Submitted Date: 03/11/2026

No governmental or business entity should censor or refuse to process payment for what an adult consumer wishes to read, view or purchase.

Governments or business entities should not censor or refuse to process payment based upon a government's or businesses' stated or unstated religious or other implied opinion.

Truly, it is the essence of "limited government."

Separation of church & state was created for just this purpose: to prohibit manipulation or misuse of existing freedoms and laws to fit a minority view (as well as marketing such a move as wanted by the majority when it is patently not wanted). Adults should be free to purchase, view and/or read any content without fear of governmental or corporate judgement & restriction.

It is unfortunate that our current leaders campaign & propogate the misinformation that our "enemies" are trying to invoke Sharia Law in the US.

It appears that this is true, but not by foreign enemies but our own US government and businesses.

Manipulating payment processing to deny adult purchases is a clever means to enact the same discrimination & censorship that is promoted in other countries.

The wording of this proposal has been carefully constructed to leave a loophole to broaden this harmful practice.

If our country survives the coming catastrophe that is assaulting our Democracy, among the many Constitutional and Judicial provisions & balances we must reform should include reevaluateling one party's ability to manipulate and bend Court Orders, laws & regulations.

This is especially true when this manipulation furthers their doctrines of hate & discrimination as well as their own personal, religious *opinions*.

One party's religious fanaticism should never inform or dictate a nation's laws or Courts of law.

Countless wars have been fought over this underlying truth

How unfortunate that we, as a new nation, have yet to learn this lesson
