I have been a card-carrying member of both credit card companies for several years and have been impressed with both of the organizations. Each has it's own strengths and I think the two would be better together. Both companies have always had the client/card member's best interest in mind going above and beyond to help solve any problem or issue that arises. They offer great customer support at all hours of the day and have live, local phone operators able to assist. They also take a proactive approach analyzing your spending or trends and offer tools to assist with building your credit, making it easier to plan for that next big purchase or covering your backside when it may appear your account has been compromised.

Communication between customer and organization is very important and knowing that they are a call, click, or chat away is reassuring for any situation.

I think the companies are very similar and are well aligned already to easily become one and continue to support each other and their clients, making them a bigger better banking / credit organization. I would see no reason not to support a merger, from a customer perspective.

Kevin Wellmann

Subject: Supporting the Discover & Capital One Merger

Dear Ms. Misback,

I'm writing to you on behalf of the In His Hands Resource Center Inc. Our mission is to facilitate and sustain human and economic viability in underserved communities.

We believe in True Partnerships.

I recently attended a community listening session hosted by Discover and Capital One at Discover's Shine Bright Community Center on the South Side of Chicago where they spoke about the benefits of the proposed merger your office is reviewing. I was delighted to hear about Capital One's record of community investments and how that aligns with that of Discover. Capital One remains committed to Discover's vision for bringing quality jobs to Chicago's South Side and supporting organizations like ours whose work is critical to improving the fabric of our local communities.

The proposed merger between Capital One and Discover can be positive for Chicago as Discover's customer care center in Chatham has already had a positive economic impact on Chicago's South Side since it opened three years ago. As a combined company with Capital One, we believe the merger will further benefit the community and allow non-profit organizations like In His Hands Resource Center Inc. and others to provide even more critical services to Chicagoans in need.

This merger has the potential to improve access to financial products and community resources for those who are just getting by in our communities. Many of whom have been denied equitable access due to historical injustices and systemic barriers that have limited economic opportunity.

We encourage the Federal Reserve to approve this merger, recognizing its potential to benefit communities like ours and its impact on improving.

Thank you for considering our perspective.

Warm regards,

Dr. Nykia Farmer LHD  
Founder  
In His Hands Resource Center Inc.

I'm excited to support the proposed Capital One-Discover merger because I know it will help expand credit access to the communities I serve in the Georgia State House and be a win for small businesses everywhere.

Right now, Visa and Mastercard control 80 percent of the payment network industry. Controlling this much of the market allows the two companies to write the rules that small businesses must follow, whether or not the rules work out for them. This disproportionately impacts the bottom line of small and minority-owned businesses who lack the profit margins to absorb these costs.

Thankfully, the Capital One-Discover merger creates an opportunity to address this concern. By allowing the two banks to merge, Capital One will be able to issue its cards on Discover's payment network, making Discover a more important player in the payment network market and pushing all payment network companies to compete for the chance to work with merchants. This increased competition will push payment networks to adopt terms that are more favorable to small businesses and empower small business owners to negotiate directly with payment networks.

Capital One and Discover already lead their peers when it comes to serving marginalized communities. Capital One is the largest issuer of credit cards to first time card holders and ranks first among larger banks when it comes to serving low- and moderate-income (LMI) communities, with one third of their branches being located in LMI neighborhoods. Both Capital One and Discover also offer no-fee credit cards and do not charge overdraft fees while continuing to offer overdraft protection.

This merger will further expand credit access to communities often left behind by other financial institutions. Through this merger, Capital One will be able to add 305 million card holders to its customer base, which will open doors for more people to gain access to the tailored financial products offered by both companies.

In service,

State Representative Shea Roberts

I have dedicated my career to championing initiatives that support and bolster our vibrant small business community. Working as a City Council Member here in Toledo has made me acutely aware of the trickle down impact larger regulatory decisions can have on my community. The proposed merger between Capital One and Discover is one of those decisions, and presents a significant opportunity to enhance financial services and credit access for small businesses in Toledo and beyond.

For small businesses, access to credit is a lifeline. Capital One has pioneered credit products specifically designed for borrowers who are building or rebuilding their credit. They have been a remarkable success. As of March 2024, 69% of Capital One customers who started with subprime credit scores have successfully achieved a prime credit score of 660 or higher. In furtherance of their commitment to ensure no one is excluded from our financial system, Capital One was the first among the top ten banks to eliminate overdraft and insufficient funds fees from all their products while still providing free overdraft protection. These initiatives directly benefit small business owners who rely on stable and predictable banking services.

Critics of the merger have expressed concerns about potential market concentration. However, the data tells a different story. The credit card industry is highly competitive, with over 4,000 financial institutions of varying sizes offering credit cards. Most Americans hold between three to four credit cards issued by different providers, demonstrating the ease with which consumers can switch between products. Both the Office of the Comptroller of the Currency (OCC) and the Federal Reserve have confirmed that the credit card issuer market is competitive and will remain unconcentrated even after the merger.

Supporting this merger means supporting the growth and stability of our small businesses. By enhancing access to affordable credit and financial services, the Capital One-Discover merger can empower Toledo's entrepreneurs to thrive, innovate, and contribute to our local economy. I urge policymakers and stakeholders to recognize the potential of this merger to foster economic prosperity and inclusivity in Toledo and beyond. I'm asking you to seize this opportunity to strengthen our small business community and create a more equitable financial landscape for all.

- Sam Melden  
Toledo City Council Member, District 5

June 11, 2024

Ann E. Misback  
Federal Reserve Bank  
Secretary of the Board  
20th Street and Constitution Avenue  
NW Washington, DC 20551–0001

Dear Chairman Powell:

I support the merger of Capital One and Discover Financial Services currently under consideration by the Federal Reserve. The merger of these two banks will reinforce financial stability, benefit American consumers, and encourage economic growth in our state and beyond.

As increased inflation and rising prices harm consumers, the ability of banks to merge can help counter these negative impacts by stimulating economic growth and stability. Mergers like this also contribute to a safer and even more robust banking system which results in increased financial access, consumer protections, and innovations that help hard working families on a whole different scale. Now more than ever, it's crucial to maintain a strong and competitive American banking sector.

The proliferation of excessive regulatory and bureaucratic red tape not only merit, but necessitate, appropriate bank mergers that offer greater economies of scale necessary to meet regulatory burdens and, most importantly, serve the needs of their customers and communities.

As this process continues, I urge the Federal Reserve Bank to demonstrate predictability, transparency, and efficiency during this review process. Doing so will avoid delays that have a significant impact on the banks involved which can cause greater operational risk, increase in expenses, and pose reputational risk during a period of uncertainty.

Sincerely,

A handwritten signature in blue ink that reads "Josie Tomkow".

Josie Tomkow  
Florida State Representative, District 51

Federal Trade Commission PUBLIC MEETING,

Capital One, one of the largest banks in the U.S, announced a 35.3 billion dollar deal to acquire Discover Financial Services. This merger would add Discover's 305 million cardholder network to Capital One's existing 100 million customers, creating the nation's sixth largest bank with a massive impact on the credit card industry.

If approved, this mega-merger would lead to further consolidation of power and influence in the lending market. This concentration would make it harder to hold banks accountable while limiting competition and reducing banking options for consumers nationwide.

A healthy economy relies on robust competition, and a successful democracy requires an economy that benefits all. This proposed merger poses a threat to both, hindering competition and economic inclusivity.

The federal regulators must stop this mega-merger immediately.

Sincerely,

Deborah Dobson

This merger would add Discover's 305 million cardholder network to Capital One's existing 100 million customers, creating the nation's sixth largest bank with a massive impact on the credit card industry.

If approved, this mega-merger would lead to further consolidation of power and influence in the lending market. This concentration would make it harder to hold banks accountable while limiting competition and reducing banking options for consumers nationwide.

A healthy economy relies on robust competition, and a successful democracy requires an economy that benefits all. This proposed merger poses a threat to both, hindering competition and economic inclusivity.

The federal regulators must stop this mega-merger immediately.

Sincerely,

Mark White

Federal Trade Commission PUBLIC MEETING,

Capital One, one of the largest banks in the U.S, announced a 35.3 billion dollar deal to acquire Discover Financial Services. This is so blatantly monopolistic that it's concerning that the merger could even be considered in the first place. This merger would add Discover's 305 million cardholder network to Capital One's existing 100 million customers, creating the nation's sixth largest bank with a massive impact on the credit card industry.

If approved, this mega-merger would lead to further consolidation of power and influence in the lending market. This concentration would make it harder to hold banks accountable while limiting competition and reducing banking options for consumers nationwide.

Capital One, one of the largest banks in the U.S, announced a 35.3 billion dollar deal to acquire Discover Financial Services. This merger would add Discover's 305 million cardholder network to Capital One's existing 100 million customers, creating the nation's sixth largest bank with a massive impact on the credit card industry.

If approved, this mega-merger would lead to further consolidation of power and influence in the lending market. This concentration would make it harder to hold banks accountable while limiting competition and reducing banking options for consumers nationwide.

A healthy economy relies on robust competition, and a successful democracy requires an economy that benefits all. This proposed merger poses a threat to both, hindering competition and economic inclusivity.

The federal regulators must stop this mega-merger immediately.

Sincerely,

Martha Wheeler

This merger would add Discover's 305 million cardholder network to Capital One's existing 100 million customers, creating the nation's sixth largest bank with a massive impact on the credit card industry.

If approved, this mega-merger would lead to further consolidation of power and influence in the lending market. This concentration would make it harder to hold banks accountable while limiting competition and reducing banking options for consumers nationwide.

A healthy economy relies on robust competition, and a successful democracy requires an economy that benefits all. This proposed merger poses a threat to both, hindering competition and economic inclusivity.

The federal regulators must stop this mega-merger immediately.

Federal Trade Commission PUBLIC MEETING,

Capital One, one of the largest banks in the U.S, announced a 35.3 billion dollar deal to acquire Discover Financial Services. This merger would add Discover's 305 million cardholder network to Capital One's existing 100 million customers, creating the nation's sixth largest bank with a massive impact on the credit card industry.

If approved, this mega-merger would lead to further consolidation of power and influence in the lending market. This concentration would make it harder to hold banks accountable while limiting competition and reducing banking options for consumers nationwide.

A healthy economy relies on robust competition, and a successful democracy requires an economy that benefits all. This proposed merger poses a threat to both, hindering competition and economic inclusivity.

Federal Trade Commission PUBLIC MEETING,

Stop the merger! Capital One's merger with Discover Financial Services would create the sixth largest bank on the U.S., with a massive impact on the credit card industry. It would lead to further consolidation of power and influence in the lending market, which would make it harder to hold banks accountable while limiting competition and reducing banking options for consumers nationwide.

A healthy economy relies on robust competition, and a successful democracy requires an economy that benefits all. This proposed merger poses a threat to both, hindering competition and economic inclusivity.

The federal regulators must stop this mega-merger immediately.

Federal Trade Commission PUBLIC MEETING,

For forty years now, our government has followed the repeatedly debunked and repeatedly failed economic policies of former US President and Alzheimers patient in chief Ronald Reagan. No matter whether there was a Republican or Democratic administration in the White House, our government followed Reagan's incompetent failed economic policies. They even continued to follow his policies after they resulted in multiple economic collapses.

His policies of tax cuts for the extreme rich and corporations has resulted in enough currency being removed from our economy due to their hoarding wealth that our country has a permanent trade imbalance, because it has made it cheaper to import goods instead of manufacture them here and too expensive to sell abroad.

His corporate merger policies which have allowed the rubberstamp approval of corporate mergers even when they violate our antitrust laws has resulted in permanent inflationary growth due to corporations being large enough to be able to price fix and price gauge with impunity. It has resulted in corporations large enough that they can't be regulated, because our fines are so minuscule to them that they consider them to be a cost of business. In terms of banks, they have become so large that they no longer desire to make loans to small businesses and Middle class on down borrowers. They only desire to make large loans to the rich and corporations.

Capital One, one of the largest banks in the U.S, announced a 35.3 billion dollar deal to acquire Discover Financial Services. This merger would add Discover's 305 million cardholder network to Capital One's existing 100 million customers, creating the nation's sixth largest bank with a massive impact on the credit card industry.

If approved, this mega-merger would lead to further consolidation of power and influence in the lending market at a time when our country needs a moratorium on corporate mergers and for our largest banks to be broken up. This concentration would make it harder to hold banks accountable due to them becoming too large to fail and too large to regulate while limiting competition and reducing banking options for consumers nationwide.

A healthy economy relies on robust competition, and a successful democracy requires an

economy that benefits all. This proposed merger poses a threat to both, hindering competition and economic inclusivity.

You should reject this corporate merger. You should announce that you will no longer approve any mergers which would violate our antitrust laws. And you should push for banks and corporations which do violate our antitrust laws to be broken up as a consequence of violating antitrust laws due to fines no longer being a deterrent.

The federal regulators must stop this mega-merger immediately.

Sincerely,

Michael Hinshaw

Federal Trade Commission PUBLIC MEETING,

Capital One, one of the largest banks in the U.S, announced a 35.3 billion dollar deal to acquire Discover Financial Services. This merger would add Discover's 305 million cardholder network to Capital One's existing 100 million customers, creating the nation's sixth largest bank with a massive impact on the credit card industry.

If approved, this mega-merger would lead to further consolidation of power and influence in the lending market. This concentration would make it harder to hold banks accountable while limiting competition and reducing banking options for consumers nationwide.

A healthy economy relies on robust competition, and a successful democracy requires an economy that benefits all. This proposed merger poses a threat to both, hindering competition and economic inclusivity.

The federal regulators must stop this mega-merger immediately.

Sincerely,

Angela Gardner

Federal Trade Commission PUBLIC MEETING,

Capital One, one of the largest banks in the U.S, announced a 35.3 billion dollar deal to acquire Discover Financial Services. This merger would add Discover's 305 million cardholder network to Capital One's existing 100 million customers, creating the nation's sixth largest bank with a massive impact on the credit card industry.

If approved, this mega-merger would lead to further consolidation of power and influence in the lending market. This concentration would make it harder to hold banks accountable while limiting competition and reducing banking options for consumers nationwide.

A healthy economy relies on robust competition, and a successful democracy requires an economy that benefits all. This proposed merger poses a threat to both, hindering competition and economic inclusivity.

The federal regulators must stop this mega-merger immediately.

Sincerely,

Andrew Kurzweil

Federal Trade Commission PUBLIC MEETING,

Capital One, one of the largest banks in the U.S, announced a 35.3 billion dollar deal to acquire Discover Financial Services. This merger would add Discover's 305 million cardholder network to Capital One's existing 100 million customers, creating the nation's sixth largest bank with a massive impact on the credit card industry.

If approved, this mega-merger would lead to further consolidation of power and influence in the lending market. This concentration would make it harder to hold banks accountable while limiting competition and reducing banking options for consumers nationwide.

A healthy economy relies on robust competition, and a successful democracy requires an economy that benefits all. This proposed merger poses a threat to both, hindering competition and economic inclusivity.

The federal regulators must stop this mega-merger immediately.

Sincerely,  
Arlene. Schutz

I live in Israel. Even here many of us use MasterCard so we can order certain things online from abroad. We can also send payments automatically and take cash out of the bank. And interest rates on any and every transaction are going up and up. Soon I won't be able to do anything but have the bank pay my utility bills and otherwise us cash for everything else around home. My goodness!

Sincerely,

Federal Trade Commission PUBLIC MEETING,

Capital One, one of the largest banks in the U.S, announced a 35.3 billion dollar deal to acquire Discover Financial Services. This merger would add Discover's 305 million cardholder network to Capital One's existing 100 million customers, creating the nation's sixth largest bank with a massive impact on the credit card industry.

If approved, this mega-merger would lead to further consolidation of power and influence in the lending market. This concentration would make it harder to hold banks accountable while limiting competition and reducing banking options for consumers nationwide.

A healthy economy relies on robust competition, and a successful democracy requires an economy that benefits all. This proposed merger poses a threat to both, hindering competition and economic inclusivity.

The federal regulators must stop this mega-merger immediately.

Sincerely,

CARL STEIN

EVERY ASPECT OF OUR COUNTRY THAT PROMOTES A HEALTHY ECONOMY AND DECENT FUFILLING LIFE FOR OUR CITIZENS, IS DISAPPEARING. MONEY HAS BECOME OUR "RULER", AND WE ARE FAILING. CORPORATE WEALTH HAS TAKEN CONTROL, AND HAS REPLACED THE "ROBBER BARONS" OF 100 YEARS AGO. WEALTH AND GREED HAVE REPLACED "RIGHTS", AND OUR COUNTRY IS ON THE BRINK OF A "SECOND GREAT DEPRESSION". HAVE WE LEARNED NOTHING IN THE LAST 100 YEARS?

The federal regulators must stop this mega-merger immediately.

Federal Trade Commission PUBLIC MEETING,

Capital One, one of the largest banks in the U.S, announced a 35.3 billion dollar deal to acquire Discover Financial Services. This merger would add Discover's 305 million cardholder network to Capital One's existing 100 million customers, creating the nation's sixth largest bank with a massive impact on the credit card industry.

If approved, this mega-merger would lead to further consolidation of power and influence in the lending market. This concentration would make it harder to hold banks accountable while limiting competition and reducing banking options for consumers nationwide.

A healthy economy relies on robust competition, and a successful democracy requires an economy that benefits all. This proposed merger poses a threat to both, hindering competition and economic inclusivity.

The federal regulators must stop this mega-merger immediately.

Sincerely,

Julie Grote

Federal Trade Commission PUBLIC MEETING,

Capital One, one of the largest banks in the U.S, announced a 35.3 billion dollar deal to acquire Discover Financial Services. This merger would add Discover's 305 million cardholder network to Capital One's existing 100 million customers, creating the nation's sixth largest bank with a massive impact on the credit card industry.

If approved, this mega-merger would lead to further consolidation of power and influence in the lending market. This concentration would make it harder to hold banks accountable while limiting competition and reducing banking options for consumers nationwide.

A healthy economy relies on robust competition, and a successful democracy requires an economy that benefits all. This proposed merger poses a threat to both, hindering competition and economic inclusivity.

The federal regulators must stop this mega-merger immediately.

Sincerely,

Mini Kaplan

Federal Trade Commission PUBLIC MEETING,

Capital One, one of the largest banks in the U.S, announced a 35.3 billion dollar deal to acquire Discover Financial Services. This merger would add Discover's 305 million cardholder network to Capital One's existing 100 million customers, creating the nation's sixth largest bank with a massive impact on the credit card industry.

If approved, this mega-merger would lead to further consolidation of power and influence in the lending market. This concentration would make it harder to hold banks accountable while limiting competition and reducing banking options for consumers nationwide.

A healthy economy relies on robust competition, and a successful democracy requires an economy that benefits all. This proposed merger poses a threat to both, hindering competition and economic inclusivity.

The federal regulators must stop this mega-merger immediately. My monthly interest rate is 28.24%. That is a horrendous burden and very difficult to get paid off in a short amount of time. I am counting on you to stop this merger and attempt to get these horrendous interest rates lowered so we the people can pay them off;

Sincerely,

Frances Davis  
crrfran1936@gmail.com

Federal Trade Commission PUBLIC MEETING,

Capital One, one of the largest banks in the U.S, announced a 35.3 billion dollar deal to acquire Discover Financial Services. This merger would add Discover's 305 million cardholder network to Capital One's existing 100 million customers, creating the nation's sixth largest bank with a massive impact on the credit card industry.

If approved, this mega-merger would lead to further consolidation of power and influence in the lending market. This concentration would make it harder to hold banks accountable while limiting competition and reducing banking options for consumers nationwide.

A healthy economy relies on robust competition, and a successful democracy requires an economy that benefits all. This proposed merger poses a threat to both, hindering competition and economic inclusivity.

The federal regulators must stop this mega-merger immediately.

Sincerely,

Stuart Newberg

Capital One, one of the largest banks in the U.S, announced a 35.3 billion dollar deal to acquire Discover Financial Services. This merger would add Discover's 305 million cardholder network to Capital One's existing 100 million customers, creating the nation's sixth largest bank with a massive impact on the credit card industry.

If approved, this mega-merger would lead to further consolidation of power and influence in the lending market. This concentration would make it harder to hold banks accountable while limiting competition and reducing banking options for consumers nationwide.

A healthy economy relies on robust competition, and a successful democracy requires an economy that benefits all. This proposed merger poses a threat to both, hindering competition and economic inclusivity.

The federal regulators must stop this mega-merger immediately.

Sincerely,

Edward Pate

This merger would add Discover's 305 million cardholder network to Capital One's existing 100 million customers, creating the nation's sixth largest bank with a massive impact on the credit card industry.

If approved, this mega-merger would lead to further consolidation of power and influence in the lending market. This concentration would make it harder to hold banks accountable while limiting competition and reducing banking options for consumers nationwide.

A healthy economy relies on robust competition, and a successful democracy requires an economy that benefits all. This proposed merger poses a threat to both, hindering competition and economic inclusivity.

The federal regulators must stop this mega-merger immediately.

Sincerely,

Federal Trade Commission PUBLIC MEETING,

Capital One, one of the largest banks in the U.S, announced a 35.3 billion dollar deal to acquire Discover Financial Services. This merger would add Discover's 305 million cardholder network to Capital One's existing 100 million customers, creating the nation's sixth largest bank with a massive impact on the credit card industry.

If approved, this mega-merger would lead to further consolidation of power and influence in the lending market. This concentration would make it harder to hold banks accountable while limiting competition and reducing banking options for consumers nationwide.

A healthy economy relies on robust competition, and a successful democracy requires an economy that benefits all. This proposed merger poses a threat to both, hindering competition and economic inclusivity.

The federal regulators must stop this mega-merger immediately.

Federal Trade Commission PUBLIC MEETING,

We need more competition not less.

Stop putting corporate profits over the welfare of the public. We have sacrificed too much in corporate welfare with tiny taxes on the affluent banker class and corporations, and letting (unwillingly) legislation and codes be written by and to the benefit of the banker class to the detriment of our citizens and country.

Why allow further concentration of money, power, and control over our government? This is disgusting and disappointing as a long-term Discover card user.

Can't you do ONE thing that puts people over profits and puts our democracy over profits?

Capital One, one of the largest banks in the U.S, announced a 35.3 billion dollar deal to acquire Discover Financial Services. This merger would add Discover's 305 million cardholder network to Capital One's existing 100 million customers, creating the nation's sixth largest bank with a massive impact on the credit card industry.

Federal Trade Commission PUBLIC MEETING,

As someone who has utilized credit to make significant and necessary investments and purchases over the years, the variety of changes has seemed senseless and far out of my control as a consumer and a business. I fail to see how further consolidation of Capital One and Discover would benefit us by reducing our options and allowing yet another conglomerate to simply play the same tune as everyone else in the credit space. Furthermore, attempts to hold these conglomerates to account for any malfeasance will ring hollow as paltry class action lawsuits for consumers.

If the health of our economy relies upon robust competition, and a successful democracy requires that an economy benefits all, we must not allow this precedent to continue. Reversing course will be radically more difficult from this point on.

So please understand that this proposed merger poses a threat to both, hindering competition and economic inclusivity.

And please stop this mega-merger immediately.

Sincerely,  
Danny Chau

Federal Trade Commission PUBLIC MEETING,

Capital One, one of the largest banks in the U.S, announced a 35.3 billion dollar deal to acquire Discover Financial Services. This merger would add Discover's 305 million cardholder network to Capital One's existing 100 million customers, creating the nation's sixth largest bank with a massive impact on the credit card industry.

If approved, this mega-merger would lead to further consolidation of power and influence in the lending market. This concentration would make it harder to hold banks accountable while limiting competition and reducing banking options for consumers nationwide.

A healthy economy relies on robust competition, and a successful democracy requires an economy that benefits all. This proposed merger poses a threat to both, hindering competition and economic inclusivity.

This adversely affects people who are struggling to make monthly credit card payments by charging interest rates and unfairly competing with smaller banks and credit unions that offer more reasonable interest rates and plans.

The federal regulators must stop this mega-merger immediately.

Sincerely,

Margaret Graham

Federal Trade Commission PUBLIC MEETING,

My name is Stephanie, and I live in Pomona, California. I work for a small family farm at the farmer's market, and every week, when my customer's pay with credit cards or digital credit cards, I let them know that there will be a 4% credit fee added to their total. 4% adds up to a lot pretty quickly, which is why the credit companies are doing so well, while many individuals are feeling squeezed.

I have learned that Capital One, one of the largest banks in the U.S, announced a 35.3 billion dollar deal to acquire Discover Financial Services. This merger would add Discover's 305 million cardholder network to Capital One's existing 100 million customers, creating the nation's sixth largest bank with a massive impact on the credit card industry. This concentration would make it harder to hold banks accountable, while limiting competition and reducing banking options for consumers nationwide.

This increased concentration will lead to a less healthy and robust economy, and further reduction in the economic wellbeing of the vast majority of citizens.

I urge the federal regulators to stop this mega-merger immediately.

Sincerely,  
Stephanie Knol

Federal Trade Commission PUBLIC MEETING,

Capital One, one of the largest banks in the U.S, announced a 35.3 billion dollar deal to acquire Discover Financial Services. This merger would add Discover's 305 million cardholder network to Capital One's existing 100 million customers, creating the nation's sixth largest bank with a massive impact on the credit card industry.

If approved, this mega-merger would lead to further consolidation of power and influence in the lending market. This concentration would make it harder to hold banks accountable while limiting competition and reducing banking options for consumers nationwide.

A healthy economy relies on robust competition, and a successful democracy requires an economy that benefits all. This proposed merger poses a threat to both, hindering competition and economic inclusivity.

The federal regulators must stop this mega-merger immediately.

Sincerely,

Clover Krajicek

Capital One, one of the largest banks in the U.S, announced a 35.3 billion dollar deal to acquire Discover Financial Services. This merger would add Discover's 305 million cardholder network to Capital One's existing 100 million customers, creating the nation's sixth largest bank with a massive impact on the credit card industry.

If approved, this mega-merger would lead to further consolidation of power and influence in the lending market. This concentration would make it harder to hold banks accountable while limiting competition and reducing banking options for consumers nationwide.

A healthy economy relies on robust competition, and a successful democracy requires an economy that benefits all. This proposed merger poses a threat to both, hindering competition and economic inclusivity.

The federal regulators must stop this mega-merger immediately.

Sincerely,

Ayesha Anthony

Federal Trade Commission PUBLIC MEETING,

I am outraged by the move of Capital One to acquire Discover Financial Services and am VEHMENTLY OPPOSED to this merger for the sake of consumers and small businesses who are already being gauged by exorbitant user fees that provide billions to in profits to the credit card moguls and their shareholders. The middle class is ever shrinking and the poor can barely survive in the cutthroat economy of mega monopolies. What happened to enforcing antitrust laws?

Capital One, one of the largest banks in the U.S, announced a 35.3 billion dollar deal to acquire Discover Financial Services. Federal Trade Commission PUBLIC MEETING,

Capital One, one of the largest banks in the U.S, announced a 35.3 billion dollar deal to acquire Discover Financial Services. This merger would add Discover's 305 million cardholder network to Capital One's existing 100 million customers, creating the nation's sixth largest bank with a massive impact on the credit card industry.

If approved, this mega-merger would lead to further consolidation of power and influence in the lending market. This concentration would make it harder to hold banks accountable while limiting competition and reducing banking options for consumers nationwide.

A healthy economy relies on robust competition, and a successful democracy requires an economy that benefits all. This proposed merger poses a threat to both, hindering competition and economic inclusivity.

The federal regulators must stop this mega-merger immediately.

Sincerely,

Diane Gibeau

Federal Trade Commission PUBLIC MEETING,

Capital One, one of the largest banks in the U.S, announced a 35.3 billion dollar deal to acquire Discover Financial Services. This merger would add Discover's 305 million cardholder network to Capital One's existing 100 million customers, creating the nation's sixth largest bank with a massive impact on the credit card industry.

If approved, this mega-merger would lead to further consolidation of power and influence in the lending market. This concentration would make it harder to hold banks accountable while limiting competition and reducing banking options for consumers nationwide.

A healthy economy relies on robust competition, and a successful democracy requires an economy that benefits all. This proposed merger poses a threat to both, hindering competition and economic inclusivity.

The federal regulators must stop this mega-merger immediately.

Sincerely,

Maureen Harazin

This merger would add Discover's 305 million cardholder network to Capital One's existing 100 million customers, creating the nation's sixth largest bank with a massive impact on the credit card industry.

If approved, this mega-merger would lead to further consolidation of power and influence in the lending market. This concentration would make it harder to hold banks accountable while limiting competition and reducing banking options for consumers nationwide.

A healthy economy relies on robust competition, and a successful democracy requires an economy that benefits all. This proposed merger poses a threat to both, hindering competition and economic inclusivity.

The federal regulators must stop this mega-merger immediately.

Sincerely,

Federal Trade Commission PUBLIC MEETING,

Capital One, one of the largest banks in the U.S, announced a 35.3 billion dollar deal to acquire Discover Financial Services. This merger would add Discover's 305 million cardholder network to Capital One's existing 100 million customers, creating the nation's sixth largest bank with a massive impact on the credit card industry.

If approved, this mega-merger would lead to further consolidation of power and influence in the lending market. This concentration would make it harder to hold banks accountable while limiting competition and reducing banking options for consumers nationwide.

A healthy economy relies on robust competition, and a successful democracy requires an economy that benefits all. This proposed merger poses a threat to both, hindering competition and economic inclusivity.

The federal regulators must stop this mega-merger immediately.

We must stop this move toward Oligarchy with this merger of Capital One and Discover Financial Services. This is nothing less than more greedy consolidation for the profits of Capital One's CEO and thier greedy shareholders. Stop this move toward Oligarchy with this merger of Capital One and Discover FS, NOW!!!

If approved, this mega-merger would lead to further consolidation of power and influence in the lending market. This concentration would make it harder to hold banks accountable while limiting competition and reducing banking options for consumers nationwide.

A healthy economy relies on robust competition, and a successful democracy requires an economy that benefits all. This proposed merger poses a threat to both, hindering competition and economic inclusivity.

Capital One, one of the largest banks in the U.S, announced a 35.3 billion dollar deal to acquire Discover Financial Services. This merger would add Discover's 305 million cardholder network to Capital One's existing 100 million customers, creating the nation's sixth largest bank with a massive impact on the credit card industry.

If approved, this mega-merger would lead to further consolidation of power and influence in the lending market. This concentration would make it harder to hold banks accountable while limiting competition and reducing banking options for consumers nationwide.

A healthy economy relies on robust competition, and a successful democracy requires an economy that benefits all. This proposed merger poses a threat to both, hindering competition and economic inclusivity.

The federal regulators must stop this mega-merger immediately.

Sincerely,

Nicholas Oscar

Capital One, one of the largest banks in the U.S, announced a 35.3 billion dollar deal to acquire Discover Financial Services. This merger would add Discover's 305 million cardholder network to Capital One's existing 100 million customers, creating the nation's sixth largest bank with a massive impact on the credit card industry.

If approved, this mega-merger would lead to further consolidation of power and influence in the lending market. This concentration would make it harder to hold banks accountable while limiting competition and reducing banking options for consumers nationwide.

A healthy economy relies on robust competition, and a successful democracy requires an economy that benefits all. This proposed merger poses a threat to both, hindering competition and economic inclusivity.

The federal regulators must stop this mega-merger immediately.

Sincerely,

Debra Kern

I am tired of these companies being supported by our elected officials. Americans need help due to the greed of our American companies and this is a great example. These companies don't pay taxes, their CEO's don't pay taxes either but they grab Americans and chock them to death with junk fees! The way business is done in this country is disgusting. There is no honor, or ethics left in governing and the best example of that is Congress.

A healthy economy relies on robust competition, and a successful democracy requires an economy that benefits all. This proposed merger poses a threat to both, hindering competition and economic inclusivity.

Federal Trade Commission PUBLIC MEETING,

Capital One, one of the largest banks in the U.S, announced a 35.3 billion dollar deal to acquire Discover Financial Services. This merger would add Discover's 305 million cardholder network to Capital One's existing 100 million customers, creating the nation's sixth largest bank with a massive impact on the credit card industry.

If approved, this mega-merger would lead to further consolidation of power and influence in the lending market. This concentration would make it harder to hold banks accountable while limiting competition and reducing banking options for consumers nationwide.

A healthy economy relies on robust competition, and a successful democracy requires an economy that benefits all. This proposed merger poses a threat to both, hindering competition and economic inclusivity.

The federal regulators must stop this mega-merger immediately.

Sincerely,

Terry Campbell

Capital One, one of the largest banks in the U.S, announced a 35.3 billion dollar deal to acquire Discover Financial Services. This merger would add Discover's 305 million cardholder network to Capital One's existing 100 million customers, creating the nation's sixth largest bank with a massive impact on the credit card industry.

If approved, this mega-merger would lead to further consolidation of power and influence in the lending market. This concentration would make it harder to hold banks accountable while limiting competition and reducing banking options for consumers nationwide.

A healthy economy relies on robust competition, and a successful democracy requires an economy that benefits all. This proposed merger poses a threat to both, hindering competition and economic inclusivity.

The federal regulators must stop this mega-merger immediately.

Sincerely,

Patricia Williamson

Capital One, one of the largest banks in the U.S, announced a 35.3 billion dollar deal to acquire Discover Financial Services. This merger would add Discover's 305 million cardholder network to Capital One's existing 100 million customers, creating the nation's sixth largest bank with a massive impact on the credit card industry.

If approved, this mega-merger would lead to further consolidation of power and influence in the lending market. This concentration would make it harder to hold banks accountable while limiting competition and reducing banking options for consumers nationwide.

A healthy economy relies on robust competition, and a successful democracy requires an economy that benefits all. This proposed merger poses a threat to both, hindering competition and economic inclusivity.

The federal regulators must stop this mega-merger immediately.

Sincerely,

Mark Gotvald

Federal Trade Commission PUBLIC MEETING,

Capital One, one of the largest banks in the U.S, announced a 35.3 billion dollar deal to acquire Discover Financial Services. This merger would add Discover's 305 million cardholder network to Capital One's existing 100 million customers, creating the nation's sixth largest bank with a massive impact on the credit card industry. As a Discover card member I don't see any advantage to creating a huge new company that can dictate terms and conditions to cardholders such as myself.

If approved, this mega-merger would lead to further consolidation of power and influence in the lending market. This concentration would make it harder to hold banks accountable while limiting competition and reducing banking options for consumers nationwide. We need smaller, more regional, and local banks to help people with loans, and other financial transactions. We don't need another mega-bank.

A healthy economy relies on robust competition, and a successful democracy requires an economy that benefits all. This proposed merger poses a threat to both, hindering competition and economic inclusivity.

The federal regulators must stop this mega-merger immediately.

Sincerely,

Ken Gigliello
