

Prefatory Note

The attached document represents the most complete and accurate version available based on original copies culled from the files of the FOMC Secretariat at the Board of Governors of the Federal Reserve System. This electronic document was created through a comprehensive digitization process which included identifying the best-preserved paper copies, scanning those copies,¹ and then making the scanned versions text-searchable.² Though a stringent quality assurance process was employed, some imperfections may remain.

Please note that this document may contain occasional gaps in the text. These gaps are the result of a redaction process that removed information obtained on a confidential basis. All redacted passages are exempt from disclosure under applicable provisions of the Freedom of Information Act.

¹ In some cases, original copies needed to be photocopied before being scanned into electronic format. All scanned images were deskewed (to remove the effects of printer- and scanner-introduced tilting) and lightly cleaned (to remove dark spots caused by staple holes, hole punches, and other blemishes caused after initial printing).

² A two-step process was used. An advanced optimal character recognition computer program (OCR) first created electronic text from the document image. Where the OCR results were inconclusive, staff checked and corrected the text as necessary. Please note that the numbers and text in charts and tables were not reliably recognized by the OCR process and were not checked or corrected by staff.

SUPPLEMENTAL NOTES

U.S. International Transactions

Trade in Goods and Services

In June, the nominal U.S. trade deficit in goods and services was \$24.6 billion, considerably larger than the deficit in May. For the second quarter, the deficit was \$258 billion at a seasonally adjusted annual rate, \$43 billion larger than in the first quarter.

n/a Not available --- Not applicable

The value of exports rose 1/2 percent in June, with small increases primarily in automotive products and service receipts. For the second quarter, the value of exports rose 1.1 percent over the first quarter level, nearly returning to the peak levels recorded in the fourth quarter of last year. Increases in the second quarter were spread among several major trade categories, including automotive products (mostly to Canada and Mexico), industrial supplies (especially fuels), computers, semiconductors, and service receipts. Exports of agricultural products rose moderately in the second quarter, while exports of aircraft declined sharply for the second consecutive quarter.

The value of imports rose 3.9 percent in June, marking the second consecutive month of strong increases. Imports rose in all major trade

categories, with particularly strong rates of increase in capital goods, automotive products, and consumer goods. For the second quarter, imports were 4.6 percent above the first-quarter level, as all major trade categories registered increases. Much of the increase was in oil as the effects of sharply higher prices were augmented by a modest increase in quantity. Sizable rates of increase were also recorded for imports of computers, semiconductors, and industrial supplies (especially building materials).

U.S. International Trade in Goods and Services

1 Excludes agriculture and gold
2 Excludes computers and semiconductors

1 Excludes oil and gold
2 Excludes computers and semiconductors
3 Excludes Canada and Mexico
