
FEDERAL RESERVE statistical release

For release at
4:30 p.m. ET
December 13, 2018

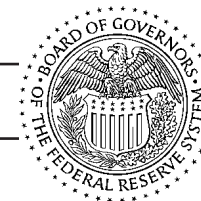

SPECIAL NOTICE

In January 2019, the Board will discontinue publication of data on the outstanding amount of U.S. dollar-denominated traveler's checks of nonbank issuers. Dollar-denominated traveler's checks serve as an alternative to demand deposits and currency as a means of payment and therefore are included in M1. Nonbank traveler's checks have fallen steadily for many years to a point at which they represent an immaterial share of the monetary aggregates. The insignificant amounts no longer justify the burden of collection and publication of these data.

The date of the last reported value in the "Traveler's checks" column in tables 3 and 5 of the H.6 statistical release will be December 31, 2018.

Historical data for traveler's checks of non-bank issuers will remain available through the [Data Download Program](#).

- M1 consists of (1) currency outside the U.S. Treasury, Federal Reserve Banks, and the vaults of depository institutions; (2) traveler's checks of nonbank issuers; (3) demand deposits at commercial banks (excluding those amounts held by depository institutions, the U.S. government, and foreign banks and official institutions) less cash items in the process of collection and Federal Reserve float; and (4) other checkable deposits (OCDs), consisting of negotiable order of withdrawal (NOW) and automatic transfer service (ATS) accounts at depository institutions, credit union share draft accounts, and demand deposits at thrift institutions. Seasonally adjusted M1 is constructed by summing currency, traveler's checks, demand deposits, and OCDs, each seasonally adjusted separately.
- M2 consists of M1 plus (1) savings deposits (including money market deposit accounts); (2) small-denomination time deposits (time deposits in amounts of less than \$100,000), less individual retirement account (IRA) and Keogh balances at depository institutions; and (3) balances in retail money market mutual funds, less IRA and Keogh balances at money market mutual funds. Seasonally adjusted M2 is constructed by summing savings deposits, small-denomination time deposits, and retail money funds, each seasonally adjusted separately, and adding this result to seasonally adjusted M1.
