Data Collection Instructions

- Loan Population should include all loans that fall in any of the following categories:
 - a. General Purpose Credit Cards: These are credit cards that can be used at a wide variety of merchants, including any who accept MasterCard, Visa, American Express or Discover credit cards. Include affinity, co-brand cards in this category, and student card if applicable. This includes loans reported on line 6.a of schedule HC-C of the FR Y-9C.
 - b. Private Label Credit Cards: These credit cards, also known as Proprietary Credit Cards, are tied to the retailer issuing the card and can only be used in that retailer's stores. Include oil & gas cards in this loan type, and student cards if applicable. This includes loans reported on line 6.a of schedule HC-C of the FR Y-9C.
 - c. Business Card: Include small business credit card accounts where the loan is underwritten with the sole proprietor or primary business owner as applicant. Report at the control account level or the individual pay level (not at the sub-account level). This includes SME credit card loans that are those reported on line 4.a of schedule HC-C of the FRY-9C.
 - d. Corporate Credit Cards: Employer-sponsored credit cards for use by a company's employees. This includes US corporate credit card loans that are those reported on line 4.a of schedule HC-C of the FRY-9C. Report cards that employees are financially responsible for repayment of balances. If employers are ultimately responsible for repayment of balances, then report under Y14Q corporate loan schedule.
 - e. Other: Other cards accounts to consumers, small business, or corporations reported in the FR Y-9C in line items not represented above.
- Do not report data from international cards but include Puerto Rico and the US Virgin Islands
- For all variables reported please report as blank if information is missing or unknown.
- Avoid account duplications.
- For account level variables representing monetary value please use the U.S. Dollar (\$) as the reporting monetary unit.
- For portfolio level variables representing monetary value please use millions of dollars (\$ Millions) as the reporting monetary unit.
- For portfolio level variables, the list of summary variables is to be reported for each portfolio segment. The variables 'Credit Card Type' and 'Lending Type' should be used to define the portfolio segment in a reporting month. For example, General Purpose Bank Cards would constitute the first segment for a bank in a reporting month, say January 2011. There are four Credit Card Type segments and four Lending type segments. Hence, the dataset should always have 16 rows of data per reporting month. The remaining portfolio level variables are the

requested summary variables. Unless otherwise stated, income and fee data is reported as the sum of the activity during the reporting month.

- No quotation marks should be used as text identifiers.
- Mandatory variables should be provided in all cases. Optional variables should be provided when available, or when not directly available they should be provided on a best effort basis. All mandatory variables must be completed for each reported credit. Variables designated "optional" must be reported if the reporter uses the requested information in the course of the reporter's risk management practices or otherwise generates or stores the requested information. If the reporter does not use or generate the information requested in the variable, the reporter is not required to generate the information for this schedule, in which case the variable should be reported as blank.
- Basel II variables are mandatory for Basel II BHCs, optional for non-Basel II BHCs. If Basel II parameters are not calculated on a monthly basis, report the most recent value calculated for the Basel II variable.
