Subject: ****Stop**** the *One/Discover* mega-merger.
Date: Monday, February 26, 2024 10:38:16 PM

NONCONFIDENTIAL // EXTERNAL

Jerome Powell,

Capital One, one of the largest banks in the U.S, announced a 35.3 billion dollar deal to acquire Discover Financial Services. This merger would add Discover's 305 million cardholder network to Capital One's existing 100 million customers, creating the nation's sixth largest bank with a massive impact on the credit card industry.

If approved, this mega-merger would lead to further consolidation of power and influence in the lending market. This concentration would make it harder to ***hold banks accountable*** while ***limiting competition*** and reducing banking options for consumers nationwide.

A healthy economy relies on robust competition, and a successful democracy requires an economy that benefits all. This proposed merger poses a threat to both, hindering competition and economic inclusivity.

The *Federal *Reserve *must *stop *this *mega-merger *immediately.

Sincerely,

William Solomon

Subject: Another Too Big To Fail monster-merger? NO!!!
Date: Monday, February 26, 2024 8:13:22 PM

NONCONFIDENTIAL // EXTERNAL

Jerome Powell,

Trying to keep the rapacious greed of monster-mega-banks in check has become an odious and endless game of whack-a-mole. Capital One, one of the largest banks in the U.S, announced a 35.3 billion dollar deal to acquire Discover Financial Services. This merger would add Discover's 305 million cardholder network to Capital One's existing 100 million customers, creating the nation's sixth largest bank with a massive impact on the credit card industry. WTF?!?

If approved, this mega-merger will lead to further misery for the majority of those people, most of whom are already on the brink. The consolidation of power and influence in the lending market is an unconscionable money grab. This concentration would make it harder to hold banks accountable while limiting competition and reducing banking options for consumers nationwide. How many times does this scenario have to play out with real people's money? I am tired of bending over while the banking industry "services" my account.

A successful democracy requires an economy that benefits all. A healthy economy relies on robust competition. This proposed monster-merger poses a threat to both, hindering economic inclusivity (not to mention justice), and genuine competition.

The Federal Reserve must stop this monstrous anti-democratic merger immediately. I trust that, unlike Capital One, you have a sense of decency and are capable of putting the peoples' wellbeing ahead of Wall Street's avaricious appetite.

In Solidarity,
Karen Samski

Jerome Powell,

Capital One, wants to buy Discover Financial Services. This merger would create the nation's sixth largest bank with too much control over the credit card industry.

This merger would be bad for consumers because it would result in consolidation of power in lending. It would reduce competition and banking options for consumers.

A healthy economy needs competition, and our democracy needs an economy that benefits all. This proposed merger poses a threat to both by reducing competition and giving too much power to a few that can be used against regular Americans that use credit cards especially those who use them for credit.

I urge the Federal Reserve to stop this mega-merger.

Jerome Powell,

Capital One, one of the largest banks in the U.S, announced a 35.3 billion dollar deal to acquire Discover Financial Services. This merger would add Discover's 305 million cardholder network to Capital One's existing 100 million customers, creating the nation's sixth largest bank with a massive impact on the credit card industry.

If approved, this mega-merger would lead to further consolidation of power and influence in the lending market. This concentration would make it harder to hold banks accountable while limiting competition and reducing banking options for consumers nationwide.

A healthy economy relies on robust competition, and a successful democracy requires an economy that benefits all. This proposed merger poses a threat to both, hindering competition and economic inclusivity.

Jerome Powell,

Monopolies are extremely harmful to consumers. This is particularly problematic when banks/credit companies are involved.

The gutting of Glass Steagall has allowed serious problems to emerge in this area, and the dissolution of essential financial firewalls.

The Federal Reserve must take action to not only stop this merger, but prevent the ongoing efforts to effect consolidation in the financial and other industries, for the benefit of consumers.

Capital One, one of the largest banks in the U.S, announced a 35.3 billion dollar deal to acquire Discover Financial Services. Jerome Powell,

Capital One, one of the largest banks in the U.S, announced a 35.3 billion dollar deal to acquire Discover Financial Services. This merger would add Discover's 305 million cardholder network to Capital One's existing 100 million customers, creating the nation's sixth largest bank with a massive impact on the credit card industry.

If approved, this mega-merger would lead to further consolidation of power and influence in the lending market. This concentration would make it harder to hold banks accountable while limiting competition and reducing banking options for consumers nationwide.

A healthy economy relies on robust competition, and a successful democracy requires an economy that benefits all. This proposed merger poses a threat to both, hindering competition and economic inclusivity.

The Federal Reserve must stop this mega-merger immediately.

Sincerely,

GARY WAYNE

Jerome Powell,

Capital One, one of the largest banks in the U.S, announced a 35.3 billion dollar deal to acquire Discover Financial Services. This merger would add Discover's 305 million cardholder network to Capital One's existing 100 million customers, creating the nation's sixth largest bank with a massive impact on the credit card industry.

If approved, this mega-merger would lead to further consolidation of power and influence in the lending market. This concentration would make it harder to hold banks accountable while limiting competition and reducing banking options for consumers nationwide.

A healthy economy relies on robust competition, and a successful democracy requires an economy that benefits all. This proposed merger poses a threat to both, hindering competition and economic inclusivity.

The Federal Reserve must stop this mega-merger immediately.

Sincerely,

Joan Grossman

NONCONFIDENTIAL // EXTERNAL

Jerome Powell,

I have been a Discover card holder for many many years and I am totally against the merger of Discover and Capital One.

This merger would add Discover's 305 million cardholder network to Capital One's existing 100 million customers, creating the nation's sixth largest bank with a massive impact on the credit card industry.

If approved, this mega-merger would lead to further consolidation of power and influence in the lending market. This concentration would make it harder to hold banks accountable while limiting competition and reducing banking options for consumers nationwide.

A healthy economy relies on robust competition, and a successful democracy requires an economy that benefits all. This proposed merger poses a threat to both, hindering competition and economic inclusivity.

The Federal Reserve must stop this mega-merger immediately.

Sincerely, Eileen Blake

Jerome Powell,

Capital One, one of the largest banks in the U.S, announced a 35.3 billion dollar deal to acquire Discover Financial Services. This merger would add Discover's 305 million cardholder network to Capital One's existing 100 million customers, creating the nation's sixth largest bank with a massive impact on the credit card industry.

If approved, this mega-merger would lead to further consolidation of power and influence in the lending market. This concentration would make it harder to hold banks accountable while limiting competition and reducing banking options for consumers nationwide.

A healthy economy relies on robust competition, and a successful democracy requires an economy that benefits all. This proposed merger poses a threat to both, hindering competition and economic inclusivity.

The Federal Reserve must stop this mega-merger immediately.

Sincerely,

Priscilla Skerry

If approved, this mega-merger would lead to further consolidation of power and influence in the lending market. This concentration would make it harder to hold banks accountable while limiting competition and reducing banking options for consumers nationwide.

A healthy economy relies on robust competition, and a successful democracy requires an economy that benefits all. This proposed merger poses a threat to both, hindering competition and economic inclusivity.

The Federal Reserve must stop this mega-merger immediately.

Jerome Powell,

Capital One, one of the largest banks in the U.S, announced a 35.3 billion dollar deal to acquire Discover Financial Services. This merger would add Discover's 305 million cardholder network to Capital One's existing 100 million customers, creating the nation's sixth largest bank with a massive impact on the credit card industry.

If approved, this mega-merger would lead to further consolidation of power and influence in the lending market. This concentration would make it harder to hold banks accountable while limiting competition and reducing banking options for consumers nationwide.

A healthy economy relies on robust competition, and a successful democracy requires an economy that benefits all. This proposed merger poses a threat to both, hindering competition and economic inclusivity.

The Federal Reserve must stop this mega-merger immediately.

NONCONFIDENTIAL // EXTERNAL

Jerome Powell,

Capital One, one of the largest banks in the U.S, announced a 35.3 billion dollar deal to acquire Discover Financial Services. This merger would add Discover's 305 million cardholder network to Capital One's existing 100 million customers, creating the nation's sixth largest bank with a massive impact on the credit card industry.

If approved, this mega-merger would lead to further consolidation of power and influence in the lending market. This concentration would make it harder to hold banks accountable while limiting competition and reducing banking options for consumers nationwide.

A healthy economy relies on robust competition, and a successful democracy requires an economy that benefits all. This proposed merger poses a threat to both, hindering competition and economic inclusivity.

The Federal Reserve must stop this mega-merger immediately.

Sincerely,

Lauren Garner

This merger would add Discover's 305 million cardholder network to Capital One's existing 100 million customers, creating the nation's sixth largest bank with a massive impact on the credit card industry.

If approved, this mega-merger would lead to further consolidation of power and influence in the lending market. This concentration would make it harder to hold banks accountable while limiting competition and reducing banking options for consumers nationwide.

A healthy economy relies on robust competition, and a successful democracy requires an economy that benefits all. This proposed merger poses a threat to both, hindering competition and economic inclusivity.

The Federal Reserve must stop this mega-merger immediately.

Sincerely,
Cathy Noga

This merger would add Discover's 305 million cardholder network to Capital One's existing 100 million customers, creating the nation's sixth largest bank with a massive impact on the credit card industry.

If approved, this mega-merger would lead to further consolidation of power and influence in the lending market. This concentration would make it harder to hold banks accountable while limiting competition and reducing banking options for consumers nationwide.

A healthy economy relies on robust competition, and a successful democracy requires an economy that benefits all. This proposed merger poses a threat to both, hindering competition and economic inclusivity.

The Federal Reserve must stop this mega-merger immediately.

Sincerely,

NONCONFIDENTIAL // EXTERNAL

Jerome Powell,

Capital One, one of the largest banks in the U.S, announced a 35.3 billion dollar deal to acquire Discover Financial Services. This merger would add Discover's 305 million cardholder network to Capital One's existing 100 million customers, creating the nation's sixth largest bank with a massive impact on the credit card industry.

If approved, this mega-merger would lead to further consolidation of power and influence in the lending market. This concentration would make it harder to hold banks accountable while limiting competition and reducing banking options for consumers nationwide.

A healthy economy relies on robust competition, and a successful democracy requires an economy that benefits all. This proposed merger poses a threat to both, hindering competition and economic inclusivity.

The Federal Reserve must stop this mega-merger immediately.

Sincerely,

Laurie Rubin

Capital One, one of the largest banks in the U.S, announced a 35.3 billion dollar deal to acquire Discover Financial Services. This merger would add Discover's 305 million cardholder network to Capital One's existing 100 million customers, creating the nation's sixth largest bank with a massive impact on the credit card industry.

If approved, this mega-merger would lead to further consolidation of power and influence in the lending market. This concentration would make it harder to hold banks accountable while limiting competition and reducing banking options for consumers nationwide.

A healthy economy relies on robust competition, and a successful democracy requires an economy that benefits all. This proposed merger poses a threat to both, hindering competition and economic inclusivity.

The Federal Reserve must stop this mega-merger immediately.

This merger would add Discover's 305 million cardholder network to Capital One's existing 100 million customers, creating the nation's sixth largest bank with a massive impact on the credit card industry.

If approved, this mega-merger would lead to further consolidation of power and influence in the lending market. This concentration would make it harder to hold banks accountable while limiting competition and reducing banking options for consumers nationwide.

A healthy economy relies on robust competition, and a successful democracy requires an economy that benefits all. This proposed merger poses a threat to both, hindering competition and economic inclusivity.

The Federal Reserve must stop this mega-merger immediately.

Sincerely,

If approved, this mega-merger would lead to further consolidation of power and influence in the lending market. This concentration would make it harder to hold banks accountable while limiting competition and reducing banking options for consumers nationwide.

A healthy economy relies on robust competition, and a successful democracy requires an economy that benefits all. This proposed merger poses a threat to both, hindering competition and economic inclusivity.

The Federal Reserve must stop this mega-merger immediately.

Jerome Powell,

Capital One, one of the largest banks in the U.S, announced a 35.3 billion dollar deal to acquire Discover Financial Services. This merger would add Discover's 305 million cardholder network to Capital One's existing 100 million customers, creating the nation's sixth largest bank with a massive impact on the credit card industry.

If approved, this mega-merger would lead to further consolidation of power and influence in the lending market. This concentration would make it harder to hold banks accountable while limiting competition and reducing banking options for consumers nationwide.

A healthy economy relies on robust competition, and a successful democracy requires an economy that benefits all. This proposed merger poses a threat to both, hindering competition and economic inclusivity.

The Federal Reserve must stop this mega-merger immediately.

NONCONFIDENTIAL // EXTERNAL

Jerome Powell,

Capital One, one of the largest banks in the U.S, announced a 35.3 billion dollar deal to acquire Discover Financial Services. This merger would add Discover's 305 million cardholder network to Capital One's existing 100 million customers, creating the nation's sixth largest bank with a massive impact on the credit card industry.

If approved, this mega-merger would lead to further consolidation of power and influence in the lending market. This concentration would make it harder to hold banks accountable while limiting competition and reducing banking options for consumers nationwide.

A healthy economy relies on robust competition, and a successful democracy requires an economy that benefits all. This proposed merger poses a threat to both, hindering competition and economic inclusivity.

The Federal Reserve must stop this mega-merger immediately.

Sincerely,

Jerry Charlson

Jerome Powell,

Capital One, one of the largest banks in the U.S, announced a 35.3 billion dollar deal to acquire Discover Financial Services. This merger would add Discover's 305 million cardholder network to Capital One's existing 100 million customers, creating the nation's sixth largest bank with a massive impact on the credit card industry.

If approved, this mega-merger would lead to further consolidation of power and influence in the lending market. This concentration would make it harder to hold banks accountable while limiting competition and reducing banking options for consumers nationwide.

A healthy economy relies on robust competition, and a successful democracy requires an economy that benefits all. This proposed merger poses a threat to both, hindering competition and economic inclusivity.

The Federal Reserve must stop this mega-merger immediately.

Sincerely,

William Welly

These large companies merging generally hurt the consumers wallet severely as the purchase of one by the other results in borrowing enough money to pay for the merger. Then the consumers who use these companies must pay not only for the money they borrow from the companies but for the money borrowed by the companies to create the immense and monopolistic result.

Thanks for your attention.

This merger would add Discover's 305 million cardholder network to Capital One's existing 100 million customers, creating the nation's sixth largest bank with a massive impact on the credit card industry.

If approved, this mega-merger would lead to further consolidation of power and influence in the lending market. This concentration would make it harder to hold banks accountable while limiting competition and reducing banking options for consumers nationwide.

A healthy economy relies on robust competition, and a successful democracy requires an economy that benefits all. This proposed merger poses a threat to both, hindering competition and economic inclusivity.

The Federal Reserve must stop this mega-merger immediately.

If approved, this mega-merger would lead to further consolidation of power and influence in the lending market. This concentration would make it harder to hold banks accountable while limiting competition and reducing banking options for consumers nationwide.

A healthy economy relies on robust competition, and a successful democracy requires an economy that benefits all. This proposed merger poses a threat to both, hindering competition and economic inclusivity.

The Federal Reserve must stop this mega-merger immediately.

NONCONFIDENTIAL // EXTERNAL

Jerome Powell,

Capital One, one of the largest banks in the U.S, announced a 35.3 billion dollar deal to acquire Discover Financial Services. This merger would add Discover's 305 million cardholder network to Capital One's existing 100 million customers, creating the nation's sixth largest bank with a massive impact on the credit card industry.

If approved, this mega-merger would lead to further consolidation of power and influence in the lending market. This concentration would make it harder to hold banks accountable while limiting competition and reducing banking options for consumers nationwide.

A healthy economy relies on robust competition, and a successful democracy requires an economy that benefits all. This proposed merger poses a threat to both, hindering competition and economic inclusivity.

The Federal Reserve must stop this mega-merger immediately.

Jerome Powell,

Capital One, one of the largest banks in the U.S, announced a 35.3 billion dollar deal to acquire Discover Financial Services. This merger would add Discover's 305 million cardholder network to Capital One's existing 100 million customers, creating the nation's sixth largest bank with a massive impact on the credit card industry.

If approved, this mega-merger would lead to further consolidation of power and influence in the lending market. This concentration would make it harder to hold banks accountable while limiting competition and reducing banking options for consumers nationwide.

A healthy economy relies on robust competition, and a successful democracy requires an economy that benefits all. This proposed merger poses a threat to both, hindering competition and economic inclusivity.

The Federal Reserve must stop this mega-merger immediately.

Sincerely,

This merger would add Discover's 305 million cardholder network to Capital One's existing 100 million customers, creating the nation's sixth largest bank with a massive impact on the credit card industry.

If approved, this mega-merger would lead to further consolidation of power and influence in the lending market. This concentration would make it harder to hold banks accountable while limiting competition and reducing banking options for consumers nationwide.

A healthy economy relies on robust competition, and a successful democracy requires an economy that benefits all. This proposed merger poses a threat to both, hindering competition and economic inclusivity.

The Federal Reserve must stop this mega-merger immediately.

Subject: Stop the Credit One/Discover mega-merger.
Date: Monday, February 26, 2024 7:04:49 PM

NONCONFIDENTIAL // EXTERNAL

Jerome Powell,

Capital One, one of the largest banks in the U.S, announced a 35.3 billion dollar deal to acquire Discover Financial Services. This merger would add Discover's 305 million cardholder network to Capital One's existing 100 million customers, creating the nation's sixth largest bank with a massive impact on the credit card industry.

If approved, this mega-merger would lead to further consolidation of power and influence in the lending market. This concentration would make it harder to hold banks accountable while limiting competition and reducing banking options for consumers nationwide.

A healthy economy relies on robust competition, and a successful democracy requires an economy that benefits all. This proposed merger poses a threat to both, hindering competition and economic inclusivity.

The Federal Reserve must stop this mega-merger immediately.

Sincerely,

Stephanie Jackel

Jerome Powell,

Capital One, one of the largest banks in the U.S, announced a 35.3 billion dollar deal to acquire Discover Financial Services. This merger would add Discover's 305 million cardholder network to Capital One's existing 100 million customers, creating the nation's sixth largest bank with a massive impact on the credit card industry.

If approved, this mega-merger would lead to further consolidation of power and influence in the lending market. This concentration would make it harder to hold banks accountable while limiting competition and reducing banking options for consumers nationwide.

A healthy economy relies on robust competition, and a successful democracy requires an economy that benefits all. This proposed merger poses a threat to both, hindering competition and economic inclusivity.

The Federal Reserve must stop this mega-merger immediately.

Sincerely,

Brigitte Genest

Jerome Powell,

Capital One, one of the largest banks in the U.S, announced a 35.3 billion dollar deal to acquire Discover Financial Services. This merger would add Discover's 305 million cardholder network to Capital One's existing 100 million customers, creating the nation's sixth largest bank with a massive impact on the credit card industry.

If approved, this mega-merger would lead to further consolidation of power and influence in the lending market. This concentration would make it harder to hold banks accountable while limiting competition and reducing banking options for consumers nationwide.

A healthy economy relies on robust competition, and a successful democracy requires an economy that benefits all. This proposed merger poses a threat to both, hindering competition and economic inclusivity.

The Federal Reserve must stop this mega-merger immediately.

Sincerely,

Gehr Brown

If approved, this mega-merger would lead to further consolidation of power and influence in the lending market. This concentration would make it harder to hold banks accountable while limiting competition and reducing banking options for consumers nationwide.

A healthy economy relies on robust competition, and a successful democracy requires an economy that benefits all. This proposed merger poses a threat to both, hindering competition and economic inclusivity.

The Federal Reserve must stop this mega-merger immediately.

NONCONFIDENTIAL // EXTERNAL

Jerome Powell,

Capital One, one of the largest banks in the U.S, announced a 35.3 billion dollar deal to acquire Discover Financial Services. This merger would add Discover's 305 million cardholder network to Capital One's existing 100 million customers, creating the nation's sixth largest bank with a massive impact on the credit card industry.

If approved, this mega-merger would lead to further consolidation of power and influence in the lending market. This concentration would make it harder to hold banks accountable while limiting competition and reducing banking options for consumers nationwide.

A healthy economy relies on robust competition, and a successful democracy requires an economy that benefits all. This proposed merger poses a threat to both, hindering competition and economic inclusivity.

The Federal Reserve must stop this mega-merger immediately.

Jerome Powell,

Capital One, one of the largest banks in the U.S, announced a 35.3 billion dollar deal to acquire Discover Financial Services. This merger would add Discover's 305 million cardholder network to Capital One's existing 100 million customers, creating the nation's sixth largest bank with a massive impact on the credit card industry.

If approved, this mega-merger would lead to further consolidation of power and influence in the lending market. This concentration would make it harder to hold banks accountable while limiting competition and reducing banking options for consumers nationwide.

A healthy economy relies on robust competition, and a successful democracy requires an economy that benefits all. This proposed merger poses a threat to both, hindering competition and economic inclusivity.

The Federal Reserve must stop this mega-merger immediately.

Sincerely,

Kristi Kawas

Jerome Powell,

The concentration in our banking sector represents significant barriers to consumer wellbeing and free exchange, with incumbents like Capital One and Discover Financial Services already enjoying operating in a market with considerable barriers of entry.

If approved, this mega-merger would lead to further consolidation of power and influence in the lending market. This concentration would make it harder to hold banks accountable while limiting competition and reducing banking options for consumers nationwide.

A healthy economy relies on robust competition, and a successful democracy requires an economy that benefits all. This proposed merger poses a threat to both, hindering competition and economic inclusivity.

The Federal Reserve must stop this mega-merger immediately.

Subject: Stop the market damaging Credit One/Discover mega-merger.
Date: Monday, February 26, 2024 7:29:30 PM

NONCONFIDENTIAL // EXTERNAL

Jerome Powell,

Capital One, one of the largest banks in the U.S, announced a 35.3 billion dollar deal to acquire Discover Financial Services. This merger would add Discover's 305 million cardholder network to Capital One's existing 100 million customers, creating the nation's sixth largest bank with a massive impact on the credit card industry.

If approved, this mega-merger would lead to further consolidation of power and influence in the lending market. This concentration would make it harder to hold banks accountable while limiting competition and reducing banking options for consumers nationwide.

A healthy economy relies on robust competition, and a successful democracy requires an economy that benefits all. This proposed merger poses a threat to both, hindering competition and economic inclusivity.

The Federal Reserve must stop this mega-merger immediately.

Sincerely,

Howard Cohen

In my experience, this means a reduction of service for people who really need them, and more and more of the money that ordinary hard-working people earn flowing into the pockets of the ultra-wealthy. How much richer than obscenely rich do they need to be?

A healthy economy relies on robust competition, and a successful democracy requires an economy that benefits all. This proposed merger poses a threat to both, hindering competition and economic inclusivity.

Subject: URGENT It is time now to block this Monopolistic Credit One/Discover mega-merger.
Date: Monday, February 26, 2024 7:58:10 PM

NONCONFIDENTIAL // EXTERNAL

Jerome Powell,

I was so dismayed to learn that the famous company known as Capital One, (which as you well know happens to be one of the largest banks in the U.S), has had the utter audacity to simply announce a 35.3 BILLION dollar deal to purchase the less "sexy" but even BIGGER company called Discover Financial Services. This attempted merger would add Discover's HUGE 305 million cardholder network to Capital One's current estimate of roughly 100 million customers. This proposal would truly rock the credit card industry, and it would also result in making the new monstrous giant into the nation's sixth largest bank.

Clearly, if this deal were to mistakenly be allowed to go through as planned, this mega-merger would lead to the undesired result of a further consolidation of both power and influence in America's lending market. We claim to want our businesses to be competitive, and to encourage small businesses, like the classic community bank (and local credit union). Sadly, such a concentration would make it harder to hold banks accountable, plus reducing banking options for consumers nationwide.

A healthy economy relies on robust competition, and a successful democracy requires an economy that benefits all. This proposed merger poses a threat to both, hindering competition and economic inclusivity.

It is imperative that the Federal Reserve step in and stop this merger as soon as possible.

Respectfully yours,

Jill Greer
