

Micro Report Series Description

Series Mnemonic	KWHR/KWHN
Series Name	Monthly Survey of Industrial Electricity Use; FR 2009a/b/c
Starting and Ending Date	September 30, 1990 October 31, 2005
Frequency	Monthly, as of the last calendar day of the month

Reporting Panel

Consists of electric utilities (FR 2009a and FR 2009c) and cogenerators (FR 2009b).

Major Changes to Reporting Panel

None

Data Mode

Monthly figures

Kilowatt hours rounded to the nearest thousand.

Data Availability

All data available.

Major Series Changes

The survey was discontinued in October, 2005 due to industry consolidation that resulted from the deregulation of the electricity markets. Since 1997 the panel size decreased by about 30 percent and the coverage of the panel in terms of the amount of electric power used by industry had fallen about 30 percent.

Beginning in the year 2000, the industrial production index was revised to reflect the new reporting standards for economic indicators. The published series began to be categorized under the new North American Industry Classification System (NAICS) codes instead of the current Standard Industrial Classification (SIC) codes. The FR 2009c was created effective August 2000 with the same format as the FR 2009a but using NAICS codes for respondents that had made the transition from SIC to NAICS codes. Respondents that had not made the transition continued to report on the FR 2009a. The series mnemonic for the FR 2009a/b is KWHR and the series mnemonic for the FR 2009c is KWHN.
