To the Board of Governors of the Federal Reserve System, the Office of the Comptroller of the Currency, and the Federal Deposit Insurance Corporation:

As a US citizen and bitcoin investor, I believe bitcoin has a long term place in the US financial system. It is pristine collateral that should be made available to institutions needing long term price appreciation as part of their portfolio and asset mix. The current rules are punitive and effectively serve as a barrier to innovation by treating bitcoin as a toxic asset rather than a volatile one.
