

Variable	Description
date_h	Half-yearly date corresponding to the estimate period.
AL	Real neutral interest rate estimates for Australia.
CA	Real neutral interest rate estimates for Canada.
DN	Real neutral interest rate estimates for Denmark.
EA	Real neutral interest rate estimates for the Euro area.
JA	Real neutral interest rate estimates for Japan.
NO	Real neutral interest rate estimates for Norway.
NZ	Real neutral interest rate estimates for New Zealand.
SD	Real neutral interest rate estimates for Sweden.
SZ	Real neutral interest rate estimates for Switzerland.
UK	Real neutral interest rate estimates for the United Kingdom.
US	Real neutral interest rate estimates for the United States.
SA_Supply_US	Estimated percent contribution of the supply of safe assets to the change in the real neutral interest rate relative to the previous period for the United States.
SA_Demand_US	Estimated percent contribution of the demand of safe assets to the change in the real neutral interest rate relative to the previous period for the United States.
Convenience_Yield_US	Estimated percent contribution of the convenience yield to the change in the real neutral interest rate relative to the previous period for the United States.
Productivity_US	Estimated percent contribution of productivity measures to the change in the real neutral interest rate relative to the previous period for the United States.
Working_Age_Share_US	Estimated percent contribution of the share of the working age population to the change in the real neutral interest rate relative to the previous period for the United States.
Global_Spillovers_US	Estimated percent contribution of global spillover effects to the change in the real neutral interest rate relative to the previous period for the United States.
Other_Factors_US	Estimated percent contribution of other factors to the change in the real neutral interest rate relative to the previous period for the United States.
Total_Change_US	The total change in the estimated neutral interest rate for the United States relative to the previous period.
SA_Supply_CA	Estimated percent contribution of the supply of safe assets to the change in the real neutral interest rate relative to the previous period for Canada.
SA_Demand_CA	Estimated percent contribution of the demand of safe assets to the change in the real neutral interest rate relative to the previous period for Canada.

Convenience_Yield_CA	Estimated percent contribution of the convenience yield to the change in the real neutral interest rate relative to the previous period for Canada.
Productivity_CA	Estimated percent contribution of productivity measures to the change in the real neutral interest rate relative to the previous period for Canada.
Working_Age_Share_CA	Estimated percent contribution of the share of the working age population to the change in the real neutral interest rate relative to the previous period for Canada.
Global_Spillovers_CA	Estimated percent contribution of global spillover effects to the change in the real neutral interest rate relative to the previous period for Canada.
Other_Factors_CA	Estimated percent contribution of other factors to the change in the real neutral interest rate relative to the previous period for Canada.
Total_Change_CA	The total change in the estimated neutral interest rate for the Canada relative to the previous period.
SA_Supply_EA	Estimated percent contribution of the supply of safe assets to the change in the real neutral interest rate relative to the previous period for the Euro area.
SA_Demand_EA	Estimated percent contribution of the demand of safe assets to the change in the real neutral interest rate relative to the previous period for the Euro area.
Convenience_Yield_EA	Estimated percent contribution of the convenience yield to the change in the real neutral interest rate relative to the previous period for the Euro area.
Productivity_EA	Estimated percent contribution of productivity measures to the change in the real neutral interest rate relative to the previous period for the Euro area.
Working_Age_Share_EA	Estimated percent contribution of the share of the working age population to the change in the real neutral interest rate relative to the previous period for the Euro area.
Global_Spillovers_EA	Estimated percent contribution of global spillover effects to the change in the real neutral interest rate relative to the previous period for the Euro area.
Other_Factors_EA	Estimated percent contribution of other factors to the change in the real neutral interest rate relative to the previous period for the Euro area.
Total_Change_EA	The total change in the estimated neutral interest rate for the the Euro area relative to the previous period.
SA_Supply_UK	Estimated percent contribution of the supply of safe assets to the change in the real neutral interest rate relative to the previous period for the United Kingdom.
SA_Demand_UK	Estimated percent contribution of the demand of safe assets to the change in the real neutral interest rate relative to the previous period for the United Kingdom.
Convenience_Yield_UK	Estimated percent contribution of the convenience yield to the change in the real neutral interest rate relative to the previous period for the United Kingdom.

Productivity_UK	Estimated percent contribution of productivity measures to the change in the real neutral interest rate relative to the previous period for the United Kingdom.
Working_Age_Share_UK	Estimated percent contribution of the share of the working age population to the change in the real neutral interest rate relative to the previous period for the United Kingdom.
Global_Spillovers_UK	Estimated percent contribution of global spillover effects to the change in the real neutral interest rate relative to the previous period for the United Kingdom.
Other_Factors_UK	Estimated percent contribution of other factors to the change in the real neutral interest rate relative to the previous period for the United Kingdom.
Total_Change_UK	The total change in the estimated neutral interest rate for the the United Kingdom relative to the previous period.
SA_Supply_JA	Estimated percent contribution of the supply of safe assets to the change in the real neutral interest rate relative to the previous period for Japan.
SA_Demand_JA	Estimated percent contribution of the demand of safe assets to the change in the real neutral interest rate relative to the previous period for Japan.
Convenience_Yield_JA	Estimated percent contribution of the convenience yield to the change in the real neutral interest rate relative to the previous period for Japan.
Productivity_JA	Estimated percent contribution of productivity measures to the change in the real neutral interest rate relative to the previous period for Japan.
Working_Age_Share_JA	Estimated percent contribution of the share of the working age population to the change in the real neutral interest rate relative to the previous period for Japan.
Global_Spillovers_JA	Estimated percent contribution of global spillover effects to the change in the real neutral interest rate relative to the previous period for Japan.
Other_Factors_JA	Estimated percent contribution of other factors to the change in the real neutral interest rate relative to the previous period for Japan.
Total_Change_JA	The total change in the estimated neutral interest rate for Japan relative to the previous period.
SA_Supply_AL	Estimated percent contribution of the supply of safe assets to the change in the real neutral interest rate relative to the previous period for Australia.
SA_Demand_AL	Estimated percent contribution of the demand of safe assets to the change in the real neutral interest rate relative to the previous period for Australia.
Convenience_Yield_AL	Estimated percent contribution of the convenience yield to the change in the real neutral interest rate relative to the previous period for Australia.

Productivity_AL	Estimated percent contribution of productivity measures to the change in the real neutral interest rate relative to the previous period for Australia.
Working_Age_Share_AL	Estimated percent contribution of the share of the working age population to the change in the real neutral interest rate relative to the previous period for Australia.
Global_Spillovers_AL	Estimated percent contribution of global spillover effects to the change in the real neutral interest rate relative to the previous period for Australia.
Other_Factors_AL	Estimated percent contribution of other factors to the change in the real neutral interest relative to the previous period for Australia.
Total_Change_AL	The total change in the estimated neutral interest rate for Australia relative to the previous period.
SA_Supply_DN	Estimated percent contribution of the supply of safe assets to the change in the real neutral interest rate relative to the previous period for Denmark.
SA_Demand_DN	Estimated percent contribution of the demand of safe assets to the change in the real neutral interest rate relative to the previous period for Denmark.
Convenience_Yield_DN	Estimated percent contribution of the convenience yield to the change in the real neutral interest rate relative to the previous period for Denmark.
Productivity_DN	Estimated percent contribution of productivity measures to the change in the real neutral interest rate relative to the previous period for Denmark.
Working_Age_Share_DN	Estimated percent contribution of the share of the working age population to the change in the real neutral interest rate relative to the previous period for Denmark.
Global_Spillovers_DN	Estimated percent contribution of global spillover effects to the change in the real neutral interest rate relative to the previous period for Denmark.
Other_Factors_DN	Estimated percent contribution of other factors to the change in the real neutral interest relative to the previous period for Denmark.
Total_Change_DN	The total change in the estimated neutral interest rate for Denmark relative to the previous period.
SA_Supply_NO	Estimated percent contribution of the supply of safe assets to the change in the real neutral interest rate relative to the previous period for Norway.
SA_Demand_NO	Estimated percent contribution of the demand of safe assets to the change in the real neutral interest rate relative to the previous period for Norway.
Convenience_Yield_NO	Estimated percent contribution of the convenience yield to the change in the real neutral interest rate relative to the previous period for Norway.
Productivity_NO	Estimated percent contribution of productivity measures to the change in the real neutral interest rate relative to the previous period for Norway.

Working_Age_Share_NO	Estimated percent contribution of the share of the working age population to the change in the real neutral interest rate relative to the previous period for Norway.
Global_Spillovers_NO	Estimated percent contribution of global spillover effects to the change in the real neutral interest rate relative to the previous period for Norway.
Other_Factors_NO	Estimated percent contribution of other factors to the change in the real neutral interest rate relative to the previous period for Norway.
Total_Change_NO	The total change in the estimated neutral interest rate for Norway relative to the previous period.
SA_Supply_NZ	Estimated percent contribution of the supply of safe assets to the change in the real neutral interest rate relative to the previous period for New Zealand.
SA_Demand_NZ	Estimated percent contribution of the demand of safe assets to the change in the real neutral interest rate relative to the previous period for New Zealand.
Convenience_Yield_NZ	Estimated percent contribution of the convenience yield to the change in the real neutral interest rate relative to the previous period for New Zealand.
Productivity_NZ	Estimated percent contribution of productivity measures to the change in the real neutral interest rate relative to the previous period for New Zealand.
Working_Age_Share_NZ	Estimated percent contribution of the share of the working age population to the change in the real neutral interest rate relative to the previous period for New Zealand.
Global_Spillovers_NZ	Estimated percent contribution of global spillover effects to the change in the real neutral interest rate relative to the previous period for New Zealand.
Other_Factors_NZ	Estimated percent contribution of other factors to the change in the real neutral interest rate relative to the previous period for New Zealand.
Total_Change_NZ	The total change in the estimated neutral interest rate for New Zealand relative to the previous period.
SA_Supply_SD	Estimated percent contribution of the supply of safe assets to the change in the real neutral interest rate relative to the previous period for Sweden.
SA_Demand_SD	Estimated percent contribution of the demand of safe assets to the change in the real neutral interest rate relative to the previous period for Sweden.
Convenience_Yield_SD	Estimated percent contribution of the convenience yield to the change in the real neutral interest rate relative to the previous period for Sweden.
Productivity_SD	Estimated percent contribution of productivity measures to the change in the real neutral interest rate relative to the previous period for Sweden.
Working_Age_Share_SD	Estimated percent contribution of the share of the working age population to the change in the real neutral interest rate relative to the previous period for Sweden.

Global_Spillovers_SD	Estimated percent contribution of global spillover effects to the change in the real neutral interest rate relative to the previous period for Sweden.
Other_Factors_SD	Estimated percent contribution of other factors to the change in the real neutral interest rate relative to the previous period for Sweden.
Total_Change_SD	The total change in the estimated neutral interest rate for Sweden relative to the previous period.
SA_Supply_SZ	Estimated percent contribution of the supply of safe assets to the change in the real neutral interest rate relative to the previous period for Switzerland.
SA_Demand_SZ	Estimated percent contribution of the demand of safe assets to the change in the real neutral interest rate relative to the previous period for Switzerland.
Convenience_Yield_SZ	Estimated percent contribution of the convenience yield to the change in the real neutral interest rate relative to the previous period for Switzerland.
Productivity_SZ	Estimated percent contribution of productivity measures to the change in the real neutral interest rate relative to the previous period for Switzerland.
Working_Age_Share_SZ	Estimated percent contribution of the share of the working age population to the change in the real neutral interest rate relative to the previous period for Switzerland.
Global_Spillovers_SZ	Estimated percent contribution of global spillover effects to the change in the real neutral interest rate relative to the previous period for Switzerland.
Other_Factors_SZ	Estimated percent contribution of other factors to the change in the real neutral interest rate relative to the previous period for Switzerland.
Total_Change_SZ	The total change in the estimated neutral interest rate for Switzerland relative to the previous period.
