Re: (i) Regulatory Capital Rules: Category I and II Banking Organizations, Banking Organizations with Significant Trading Activity, and Optional Adoption for Other Banking Organizations (the "ERBA Proposal"); Response to Question 51; and (ii) Regulatory Capital Rules: Regulatory Capital and Standardized Approach for Risk-weighted Assets (the "Standardized Proposal"); Response to Question 22

Dear Ladies and Gentlemen:

Canopus Managing Agents Limited for and on behalf of the underwriting members of Lloyd's Syndicate 4444 ("**Canopus**") supports the positions set forth by the International Trade and Forfeiting Association and the International Association of Credit Portfolio Managers in their joint comments on Question 22 of the Standardized Proposal and Question 51 of the ERBA Proposal.

Canopus believes that the final rules should include adjustments that provide for broader recognition of providers of credit insurance and similar risk transfer arrangements for

purposes of risk weight substitution, consistent with their risk profile and the prudential safeguards they are subject to. A clear and appropriately risk-aligned capital framework that recognizes the financial strength of insurance operating companies along with the market-validated strength of the consolidated group (as reflected by parent-issued debt) would facilitate the prudent use of these tools as part of sound credit risk management practices and support their broader application in enhancing portfolio diversification and lending capacity.

The current eligible guarantor requirements effectively preclude recognition of many well-established credit insurance arrangements. As a result, this constrains the use of tools that support sound lending, portfolio diversification, and prudent risk management. Highly rated and prudentially regulated insurance entities should therefore be eligible for recognition where they provide credit protection and demonstrate their financial capacity to perform on their obligations on a stand-alone basis as well as through debt securities issued by their parents or holding companies. Survey results indicate that more than 90% of participating large U.S. and U.S. Subsidiary banking institutions would have interest in executing transactions with insurance companies for credit risk mitigation if the eligible guarantor definition were clarified to recognize well-capitalized insurers as eligible guarantors.¹

Accordingly, we urge the Agencies to adopt the recommendations set forth in the ITFA/IACPM joint response to ensure a clear, workable, and appropriately risk-aligned framework for providers of credit insurance and similar products.

Sincerely,

Patrick Sheriff
