This contract is not for the purpose of transactions that was originally intended. The financial institution processed foreign transactions without proper authorization from the government and was not authorized to conduct any transactions in this case. The contract was terminated in 2013 and somehow it was a mistake for the contract to be activated again. This is a prime reason why this contract is not good for the government, because of the amount of taxpayer dollars that are being wasted by the corrupt activities in this matter and it needs to stop immediately.
