# FEDERAL RESERVE statistical release

---

For release at 4:30 p.m. Eastern Time

February 8, 2001

H.6 (508)

## MONEY STOCK REVISIONS

Measures of the money stock and components have been revised to incorporate the results of the annual benchmark and seasonal factor review. This release includes revised monthly and weekly seasonal factors, as well as comparisons of the revised monetary aggregates with previously published data. For 2000, the revisions raised the annual growth rates of M2 and M3 by 0.2 percentage point.

The benchmark incorporates revisions to vault cash that reflect a new estimation method for credit unions that do not file the Federal Reserve's deposit reports either weekly or quarterly. These revisions begin in April 1984, and the maximum absolute revision is \$1 billion. The benchmark also incorporates revised historical data on the holdings of large time deposits by money market mutual funds, an item that is subtracted from gross large time deposits when calculating the large time deposit component of M3. These revisions begin in March 1980, and the maximum absolute revision is about \$43 billion. This release also incorporates the receipt of historical information from other routine data flows.

Seasonally adjusted measures of the money stock and components also incorporate revised seasonal factors based on the benchmarked data through December 2000. Monthly seasonal factors were estimated using the X-12-ARIMA procedure. The monthly and weekly seasonal factors were derived after excluding the estimated effects of the century date change. These adjustments were made to ensure that unusual movements around the century date change did not influence the estimated seasonal factors. The revisions to seasonal factors lowered M2 growth rates in the first two quarters of 2000 and raised them in the last two quarters. The revisions to seasonal factors also reduced the M3 growth rate in the first quarter of 2000, but increased growth in the final three quarters of the year.

Revised historical data will soon be available in printed form from the Monetary and

Reserve Analysis Section, Mail Stop 72, Board of Governors of the Federal Reserve System, Washington, DC 20551, (202) 452-3062. Complete historical data are released each week through the Federal Reserve's web site (<http://www.federalreserve.gov/releases/>) with the H.6 statistical release. The data are also available through other electronic means, as described in the note following the footnotes to Table 1 of this release.

This year's benchmark will be the last at the annual frequency. Future benchmarks will be conducted at a quarterly frequency in order to provide more timely updates of published data. The next benchmark of the monetary aggregates will be released in mid- to late March. The quarterly benchmark review will incorporate revised historical data for depository institutions and money market mutual funds, data from the call reports filed by depository institutions, and data on money market mutual funds that began reporting data for the first time during the quarter.

The review of seasonal factors for the monetary aggregates will continue to be performed annually, with the results released in early February.

Table 2

**MONEY STOCK AND DEBT MEASURES**

Percent change at seasonally adjusted annual rates

	M1	M2	M3	DEBT <sup>1</sup>
3 Months from Sep. 2000 TO Dec. 2000	-1.6	6.6	7.2	4.3
6 Months from June 2000 TO Dec. 2000	-2.6	6.9	8.4	4.5
12 Months from Dec. 1999 TO Dec. 2000	-2.9	6.4	8.7	5.3
Thirteen weeks ending January 29 , 2001 from thirteen weeks ending:				
Oct. 30, 2000 (13 weeks previous)	-1.2	7.1	8.0	
July 31, 2000 (26 weeks previous)	-2.1	7.0	8.5	
Jan. 31, 2000 (52 weeks previous)	-2.2	6.5	8.9	

1. Growth rates for debt are based on periods beginning and ending one month earlier than for the monetary aggregates, namely, August 2000 to November 2000, May 2000 to November 2000, and November 1999 to November 2000, respectively.

Footnotes to Table 1:

- Consists of (1) currency outside the U.S. Treasury, Federal Reserve Banks, and the vaults of depository institutions; (2) travelers checks of nonbank issuers; (3) demand deposits at all commercial banks other than those due to depository institutions, the U.S. government, and foreign banks and official institutions, less cash items in the process of collection and Federal Reserve float; and (4) other checkable deposits (OCDs), consisting of negotiable order of withdrawal (NOW) and automatic transfer service (ATS) accounts at depository institutions, credit union share draft accounts and demand deposits at thrift institutions. Seasonally adjusted M1 is calculated by summing currency, travelers checks, demand deposits, and OCDs, each seasonally adjusted separately.
- Consists of M1 plus savings deposits (including money market deposit accounts), small-denomination time deposits (time deposits—including retail RPs—in amounts of less than \$100,000), and balances in retail money market mutual funds. Excludes individual retirement account (IRA) and Keogh balances at depository institutions and money market funds. Seasonally adjusted M2 is computed by summing savings deposits, small-denomination time deposits, and retail money fund balances, each seasonally adjusted separately, and adding this result to seasonally adjusted M1.
- Consists of M2 plus large-denomination time deposits (in amounts of \$100,000 or more), balances in institutional money funds, RP liabilities (overnight and term) issued by all depository institutions, and Eurodollars (overnight and term) held by U.S. residents at foreign branches of U.S. banks worldwide and at all banking offices in the United Kingdom and Canada. Excludes amounts held by depository institutions, the U.S. government, money funds, and foreign banks and official institutions. Seasonally adjusted M3 is calculated by summing large time deposits, institutional money fund balances, RP liabilities, and Eurodollars, each seasonally adjusted separately, and adding this result to seasonally adjusted M2.
- Debt: The debt aggregate is the outstanding credit market debt of the domestic nonfinancial sectors — the federal sector (U.S. government, not including government-sponsored enterprises or federally related mortgage pools) and the nonfederal sectors (state and local governments, households and nonprofit organizations, nonfinancial corporate and nonfarm noncorporate businesses, and farms). Nonfederal debt consists of mortgages, tax-exempt and corporate bonds, consumer credit, bank loans, commercial paper, and other loans. The data, which are derived from the Federal Reserve Board's flow of funds accounts, are break-adjusted (that is, discontinuities in the data have been smoothed into the series) and month-averaged (that is, the data have been derived by averaging adjacent month-end levels). The presentation of the debt data in this release differ, therefore, from the quarterly flow of funds statistics contained in the Federal Reserve releases Z.7 and Z.1. In those releases, published levels of credit market debt are measured on a quarter-end basis and contain discontinuities.

Note: Current and historical H.6 data are available each week on the Federal Reserve Board's web site (<http://www.federalreserve.gov/>). Monthly data are available back to January 1959, and weekly data are available back to January 1975 for most series. For information about individual copies or subscriptions, contact Publications Services at the Federal Reserve Board (phone 202-452-3245, fax 202-728-5886). For paid electronic access to current and historical data, call STAT-USA at 1-800-782-8872 or 202-482-1986.
