Overnight Reverse Repurchase Agreement Resolution

September 17, 2013
Overnight Reverse Repurchase Agreement Resolution
September 17, 2013

“The Federal Open Market Committee (FOMC) authorizes the Federal Reserve Bank of New York to conduct a series of fixed-rate, overnight reverse repurchase operations involving U.S. Government securities, and securities that are direct obligations of, or fully guaranteed as to principal and interest by, any agency of the United States, for the purpose of assessing operational readiness. The reverse repurchase operations authorized by this resolution shall be (i) offered at a fixed rate that may vary from zero to five basis points, (ii) offered at up to a capped allotment per counterparty of $1 billion per day and (iii) for an overnight term, or such longer term as is warranted to accommodate weekend, holiday, and similar trading conventions. The System Open Market Account Manager will inform the FOMC in advance of the terms of the planned operations. These operations may be announced when authorized by the Chairman, may begin when authorized by the Chairman on or after September 23, 2013, and shall be authorized through the FOMC meeting that ends on January 29, 2014.”
Appendix 3: Materials used by Mr. Wilcox

Material for
Forecast Summary

David Wilcox
September 17, 2013
Forecast Summary
Confidence Intervals Based on FRB/US Stochastic Simulations

**Real GDP**
Percent change, annual rate

- September TB
- July TB
- 70% confidence interval

**GDP Gap**
Percent

- Effects of emergency unemployment compensation and state-federal extended benefit programs.

**PCE Prices Excluding Food and Energy**
Percent change, annual rate

**Unemployment Rate**
Percent

- Natural Rate with EEB*

**Total Payroll Employment**
Millions

- September TB
- July TB
- September 2012 TB

**Alternative Measures of Labor Market Slack**
Percentage points

- Unemployment rate gap
- Job availability (Conference Board)*
- Jobs hard-to-fill (NFIB survey)*

*Index levels normalized to have same mean and standard deviation as staff unemployment gap.

Exhibit 2

Indicators of Vulnerabilities

Price to Rent Ratio

Private Nonfinancial Sector Credit-to-GDP Ratio

Regulatory Capital Ratios at BHCs

Net Short-term Wholesale Debt of Financial Sector-to-GDP Ratio

Summary

- The cyclical vulnerability of the financial system appears moderate
- A number of potential shocks could prove challenging - for example, related to the debt ceiling, EMEs, and geopolitical risks
- Staff continue to pursue initiatives related to those pockets of concern we have identified
  - Evaluate risk management at agency REITs
  - Ensure compliance of banks with the recent guidance for leveraged-loan issuance
  - Scrutinize interest-rate risk at banks
  - Evaluate exposures to emerging market economies

Class I FOMC – Restricted Controlled (FR)

Material for
FOMC Briefing on Monetary Policy Alternatives

Steve Meyer
September 17-18, 2013
Summary of Economic Projections and Market Expectations

Key Questions

- Is June "economic scenario" still most likely?
- When will the FOMC cut the pace of purchases?
- Will the Committee change its forward guidance?

Unemployment Rate

Total PCE Prices

SEP Balance Sheet Projections

- 12 participants see a cut in pace this year and purchases ending around mid-2014 as in Tealbook
- 3 see larger total purchases or later tapering
- 2 see earlier end and smaller total purchases

Modal Timing of First Pace Reduction

Possible Changes to Forward Guidance

- Lower unemployment rate threshold
- Inflation "floor"
- Post-threshold guidance
- Post-liftoff guidance
JULY FOMC STATEMENT

1. Information received since the Federal Open Market Committee met in June suggests that economic activity expanded at a modest pace during the first half of the year. Labor market conditions have shown further improvement in recent months, on balance, but the unemployment rate remains elevated. Household spending and business fixed investment advanced, and the housing sector has been strengthening, but mortgage rates have risen somewhat and fiscal policy is restraining economic growth. Partly reflecting transitory influences, inflation has been running below the Committee’s longer-run objective, but longer-term inflation expectations have remained stable.

2. Consistent with its statutory mandate, the Committee seeks to foster maximum employment and price stability. The Committee expects that, with appropriate policy accommodation, economic growth will pick up from its recent pace and the unemployment rate will gradually decline toward levels the Committee judges consistent with its dual mandate. The Committee sees the downside risks to the outlook for the economy and the labor market as having diminished since the fall. The Committee recognizes that inflation persistently below its 2 percent objective could pose risks to economic performance, but it anticipates that inflation will move back toward its objective over the medium term.

3. To support a stronger economic recovery and to help ensure that inflation, over time, is at the rate most consistent with its dual mandate, the Committee decided to continue purchasing additional agency mortgage-backed securities at a pace of $40 billion per month and longer-term Treasury securities at a pace of $45 billion per month. The Committee is maintaining its existing policy of reinvesting principal payments from its holdings of agency debt and agency mortgage-backed securities in agency mortgage-backed securities and of rolling over maturing Treasury securities at auction. Taken together, these actions should maintain downward pressure on longer-term interest rates, support mortgage markets, and help to make broader financial conditions more accommodative.

4. The Committee will closely monitor incoming information on economic and financial developments in coming months. The Committee will continue its purchases of Treasury and agency mortgage-backed securities, and employ its other policy tools as appropriate, until the outlook for the labor market has improved substantially in a context of price stability. The Committee is prepared to increase or reduce the pace of its purchases to maintain appropriate policy accommodation as the outlook for the labor market or inflation changes. In determining the size, pace, and composition of its asset purchases, the Committee will continue to take appropriate account of the likely efficacy and costs of such purchases as well as the extent of progress toward its economic objectives.

5. To support continued progress toward maximum employment and price stability, the Committee today reaffirmed its view that a highly accommodative stance of monetary policy will remain appropriate for a considerable time after the asset purchase program ends and the economic recovery strengthens. In particular, the Committee decided to keep the target range for the federal funds rate at 0 to ¼ percent and currently anticipates that this exceptionally low range for the federal funds rate will be appropriate at least as long as the unemployment rate remains above 6½ percent, inflation between one and two years ahead is projected to be no more than a half percentage point above the Committee’s 2
percent longer-run goal, and longer-term inflation expectations continue to be well anchored. In determining how long to maintain a highly accommodative stance of monetary policy, the Committee will also consider other information, including additional measures of labor market conditions, indicators of inflation pressures and inflation expectations, and readings on financial developments. When the Committee decides to begin to remove policy accommodation, it will take a balanced approach consistent with its longer-run goals of maximum employment and inflation of 2 percent.
FOMC STATEMENT—SEPTEMBER 2013 ALTERNATIVE A

1. Information received since the Federal Open Market Committee met in June suggests that economic activity has been expanding at a modest pace during the first half of the year. Some indicators of labor market conditions have shown further improvement in recent months, on balance, but the unemployment rate remains elevated and job gains appear to have slowed somewhat. Household spending and business fixed investment advanced, and the housing sector has been strengthening, but mortgage rates have risen somewhat further and fiscal policy is restraining economic growth. Partly reflecting transitory influences, inflation has been running below the Committee’s longer-run objective, but longer-term inflation expectations have remained stable.

2. Consistent with its statutory mandate, the Committee seeks to foster maximum employment and price stability. The Committee expects that, with appropriate policy accommodation, economic growth will pick up from its recent pace and the unemployment rate will gradually decline toward levels the Committee judges consistent with its dual mandate. The Committee sees the downside risks to the outlook for the economy and the labor market as having diminished since the last fall, but the tightening of financial conditions observed in recent months, if sustained, could slow the pace of improvement in the economy and labor market. The Committee recognizes that inflation persistently below its 2 percent objective could pose risks to economic performance, but it anticipates that inflation will move back toward its objective over the medium term.

3. The Committee judges that the improvement in the outlook for the labor market and the extent of progress toward its economic objectives since it began its current asset purchase program are not yet sufficient to warrant an adjustment in the pace at which it is adding to its holdings of longer-term securities. To support a stronger economic recovery and to help ensure that inflation, over time, is at the rate most consistent with its dual mandate, the Committee decided to continue purchasing additional agency mortgage-backed securities at a pace of $40 billion per month and longer-term Treasury securities at a pace of $45 billion per month. The Committee is maintaining its existing policy of reinvesting principal payments from its holdings of agency debt and agency mortgage-backed securities in agency mortgage-backed securities and of rolling over maturing Treasury securities at auction. Taken together, these actions should maintain downward pressure on longer-term interest rates, support mortgage markets, and help to make broader financial conditions more accommodative, which in turn should promote a stronger economic recovery and help to ensure that inflation, over time, is at the rate most consistent with the Committee’s dual mandate.

4. The Committee will closely monitor incoming information on economic and financial developments in coming months and The Committee will continue its purchases of Treasury and agency mortgage-backed securities, and employ its other policy tools as appropriate, until the outlook for the labor market has improved substantially in a context of price stability. The Committee is prepared to increase or reduce the pace of its purchases to maintain appropriate policy accommodation as the outlook for the labor market or inflation changes. In determining the size, pace, and composition of its asset
purchases, the Committee will continue to take appropriate account of the likely efficacy and costs of such purchases as well as the extent of progress toward its economic objectives. At such time as the Committee sees sufficient progress toward its objectives for the labor market and inflation, some moderation in the pace of its securities purchases will become appropriate. Asset purchases are not on a preset course, and the Committee’s decisions about their pace will remain contingent on the Committee’s economic outlook as well as its assessment of the likely efficacy and costs of such purchases.

5. To support continued progress toward maximum employment and price stability, the Committee today reaffirmed its view that a highly accommodative stance of monetary policy will remain appropriate for a considerable time after the asset purchase program ends and the economic recovery strengthens. In particular, the Committee decided to keep the target range for the federal funds rate at 0 to ¼ percent and currently anticipates that this exceptionally low range for the federal funds rate will be appropriate at least as long as the unemployment rate remains above 6½ percent, inflation between one and two years ahead is projected to be no more than a half percentage point above the Committee’s 2 percent longer-run goal, and longer-term inflation expectations continue to be well anchored. Moreover, the Committee anticipates that it would not raise its target for the federal funds rate if inflation between one and two years ahead were projected to be below 1¾ percent. In determining how long to maintain a highly accommodative stance of monetary policy, the Committee will also consider other information, including

Once the unemployment rate reaches 6 percent, and assuming inflation is well contained at that time, the Committee will consider a broad set of indicators in determining how long to maintain a highly accommodative stance of monetary policy. Relevant factors include additional measures of labor market conditions such as the level and growth of employment, indicators of inflation pressures and inflation expectations, and readings on financial developments. When the Committee decides to begin to remove policy accommodation, it will take a balanced approach consistent with its longer-run goals of maximum employment and inflation of 2 percent. Moreover, the Committee currently anticipates that it will be appropriate to normalize the federal funds rate only gradually because ongoing headwinds are likely to take a considerable time to abate fully, even after the economy has reached maximum employment and inflation has returned to its longer-run objective, it will likely be appropriate for the federal funds rate target to remain below its longer-run normal value as persistent headwinds abate.
FOMC STATEMENT—SEPTEMBER 2013 ALTERNATIVE B

1. Information received since the Federal Open Market Committee met in June suggests that economic activity has been expanding at a modest pace during the first half of the year. Some indicators of labor market conditions have shown further improvement in recent months, on balance, but the unemployment rate remains elevated. Household spending and business fixed investment advanced, and the housing sector has been strengthening, but mortgage rates have risen somewhat and fiscal policy is restraining economic growth. Partly reflecting transitory influences, inflation has been running below the Committee’s longer-run objective, but longer-term inflation expectations have remained stable.

2. Consistent with its statutory mandate, the Committee seeks to foster maximum employment and price stability. The Committee expects that, with appropriate policy accommodation, economic growth will pick up from its recent pace and the unemployment rate will gradually decline toward levels the Committee judges consistent with its dual mandate. The Committee sees the downside risks to the outlook for the economy and the labor market as having diminished since the last fall, but the tightening of financial conditions observed in recent months, if sustained, could slow the pace of improvement in the economy and labor market. The Committee recognizes that inflation persistently below its 2 percent objective could pose risks to economic performance, but it anticipates that inflation will move back toward its objective over the medium term.

3. Taking into account the extent of federal fiscal retrenchment, the Committee sees the improvement in economic activity and labor market conditions since it began its asset purchase program a year ago as consistent with growing underlying strength in the broader economy. However, the Committee decided to await more evidence that progress will be sustained before adjusting the pace of its purchases. To support stronger economic recovery and to help ensure that inflation, over time, is at the rate most consistent with its dual mandate, the Committee decided to continue purchasing additional agency mortgage-backed securities at a pace of $40 billion per month and longer-term Treasury securities at a pace of $45 billion per month. The Committee is maintaining its existing policy of reinvesting principal payments from its holdings of agency debt and agency mortgage-backed securities in agency mortgage-backed securities and of rolling over maturing Treasury securities at auction. Taken together, these actions should maintain downward pressure on longer-term interest rates, support mortgage markets, and help to make broader financial conditions more accommodative, which in turn should promote a stronger economic recovery and help to ensure that inflation, over time, is at the rate most consistent with the Committee’s dual mandate.

4. The Committee will closely monitor incoming information on economic and financial developments in coming months and The Committee will continue its purchases of Treasury and agency mortgage-backed securities, and employ its other policy tools as appropriate, until the outlook for the labor market has improved substantially in a context of price stability. The Committee is prepared to increase or reduce the pace of its purchases to maintain appropriate policy accommodation as the outlook for the labor market evolves.
market or inflation changes. In determining the size, pace, and composition of its asset purchases, the Committee will continue to take appropriate account of the likely efficacy and costs of such purchases as well as the extent of progress toward its economic objectives. In judging when to moderate the pace of asset purchases, the Committee will be looking for further evidence consistent with assessing whether incoming information continues to support the Committee’s expectation of ongoing improvement in labor market conditions and inflation moving back toward its longer-run objective. Asset purchases are not on a preset course, and the Committee’s decisions about their pace will remain contingent on the Committee’s economic outlook as well as its assessment of the likely efficacy and costs of such purchases.

5. To support continued progress toward maximum employment and price stability, the Committee today reaffirmed its view that a highly accommodative stance of monetary policy will remain appropriate for a considerable time after the asset purchase program ends and the economic recovery strengthens. In particular, the Committee decided to keep the target range for the federal funds rate at 0 to ¼ percent and currently anticipates that this exceptionally low range for the federal funds rate will be appropriate at least as long as the unemployment rate remains above 6½ percent, inflation between one and two years ahead is projected to be no more than a half percentage point above the Committee’s 2 percent longer-run goal, and longer-term inflation expectations continue to be well anchored. In determining how long to maintain a highly accommodative stance of monetary policy, the Committee will also consider other information, including additional measures of labor market conditions, indicators of inflation pressures and inflation expectations, and readings on financial developments. When the Committee decides to begin to remove policy accommodation, it will take a balanced approach consistent with its longer-run goals of maximum employment and inflation of 2 percent. Moreover, the Committee currently anticipates that it will be appropriate to normalize the federal funds rate only gradually because ongoing headwinds are likely to take a considerable time to abate fully, even after the economy has reached maximum employment and inflation has returned to its longer-run objective, it will likely be appropriate for the federal funds rate target to remain below its longer-run normal value as persistent headwinds abate. ]
FOMC STATEMENT—SEPTEMBER 2013 ALTERNATIVE C

1. Information received since the Federal Open Market Committee met in June suggests that economic activity is expanding at a modest pace during the first half of the year. Labor market conditions have shown further improvement in recent months, on balance, with continuing gains in payroll employment, but although the unemployment rate remains elevated. Household spending and business fixed investment advanced, and the housing sector has been strengthening, but continued to strengthen, even though mortgage rates have risen somewhat further and fiscal policy is restraining economic growth. Partly reflecting transitory influences, inflation has been running somewhat below the Committee’s longer-run objective, but lower-term inflation expectations have remained stable.

2. Consistent with its statutory mandate, the Committee seeks to foster maximum employment and price stability. The Committee expects that, with appropriate policy accommodation, economic growth will pick up from its recent pace and the unemployment rate will gradually decline toward levels the Committee judges consistent with its dual mandate. The Committee sees the downside risks to the outlook for the economy and the labor market as having diminished since the last fall and has become more confident that labor market conditions will continue to improve over the medium term. The Committee recognizes that inflation persistently below its 2 percent objective could pose risks to economic performance, but it also anticipates that inflation will move back toward its 2 percent objective over the medium term.

3. To support a stronger economic recovery and to help ensure that inflation, over time, is at the rate most consistent with its dual mandate, the Committee decided to continue purchasing additional agency mortgage-backed securities at a pace of $40 billion per month and longer-term Treasury securities at a pace of $45 billion per month. In light of the improvement in the labor market since the Committee began its current asset purchase program a year ago, the Committee decided today to make modest downward adjustments in its asset purchases, to a monthly pace of $35 billion from $40 billion for its purchases of additional agency mortgage-backed securities, and to a monthly pace of $40 billion from $45 billion for longer-term Treasury securities. The Committee is maintaining its existing policy of reinvesting principal payments from its holdings of agency debt and agency mortgage-backed securities in agency mortgage-backed securities and of rolling over maturing Treasury securities at auction. Taken together, these actions should maintain downward pressure on longer-term interest rates, support mortgage markets, and help to make broader financial conditions more accommodative, which in turn should promote a stronger economic recovery and help to ensure that inflation, over time, is at the rate most consistent with the Committee’s dual mandate.

4. The Committee will closely monitor incoming information on economic and financial developments in coming months and will continue its purchases of Treasury and agency mortgage-backed securities, and employ its other policy tools as appropriate, until the outlook for the labor market has improved substantially in a context of price stability. If the Committee sees continued improvement in labor market conditions and inflation moving back toward its longer-run objective, then
additional measured reductions in the pace of asset purchases likely would become appropriate. However, asset purchases are not on a preset course, and the Committee’s decisions about their pace will remain contingent on the Committee’s economic outlook as well as its assessment of the likely efficacy and costs of such purchases. The Committee is prepared to increase or reduce the pace of its purchases to maintain appropriate policy accommodation as the outlook for the labor market or inflation changes. In determining the size, pace, and composition of its asset purchases, the Committee will continue to take appropriate account of the likely efficacy and costs of such purchases as well as the extent of progress toward its economic objectives.

OR

4’. The Committee will closely monitor incoming information on economic and financial developments in coming months. If the Committee sees sufficient further progress toward its objectives for the labor market and inflation, as it expects, then additional measured reductions in the pace of asset purchases would become appropriate. The Committee will continue its purchases of Treasury and agency mortgage-backed securities, and employ its other policy tools as appropriate, until the outlook for the labor market has improved substantially in a context of price stability. In particular, the Committee anticipates that by the time its asset purchases end, the unemployment rate will be around 7 percent and expected to decline further, and inflation will be moving back toward its 2 percent longer-run goal. The Committee is prepared to increase or reduce the pace of its purchases to maintain appropriate policy accommodation as the outlook for the labor market or inflation changes. In determining the size, pace, and composition of its asset purchases, the Committee will continue to take appropriate account of the likely efficacy and costs of such purchases as well as the extent of progress toward its economic objectives. However, asset purchases are not on a preset course, and the Committee’s decisions about their pace will remain contingent on its economic outlook as well as its assessment of the likely efficacy and costs of such purchases.

5. To support continued progress toward maximum employment and price stability, the Committee today reaffirmed its view that a highly accommodative stance of monetary policy will remain appropriate for a considerable time after the asset purchase program ends and the economic recovery strengthens. In particular, the Committee decided to keep the target range for the federal funds rate at 0 to ¼ percent and currently anticipates that this exceptionally low range for the federal funds rate will be appropriate at least as long as the unemployment rate remains above 6½ percent, inflation between one and two years ahead is projected to be no more than a half percentage point above the Committee’s 2 percent longer-run goal, and longer-term inflation expectations continue to be well anchored. In determining how long to maintain a highly accommodative stance of monetary policy, the Committee will also consider other information, including additional measures of labor market conditions, indicators of inflation pressures and inflation expectations, and readings on financial developments. When the Committee decides to begin to remove policy accommodation, it will take a balanced approach consistent with its longer-run goals of maximum employment and inflation of 2 percent.
**JULY 2013 DIRECTIVE**

Consistent with its statutory mandate, the Federal Open Market Committee seeks monetary and financial conditions that will foster maximum employment and price stability. In particular, the Committee seeks conditions in reserve markets consistent with federal funds trading in a range from 0 to ¼ percent. The Committee directs the Desk to undertake open market operations as necessary to maintain such conditions. The Desk is directed to continue purchasing longer-term Treasury securities at a pace of about $45 billion per month and to continue purchasing agency mortgage-backed securities at a pace of about $40 billion per month. The Committee also directs the Desk to engage in dollar roll and coupon swap transactions as necessary to facilitate settlement of the Federal Reserve’s agency mortgage-backed securities transactions. The Committee directs the Desk to maintain its policy of rolling over maturing Treasury securities into new issues and its policy of reinvesting principal payments on all agency debt and agency mortgage-backed securities in agency mortgage-backed securities. The System Open Market Account Manager and the Secretary will keep the Committee informed of ongoing developments regarding the System’s balance sheet that could affect the attainment over time of the Committee’s objectives of maximum employment and price stability.
