median family income. The following table sets forth the estimated median family income in 2014 and 2015 for the Charleston, West Virginia MSA and shows that the median family income increased by \$2,100, or 3.7 percent, between 2014 and 2015.

Borrower Income Levels Charleston, WV MSA

FFIE	C Estimated		L	ow	M	ode	rate	N	Midd	lle	I	Јрре	er
Median	Family Income	0	-	49.99%	50%	-	79.99%	80%	-	119.99%	120%	-	& above
2014	\$57,500	0	-	\$28,749	\$28,750	-	\$45,999	\$46,000	-	\$68,999	\$69,000	-	& above
2015	\$59,600	0	-	\$29,799	\$29,800	-	\$47,679	\$47,680	-	\$71,519	\$71,520	-	& above

Poverty is a significant problem in the assessment area. For the city of Charleston, the percentage of people in poverty was 19.6 percent between 2011 and 2015, while the poverty rate was 15.9 percent in Kanawha County. The statewide rate was 17.9 percent.³⁰¹ In addition, 9.7 percent of families in the assessment area live below the poverty level, while 18.3 percent of families living in moderate-income census tracts live below the poverty level. Moreover, 36.6 percent of families are considered LMI, which is slightly below the percentage of LMI families in the state (39.5 percent).³⁰²

Economic Conditions

According to Moody's Analytics, the Charleston, West Virginia MSA has been in a recession since March 2016. The contributing factors include a decline in employment and wages, above average unemployment rate, population losses, and large-scale layoffs in the area's coal industry. Total employment declined by approximately 3.0 percent between 2012 and 2015 and declined 2.4 percent for the twelve months ending December 2016. Most concerning, the mining, logging and construction sector has shed 3,500 jobs since December 2012 and decreased 14.1 percent from December 2015 to December 2016. The coal industry is the main economic driver in the Charleston MSA, and layoffs in the industry impact the region. The coal industry has been affected by a record number of coal-fired power plant closures and the transition in the nation's power supply toward natural gas and renewable energy.

³⁰⁴ "At a Glance Tables." U.S. Bureau of Labor Statistics. U.S. Bureau of Labor Statistics, n.d. Web. 12 July 2017. http://www.bls.gov/eag/home.htm.

As of December 2016, total employment in the assessment area was approximately 119,200 jobs with employment concentrations in the following sectors: government, education and health services, professional and business services, and retail trade. However, the highest average annual earnings can be found in the mining, construction, and manufacturing, and transportation and utilities sectors. Job losses in these sectors may disrupt consumer industries, such as retail and hospitality establishments, and may impact demand for single-family housing. Besides local and state government, other major employers in the assessment area include Charleston Area Medical Center, Herbert J. Thomas Memorial Hospital, Frontier Communications, MC Junking Corporation (welding), and Wal-Mart Stores, Inc.

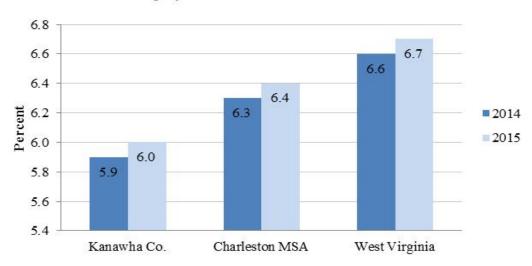

According to 2015 Dun & Bradstreet information, there were 8,119 businesses in the assessment area, 88.7 percent of which had total annual revenues less than or equal to \$1 million and were therefore considered to be small businesses. Additionally, 30.7 percent of small businesses in the assessment area are located in moderateincome tracts. Lending opportunities to this segment remained stable between 2012 and 2015 in the assessment area, with nearly 2,500 loans made in 2015. During this same period, loans made to firms with revenues under \$1.0 million represented a 46.4 percent share of total small business loans in Kanawha County, which is higher than previous years but still disproportionate to the percentage of small businesses with revenues under \$1 million.³⁰⁵ This may be an indication that there may be obstacles for smaller firms to access credit in the market or that these firms are utilizing alternative financing options such as online lenders.

The unemployment rates for the assessment area, the MSA, and the state of West Virginia reflect an increase from 2014 to 2015; the higher rate in Kanawha County can be attributed to the massive layoffs previously mentioned. According to the Bureau of Labor Statistics, the annual unemployment rate in Kanawha County peaked at 7.4 percent in 2010, and then declined until 2014. Historically, the unemployment rate in the assessment area has been lower than the United States rate, but surpassed the national rate in 2014.³⁰⁶

^{305 &}quot;Kanawha County, WV (CRA Loan Data)." GIS Mapping and Geographic Information System Data. The Reinvestment Fund, n.d. Web. 12 Jul. 2017. http://www.policymap.com/>.

Unemployment Rates - Charleston WV

Not Seasonally Adjusted. Source: Bureau of Labor Statistics

Census data indicates there were 93,063 housing units in the assessment area, 63.0 percent of which were owner-occupied, 25.4 percent were rental units, and 11.3 percent were vacant. More specifically, 19.0 percent of the housing stock in the assessment area is located in moderate-income tracts. Nearly 47.4 percent of the housing in moderate-income census tracts was owner-occupied units while 38.6 percent of housing was rental units. Additionally, the median age of housing is 48 years for the assessment area. All of these factors underscore that residential lending opportunities exist for both home purchase and home improvement lending.

The Charleston metropolitan area has experienced an uneven housing market during the review period, with erratic upswings and declines in home sales during the review period. For example, home sales declined throughout 2014 and then posted a 131.0 percent annual increase in April 2015 before declining again for all 12 months in 2016.³⁰⁷ Conversely, home price appreciation has been a bit more stable, posting single digit increases during review period. As of December 2015, the median home price was \$138,500. According to bank management and Moody Analytics, retiree migration into the Charleston metropolitan area is increasing and will continue to drive the appreciation and expansion of housing in the market. This is also driving people from rural areas into the Charleston area, seeking higher quality healthcare and services.

Overall, Charleston is an affordable region for housing compared to the rest of the nation. However, given the median housing value of \$138,500, a low-income individual who earns less than \$30,000 a year may have difficulty qualifying for a mortgage loan. In addition, the percentage of homes affordable for a four-person family earning 80.0 percent of the area median income (AMI) in 2015 is 48.5 percent in Kanawha County, while

³⁰⁷ Federal Reserve Bank of Atlanta staff calculations based on data provided by LPS Applied Analytics.

the percentage of homes affordable to those earning 50.0 percent of the AMI is 35.5 percent.³⁰⁸ Therefore, homebuyer education and assistance for LMI people, such as down payment assistance programs, affordable lending products, and homebuyer counseling and education programs, should remain a priority.

Demographic Characteristics by Census Tract

The following table based on 2015 FFIEC Census Data and 2015 Dun & Bradstreet information presents key demographic and business information used to help develop a performance context for the assessment area.

Credit and Community Development Needs

While preparing CRA evaluations, examiners often contact community representatives to gain insight regarding the credit needs and economic conditions of a bank's assessment area. Community contacts and bank management familiar with the economic conditions of the Kanawha County assessment area were consulted for this evaluation.

One community contact reiterated examiner findings that (1) the economic conditions outside the city are depressed because the nation's power supply is transitioning from coal to natural gas, therefore contracting the mining industry; and (2) the region has a difficult time attracting millennials to the jobs available or providing available jobs to the current generation of workers. In terms of bank participation, a local contact indicated there were many opportunities for large financial institutions to get involved and help finance smaller projects that would impact the local community. However, he opined that the larger banks want personal guarantees from volunteer board members on loans to purchase fleet vehicles, for example, and that they have been less eager to restructure existing debt. He encouraged banks to be more flexible.

Additional opportunities shared by community contacts are highlighted below:

- Small business loans represent a primary credit need for the assessment area as mentioned previously. Businesses with gross annual revenues of \$1 million or less represent 88.7 percent of businesses in the area, but only 46.4 percent of small business lending went to this segment. There is opportunity to increase access to small business capital. Two opportunities for financial institutions include the West Virginia Loan Fund Collaborative and the West Virginia Capital Access Program (WVCAP). The West Virginia Loan Fund Collaborative is a voluntary pilot effort of eight active lending organizations that all have community-minded missions to direct lending activities to businesses in rural, underserved areas in West Virginia. Additionally, WVCAP is an opportunity for West Virginia financial institutions to partner with program participants and make loans that they would otherwise not make due to a borrower's risk profile.
- According to another contact, there is a void with regards to bank participation with the NMTC program.
 The contact indicated that downtown Charleston would be eligible for these tax credits, but the
 community lacks the expertise on how to use and leverage them. Local financial institutions could make
 an impact if they could provide guidance and technical resources to help businesses and organizations
 navigate the process.
- While the unbanked and underbanked populations in Kanawha County are below state and national rates, there are opportunities to provide low-cost banking services and access to mainstream financial institutions. According to the FDIC's 2013 National Survey of Unbanked and Underbanked Households, 5.5 percent of households in Kanawha County are unbanked, meaning they have no type of deposit account with a mainstream financial institution. Meanwhile, 16.3 percent of households are considered underbanked, meaning they have a deposit account, but they also rely on alternative financial services providers on a regular basis.³⁰⁹

³⁰⁹ 2015 Assets & Opportunities Local Data Center. Calculations by CFED of data from 2013 FDIC National Survey of Unbanked and Underbanked Households. N.p. Web. 13 Jul. 2017. http://localdata.assetsandopportunity.org/map

• Another opportunity identified by a community contact is Project West Invest, where police officers are provided with a 10-year forgivable loan if they buy a home in Charleston's West Side, an area known for high crime. This initiative has support from the Charleston Urban Renewal Authority, the police department, the Greater Kanawha Valley Foundation, and the Mayor's Office of Economic and Community Development, which oversees the project. This is an opportunity for institutions to get involved by donating, volunteering, or partnering with the Kanawha Valley Council of Philanthropy.

CONCLUSIONS WITH RESPECT TO PERFORMANCE TESTS IN THE CHARLESTON, WEST VIRGINIA ASSESSMENT AREA

LENDING TEST

SunTrust Bank's lending performance in the Charleston assessment area is adequate. The geographic distribution of loans reflects adequate penetration throughout the assessment area. Also, the distribution of borrowers reflects good penetration among borrowers of different income levels and businesses of different revenue sizes. In addition, the bank makes a low level of community development loans.

SunTrust Bank reported 130 (74.3 percent) HMDA-reportable loans and 45 (25.7 percent) CRA small business loans in the Charleston assessment area during the review period. As such, HMDA-reportable lending received greater weight than CRA small business lending in determining the bank's lending test performance for the assessment area. The Charleston assessment area accounted for 58.1 percent of SunTrust Bank's total HMDA-reportable lending in West Virginia and 63.4 percent of its total statewide CRA small business lending by dollar volume during the review period. In comparison, 82.8 percent of SunTrust Bank's West Virginia deposits are in this assessment area.

For the lending test analysis, lending performance in low-, moderate-, middle-, and upper-income census tracts and to low-, moderate-, middle-, and upper-income borrowers was considered for each product; however, comments for activity in middle- and upper-income tracts and to middle- and upper-income borrowers are only included when they were material to the outcome of the analyses. Details of the bank's mortgage and small business lending and information regarding lending by peers can be found in Appendix G.

Geographic Distribution of Loans

For this analysis the geographic distribution of small business and HMDA-reportable lending, including both originations and purchases, was compared with available demographic information. Performance context information and aggregate lending data were also taken into consideration. For instance, unemployment rates, poverty rates, the level of owner-occupied units, and the volume of small businesses in LMI census tracts were factors considered when assessing the bank's lending performance. Considering all of these factors, SunTrust Bank's geographic distribution of loans reflects adequate penetration throughout the assessment area.

There are no low-income census tracts in the Charleston assessment area. As such, no rating for each of the lending products was assigned in this category and more weight was placed on the bank's lending in moderate-income census tracts.

Home Purchase Loans

Home purchase lending in moderate-income census tracts is adequate based on five loan originations during the review period. Lending performance in moderate-income census tracts was equal to the percentage of owner-occupied units located in these tracts. However, the bank's home purchase lending in moderate-income census tracts was greater than aggregate lender performance during the review period.

Home Refinance Loans

Home refinance lending in moderate-income census tracts is very poor. SunTrust Bank did not originate any home refinance loans in moderate-income census tracts during the review period, where 14.3 percent of owner-occupied units were located. Home refinance lending opportunities in these tracts do not appear limited as evidenced by aggregate lending performance during the review period.

Home Improvement Loans

Home improvement lending in moderate-income census tracts is adequate based on four loan originations during the review period. Lending performance in moderate-income census tracts was less than the percentage of owner-occupied units located in these tracts. However, the bank's home improvement lending in moderate-income census tracts was greater than aggregate lending in 2014, but less than aggregate lending in 2015.

Small Business Loans

Small business lending in moderate-income census tracts is excellent. SunTrust Bank originated 37.8 percent of its small business loans in moderate-income census tracts, where 29.5 percent of small businesses in the assessment area operate. Additionally, SunTrust Bank outperformed aggregate lenders throughout the review period.

Lending to Borrowers of Different Incomes and Businesses of Different Sizes

The distribution of loans by borrower income or revenue size of businesses is good. For this analysis, the distribution of small business lending across business revenue sizes and HMDA-reportable lending across borrower income levels was compared to available demographic information. Performance context factors were also considered as well as the performance of other banks.

Home Purchase Loans

Home purchase lending to low-income borrowers is poor. SunTrust Bank only originated two home purchase loans to low-income borrowers during the review period. As a result, the bank's home purchase lending to low-income borrowers was significantly less than the percentage of low-income families, and the bank underperformed aggregate lenders during the review period.

Home purchase lending to moderate-income borrowers is excellent. During the review period, 37.1 percent of the bank's home purchase loans were made to moderate-income borrowers, which is significantly greater than the percentage of moderate-income families in the assessment area at 18.0 percent. The bank's home purchase loans to moderate-income borrowers also exceeded the aggregate lending performance during the review period.

Home Refinance Loans

Home refinance lending to low-income borrowers is adequate. The percentage of home refinance loans to low-income borrowers was less than the percentage of low-income families, but consistent with aggregate lenders during the review period.

Home refinance lending to moderate-income borrowers is excellent. The percentage of home refinance loans to moderate-income borrowers exceeded both the percentage of moderate-income families and aggregate lender performance during the review period.

Home Improvement Loans

Home improvement lending to low-income borrowers is good. Although the bank only originated seven home improvement loans to low-income borrowers during the review period, the percentage of home improvement loans to low-income borrowers was greater than both the percentage of low-income families and aggregate lender performance during the review period.

Home improvement lending to moderate-income borrowers is excellent. Home improvement lending to moderate-income borrowers greatly exceeded both the percentage of moderate-income families and aggregate lender performance during the review period.

Small Business Loans

The distribution of small business loans to businesses of different sizes is good. While the percentage of small business loans to businesses with revenues of \$1 million or less was less than the percentage of small businesses in the assessment area, the bank's performance was greater than aggregate lending performance. For example, in 2014 the bank made 63.2 percent of its loans to small businesses compared to the aggregate at 38.0 percent. Additionally, 86.7 percent of small business loans were originated in amounts of \$250,000 or less, indicating a willingness to lend in the smaller amounts that are typically requested by small businesses.

Community Development Lending

Although SunTrust Bank made no community development loans in the Charleston assessment area during the review period, this performance is considered poor given the bank's limited presence and community development lending opportunities.

INVESTMENT TEST

SunTrust Bank makes a significant level of qualified investments and grants in the Charleston assessment area given the bank's presence in the assessment area. The bank's investments (excluding contributions) totaled \$1.9 million in the assessment area. All investments were made in a prior review period. The bank's investment portfolio in the assessment area is focused on affordable housing and includes bonds that finance HUD programs and one older investment in a LIHTC fund.

During the review period, the bank contributed \$41,500 to nonprofit organizations that provide community services to LMI individuals and to support economic development. Notable donations include:

- A \$22,000 grant to support an entrepreneurship and workforce development program that focuses on giving people access to fresh, organic produce;
- A \$10,000 grant to support the new Goodwill Prosperity Center, which will include a public computer lab, classrooms for college credit classes, interview space and a professional clothes closet, among other amenities; and
- A \$5,000 grant to a microlender dedicated to helping small businesses start and grow in the Shenandoah Valley of Virginia.

The Charleston assessment area was also positively impacted by \$66,000 in contributions that provided support for statewide affordable housing initiatives, as described in the state overview section of the report.

While the bank's investments during the review period were limited to contributions, the donations reflect a high level of responsiveness to the assessment area needs for creative economic development strategies and affordable housing. Due to the responsiveness of the bank's donations, performance is considered good, given the bank's presence in this market and available community development opportunities.

SERVICE TEST

SunTrust Bank's service test performance in the Charleston assessment area is good based on the accessibility of the bank's retail services and the relatively high level of community development services.

Retail Services

Delivery systems are reasonably accessible to the bank's geographies and individuals of different income levels in the Charleston assessment area. The distribution of five branch offices and six ATMs as of December 31, 2015, was compared to the distribution of households and businesses among the tract categories within the assessment area. This assessment area has no low-income census tracts; therefore, the bank has no branches in low-income census tracts. The bank has one branch in a moderate-income census tract representing 20.0 percent of total branches in the assessment area. For comparison purposes, 18.5 percent of households and 30.7 percent of businesses were located in moderate-income tracts. During the review period, no branches were

opened or closed in this assessment area. The bank's record of opening and closing of branches has generally not adversely affected the accessibility of its delivery systems, particularly to LMI geographies and individuals in the assessment area.

SunTrust Bank offers extended hours at its branch location in a moderate-income tract, but does not offer weekend hours. Banking hours of operation and services do not vary in a way that inconveniences the assessment area, particularly LMI geographies and individuals in the assessment area.

DTO - Drive thru only is a subset of total branches

SA = Stand Alone ATM is a subset of total ATMs

Community Development Services

SunTrust Bank provides a relatively high level of community development services in the Charleston assessment area. During the review period, SunTrust Bank employees provided 284 service hours in various capacities for community development organizations. The majority of service hours bank employees engaged in were affordable housing service hours at a local organization that provides housing-related services in the assessment area; these activities were responsive to the needs of this assessment area. SunTrust employees were actively engaged in providing board services for a local CDFI, working with affordable housing organizations, and workforce development. The bank's performance is good given SunTrust Bank's size and presence in the assessment area and the opportunities that exist for community development service.

Metropolitan Areas (Limited Review)

The following metropolitan assessment area was reviewed using limited-scope examination procedures.

DESCRIPTION OF INSTITUTION'S OPERATIONS IN THE <u>WEST VIRGINIA</u> METROPOLITAN ASSESSMENT AREA

- Huntington Assessment Area (Cabell and Putnam counties)
 - o As of December 31, 2015, SunTrust Bank operated one branch in the assessment area, representing 16.7 percent of its branches in **West Virginia**.
 - As of June 30, 2015, the bank had \$16.2 million in deposits in this assessment area, representing a market share of 0.5 percent and 17.2 percent of SunTrust Bank's total deposits in <u>West Virginia</u>.

CONCLUSIONS WITH RESPECT TO PERFORMANCE TESTS

Through the use of available facts and data, including performance and demographic information, the assessment area's performance was evaluated and compared with the bank's performance in the state. The conclusions regarding performance are provided in the table below. Please refer to the tables in Appendix H for information regarding this area.

Metropolitan Assessment Areas								
Assessment Areas Lending Test Investment Test Service Test								
Huntington	Not Consistent (Below)	Consistent	Not Consistent (Below)					

For the lending test, SunTrust Bank received a Low Satisfactory rating for the State of West Virginia. Performance in the Huntington assessment area was weaker than the bank's performance in the state due to the absence of community development lending in the assessment area and the poor geographic distribution of loans.

For the investment test, SunTrust Bank received a High Satisfactory rating for the State of West Virginia. Performance in the Huntington assessment area was consistent with the bank's performance in the state.

For the service test, SunTrust Bank received a rating of High Satisfactory for the State of West Virginia. Service test performance in the Huntington assessment area was weaker than the bank's performance for the state due to weaker retail banking services in this assessment area. Community development service performance was consistent with the state in this assessment area.

The performance in the metropolitan limited-scope assessment area did not affect the overall state rating.

HMDA -	Home Mortgage Disclosure Act (Regulation C)
HUD -	Department of Housing and Urban Development
LMI -	Low- and Moderate-Income
LIHTC -	Low Income Housing Tax Credit
LTD -	Loan-to-Deposit
LTV -	Loan-to-Value Ratio
MD -	Metropolitan Division
MSA -	Metropolitan Statistical Area
OMB -	Office of Management and Budget
REIS -	Regional Economic Information System
SBA -	Small Business Administration
USDA -	United States Department of Agriculture

APPENDIX D - GLOSSARY

Aggregate lending: The number of loans originated and purchased by all reporting lenders in specified income categories as a percentage of the aggregate number of loans originated and purchased by all reporting lenders in the metropolitan area/assessment area.

Census tract: A small subdivision of metropolitan and other densely populated counties. Census tract boundaries do not cross county lines; however, they may cross the boundaries of metropolitan statistical areas. Census tracts usually have between 2,500 and 8,000 persons, and their physical size varies widely depending upon population density. Census tracts are designed to be homogeneous with respect to population characteristics, economic status, and living conditions to allow for statistical comparisons.

Community development: All Agencies have adopted the following language. Affordable housing (including multi-family rental housing) for low- or moderate-income individuals; community services targeted to low- or moderate-income individuals; activities that promote economic development by financing businesses or farms that meet the size eligibility standards of the Small Business Administration's Development Company or Small Business Investment Company programs (13 CFR 121.301) or have gross annual revenues of \$1 million or less; or, activities that revitalize or stabilize low- or moderate-income geographies.

Effective September 1, 2005, the Board of Governors of the Federal Reserve System, Office of the Comptroller of the Currency, and the Federal Deposit Insurance Corporation have adopted the following additional language as part of the revitalize or stabilize definition of community development. Activities that revitalize or stabilize-

- I. Low-or moderate-income geographies;
- II. Designated disaster areas; or
- III. Distressed or underserved nonmetropolitan middle-income geographies designated by the Board, Federal Deposit Insurance Corporation, and Office of the Comptroller of the Currency, based on
 - a. Rates of poverty, unemployment, and population loss; or
 - b. Population size, density, and dispersion. Activities that revitalize and stabilize geographies designated based on population size, density, and dispersion if they help to meet essential community needs, including needs of LMI individuals.

Effective January 19, 2010, the Board of Governors of the Federal Reserve System, the Office of the Comptroller of the Currency, and the Federal Deposit Insurance Corporation revised the definition of community development to include loans, investments, and services by financial institutions that-

- I. Support, enable or facilitate projects or activities that meet the "eligible uses" criteria described in Section 2301(c) of the Housing and Economic Recovery Act of 2008 (HERA), Public Law 110-289, 122 Stat. 2654, as amended, and are conducted in designated target areas identified in plans approved by the United States Department of Housing and Urban Development in accordance with the Neighborhood Stabilization Program (NSP);
- II. Are provided no later than two years after the last date funds appropriated for the NSP are required to be spent by grantees; and
- III. Benefit low-, moderate-, and middle-income individuals and geographies in the bank's assessment area(s) or areas outside the bank's assessment area(s) provided the bank has adequately addressed the community development needs of its assessment area(s).

APPENDIX D – GLOSSARY (Continued)

Consistent: This term is used to describe the performance of an institution in an assessment area reviewed not using full-scope procedures when the performance is comparable to the performance in the state overall.

Consumer loan(s): A loan(s) to one or more individuals for household, family, or other personal expenditures. A consumer loan does not include a home mortgage, small business, or small farm loan. This definition includes the following categories: motor vehicle loans, credit card loans, home equity loans, other secured consumer loans, and other unsecured consumer loans.

Family: Includes a householder and one or more other persons living in the same household who are related to the householder by birth, marriage, or adoption. The number of family households always equals the number of families; however, a family household may also include nonrelatives living with the family. Families are classified by type as either a married-couple family or other family, which is further classified into 'male householder' (a family with a male householder and no wife present) or 'female householder' (a family with a female householder and no husband present).

Full-scope review: Performance under the Lending, Investment, and Service Tests is analyzed considering performance context, quantitative factors (for example, geographic distribution, borrower distribution, and total number and dollar amount of investments), and qualitative factors (for example, innovativeness, complexity, and responsiveness).

Geography: A census tract delineated by the United States Bureau of the Census in the most recent decennial census.

Home Mortgage Disclosure Act (HMDA): The statute that requires certain mortgage lenders that do business or have banking offices in a metropolitan statistical area to file annual summary reports of their mortgage lending activity. The reports include such data as the race, gender, and the income of applications, the amount of loan requested, and the disposition of the application (for example, approved, denied, and withdrawn).

Home mortgage loans: Includes home purchase and home improvement loans as defined in the HMDA regulation. This definition also includes multi-family (five or more families) dwelling loans, loans for the purchase of manufactured homes and refinancing of home improvement and home purchase loans.

Household: Includes all persons occupying a housing unit. Persons not living in households are classified as living in group quarters. In 100 percent tabulations, the count of households always equals the count of occupied housing units.

Limited-scope review: Performance under the Lending, Investment, and Service Tests is analyzed using only quantitative factors (for example, geographic distribution, borrower distribution, total number and dollar amount of investments, and branch distribution).

Low-income: Individual income that is less than 50 percent of the area median income, or a median family income that is less than 50 percent, in the case of a geography.

APPENDIX D - GLOSSARY (Continued)

Market share: The number of loans originated and purchased by the institution as a percentage of the aggregate number of loans originated and purchased by all reporting lenders in the metropolitan area/assessment area.

Metropolitan area (MA): A metropolitan statistical area (MSA) or a metropolitan division (MD) as defined by the Office of Management and Budget. An MSA is a core area containing at least one urbanized area of 50,000 or more inhabitants, together with adjacent communities having a high degree of economic and social integration with that core. An MD is a division of an MSA based on specific criteria including commuting patterns. Only an MSA that has a population of at least 2.5 million may be divided into MDs.

Middle-income: Individual income that is at least 80 percent and less than 120 percent of the area median income, or a median family income that is at least 80 percent and less than 120 percent, in the case of a geography.

Moderate-income: Individual income that is at least 50 percent and less than 80 percent of the area median income, or a median family income that is at least 50 percent and less than 80 percent, in the case of a geography.

Multi-family: Refers to a residential structure that contains five or more units.

Not Consistent: This term is used to describe the performance of an institution in an assessment area reviewed not using full-scope procedures when the performance is not comparable to the performance in the state overall. A "not consistent" rating only illustrates the performance of an assessment area in comparison to the performance in the state as a whole. It does not necessarily indicate that the performance is less than satisfactory.

Other products: Includes any unreported optional category of loans for which the institution collects and maintains data for consideration during a CRA examination. Examples of such activity include consumer loans and other loan data an institution may provide concerning its lending performance.

Owner-occupied units: Includes units occupied by the owner or co-owner, even if the unit has not been fully paid for or is mortgaged.

Qualified investment: A qualified investment is defined as any lawful investment, deposit, membership share, or grant that has as its primary purpose community development.

Rated area: A rated area is a state or multistate metropolitan area. For an institution with domestic branches in only one state, the institution's CRA rating would be the state rating. If an institution maintains domestic branches in more than one state, the institution will receive a rating for each state in which those branches are located. If an institution maintains domestic branches in two or more states within a multistate metropolitan area, the institution will receive a rating for the multistate metropolitan area.

APPENDIX D – GLOSSARY (Continued)

Small loan(s) to business(es): A loan included in 'loans to small businesses' as defined in the Consolidated Report of Condition and Income (Call Report) and the Thrift Financial Reporting (TFR) instructions. These loans have original amounts of \$1 million or less and typically are either secured by nonfarm or nonresidential real estate or are classified as commercial and industrial loans. However, thrift institutions may also exercise the option to report loans secured by nonfarm residential real estate as "small business loans" if the loans are reported on the TFR as nonmortgage, commercial loans.

Small loan(s) to farm(s): A loan included in 'loans to small farms' as defined in the instructions for preparation of the Consolidated Report of Condition and Income (Call Report). These loans have original amounts of \$500,000 or less and are either secured by farmland, or are classified as loans to finance agricultural production and other loans to farmers.

Upper-income: Individual income that is 120 percent or more than the area median income, or a median family income that is 120 percent or more, in the case of a geography.

APPENDIX E - GENERAL INFORMATION

General Information

The Community Reinvestment Act (CRA) requires each federal financial supervisory agency to use its authority when examining financial institutions subject to its supervision to assess the institution's record of meeting the credit needs of its entire community, including LMI neighborhoods, consistent with safe and sound operation of the institution. Upon conclusion of such examination, the agency must prepare a written evaluation of the institution's record of meeting the credit needs of its community.

This document is an evaluation of the CRA performance of <u>SunTrust Bank</u> prepared by the <u>Federal Reserve</u> <u>Bank of Atlanta</u>, the institution's supervisory agency, as of <u>September 16, 2016</u>. The agency rates the CRA performance of an institution consistent with the provisions set forth in Appendix A to 12 CFR Part 228.
