Note: Networks may offer multiple pricing programs to issuers. This table reflects each network's average interchange fee across all of its transactions and does not reflect what a particular issuer will earn by participating in a particular network or combination of networks.

Note: Previous years' data are subject to minor changes based on revisions to underlying data.

Footnotes

¹ Networks listed are defined as payment card networks under the Board's Regulation II. Presto!, by the network's policy, is accessible exclusively through one merchant, which is affiliated with the network. Presto! statistics are included in the "Single-message" statistics and the "All networks" statistics but are not listed individually. Statistics for the "Dual-message," "Single-message," and "All networks" rows are weighted averages based on each network's number or value of transactions.

² Exempt transactions: Settled purchase transactions exempt from the interchange fee standard, including those for issuers exempt from the standard, as well as those for issuers covered by the standard that qualify for another exemption from the standard. These additional exemptions apply to transactions using (a) cards pursuant to certain government-administered payment programs, and (b) certain reloadable general-use prepaid cards. For a definition of exempt issuers, see <https://www.federalreserve.gov/paymentsystems/regii-interchange-fee-standards.htm>.

³ Covered transactions: Settled purchase transactions covered by the interchange fee standard, including those for issuers covered by the standard that do not qualify for another exemption from the standard.

⁴ All transactions: Exempt transactions and covered transactions.

⁵ % of total number of transactions: The percentage of settled purchase transactions that are exempt from, or covered by, the interchange fee standard. Note: Certain transactions for issuers covered by the standard are exempt from the standard.

⁶ % of total value of transactions: The percentage of the value of settled purchase transactions that are exempt from, or covered by, the interchange fee standard. Note: Certain transactions for issuers covered by the standard are exempt from the standard.

⁷ Average transaction value: The value of settled purchase transactions divided by the number of settled purchase transactions.

⁸ Average interchange fee per transaction: Total interchange fees divided by the number of settled purchase transactions.

⁹ Interchange fee as % of average transaction value: Total interchange fees divided by the value of settled purchase transactions.

¹⁰ Dual-message network: A payment card network that typically uses separate messages to authorize and clear a transaction. These networks normally process signature-authenticated transactions, although some transactions, such as small-value purchases, may not require any cardholder authentication. In some instances, a dual-message network may use a single message to authorize and clear a given transaction and may require the entry of a PIN for cardholder authentication in that transaction. As applicable, the totals for a particular dual-message network include information on any single-message transactions performed on that network.

¹¹ Single-message network: A payment card network that uses a single message to authorize and clear a transaction. These networks normally process PIN-authenticated transactions, although some transactions, such as small-value purchases, may not require any authentication (PIN-less) or may use signature authentication. In some instances, a network that typically uses a single message to authorize and clear a transaction may use separate messages to authorize and clear a given transaction. As applicable, the totals for a particular single-message network include information on any dual-message transactions performed on that network.

¹² Since 2015, Alaska Option has no longer operated as a payment card network for debit cards.

¹³ Prior to 2017, Cuiance was known as Credit Union 24 Network.

¹⁴ Since November 2017, NetWorks has no longer operated as a payment card network for debit cards.

¹⁵ Prior to 2013 the Board did not release breakdown of "% of total number of transactions", "% of total value of transactions" and "Average transaction value" figures by network.

¹⁶ The interchange fee standard went into effect on October 1, 2011. Data for 2011 are separated into two periods (January 1-September 30 and October 1-December 31) to reflect fees before and after implementation of the interchange fee standard.

¹⁷ Some 2009 statistics differ from those in the Board's "2009 Interchange Revenue, Covered Issuer Cost, and Covered Issuer and Merchant Fraud Loss Related to Debit Card Transactions" report (http://www.federalreserve.gov/paymentsystems/files/debitfees_costs.pdf). In this data release, interchange fee amounts were divided by the number or value of purchase transactions, while in the earlier report, they were divided by the number or value of purchase transactions less returns. Dual-message and Single-message statistics in 2009 exclude prepaid transactions; prepaid transactions are included in statistics for the "All networks" row.

¹⁸ Exempt issuers: Issuers exempt from the interchange fee standard. For a definition of exempt issuers, see <https://www.federalreserve.gov/paymentsystems/regii-interchange-fee-standards.htm>.

¹⁹ Covered issuers: Issuers subject to the interchange fee standard.

²⁰ All issuers: Exempt issuers and covered issuers.

²¹ % of total number of transactions: The percentage of settled purchase transactions for issuers exempt from, or covered by, the interchange fee standard. Note: Certain transactions for issuers covered by the standard are exempt from the standard.

²² % of total value of transactions: The percentage of the value of settled purchase transactions for issuers exempt from, or covered by, the interchange fee standard. Note: Certain transactions for issuers covered by the standard are exempt from the standard.
