COMMUNITY REINVESTMENT ACT PERFORMANCE EVALUATION

Bank of Utah RSSD # 933975

2605 Washington Boulevard Ogden, Utah 84401

Federal Reserve Bank of San Francisco 101 Market Street San Francisco, California 94105

NOTE: This document is an evaluation of this institution's record of meeting the credit needs of its entire community, including low- and moderate-income neighborhoods, consistent with the safe and sound operation of the institution. This evaluation is not, nor should it be construed as, an assessment of the financial condition of this institution. The rating assigned to this institution does not represent an analysis, conclusion or opinion of the federal financial supervisory agency concerning the safety and soundness of this financial institution.

Institution Rating

Institution's Community Reinvestment Act (CRA) Rating

Bank of Utah (BOU) is rated "OUTSTANDING."

The following table shows the performance level of Bank of Utah with respect to the lending, investment, and service tests.

| PERFORMANCE | PERFORMANCE TESTS | | | | | | |
|------------------------------|-------------------|--------------------|-----------------|--|--|--|--|
| LEVELS | LENDING TEST* | INVESTMENT TEST | Service Test | | | | |
| Outstanding | x | | | | | | |
| HIGH SATISFACTORY | | x | х | | | | |
| LOW SATISFACTORY | | | | | | | |
| NEEDS TO IMPROVE | | | | | | | |
| Substantial Noncompliance | | | | | | | |

^{*} The lending test is weighted more heavily than the investment and service tests in determining the overall rating.

The major factors supporting the institution's rating include:

- Lending levels that reflect excellent responsiveness to assessment area credit needs, with a high percentage of loans made within the bank's assessment areas.
- An overall good geographic distribution of loans, with particularly strong penetration in small business lending in low- and moderate-income geographies.
- An overall adequate distribution of loans among borrowers of different income levels and businesses of different sizes.
- Leadership in making community development loans and extensive use of flexible lending programs that are responsive to small business credit needs, as well as the need to retain jobs in low- and moderate-income areas.
- Overall significant levels of qualified community development investments which exhibit excellent responsiveness to a significant community need of affordable housing.
- Leadership in providing community development services, and a record of opening and closing branches that has not adversely affected the accessibility to low- and moderate-income individuals.

Institution

Description of Institution

Bank of Utah (BOU), with \$1.8 billion in total assets as of September 30, 2020, is a wholly-owned subsidiary of BOU Bancorp, Inc., both of which are headquartered in Ogden, Utah. The bank currently operates 17 full-service branch offices and three loan production offices (LPOs) within the state of Utah. The branches are located in the counties of Box Elder (2), Cache (2), Davis (2), Salt Lake (3), Utah (3), Wasatch (1), and Weber (4). The LPOs are located in Cache, Carbon, and Washington counties. The bank also has a wealth management and corporate trust location in Salt Lake County.

The bank continues to focus on addressing the credit needs of small- to medium-sized businesses and serving the home mortgage needs of local customers. Commercial products include loans for commercial real estate, working capital, operating lines of credit, equipment, accounts receivable, construction, and Small Business Administration (SBA) loans. Mortgage products include loans for the purchase and refinance of single-family residences, a majority of which are sold in the secondary market and therefore not reflected in the bank's lending portfolio.

In addition, BOU offers a range of consumer products that include home equity loans and lines of credit, residential construction loans, and automobile loans. The bank also offers basic and limited corporate trust services. The bank's alternative delivery services include ATMs, mobile and internet banking, remote deposit capture, and courier services.

Exhibit 1 below represents the loan portfolio as of September 30, 2020 and reflects the bank's commercial and residential lending focus.

| Exhibit 1 LOANS AND LEASES AS OF SEPTEMBER 30, 2020 | | | | | | |
|--------------------------------------------------------------|------------|-------|--|--|--|--|
| Loan Type | \$ ('000s) | % | | | | |
| Commercial/Industrial & Non-Farm Non-Residential Real Estate | 828,046 | 59.2 | | | | |
| Construction & Land Development | 265,445 | 19.0 | | | | |
| All Other | 185,260 | 13.3 | | | | |
| Secured by 1-4 Family Residential Real Estate | 78,341 | 5.6 | | | | |
| Multi-Family Residential Real Estate | 25,199 | 1.8 | | | | |
| Farm Land & Agriculture | 10,625 | 0.8 | | | | |
| Consumer Loans & Credit Cards | 4,864 | 0.3 | | | | |
| Total (Gross) | 1,397,780 | 100.0 | | | | |

BOU's assessment areas have changed slightly since the prior evaluation due to its acquisition of a branch in Wasatch County in 2018. BOU has delineated five CRA assessment areas (AAs) which consist of whole counties. During the previous review, there were four AAs which consisted of whole counties and partial Metropolitan Statistical Areas (MSAs).

BOU's current assessment areas consist of the following:

- Ogden-Clearfield AA (Box Elder, Davis, and Weber Counties in their entirety)
- Salt Lake AA (Salt Lake County in its entirety)
- Logan AA (Cache County in its entirety)
- Provo-Orem AA (Utah County in its entirety)
- Wasatch AA (Wasatch County in its entirety)

There were no legal or financial impediments that inhibited BOU's ability to meet the credit needs of its communities, which is consistent with its business strategy, size, financial capability, and local economic conditions in each of the respective assessment areas. BOU received a rating of Satisfactory at its previous CRA examination conducted as of August 21, 2017.

Scope of Examination

BOU's performance was evaluated in accordance with the *Interagency Large Institution CRA Examination Procedures*. As such, performance was assessed under the lending, investment, and service tests. Consistent with the procedures, greater weight was placed on the bank's lending test performance relative to the investment and service tests. The evaluation period for the lending test was from January 1, 2017 through June 30, 2020. The evaluation period for community development loans, qualified investments, and community development services was from August 22, 2017 through January 19, 2021.

The review considered the bank's lending for purposes of home purchase, refinance, improvement, multifamily, and other closed-end lending reported under the Home Mortgage Disclosure Act (HMDA), as well as its small business, small farm, and community development lending. Given product volumes, home purchase loans were generally weighted more heavily than other loan types, followed by small business loans and home refinance loans. The limited volumes of home improvement, multifamily, other closed-end HMDA loans, and small farm loans during the review period were not sufficient for meaningful analysis; consequently, loans under these product types were considered but did not contribute to the overall lending test rating. These loans are presented in Appendix C – CRA Core Tables, along with all other lending data.

The Ogden-Clearfield and Salt Lake AAs were reviewed using full-scope examination procedures. The Ogden-Clearfield AA received the greatest weight given its concentration of lending activity and branch footprint. The remaining assessment areas received limited-scope reviews based on BOU's relatively limited presence in those markets and a lower level of lending activity.

CONCLUSIONS WITH RESPECT TO PERFORMANCE TESTS

Lending Test

BOU's overall performance under the lending test is outstanding. A majority of loans by number and dollar volume were made within the bank's assessment areas. In addition, the bank's lending levels reflected good geographic distribution throughout its assessment areas and adequate borrower distribution overall. The bank was also a leader in making community development loans that were responsive to the needs of its assessment areas and the bank's performance was further enhanced by innovative and flexible lending activities.

LENDING ACTIVITY

The bank's lending levels reflects excellent responsiveness to the credit needs of its assessment areas. The global pandemic caused by the coronavirus in 2020 resulted in economic hardships for many small businesses and individuals in the bank's assessment areas. In response to these hardships, BOU made extensive use of the SBA's Paycheck Protection Program (PPP) loan program that was designed to provide an incentive for small businesses to keep their employees on payroll.

Overall loan volumes are displayed in Exhibits 2 and 3 below. For purposes of this evaluation, the bank's 2017 HMDA data was segregated from its 2018 and 2019 HMDA data based on significant changes in reporting requirements for home mortgage lending that became effective on January 1, 2018.

ASSESSMENT AREA CONCENTRATION

A majority of loans by number and dollar volume were made within the bank's assessment areas. Exhibits 4 and 5 below show the number and dollar volume of loans extended within the designated assessment areas during the review period.

| EXHIBIT 4 LENDING INSIDE AND OUTSIDE THE ASSESSMENT AREAS JANUARY 1, 2017 TO DECEMBER 31, 2017 | | | | | | | | |

Note: Affiliate loans not included.

GEOGRAPHIC AND BORROWER DISTRIBUTION

The geographic distribution of BOU's loans across census tracts of different income levels is good. No conspicuous gaps were noted in the geographic distribution of the loans. The strongest performance was identified in the bank's small business lending, which reflected excellent penetration throughout the assessment areas. The performance in home purchase and home refinance lending varied to some extent across assessment areas, but generally reflected good performance. Performance in the limited-scope assessment areas was generally consistent with performance in the full-scope assessment areas.

The distribution of the bank's loans among borrowers of different income levels and businesses of different sizes is adequate. Home mortgage lending to low- and moderate-income borrowers generally compared reasonably to aggregate lending in the assessment areas, although performance was relatively weaker in the Ogden-Clearfield AA. The percentage of loans made to businesses with gross annual revenues less than or equal to \$1 million also compared reasonably to aggregate lending levels in each assessment area. The bank also extended a majority of its loans in amounts less than or equal to \$250,000 in each full-scope assessment area, thereby responding to the need for smaller dollar loans. Performance in the limited-scope assessment areas was generally consistent with performance in the full-scope assessment areas.

COMMUNITY DEVELOPMENT LENDING

BOU is a leader in making community development loans, demonstrating excellent responsiveness to the local needs within its assessment areas, particularly within its major markets. The bank extended 72 community development loans totaling \$269 million throughout its assessment areas. The bank's performance by dollar amount compares favorably to other peer institutions that are leaders in making community development loans. In response to the COVID-19 pandemic, the bank provided businesses access to capital through the PPP loan program implemented as part of the Coronavirus Aid, Relief, and

Economic Security (CARES) Act. A large percentage of community development loans supported economic development by financing small businesses, which helped to retain or maintain jobs within the bank's assessment areas. Loans also helped finance the development or rehabilitation of affordable housing, which was identified as a critical need within the assessment areas. In addition to economic development and affordable housing, the bank also extended municipal loans that financed water treatment facilities in rural areas.

Investment Test

BOU's overall performance under the investment test is high satisfactory, based on a significant level of qualified community development investments and grants, although rarely in a leadership position, excellent responsiveness to credit and community development needs, and occasional use of innovative and/or complex investments to support community development initiatives. Overall, the bank made \$7.42 million in community development investments and grants directly within its assessment areas. There were no innovative or flexible investment activities that augmented the bank's performance.

BOU's emphasis on affordable housing investments, including low-income housing tax credits and targeted mortgage-backed securities, demonstrates excellent responsiveness to a primary need identified by community contacts. BOU's qualified donations were primarily targeted to organizations that provide community services to low- and moderate-income individuals. A summary of the key types of investments made by BOU include:

- Low-Income Housing Tax Credits (LIHTCs) BOU made two LIHTC investments, totaling \$2.5 million, during the evaluation period. These investments helped provide 364 units of affordable housing for low- and moderate-income individuals within the bank's assessment areas.
- Mortgage-Backed Securities (MBS) BOU invested \$4.4 million in MBS secured by loans made to low- and moderate-income individuals during the current period.
- Throughout the evaluation period, the bank donated over \$13,000 to an organization that
 provides financial literacy training to students using experience-based learning techniques. The
 bank sponsored the cost of providing this financial literacy program to seven schools within its
 assessment areas where the majority of students were eligible for free or reduced lunch
 programs.

Service Test

BOU's performance under the service test is high satisfactory. Its retail banking services are accessible to the bank's assessment areas, including geographies and individuals of different income levels. Its record of opening and closing of branches has not adversely affected the accessibility of its delivery systems to low- and moderate-income individuals or geographies. Branch hours and services do not vary in a way that inconveniences portions of the bank's assessment areas. The service test rating was further supported by a strong level of community development services that included technical assistance to organizations that promote financial literacy in low- and moderate-income communities and service on loan review committees for organizations that assist small businesses, which supported

economic development. In addition, the bank provided accommodations to customers impacted by the pandemic, including overdraft fee waivers.

RETAIL BANKING SERVICES

Retail banking services are accessible to all portions of the bank's assessment areas, including low- and moderate-income areas. In those markets where the bank has no branches in low- or moderate-income census tracts, other branches were in close proximity to these areas. The bank's full range of products and services do not vary among branch locations.

Overall, the bank's record of opening and closing branches has not adversely affected the accessibility of its delivery systems to individuals of different income levels across its assessment areas. The bank closed one branch, which was relocated from a low-income census tract in the Salt Lake Assessment Area; however, the relocated branch remains within walking distance of its previous location. Further, the bank's remaining branches in the Salt Lake AA remain in close proximity to moderate-income census tracts. BOU opened six branches since the previous evaluation, five in middle-income census tracts and one in an upper-income census tract. The bank currently operates five full-service branches in low-or moderate-income census tracts, including four of its eight total branches in the Ogden-Clearfield assessment area.

COMMUNITY DEVELOPMENT SERVICES

BOU is a leader in providing community development services. Bank employees provided 1,905 service hours to 43 organizations within the assessment areas during the review period. The services provided by the bank helped address identified community needs regarding affordable housing, community services to low- and moderate-income individuals, and assistance with small business financing. Activities specific to individual assessment areas are discussed in their respective sections of this evaluation.

Fair Lending or Other Illegal Practices Review

Concurrent with this CRA evaluation, the Federal Reserve conducted a review of the bank's compliance with consumer protection laws and regulations and found no violations of the substantive provisions of anti-discrimination, fair lending, or other illegal credit practice rules, laws, or regulations that were inconsistent with helping to meet community credit needs.

FULL-SCOPE ASSESSMENT AREA CONCLUSIONS

For each assessment area where a full-scope review was performed using the examination procedures.

Salt Lake Assessment Area

DESCRIPTION OF OPERATIONS IN SALT LAKE

The Salt Lake assessment area consists of Salt Lake County, which composes the Salt Lake City, Utah MSA. Located in north-central Utah, the area is bordered by Davis and Morgan counties to the north, Summit and Wasatch counties to the east, Utah County to the south, and Tooele County to the west. Salt Lake County is the most populated county in Utah, with 1.2 million people as of 2019.¹

As of June 30, 2020, BOUoperated three offices in the Salt Lake assessment area and held deposits totaling over \$259 million.² By comparison, there were a total of 41 Federal Deposit Insurance Corporation (FDIC)-insured financial institutions operating 209 offices in the assessment area, with deposits totaling over \$685 billion.³ BOU ranked 28th in the market, with 0.04 percent of the deposit market share.⁴

Exhibit 6 on the following page presents key demographic and business information used to help develop a performance context for the assessment area.

Economic Conditions

During the review period, the economy in Salt Lake County was at peak expansion with a labor market in top shape.⁶ In the first half of 2019, job growth accelerated to two times the national pace.⁷ Likewise, the jobless rate was at a significant low of 2.5 percent by October 2019.⁸ As the labor market moved towards full employment, employers were challenged in finding qualified workers, which in turn,

⁸ Moody's Precis Report, Salt Lake City UT, November 2019.

powered wage gains.⁹ However, economic activity declined across the country at the onset of the COVID-19 pandemic in the first quarter of 2020. Nationwide, nonfarm payrolls decreased by 14 percent between February and April 2020.¹⁰ The pandemic had a relatively softer impact on the area economy with nine percent, or 70,000, nonfarm payrolls shed during the same period.¹¹ Unemployment in Salt Lake County peaked during the pandemic to over 11 percent in April but decreased to six percent in June, landing among the lowest rates in the western United States.¹²

Salt Lake County's economy is primarily driven by the technology and financial services industries. As the seat of the state capital, government is also a key economic driver in the area. Utah was one of the top states in the nation for financial services employment with an employee base of over 84,000 people. In the state overall, the financial services industry experienced employment growth of over 18 percent over the past five years. Some of the largest employers in the financial services sector were Discover Products, Zions Bancorporation, Wells Fargo Bank, and Goldman Sachs and Co., which as of 2018 had seven percent of its global workforce in the area. In addition to financial services, over half of all technology companies in the state were located in Salt Lake County providing over 40,000 jobs as of 2018. The area was a hot spot for expansions by large companies at the intersection of financial services and technology. Overall, the area's high concentration of high-wage jobs in tech and knowledge-based industries, its business-friendly climate, and solid demographics remained as economic strengths in the area.

As depicted in Exhibit 7 on the following page, small business lending in recent years peaked in 2016 prior to a soft flattening during the review period. In 2019, there were 27,026 loans totaling \$922 million made to small businesses in the assessment area. Lending to small businesses played a critical role in the economy given that small businesses accounted for 89.9 percent of all businesses in the assessment area, as noted in Exhibit 6. In response to the COVID-19 pandemic, the PPP was launched to aid small businesses during the pandemic-associated shelter-in-place orders and resulted in increased lending to small businesses and farms in the first half of 2020.²⁰ Nationwide, small business and farm lending by small banks grew on average by 23 percentage points, while lending by medium

and large banks increased by 38 and 35 percentage points, respectively.²¹ The growth in lending suggests small businesses and farms turned to banks for funding and support to respond to the pandemic's negative effect on consumer and business activity in the first half of 2020.²² In Salt Lake County, over 20,000 PPP loans in the amount of less than \$1 million were made and approximately 185,000 jobs were self-reported to benefit from the loans made between April 3, 2020 and August 8, 2020.²³ According to the borrower firms that elected to report their industry, most loans under \$1 million were made to businesses in the Professional, Scientific, and Technical Services industry, followed by the Construction and, the Other Services except Public Administration industries.²⁴

Exhibit 7

During the review period, the unemployment rate decreased in the area at a similar rate as the drop in the state unemployment rate, as depicted in Exhibit 8 on the following page. The unemployment rate reached the low of 2.5 percent for Salt Lake County in 2019.

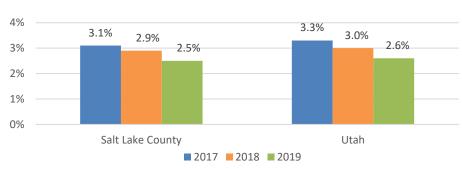

Federal Reserve Bank of San Francisco, Economic Letter, Small Business Lending during COVID-19, November 23, 2020; available from: https://www.frbsf.org/economic-research/publications/economic-letter/2020/november/small-business-lending-during-covid-19/.

²⁴ Ibid.

²⁵ Aggregate CRA Small Business data reports; available from: https://www.ffiec.gov/craadweb/aggregate.aspx.

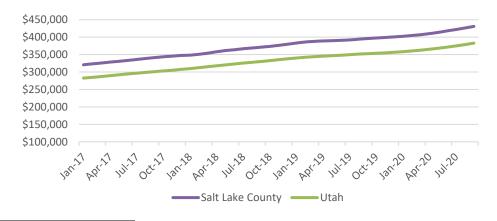

Lower unemployment rates in the state relative to the nation indicated potential for Utah's ability to weather continued economic implications of the pandemic. Starting in March 2020, the unemployment rate increased in the area to 4.0 percent and peaked in April 2020, reaching 11.2 percent.²⁷ Although the unemployment rate for the remaining months of 2020 fluctuated, the state's 4.5 percent unemployment rate in July 2020 was the country's lowest and well below the national average of 10.2 percent.²⁸

Median home prices increased during the review period, as depicted in Exhibit 9 below. By the end of the third quarter of 2020, the median home price in Salt Lake County was \$431,003, representing a nine percent year-over-year increase. Overall, area median home prices steadily increased at a similar rate as the median home price in the state of Utah.

Exhibit 9 Median Home Prices²⁹ January 2017- September 2020

²⁸ The Salt Lake Tribune, Utah's unemployment rate in July was the lowest in the country, August 21, 2020; available from: https://www.sltrib.com/news/2020/08/21/utahs-unemployment-rate/.

²⁹ Zillow Research, Zillow Home Value Index, Single-Family Homes Time Series; available from: https://www.zillow.com/research/data/.

The steady rise in home prices during the review period and through the end of the third quarter of 2020 discussed above, suggest that demand for the purchase of homes remained elevated amid the economic volatility of the pandemic. However, some indicators suggested pockets of higher levels of loss in employment income that coincided with housing affordability and stability concerns. The U.S. Census Bureau's Household Pulse Survey reported that during the COVID-19 pandemic recovery in December 2020, 18 percent of respondents or a household member expected a loss in employment income.³⁰ Furthermore, more than 27 percent of respondents reported difficulty in paying for usual household expenses.³¹ The most significant indicator of underlying pockets of housing instability in Utah was in the 32 percent of respondents who reported a likelihood of eviction or foreclosure within the subsequent two months.³²

Similar to the rise in home prices, rent prices also increased during the review period. Despite building permits issued for new apartment construction in recent years, demand for rental units within proximity to employment centers persisted.³³ Average rental rates increased from 2010 to 2018 by 49 percent in Salt Lake County, and outpaced increases in renter household income.³⁴ As of 2018, median rent for a 1-bedroom unit was \$863 in Salt Lake County.³⁵

The trends in the poverty rate and share of households receiving public cash assistance or food stamp/SNAP benefits is shown in Exhibit 10 on the following page. In the assessment area and in the state overall, the rate of poverty decreased by less than one percent from 2017 to 2018. The rate of households receiving public cash assistance or food stamp/SNAP benefits also decreased by less than one percent during the review period in the area and in the state overall. Overall, Salt Lake County had rates of poverty and usage of public assistance of food stamp/SNAP benefits that fell slightly below but on par with the state's rates.

Credit and Community Development Needs

The economic data described above and feedback from community contacts indicate that there remains credit and community development needs in the area. As shown in Exhibit 3 and previously discussed, small business lending levels remained steady during the review period before increasing in 2020 as PPP loans were distributed to meet the credit needs of small businesses enduring the impacts of COVID-19. According to the U.S. Census Bureau's Weekly Small Business Pulse Survey, as of October 12, 2020, 65 percent of small businesses in Utah received PPP loans.³⁷ At that time, only 16 percent of small businesses reported that obtaining financial assistance would be needed in the next six months, compared to the national average of 23 percent of businesses.³⁸ Although, 35 percent of small businesses in Utah reported it would take more than six months before the business returned to normal levels of operation relative to one year ago.³⁹ Based on the survey results, small businesses in Utah appeared to have a more positive outlook than the national average on recovering from the economic pressures of the pandemic, despite the lengthy time some businesses have identified to reach the point of recovery.

Prior to the COVID-19 pandemic, the most recent Small Business Credit Survey conducted in 2019, found that of the 43 percent of small businesses that applied for credit in the prior 12 month period, 51 percent received all the financing they sought. Small business applicants most often sought loans or lines of credit. Most firms applied for less than \$100,000, primarily to expand their business or cover operating expenses. Large and small banks received the most credit applications from small

⁴² Ibid.

firms, however, medium to high-credit-risk applicants were more inclined to apply to online lenders.⁴³ Firms who had financing shortfalls typically had too high a level of existing debt, low credit score, or insufficient collateral.⁴⁴ According to one community contact, there remains a need for more small business, such as Small Business Administration (SBA) loans, in rural areas across the state.

A community contact noted that the Small Business Development Centers in the state are moving more training programs online and are in need of assistance from banks for technical assistance and investments to support the virtual training programs for entrepreneurs and small business owners. In addition, a contact noted the need for more donations or funding from financial institutions for microloan lending.

Affordable housing is a significant credit need in the area, according to community contacts. It was noted that one particular product that would be beneficial in the area is increased downpayment assistance grants to help lower the mortgage loan risk to a bank. Community contacts also noted there is general interest to create more opportunities to finance construction of Accessory Dwelling Units (ADU) to further support the creation of more affordable housing opportunities.

Overall, there remain credit and community development needs in the area that could be met by participation from financial institutions in the form of small business loans, investments and donations into community organizations, supporting the financing of affordable housing, and community services such as financial education and technical assistance.

CONCLUSIONS WITH RESPECT TO PERFORMANCE TESTS IN SALT LAKE

Lending Test

BOU's lending test performance in Salt Lake is excellent. The bank's lending levels reflect excellent responsiveness to the credit needs of the assessment area and the bank made a relatively high level of impactful community development loans. The bank's extensive use of flexible and innovative loan programs enhanced overall lending performance.

Lending Activity

Lending levels reflect excellent responsiveness to the credit needs within the assessment area. In addition to providing home mortgage loans and traditional small business loans, the bank made extensive use of flexible lending practices to meet the credit needs within the assessment area through the PPP.

⁻

 ⁴³ Small Business Credit Survey, Report on Employer Firms 2020; available from:
 https://www.fedsmallbusiness.org/medialibrary/FedSmallBusiness/files/2020/2020-sbcs-employer-firms-report.
 ⁴⁴ Ibid.

Lending Distribution by Geography

BOU's lending distribution by geography in the Salt Lake AA is good. Performance was particularly strong in the bank's small business lending where the bank's lending percentages often significantly exceeded the performance of other lenders. This performance was complemented by good penetration of home purchase loans, which were more heavily weighted, although the distribution of home refinance loans was relatively weaker in comparison.

Small Business Lending

The geographic distribution of small business loans is excellent. As reflected in Table 2 of Appendix C, the bank's small business lending compared very favorably relative to the performance of aggregate lenders operating in the assessment area, particularly in moderate-income areas. Loans were extended throughout the assessment area with no gaps in lending patterns.

Home Purchase Loans

The geographic distribution of home purchase loans reflects good penetration throughout the assessment area. The majority of the bank's mortgage lending in Salt Lake consisted of home purchase loans. As reflected in Table 4 of Appendix C, the bank's penetration of low- and moderate-income census tracts generally exceeded the aggregate lending level and compared favorably with the level of owner-occupied housing.

Home Refinance Loans

The geographic distribution of home refinance lending is adequate. As reflected in Table 5 of Appendix C, BOU's performance in low-income tracts was generally strong relative to the percentage of owner-occupied units and the aggregate lending performance. However, performance in moderate-income census tracts reflected weaker penetration.

Lending Distribution by Borrower Income and Business Revenue

Overall, lending distribution by business revenue and borrower income within the Salt Lake assessment area was good. All product lines reflected this level of performance during the review period.

Small Business Lending

The distribution of loans to small businesses of different sizes was good. As reflected in Table 9 of Appendix C, the percentage of loans extended to businesses with revenues equal to or less than \$1 million was reasonably comparable to aggregate lending performance. BOU responded to the need for smaller dollar loans by extending a majority of its loans in amounts less than \$100,000, primarily due to substantial participation in PPP lending.

Home Purchase Loans

Home purchase lending to borrowers of different income levels is good. As reflected in Table 11 of Appendix C, home purchase activity among borrowers of different income levels is generally in line with aggregate lending levels. The bank's performance was particularly strong among low- and moderate-income borrowers in 2017.

Home Refinance Loans

BOU's borrower distribution in home refinance lending is good. As reflected in Table 12 of Appendix C, the bank's performance in lending to low-income borrowers generally compared favorably to aggregate lending levels. Lending to moderate-income borrowers was generally consistent with aggregate lending performance.

Community Development Lending

BOU is a leader in making community development loans, as lending by dollar volume exceeds that of similarly situated banks. The bank made 25 community development loans totaling \$93.5 million in the Salt Lake assessment area during the review period. The majority of the bank's lending helped support economic development by financing small businesses, which helped create or retain jobs within the assessment area. The bank also had several PPP loans that exceeded \$1 million which helped small businesses with payroll expenses during the COVID-19 pandemic. In addition, BOU financed high dollar municipal projects, demonstrating a complex and innovative approach to helping meet the needs of its assessment areas.

Notable community development loans include:

- A \$9 million loan to help improve a sewer line and increase water delivery systems for residents of Salt Lake County, including low- and moderate-income individuals.
- An \$8.5 million loan to help construct a new facility providing mosquito treatment services and testing for diseases.
- A \$4.0 million SBA 504 loan to purchase and renovate an existing hotel, through which 18 jobs were retained.
- A \$1.2 million PPP loan in order to assist a small business with payroll expenses during the COVID-19 pandemic. The business provides employment services for moderate-income individuals in the Salt Lake assessment area.

Investment Test

BOU's performance under the investment test in the Salt Lake assessment area is good, as evidenced by an adequate level of qualified investments, occasional use of innovative investments, and excellent responsiveness to community development needs. The majority of investments reflected a strong focus on the area's need for affordable housing largely concentrated on MBS and LIHTCs, which is consistent across the bank's assessment areas. Overall, the bank made \$2.8 million in qualified community development investments and \$42,870 in grants in the assessment area.

Investments were responsive to the need for affordable housing targeted to low- and moderate-income families and individuals. The following are examples of noteworthy investments:

- A \$751,839 investment in an LITHC rental property that provides 264 affordable two- and three-bedroom units in West Jordan, Utah. A significant majority of the units are restricted for residents earning below 60 percent of area median income, while the remaining units are restricted to those earning 50 percent of the area median income.
- A \$254,714 investment into a fund, specifically earmarked for Salt Lake County. The investment fund helped finance an affordable, 152-unit rental property in Draper, Utah. A majority of the property's units are restricted for those earning below 60 percent of area median income, and an additional 10 units are reserved for individuals earning less than 35 percent of area median income.
- Grants totaling \$10,000 to sponsor four annual fundraisers supporting economic growth for small businesses in Utah.

Service Test

BOU's performance under the service test in Salt Lake is good. Retail banking services are accessible throughout the assessment area. Branch hours and services do not vary in a way that inconvenience geographies or individuals of different income levels. In addition, the bank provided a relatively high level of community development services.

Retail Banking Services

The bank's delivery systems are reasonably accessible to the bank's geographies and individuals of different income levels. BOU operates three of its 17 branch offices in the Salt Lake assessment area, one of which is in a moderate-income geography. Business hours do not vary in a way that would inconvenience low- and moderate-income populations. Alternative delivery systems and accessibility options complement the bank's branch network, including ATMs, mobile banking, and remote deposit capture.

The bank's record of opening and closing of branches has generally not adversely affected the accessibility of its delivery systems to low- and moderate-income geographies. The bank closed one branch in a low-income census tract since the prior evaluation; however, a new branch was opened in close proximity to this tract. Each of the bank's three branches in this assessment area are in close proximity to low- and moderate-income census tracts.

Community Development Services

BOU provides a relatively high level of impactful community development services in the Salt Lake assessment area. In total, employees contributed 528 community development service hours within the assessment area.

The majority of service hours benefitted low- and moderate-income individuals through personal financial education to students from low- and moderate-income families, as well as non-profit organizations that provide community services to low- and moderate-income individuals. In addition,

technical assistance was provided to organizations supporting economic development by providing financing to small businesses.

The following are notable community development services:

- Employees provided 79 hours of technical expertise to an organization that helps small businesses apply for SBA 504 Loan Program loans in Salt Lake County.
- Employees provided 82 hours of technical assistance for an organization that assists the homeless population in Salt Lake City and provides financial aid, housing needs, and healthcare services.
- Employees spent 14 hours serving as board members of a nonprofit organization that provides services for at-risk youth in Salt Lake City, providing budget assistance and financial expertise.

Ogden-Clearfield Assessment Area

DESCRIPTION OF OPERATIONS IN OGDEN-CLEARFIELD

The Ogden-Clearfield assessment area consists of Box Elder, Davis, and Weber counties, and is part of the Ogden-Clearfield MSA. The area located in northern Utah, includes the northwestern border of Utah that abuts the states of Idaho to the north and Nevada to the west. The area is bordered to the south by Tooele and Salt Lake counties, and to the east by Cache, Rich, and Morgan counties. As of 2019, the combined population of the assessment area was 671,740 people.⁴⁵

As of June 30, 2020, BOU operated eight offices in Ogden-Clearfield and held a total of \$877 million in deposits. By comparison, there were a total of 15 FDIC-insured financial institutions operating 86 offices in the assessment area, with deposits totaling over \$6.9 billion. BOU ranks third in the market, with 12.71 percent of the deposit market share. BOU ranks third in the

Exhibit 11 on the following page presents key demographic and business information used to help develop a performance context for the assessment area.

Economic Conditions

During the review period, the assessment area economy expanded, prior to a slight slowdown at the end of 2019 and the contracting impacts of the COVID-19 pandemic in 2020.⁵⁰ The defense, government, and manufacturing industries were the economic drivers in the area.⁵¹ Similar to the Salt Lake economy described above, year-over-year job growth between 2018 and 2019 exceeded national averages, primarily in private services and government.⁵² Hill Air Force Base was one of the top employers in the area with 17,400 jobs, and as of 2018, accounted for over 51 percent of all of Utah's federal defense jobs.⁵³ The base is among the Air Force's most strategically important bases and received an additional \$100 million in funding from the 2020 Department of Defense budget.⁵⁴ Davis County was the third highest county in the state for job growth in 2019, with 5,000 jobs gained.⁵⁵

In Weber County, the government represented 19 percent of the employment share as of June 2020, with the presence of an Internal Revenue Service office. Public education was the other leading employer, with the presence of Weber County School District and Weber State University. With the onset of the pandemic, Weber County fared relatively better in year-over-year job losses as of June 2020 with a lower percentage, 2.7 percent, than both the state of Utah and the nation at 3.3 percent and 8.7 percent, respectively. Service of the employment share as of June 2020, with the presence of an Internal Revenue Service office. The employment share as of June 2020, with the presence of an Internal Revenue Service office. The employment share as of June 2020, with the presence of an Internal Revenue Service office. The employment share as of June 2020, with the presence of Weber County School District and Weber State University. The onset of the pandemic, we have a supplied to the presence of Weber County fared relatively better in year-over-year job losses as of June 2020 with a lower percentage, 2.7 percent, than both the state of Utah and the nation at 3.3 percent and 8.7 percent, respectively.

The top employment industries in Box Elder County were Manufacturing, the Trade, Transportation and Utilities industry, and Government.⁵⁹ Box Elder County's job growth was 2.8 percent in 2019 with the majority of the job growth in construction and manufacturing, which together added over 500 new jobs.⁶⁰ By one measure of the pandemic's economic impact, the county had a 3.2 percent year-over-year decrease in nonfarm jobs as of June 2020.⁶¹ Overall, the area economy showed signs of a recovery from the adverse impacts of the pandemic through 2020.

As depicted in Exhibit 12 on the following page, small business lending remained steady during the review period, peaking in 2017 before leveling through 2019. There were 10,899 loans totaling \$352 million made to small businesses in the assessment area in 2019. Lending to small businesses played a critical role in the economy given that small businesses accounted for 91.9 percent of all businesses in the assessment area, as noted previously in Exhibit 11. As described above in the

discussion on loans to small businesses in the Salt Lake assessment area, lending to small businesses nationwide increased in the first half of 2020 as a result of the federal PPP.⁶² Small banks increased lending to small businesses and farms lending by 23 percentage points on average, while lending by medium and large banks increased on average by more than 38 and 35 percentage points, respectively.⁶³ The growth in lending suggests small businesses and farms turned to banks for funding and support to respond to the pandemic's negative effect on consumer and business activity in the first half of 2020.⁶⁴ In the assessment area, over 8,000 PPP loans in the amount of less than \$1 million were made and approximately 80,000 jobs were self-reported to benefit from the loans made between April 3, 2020 and August 8, 2020.⁶⁵ According to the borrower firms that elected to report their business's industry, most loans under \$1 million were made to businesses in the Construction industry, followed by the Professional, Scientific, and Technical Services industry, and the Health Care and Social Assistance industry.⁶⁶

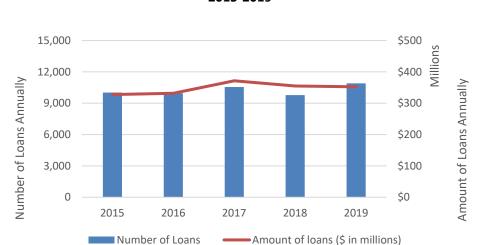

Exhibit 12
Loans to Small Businesses in Assessment Area⁶⁷
2015-2019

During the review period, the unemployment rate decreased in the area at a similar rate as the drop in the state unemployment rate, as depicted in Exhibit 13 on the following page. In 2019, the unemployment rates reached the low of 2.6, 2.4 and 3.0 percent for Box Elder County, Davis County, and Weber County, respectively.

⁶² Federal Reserve Bank of San Francisco, Economic Letter, Small Business Lending during COVID-19, November 23, 2020; available from: https://www.frbsf.org/economic-research/publications/economic-letter/2020/november/small-business-lending-during-covid-19/.

 66 Ibid.

⁶⁷ Aggregate CRA Small Business data reports available from: https://www.ffiec.gov/craadweb/aggregate.aspx.

Similar to the Salt Lake assessment area, unemployment rates increased at the onset of the pandemic in March 2020, to 4.0 percent in Box Elder County, 4.5 percent in Weber County, and 3.7 percent in Davis County. ⁶⁹ Unemployment rates in the area peaked in April 2020, reaching 10.4 percent in Box Elder County, 10.7 percent in Weber County, and 9.0 percent in Davis County. ⁷⁰ As discussed previously for the Salt Lake assessment area, unemployment rates fluctuated in the area for the remaining months of 2020; however, remained below the national average. ⁷¹

Median home prices increased during the review period, as depicted in Exhibit 14 on the following page. By the end of the third quarter of 2020, the median home price in Box Elder County was \$284,461, representing a 12 percent year-over-year increase. In Weber County, the median home price in September 2020 was \$322,200, up 11 percent from the same time the previous year. The median home price in Davis County was \$391,909, representing a ten percent year-over-year increase. Overall, area median home prices steadily increased at a similar rate as the median home price in the state of Utah.

⁷¹ The Salt Lake Tribune, Utah's unemployment rate in July was the lowest in the country, August 21, 2020; available from: https://www.sltrib.com/news/2020/08/21/utahs-unemployment-rate/.

In part of the assessment area, average rental rates increased from 2010 to 2018 by 44 percent in Davis County and 41 percent in Weber County.⁷³ During this period, rent increases outpaced increases in renter household income.⁷⁴ For example, in Weber County, the rate of increase in apartment rent was nearly four times the rate of increase in renter income. 75 As of 2018, median rent for a 1-bedroom unit was \$464 in Box Elder County, \$843 in Davis County, and \$611 in Weber County. 76

The trends in poverty rates and households receiving public cash assistance or food stamp/SNAP benefits is shown in Exhibit 15. Across the assessment area and in the state overall, rates of poverty decreased by less than one percent. While Box Elder and Weber counties had rates of poverty in close proximity to the state, Davis County had nearly half the level of poverty. The rate of households receiving public cash assistance or food stamp/SNAP benefits also decreased during the review period across the three counties in the area and in the state overall. Similar to the lower concentration of poverty in Davis County, less households received public cash assistance or food stamp/SNAP benefits in Davis County compared to Box Elder and Weber counties. Weber County had the highest rate of households receiving public cash assistance or food stamp/SNAP benefits of 9.6 percent in 2018. While rates of poverty and usage of public assistance or food stamp/SNAP benefits decreased during the review period, the varying rates across the assessment area indicate inequitable economic growth for some parts of the assessment area.

2017-2018

Credit and Community Development Needs

Similar to the discussion for the credit needs of the Salt Lake assessment area, small business lending levels remained steady during the review period before PPP loans were distributed in 2020 to meet the immediate credit needs of small businesses enduring the impacts of COVID-19. In addition to the small business lending needs discussed previously, one community contact noted that small businesses are most in need of SBA 504 loans or seed funding for a start-up business. The community contact confirmed that a few entrepreneurs seeking financing for a business are unable to receive the financing they need. In addition, the community contact noted that many low-income small business owners are in need of financing to purchase a vehicle for their business to adapt to the COVID-related restrictions to business operations. Those business owners are in need of either an auto loan of other credit product to support the business expense of a vehicle in order to make deliveries, or otherwise enable their business to be mobile during the COVID-19 pandemic.

In addition to small business lending, one community contact noted that the region made up of Weber and Davis counties is undercapitalized and needs more micro-lending, particularly for businesses in the start-up phase. In the Weber County area, a new micro-angel-investment fund created by Weber State University in partnership with various government agencies, is seeking investments from banks to help address this credit need.

As described above in the Salt Lake assessment area discussion, affordable housing remains a critical need in Utah. The pandemic has increased the need to support homeowners and renters impacted by the pandemic with the cost of housing. A community contacted the high demand for mortgage and rental assistance. There is also an opportunity for financial institutions to offer or partner with community organizations to offer foreclosure counseling to homeowners at risk of defaulting on their mortgage as a result of the negative economic conditions created by the pandemic.

_

⁷⁷ Poverty and Food Stamp Usage Rates, U.S. Census Bureau, American Community Survey, 5-Year Estimates; available from: https://www.census.gov/programs-surveys/acs/data.html.

Overall, there is a need for more investment and engagement from financial institutions to address the gaps in small business lending, as well as the prevalence of high poverty rates in the area. Some of the most impactful activities banks could participate in to serve the community's needs are micro- and small business lending, flexible or innovative consumer lending, and investment or financing of affordable housing.

CONCLUSIONS WITH RESPECT TO PERFORMANCE TESTS IN OGDEN-CLEARFIELD

Lending Test

BOU's lending test performance in the Ogden-Clearfield assessment area is good, based on excellent responsiveness to community credit needs, good dispersion of loans throughout the assessment area, adequate penetration among customers of different income levels and businesses of different revenue sizes, leadership in making community development loans, and the extensive use of innovative and/or flexible lending practices in serving the area's credit needs.

Lending Activity

Lending levels reflects excellent responsiveness to the credit needs within the assessment area. BOU originated the largest number and dollar volume of loans in this assessment area for all product types. BOU makes use of innovative and/or flexible lending practices to meet the credit needs of its assessment areas through the PPP, including a high volume of loans to non-customers.

Lending Distribution by Geography

Overall lending distributions by geography are good, driven by excellent dispersion of small business lending. Home refinance loans generally reflected good geographic distribution, whereas the bank's home purchase lending within the assessment area demonstrated relatively weaker performance.

Small Business Lending

The geographic distribution of small business loans is excellent. As reflected in Table 2 of Appendix C, the percentage of loans extended to businesses with revenues equal to or less than \$1 million significantly exceeded the performance of aggregate lenders in low- and moderate-income tracts from 2017-2019. Aggregate lending data was unavailable in 2020; however, the bank's lending levels exceeded the percentage of small businesses in low- and moderate-income census tracts.

Home Purchase Loans

BOU's geographic distribution of home purchase loans is adequate. As reflected in Table 4 of Appendix C, the bank's lending in low- and moderate-income census tracts was generally below the aggregate lending performance. The aggregate performance suggests that there is more opportunity to lend in moderate-income census tracts. However, the bank's lending more closely mirrored the percentage of owner-occupied units in low- and moderate-income census tracts during the review period. No conspicuous lending gaps were identified.

Home Refinance Loans

The geographic distribution of BOU's home refinance loans reflects good penetration throughout the assessment area. The bank's performance in moderate-income census tracts generally exceeded aggregate lending levels. Although the bank did not provide home refinance loans in low-income census tracts, Table 5 of Appendix C reflects the limited opportunity in these areas.

Lending Distribution by Borrower Income and Business Revenue

Overall, the borrower distribution reflects adequate penetration among customers of different income levels and businesses of different sizes. This performance is supported by excellent distribution among small business loan borrowers, yet somewhat lower levels of performance in the bank's home mortgage lending.

Small Business Lending

The distribution of borrowers reflects good penetration among businesses of different sizes. As reflected in Table 9 of Appendix C, BOU's lending levels were generally on par with aggregate lending performance during the review period. Overall, loans under \$100,000 represented over half of the bank's lending to small businesses each year, with a high of 76.2 percent in 2020 primarily due to PPP.

Home Purchase Loans

The distribution of home purchase loans to borrowers of different income levels is adequate. As reflected in Table 11 of Appendix C, the bank's home purchase lending to low-income borrowers is below the aggregate lending level and the percentage of low-income families residing in the assessment area, suggesting that there may be more opportunity in this area. Home purchase activity to moderate-income borrowers compared more favorably with the percentage of moderate-income families in the area, but also lagged behind aggregate lending levels.

Home Refinance Loans

BOU's borrower distribution in home refinance lending is adequate. As reflected in Table 12 of Appendix C, the bank's performance in lending to low-income borrowers was generally in line with aggregate lending levels, while lending to moderate-income borrowers was slightly below aggregate performance. However, the bank's lending to moderate-income borrowers compared favorably to the percentage of moderate-income families within these geographies.

Community Development Lending

BOU is a leader in making CD loans, as lending by dollar volume exceeds that of similarly situated banks. The bank made 29 CD loans totaling \$105.9 million in Ogden-Clearfield during the review period. The majority of the bank's lending helped support economic development by financing small businesses, which helped create or retain jobs within the assessment area. The bank also had several PPP loans which helped small businesses with payroll expenses during the COVID-19 pandemic. In addition, BOU financed a number of affordable housing projects and small business loans in designated opportunity

zones, demonstrating a complex and innovative approach to helping meet the needs of its assessment areas.

Notable community development loans include:

- A \$17.4 million loan to construct a new hotel project in a low-income census tract in Ogden, creating 22 jobs.
- A \$12.4 million loan to construct an affordable housing development in a designated opportunity zone in Ogden. The loan will provide 47 affordable rental units.
- A \$4.6 million loan to convert a vacant lot that attracted dumping into a new multi-family building, as part of the Ogden community development neighborhood revitalization program in a low-income area. The new building will provide 48 affordable rental units.
- A \$14.9 million construction loan to expand an existing hotel and restaurant facility in Ogden. The expansion will help create an additional 30 service jobs and retain a total of 65 jobs.

Investment Test

BOU's performance under the investment test in Ogden-Clearfield is good as evidenced by an adequate level of qualified investments, occasional use of innovative investments, and excellent responsiveness to community development needs. The majority of investments reflected a strong focus on the area's need for affordable housing, largely concentrated on MBS and LIHTCs, as previously discussed. Overall, the bank made \$3.6 million in qualified community development investments and \$174,356 in grants in the assessment area.

Investments were responsive to the need for affordable housing targeted to low- and moderate-income families and individuals. The following are examples of noteworthy investments:

- A \$1.75 million low-income housing tax credit investment in a qualified investment fund that
 provided financing for an affordable 100-unit apartment complex located in Kaysville (Davis
 County). Each unit is reserved for households with incomes lower than 60 percent of the area
 median income.
- A \$106,277 investment in an SBA pool that provided financing for a nursing and personal care facility in a moderate-income tract of Davis County. The facility helps meet the needs of lowand moderate-income individuals by providing meal delivery, medication administration, and transportation for medical appointments.
- Donations totaling \$10,650 to an organization that provides advocacy, education, programs and services to prevent and alleviate domestic violence, sexual assault and homelessness in Weber County.

Service Test

BOU's performance under the service test is good based on the accessibility of delivery systems, the bank's record of opening and closing branches, and a relatively high level of community development services. In addition, the bank provided payment deferrals for home mortgage borrowers who were impacted by the pandemic, which was directly responsive to an identified community need of assisting home mortgage borrowers at risk of default.

Retail Banking Services

The bank's record of opening or closing branches has not adversely affected the accessibility of its delivery systems, including to LMI geographies. The bank operates eight of its seventeen branches in the assessment area, four of which are in low- or moderate-income geographies. The bank opened two branches in Ogden-Clearfield since the previous evaluation, both in middle-income tracts. The bank also provided several loan accommodations to commercial borrowers in response to the COVID-19 pandemic.

Banking services and hours of operations do not vary in a way that inconveniences the assessment area. The bank offers a full range of retail products and services within this assessment area, including walk-up and drive-thru ATMs that provide extended banking hours. Alternative delivery systems include remote deposit capture, which allows customers to make deposits with a smartphone using the mobile banking application.

Community Development Services

BOU provides a relatively high level of impactful community development services in Ogden-Clearfield. In total, employees provided 1,153 community development service hours within the assessment area.

The majority of service hours benefitted low- and moderate-income individuals through technical assistance for non-profit organizations that provide community services to low- and moderate-income individuals. In addition, technical assistance was provided to organizations supporting affordable housing. The examples below highlight notable community development services:

- Employees spent over 120 hours providing technical assistance as board members and assisting
 with accounting for an organization that provides services for low- and moderate-income
 victims of abuse.
- Employees spent 89 hours providing technical assistance by serving in leadership positions for an organization that promotes affordable housing for low- and moderate-income families in Ogden.
- Employees spent 137 hours providing technical assistance by serving in leadership positions for an organization that provides shelter and counseling for victims of domestic violence, financial services for low-income individuals, and elderly assistance programs in Ogden.

LIMITED-SCOPE ASSESSMENT AREA CONCLUSIONS

For each assessment area where a limited-scope review was performed using the examination procedures.

BOU's performance in the assessment areas receiving a limited-scope review is generally consistent with the performance in the areas receiving full-scope reviews. Due to the bank's presence in these market areas, the comparably lower levels of loans and deposits, and the community credit needs of the full-scope areas, the limited scope assessment areas received less weight than the full-scope areas. As such, the performance in these areas did not materially affect the bank's overall lending, investment, and service test performance assessments. Facts and data reviewed, including performance and demographic information, can be found in the tables accompanying this report.

| Ехнівіт 16 | | | | | | | | |
|------------------------------------------------------------|-------------------------------------------|------------|------------|--|--|--|--|--|
| | LIMITED-SCOPE ASSESSMENT AREA CONCLUSIONS | | | | | | | |
| ASSESSMENT AREAS LENDING TEST INVESTMENT TEST SERVICE TEST | | | | | | | | |
| Logan | Consistent | Below | Consistent | | | | | |
| Provo-Orem | Consistent | Consistent | Consistent | | | | | |
| Wasatch | Consistent | Consistent | Consistent | | | | | |

Overall, lending test performance in these markets was generally consistent with the performance in the full-scope assessment areas. The geographic and borrower distribution of loans to small businesses was slightly lower in Provo-Orem, but generally reasonable as compared to the aggregate lending levels. Performance in Logan was stronger in both geographic and borrower distribution of loans to small businesses. The geographic and borrower distribution of home purchases in both Logan and Provo-Orem generally exceeded performance in the full-scope areas. However, community development lending in Provo-Orem and Logan was lower than in the full-scope areas.

Investment and service test performance in these markets was generally consistent with the performance in the full-scope assessment areas. However, the investment test performance in Logan was below that of the full-scope areas with a total of \$22,793 in investments and grants. The bank's service test performance in these areas was consistent with the full-scope assessment areas, with 60 qualified community development service hours in Logan, and 166 hours in Provo-Orem, respectively.

The bank's lending levels in Wasatch are appropriate given its limited branch presence and overall market share of deposits. The bank only operates one branch in Wasatch, which it acquired in November 2018, and this branch is in a middle-income tract. The bank has not made investments or grants in this area, due to competition with large banks seeking community development credit. Further, although no service hours were qualified in Wasatch, it was noted that there are a limited number of organizations focused on community development and located in Wasatch County. Finally, the bank's service opportunities were limited in 2020 due to the pandemic. As such, the bank's performance in the investment and service tests was consistent with its performance in the full-scope areas.

APPENDIX A

GLOSSARY OF TERMS

Aggregate lending: The number of loans originated and purchased by all reporting lenders in specified income categories as a percentage of the aggregate number of loans originated and purchased by all reporting lenders in the metropolitan area/assessment area.

Census tract: A small subdivision of metropolitan and other densely populated counties. Census tract boundaries do not cross county lines; however, they may cross the boundaries of metropolitan statistical areas. Census tracts usually have between 2,500 and 8,000 persons, and their physical size varies widely depending upon population density. Census tracts are designed to be homogeneous with respect to population characteristics, economic status, and living conditions to allow for statistical comparisons.

Community development: All Agencies have adopted the following language. Affordable housing (including multifamily rental housing) for low- or moderate-income individuals; community services targeted to low- or moderate-income individuals; activities that promote economic development by financing businesses or farms that meet the size eligibility standards of the Small Business Administration's Development Company or Small Business Investment Company programs (13 CFR 121.301) or have gross annual revenues of \$1 million or less; or, activities that revitalize or stabilize low-or moderate-income geographies.

Effective September 1, 2005, the Board of Governors of the Federal Reserve System, Office of the Comptroller of the Currency, and the Federal Deposit Insurance Corporation have adopted the following additional language as part of the revitalize or stabilize definition of community development. Activities that revitalize or stabilize:

- (i) Low- or moderate-income geographies;
- (ii) Designated disaster areas; or
- (iii) Distressed or underserved nonmetropolitan middle-income geographies designated by the Board, Federal Deposit Insurance Corporation, and Office of the Comptroller of the Currency, based on:
 - a. Rates of poverty, unemployment, and population loss; or
 - b. Population size, density, and dispersion. Activities that revitalize and stabilize geographies designated based on population size, density, and dispersion if they help to meet essential community needs, including needs of low- and moderate-income individuals.

Consumer loan(s): A loan(s) to one or more individuals for household, family, or other personal expenditures. A consumer loan does not include a home mortgage, small business, or small farm loan. This definition includes the following categories: motor vehicle loans, credit card loans, home equity loans, other secured consumer loans, and other unsecured consumer loans.

Family: Includes a householder and one or more other persons living in the same household who are related to the householder by birth, marriage, or adoption. The number of family households always equals the number of families; however, a family household may also include non-relatives living with the family. Families are classified by type as either a married-couple family or other family, which is

further classified into 'male householder' (a family with a male householder and no wife present) or 'female householder' (a family with a female householder and no husband present).

Full-scope review: Performance under the lending and community development tests is analyzed considering performance context, quantitative factors (for example, geographic distribution, borrower distribution, and total number and dollar amount of investments), and qualitative factors (for example, responsiveness).

Geography: A census tract delineated by the United States Bureau of the Census in the most recent decennial census.

Home Mortgage Disclosure Act (HMDA): The statute that requires certain mortgage lenders that do business or have banking offices in a metropolitan statistical area to file annual summary reports of their mortgage lending activity. The reports include such data as the race, gender, and the income of applications, the amount of loan requested, and the disposition of the application (for example, approved, denied, and withdrawn).

Home mortgage loans: Includes home purchase and home improvement loans as defined in the HMDA regulation. This definition also includes multifamily (five or more families) dwelling loans, loans for the purchase of manufactured homes and refinancings of home improvement and home purchase loans.

Household: Includes all persons occupying a housing unit. Persons not living in households are classified as living in group quarters. In 100 percent tabulations, the count of households always equals the count of occupied housing units.

Limited-scope review: Performance under the lending and community development tests is analyzed using only quantitative factors (for example, geographic distribution, borrower distribution, total number and dollar amount of investments, and branch distribution).

Low-income: Individual income that is less than 50 percent of the area median income, or a median family income that is less than 50 percent, in the case of a geography.

Market share: The number of loans originated and purchased by the institution as a percentage of the aggregate number of loans originated and purchased by all reporting lenders in the metropolitan area/assessment area.

Metropolitan area (MA): A metropolitan statistical area (MSA) or a metropolitan division (MD) as defined by the Office of Management and Budget. A MSA is a core area containing at least one urbanized area of 50,000 or more inhabitants, together with adjacent communities having a high degree of economic and social integration with that core. A MD is a division of a MSA based on specific criteria including commuting patterns. Only a MSA that has a population of at least 2.5 million may be divided into MDs.

Middle-income: Individual income that is at least 80 percent and less than 120 percent of the area median income, or a median family income that is at least 80 percent and less than 120 percent, in the case of a geography.

Moderate-income: Individual income that is at least 50 percent and less than 80 percent of the area median income, or a median family income that is at least 50 percent and less than 80 percent, in the case of a geography.

Multifamily: Refers to a residential structure that contains five or more units.

Other products: Includes any unreported optional category of loans for which the institution collects and maintains data for consideration during a CRA examination. Examples of such activity include consumer loans and other loan data an institution may provide concerning its lending performance.

Owner-occupied units: Includes units occupied by the owner or co-owner, even if the unit has not been fully paid for or is mortgaged.

Qualified investment: A qualified investment is defined as any lawful investment, deposit, membership share, or grant that has as its primary purpose community development.

Rated area: A rated area is a state or multistate metropolitan area. For an institution with domestic branches in only one state, the institution's CRA rating would be the state rating. If an institution maintains domestic branches in more than one state, the institution will receive a rating for each state in which those branches are located. If an institution maintains domestic branches in two or more states within a multistate metropolitan area, the institution will receive a rating for the multistate metropolitan area.

Small loan(s) to business(es): A loan included in 'loans to small businesses' as defined in the Consolidated Report of Condition and Income (Call Report) and the Thrift Financial Reporting (TFR) instructions. These loans have original amounts of \$1 million or less and typically are either secured by nonfarm or nonresidential real estate or are classified as commercial and industrial loans. However, thrift institutions may also exercise the option to report loans secured by nonfarm residential real estate as "small business loans" if the loans are reported on the TFR as nonmortgage, commercial loans.

Small loan(s) to farm(s): A loan included in 'loans to small farms' as defined in the instructions for preparation of the Consolidated Report of Condition and Income (Call Report). These loans have original amounts of \$500,000 or less and are either secured by farmland, or are classified as loans to finance agricultural production and other loans to farmers.

Upper-income: Individual income that is more than 120 percent of the area median income, or a median family income that is more than 120 percent, in the case of a geography.

BANK OF UTAH CRA Public Evaluation
Ogden, Utah January 19, 2021

Logan Assessment Area

The Logan assessment area consists of Cache County in northern Utah, which is part of the Logan UT-ID MSA. The area is bordered by the Idaho state border to the north, Rich County to the east, Weber County to the south, and Box Elder County to the west. As of 2019, Cache County had a population of 128,289 people.

BOU operated two offices in Logan, which held total deposits of \$126 million as of June 30, 2020. By comparison, there were a total of 10 FDIC-insured financial institutions operating 22 offices in the assessment area, with deposits totaling over \$2.4 billion. BOU ranked fifth in the market, with 5.31 percent of the deposit market share. In 2019, there were 46 lenders reporting small business loans pursuant to the reporting requiements of the CRA, most of which were large regional and national institutions. These lenders, which represent only a portion of the overall commercial lending market, extended 2,365 small business loans totaling \$87 million.

Exhibit 16 on the following page presents key demographic and business information concerning the assessment area.

Provo-Orem Assessment Area

The Provo-Orem assessment area consists of Utah County, which is part of the Provo-Orem, Utah MSA. The area located in central Utah is bordered by Salt Lake County to the north, Wasatch County to the east, Carbon, Sanpete, and Juab counties to the south, and Tooele County to the west. As of 2019, Utah County had a population of 636,235 people.

BOU operated three offices in Utah County, which held total deposits of \$92 million as of June 30, 2020. By comparison, there were a total of 11 FDIC-insured financial institutions operating 80 offices in the assessment area, with deposits totaling over \$11.3 billion. BOU ranked eleventh in the market, with 0.81 percent of the deposit market share. In 2019, there were 77 lenders reporting small business loans pursuant to the reporting requiements of the CRA, most of which were large regional and national institutions. These lenders, which represent only a portion of the overall commercial lending market, extended 13,856 small business loans totaling \$472 million.

Exhibit 17 on the following page presents key demographic and business information concerning the assessment area.

Wasatch Assessment Area

The Wasatch assessment area consists of Wasatch County located in northeastern Utah and makes up part of the Salt Lake City-Provo-Orem, Utah Combined Statistical Area. The area is bordered by Summit County to the north, Duchesne County to the east, Utah County to the southwest in addition to Salt Lake County to the west. As of 2019, Wasatch County had a population of 34,091 people.

BOU's single office in Wasatch held deposits totaling over \$20 million as of June 30, 2019. By comparison, there were a total of five FDIC-insured financial institutions operating six offices in the assessment area, with deposits totaling over \$386 million. BOU ranked fifth in the market, with 5.3 percent of the deposit market share. In 2019, there were 39 lenders reporting small business loans pursuant to the reporting requiements of the CRA, most of which were large regional and national institutions. These lenders, which represent only a portion of the overall commercial lending market, extended 983 small business loans totaling \$33 million.

Exhibit 18 on the following page presents key demographic and business information concerning the assessment area.
