Instructions for the
Capital Assessments and Stress Testing information collection
(Reporting Form FR Y-14Q)

This Report is required by law: section 165 of the Dodd-Frank Act (12 U.S.C. § 5365) and section 5 of the Bank Holding Company Act (12 U.S.C. § 1844). Public reporting burden for this information collection is estimated to vary from 4 to 1,926 hours per response, with an average of 243 hours per response, including time to gather and maintain data in the required form and to review instructions and complete the information collection. Comments regarding this burden estimate or any other aspect of this information collection, including suggestions for reducing the burden, may be sent to Secretary, Board of Governors of the Federal Reserve System, 20th and C Streets, NW, Washington, DC 20551, and to the Office of Management and Budget, Paperwork Reduction Project (7100-0341), Washington, DC 20503.

INSTRUCTIONS FOR PREPARATION OF
Capital Assessments and Stress Testing Report
FR Y-14Q

GENERAL INSTRUCTIONS

The Capital Assessments and Stress Testing Report (FR Y-14Q report) collects detailed data on bank holding companies’ (BHCs) and intermediate holding companies’ (IHCs) various asset classes, capital components, and categories of pre-provision net revenue (PPNR) on a quarterly basis, which will be used to support supervisory stress testing models and for continuous monitoring efforts.

The FR Y-14Q report is comprised of Retail, Securities, Regulatory Capital Instruments, Regulatory Capital Transitions, Operational, Trading, PPNR, Wholesale, MSR Valuation Schedule, Retail Fair Value Option/Held for Sale, Supplemental, Counterparty and Balances schedules, each with multiple supporting worksheets. All of the data schedules are to be submitted for each reporting period unless materiality thresholds apply. The number of schedules a BHC or IHC must complete is subject to materiality thresholds and certain other criteria.

BHCs and IHCs may also be required to submit qualitative information supporting their projections, including descriptions of the methodologies used to develop the internal projections of capital across scenarios and other analyses that support their comprehensive capital plans. Further information regarding the qualitative and technical requirements of required supporting documentation is provided in individual schedules as appropriate, as well as in the Supporting Documentation instructions (Appendix A). When submitting supporting documentation, provide each response in a separate document.

Who Must Report

A. Reporting Criteria
Bank holding companies (BHCs) and intermediate holding companies (IHCs) with total consolidated assets of $50 billion or more, as defined by the capital plan rule (12 CFR 225.8), are required to submit the Capital Assessment and Stress Testing report (FR Y-14A/Q/M) to the Federal Reserve. The capital plan rule defines total consolidated assets as the average of the company’s total consolidated assets over the course of the previous four calendar quarters, as reflected on the BHC’s or IHC’s Consolidated Financial Statement for Bank Holding Companies (FR Y–9C). Total assets shall be calculated based on the due date of the bank or intermediate holding company’s most recent FR Y–9C. If the BHC or IHC has not filed an FR Y-9C for each of the four most recent quarters, the average of the BHC’s or IHC’s total consolidated assets in the most recent consecutive quarters as reported quarterly on the BHC’s or IHC’s FR Y-9C should be used in the calculation.

Certain data elements within the schedules are subject to materiality thresholds. The instructions to these data schedules provide details on how to determine whether a BHC or IHC must submit a specific schedule, worksheet, or data element. A BHC or IHC must fill out all of the schedules of the FR Y-14M and FR Y-14Q where the BHC or IHC meets the materiality definition. When applicable, the definition of the BHC’s or IHC’s submissions should correlate to the definitions outlined by the corresponding MDRM code within the FR Y-9C report.

All schedules are required to be reported by all BHCs and IHCs with exceptions as described below:

**PPNR, Regulatory Capital Transitions, Regulatory Capital Instruments and Balances schedules:** All bank and intermediate holding companies must submit these schedules.

**Trading and Counterparty schedules:** Only BHCs or IHCs subject to supervisory stress tests and that (1) have
aggregate trading assets and liabilities of $50 billion or more, or aggregate trading assets and liabilities equal to 10 percent or more of total consolidated assets, and (2) are not “large and noncomplex firms” under the Board’s capital plan rule must submit this schedule and worksheets.

**All other quarterly schedules:** Reporting of the remaining schedules is subject to materiality thresholds.

**For large and noncomplex firms:** Material portfolios are defined as those with asset balances greater than $5 billion or with asset balances greater than ten percent of Tier 1 capital on average for the four quarters preceding the reporting quarter.

**For large and complex or LISCC firms:** Material portfolios are defined as those with asset balances greater than $5 billion or asset balances greater than five percent of Tier 1 capital on average for the four quarters preceding the reporting quarter.

For schedules that require the institutions to report information on serviced loans, the materiality threshold is based on the asset balances associated with the BHC’s or IHC’s owned portfolio. All data used to determine materiality should be measured as of the close of business of the last calendar day of the quarter, and assets included in a given portfolio are defined in the instructions for each schedule.

BHCs and IHCs also have the option to complete the data schedules for immaterial portfolios. If the BHC or IHC does not complete the schedules, the Federal Reserve will assign losses to immaterial portfolios in a manner consistent with the given scenario to produce supervisory estimates.

**New Reporters:** New reporters must submit the FRY-14Q PPNR new reports template with data starting as-of 2009 on the first quarter that they are subject to reporting. New reporters must also submit historical data, starting in January 2007, for the FR Y-14Q retail schedules.

**B. Exemptions**
BHCs and IHCs that do not meet the reporting criteria listed above are exempt from reporting. The following institutions are also exempt:

BHCs, IHCs, savings and loan holding companies (SLHCs) and state member banks (SMBs) with average total consolidated assets of greater than $10 billion but less than $50 billion subject to the final rule on annual company-run stress tests (12 CFR 252(h)) are not required to file this report. However, institutions meeting this threshold should review the reporting requirements and instructions for the Annual Company-Run Stress Test Projections (FR Y-16) on the Board’s public website.

SLHCs are currently not required to comply with FR Y-14 reporting requirements. Further information regarding

---

1 A large and noncomplex firm is defined under the capital plan rule as a firm that has average total consolidated assets of at least $50 billion but less than $250 billion, has average total nonbank assets of less than $75 billion, and is not identified as global systemically important bank holding company (GSIB) under the Board’s rules. See 12 CFR 225.8(d)(9).

2 See the final notice (82 FR 59608) for further details regarding application of GMS for the 2018 exercise, and Trading and Counterparty submission for firms newly subject under the modified threshold.

3 A large and noncomplex firm is a BHC or a U.S. intermediate holding company subsidiary of a foreign banking organization (IHC) with total consolidated assets of at least $50 billion but less than $250 billion, total consolidated nonbank assets of less than $75 billion, and is not a U.S. GSIB.

4 A LISCC firm is a BHC subject to the Federal Reserve’s Large Institution Supervisory Coordinating Committee (LISCC) framework. A large and complex firm is a BHC, other than a LISCC firm, with total consolidated assets of $250 billion or more; and nonbank assets of $75 billion or more.
Where to Submit the Reports

All BHCs and IHCs subject to these reporting requirements must submit completed reports electronically via the IntraLinks website. BHCs and IHCs will be provided information on how to transmit data to the FR Y-14 IntraLinks Collaboration website. Requests for access to the Intralinks site should be sent to ccar.support@ccar.frb.org.

For requirements regarding the submission of qualitative supporting information, please see the Technical Instructions and Supporting Documentation Instructions, in addition to instructions associated with each schedule for which supporting documentation might be required.

When to Submit the Reports

BHCs and IHCs must file the FR Y-14Q schedules quarterly according to the appropriate time schedule described below. All schedules will be due on or before the end of the submission date (unless that day falls on a weekend or holiday (subject to timely filing provisions)).

<table>

</tbody>
</table>

---

5 SLHCs would not be subject to Dodd-Frank annual company-run stress testing requirements until the next calendar year after the SLHCs become subject to regulatory capital requirements.
quarter, except for BHCs or IHCs that are required to re-submit their capital plan. For these BHCs or IHCs, the as-of date for the quarter preceding the quarter in which they are required to re-submit a capital plan would be communicated to the BHCs or IHCs during the subsequent quarter.

over a different weekly period. BHCs and IHCs may provide these data as-of the most recent date that corresponds to their weekly internal risk reporting cycle as long as it falls before the as-of-date. **Fourth quarter – Counterparty (CCAR/stressed submission):** April 5.

In addition, for BHCs and IHCs that are required to re-submit a capital plan, the due date for the quarter preceding the quarter in which the BHCs or IHCs are required to re-submit a capital plan would be the later of (1) the normal due date or (2) the date that the re-submitted capital plan is due, including any extensions.

If the submission date falls on a weekend or holiday, the data must be received on the first business day after the weekend or holiday. No other extensions of time for submitting reports will be granted. Early submission, including submission of schedules on a flow basis prior to the due date, aids the Federal Reserve in reviewing and processing data and is encouraged.

**New Reporters:** For the FR Y-14Q schedules, the filing deadline will be extended to (1) 90 days after the quarter-end for the first two quarterly submissions and (2) 65 days after the quarter-end for the third and fourth quarterly submissions. Beginning with the fifth quarterly submission, these respondents will be required to adhere to the standard reporting deadlines above.

**How to Prepare the Reports:**

**A. Applicability of GAAP**
BHCs and IHCs are required to prepare and file the FR Y-14Q schedules in accordance with generally accepted accounting principles (GAAP) and these instructions. The financial records of the BHCs and IHCs should be maintained in such a manner and scope to ensure the FR Y-14Q is prepared in accordance with these instructions and reflects a fair presentation of the BHCs’ and IHCs’ financial condition and assessment of performance under stressed scenarios.

**B. Rules of Consolidation**
Please reference the FR Y-9C General Instructions for a discussion regarding the rules of consolidation.

**C. Technical Details**
The following instructions apply generally to the FR Y-14Q schedules, unless otherwise specified. For further information on the technical specifications for this report, please see the Technical Instructions.

- Do not enter any information in gray highlighted or shaded cells, including those with embedded formulas. Only non-shaded cells should be completed by institutions.
- Ensure that any internal consistency checks are complete prior to submission.
- Report dollar values in millions of US dollars (unless specified otherwise).
- Dates should be entered in an YYYYMMDD format (unless specified otherwise).
• Report negative numbers with a minus (-) sign.
• Report data as an integer (unless specified otherwise)
• An amount, zero or null should be entered for all items, except in those cases where other options such as “not available” or “other” are specified. If information is not available or not applicable and no such options are offered, the field should be left blank.
• Report income and loss data on a quarterly basis, and not on a cumulative or year-to-date basis.

D. Other Instructional Guidance
BHCs and IHCs should review the following published documents (in the order listed below) when determining the precise definition to be used in completing the schedules. Where applicable, references to the FR Y-9C have been provided in the instructions and templates noting associations between the reporting series.

1) The FR Y-14A instructions;
2) The FR Y-14M instructions;

For purposes of completing certain FR Y-14Q schedules, BHCs and IHCs should also consult the following references for relevant guidance:

E. Confidentiality
As these data will be collected as part of the supervisory process, they are subject to confidential treatment under exemption 8 of the Freedom of Information Act. 5 U.S.C. 552(b)(8). In addition, commercial and financial information contained in these information collections may be exempt from disclosure under Exemption 4. 5 U.S.C. 552(b)(4). Disclosure determinations would be made on a case-by-case basis.

F. Legal Considerations for International Exposures
A BHC or IHC is not required to report a particular data item if a foreign law prohibits the BHC or IHC from providing the information to the Federal Reserve. However, the Federal Reserve is authorized by law to collect information from a BHC or IHC regarding its exposures, including foreign exposures.

A BHC or IHC must include with its data submission a legal analysis of the foreign law that prohibits reporting the data to the Federal Reserve. The legal analysis must include, but is not limited to, a detailed description of the law(s) prohibiting the reporting of the information to the Federal Reserve, a summary description of the exposures omitted, any other information the BHC or IHC deems relevant to justify omitting the data, and any additional information required by the Federal Reserve.

G. Amended Reports
The Federal Reserve will require the filing of amended reports if previous submissions contain significant errors. In addition, a reporting institution must file an amended report when it or the Federal Reserve discovers significant errors or omissions subsequent to submission of a report. Failure to file amended reports on a timely basis may subject the institution to supervisory action.

If resubmissions are required, institutions should contact the appropriate Reserve Bank, as well as the FR Y-14 mailbox at info@ccar.frb.org, and resubmit data via the Intralinks website.
H. Questions and Requests for Interpretations
BHCs and IHCs should submit any questions or requests for interpretations by e-mail to info@CCAR.frb.org.

I. Attestation

For Bank Holding Companies and Intermediate Holding Companies that are subject to supervision by the Federal Reserve's Large Institution Supervision Committee, the Capital Assessments and Stress Testing (FR Y-14A/Q/M) data submissions must be accompanied by an attestation signed by the chief financial officer or an equivalent senior officer. By signing the attestation cover page, the authorized officer acknowledges that any knowing and willful misrepresentation or omission of a material fact on this report constitutes fraud in the inducement and may subject the officer to legal sanctions provided by 18 USC 1001 and 1007. Material weaknesses in internal controls or material errors or omissions in the data submitted must be reported through the respondent’s designated Federal Reserve System contacts as they are identified.

The cover page for the FR Y-14A/Q/M attestations should be submitted as follows:

- FR Y-14A/Q (annual submission): the attestation associated with the annual submission (i.e., data reported as of December 31, including the global market shock submission) should be submitted on the last submission date for those reports, typically April 5 of the following year.7
- FR Y-14A (mid-cycle submission): the attestation associated with the semi-annual submission (i.e. data reported as of June 30) should be submitted on the data due date for that submission, October 5 of a given year.
- FR Y-14M: for those firms that file the FR Y-14M reports, the three attestations for the three months of the quarter will be due on one date, the final FR Y-14M submission date for those three intervening months.8 Note that one attestation page per monthly submission is still required.
- FR Y-14Q: the FRY14Q attestation for the three remaining quarters (Q1, Q2, and Q3) should be submitted on the due date for the FR Y-14Q for that quarter.

A signed version of the attestation cover page and any supporting materials should be submitted electronically in Intralinks and tagged with the attestation submission type and applicable report date. Respondents must maintain in their files a signed attestation cover page.

Definition of Commercially Available Credit Bureau Score:

For the purposes of the FR Y-14Q, a credit score is a numerical value or a categorization derived from a statistical tool or modeling system that characterizes the credit risk of a borrower used by a person who makes or arranges a loan to predict the likelihood of credit default. A credit bureau score is a credit score based solely on the borrower’s credit history available through one of the three national credit reporting agencies (Equifax, Experian, and TransUnion).

A commercially available credit bureau score is a credit bureau score which is available to all commercial lenders. For example, FICO 08 and VantageScore 3.0 are commercially available credit scores, while internally developed

---

6 http://www.federalreserve.gov/bankinforeg/large-institution-supervision.htm
7 For example, all of the FR Y-14Q schedules due 52 days after the as of date (typically mid-February), all of the FR Y-14A schedules due April 5, and the trading and counterparty schedules due on the global market shock submission date (March 15 at the latest) will be due on the latest of those dates, typically the annual submission date for the FR Y-14A report schedules (April 5).
8 For example, the attestation cover pages and any associated materials for the FR Y-14M reports with January, February, and March as of dates will be due on the data due date for the March FR Y-14M.
credit scores and custom scores tailored to a lender's own portfolio and provided by third parties are not commercially available credit scores.

For a commercially available credit bureau score to qualify for submission in this schedule, the Federal Reserve must be able to obtain sufficient information from the credit score vendor to (a) determine whether the credit score is empirically derived and demonstrably sound (b) evaluate the performance of the credit score and (c) compare that performance to other commercially available credit bureau scores. The Federal Reserve reserves the right to determine whether a credit score qualifies as a commercially available credit bureau score for the purposes of this schedule.

**Most Recent Capital Framework:**

For all items and instructions related to regulatory capital, particularly where the “most recent capital framework” is referenced, respondents should refer to 12 CFR parts 208, 217, and 225.
Schedule A – Retail
A.1 – International Auto Loan

This section provides general guidance and data definitions for the International Auto Loan Worksheet. In this worksheet, include international (not US or US territories and possessions) auto loans as defined in the FR Y-9C, Schedule HC-C, item 6.c and international auto leases as defined in the FR Y-9C, Schedule HC-C, item 10.a. For Summary Variable line items #10 & #11 include all repossessed international auto loans as defined in the FR Y-9C, Schedule HC-F, item 6. Include only “managed” (securitized or non-securitized) loans, where “managed” refers to loans originated by the BHC or IHC, including securitized loans put back on the books due to ASC Topics 860 and 810 (FAS 166/167). Do not include loans that were originated by a third party and only serviced by the BHC or IHC. Only include loans and leases held for investment at amortized cost; do not include loans or leases held for sale or held for investment and measured at fair value under the fair value option. For the US Auto Loan Worksheet, see instructions for Worksheet 2.

Segment the portfolio along all combinations of the segment variables listed in Section A below. There are three product type segments, three original industry standard credit score or equivalent segments, six delinquency status segments, and four geography segments; therefore, the portfolio must be divided into a total of 3*3*6*4 = 216 distinct segments. Each segment should be identified by a unique eight-digit segment ID (variable name: SEGMENT_ID) based on the segment ID positions and attribute codes listed in Table A.1.a. For example, the segment containing new auto loans (product type segment “01”) that had an origination FICO score or equivalent of greater than 620 (origination industry standard credit score or equivalent “02”), are 120+ DPD (delinquency status segment “06”), and where the borrowers reside in the Asia Pacific region (geography segment “04”) should be identified by the segment ID “01020604”. When reporting the segment ID, do not drop leading zeroes.

For each month in the required reporting period, report the summary variables listed below in Section B for each of the 216 portfolio segments described above. First time filers must submit all data for each month from January 2007 to the end of the current reporting period; returning filers must submit all data for each month in the current reporting period.

Start each row of data with your BHC or IHC name (Variable name: BHC_NAME), your RSSD ID number (Variable name: RSSD_ID), the reporting month (Variable name: REPORTING_MONTH), and the portfolio ID (Variable name: PORTFOLIO_ID) and segment ID (variable name: SEGMENT_ID). Use the portfolio ID “IntAuto” for this worksheet. For each row, populate the segment variables listed in Table A.1.a and the summary variables listed in Table A.1.b. Provide all dollar amounts in millions.

Detailed instructions on how to submit the data will be provided separately.

Note: For Summary Variable line items (items 20-23) use the loan level parameters defined in the most recent capital framework for all accounts in a specific segment and calculate the account weighted average. Each month’s parameters need to be calculated specific to that month.

If Basel data are not refreshed monthly, use the appropriate Basel data from the prior quarter. For example, if the Basel data are not refreshed until the third month of a quarter, use the Basel data for the prior quarter for the first two months of the next reporting
quarter.

A. **Segment Variables**
Segment the portfolio along the following segment variables as described above. For each resulting segment, report the summary variables described in Section B.

1. **Product type** – Segment the portfolio into the following product types.
   - 01 – New auto loans
   - 02 – Used auto loans
   - 03 – Auto leases

2. **Original commercially available credit bureau score or equivalent** –
Segment the portfolio by the credit score of the borrower at origination using a commercially available credit bureau score (e.g. FICO Score, VantageScore, or another qualifying credit score). The original credit score used to assign a loan to a segment must be the score upon which the original underwriting decision was based. If the underwriting decision was based on an internal score, please map this score to an industry standard credit score. Please provide supporting documentation listing the credit score supplied or mapped to.

   The ranges below should be used for loans for which FICO was either the original credit score used at origination or the commercially available credit bureau score to which an internal credit score was mapped. Ranges for other commercially available credit bureau scores will be provided upon request.
   - 01 - \( \leq 620 \)
   - 02 - \( > 620 \)
   - 03 - N/A – Original credit score is missing or unknown

3. **Delinquency status** - Segment the portfolio into the following six delinquency statuses:
   - 01 - Current: Accounts that are not past due (accruing and non-accruing) as of month-end.
   - 02 - 1-29 days past due (DPD): Accounts that are 1 to 29 days past due (accruing and non-accruing) as of month-end.
   - 03 - 30-59 DPD: Accounts that are 30 to 59 days past due (accruing and non-accruing) as of month-end.
   - 04 - 60-89 DPD: Accounts that are 60 to 89 days past due (accruing and non-accruing) as of month-end.
   - 05 - 90-119 DPD: Accounts that are 90 to 119 days past due (accruing and non-accruing) as of month-end.
   - 06 - 120+ DPD: Accounts that are 120 or more days past due (accruing and non-accruing) as of month-end.

4. **Geography** – Segment the portfolio into the following four geographical area designations. The borrower’s current place of residency should be used to define the region.
   - 01 - Canada
   - 02 - EMEA—Europe, Middle East, and Africa
   - 03 - LATAM—Latin America and Caribbean
   - 04 - APAC—Asia Pacific
B. **Summary Variables**
For each month in the reporting period, report the following summary variables for each segment described in Section A.

When reporting $ Vehicle Type (lines 5-8), vehicles should be classified for the purpose of this schedule by body style; however, a luxury vehicle may include all body styles that meet the qualification of a high cost vehicle that aspires to provide drivers with the peak of driving comfort and performance. A luxury vehicle may be manufactured by a conventional automobile manufacturer but still be considered a luxury vehicle if it meets the standards of high price as compared to conventional vehicles and peak driving performance and comfort.

1. **# Accounts** – Total number of accounts on the book for the segment as of month-end.

2. **$ Outstandings** – Total unpaid principal balance for accounts on the book for the segment reported as of month-end.

3. **# New accounts** – The total number of new accounts originated (or purchased) in the given month for the segment as of month-end.

4. **$ New accounts** – The total dollar amount of new accounts originated (or purchased) in the given month for the segment as of month-end.

5. **$ Vehicle type car/van** – The unpaid principal balance in the portfolio with vehicle type classified as “car/van” for the segment as of month-end.

6. **$ Vehicle type SUV/truck** – The unpaid principal balance in the portfolio with vehicle type classified as “SUV/truck” for the segment as of month-end.

7. **$ Vehicle type sport/luxury/convertible** – The unpaid principal balance in the portfolio with vehicle type classified as “sport/luxury/convertible” for the segment as of month-end.

8. **$ Vehicle type unknown** – The unpaid principal balance in the portfolio with vehicle type classified as “unknown” for the segment as of month-end.

9. **$ Repossession** – The unpaid principal balance of loans still on the books whose vehicles have been repossessed for the segment as of month-end. This field captures the stock of repos.

10. **$ Current month repossession** – The unpaid principal balance of loans still on the books whose vehicles were newly repossessed in the given month for the segment as of month-end. This field captures the flow of repos in the current month, and should include both active and charged-off loans.

11. **$ Gross contractual charge-offs** – The dollar amount of write-downs on loans in the segment that were charged-off during the reporting month, except where the charge-off arises from the bankruptcy of the borrower (see the variable $ Bankruptcy Charge-offs). The amount reported here should be consistent with the amount reported on Schedule HI-B, Part I, Column A of the FR Y-9C. For the Delinquency Status segment, categorize charged-off loans by their delinquency status at charge-off. Charge-offs should be performed per loss recognition policy consistent with the FFIEC Uniform Retail Credit
12. **$ Bankruptcy charge-offs** – The dollar amount of write-downs on loans in the segment that were charged-off due to bankruptcy during the reporting month. The amount reported here should be consistent with the amount reported on Schedule HI-B, Part I, Column A of the FR Y-9C. For the Delinquency Status segment, categorize charged-off loans by their delinquency status at charge-off.

13. **$ Recoveries** – The dollar amount recovered during the reporting month on loans in the segment that were previously charged-off, including recoveries on acquired loans/portfolios. The amount reported here should be consistent with the amount reported on Schedule HI-B, Part I, Column B of the FR Y-9C for the corresponding time period. For the Delinquency Status segment, categorize charged-off loans by their delinquency status at charge-off. Reversals of recoveries should be recorded as negative recoveries.

14. **$ Net charge-offs** – The dollar amount of write-downs net on loans in the segment that were charged-off during the reporting month, net of any recoveries in the reporting month on loans in the segment that were previously charged-off. Generally, $Net Charge-offs should equal [$ Gross Contractual Charge-offs + $Bankruptcy Charge-offs — $ Recoveries].

15. **Adjustment factor to reconcile $ gross contractual charge-offs to $ net charge-offs**

   If it is not the case that $ net charge-offs equals [$ gross contractual charge-offs + $ bankruptcy charge-offs - $ recoveries], provide the value of $ net charge-offs minus [$ gross contractual charge-offs + $ bankruptcy charge-offs - $ recoveries] in this variable. As a separate document included in the submission, provide an explanation for such a difference (for example, fraud losses are also included in the BHC’s or IHC’s $ net charge-offs variable). If the adjustment factor variable represents more than one factor leading to the difference, provide a separate breakout of the multiple factors.

16. **$ Ever 30DPD in the last 12 months** – The total unpaid principal balance for the segment as of month-end that was 30 or more days past due at any given time in the twelve months ending in the reference month.

17. **$ Ever 60DPD in the last 12 months** – The total unpaid principal balance for the segment as of month-end that was 60 or more days past due at any given time in the twelve months ending in the reference month.

18. **Projected value** – Total projected value of lease at termination. Only calculated for leased vehicles.

19. **Actual sale proceeds** – Sales proceeds from terminated leases. Only calculated for leased vehicles.

20. **Probability of Default (PD)** - Report the average Probability of Default (PD) as defined in the most recent capital framework for accounts within the segment. More specifically, use the PD associated with each account’s corresponding segment and then calculate the account weighted average PD of all the accounts in this specific Y-14Q segment. Note: Applicable only to the advanced approaches reporting banks. A one in ten probability of default should be reported as 0.1.
21. **Loss Given Default (LGD)** - Report the Loss Given Default (LGD) as defined in the most recent capital framework for accounts within the segment. More specifically, use the LGD associated with each account’s corresponding segment and then calculate the account weighted average LGD of all the accounts in this specific Y-14Q segment. Note: Applicable only to the advanced approaches reporting banks. A ninety percent loss given default should be reported as 0.9.

22. **Expected Loss Given Default (ELGD)** - Report the Expected Loss Given Default (ELGD) as defined in the most recent capital framework parameter for accounts within the segment. More specifically, use the ELGD associated with each account’s corresponding segment and then calculate the account weighted average ELGD of all the accounts in this specific Y-14Q segment. Missing or unavailable values should be reported as null. Note: Applicable only to the advanced approaches reporting banks. A ninety percent expected loss given default should be reported as 0.9.

23. **Risk-Weighted Asset (RWA)** - Report the aggregate dollar Risk Weighted Asset (RWA) for accounts within the segment as defined in the most recent capital framework. More specifically, calculate the RWA associated with each account based on the IRB Risk-Based Capital Formula and then calculate the account weighted average RWA of all the accounts in this specific Y-14Q segment. Note: Applicable only to banks subject to the advanced approaches rule. This item is required for BHC or IHC-owned loans only.
A.2 – US Auto Loan

This section provides general guidance and data definitions for the US Auto Loan Worksheet. For the International Auto Loan Worksheet, see the instructions for Worksheet 1. In this worksheet, include all domestic auto loans as defined in the FR Y-9C, Schedule HC-C, item 6.c and domestic auto leases as defined in the FR Y-9C, Schedule HC-C, item 10.a. For Summary Variable line items 10 & 11 include all repossessed auto loans as defined in the FR Y-9C, Schedule HC-F, item 6. Include only “managed” (securitized or non-securitized) loans, where “managed” refers to loans originated by the BHC or IHC, including securitized loans put back on the books due to FAS 166/167 (ASC Topics 860 and 810). Do not include loans that were originated by a third party and only serviced by the BHC or IHC. Only include loans and leases held for investment at amortized cost; do not include loans or leases held for sale or held for investment and measured at fair value under the fair value option.

Segment the portfolio along all combinations of the segment variables listed in Section A below. There are three product type segments, six age segments, four original LTV segments, five original industry standard credit score or equivalent segments, six geography segments, and five delinquency status segments; therefore, the portfolio must be divided into a total of $3\times6\times4\times5\times6\times5 = 10,800$ distinct segments. Each segment should be identified by a unique twelve-digit segment ID (variable name: SEGMENT_ID) based on the segment ID positions and attribute codes listed in Table A.2.a. For example, the segment containing new auto loans (product type segment “01”) that are greater than five years old (age segment “01”), had an origination LTV of greater than 120 (original LTV segment “03”), had an origination FICO score or equivalent of greater than 720 (original industry standard credit score or equivalent segment “04”), where the borrowers reside in Region 3 (geography segment “03”), and that are 120+ DPD (delinquency status segment “05”) should be identified by the segment ID “010103040305”. When reporting the segment ID, do not drop leading zeroes.

For each month in the required reporting period, report the summary variables listed below in Section B for each of the 10,800 portfolio segments described above. First time filers must submit all data for each month from January 2007 to the end of the current reporting period; returning filers must submit all data for each month in the current reporting period.

Start each row of data with your BHC or IHC name (Variable name: BHC_NAME), your RSSD ID number (Variable name: RSSD_ID), the reporting month (Variable name: REPORTING_MONTH), and the portfolio ID (Variable name: PORTFOLIO_ID). Use the portfolio ID “Auto” for your Portfolio ID within this worksheet. For each row, populate the segment variables listed in Table A.2.a and the summary variables listed in Table A.2.b. Provide all dollar amounts in millions.

Detailed instructions on how to submit the data will be provided separately.

Note: For Summary Variable line items (items 28-31) related to the most recent capital framework use the loan level parameters for all accounts in a specific segment and calculate the account weighted average. Each month's parameters need to be calculated specific to that month.

If Basel data are not refreshed monthly, use the appropriate Basel data from the prior quarter. For example, if the Basel data are not refreshed until the third month of a quarter, use the Basel data for the prior quarter for the first two months of the next reporting quarter.
A. **Segment Variables**

Segment the portfolio along the following segment variables as described above. For each resulting segment, report the summary variables described in Section B.

1. **Product type** - Segment the portfolio into the following product types:
   - 01 – New auto loans
   - 02 – Used auto loans
   - 03 – Auto leases

2. **Age** – Refers to the time that has elapsed since the loan was originated. If there were multiple disbursements tied to an original then use the time since the first disbursement. There are six possible ages to report:
   - 01 - 5 years <= Age
   - 02 - 4 years <= Age < 5 years
   - 03 - 3 years <= Age < 4 years
   - 04 - 2 years <= Age < 3 years
   - 05 - 1 year <= Age < 2 years
   - 06 - Age < 1 year

3. **Original LTV** - Segment the portfolio into the loan to value ratio at origination (calculated using the wholesale price of the vehicle). Please round any LTV ratios up to the next integer (LTV 90.01-90.99 to 91). Please break into the following segments:
   - 01 - <= 90
   - 02 - 91 – 120
   - 03 - > 120
   - 04 - N/A – Original LTV is missing or unknown

4. **Original commercially available credit bureau score or equivalent** –
   Segment the portfolio by the credit score of the borrower at origination using a commercially available credit bureau score (e.g. FICO Score, VantageScore, or another qualifying credit score). The original credit score used to assign a loan to a segment must be the score upon which the original underwriting decision was based. If the underwriting decision was based on an internal score, please map this score to an industry standard credit score. Please provide supporting documentation listing the credit score supplied or mapped to.

   The ranges below should be used for loans for which FICO was either the original credit score used at origination or the commercially available credit bureau score to which an internal credit score was mapped. Ranges for other commercially available credit bureau scores will be provided upon request.
   - 01 - <= 620
   - 02 - > 620 and <= 660
   - 03 - > 660 and <= 720
   - 04 - > 720
   - 05 - N/A — Original credit score is missing or unknown

5. **Geography** - Segment the portfolio into the following six geographical area designations. The primary borrower’s current place of residence should be used to define the region.
   - 01 - Region 1: California, Nevada, Florida, Arizona, and US Territories and possessions (Puerto Rico, Guam, etc.)
   - 02 - Region 2: Rhode Island, South Carolina, Oregon, Michigan, Indiana, Kentucky, Georgia, Ohio, Illinois
   - 03 - Region 3: Washington D.C., Mississippi, North Carolina, New Jersey, Tennessee,
04 - Region 4: Delaware, Massachusetts, New York, Colorado, New Mexico, Texas
05 - Region 5: Alaska, Louisiana, Wisconsin, Arkansas, Maine, Maryland, Utah, Montana, Minnesota, Oklahoma, Iowa, Virginia, Wyoming, Kansas, Hawaii
06 - Region 6: Vermont, New Hampshire, Nebraska, South Dakota, North Dakota

6. **Delinquency status** - Segment the portfolio into the following five delinquency statuses:
   01 - Current + 1-29 DPD: Accounts that are not past due (accruing and non-accruing) or are 1-29 DPD (accruing and non-accruing) as of month-end.
   02 - 30-59 DPD: Accounts that are 30 to 59 days past due (accruing and non-accruing) as of month-end.
   03 - 60-89 DPD: Accounts that are 60 to 89 days past due (accruing and non-accruing) as of month-end.
   04 - 90-119 DPD: Accounts that are 90 to 119 days past due (accruing and non-accruing) as of month-end.
   05 - 120+ DPD: Accounts that are 120 or more days past due (accruing and non-accruing) as of month-end.

B. **Summary Variables**
   For each month in the reporting period, report the following summary variables for each segment described in Section A.

   When reporting $ Vehicle Type (lines 6-9), vehicles should be classified for the purpose of this schedule by body style; however, a luxury vehicle may include all body styles that meet the qualification of a high cost vehicle that aspires to provide drivers with the peak of driving comfort and performance. A luxury vehicle may be manufactured by a conventional automobile manufacturer but still be considered a luxury vehicle if it meets the standards of high price as compared to conventional vehicles and peak driving performance and comfort.

1. **# Accounts** – Total number of accounts on the book for the segment as of month-end.
2. **$ Outstandings** – Total unpaid principal balance for accounts on the book for the segment as of month-end.
3. **# New accounts** – The total number of new accounts originated (or purchased) in the given month for the segment as of month-end. The BHC or IHC should follow its standard practice for assigning date of origination.
4. **$ New accounts** – The total dollar amount of new accounts originated (or purchased) in the given month for the segment as of month-end. The BHC or IHC should follow its standard practice for assigning date of origination.
5. **Interest rate** – The average annual percentage rate for accounts on the book for the segment as of month-end. In making this calculation, report the purchase APR unless the account is in default or workout. If the account is in default, then use the default APR. If the account is in a workout program (temporary or permanent), use the workout APR. Workout programs are programs to alleviate the temporary payment burden of the borrowers so that they don't go into default. Loan Modification (a permanent change in one or more of the terms of a Borrower's loan, allows the loan to be reinstated, and results in a payment the Borrower can afford), loss mitigation, and loan re-negotiation are some examples of workout programs.
6. **$ Vehicle type car/van** – The unpaid principal balance in the portfolio with vehicle type classified as “Car/Van” for the segment as of month-end.

7. **$ Vehicle type SUV/truck** – The unpaid principal balance in the portfolio with vehicle type classified as “SUV/Truck” for the segment as of month-end.

8. **$ Vehicle type sport/luxury/convertible** – The unpaid principal balance in the portfolio with vehicle type classified as “Sport/Luxury/Convertible” for the segment as of month-end.

9. **$ Vehicle type unknown** – The unpaid principal balance in the portfolio with vehicle type classified as “Unknown” for the segment as of month-end.

10. **$ Repossession** – The unpaid principal balance of loans still on the books whose vehicles have been repossessed for the segment as of month-end. This field captures the stock of repos.

11. **$ Current Month Repossession** – The unpaid principal balance of loans still on the books whose vehicles were newly repossessed in the given month for the segment as of month-end. This field captures the flow of repos in the current month, and should include both active and charged-off loans.

12. **$ Gross contractual charge-offs** – The dollar amount of write-downs on loans in the segment that were charged-off during the reporting month, except where the charge-off arises from the bankruptcy of the borrower (see the variable **$ Bankruptcy Charge-offs**). The amount reported here should be consistent with the amount reported on Schedule HI-B, Part I, Column A of the FR Y-9C. For the Delinquency Status segment, categorize charged-off loans by their delinquency status at charge-off. Charge-offs should be performed per loss recognition policy consistent with the FFIEC Uniform Retail Credit Classification and Account Management Policy.

13. **$ Bankruptcy charge-offs** – The dollar amount of write-downs on loans in the segment that were charged-off due to bankruptcy during the reporting month. The amount reported here should be consistent with the amount reported on Schedule HI-B, Part I, Column A of the FR Y-9C. For the Delinquency Status segment, categorize charged-off loans by their delinquency status at charge-off.

14. **$ Recoveries** – The dollar amount recovered during the reporting month on loans in the segment that were previously charged-off, including recoveries on acquired loans/portfolios. The amount reported here should be consistent with the amount reported on Schedule HI-B, Part I, Column B of the FR Y-9C for the corresponding time period. For the Delinquency Status segment, categorize charged-off loans by their delinquency status at charge-off. Reversals of recoveries should be recorded as negative recoveries.

15. **$ Net charge-offs** – The dollar amount of write-downs on loans in the segment that were charged-off during the reporting month, net of any recoveries in the reporting month on loans in the segment that were previously charged-off. Generally, $ Net Charge-offs should equal [$ Gross Contractual Charge-offs + $Bankruptcy Charge-offs — $ Recoveries].

16. **Adjustment factor to reconcile $ gross contractual charge-offs to $ net charge-offs** – If it is not the case that $ Net Charge-offs equals [$ Gross Contractual Charge-offs + $
Bankruptcy Charge-offs - $ Recoveries], provide the value of $ Net Charge-offs minus [$ Gross Contractual Charge-offs + $ Bankruptcy Charge-offs - $ Recoveries] in this variable. As a separate document included in your submission, provide an explanation for such a difference (for example, fraud losses are also included in your BHC’s or IHC’s $ Net Charge-offs variable). If the adjustment factor variable represents more than one factor leading to the difference, provide a separate breakout of the multiple factors.

17. $ Ever 30DPD in the last 12 months – The total unpaid principal balance for the segment as of month-end that was 30 or more days past due at any given time in the twelve months ending in the reference month.

18. $ Ever 60DPD in the last 12 months – The total Unpaid Principal Balance for the segment as of month-end that was 60 or more days past due at any given time in the twelve months ending in the reference month.

21. Original term <= 48 months – The total unpaid principal balance for accounts on the book for the segment as of month-end that had an original term of 48 months or less.

22. Original term 49-60 months – The total unpaid principal balance for accounts on the book for the segment as of month-end that had an original term of 49-60 months.

23. Original term 61-72 months – The total unpaid principal balance for accounts on the book for the segment as of month-end that had an original term of 61-72 months.

24. Original term >72 months – The total unpaid principal balance for accounts on the book for the segment as of month-end that had an original term of greater than 72 months.

25. $ Origination channel (direct) – The total unpaid principal balance for accounts on the book for the segment as of month-end that were originated through direct channels (i.e., a chartered bank, a non-bank subsidiary).

26. $ Loss mitigation – The total unpaid principal balance for accounts on the book for the segment as of month-end that are currently in a loss mitigation program. Loss mitigation programs are broadly defined to include any program that eases the credit terms to an impaired borrower for purposes of mitigating loan losses. Examples of loss mitigation programs include match pay, temporary mitigation programs lasting up to 12 months or permanent mitigation programs lasting more than one year.

27. $ Joint application – The total unpaid principal balance for accounts on the book for the segment as of month-end that were originated with a co-applicant.

28. Probability of Default (PD) - Report the average Probability of Default (PD) as defined in the most recent capital framework for accounts within the segment. More specifically, use the PD associated with each account’s corresponding segment and then calculate the account weighted average PD of all the accounts in this specific Y-14Q segment. Note: Applicable only to the advanced approaches reporting banks. A one in ten probability of
default should be reported as 0.1.

29. **Loss Given Default (LGD)** - Report the Loss Given Default (LGD) as defined in the most recent capital framework for accounts within the segment. More specifically, use the LGD associated with each account's corresponding segment and then calculate the account weighted average LGD of all the accounts in this specific Y-14Q segment. Note: Applicable only to the advanced approaches reporting banks. A ninety percent loss given default should be reported as 0.9.

30. **Expected Loss Given Default (ELGD)** - Report the Expected Loss Given Default (ELGD) parameter as defined in the most recent capital framework for accounts within the segment. More specifically, use the ELGD associated with each account's corresponding segment and then calculate the account weighted average ELGD of all the accounts in this specific Y-14Q segment. Missing or unavailable values should be reported as null. Note: Applicable only to the advanced approaches reporting banks. A ninety percent expected loss given default should be reported as 0.9.

31. **Risk-Weighted Asset (RWA)** - Report the aggregate dollar Risk Weighted Asset (RWA) for accounts within the segment as defined in the most recent capital framework. More specifically, calculate the RWA associated with each account based on the IRB Risk-Based Capital Formula and then calculate the account weighted average RWA of all the accounts in this specific Y-14Q segment. Note: Applicable only to banks subject to the advanced approaches rule. This item is required for BHC or IHC-owned loans only.

32. **$ Unpaid Principal Balance at Charge-off** – The total unpaid principal balance of loans in the segment that were charged-off (either partially or fully) during the reporting month and had not been partially charged-off in a prior reporting month. Report the unpaid principal balance at the time of the charge-off. Do not include interest and fees. For the Delinquency Status segment, categorize charged-off loans by their delinquency status at charge-off.

33. **Percent Loss Severity (3 month Lagged)** – Report the total loss net of all recoveries as a percent of the unpaid principal balance (UPB) for all accounts in the segment that were charged-off for the first time in the third month prior to the current reporting month. Do not include losses or recoveries on loans charged-off for the first time in later months. For the Delinquency Status segment, categorize loans by their delinquency status at the initial charge-off.
A.3 – International Credit Card

This section provides general guidance, data definitions and instructions for the International Card Worksheet. In this worksheet, include all international (not U.S. or U.S. territories or possessions) consumer credit and charge card loans as defined in the FR Y-9C, Schedule HC-C, items 6.a and 6.d. international corporate and SME card loans as defined in the FR Y-9C, Schedule HC-C, item 4.b. Only include loans and leases held for investment at amortized cost; do not include loans or leases held for sale or held for investment and measured at fair value under the fair value option.

Segment the portfolio along all combinations of the segment variables listed in Section A below. There are three product type segments, two age segments, four geography segments, five delinquency status segments, and three original industry standard credit score or equivalent segments; therefore, the portfolio must be divided into a total of 3*2*4*5*3 = 360 distinct segments. Each segment should be identified by a unique ten-digit segment ID (variable name: SEGMENT_ID) based on the segment ID positions and attribute codes listed in Table A.3.a. For example, the segment containing bank cards (product type segment “01”) that are greater than two years old (age segment “02”), made to borrowers residing in the Asia Pacific region (geography segment “04”), are 120+ DPD (delinquency status segment “05”), and had an original FICO score or equivalent of greater than 620 (original industry standard credit score or equivalent segment “02”) should be identified by the segment ID “0102040502”. When reporting the segment ID, do not drop leading zeroes.

For each month in the required reporting period, report the summary variables listed below in Section B for each of the 360 portfolio segments described above. First time filers must submit all data for each month from January 2007 to the end of the current reporting period; returning filers must submit all data for each month in the current reporting period.

Start each row of data with your BHC or IHC name (Variable name: BHC_NAME), your RSSD ID number (Variable name: RSSD_ID), the reporting month (Variable name: REPORTING_MONTH), the portfolio ID (Variable name: PORTFOLIO_ID) and segment ID (variable name: SEGMENT_ID). Use the portfolio ID “IntCard” for this worksheet. For each row, populate the segment variables listed in Table A.3.a and the summary variables listed in Table A.3.b. Please provide all dollar amounts in millions.

Detailed instructions on how to submit the data will be provided separately.

A. Segment Variables

Segment the portfolio along the following segment variables as described above. For each resulting segment, report the summary variables described in Section B.

1. Product type – Segment the portfolio into the following three product types:
   01 - Bank Card - Bank cards are regular general purpose credit cards that can be used at a wide variety of merchants, including any who accept MasterCard, Visa, American Express or Discover credit cards. Include affinity and co-brand cards in this category, and student cards if applicable. This product type also includes private label or propriety credit cards, which are tied to the retailer issuing the card and can only be used in that retailer’s stores. Include oil & gas cards in this loan type.
   02 - Charge Card - Charge cards are consumer credit cards for which the balance is repaid in full each billing cycle.
   03 –Corporate, SME, and Business cards - Corporate cards are employer-sponsored credit cards for use by a company's employees and SME and Business cards are credit card accounts where the loan is underwritten with the sole proprietor or
primary business owner as an applicant. Corporate, SME and Business cards only include cards where there is any individual liability associated with the sub-lines or the account is delinquency managed or scored. Also include cards where the account is delinquency managed or scored and performance is reported to the credit bureaus; corporate and SME cards do not include loans for which a commercially-graded corporation is ultimately responsible for repayment of credit losses with no reporting to credit bureaus.

2. **Age** – Age refers to the amount of time that has elapsed since the account was originated. There are two possible ages to report:
   - 01 - <= Two years old
   - 02 - > Two years old

3. **Geography** – Segment the portfolio into the following four geographical area designations. The primary borrower’s current place of residency should be used to define the region.
   - 01 - Region 1: Canada
   - 02 - Region 2: EMEA — Europe, Middle East, and Africa
   - 03 - Region 3: LATAM — Latin America and Caribbean
   - 04 - Region 4: APAC — Asia Pacific

4. **Delinquency status** – Segment the portfolio into the following five delinquency statuses:
   - 01 - Current and 1 - 29 days past due (DPD): Accounts that are not past due (accruing and non-accruing) as of month-end and accounts that are 1 to 29 days past due (accruing and non-accruing) as of month-end.
   - 02 - 30 - 59 DPD: Accounts that are 30 to 59 days past due (accruing and non-accruing) as of month-end.
   - 03 - 60 - 89 DPD: Accounts that are 60 to 89 days past due (accruing and non-accruing) as of month-end.
   - 04 - 90 - 119 DPD: Accounts that are 90 to 119 days past due (accruing and non-accruing) as of month-end.
   - 05 -120+ DPD: Accounts that are 120 or more days past due (accruing and non-accruing) as of month-end.

5. **Original commercially available credit bureau score or equivalent** – Segment the portfolio by the credit score of the borrower at origination using a commercially available credit bureau score (e.g. FICO Score, VantageScore, or another qualifying credit score). The original credit score used to assign a loan to a segment must be the score upon which the original underwriting decision was based. If the underwriting decision was based on an internal score, please map this score to an industry standard credit score. Please provide supporting documentation listing the credit score supplied or mapped to.

   The ranges below should be used for loans for which FICO was either the original credit score used at origination or the commercially available credit bureau score to which an internal credit score was mapped. Ranges for other commercially available credit bureau scores will be provided upon request.
   - 01 - <= 620
   - 02 - > 620
   - 03 - N/A – Original credit score is missing or unknown
B. **Summary Variables**

For each month in the reporting period, report the following summary variables for each segment described in Section A.

1. **# Accounts** – Total number of accounts on the book for the segment as of month-end.

2. **$ Receivables** – Total receivables for accounts on the book for the segment as of month-end.

3. **$ Unpaid principal balance** – Total Unpaid Principal Balance (UPB) on the book for the segment as of month-end. Unlike receivables, total UPB should be net of any interest and fees owed by the borrower.

4. **$ Commitments** – The total dollar amount of credit lines on the book for the segment as of month-end (include drawn and undrawn credit lines). The internal automated limit (shadow limit) should be used when there is no contractual limit.

5. **# New accounts** – The total number of new accounts originated (or purchased) in the given month for the segment as of month-end.

6. **$ New commitments** – The total dollar amount of new commitments on accounts originated (or purchased) in the given month for the segment as of month-end. If unknown for some accounts due to an acquisition or a merger, report the credit line at acquisition.

7. **$ Gross contractual charge-offs** – The dollar amount of write-downs on loans in the segment that were charged-off during the reporting month, except where the charge-off arises from the bankruptcy of the borrower (see the variable **$ Bankruptcy charge-offs**). Also include write-downs to fair value on loans transferred to the held-for-sale account during the reporting month. The amount reported here should be consistent with the amount reported on Schedule HI-B, Part I, Column A of the FR Y-9C. For the Delinquency Status segment, categorize charged-off loans by their delinquency status at charge-off.

8. **$ Bankruptcy charge-offs** – The dollar amount of write-downs on loans in the segment that were charged-off due to bankruptcy during the reporting month. The amount reported here should be consistent with the amount reported on Schedule HI-B, Part I, Column A of the FR Y-9C. For the Delinquency Status segment, categorize charged-off loans by their delinquency status at charge-off.

9. **$ Recoveries** – The dollar amount recovered during the reporting month on loans in the segment that were previously charged-off. The amount reported here should be consistent with the amount reported on Schedule HI-B, Part I, Column B of the FR Y-9C. For the Delinquency Status segment, categorize charged-off loans by their delinquency status at charge-off. Reversals of recoveries should be recorded as negative recoveries.

10. **# Accounts charged-off** – The total number of accounts which experienced a charge-off (contractual or bankruptcy) in the reference month. For the delinquency status segmentation, categorize charge-offs by delinquency status at charge-off.

11. **$ Net charge-offs** – The dollar amount of write-downs net on loans in the segment that were charged-off during the reporting month, net of any recoveries in the reporting
month on loans in the segment that were previously charged-off. Generally, $ Net Charge-offs should equal [$ Gross Contractual Charge-offs + $Bankruptcy Charge-offs — $ Recoveries].

12. **Adjustment factor to reconcile $ gross contractual charge-offs to $ net charge-offs**
   
   – If it is not the case that $ Net Charge-offs equals [$ Gross Contractual Charge-offs + $ Bankruptcy Charge-offs — $ Recoveries], provide the value of $ Net Charge-offs minus [$ Gross Contractual Charge-offs + $ Bankruptcy Charge-offs — $ Recoveries] in this variable, and separately provide an explanation for the difference. In a separate document included in the submission, provide an explanation for such a difference (for example, fraud losses are also included in the reporting BHC’s or IHC’s $ Net Charge-offs variable). If the adjustment factor variable represents more than one factor leading to the difference, provide a separate breakout of the multiple factors.

13. **$ O/S for accounts that were 30+ DPD in last 24 months** – The total receivables for the segment as of month-end that was 30 or more days past due at any given time in the past 24 months ending in the reference month. Exclude charged-off accounts when making this calculation.

14. **# Accounts that were 30+ DPD in last 24 months** – The total number of accounts for the segment as of month-end that were 30 or more days past due at any given time in the past 24 months ending in the reference month. Exclude charged-off accounts when making this calculation.
A.4 – International Home Equity

This section provides general guidance and data definitions for the International Home Equity Worksheet. In this worksheet, include all international home equity loans (not US or US territories and possessions) secured by real estate as defined in the FR Y-9C, Schedule HC-C, item 1, that meet the loan criteria of item 1.c.1 and 1.c.2.b. Note that this includes international first lien and second lien home equity lines. Only include loans and leases held for investment at amortized cost; do not include loans or leases held for sale or held for investment and measured at fair value under the fair value option. For international first lien mortgages, see instructions for Worksheet 5.

Segment the portfolio along all combinations of the segment variables listed in Section A below. There are two product type segments, three origination industry standard credit score or equivalent segments, four geography segments, two age segments, two origination LTV segments, and five delinquency status segments; therefore, the portfolio must be divided into a total of 2*3*4*2*2*5 = 480 distinct segments. Each segment should be identified by a unique twelve-digit segment ID (variable name: SEGMENT_ID) based on the segment ID positions and attribute codes listed in Table A.4.a. For example, the segment containing HELOCs (product type segment “02”) that had an origination FICO score or equivalent of greater than 660 (original industry standard credit score or equivalent segment “02”), where the borrowers reside in the Asia Pacific region (geography segment “04”), are greater than three years old (age segment “02”), had an origination LTV of less than 80 percent (original LTV segment “01”), and are 180+ DPD (delinquency status segment “05”) should be identified by the segment ID “020204020105”. When reporting the segment ID, do not drop leading zeroes.

For each month in the required reporting period, report the summary variables listed below in Section B for each of the 480 portfolio segments. First time filers must submit all data for each month from January 2007 to the end of the current reporting period; returning filers must submit all data for each month in the current reporting period only. BHCs and IHCs should only include owned loans, exclude loans serviced for other investors.

Start each row of data with your BHC or IHC name (Variable name: BHC_NAME), your RSSD ID number (Variable name: RSSD_ID), the reporting month (Variable name: REPORTING_MONTH), the portfolio ID (Variable name: PORTFOLIO_ID) and segment ID (variable name: SEGMENT_ID). Use the portfolio ID “IntHE” for this worksheet. For each row, populate the segment variables listed in Table A.4.a and the summary variables listed in Table A.4.b. Please provide all dollar amounts in millions.

Detailed instructions on how to submit the data will be provided separately.

A. Segment Variables
Segment the portfolio along the following segment variables as described above. For each resulting segment, report the summary variables described in Section B.

1. Product type – Segment the portfolio into product types based on specific features of the loan. The portfolio should be segmented into two product types:
   01 - HELOAN
   02 - HELOC

2. Original commercially available credit bureau score or equivalent – Segment the portfolio by the credit score of the borrower at origination using a commercially available credit bureau score (e.g., FICO Score, VantageScore, or another qualifying credit score). The original credit score used to assign a loan to a segment must
be the score upon which the original underwriting decision was based. If the underwriting decision was based on an internal score, please map this score to an industry standard credit score. Please provide supporting documentation listing the credit score supplied or mapped to.

The ranges below should be used for loans for which FICO was either the original credit score used at origination or the commercially available credit bureau score to which an internal credit score was mapped. Ranges for other commercially available credit bureau scores will be provided upon request.

01 - <= 660
02 - > 660
03 - N/A—Original credit score is missing or unknown

3. **Geography** – Report the region in which the property is located; divide the portfolio into the following four geographical area designations:
   - 01 - Region 1: Canada
   - 02 - Region 2: EMEA—Europe, Middle East, and Africa
   - 03 - Region 3: LATAM—Latin America and Caribbean
   - 04 - Region 4: APAC—Asia-Pacific

4. **Age** – Age refers to the amount of time that has elapsed since the account was originated. There are two possible ages to report:
   - 01 - <= Three years old
   - 02 - > Three years old

5. **Original LTV (or CLTV for 2nds)** – The original combined loan-to-value ratio is the original amount of the loan or line, in addition to any senior liens, divided by the property value at the time of origination. Divide the portfolio as follows:
   - 01 - < 80
   - 02 - >=80

6. **Delinquency status** – Divide the portfolio into the following five delinquency statuses:
   - 01 - Current & 1-29 days past due (DPD): Accounts that are not past due (accruing and non-accruing) or are 1-29 DPD (accruing and non-accruing) as of month-end.
   - 02 - 30-89 DPD: Accounts that are 30 to 89 days past due (accruing and non-accruing) as of month-end.
   - 03 - 90-119 DPD: Accounts that are 90 to 119 days past due (accruing and non-accruing) as of month-end.
   - 04 - 120-179 DPD: Accounts that are 120 to 179 days past due (accruing and non-accruing) as of month-end.
   - 05 - 180+ DPD: Accounts that are 180 or more days past due (accruing and non-accruing) as of month-end.

B. **Summary Variables**
For each month in the reporting period, report the following summary variables for each segment described in Section A.

1. **# Accounts** – Total number of accounts on the book for the segment as of month-end.

2. **$ Outstandings** – Total principal amount outstanding as of the end of the month. This should be reported as unpaid principal balance (UPB) gross of any charge-offs. In other words, the $ outstanding should not reflect any accounting based write-downs and should only be reduced to zero when the loan has been liquidated – either paid in full, charged off, or other real estate owned (OREO) sold.
3. **$ Commitment (HELOC only)** – The total dollar amount of HELOC credit lines on the book for the segment as of month-end. If there is no credit limit on certain accounts, report the purchase or shadow limit. A shadow limit is defined as an internal BHC or IHC credit limit metric used for line management for lines that do not have a published credit limit. Report this variable only for HELOC products.

4. **# New accounts** – The total number of new accounts originated (or purchased) in the given month for the segment as of month-end.

5. **$ New accounts** – The total dollar amount of new accounts originated (or purchased) in the given month for the segment as of month-end.

6. **$ New commitments (HELOC only)** – The total dollar amount of new HELOC credit lines booked on the system in the reporting month. Report this variable only for HELOC products.

7. **$ Commitment increases (HELOC only)** – The dollar amount increase on existing HELOC credit lines in the reporting-month. Report this variable only for HELOC products.

8. **$ Commitment decreases (HELOC only)** – The dollar amount decrease on existing HELOC credit lines in the reporting-month. Report this variable only for HELOC products.

9. **$ Gross contractual charge-offs** – The dollar amount of write-downs on loans in the segment that were charged-off during the reporting month, except where the charge-off arises from the bankruptcy of the borrower (see the variable $ Bankruptcy Charge-offs). Also include write-downs to fair value on loans transferred to the held-for-sale account during the reporting month. The amount reported here should be consistent with the amount reported on Schedule HI-B, Part I, Column A of the FR Y-9C. For the Delinquency Status segment, categorize charged-off loans by their delinquency status at charge-off.

10. **$ Bankruptcy charge-offs** – The dollar amount of write-downs on loans in the segment that were charged-off due to bankruptcy during the reporting month. The amount reported here should be consistent with the amount reported on Schedule HI-B, Part I, Column A of the FR Y-9C. For the Delinquency Status segment, categorize charged-off loans by their delinquency status at charge-off.

11. **$ Recoveries** – The dollar amount recovered during the reporting month on loans in the segment that were previously charged-off. The amount reported here should be consistent with the amount reported on Schedule HI-B, Part I, Column B of the FR Y-9C. For the Delinquency Status segment, categorize charged-off loans by their delinquency status at charge-off. Reversals of recoveries should be recorded as negative recoveries.

12. **$ Net charge-offs** – The dollar amount of write-downs net on loans in the segment that were charged-off during the reporting month, net of any recoveries in the reporting month on loans in the segment that were previously charged-off. Generally, $ Net Charge-offs should equal [$ Gross Contractual Charge-offs + $Bankruptcy Charge-offs — $ Recoveries].

13. **Adjustment factor to reconcile $ gross contractual charge-offs to $ net charge-offs** – If it is not the case that $ Net Charge-offs equals [$ Gross Contractual Charge-offs + $}
Bankruptcy Charge-offs — $ Recoveries], provide the value of $ Net Contractual Charge-offs minus [$ Gross Contractual Charge-offs + $ Bankruptcy Charge-offs — $ Recoveries] in this variable. As a separate document included in the submission, provide an explanation for such a difference (for example, fraud losses are also included in the BHC’s or IHC’s $ Net Charge-offs variable). If the adjustment factor variable represents more than one factor leading to the difference, provide a separate breakout of the multiple factors.

14. $ Foreclosure - The total unpaid principal balance of loans in the foreclosure process. These dollars are pre-OREO and should be coded as a foreclosure in the system.

15. $ New foreclosure - The total unpaid principal balance of loans that entered the foreclosure process in the reporting month. These dollars are pre-OREO and should be coded as a foreclosure in the system.

16. $ Other Real Estate Owned (OREO) - The total unpaid principal balance of mortgages where the bank has obtained the title at foreclosure sale and the property is on the market and available for sale. Also include instances where the bank has obtained the title but the availability for sale is not known.

17. $ New OREO - The total unpaid principal balance of foreclosed loans where the institution has bought back the property.
This section provides general guidance and data definitions for the International First Lien Mortgage Worksheet. In this worksheet, include all international (not US or US territories or possessions) first lien mortgage loans secured by real estate as defined in the FR Y-9C, Schedule HC-C, item 1 which meet the loan criteria of item 1.c.2.a. Include international first lien residential mortgage and international first lien closed-end home equity loans. Only include loans and leases held for investment at amortized cost; do not include loans or leases held for sale or held for investment and measured at fair value under the fair value option.

Segment the portfolio along all combinations of the segment variables listed in Section A below. There are two product type segments, three origination industry standard credit score or equivalent segments, four geography segments, two age segments, two origination LTV segments, and five delinquency status segments; therefore, the portfolio must be divided into a total of 2*3*4*2*2*5 = 480 distinct segments. Each segment should be identified by a unique twelve-digit segment ID (variable name: SEGMENT_ID) based on the segment ID positions and attribute codes listed in Table A.5.a. For example, the segment containing fixed-rate loans (product type segment “01”) that had an origination FICO score or equivalent of greater than 660 (original industry standard credit score or equivalent segment “02”), where the borrowers reside in the Asia Pacific region (geography segment “04”), are greater than three years old (age segment “02”), had an origination LTV of less than 80 percent (original LTV segment “01”), and are 180+ DPD (delinquency status segment “05”) should be identified by the segment ID “010204020105”. When reporting the segment ID, do not drop leading zeroes.

For each month in the required reporting period, report the summary variables listed below in Section B for each of the 480 portfolio segments described above. First time filers must submit all data for each month from January 2007 to the end of the current reporting period; returning filers must submit all data for each month in the current reporting period.

Start each row of data with your BHC or IHC name (Variable name: BHC_NAME), your RSSD ID number (Variable name: RSSD_ID), the reporting month (Variable name: REPORTING_MONTH), the portfolio ID (Variable name: PORTFOLIO_ID), and segment ID (variable name: SEGMENT_ID). Use the portfolio ID “IntFM” for your Portfolio ID within this worksheet. For each row, populate the segment variables listed in Table A.5.a and the summary variables listed in Table A.5.b. Provide all dollar amounts in millions.

Detailed instructions on how to submit the data will be provided separately.

A. Segment Variables
Segment the portfolio along the following segment variables as described above. For each resulting segment, report the summary variables described in Section B.

1. Product type – Segment the portfolio into product types based on payment terms of the loan (at origination). The portfolio should be segmented into two product types:
   01 - Fixed Rate
   02 - Other

2. Original commercially available credit bureau score or equivalent – Segment the portfolio by the credit score of the borrower at origination using a commercially available credit bureau score (e.g. FICO Score, VantageScore, or another qualifying credit score). The original credit score used to assign a loan to a segment must be the score upon which the original underwriting decision was based. If the
underwriting decision was based on an internal score, please map this score to an industry standard credit score. Please provide supporting documentation listing the credit score supplied or mapped to.

The ranges below should be used for loans for which FICO was either the original credit score used at origination or the commercially available credit bureau score to which an internal credit score was mapped. Ranges for other commercially available credit bureau scores will be provided upon request.

01 - <= 660
02 - > 660
03 - N/A—Original credit score is missing or unknown

3. Geography – Report the region in which the property is located. Segment the portfolio into the following four geographical area designations:

01 - Region 1: Canada
02 - Region 2: EMEA—Europe, Middle East, and Africa
03 - Region 3: LATAM—Latin America and Caribbean
04 - Region 4: APAC—Asia Pacific

4. Age – Age refers to the time that has elapsed since the account was originated. There are two possible ages to report:

01 - <= Three years old
02 - > Three years old

5. Original LTV – The original loan-to-value ratio is the original amount of the loan divided by the property value at the time of origination. Segment the portfolio as follows:

01 - < 80
02 - >= 80

6. Delinquency status – Segment the portfolio into the following five delinquency statuses:

01 - Current & 1-29 days past due (DPD): Accounts that are not past due (accruing and non-accruing) or are 1-29 DPD (accruing and non-accruing) as of month-end.
02 - 30-89 DPD: Accounts that are 30 to 89 days past due (accruing and non-accruing) as of month-end.
03 - 90-119 DPD: Accounts that are 90 to 119 days past due (accruing and non-accruing) as of month-end.
04 - 120-179 DPD: Accounts that are 120 to 179 days past due (accruing and non-accruing) as of month-end.
05 - 180+ DPD: Accounts that are 180 or more days past due (accruing and non-accruing) as of month-end.

B. Summary Variables
For each month in the reporting period, report the following summary variables for each segment described in Section A.

1. # Accounts – Total number of accounts on the book for the segment as of month-end.

2. $ Outstandings – Total principal amount outstanding as of the end of the month. This should be reported as unpaid principal balance gross of any charge-offs. In other words, the $ outstanding should not reflect any accounting based write-downs and should only be reduced to zero when the loan has been liquidated – either paid in full, charged off, or Other Real Estate Owned (OREO) sold.
3. **# New accounts** – The total number of new accounts originated (or purchased) in the given month for the segment as of month-end.

4. **$ New accounts** – The total dollar amount of new accounts originated (or purchased) in the given month for the segment as of month-end.

5. **$ Gross contractual charge-offs** – The dollar amount of write-downs on loans in the segment that were charged-off during the reporting month, except where the charge-off arises from the bankruptcy of the borrower (see the variable $ Bankruptcy Charge-offs). Also include write-downs to fair value on loans transferred to the held-for-sale account during the reporting month. The amount reported here should be consistent with the amount reported on Schedule HI-B, Part I, Column A of the FR Y-9C. For the Delinquency Status segment, categorize charged-off loans by their delinquency status at charge-off.

6. **$ Bankruptcy charge-offs** – The dollar amount of write-downs on loans in the segment that were charged-off due to bankruptcy during the reporting month. The amount reported here should be consistent with the amount reported on Schedule HI-B, Part I, Column A of the FR Y-9C. For the Delinquency Status segment, categorize charged-off loans by their delinquency status at charge-off.

7. **$ Recoveries** – The dollar amount recovered during the reporting month on loans in the segment that were previously charged-off. The amount reported here should be consistent with the amount reported on Schedule HI-B, Part I, Column B of the FR Y-9C. For the Delinquency Status segment, categorize charged-off loans by their delinquency status at charge-off. Reversals of recoveries should be recorded as negative recoveries.

8. **$ Net charge-offs** – The dollar amount of write-downs net on loans in the segment that were charged-off during the reporting month, net of any recoveries in the reporting month on loans in the segment that were previously charged-off. Generally, $ Net Charge-offs should equal [$ Gross Contractual Charge-offs + $Bankruptcy Charge-offs — $ Recoveries].

9. **Adjustment factor to reconcile $ gross contractual charge-offs to $ net charge-offs** – If it is not the case that $ net charge-offs equals [$ gross contractual charge-offs + $ bankruptcy charge-offs — $ recoveries], please provide the value of $ net contractual charge-offs minus [$ gross contractual charge-offs + $ bankruptcy charge-offs — $ recoveries] in this variable. In a separate document included in your submission, provide an explanation for such a difference (for example, fraud losses are also included in the BHC’s or IHC’s $ net charge-offs variable). If the adjustment factor variable represents more than one factor leading to the difference, provide a separate breakout of the multiple factors.

10. **$ Foreclosure** - The total unpaid principal balance of loans in the foreclosure process. These dollars are pre-OREO and should be coded as a foreclosure in the system.

11. **$ New foreclosure** - The total unpaid principal balance of loans that entered the foreclosure process in the reporting month. These dollars are pre-OREO and should be coded as a foreclosure in the system.

12. **$ Other Real Estate Owned (OREO)** - The total unpaid principal balance of mortgages where the bank has obtained the title at foreclosure sale and the property is on the market and available for sale. Also include instances where the bank has obtained the
title but the availability for sale is not known.

13. $ New OREO - The total unpaid principal balance of foreclosed loans where the institution has bought back the property in auction in the reporting month.
A.6 – International Other Consumer Schedule

In this worksheet, include all international loans defined in the FR Y-9C, Schedule HC-C, item 6.b and 6.d, excluding student loans and non-purpose securities based loans and should also include all international non-auto leases as defined in the FR Y-9C, Schedule HC-C, item 10.a. Only include loans and leases held for investment at amortized cost; do not include loans or leases held for sale or held for investment and measured at fair value under the fair value option.

Segment the portfolio along all combinations of the segment variables listed in Section A below. There are five product type segments, five delinquency status segments, three original industry standard credit score or equivalent segments, two original LTV ratio segments, and four geography segments; therefore, the portfolio must be divided into a total of 5*5*3*2*4 = 600 distinct segments. Each segment should be identified by a unique ten-digit segment ID (variable name: SEGMENT_ID) based on the segment ID positions and attribute codes listed in Table A.6.a. For example, the segment containing secured installment loans (product type segment “02”) that are 120+ DPD (delinquency status segment “05”), had an origination FICO score or equivalent of greater than 620 (original industry standard credit score or equivalent segment “02”), had an origination LTV ratio of greater than 70 percent (original LTV ratio segment “02”), and that were made to borrowers residing in the Asia Pacific region (geography segment “04”) should be identified by the segment ID “0205020204”. When reporting the segment ID, do not drop leading zeroes.

For each month in the required reporting period, report the summary variables listed below in Section B for each of the 600 portfolio segments described above. First time filers must submit all data for each month from January 2007 to the end of the current reporting period; returning filers must submit all data for each month in the current reporting period.

Start each row of data with your BHC or IHC name (Variable name: BHC_NAME), your RSSD ID number (Variable name: RSSD_ID), the reporting month (Variable name: REPORTING_MONTH), the portfolio ID (Variable name: PORTFOLIO_ID), and segment ID (variable name: SEGMENT_ID). Use “IntlOthCons” for portfolio ID for this worksheet. For each row, populate the segment variables listed in Table A.6.a and the summary variables listed in Table A.6.b. Provide all dollar amounts in millions.

Detailed instructions on how to submit the data will be provided separately.

A. **Segment Variables**

Segment the portfolio along the following segment variables as described above. For each resulting segment, report the summary variables described in Section B.

1. **Product type** – Reporting BHCs and IHCs should segment the portfolio into the following five product types based on the various features of the credit:
   - 01 - Secured-Revolving
   - 02 - Secured-Installment
   - 03 - Unsecured-Revolving
   - 04 - Unsecured-Installment
   - 05 - Overdraft

2. **Delinquency status** – Reporting BHCs and IHCs should segment the portfolio into the following five delinquency statuses:
   - 01 - Current and 1-29 days past due (DPD): Accounts that are not past due (accruing and non-accruing) as of month-end and accounts that are 1 to 29 days past due
(accruing and non-accruing) as of month-end.

02 - 30-59 DPD: Accounts that are 30 to 59 days past due (accruing and non-accruing) as of month-end.

03 - 60-89 DPD: Accounts that are 60 to 89 days past due (accruing and non-accruing) as of month-end.

04 - 90-119 DPD: Accounts that are 90 to 119 days past due (accruing and non-accruing) as of month-end.

05 - 120+ DPD: Accounts that are 120 days or more past due (accruing and non-accruing) as of month-end.

3. **Original commercially available credit bureau score or equivalent** –
   Segment the portfolio by the credit score of the borrower at origination using a commercially available credit bureau score (e.g. FICO Score, VantageScore, or another qualifying credit score). The original credit score used to assign a loan to a segment must be the score upon which the original underwriting decision was based. If the underwriting decision was based on an internal score, please map this score to an industry standard credit score. Please provide supporting documentation listing the credit score supplied or mapped to.

   The ranges below should be used for loans for which FICO was either the original credit score used at origination or the commercially available credit bureau score to which an internal credit score was mapped. Ranges for other commercially available credit bureau scores will be provided upon request.

   01 - <= 620
   02 - > 620
   03 - N/A—Original credit score is missing or unknown

4. **Original LTV** – The original combined loan-to-value ratio is the original amount of the loan or line, in addition to any senior liens, divided by the collateral value at the time of origination. For loans where the loan-to-value ratio is not applicable, include the lowest ratio for a segment identifier. Segment the portfolio as follows:

   01 - <= 70 or not applicable
   02 - > 70

5. **Geography** – Segment the portfolio into the following four geographical area designations. The borrower’s current place of residency should be used to define the region.

   01 - Region 1: Canada
   02 - Region 2: EMEA—Europe, Middle East, and Africa
   03 - Region 3: LATAM—Latin America and Caribbean
   04 - Region 4: APAC—Asia-Pacific

**B. Summary Variables**
For each month in the reporting period, report the following summary variables for each segment described in Section A.

1. **# Accounts** – Total number of accounts on the book for the segment being reported as of month-end.

2. **$ Outstandings** – The total unpaid principal balance for accounts on the book for the segment being reported as of month-end.

3. **$ Gross contractual charge-offs** – The dollar amount of write-downs on loans in the segment that were charged-off during the reporting month, except where the charge-off
arises from the bankruptcy of the borrower (see the variable $ Bankruptcy Charge-offs). Also include write-downs to fair value on loans transferred to the held-for-sale account during the reporting month. The amount reported here should be consistent with the amount reported on Schedule HI-B, Part I, Column A of the FR Y-9C. For the Delinquency Status segment, categorize charged-off loans by their delinquency status at charge-off.

4. **$ Bankruptcy charge-offs** – The dollar amount of write-downs on loans in the segment that were charged-off due to bankruptcy during the reporting month. The amount reported here should be consistent with the amount reported on Schedule HI-B, Part I, Column A of the FR Y-9C. For the Delinquency Status segment, categorize charged-off loans by their delinquency status at charge-off.

5. **$ Recoveries** – The dollar amount recovered during the reporting month on loans in the segment that were previously charged-off. The amount reported here should be consistent with the amount reported on Schedule HI-B, Part I, Column B of the FR Y-9C. For the Delinquency Status segment, categorize charged-off loans by their delinquency status at charge-off. Reversals of recoveries should be recorded as negative recoveries.

6. **$ Net charge-offs** – The dollar amount of write-downs net on loans in the segment that were charged-off during the reporting month, net of any recoveries in the reporting month on loans in the segment that were previously charged-off. Generally, $ Net Charge-offs should equal [$ Gross Contractual Charge-offs + $Bankruptcy Charge-offs — $ Recoveries].

7. **# New accounts** – The total number of new accounts originated in the given month for the segment being reported as of month-end.

8. **$ New commitments** – The total dollar amount of new commitments on accounts originated in the given month for the segment being reported as of month-end. If unknown for some accounts due to acquisition or merger, report the credit line at acquisition.
A.7 – US Other Consumer

In this worksheet, include all domestic loans as defined in the FR Y-9C, Schedule HC-C, items 6.b and 6.d, excluding student loans and non-purpose securities based loans. Include domestic non-auto leases included as defined in the FR Y-9C, Schedule HC-C, item 10.a. Only include loans and leases held for investment at amortized cost; do not include loans or leases held for sale or held for investment and measured at fair value under the fair value option.

Segment the portfolio along all combinations of the segment variables listed in Section A below. There are five product type segments, five delinquency status segments, three original industry standard credit score or equivalent segments, and three original LTV ratio segments; therefore, the portfolio must be divided into a total of $5 \times 5 \times 3 \times 3 = 225$ distinct segments. Each segment should be identified by a unique eight-digit segment ID (variable name: SEGMENT_ID) based on the segment ID positions and attribute codes listed in Table A.7.a. For example, the segment containing secured installment loans (product type segment “02”) that are 120+ DPD (delinquency status segment “05”), had an origination FICO score or equivalent of greater than 620 (original industry standard credit score or equivalent segment “02”), and had an origination LTV ratio of greater than or equal to 100 percent (original LTV ratio segment “03”) should be identified by the segment ID “02050203”. When reporting the segment ID, do not drop leading zeroes.

For each month in the required reporting period, report the summary variables listed below in Section B for each of the 225 portfolio segments described above. First time filers must submit all data for each month from January 2007 to the end of the current reporting period; returning filers must submit all data for each month in the current reporting period.

Start each row of data with your BHC or IHC name (Variable name: BHC_NAME), your RSSD ID number (Variable name: RSSD_ID), the reporting month (Variable name: REPORTING_MONTH), the portfolio ID (Variable name: PORTFOLIO_ID), and segment ID (variable name: SEGMENT_ID). Use “USOthCons” for the portfolio ID within this worksheet. For each row, populate the segment variables listed in Table A.7.a and the summary variables listed in Table A.7.b. Please provide all dollar amounts in millions.

Detailed instructions on how to submit the data will be provided separately.

A. Segment Variables

Segment the portfolio along the following segment variables as described above. For each resulting segment, report the summary variables described in Section B.

1. **Product type** – Segment the portfolio into the following five product types based on the various features of the credit:
   - 01 - Secured-Revolving
   - 02 - Secured-Installment
   - 03 - Unsecured-Revolving
   - 04 - Unsecured-Installment
   - 05 - Overdraft

2. **Delinquency status** – Segment the portfolio into the following five delinquency statuses:
   - 01 - Current and 1-29 days past due (DPD): Accounts that are not past due (accruing and non-accruing) as of month-end and accounts that are 1 to 29 days past due (accruing and non-accruing) as of month-end.
   - 02 - 30-59 DPD: Accounts that are 30 to 59 days past due (accruing and non-accruing)
as of month-end.
03 - 60-89 DPD: Accounts that are 60 to 89 days past due (accruing and non-accruing) as of month-end.
04 - 90-119 DPD: Accounts that are 90 to 119 days past due (accruing and non-accruing) as of month-end.
05 - 120+ DPD: Accounts that are 120 days or more past due (accruing and non-accruing) as of month-end.

3. **Original commercially available credit bureau score or equivalent** –
Segment the portfolio by the credit score of the borrower at origination using a commercially available credit bureau score (e.g. FICO Score, VantageScore, or another qualifying credit score). The original credit score used to assign a loan to a segment must be the score upon which the original underwriting decision was based. If the underwriting decision was based on an internal score, please map this score to an industry standard credit score. Please provide supporting documentation listing the credit score supplied or mapped to.

The ranges below should be used for loans for which FICO was either the original credit score used at origination or the commercially available credit bureau score to which an internal credit score was mapped. Ranges for other commercially available credit bureau scores will be provided upon request.

01 - <= 620
02 - > 620
03 - N/A—Original credit score is missing or unknown

4. **Original LTV**– The original combined loan-to-value ratio is the original amount of the loan or line, in addition to any senior liens, divided by the collateral value at the time of origination. For unsecured loans for which loan-to-value is not applicable, report the summary variables in the segment entitled <=70 or not applicable. Segment the portfolio as follows:
01 - <= 70 or not applicable
02 - > 70 and < 100
03 - >= 100

B. **Summary Variables**
For each month in the reporting period, report the following summary variables for each segment described in Section A.

1. **# Accounts** – Total number of accounts on the book for the segment as of month-end.
2. **$ Outstandings** – The total unpaid principal balance for accounts on the book for the segment as of month-end.
3. **$ Gross contractual charge-offs** – The dollar amount of write-downs on loans in the segment that were charged-off during the reporting month, except where the charge-off arises from the bankruptcy of the borrower (see the variable $ Bankruptcy Charge-offs). Also include write-downs to fair value on loans transferred to the held-for-sale account during the reporting month. The amount reported here should be consistent with the amount reported on Schedule H1-B, Part I, Column A of the FR Y-9C. For the Delinquency Status segment, categorize charged-off loans by their delinquency status at charge-off.
4. **$ Bankruptcy charge-offs** – The dollar amount of write-downs on loans in the segment that were charged-off due to bankruptcy during the reporting month. The amount reported here should be consistent with the amount reported on Schedule HI-B, Part I, Column A of the FR Y-9C. For the Delinquency Status segment, categorize charged-off loans by their delinquency status at charge-off.

5. **$ Recoveries** – The dollar amount recovered during the reporting month on loans in the segment that were previously charged-off. The amount reported here should be consistent with the amount reported on Schedule HI-B, Part I, Column B of the FR Y-9C. For the Delinquency Status segment, categorize charged-off loans by their delinquency status at charge-off. Reversals of recoveries should be recorded as negative recoveries.

6. **$ Net Charge-offs** – The dollar amount of write-downs net on loans in the segment that were charged-off during the reporting month, net of any recoveries in the reporting month on loans in the segment that were previously charged-off. Generally, $ Net Charge-offs should equal [$ Gross Contractual Charge-offs + $ Bankruptcy Charge-offs — $ Recoveries].

7. **# New accounts** – The total number of new accounts originated in the given month for the segment as of month-end.

8. **$ New commitments** – The total dollar amount of new commitments on accounts originated in the given month for the segment as of month-end. If unknown for some accounts due to acquisition or merger, report the credit line at acquisition.
A.8 – International Small Business

In this worksheet, include all "scored" or "delinquency managed" international small business loans. The main differentiating factor between corporate loans and small business loans is how the consolidated holding company evaluates the creditworthiness of the borrower. For small business lending, banks look at the credit score of the borrower (scored rating) and/or use delinquency management. Therefore, small business loans are loans that are "scored" or "delinquency managed" for which a commercial internal risk rating is not used or that uses a different scale than other corporate loans. Include international small business loans as defined in the FR Y-9C, Schedule HC-C included in items 2.a, 2.b, 3, 4.a, 4.b, 7, 9.a, 9.b.2, and 10.b. Exclude corporate and SME credit card loans as defined in the FR Y-9C, Schedule HC-C, item 4.b. Exclude all non-purpose securities-based loans and loans for purchasing and carrying securities. Only include loans and leases held for investment at amortized cost; do not include loans or leases held for sale or held for investment and measured at fair value under the fair value option. For domestic small business loans, see the instructions for Worksheet 9.

Segment the portfolio along all combinations of the segment variables listed in Section A below. There are three product type segments, two age segments, four geography segments, three original industry standard credit score or equivalent segments, five delinquency status segments, and two secured or unsecured segments; therefore, the portfolio must be divided into a total of $3^2*4^3*3^5*5^2 = 720$ distinct segments. Each segment should be identified by a unique twelve-digit segment ID (variable name: SEGMENT_ID) based on the segment ID positions and attribute codes listed in Table A.8.a. For example, the segment containing term loans (product type segment “02”) that are greater than three years old (age segment “02”), were made to borrowers that reside in the Asia Pacific region (geography segment “04”), had an origination FICO score or equivalent of greater than 620 (original industry standard credit score or equivalent segment “02”), are 120+ DPD (delinquency status segment “05”), and are secured (secured or unsecured segment “01”) should be identified by the segment ID “020204020501”. When reporting the segment ID, do not drop leading zeroes.

For each month in the required reporting period, report the summary variables listed below in Section B for each of the 720 portfolio segments described above. First time filers must submit all data for each month from January 2007 to the end of the current reporting period; returning filers must submit all data for each month in the current reporting period.

Start each row of data with your BHC name (Variable name: BHC_NAME), your RSSD ID number (Variable name: RSSD_ID), the reporting month (Variable name: REPORTING_MONTH), the portfolio ID (Variable name: PORTFOLIO_ID), and segment ID (variable name: SEGMENT_ID). Use “IntSB” for the portfolio ID within this worksheet. For each row, populate the segment variables listed in Table A.8.a and the summary variables listed in Table A.8.b. Provide all dollar amounts in millions.

Detailed instructions on how to submit the data will be provided separately.

A. Segment Variables
Segment the portfolio along the following segment variables as described above. For each resulting segment, report the summary variables described in Section B.

1. Product type - Segment the portfolio into the following product types as of month-end:
   01 - Line of Credit
   02 - Term Loan
   03 - Other
2. **Age** - Age refers to the time that has elapsed since the account was originated.
   01 - <= Three years old
   02 - > Three years old

3. **Geography** – Segment the portfolio into the following four geographical area designations. The borrower’s current place of residency should be used to define the region.
   01 - Region 1: Canada
   02 - Region 2: EMEA—Europe, Middle East, and Africa
   03 - Region 3: LATAM—Latin America and Caribbean
   04 - Region 4: APAC—Asia-Pacific

4. **Original commercially available credit bureau score or equivalent** – Segment the portfolio by the credit score of the borrower at origination using a commercially available credit bureau score (e.g. FICO Score, VantageScore, or another qualifying credit score). The original credit score used to assign a loan to a segment must be the score upon which the original underwriting decision was based. If the underwriting decision was based on an internal score, please map this score to an industry standard credit score. Please provide supporting documentation listing the credit score supplied or mapped to.
   The ranges below should be used for loans for which FICO was either the original credit score used at origination or the commercially available credit bureau score to which an internal credit score was mapped. Ranges for other commercially available credit bureau scores will be provided upon request.
   01 - <= 620
   02 - > 620
   03 - N/A – Original credit score is missing or unknown

5. **Delinquency status** - Segment the portfolio into the following five delinquency statuses:
   01 - Current and 1-29 days past due (DPD): Accounts that are not past due (accruing and non-accruing) as of month-end and accounts that are 1 to 29 days past due (accruing and non-accruing) as of month-end.
   02 - 30-59 DPD: Accounts that are 30 to 59 days past due (accruing and non-accruing) as of month-end.
   03 - 60-89 DPD: Accounts that are 60 to 89 days past due (accruing and non-accruing) as of month-end.
   04 - 90-119 DPD: Accounts that are 90 to 119 days past due (accruing and non-accruing) as of month-end.
   05 - 120+ DPD: Accounts that are 120 or more days past due (accruing and non-accruing) as of month-end.

6. **Secured or unsecured**: Segment the portfolio based on the following two categories:
   01 - Secured
   02 - Unsecured

**B. Summary Variables**
For each month in the reporting period, report the following variables for each segment described in Section A.

1. **# Accounts** – Total number of accounts on the book for the segment as of month-end.
2. **$ Outstandings** – Total unpaid principal balance for accounts on the book for the segment as of month-end.
3. **# New accounts** – The total number of new accounts originated (or purchased) in the given month for the segment as of month-end.

4. **$ New accounts** – The total dollar amount of new accounts originated (or purchased) in the given month for the segment as of month-end.

5. **$ Commitments** – The total dollar amount of commitments for the segment as of month-end.

6. **$ Modifications** – Total unpaid principal balance of loans that have been adjusted as part of a loan modification program. For purposes of this Schedule, a loan modification occurs when the terms of the loan were changed from those stated in the original loan contract as part of loss mitigation efforts.

7. **$ Gross contractual charge-offs** – The dollar amount of write-downs on loans in the segment that were charged-off during the reporting month, except where the charge-off arises from the bankruptcy of the borrower (see the variable $ Bankruptcy Charge-offs). Also include write-downs to fair value on loans transferred to the held-for-sale account during the reporting month. The amount reported here should be consistent with the amount reported on Schedule HI-B, Part I, Column A of the FR Y-9C. For the Delinquency Status segment, categorize charged-off loans by their delinquency status at charge-off.

8. **$ Bankruptcy charge-offs** – The dollar amount of write-downs on loans in the segment that were charged-off due to bankruptcy during the reporting month. The amount reported here should be consistent with the amount reported on Schedule HI-B, Part I, Column A of the FR Y-9C. For the Delinquency Status segment, categorize charged-off loans by their delinquency status at charge-off.

9. **$ Recoveries** The dollar amount recovered during the reporting month on loans in the segment that were previously charged-off. The amount reported here should be consistent with the amount reported on Schedule HI-B, Part I, Column B of the FR Y-9C. For the Delinquency Status segment, categorize charged-off loans by their delinquency status at charge-off. Reversals of recoveries should be recorded as negative recoveries.

10. **$ Net charge-offs** – The dollar amount of write-downs net on loans in the segment that were charged-off during the reporting month, net of any recoveries in the reporting month on loans in the segment that were previously charged-off. Generally, $ Net Charge-offs should equal [$ Gross Contractual Charge-offs + $Bankruptcy Charge-offs — $ Recoveries].

11. **Adjustment factor to reconcile $ gross contractual charge-offs to $ net charge-offs** – If it is not the case that $ net charge-offs equals [$ gross contractual charge-offs + $ bankruptcy charge-offs — $ recoveries], provide the value of $ net charge-offs minus [$ gross contractual charge-offs + $ bankruptcy charge-offs — $ recoveries] in this variable, and separately provide an explanation for the difference. As a separate document included in the submission, provide an explanation for such a difference (for example, fraud losses are also included in the reporting BHC’s or IHC’s $ net charge-offs variable). If the adjustment factor variable represents more than one factor leading to the difference, provide a separate breakout of the multiple factors.
A.9 – US Small Business

In this worksheet, include all "scored" or "delinquency managed" domestic small business loans. The main differentiating factor between corporate loans and small business loans is how the consolidated holding company evaluates the creditworthiness of the borrower. For small business lending, banks look at the credit score of the borrower (scored rating) and/or use delinquency management. Therefore, small business loans are loans that are "scored" or "delinquency managed" for which a commercial internal risk rating is not used or that uses a different scale than other corporate loans. Include domestic small business loans as defined in the FR Y-9C, Schedule HC-C included in items 2.a, 2.b, 3, 4.a, 4.b, 7, 9.a, 9.b.2, and 10.b. Exclude corporate and SME credit card loans as defined in the FR Y-9C, Schedule HC-C, item 4.a. Exclude all non-purpose securities-based loans and loans for purchasing and carrying securities. Only include loans and leases held for investment at amortized cost; do not include loans or leases held for sale or held for investment and measured at fair value under the fair value option. For international small business loans, see the instructions for Worksheet 8.

Segment the portfolio along all combinations of the segment variables listed in Section A below. There are three product type segments, two age segments, three original industry standard credit score or equivalent segments, five delinquency status segments, and two secured or unsecured segments; therefore, the portfolio must be divided into a total of 3*2*3*5*2 = 180 distinct segments. Each segment should be identified by a unique ten-digit segment ID (variable name: SEGMENT_ID) based on the segment ID positions and attribute codes listed in Table A.9.a. For example, the segment containing term loans (product segment “02”) that are less than or equal to three years old (age segment “01”), had an origination FICO score or equivalent of greater than 620 (original industry standard credit score or equivalent segment “02”), are 120+ DPD (delinquency status segment “05”), and are secured (secured or unsecured segment “01”) should be identified by the segment ID “0201020501”. When reporting the segment ID, do not drop leading zeroes.

For each month in the required reporting period, report the summary variables listed below in Section B for each of the 180 portfolio segments described above. First time filers must submit all data for each month from January 2007 to the end of the current reporting period; returning filers must submit all data for each month in the current reporting period.

Start each row of data with your BHC or IHC name (Variable name: BHC_NAME), your RSSD ID number (Variable name: RSSD_ID), the reporting month (Variable name: REPORTING_MONTH), the portfolio ID (Variable name: PORTFOLIO_ID) and segment ID (variable name: SEGMENT_ID). Use "USSB" for portfolio ID within this worksheet. For each row, populate the segment variables listed in Table A.9.a and the summary variables listed in Table A.9.b. Provide all dollar amounts in millions.

Detailed instructions on how to submit the data will be provided separately.

A. Segment Variables

Segment the portfolio along the following segment variables as described above. For each resulting segment, report the summary variables described in Section B.

1. **Product type** - Segment the portfolio into the following product types as of month-end:
   - 01 - Line of Credit
   - 02 - Term Loan
   - 03 - Other

2. **Age** - Age refers to the time that has elapsed since the account was originated.
01 - <= Three years old
02 - > Three years old

3. **Original commercially available credit bureau score or equivalent** – Segment the portfolio by the credit score of the borrower at origination using a commercially available credit bureau score (e.g. FICO Score, VantageScore, or another qualifying credit score). The original credit score used to assign a loan to a segment must be the score upon which the original underwriting decision was based. If the underwriting decision was based on an internal score, please map this score to an industry standard credit score. Please provide supporting documentation listing the credit score supplied or mapped to.

The ranges below should be used for loans for which FICO was either the original credit score used at origination or the commercially available credit bureau score to which an internal credit score was mapped. Ranges for other commercially available credit bureau scores will be provided upon request.

- 01 - <= 620
- 02 - > 620
- 03 - N/A - Original credit score is missing or unknown

4. **Delinquency status** - Segment the portfolio into the following five delinquency statuses:

- 01 - Current and 1-29 (days past due) DPD: Accounts that are not past due (accruing and non-accruing) as of month-end and accounts that are 1 to 29 days past due (accruing and non-accruing) as of month-end.
- 02 - 30-59 DPD: Accounts that are 30 to 59 days past due (accruing and non-accruing) as of month-end.
- 03 - 60-89 DPD: Accounts that are 60 to 89 days past due (accruing and non-accruing) as of month-end.
- 04 - 90-119 DPD: Accounts that are 90 to 119 days past due (accruing and non-accruing) as of month-end.
- 05 - 120+ DPD: Accounts that are 120 or more days past due (accruing and non-accruing) as of month-end.

5. **Secured or unsecured**: Segment the portfolio based on the following two categories:

- 01 - Secured
- 02 - Unsecured

**B. Summary Variables**

For each month in the reporting period, report the following summary variables for each segment described in Section A.

1. **# Accounts** – Total number of accounts on the book for the segment as of month-end.

2. **$ Outstandings** – Total unpaid principal balance for accounts on the book for the segment as of month-end.

3. **# New accounts** – The total number of new accounts originated (or purchased) in the given month for the segment as of month-end.

4. **$ New accounts** – The total dollar amount of new accounts originated (or purchased) in the given month for the segment as of month-end.

5. **$ Commitments** – The total dollar amount of commitments for the segment as of
6. **$ Modifications** – Total unpaid principal balance of loans that have been adjusted as part of a loan modification program. For purposes of this Schedule, a loan modification occurs when the terms of the loan were changed from those stated in the original loan contract as part of loss mitigation efforts.

7. **$ Gross contractual charge-offs** – The dollar amount of write-downs on loans in the segment that were charged-off during the reporting month, except where the charge-off arises from the bankruptcy of the borrower (see the variable $ Bankruptcy Charge-offs). Also include write-downs to fair value on loans transferred to the held-for-sale account during the reporting month. The amount reported here should be consistent with the amount reported on Schedule HI-B, Part I, Column A of the FR Y-9C. For the Delinquency Status segment, categorize charged-off loans by their delinquency status at charge-off.

8. **$ Bankruptcy charge-offs** – The dollar amount of write-downs on loans in the segment that were charged-off due to bankruptcy during the reporting month. The amount reported here should be consistent with the amount reported on Schedule HI-B, Part I, Column A of the FR Y-9C. For the Delinquency Status segment, categorize charged-off loans by their delinquency status at charge-off.

9. **$ Recoveries** – The dollar amount recovered during the reporting month on loans in the segment that were previously charged-off. The amount reported here should be consistent with the amount reported on Schedule HI-B, Part I, Column B of the FR Y-9C. For the Delinquency Status segment, categorize charged-off loans by their delinquency status at charge-off. Reversals of recoveries should be recorded as negative recoveries.

10. **$ Net charge-offs** – The dollar amount of write-downs net on loans in the segment that were charged-off during the reporting month, net of any recoveries in the reporting month on loans in the segment that were previously charged-off. Generally, $ Net Charge-offs should equal [$ Gross Contractual Charge-offs + $Bankruptcy Charge-offs — $ Recoveries].

11. **Adjustment factor to reconcile $ gross contractual charge-offs to $ net charge-offs** – If it is not the case that $ net charge-offs equals [$ gross contractual charge-offs + $ bankruptcy charge-offs — $ recoveries], provide the value of $ net charge-offs minus [$ gross contractual charge-offs + $ bankruptcy charge-offs — $ recoveries] in this variable, and separately provide an explanation for the difference. In a separate document included in the submission, provide an explanation for such a difference (for example, fraud losses are also included in the reporting BHC’s or IHC’s $ Net Charge-offs variable). If the adjustment factor variable represents more than one factor leading to the difference, provide a separate breakout of the multiple factors.
A.10 – Student Loan

In this worksheet, include all student loans as defined in the FR Y-9C, Schedule HC-C, lines 6.b and 6.d. Only include loans and leases held for investment at amortized cost; do not include loans or leases held for sale or held for investment and measured at fair value under the fair value option.

Segment the portfolio along all combinations of the segment variables listed in Section A below. There are two product type segments, five age segments, three original industry standard credit score or equivalent segments, five delinquency status segments, and four education level segments; therefore, the portfolio must be divided into a total of $2 \times 5 \times 3 \times 5 \times 4 = 600$ distinct segments. Each segment should be identified by a unique ten-digit segment ID (variable name: SEGMENT_ID) based on the segment ID positions and attribute codes listed in Table A.10.a. For example, the segment containing government guaranteed student loans (product type segment “01”) that are less than three years old (age segment “05”), had an origination FICO score or equivalent of greater than 660 (original industry standard credit score or equivalent segment “02”), are 120+ DPD (delinquency status segment “05”), and were made to loan recipients pursuing an undergraduate degree (education level segment “01”) should be identified by the segment ID “0105020501”. When reporting the segment ID, do not drop leading zeroes.

For each month in the required reporting period, report the summary variables listed below in Section B for each of the 600 portfolio segments described above. First time filers must submit all data for each month from January 2007 to the end of the current reporting period; returning filers must submit all data for each month in the current reporting period only.

Start each row of data with your BHC or IHC name (Variable name: BHC_NAME), your RSSD ID number (Variable name: RSSD_ID), the reporting month (Variable name: REPORTING_MONTH), the portfolio ID (Variable name: PORTFOLIO_ID), and segment ID (variable name: SEGMENT_ID). Use the portfolio ID “Student” for portfolio ID for this worksheet. For each row, populate the segment variables listed in Table A.10.a and the summary variables listed in Table A.10.b. Provide all dollar amounts in millions.

Detailed instructions on how to submit the data will be provided separately.

A. Segment Variables
Segment the portfolio along the following segment variables as described above. For each resulting segment, report the summary variables described in Section B.

1. Product type – Reporting institutions should segment the portfolio into the following two product types. An example of a government guaranteed loan is a FFELP loan.
   01 - Managed - Gov Guaranteed
   02 - Managed – Private

2. Age – Refers to the time that has elapsed since the loan was originated. If there were multiple disbursements tied to an original then use the time since the first disbursement. There are five possible ages to report:
   01 - 6 years <= Age
   02 - 5 years <= Age < 6 years
   03 - 4 years <= Age < 5 years
   04 - 3 years <= Age < 4 years
   05 - Age < 3 years
3. **Original commercially available credit bureau score or equivalent** –
   Segment the portfolio by the credit score of the borrower at origination using a commercially available credit bureau score (e.g. FICO Score, VantageScore, or another qualifying credit score). The original credit score used to assign a loan to a segment must be the score upon which the original underwriting decision was based. If the underwriting decision was based on an internal score, please map this score to an industry standard credit score. Please provide supporting documentation listing the credit score supplied or mapped to.

   The ranges below should be used for loans for which FICO was either the original credit score used at origination or the commercially available credit bureau score to which an internal credit score was mapped. Ranges for other commercially available credit bureau scores will be provided upon request.

   01 - <= 660
   02 - > 660
   03 - N/A— Original credit score is missing or unknown

4. **Delinquency status** - Reporting institutions should segment the portfolio into the following five delinquency statuses:
   01 - Current + 1-29 DPD: Accounts that are not past due (accruing and non-accruing) as of month-end and accounts that are 1 to 29 days past due (accruing and non-accruing) as of month-end.
   02 - 30-59 DPD: Accounts that are 30 to 59 days past due (accruing and non-accruing) as of month-end.
   03 - 60-89 DPD: Accounts that are 60 to 89 days past due (accruing and non-accruing) as of month-end.
   04 - 90-119 DPD: Accounts that are 90 to 119 days past due (accruing and non-accruing) as of month-end.
   05 - 120+ DPD: Accounts that are 120 or more days past due (accruing and non-accruing) as of month-end.

5. **Education level** – The level of education being pursued by the recipient of the loan. For consolidated loans, report the highest level of education pursued by the borrower.
   01 - Undergraduate – 4 year
   02 - Graduate / Professional
   03 - Other (e.g. community college, trade school, etc.)
   04 - Not available

B. **Summary Variables**
   For each month in the reporting period, report the following summary variables for each segment described in Section A.

   1. **# Accounts** – Total number of accounts on the book for the segment as of month-end.
   2. **$ Outstandings** – Total unpaid principal balance for accounts on the book for the segment as of month-end.
   3. **# Accounts in repayment** – Total number of accounts on the book for the segment as of month-end that have entered the loan’s repayment period.
   4. **$ Outstandings in repayment** – Total unpaid principal balance for accounts on the book for the segment as of month-end that have entered the loan’s repayment period.
5. # **New disbursements** – The total number of new disbursements in the given month for the segment as of month-end.

6. $ **New disbursements** – The total dollar amount disbursed in the given month for the segment as of month-end.

7. $ **of Unpaid principal balance with co-signer** – The dollar amount of unpaid principal balance in the segment that was underwritten with a co-signer reported as of the month-end.

8. $ **of Unpaid principal balance in grace** – The dollar amount of unpaid principal balance for accounts that are in grace status for the segment being reported as of month-end.

9. $ **of Unpaid principal balance in deferment** – The dollar amount of unpaid principal balance for accounts that are in deferment status for the segment being reported as of month-end.

10. $ **of Unpaid principal balance in forbearance** – The dollar amount of unpaid principal balance for accounts that are in forbearance status for the segment being reported as of month-end.

11. $ **CDR [0% through 1.99%]** - The total unpaid principal balance in the segment that has a school cohort default rate as computed by the Department of Education falling within 0% through 1.99% as of the month-end.

12. $ **CDR [2% through 3.99%]** – The total unpaid principal balance in the segment that has a school cohort default rate as computed by the Department of Education falling within 2% through 3.99% as of the month-end.

13. $ **CDR [4% through 5.99%]** – The total unpaid principal balance in the segment that has a cohort default rate falling within 4% through 5.99% as of the month-end.

14. $ **CDR [6% through 7.99%]** – The total unpaid principal balance in the segment that has a cohort default rate falling within 6% through 7.99% as of the month-end.

15. $ **CDR [8% through 9.99%]** – The total unpaid principal balance in the segment that has a cohort default rate falling within 8% through 9.99% as of the month-end.

16. $ **CDR > 10%** - The total unpaid principal balance in the segment that has a cohort default rate falling above 10% as of the month-end.

17. $ **CDR = N/A** - The total unpaid principal balance in the segment that has no cohort default rate as of the month-end.

18. $ **Gross contractual charge-offs** – The dollar amount of write-downs on loans in the segment that were charged-off during the reporting month, except where the charge-off arises from the bankruptcy of the borrower (see the variable $ Bankruptcy Charge-offs). Also include write-downs to fair value on loans transferred to the held-for-sale account during the reporting month. The amount reported here should be consistent with the amount reported on Schedule HI-B, Part I, Column A of the FR Y-9C. For the Delinquency Status segment, categorize charged-off loans by their delinquency status at charge-off.
19. **$ Bankruptcy charge-offs** – The dollar amount of write-downs on loans in the segment that were charged-off due to bankruptcy during the reporting month. The amount reported here should be consistent with the amount reported on Schedule HI-B, Part I, Column A of the FR Y-9C. For the Delinquency Status segment, categorize charged-off loans by their delinquency status at charge-off.

20. **$ Recoveries** – The dollar amount recovered during the reporting month on loans in the segment that were previously charged-off. The amount reported here should be consistent with the amount reported on Schedule HI-B, Part I, Column B of the FR Y-9C. For the Delinquency Status segment, categorize charged-off loans by their delinquency status at charge-off. Reversals of recoveries should be recorded as negative recoveries.

21. **$ Net Charge-offs** – The dollar amount of write-downs net on loans in the segment that were charged-off during the reporting month, net of any recoveries in the reporting month on loans in the segment that were previously charged-off. Generally, $ Net Charge-offs should equal [$ Gross Contractual Charge-offs + $ Bankruptcy Charge-offs — $ Recoveries].

22. **Adjustment factor to reconcile $ gross contractual charge-offs to $ net charge-offs** – If it is not the case that $ Net Charge-offs equals [$ Gross Contractual Charge-offs + $ Bankruptcy Charge-offs — $ Recoveries], provide the value of $ Net Charge-offs minus [$ Gross Contractual Charge-offs + $ Bankruptcy Charge-offs — $ Recoveries] in this variable, and separately provide an explanation for the difference. As a separate document included in the submission, provide an explanation for such a difference (for example, fraud losses are also included in the Reporting Institution's $ Net Charge-offs variable). If the adjustment factor variable represents more than one factor leading to the difference, provide a separate breakout of the multiple factors.
Schedule B—Securities

Each BHC or IHC should submit the two schedules (B.1 and B.2) comprising the FR-Y-14 Quarterly Securities data. The BHCs and IHCs should refer to the separate Technical Submission Instructions for details on the technical specifications of these schedules including the schedule naming convention, row headers, and value formats. The first schedule (B.1 - Securities 1) is the Main Schedule containing the individual security-level data. The second (B.2 - Securities 2) provides additional detail on securities in the Main Schedule that are part of designated hedge accounting relationships.

Please refer to Accounting Standards Codification (ASC) Topic 320, Investments—Debt and Equity Securities (formerly FASB Statement No. 115, Accounting for Certain Investments in Debt and Equity Securities) for additional guidance when preparing this schedule.

If the instrument exists and is reported on the FR Y9C as of quarter-end, then it should be included in this schedule. Institutions are encouraged to provide further details on its hedging practices in supplemental materials if the institution believes doing so will provide additional and relevant clarity.

A unique identifier must be included to identify each unique record for each of the sub-schedules B.1 and B.2 as discussed below.

Exclude from this schedule all securities held for trading and securities the holding company has elected to report at fair value under a fair value option even if holding company management did not acquire the securities principally for the purpose of selling them in the near term. Also exclude securities that have been sold, but not settled as of the quarter-end date.

B.1—Securities 1 ("Main Schedule")

The Securities 1 schedule collects individual security-level details on positions, security type, cumulative OTTI (credit and non-credit related impairments) by security, and accounting intent (AFS or HTM). Amounts should be reported in U.S. dollars (USD). The reporting of Securities should follow balance sheet classification of the FR Y-9C (e.g., Securities will correspond with Schedule HC-B breakdowns). Additionally, the method of reporting individual security-level information should be consistent with the level of aggregation the company uses to assess impairment and measure realized and unrealized gains and losses on investment securities under GAAP (ASC paragraph 320-10-35-20).

In circumstances whereby the BHC or IHC holds securities in both AFS and HTM categories within a given asset class, separate each security in to separate line items.

The following information should be reported in this schedule.

Unique ID
A unique identifier must be included to identify each unique record. For a given security position, the same Unique ID should be used from one period to the next.

Identifier Type and Identifier Value
Report individual security-level data for all available-for-sale (AFS) and held-to-maturity (HTM) securities, adding new rows as necessary. Generally, securities should always be reported with a public identifier, if available, such as a valid CUSIP, ISIN, or SEDOL. If a valid CUSIP, ISIN or SEDOL identifier exists for the security, please report the value of the chosen...
identifier (the CUSIP, ISIN, or SEDOL code) and indicate the identifier type as “CUSIP”, “ISIN”, or “SEDOL”. If a CUSIP, ISIN, or SEDOL identifier is not available for a given security, please report an alternative public identifier value, if available, and report the identifier type. If only an internal identifier is available and provided, please report the identifier type as “INTERNAL.” Securities where an internal identifier is reported must have additional information reported in the Security Description 2 or Security Description 3 fields that clarifies the name of the security or issuer and the nature of the obligation (see the general requirement for securities in the “Other” Security Description 1 category), to the extent that the Security Description 2 and Security Description 3 fields are available after meeting any specific requirements in the instructions for these fields under “Security Description” below.

**Private Placement**
Please enter “Y” if the security is a private placement security or other non-publicly offered security or “N” if it is a publicly offered security. For clarity, please enter "Y" for Rule 144A securities and direct purchase municipal securities (as defined in the Municipal Securities Rulemaking Board’s Notice 2011-52).

**Security Description**
Report the security description as indicated below.

*Agency MBS:* Report mortgage-backed securities (MBS) issued or guaranteed by U.S. Government agencies.

*Auction Rate Securities:* Report auction rate securities. Auction-rate securities are variable rate securities with long-term maturities whose interest rates are periodically reset through auctions occurring at predetermined short-term intervals (generally 7, 14, 28, or 35 days).

*CDO:* Report collateralized debt obligations (CDOs). CDOs are asset-backed securities collateralized by a discrete portfolio of fixed income assets and that make payments based on the performance of those assets.

*CLO:* Report collateralized loan obligations (CLOs). CLOs are securitizations of portfolios of loans through a bankruptcy-remote special-purpose vehicle (SPV) that issues asset-backed securities in one or more classes (or tranches). In general, CLOs are backed by a variety of assets, including whole commercial loans, revolving credit facilities, letters of credit, and bankers’ acceptances.

*CMBS:* Report commercial mortgage-backed securities (CMBS). Exclude securities that have been issued or guaranteed by the Federal National Mortgage Association (FNMA) or the Federal Home Loan Mortgage Corporation (FHLMC) or guaranteed by the Government National Mortgage Association (GNMA). Report these securities as “Agency MBS” (above).

*Common Stock (Equity):* Report common stock (equity). Provide the name of the issuer in the Security Description 2 column.

*Auto ABS:* Report asset-backed securities (ABS) collateralized by auto loans.

*Credit Card ABS:* Report asset-backed securities (ABS) collateralized by credit card loans.

*Student Loan ABS:* Report asset-backed securities (ABS) collateralized by student loans.

*Other ABS (excl HEL ABS):* Report all other ABS that cannot properly be reported as auto ABS, credit card ABS, student loan ABS or home equity loan ABS; such as, leasing, Small Business Association (SBA) and fleet (auto) and floor plan ABS.
**Corporate Bond:** Report corporate bonds. Corporate bonds are debt obligations issued by corporations and may be secured or unsecured. Report the issuer name in the Security Description 2 column. Report the sector (i.e., the industry name) in the Security Description 3 column according to North American Industry Classification System (NAICS) industry. If a NAICS industry is not available, report the relevant Global Industry Classification Standard (GICS) industry. If neither NAICS nor GICS industries are available, report the relevant Standard Industrial Classification (SIC) industry.

**Covered Bond:** Report securities generally classified as "covered bonds" that feature recourse to cash flows of a pool of mortgages or public-sector loans on the balance sheet of an issuing financial institution.

**Domestic Non-Agency RMBS (incl HEL ABS):** Report residential mortgage-backed securities (RMBS), including securities backed by home equity loans, that are issued by domestic non-government agency entities.

**Foreign RMBS:** Report residential mortgage-backed securities of foreign issuers. Provide the country in the Security Description 2 column.

**Municipal Bond:** Report bonds issued by U.S. states, cities, counties, and other governmental entities at or below the state level. For example, include bonds issued by Canadian provinces or other local government entities and bonds issued by other non-US local government entities. In the Description 2 column, report the sector from the list below that best describes the principal source of repayment and intended use of the capital raised by the offering.

- General Obligation - State
- General Obligation - Local
- Revenue - Single Family Housing
- Revenue - Multi-Family Housing
- Revenue - Hospitals and Health Care
- Revenue - Education
- Revenue - Industrial Development Revenue
- Revenue - Utilities
- Revenue - Transportation
- Revenue - Tax
- Revenue – Other
- Appropriation-Backed\(^9\)
- Other

**Mutual Fund:** Report investments in mutual funds, including money market mutual funds and mutual funds that invest solely in U.S. government securities. In the Description 2 column, enter either “Money Market Mutual Fund” for investments in money market mutual funds or similar cash reserve instruments or “Non-Money Market Mutual Fund” for all other categories of mutual funds. Provide the name of the fund in the Description 3 column.

**Preferred Stock (Equity):** Refer to the FR Y-9C Glossary entry for “Preferred Stock.” Provide the issuer name in the Security Description 2 column.

\(^9\) For a definition of appropriation-backed debt, please refer to the Municipal Securities Rulemaking Board glossary definition for subject-to-appropriation-debt.
*Sovereign Bond:* Report bonds issued by the central governments of foreign countries. Provide the two-letter Country ISO code in the Security Description 2 column. Also, include in this category obligations of foreign country central banks, foreign central government units or agencies, fully government-guaranteed obligations of municipal or state-owned enterprises (e.g., non-central government(s)); and obligations of supranational organizations such as the International Bank for Reconstruction and Development (World Bank), Inter-American Development Bank, and Asian Development Bank. Sovereign Bonds that are issued by supranational entities should identify the issuer of the bond in the second or third security description column in place of a country code. Additionally, for non-guaranteed government securities, include additional information in the remaining description columns to explain the source of repayment (if not full faith and credit of the sovereign).

*Other:* Report all securities that cannot properly be reported in the categories above. It is required to use the Security Description 2 and/or Security Description 3 columns to provide a description of the security that clarifies the name of the security or issuer, type or nature of obligation, and, if applicable, key terms such as the maturity date and stated interest rate.

*Exposure to Debt/Equity Security (USD Equivalent)*

Report exposure to the debt/equity security as indicated below.

*Amortized Cost (USD Equivalent):* In general, amortized cost is the purchase price of a debt security adjusted for amortization of premium or accretion of discount if the debt security was purchased at other than par or face value (for more information, refer to the FR Y-9C Glossary entry for “premiums and discounts”).

*Market Value (USD Equivalent):* In general, market value is “the price that would be received to sell an asset or paid to transfer a liability in an orderly transaction between market participants at the measurement date.” For further information, refer to ASC Topic 820, Fair Value Measurements and Disclosures (formerly FASB Statement No. 157, *Fair Value Measurements*) and the FR Y-9C glossary entry for “fair value.”

*Current Face Value (USD Equivalent):* The nominal dollar amount of the security as of the report date.

*Original Face Value (USD Equivalent):* The nominal dollar amount originally assigned to the security by the issuer.

*OTTI Taken*

Report the cumulative amount of other-than-temporary impairments (OTTI) recognized in earnings in the calendar year to date by the BHC or IHC on the security (. For clarity, please include only the portion of OTTI recorded in form FR Y-9C, Schedule HI, memoranda item 17(c).
**Accounting Intent**
Indicate whether the security is available-for-sale (AFS) or held-to-maturity (HTM).

**Price**
Report the price of the security associated with the reported market value in USD. In general, this is the value that, when multiplied by the current USD equivalent face value or nominal amount of the security, results in the USD equivalent amount that would be received (excluding accrued interest) if the security were sold at market value. A security whose market value is equal to its outstanding face value has a price of 100. For equity securities, report the price per share.

**Pricing Date**
Report the pricing date of the security.

**Book yield**
Report the effective interest rate that would be used to determine credit losses on debt instruments for other-than-temporary impairment (OTTI) purposes in accordance with ASC Topic 320. This item is not required for equity and mutual fund securities. For securitization debt, this relates to the yield implicit at the time of acquisition. This value should be the original unamortized yield, without subsequent adjustments for paydowns or accretion. However, if the reported book yield differs from the yield determined according to the methodology above, such as using the retrospective interest method for only structured notes outlined in ASC 320-10-35-40, document the reason for the use of the alternative in supplemental materials.

**Purchase Date**
Report the date on which the security was purchased or acquired in the case of credit sensitive securities that are evaluated for other-than-temporary impairment (OTTI) purposes in accordance with ASC Topic 320, Investments—Debt and Equity Securities (formerly FASB Statement No. 115, Accounting for Certain Investments in Debt and Equity Securities). The purchase date should be the date associated with the amortized cost and book yield of the security (exclude for equity and mutual fund securities). If current holdings of the same security were acquired in different periods, please provide the amounts and respective purchase dates distinct trade lots in separate rows of the worksheets. The preferred method for reporting purchases and sales of securities is as of trade date. However, settlement date accounting is acceptable if the reported amounts would not be materially different. (See the Glossary entry for "trade date and settlement date accounting" in the FR Y-9C instructions).

**Currency**
Indicate the currency denomination of contractual payments on the security, or for an equity security, the currency in which it trades in its principal exchange, using the standard ISO 4217 three-letter currency code (e.g., USD, EUR, GBP, CAD, etc.). For the avoidance of doubt, whether or not the value of this field is USD (U.S. dollars), all amounts reported in this schedule must be in USD-equivalent terms as of the reporting date.
B.2—Securities 2 ("Investment Securities with Designated Accounting Hedges")

The Securities 2 schedule contains information on investment security hedging relationships designated under GAAP as cash flow or fair value hedges of AFS or HTM securities. All amounts should be reported in U.S. dollars. Gains and losses should be reported gross of tax.

In each row, report the unique ID, identifier type and identifier value using the corresponding instructions for Securities 1 for each investment security for which the BHC or IHC has an existing qualifying hedging relationship. Security holdings listed in this worksheet should be a subset of the line-by-line holdings reported in the Securities 1 schedule and use a consistent ID, Identifier Type and Identifier Value for matching purposes. In addition, for qualifying hedging relationships reported on Securities 2, the unique ID reported for the investment security on Securities 1 must also be reported.

There should be one row submitted for each distinct investment security hedging relationship. Use multiple rows to reflect one-to-many relationships: For example, if multiple hedging relationships apply to a single security holding, please list each hedging relationship affecting the security in a separate row of the Securities 2 file, repeating relevant details about the hedged security. (This treatment would apply, for example, if distinct hedging instruments – such as interest rate and foreign exchange hedging instruments – hedge different risks of the same holding and are accounted for separately, or if a fair value hedge co-exists with a cash flow hedge to address distinct risks.) Similarly, if a portfolio hedge is used to hedge more than one security under a single hedging relationship, please list each of the hedged security holdings in separate rows alongside the characteristics and allocable amount of the associated portfolio hedging instrument. If a hedging instrument hedges an investment security and also hedges assets that are not investment securities, report the amount allocable to the investment security (or securities) being hedged.

Please refer to the following table for detailed instructions on each column of this worksheet. The abbreviation ASC stands for the Financial Accounting Standards Board Accounting Standards Codification. In general, in the instructions that follow, the terms hedging instrument and hedged item follow their usage in the ASC. Note that hedging instrument may refer either to a single instrument or derivative that hedges the hedged item in a hedging relationship, or a group of instruments jointly considered a hedging instrument under a single hedging relationship.

</table>
Schedule C—Regulatory Capital Instruments

General guidance

The FR Y-14Q Regulatory Capital Instruments quarterly schedules collect historical data of BHCs' and IHCs' transactions in and balances of funded instruments that are included in regulatory capital as well as subordinated debt instruments and their related hedging instruments – included in FR Y-9C line item BHCK4062, “Subordinated notes and debentures.” They collect historical data at the CUSIP level on the balances of each funded regulatory capital instrument, in addition to information on any issuances and redemptions of individual instruments that occurred during the quarter. The quarterly schedule does not require BHCs or IHCs to report changes in the balances of capital instruments due to amortizations or accretions as either Redemptions or Issuances. Note: All subordinated debt instruments must be included, regardless of whether or not the instrument is included in regulatory capital.

Concurrently with their initial submission of the Regulatory Capital Instruments schedule, a new filer of FRY-14Q Schedule C must make a one-time submission of all subordinated debt as of quarter end that includes all of the information required in schedule C.3 (Issuances During Quarter) for each subordinated debt instrument outstanding as of quarter end. Report in Column I the notional dollar amount of the instrument as of quarter end.

C.1—Regulatory Capital and Subordinated Debt Instruments as of Quarter End

This worksheet collects historical information on the BHCs' and IHCs' regulatory capital and subordinated debt instruments as of the end of the most recent quarter. Complete this worksheet with details on each of these funded instruments as of quarter end. For each instrument, provide the applicable details below:

Column Instructions

Column B  Committee on Uniform Security Identification Procedures (CUSIP) or unique identifier provided by BHC or IHC
Report the CUSIP number or unique identification number assigned to the instrument as provided by the BHC or IHC. If there are different instrument types associated with one CUSIP, report the same CUSIP across multiple rows, provided that a different Instrument Type is used for each recurrence of the respective CUSIP. If there are duplicate records with the same CUSIP and Instrument Type, the firm should append a differentiating feature on the end of the CUSIP (e.g., “v1” and “v2”, etc.) and specify in the comments column that these are in fact swaps on the same CUSIP.

Column C  Instrument type
Report the type of regulatory capital instrument. Instruments should be reported based on whether they were included in Tier 1 or Tier 2 regulatory capital. This item should indicate: Common Stock, CPP TARP Preferred, CS USG Investment, CS Warrants, Cumulative Dated Preferred (TRUPS), Cumulative Perpetual Preferred (CPP), Mandatory Convertible Preferred (MCP), MCP USG Preferred, NCPP Convertible, Non-Cumulative Perpetual Preferred (NCPP), Other Tier 1 Instruments, Other Tier 2 Instruments, REIT Preferred, Subordinated Debt, USG Preferred TRUPS, or Subordinated Debt.
Column D  Regulatory capital rule treatment
Report the regulatory capital treatment for the instrument as per the regulatory capital rule (See generally 12 CFR 217). If the instrument being reported is a subordinated debt instrument not included in regulatory capital, “NA” should be reported.

Column E  Cumulative/noncumulative
Report whether the instrument’s coupon/dividend is cumulative or noncumulative.

Column F  Notional amount ($Millions)
Report the notional dollar amount of the instrument as of quarter end.

Column G  Amount recognized in regulatory capital ($Millions)
Report the dollar amount of the instrument that qualified as regulatory capital as of quarter end.

Column H  Comments
Use this field to report any supporting information regarding the instrument, including how it relates to amounts approved in the BHC’s or IHC’s capital plan. Comments should also reflect summary balance variances by Instrument Type.

C.2—Regulatory Capital and Subordinated Debt Instrument Repurchases/Redemptions During Quarter

BHCs and IHCs are to complete this worksheet with details on any repurchase or redemption activity for its capital and subordinated debt instruments during the quarter. For each instrument that was subject to a redemption or repurchase, provide the applicable details below.

Note: Do not use this worksheet to report decreases in the amount of any capital instrument that are the result of amortizations of the remaining balance of the instrument. Any changes due to amortizations of instruments that occurred during the quarter should be reflected in the balances of those instruments as reported on the C.1-Regulatory Capital and Subordinated Debt Instruments as of Quarter End worksheet.

Decreases in APIC resulting from employee stock compensation-related drivers should not be captured in sub-schedule C.2. Decreases in APIC as a result of treasury stock being issued at a price lower than its cost basis (i.e., the accounting amount of the stock held on the firm’s balance sheet) must not be captured in sub-schedule C.2.

An IHC must report remittances of capital to a non-IHC entity such as its foreign parent if it reduces the IHC’s regulatory capital, even if it does not arise from the payment on or repurchase or redemption of a regulatory capital instrument. Reductions in APIC on sub-schedule C.2 should reflect only instances in which an IHC remits capital to its foreign parent outside the context of payment on or redemption of an internal capital instrument. An example of this would be the reversal of contributed capital that was originally paid by the parent to the IHC in the form of cash. In these instances, report the CUSIP with the following convention: P00000001, P00000002, etc.

Column Instructions

Column B  Committee on Uniform Security Identification Procedures (CUSIP) or unique identifier provided by BHC or IHC
Report the CUSIP number or unique identification number assigned to the instrument as provided by the BHC or IHC. If there are different instrument types associated with one
CUSIP, report the same CUSIP across multiple rows, provided that a different Instrument Type is used for each recurrence of the respective CUSIP. If there are duplicate records with the same CUSIP and Instrument Type, the firm should append a differentiating feature on the end of the CUSIP (e.g., “V1” and “V2”, etc.) and specify in the comments column that these are in fact swaps on the same CUSIP.

**Column C  Instrument type**
Report the type of regulatory capital instrument. This item should also indicate where common stock is related to employee compensation (Common Stock - Employee Stock Compensation), and remissions of capital to a foreign parent entity for IHCs (APIC - Foreign Parent), in addition to the following items: Common Stock, CPP TARP Preferred, CS USG Investment, CS Warrants, Cumulative Dated Preferred (TRUPS), Cumulative Perpetual Preferred (CPP), Mandatory Convertible Preferred (MCP), MCP USG Preferred, NCPP Convertible, Non-Cumulative Perpetual Preferred (NCPP), Other Tier 1 Instruments, Other Tier 2 Instruments, REIT Preferred, Subordinated Debt, USG Preferred TRUPS, or Subordinated Debt.

**Column D  Regulatory capital rule treatment**
Report the regulatory capital treatment for the instrument as per the regulatory capital rule (See generally 12 CFR 217). If the instrument being reported is a subordinated debt instrument not included in regulatory capital, “NA” should be reported.

**Column E  Redemption action**
Report the redemption action executed on the instrument.

**Column F  Date on which action was executed (mm/dd/yyyy)**
Report the date on which the redemption/repurchase action was executed.

**Column G  Notional amount transacted ($Millions)**
Report the notional dollar amount by which the instrument was reduced as a result of the redemption/repurchase action.

**Column H  Regulatory capital amount transacted ($Millions)**
Report the dollar amount of regulatory capital by which the instrument was reduced as a result of the redemption/repurchase action.

**Column I  Notional amount remaining at quarter end ($Millions)**
Report the remaining notional dollar amount of the instrument as of quarter end.

**Column J  Amount recognized in regulatory capital remaining at quarter end ($Millions)**
Report the remaining dollar amount of the instrument that was included in regulatory capital as of quarter end.

**Column K  Comments**
Use this field to report any supporting information regarding the instrument, including how it relates to amounts approved in the BHC’s or IHC’s capital plan. Comments should also reflect summary balance variances by Instrument Type.

**C.3 – Regulatory Capital and Subordinated Debt Instruments Issuances During Quarter**

BHCs and IHCs are to complete this worksheet with details on any issuances of capital and
subordinated debt instruments – as well as any related hedging instruments, which includes
new hedges on outstanding subordinated debt instruments - that were issued during the
quarter. For each issued instrument, provide the applicable details below.

Columns BB through Columns OO apply to subordinated debt instruments, related hedges
as well as any new hedges associated with outstanding subordinated debt instruments.

For a subordinated debt instrument with multiple hedging instruments (swaps), please
report on multiple lines with the naming convention: CUSIP_1, CUSIP_2, etc., where CUSIP is
the unique identifier of the underlying instrument. Columns C-Z and BB-CC should be
repeated for all swap and reflect the underlying instrument, even though the entries may be
the same due to the swaps having the same underlying instrument.

Note: Do not use this worksheet to report increases in the amount of any capital
instruments that are the result of accretions that occurred during the quarter. Any changes
due to accretions that occurred during the quarter should be reflected in the balances of
those instruments as reported on the C.1 - Regulatory Capital Instruments as of Quarter End
worksheet.

Increases in APIC resulting from employee stock compensation-related drivers should not
be captured in sub-schedule C.3.

An IHC must report capital contributions to the IHC from a non-IHC entity such as its
foreign parent if it increases the IHC’s regulatory capital, even if it does not arise from the
issuance of a regulatory capital instrument from the IHC to that entity. In these instances,
report the CUSIP with the following convention: P00000001, P00000002, etc.

Column Instructions

Column B Committee on Uniform Security Identification Procedures (CUSIP),
International Securities Identification Number (ISIN) or unique
identifier provided by BHC or IHC
Report the CUSIP or ISIN number. If the instrument does not have a CUSIP or ISIN, provide
the unique identification number assigned to the instrument as provided by the BHC or IHC.
For subordinated debt with multiple swaps, please report on multiple lines with the naming
convention CUSIP_1, CUSIP_2, etc., where CUSIP is the unique identifier of the underlying
instrument. If there are different instrument types associated with one CUSIP, report the
same CUSIP across multiple rows, provided that a different Instrument Type is used for
each resurrence of the respective CUSIP. If there are duplicate records with the same CUSIP
and Instrument Type, the firm should append a differentiating feature on the end of the
CUSIP (e.g., "v1" and "v2", etc.) and specify in the comments column that these are in fact
swaps on the same CUSIP.

Column C Instrument type
Report the type of regulatory capital instrument. Instruments should be reported based on
whether they were actually included in Tier 1 or Tier 2 regulatory capital. This item should
also indicate where common stock is related to employee compensation (Common Stock -
Employee Stock Compensation) and contributions of surplus capital from a foreign parent
tility for IHCs (APIC - Foreign Parent), in addition to the following items: Common Stock,
CPP TARP Preferred, CS USG Investment, CS Warrants, Cumulative Dated Preferred
(TRUP), Cumulative Perpetual Preferred (CPP), Mandatory Convertible Preferred (MCP),
MCP USG Preferred, NCPP Convertible, Non-Cumulative Perpetual Preferred (NCPP), Other

<td>Fixed/floating Report whether the instrument has a fixed coupon, a floating coupon/dividend, steps up or converts from paying a fixed to paying a floating coupon.</td>
</tr>
<tr>
<td>P</td>
<td>Coupon/dividend rate (dividend yield) (bps) at issuance For instruments with fixed coupon/dividends, report the coupon/dividend rate for the instrument at issuance. For instruments that have a floating coupon/dividend or that have neither a fixed nor floating coupon/dividend rate (such as common stock), input the coupon/dividend rate paid in the reporting quarter.</td>
</tr>
</tbody>
</table>
**Column Q  Index at issuance**
For instruments with a coupon/dividend rate that is linked to the rate of a particular index, report the index to which it is linked at issuance. For instruments with a fixed coupon/dividend rate, report “NA.” If the index is not available, specify the index in the Comments field.

**Column R  Spread over index (bps) at issuance**
For instruments with a coupon/dividend rate that is linked to the rate of a particular index, report the spread over the relevant index in basis points (e.g., 1M LIBOR+50bps should be reported as “50”) at issuance. For instruments that have a fixed coupon/dividend rate or that have neither a fixed nor floating coupon/dividend rate, report “NA”.

**Column S  Date at which coupon terms change**
For instruments that step up or convert from paying a fixed rate to paying a floating coupon, specify the date at which the rate change occurs. If the terms of the instrument do not change, report “NA.”

**Column T  Coupon/dividend rate (bps) when terms change**
For instruments that step up, report the coupon/dividend rate for the instrument after the change of terms. If the terms of the instrument do not change, report “NA.”

**Column U  Index when terms change**
For instruments that convert from paying a fixed rate to paying a coupon/dividend rate that is linked to the rate of a particular index, report the index to which it is linked. Select from options in the drop down box. If the index is not available in the drop down menu, specify the index in the Comments field. If the terms of the instrument do not change, report “NA.”

**Column V  Spread over index (bps) when terms change**
For instruments that convert from paying a fixed rate to paying a coupon/dividend with a coupon/dividend rate that is linked to the rate of a particular index, report the spread over the relevant index in basis points (e.g., 1M LIBOR+50bps should be reported as “50”). If the terms of the instrument do not change, report “NA.”

**Column W  Existence of step up or other incentive to redeem**
Report whether the instrument features a step up or other incentive to redeem the security. Step–up securities initially pay the investor an above–market yield for a short period and then, if not called, “step up” to a higher coupon rate.

**Column X  Convertible/non-convertible**
Report whether the instrument is convertible into another instrument or non–convertible.

**Column Y  If convertible, mandatory or optional conversion?**
For instruments that are convertible into another instrument, report whether the conversion is mandatory or optional. For non–convertible instruments, report “NA”.

**Column Z  If convertible, specify the instrument type into which it will convert**
For instruments that are convertible into another instrument, report the type of instrument into which the instrument will convert. For non–convertible instruments, report “NA”.

**Column AA  Comments**
Use this field to report any supporting information regarding the instrument, including how it relates to amounts approved in the BHC’s capital plan. Comments should also reflect summary balance variances by Instrument Type. If the nature of the swap (fixed-to-floating, floating-to-fixed, FX) is not self-evident, please provide details here.
**Column BB**  **Carrying value, as of quarter-end ($Millions)**
Report the carrying value of the instrument. This number should match the value that enters in FR Y-9C line item BHCK4062, “Subordinated notes and debentures,” and should be equal to the sum of column I, CC, and DD. For subordinated debt with multiple swaps, please report the full carrying value of the underlying note.

**Column CC**  **Unamortized discounts/premiums, fees, and foreign exchange translation impacts as of quarter-end ($Millions)**
Report the dollar amount of unamortized discounts/ premiums, fees, and foreign exchange translation impact (for FX-denominated instruments) associated with the instrument. For subordinated debt with multiple swaps, please report the full amount of unamortized discounts/ premiums, fees, and foreign exchange translation impact (for FX-denominated instruments) associated with the underlying note.

**Column DD**  **Fair value of swaps, as of quarter end ($Millions)**
Report the dollar value of swaps associated with the instrument that enter FR Y-9C line item BHCK4062, “Subordinated notes and debentures.” For subordinated debt with multiple swaps, please report the fair value of the specific swap detailed in this line.

**Column EE**  **Interest rate swap issue date (mm/dd/yyyy)**
If there is an interest rate swap associated with the instrument that is accounted for in FR Y-9C line item BHCK4062, “Subordinated notes and debentures,” and BHCK4397, “Interest on Subordinated Notes and Debentures and on Mandatory Convertible Securities,” report the issue date of the swap.

**Column FF**  **Interest rate swap maturity date (mm/dd/yyyy)**
Report the maturity date of the interest rate swap associated with the instrument.

**Column GG**  **Notional amount of interest rate swap ($Millions)**
Report the notional dollar amount of the interest rate swap associated with the instrument. For subordinated debt with multiple swaps, please report the notional amount for the specific swap detailed in this line.

**Column HH**  **Swap fixed rate (bps)**
If the interest rate swap is floating-to-fixed, report the fixed interest rate payment. If the interest rate swap is fixed-to-floating, report the fixed interest rate received from the swap. If the interest rate swap is floating-to-fixed, report the fixed interest rate paid.

**Column II**  **Swap index**
If the interest rate swap is fixed-to-floating, report the index to which the swap payment is linked. If the interest rate swap is floating-to-fixed, report the index to which the received leg is linked. If the index is not available in the drop down box, please specify index in the Comments field. For instruments unrelated to an index report “N/A”.

**Column JJ**  **Swap spread over index (bps)**
Report the spread over the relevant index in basis points (e.g., 1M LIBOR+50bps should be reported as “50”). For instruments unrelated to an index report “N/A”.

**Column KK**  **Currency denomination of the instrument**
Report the currency the instrument is denominated in. If the relevant currency is not in the drop down box, please specify the currency in the Comments field.
Column LL  Currency of foreign exchange swap payment
If a foreign exchange swap is associated with the instrument, report the currency of the swap payment. For example, for an instrument denominated in EUR, a foreign exchange swap may imply a USD payment for a receipt of EUR. The currency of the swap payment is thus USD. Select from options in the drop down box. If the relevant currency is not in the drop down box, please specify the currency in the Comments field. If the terms of the swaps associated with the instrument and accounted for in FR Y-9C line item BHCK4062, “Subordinated notes and debentures,” and BHCK4397, “Interest on Subordinated Notes and Debentures and on Mandatory Convertible Securities,” are not represented adequately in columns EE to LL on the form, please provide additional information on swaps in the Comments field.

Column MM  Notional amount of foreign exchange swap ($ Million)
Report the notional dollar amount of the foreign exchange swap associated with the instrument.

Column NN  Exchange rate implied by foreign exchange swap (LL/KK)
Report the exchange rate of the foreign exchange swap. Express the exchange rate as the amount of currency reported in column LL per unit of currency reported in column KK.

Column OO  Y-9C BHCK 4062 reconciliation
If the carrying value in column BB differs from the amount that enters in in FR Y-9C line item BHCK 4062, or if the sum of columns I, CC and DD does not add up to the carrying value, provide an explanation in this field. Also provide an explanation for the discrepancy between the sum of carrying values in column BB and the amount reported in FR Y-9C line item BHCK 4062. The discrepancy may come from life-time preferred stock included in BHCK 4062 for example (include this explanation in the field for instrument Nr. 1).
Schedule D—Regulatory Capital Transitions

General Guidance

For the purposes of the Regulatory Capital Transitions Schedule, BHCs and IHCs must reflect the regulatory capital and supplementary leverage ratio rules on a fully phased-in basis for the reporting quarter (e.g., BHCs and IHCs should apply 100% of all capital deductions, not assuming the transition provisions for implementation of changes to the capital composition as in the regulatory capital rule).10

Non-advanced approaches firms should continue to apply, indefinitely, the risk weight and the deduction treatment applicable during 2017, as outlined in the capital rules.11 In accordance with Table 7 of section 300 of the capital rules, non-advanced approaches banking organizations should:

- Deduct from regulatory capital 80 percent of the amount of any of these five items that is not includable in regulatory capital;
- Apply a 100 percent risk weight to any amounts of MSAs, temporary difference DTAs, and significant investments in the capital of unconsolidated financial institutions in the form of common stock that are not deducted from capital, and continue to apply the current risk weights under the capital rules to amounts of non-significant investments in the capital of unconsolidated financial institutions and significant investments in the capital of unconsolidated financial institution not in the form of common stock that are not deducted from capital; and
- Include 20 percent of any common equity tier 1 minority interest, tier 1 minority interest, and total capital minority interest exceeding the capital rule’s minority interest limitations (surplus minority interest) in regulatory capital.

Where applicable, BHCs and IHCs should also reference the methodology descriptions outlined within the FR Y-9C, HC-R, Part IB (final) and part II (draft). Please note, however, that numbers do not need to tie to the FR Y-9C reports, given that the FR Y-14 Transitions schedule requires calculations on a fully phased-in basis except for instances as prescribed in the Regulatory Capital Rules: Retention of Certain Existing Transition Provisions for Banking Organizations That Are Not Subject to the Advanced Approaches Capital Rules (82 FR 55309).

The Regulatory Capital Transitions FR Y-14Q quarterly schedule is used for monitoring actual progress against the forecasts provided in the FR Y-14A submission. Submit the FR Y-14Q schedule with actual data as of the close of each quarter (Note actual Q4 data are submitted on the FR Y-14Q report in addition to the actual data submitted separately on the FR Y-14A report).

Relevant Reference

All BHCs and IHCs are required to follow the methodologies outlined in the regulatory

---

10 Advanced approaches BHCs and IHCs are generally firms that have $250 billion or more in total consolidated assets and/or $10 billion or more in consolidated on-balance sheet foreign exposures. See 12 CFR 217.100(b)
11 See 82 FR 55309.
capital rule, the updated market risk capital rule (78 Federal Register 76521, December 18, 2013), and the supplementary leverage ratio final rule (September 2014) for purposes of completing the Regulatory Capital Transitions schedules on a quarterly basis. Except for instances as prescribed in Regulatory Capital Rules: Retention of Certain Existing Transition Provisions for Banking Organizations That Are Not Subject to the Advanced Approaches Capital Rules (82 FR 55309). BHCs and IHCs should reflect the regulatory capital framework on a fully phased-in basis.

### Completing the Schedule

Data should be provided in all non-shaded items; shaded items are derived and will be automatically populated.

All BHCs and IHCs, including advanced approaches BHCs and IHCs and non-advanced approaches BHCs and IHCs must complete Schedule D.4 – Standardized RWA for all reporting periods. For the purpose of completing Schedule D.4, BHCs and IHCs are required to report credit risk-weighted assets using the methodologies under the standardized approach of the regulatory capital rule. Advanced approaches BHCs and IHCs, including the BHCs and IHCs that are considered mandatory advanced approaches institutions or that have opted-in voluntarily as an advanced approaches institution, are also required to complete Schedule D.3 – Advanced RWA for all reporting periods. All firms should provide all data on a fully phased-in basis (i.e., not assuming any transitional or phase-out arrangements included in the regulatory capital rule) except for instances as prescribed in 82 FR 55309.

If a BHC or IHC does not have an exposure relevant to any particular line item (except for Schedule D.6 – Planned Actions) it should enter zero (0) in those items. In order for the derived items to automatically populate the shaded items in the schedule with calculated numbers, BHCs and IHCs must complete all non-shaded items in the schedule with a value.
D.1—Capital Composition

The Capital Composition schedule (along with Schedule D.2—Exceptions Bucket Calculator) collects the data necessary to calculate the composition of capital under the guidelines set forth by the Revised Regulatory Capital Rule. Please provide all data on a fully phased-in basis (i.e., not assuming any transitional or phase-out arrangements included in the regulatory capital rule. All firms should provide all data on a fully phased-in basis (i.e., not assuming any transitional or phase-out arrangements included in the regulatory capital rule) except for instances as prescribed in 82 FR 55309.

Line item 1   AOCI opt-out election
Non-advanced approaches BHCs and IHCs have the option to select either 1 for opt-out, or 0 for opt-in. Note that there are no transition provisions applied.

As provided in section 22(b)(ii) of the revised regulatory capital framework, a non-advanced approaches banking organization that seeks to make an AOCI opt-out election is required to do so upon filing its first Call Report or FR Y-9 series report after the date upon which it becomes subject to the final rule (January 1, 2015).

Common Equity Tier 1 Capital

Line item 2   Common stock and related surplus (net of treasury stock and unearned employee stock ownership plan (ESOP) shares
Report common shares and the related surplus issued by BHCs and IHCs that meet the criteria of the final rules. This should be net of treasury stock and other investments in own shares to the extent that these are already not recognized on the balance sheet under the relevant accounting standards. This line item should reflect the impact of share repurchases or issuances projected in the CCAR forecast horizon. This line should also reflect the netting of any treasury stock, unearned ESOP shares, and any other contra-equity components.

Line item 3   Retained earnings
Retained earnings reported by BHCs and IHCs. This should reflect the impact of dividend pay-outs projected in the CCAR forecast horizon.

Line item 4   Accumulated other comprehensive income (AOCI)
Report the amount of AOCI as reported under generally accepted accounting principles (GAAP) in the U.S. that is consistent with the definitions included in Schedule HC-R, Part I.B., item 3, with no transition provisions.

Line item 5   Common equity tier 1 minority interest includable in common equity tier 1 capital (report this on a fully phased-in basis)
Report the aggregate amount of common equity tier 1 minority interest that is consistent with the definitions provided in Schedule HC-R, Part I.B., item 4, Common equity tier 1 minority interest means the common equity tier 1 capital of a depository institution or foreign bank that is a consolidated subsidiary of the holding company and that is not owned by the holding company. In addition, the capital instruments issued by the subsidiary must meet all of the criteria for common equity tier 1 capital (qualifying common equity tier 1 capital).

Line item 6   Common equity tier 1 capital before adjustments and deductions
This captures the sum of line items 2 through 5.
Common equity tier 1 capital: adjustments and deductions

Line item 7  Goodwill net of associated deferred tax liabilities (DTLs)
Report the amount of goodwill that is consistent with the definitions provided in Schedule HC-R, Part I.B., item 6, with no transition provisions. However, if a BHC or IHC has a DTL that is specifically related to goodwill acquired in a taxable purchase business combination that it chooses to net against the goodwill, the amount of disallowed goodwill to be reported in this item should be reduced by the amount of the associated DTL.

If a holding company has significant investments in the capital of unconsolidated financial institutions in the form of common stock, the holding company should report in this item goodwill embedded in the valuation of a significant investment in the capital of an unconsolidated financial institution in the form of common stock (embedded goodwill). Such deduction of embedded goodwill would apply to investments accounted for under the equity method. Under GAAP, if there is a difference between the initial cost basis of the investment and the amount of underlying equity in the net assets of the investee, the resulting difference should be accounted for as if the investee were a consolidated subsidiary (which may include imputed goodwill).

Line item 8  Intangible assets (other than goodwill and mortgage servicing assets (MSAs)), net of associated DTLs
Report all intangible assets (other than goodwill and MSAs) net of associated DTLs, included in Schedule HC-M, items 12.b and 12.c, that do not qualify for inclusion in common equity tier 1 capital under the regulatory capital rules. Generally, all purchased credit card relationships (PCCRs) and non-mortgage servicing rights, reported in Schedule HC-M, item 12.b, and all other identifiable intangibles, reported in Schedule HC-M, item 12.c, do not qualify for inclusion in common equity tier 1 capital and should be included in this item.

Further, if the holding company has a DTL that is specifically related to an intangible asset (other than servicing assets and PCCRs) acquired in a nontaxable purchase business combination that it chooses to net against the intangible asset for regulatory capital purposes, the amount of disallowed intangibles to be reported in this item should be reduced by the amount of the associated DTL. However, a DTL that the holding company chooses to net against the related intangible reported in this item may not also be netted against DTAs when the holding company determines the amount of DTAs that are dependent upon future taxable income and calculates the maximum allowable amount of such DTAs for regulatory capital purposes.

Line item 9  Deferred Tax Assets (DTAs) that arise from net operating loss and tax credit carryforwards, net of any related valuation allowances and net of DTLs
Report the amount of DTAs that arise from net operating loss and tax credit carryforwards, net of any related valuation allowances and net of DTLs.

AOCI-related adjustments
Holding companies that entered “1” for “Yes” under item 1, must complete items 10 through 14 only for AOCI related adjustments.

Line item 10  Net unrealized gains (losses) on available-for-sale securities
Report the amount of net unrealized holding gains (losses) on available-for-sale securities, net of applicable taxes, that is consistent with the definitions provided in Schedule HC-R,
Schedule I.B., item 9a, “Accumulated other comprehensive income,” With no transition provisions. If the amount is a net gain, report it as a positive value in this item. If the amount is a net loss, report it as a negative value in this item.

**Line item 11  Net unrealized loss on available-for-sale preferred stock classified as an equity security under GAAP and available-for-sale equity exposures**
Report as a positive value net unrealized loss on available-for-sale preferred stock classified as an equity security under GAAP and available-for-sale equity exposures, consistent with the definitions that is included in Schedule HC-R, Schedule I.B., item 9b, with no transition provisions.

**Line item 12  Accumulated net gains (losses) on cash flow hedges**
Report the amount of accumulated net gains (losses) on cash flow hedges, consistent with the definitions that is included in Schedule HC-R, Schedule I.B., item 9c, “Accumulated other comprehensive income,” With no transition provisions. If the amount is a net gain, report it as a positive value in this item. If the amount is a net loss, report it as a negative value in this item.

**Line item 13  Amounts recorded in AOCI attributed to defined benefit postretirement plans resulting from the initial and subsequent application of the relevant GAAP standards that pertain to such plans**
Report the amounts recorded in AOCI and is consistent with the definitions included in Schedule HC-R, Schedule I.B., item 9d, “Accumulated other comprehensive income,’ with no transition provisions, resulting from the initial and subsequent application of ASC Subtopic 715-20 (formerly FASB Statement No. 158, "Employers’ Accounting for Defined Benefit Pension and Other Postretirement Plans") to defined benefit postretirement plans resulting from the initial and subsequent application of the relevant GAAP standards that pertain to such plans.

**Line item 14  Net unrealized gains (losses) on held-to-maturity securities that are included in AOCI**
Report the amount of net unrealized gains (losses) that are not credit-related on held-to-maturity securities and are included in AOCI, consistent with the definitions as reported in Schedule HC-R, Schedule I.B., item 9e, “Accumulated other comprehensive income,” with no transition provisions. If the amount is a net gain, report it as a positive value. If the amount is a net loss, report it as a negative value.

**Holding companies that entered “0” for “No” under item 1, must complete item 15 only for AOCI related adjustments.**

**Line item 15  Accumulated net gain (loss) on cash flow hedges included in AOCI, net of applicable tax effects that relate to the hedging of items that are not recognized at fair value on the balance sheet.**
Report the amount of accumulated net gain (loss) on cash flow hedges included in AOCI, net of applicable tax effects that relate to the hedging of items not recognized at fair value on the balance sheet. If the amount is a net gain, report it as a positive value. If the amount is a net loss, report it as a negative value.

**Other deductions from (additions to) common equity tier 1 capital before threshold-based deductions:**

**Line item 16  Unrealized net gain (loss) related to changes in the fair value of**
liabilities that are due to changes in own credit risk
Report the amount of unrealized net gain (loss) related to changes in the fair value of liabilities that are due to changes in the holding company's own credit risk. If the amount is a net gain, report it as a positive value in this item. If the amount is a net loss, report it as a negative value in this item.

Advanced approaches holding companies only: include the credit spread premium over the risk free rate for derivatives that are liabilities.

Line item 17  All other deductions from (additions to) common equity tier 1 capital before threshold-based deductions
Report the amount of other deductions from (additions to) common equity tier 1 capital that are not captured below:

(1) After-tax gain-on-sale in connection with a securitization exposure
Include any after-tax gain-on-sale in connection with a securitization exposure. Gain-on-sale means an increase in the equity capital of a holding company resulting from a securitization (other than an increase in equity capital resulting from the holding company's receipt of cash in connection with the securitization or reporting of a mortgage servicing asset on Schedule HC).

(2) Defined benefit pension fund assets, net of associated DTLs
A BHC or IHC must deduct defined benefit pension fund assets, net of associated DTLs, held by a holding company. With the prior approval of the Federal Reserve, this deduction is not required for any defined benefit pension fund net asset to the extent the holding company has unrestricted and unfettered access to the assets in that fund.

(3) Investments in the holding company's own shares to the extent not excluded as part of treasury stock.
Include the BHC's and IHC's investments in (including any contractual obligation to purchase) its own common stock instruments, including direct, indirect, and synthetic exposures to such instruments (as defined in the regulatory capital rules), to the extent such instruments are not excluded as part of treasury stock.

For example, if a BHC or IHC already deducts its investment in its own shares (for example, treasury stock) from its common equity tier 1 capital elements, it does not need to make such deduction twice.

A holding company may deduct gross long positions net of short positions in the same underlying instrument only if the short positions involve no counterparty credit risk.

The holding company must look through any holdings of index securities to deduct investments in its own capital instruments.

In addition:
(i) Gross long positions in investments in a holding company's own regulatory capital instruments resulting from holdings of index securities may be netted against short positions in the same underlying index;
(ii) Short positions in index securities that are hedging long cash or synthetic positions may be decomposed to recognize the hedge; and
(iii) The portion of the index that is composed of the same underlying exposure that
is being hedged may be used to offset the long position if both the exposure being hedged and the short position in the index are covered positions under the market risk capital rule, and the hedge is deemed effective by the holding company's internal control processes which would have been assessed by the Federal Reserve.

(4) **Reciprocal cross-holdings in the capital of financial institutions in the form of common stock**
Include investments in the capital of other financial institutions (in the form of common stock) that the holding company holds reciprocally (this is the corresponding deduction approach). Such reciprocal crossholdings may result from a formal or informal arrangement to swap, exchange, or otherwise intend to hold each other's capital instruments.

(5) **Equity investments in financial subsidiaries**
A BHC or IHC must deduct the aggregate amount of its outstanding equity investment, including retained earnings, in its financial subsidiaries (as defined in 12 CFR 208.77) and may not consolidate the assets and liabilities of a financial subsidiary with those of the parent institution. No other deduction is required for these investments in the capital instruments of financial subsidiaries.

(6) **Amount of expected credit loss that exceeds its eligible credit reserves**
(Advanced approaches institutions that exit parallel run only)
Include the amount of expected credit loss that exceeds the eligible credit reserves.

**Line item 18 Non-significant investments in the capital of unconsolidated financial institutions in the form of common stock that exceed the 10 percent threshold for non-significant investments**
BHC or IHC has a non-significant investment in the capital of an unconsolidated financial institution (as defined in the regulatory capital rules) if it owns 10 percent or less of the issued and outstanding common shares of that institution. Report the amount of non-significant investments in the capital of unconsolidated financial institutions in the form of common stock that, in the aggregate, exceed the 10 percent threshold for non-significant investments, calculated as described below. The BHC or IHC may apply associated DTLs to this deduction.

**Line item 19 Subtotal**
This item is shaded and is derived from other items in the schedule; no input required. This is the total of common equity tier 1 prior to adjustments less all of the regulatory adjustments and deductions.

**Line item 20 Significant investments in the capital of unconsolidated financial institutions in the form of common stock, net of DTLs, that exceed the 10 percent common equity tier 1 capital deduction threshold**
This item is shaded and is derived from other items in the schedule; no input required.

**Line item 21 MSAs, net of associated DTLs, that exceed the 10 percent common equity tier 1 capital deduction threshold**
This item is shaded and is derived from other items in the schedule; no input required.

**Line item 22 DTAs arising from temporary differences that could not be realized through net operating loss carrybacks, net of related valuation allowances and net of DTLs, that exceed the 10 percent common equity tier 1 capital deduction threshold**
This item is shaded and is derived from other items in the schedule; no input required.

**Line item 23**  Amount of significant investments in the capital of unconsolidated financial institutions in the form of common stock; MSAs, net of associated DTLs; and DTAs arising from temporary differences that could not be realized through net operating loss carrybacks, net of related valuation allowances and net of DTLs; that exceed the 15 percent common equity tier 1 capital deduction threshold
This item is shaded and is derived from other items in the schedule; no input required.

**Line item 24**  Deductions applied to common equity tier 1 capital due to insufficient amounts of additional tier 1 capital and tier 2 capital to cover deductions
Report the total amount of deductions related to reciprocal cross holdings, non-significant investments in the capital of unconsolidated financial institutions, and non-common stock significant investments in the capital of unconsolidated financial institutions if the holding company does not have a sufficient amount of additional tier 1 capital and tier 2 capital to cover these deductions.

**Line item 25**  Total adjustments and deductions for common equity tier 1 capital
This is the sum of line item 20 through 24.

**Line item 26**  Common Equity Tier 1
This is the subtotal of line item 19 minus line item 25.

**Line item 27**  Additional tier 1 capital instruments plus related surplus
Report the portion of noncumulative perpetual preferred stock and related surplus as defined by Schedule HC-R, Part I.B., item 20, with zero transition provisions, that satisfy all the criteria for additional tier 1 capital in the regulatory capital rules of the Federal Reserve.

Include instruments that were (i) issued under the Small Business Job’s Act of 2010, or, prior to October 4, 2010, under the Emergency Economic Stabilization Act of 2008 and (ii) were included in the tier 1 capital under the Federal Reserve’s general risk-based capital rules (12 CFR part 225, appendix A, and, if applicable, appendix E) (for example, tier 1 instruments issued under the TARP program that are grandfathered permanently). Also include additional tier 1 capital instruments issued as part of an ESOP, provided that the repurchase of such instruments is required solely by virtue of ERISA for a banking organization that is not publicly-traded.

**Line item 28**  Tier 1 minority interest not included in common equity tier 1 capital (report on a fully phased-in basis)
Similar to item 5, this captures all qualifying tier 1 minority interest includable under additional tier 1 capital.

**Line item 29**  Additional tier 1 capital before deductions
This is the sum of line items 27 and 28.

**Line item 30**  Additional tier 1 capital deductions
Report additional tier 1 capital deductions as the sum of the following elements:

1. Investments in own additional tier 1 capital instruments:

   Report the holding company’s investments in (including any contractual obligation to purchase) its own additional tier 1 instruments, whether held directly or indirectly.
A holding company may deduct gross long positions net of short positions in the same underlying instrument only if the short positions involve no counterparty risk.

The holding company must look through any holdings of index securities to deduct investments in its own capital instruments. In addition:

(i) Gross long positions in investments in a holding company’s own regulatory capital instruments resulting from holdings of index securities may be netted against short positions in the same index;
(ii) Short positions in index securities that are hedging long cash or synthetic positions can be decomposed to recognize the hedge; and
(iii) The portion of the index that is composed of the same underlying exposure that is being hedged may be used to offset the long position if both the exposure being hedged and the short position in the index are covered positions under the market risk capital rule, and the hedge is deemed effective by the holding company’s internal control processes.

(2) Reciprocal cross-holdings in the capital of financial institutions.

Include investments in the additional tier 1 capital instruments of other financial institutions that the holding company holds reciprocally, where such reciprocal crossholdings result from a formal or informal arrangement to swap, exchange, or otherwise intend to hold each other’s capital instruments. If the holding company does not have a sufficient amount of a specific component of capital to effect the required deduction, the shortfall must be deducted from the next higher (that is, more subordinated) component of regulatory capital.

For example, if a holding company is required to deduct a certain amount from additional tier 1 capital and it does not have additional tier 1 capital, then the deduction should be from common equity tier 1 capital.

(3) Non-significant investments in additional tier 1 capital of unconsolidated financial institutions that exceed the 10 percent threshold for non-significant investments.

Calculate this amount as follows:

(i) Determine the aggregate amount of non-significant investments in the capital of unconsolidated financial institutions in the form of common stock, additional tier 1, and tier 2 capital.

(ii) Determine the amount of non-significant investments in the capital of unconsolidated financial institutions in the form of additional tier 1 capital.

(iii) If the amount in (i) is greater than the 10 percent threshold for non-significant investments then multiply the difference by the ratio of (ii) over (i).

(iv) If the amount in (i) is less than the 10 percent threshold for non-significant investments, report zero.

(4) Significant investments in the capital of unconsolidated financial institutions not in the form of common stock to be deducted from additional tier 1 capital.

Report the total amount of significant investments in the capital of unconsolidated financial institutions in the form of additional tier 1 capital.

(5) Other adjustments and deductions.
Include adjustments and deductions applied to additional tier 1 capital due to insufficient tier 2 capital to cover deductions (related to reciprocal cross holdings, non-significant investments in the tier 2 capital of unconsolidated financial institutions, and significant investments in the tier 2 capital of unconsolidated financial institutions).

**Line item 31  Additional tier 1 capital (greater of item 29 minus item 30 or zero)**
This item is shaded and is derived from other items in the schedule. This provides the total of additional tier 1 capital.

**Tier 1 Capital**

**Line item 32  Tier 1 capital (sum of items 26 and 31)**
This item is shaded and is derived from other items in the schedule. This provides the total amount of tier 1 capital.

**Other (reflect all items on a quarterly basis)**

**Line item 33  Issuance of Common Stock (Including Conversion of Common Stock)**
Captures the total issuance of common stock and related surplus in the reporting period on a quarterly basis.

**Line item 34  Repurchases of Common Stock**
Captures the total repurchases of common stock in the reporting period on a quarterly basis.

**Line item 35  Net Income (Loss) Attributable to Bank or Intermediate Holding Company**
Refer to FR Y-9C instructions for Schedule HI-A, item 4 and report on a quarterly basis. Report losses as a negative value.

**Line item 36  Cash Dividends Declared on Preferred Stock**
Refer to FR Y-9C instructions for Schedule HI-A, item 10 and report on a quarterly basis.

**Line item 37  Cash Dividends Declared on Common Stock**
Refer to FR Y-9C instructions for Schedule HI-A, item 11 and report on a quarterly basis.

**Line item 38  Previously Issued Tier 1 Capital Instruments (Excluding Minority Interest) that would No Longer Qualify (please report 100% value)**
Report 100% of the value of previously issued Tier 1 capital instruments that will no longer qualify as Tier 1 capital as per the regulatory capital rule (including perpetual preferred stock and trust preferred securities subject to phase-out arrangements). Report balances in full, without reflecting any phase-out arrangements included in the regulatory capital rule.

**Line item 39  Previously Issued Tier 1 Minority Interest that Would No Longer Qualify (Please Report 100% Value)**
Report 100% of the value of previously issued tier 1 minority interest that will no longer qualify as tier 1 capital as per the regulatory capital rule. Report balances in full, without reflecting any phase-out arrangements included in the regulatory capital rule.
D.2—Exception Bucket Calculator

The Exception Bucket Calculator schedule collects the data necessary to calculate the items that may receive limited recognition in Common Equity Tier 1 (i.e., significant investments in the common shares of unconsolidated financial institutions, mortgage servicing assets and deferred tax assets arising from temporary differences). These items may be recognized in Common Equity Tier 1 up to 10% of the BHC’s or IHC’s common equity on an individual basis and 15% on an aggregated basis after application of all regulatory adjustments.

Significant investments in the capital of unconsolidated financial institutions in the form of common stock

Line item 1  Gross significant investments in the capital of unconsolidated financial institutions in the form of common stock
Aggregate holdings of capital instruments relevant to significant investments in the capital of unconsolidated financial entities, including direct, indirect and synthetic holdings in both the banking book and trading book.

Line item 2  Permitted offsetting short positions in relation to the specific gross holdings included above
Offsetting positions in the same underlying exposure where the maturity of the short position either matches the maturity of the long position or has a residual maturity of at least one year.

Line item 3  Significant investments in the capital of unconsolidated financial institutions in the form of common stock net of short positions
This item is shaded and is derived from other items in the schedule; no input required.

Line item 4  10 percent common equity tier 1 deduction threshold
This item is shaded and is derived from other items in the schedule; no input required.

Line item 5  Amount to be deducted from common equity tier 1 due to 10 percent deduction threshold
This item is shaded and is derived from other items in the schedule; no input required.

Mortgage servicing assets

Line item 6  Total mortgage servicing assets classified as intangible
Mortgage servicing assets may receive limited recognition when calculating common equity tier 1, with recognition typically capped at 10% of the bank’s common equity (after the application of all regulatory adjustments).

Line item 7  Associated deferred tax liabilities which would be extinguished if the intangible becomes impaired or derecognized under the relevant accounting standards
The amount of mortgage servicing assets to be deducted from common equity tier 1 is to be offset by any associated deferred tax liabilities, with recognition capped at 10% of the bank’s common equity tier 1 (after the application of all regulatory adjustments). If the bank chooses to net its deferred tax liabilities associated with mortgage servicing assets against deferred tax assets (in Line 17 of Schedule D.1 – Capital Composition), those deferred tax liabilities...
liabilities should not be deducted again here.

**Line item 8  Mortgage servicing assets net of related deferred tax liabilities**
This item is shaded and is derived from other items in the schedule; no input required.

**Line item 9  10 percent common equity tier 1 deduction threshold**
This item is shaded and is derived from other items in the schedule; no input required.

**Line item 10  Amount to be deducted from common equity tier 1 due to 10 percent deduction threshold**
This item is shaded and is derived from other items in the schedule; no input required.

**Deferred tax assets due to temporary differences**

**Line item 11  DTAs arising from temporary differences that could not be realized through net operating loss carrybacks, net of related valuation allowances and net of DTLs**
Net deferred tax assets arising from temporary differences may receive limited recognition in common equity tier 1, with recognition capped at 10% of the bank’s common equity (after the application of all regulatory adjustments).

**Line item 12  10 percent common equity tier 1 deduction threshold**
This item is shaded and is derived from other items in the schedule; no input required.

**Line item 13  Amount to be deducted from common equity tier 1 due to 10 percent deduction threshold**
This item is shaded and is derived from other items in the schedule; no input required.

**Aggregate of items subject to the 15% limit (significant investments, mortgage servicing assets and deferred tax assets arising from temporary differences)**

**Line item 14  Sum of items 3, 8, and 11**
This item is shaded and is derived from other items in the schedule; no input required.

**Line item 15  15 percent common equity tier 1 deduction threshold**
This item is shaded and is derived from other items in the schedule; no input required.

**Line item 16  Sum of items 5, 10, and 13**
This item is shaded and is derived from other items in the schedule; no input required.

**Line item 17  Item 14 minus item 16**
This item is shaded and is derived from other items in the schedule; no input required.

**Line item 18  Amount to be deducted from common equity tier 1 due to 15 percent deduction threshold**
This item is shaded and is derived from other items in the schedule; no input required.

**D.3—Advanced Risk-Weighted Assets**

*Advanced approaches BHCs and IHCs, including BHCs and IHCs that are considered as*
**mandatory advanced approaches institutions or that have opted-in voluntarily as an advanced approaches institution, are required to complete Schedule D.3 – Advanced RWA.** All BHCs and IHCs, including advanced approaches BHCs and IHCs and non-advanced approaches BHCs and IHCs must complete Schedule D.4 – Standardized RWA.

In Schedule D.3 – Advanced RWA, BHCs and IHCs should provide risk-weighted asset estimates reflecting the regulatory capital rule (78 Federal Register 62018, October 11, 2013) and the market risk capital rule (78 Federal Register 76521, December 18, 2013) released by the U.S. banking agencies.

BHCs and IHCs that are subject to market risk capital requirements at the as of date are required to complete the market risk-weighted asset section within the schedule. Please refer to the revised regulatory capital rule (78 Federal Register 62018, October 11, 2013) and the updated market risk capital rule (78 Federal Register 76521, December 18, 2013) released by the U.S. banking agencies for details of the requirements.

Advanced approaches BHCs and IHCs that are unable to provide advanced approaches risk weighted asset estimates should send formal written notification to the Federal Reserve and specify the affected portfolios, current limitations that preclude the BHC or IHC from providing advanced approaches RWA estimates as well as management’s plan for addressing those limitations. The notification should be sent to info@CCAR.frb.org.

**Advanced Approaches Credit Risk (Including CCR and non-trading credit risk), with 1.06 scaling factor where applicable**

**Applicable to Advanced Approaches Banking Organizations**
Risk-weighted assets should reflect the 1.06 scaling factor to the Internal Rating-Based Approach (IRB) credit risk-weighted assets where relevant, unless noted otherwise.

**Line item 1 Credit RWA**
This item is shaded and is derived from other items in the schedule; no input required. This is the sum of Schedule D.3 line items 2, 15, 21, 25, 29, 30 and 31.

**Line item 2 through 30**
Definition of the BHC’s or IHC’s projections should correspond to the definitions outlined by the corresponding MDRM code in the FFIEC 101 report, Schedule B, Column G per the regulatory capital rule (78 Federal Register 62018, October 11, 2013).

**Line item 2 Wholesale Exposures**
This item is derived as the sum of items 3 through 8.

**Line item 3 Wholesale Exposures: Corporate**
Report the amount that is consistent with the definitions provided in FFIEC 101 Schedule B Line Item 1 column G.

**Line item 4 Wholesale Exposures: Bank**
Report the amount that is consistent with the definitions provided in FFIEC 101 Schedule B Line Item 2 column G.

**Line item 5 Wholesale Exposures: Sovereign**
Report the amount that is consistent with the definitions provided in FFIEC 101 Schedule B Line Item 3 column G.

**Line item 6 Wholesale Exposures: IPRE**
Report the amount that is consistent with the definitions provided in FFIEC 101 Schedule B Line Item 4 column G.

**Line item 7 Wholesale Exposures: HVCRE**
Report the amount that is consistent with the definitions provided in FFIEC 101 Schedule B Line Item 5 column G.

**Line item 8 Wholesale Exposures: Counterparty Credit Risk**
This item is derived as the sum of items 9 through 14.

**Line item 9 Wholesale Exposures: Counterparty Credit Risk (Eligible margin loans, repostyle transactions and OTC derivatives with cross-product netting—EAD adjustment method)**
Report the amount that is consistent with the definitions provided in FFIEC 101 Schedule B Line Item 6 column G.

**Line item 10 Wholesale Exposures: Counterparty Credit Risk (Eligible margin loans, repostyle transactions and OTC derivatives with cross-product netting—collateral reflected in LGD)**
Report the amount that is consistent with the definitions provided in FFIEC 101 Schedule B Line Item 7 column G.

**Line item 11 Wholesale Exposures: Counterparty Credit Risk (Eligible margin loans, repostyle transactions—no cross-product netting—EAD adjustment method)**
Report the amount that is consistent with the definitions provided in FFIEC 101 Schedule B Line Item 7 column G.

**Line item 12 Wholesale Exposures: Counterparty Credit Risk (Eligible margin loans, repostyle transactions—no cross-product netting—collateral reflected in LGD)**
Report the amount that is consistent with the definitions provided in FFIEC 101 Schedule B Line Item 8 column G.

**Line item 13 Wholesale Exposures: Counterparty Credit Risk (OTC derivative—no cross-product netting—EAD adjustment method)**
Report the amount that is consistent with the definitions provided in FFIEC 101 Schedule B Line Item 9 column G.

**Line item 14 Wholesale Exposures: Counterparty Credit Risk (OTC derivatives—no cross-product netting—collateral reflected in LGD)**
Report the amount that is consistent with the definitions provided in FFIEC 101 Schedule B Line Item 10 column G.

**Line item 15 Retail Exposures**
This item is derived as the sum of items 16 through 20.

**Line item 16 Retail Exposures: Residential mortgage—closed-end first lien exposure**
Report the amount that is consistent with the definitions provided in FFIEC 101 Schedule B Line Item 12 column G.

**Line item 17 Retail Exposures: Residential mortgage—closed-end junior lien exposure**
Report the amount that is consistent with the definitions provided in FFIEC 101 Schedule B Line Item 13 column G.

**Line item 18 Retail Exposures: Residential mortgage—revolving exposures**
Report the amount that is consistent with the definitions provided in FFIEC 101 Schedule B
Line Item 19 Retail Exposures: Qualifying revolving exposures
Report the amount that is consistent with the definitions provided in FFIEC 101 Schedule B
Line Item 15 column G.

Line item 20 Retail Exposures: Other retail exposures
Report the amount that is consistent with the definitions provided in FFIEC 101 Schedule B
Line Item 16 column G.

Line item 21 Securitization Exposures
This item is derived as the sum of items 22 through 24.

Line item 22 Securitization Exposures: Subject to supervisory formula approach (SFA)
Report the amount that is consistent with the definitions provided in FFIEC 101 Schedule B
Line Item 17 column G.

Line item 23 Securitization Exposures: Subject to simplified supervisory formula approach (SSFA)
Report the amount that is consistent with the definitions provided in FFIEC 101 Schedule B
Line Item 18 column G.

Line item 24 Securitization Exposures: Subject to 1,250% risk-weight
Report the amount that is consistent with the definitions provided in FFIEC 101 Schedule B
Line Item 19 column G.

Line item 25 Cleared Transaction
This item is derived as the sum of items 26 through 28.

Line item 26 Cleared Transaction: Derivative contracts and netting sets to derivatives
Report the amount that is consistent with the definitions provided in FFIEC 101 Schedule B
Line Item 20 column G.

Line item 27 Cleared Transaction: Repo-style transactions
Report the amount that is consistent with the definitions provided in FFIEC 101 Schedule B
Line Item 21 column G.

Line item 28 Cleared Transaction: Default fund contributions
Report the amount that is consistent with the definitions provided in FFIEC 101 Schedule B
Line Item 22 column G.

Line item 29 Equity Exposures
Report the amount that is consistent with the definitions provided in FFIEC 101 Schedule B
Line Item 23, 24, and 25 column G.

Line item 30 Other Assets
Report the amount that is consistent with the definitions provided in FFIEC 101 Schedule B
Line Item 26, 27, and 28 column G.

Line item 31 Credit Valuation Adjustment (CVA) Capital Charge (Risk-Weighted Asset Equivalent)
This item is shaded and is derived from other items in the schedule; no input required.
Line item 32  Advanced Credit Valuation Adjustment (CVA) Approach
This item is shaded and is derived from other items in the schedule; no input required.

Line item 33  Credit Valuation Adjustment (CVA) capital charge (Risk-Weighted Asset Equivalent); Advanced CVA Approach: Unstressed Value at Risk (VaR) with Multipliers
Stand-alone 10-day value-at-risk (VaR) calculated on the set of credit valuation adjustments (CVAs) for all over-the-counter (OTC) derivatives counterparties together with eligible credit valuation adjustment (CVA) hedges. The reported value-at-risk should consist of both general and specific credit spread risks and is restricted to changes in the counterparties credit spreads. The bank must multiply the reported value-at-risk by three times, consistent with the approach used in calculating market risk capital charge (three-time multiplier). The 1.06 scaling factor does not apply.

BHC or IHC should report 0 if it does not use the advanced credit value adjustment (CVA) approach.

Line item 34  Credit Valuation Adjustment (CVA) Capital Charge (Risk-Weighted Asset Equivalent); Advanced CVA Approach: Stressed Value at Risk (VaR) with multipliers
Stand-alone 10-day stressed Value-at-risk (VaR) calculated on the set of credit valuation adjustments (CVAs) for all over-the-counter (OTC) derivatives counterparties together with eligible credit valuation adjustments (CVA) hedges. The reported value-at-risk should consist of both general and specific credit spread risks and is restricted to changes in the counterparties credit spreads. It should reflect three-times multiplier. The 1.06 scaling factor does not apply. BHC or IHC should report 0 if it does not use the advanced credit valuation adjustments (CVA) approach.

Line item 35  Credit Valuation Adjustment (CVA) Capital Charge (Risk-Weighted Asset Equivalent): Simple CVA Approach
Risk-weighted asset (RWA) equivalent using the simple credit valuation adjustment (CVA) approach.

Advanced Approaches Operational Risk
Line item 36  Operational RWA
Report the amount consistent with the definitions provided in FFIEC 101 Schedule B line item 35 Column G per the regulatory capital rule (78 Federal Register 62018, October 11, 2013).

Market Risk
Line item 37  Market RWA
This item is shaded and is derived from other items in the schedule; no input required. This is the sum of Schedule D.3 line items 38, 39, 40, 41, 46, 47, and 50. The amount derived is consistent with the definitions provided in FFIEC 101 Schedule B line item 34 Column G.

Line item 38  Value at Risk (VaR) based capital requirement
Report the risk-weighted asset amount consistent with the definition for FFIEC 102 Line Item 4.

Line item 39  Stressed Value-at-Risk (VaR) based capital requirement
Report the risk-weighted asset amount consistent with the definition for FFIEC 102 Line Item 7.
Line item 40  Incremental Risk Capital Charge (IRC)
Report the risk-weighted asset amount consistent with the definition for FFIEC 102 Line Item 18.

Line item 41  Correlation Trading
Report the risk-weighted asset amount consistent with the definition for FFIEC 102 Line Item 45. Only if a BHC or IHC has received supervisory approval of its comprehensive risk model effectiveness report the risk-weighted asset amount consistent with the definition for FFIEC 102 Line Item 51.

Line item 42  Correlation Trading: Comprehensive Risk Measurement (CRM), Before Application of Surcharge
Report the risk-weighted asset amount consistent with the definition for FFIEC 102, Line Item 19.

Line item 43  Correlation Trading: 8% of Advanced Measurement Method (100%) for Exposures Subject to Comprehensive Risk Measurement (CRM)
This item is shaded and is derived from other items in the schedule; no input required. This item should equal the risk-weighted asset amount consistent with the definition for FFIEC 102 Line Item 39.

Line item 44  Correlation Trading: Advanced Measurement Method (100%) for Exposures Subject to Comprehensive Risk Measurement (CRM) - Net long
Report the risk-weighted asset amount consistent with the definition for FFIEC 102 Line Item 27.

Line item 45  Correlation Trading: Advanced Measurement Method (100%) for Exposures Subject to Comprehensive Risk Measurement (CRM) - Net Short
Report the risk-weighted asset amount consistent with the definition for FFIEC 102 Line Item 35.

Line item 46  Non-modeled Securitization
Report the risk-weighted asset amount consistent with the definitions for FFIEC 102 Line Item 13.

Line item 47  Specific Risk add-on (excluding securitization and correlation)
This item is shaded and is derived from other items in the schedule; no input required.

Line item 48  Debt
Report the risk-weighted asset amount consistent with the definition for FFIEC 102 Line Item 8.

Line item 49  Equity
Report the risk-weighted asset amount consistent with the definition for FFIEC 102 Line Item 9.

Line item 50  Other Market Risk
Report the risk-weighted asset amount consistent with the definition for FFIEC 102 Line Item 54.

Line item 51  Assets subject to the general risk-based capital requirements
Definition of the BHC’s or IHC’s projections should correspond to the definitions outlined by
the MDRM code (AABGJ198) of the FFIEC 101 report, Schedule B, Line 32, Column G per the regulatory capital rule (78 Federal Register 62018, October 11, 2013).

**Line item 52  Other RWA**
If the BHC or IHC is unable to assign RWA to one of the above categories, even on a best-efforts basis, they should be reported in this line.

**Line item 53  Excess eligible credit reserves not included in tier 2 capital**
Include excess eligible credit reserves not included in tier 2 capital, consistent with the revised regulatory capital rule (78 Federal Register 62018, October 11, 2013). Definition of the BHC’s or IHC’s projections should correspond to the definitions outlined by the MDRM code (AABGJ152) of the FFIEC 101, Schedule B, Line Item 33, Column G.

**Line item 54  Total Risk-Weighted Assets**
This item is shaded and is derived from other items in the schedule, no input required. This is the sum of Schedule D.3 line items 1, 36, 37, 51 and 52 minus Schedule D.3 Line Item 53.
D.4—Standardized Risk-Weighted Assets

All BHCs and IHCs, including advanced approaches BHCs and IHCs and non-advanced approaches BHCs and IHCs must complete Schedule D.4 – Standardized RWA. In addition, advanced approaches BHCs and IHCs are required to complete Schedule D.3 – Advanced RWA due to the floor requirement per the Collins Amendment under Section 171 of the DFA.

For the purpose of completing Schedule D.4 – Standardized RWA, BHCs and IHCs are required to report credit risk-weighted assets using the methodologies in the standardized approach of the regulatory capital rule.

Advanced approach firms must apply a 250 percent risk-weight to mortgage servicing assets (MSAs), deferred tax assets arising from temporary differences that could not be realized through net operating loss carrybacks, and significant investments in the capital of unconsolidated financial institutions in the form of common stock that are not deducted from capital. For all reporting quarters, a non-advanced approach firm should apply a 100 percent risk weight to any amounts of MSAs, deferred tax assets arising from temporary differences that could not be realized through net operating loss carrybacks, and significant investments in the capital of unconsolidated financial institutions in the form of common stock that are not deducted from capital, and continue to apply the 2017 current risk weights under the capital rules to amounts of non-significant investments in the capital of unconsolidated financial institutions and significant investments in the capital of unconsolidated financial institution not in the form of common stock that are not deducted from capital.

BHCs and IHCs that are subject to market risk capital requirements at the as of date are required to complete the market risk-weighted asset section within the schedule. Please refer to the regulatory capital rule (78 Federal Register 62018, October 11, 2013) and the market risk capital rule (78 Federal Register 76521, December 18, 2013) released by the U.S. banking agencies for details of the requirements.

Where possible, please reference the definitions on Standardized RWA that is provided in the FR Y-9C, Schedule HC-R, Part II, on a fully phased-in basis.

Standardized Approach Credit Risk

Line item 1  Cash and balances due from depository institutions
Report the risk-weighted asset amount consistent with the definition for FR Y-9C, HC-R, Part II, Line Item 1

Line item 2a  Securities (excluding securitizations): Held-to-maturity

Line item 2b  Securities (excluding securitizations): Available-for-sale

Line item 3  Federal funds sold
Loans and leases on held for sale
Line item 4a Residential Mortgage exposures

Line item 4b High Volatility Commercial Real Estate

Line item 4c Exposures past due 90 days or more or on nonaccrual
Report the risk-weighted asset amount consistent with the definition for FR Y-9C, HC-R, Part II, Line Item 4c.

Line item 4d All other exposures
Report the risk-weighted asset amount consistent with the definition for FR Y-9C, HC-R, Part II, Line Item 4d.

Loans and leases, net of unearned income
Line item 5a Residential mortgage exposures

Line item 5b High Volatility Commercial Real Estate
Report the risk-weighted asset amount consistent with the definition for FR Y-9C, HC-R, Part II, Line Item 5b.

Line item 5c Exposures past due 90 days or more or on nonaccrual
Report the risk-weighted asset amount consistent with the definition for FR Y-9C, HC-R, Part II, Line Item 5c.

Line item 5d All other exposures
Report the risk-weighted asset amount consistent with the definition for FR Y-9C, HC-R, Part II, Line Item 5d.

Line item 6 Trading assets (excluding securitizations that receive standardized charges)

Line item 7a All other assets

Line item 7b Separate account bank-owned life insurance

Line item 7c Default fund contributions to central counterparties
Report the risk-weighted asset amount consistent with the definition of FR Y-9C, HC-R, Part II, Line Item 8b.

On-balance sheet securitization exposures
Line item 8a Held-to-maturity securities

**Line item 8b Available-for-sale securities**
Report the risk-weighted asset amount consistent with the definition of FR Y-9C, HC-R, Part II, Line Item 9b.

**Line item 8c Trading assets that receive standardized charges**
Report the risk-weighted asset amount consistent with the definition for FR Y-9C, HC-R, Part II, Line Item 9c.

**Line item 8d All other on-balance sheet securitization exposures**
Report the risk-weighted asset amount consistent with the definition for FR Y-9C, HC-R, Part II, Line Item 9d.

**Line item 9 Off-balance sheet securitization exposures**

**Line item 10 RWA for Balance Sheet Asset Categories (sum of items 1 through 8d)**
This item is shaded and is derived from other items in the schedule, no input required.

**Derivatives and Off-Balance Sheet Items (Excluding Securitization Exposures)**

**Line item 11 Financial standby letters of credit**

**Line item 12 Performance standby letters of credit and transaction related contingent items**

**Line item 13 Commercial and similar letters of credit with an original maturity of one year or less**

**Line item 14 Retained recourse on small business obligations sold with recourse**

**Line item 15 Repo-style transactions**

**Line item 16 All other off-balance sheet liabilities**

**Line item 17a Unused commitments: Original maturity of one year or less, excluding ABCP conduits**
Report the risk-weighted asset amount consistent with the definition for FR Y-9C, HC-R,
Part II, Line Item 18a.

**Line item 17b Unused commitments: Original maturity of one year or less to ABCP**

**Line item 17c Unused commitments: Original maturity exceeding one year**

**Line item 18 Unconditionally cancelable commitment**

**Line item 19 Over-the-counter derivatives**

**Line item 20 Centrally cleared derivatives**

**Line item 21 Unsettled transactions (failed trades)**

**Line item 22 RWA for Derivatives and Off-Balance-Sheet Asset Categories**
This item is shaded and is derived from other items in the schedule, no input required. This item is derived as the sum of items 9 through 21.

**Line item 23 RWA for purposes of calculating the allowance for loan and lease losses (ALLL) 1.25 percent threshold**

**Market Risk**

**Line item 24 Market RWA**
This item is shaded and is derived from other items in the schedule; no input required.

**Line item 25 Value-at-risk (VaR) with Multiplier**
Report the risk-weighted asset amount consistent with the definition for FFIEC 102 Line Item 4.

**Line item 26 Stressed VaR with Multiplier**
Report the risk-weighted asset amount consistent with the definition for FFIEC 102 Line Item 7.

**Line item 27 Incremental risk charge (IRC)**
Report the risk-weighted asset amount consistent with the definition for FFIEC 102 Line Item 18.

**Line item 28 Correlation Trading**
Report the risk-weighted asset amount consistent with the definition for FFIEC 102 Line Item 42. Only if a BHC or IHC has received supervisory approval of its comprehensive risk model effectiveness report the risk-weighted asset amount consistent with the definition
for FFIEC 102 Line Item 48.

**Line item 29  Correlation Trading: Comprehensive Risk Measurement (CRM), Before Application of Surcharge**
Report the risk-weighted asset amount consistent with the definition for FFIEC 102, Line Item 19.

**Line item 30 8% of Standardized Measurement Method (100%) for Exposures Subject to Comprehensive Risk Measurement (CRM)**
This item is shaded and is derived from other items in the schedule; no input required. This item should equal the risk-weighted asset amount consistent with the definition for FFIEC 102 Line Item 37.

**Line item 31  Correlation Trading: Standardized Measurement Method (100%) for Exposures Subject to Comprehensive Risk Measurement (CRM) - Net long**
Report the risk-weighted asset amount consistent with the definition for FFIEC 102 Line Item 26.

**Line item 32  Correlation Trading: Standardized Measurement Method (100%) for Exposures Subject to Comprehensive Risk Measurement (CRM) - Net Short**
Report the risk-weighted asset amount consistent with the definition for FFIEC 102 Line Item 34.

**Line item 33  Non-modeled Securitization**
Report the risk-weighted asset amount consistent with the definitions for FFIEC 102 Line Item 10.

**Line item 34  Specific risk add-on (excluding securitization and correlation)**
This item is shaded and is derived from other items in the schedule; no input required.

**Line item 35  Debt**
Report the risk-weighted asset amount consistent with the definition for FFIEC 102 Line Item 8.

**Line item 36  Equity**
Report the risk-weighted asset amount consistent with the definition for FFIEC 102 Line Item 9.

**Line item 37  Other market risk**
Report the risk-weighted asset amount consistent with the definition for FFIEC 102 Line Item 54.

**Other**

**Line item 38  Excess allowance for loan and lease losses**

**Line item 39  Allocated transfer risk reserve**

**Line item 40  Total Risk-Weighted Assets**
This item is shaded and is derived from other items in the schedule; no input required.
D.5—Leverage Exposure

All BHCs and IHCs must complete the portion of the schedule relevant to “Leverage Exposure for Tier 1 Leverage Ratio” (lines 1 - 4). Advanced approaches BHCs and IHCs must also complete the portion of the schedule relevant to “Leverage Exposure for Supplementary Leverage Ratio” (lines 5 - 24).

The exposure measure for the tier 1 leverage ratio is based upon methodology in the regulatory capital rule. The exposure measure for the supplementary leverage ratio has been revised from the 2014 CCAR instructions to reflect the changes to the definition of leverage exposure, per the final rule on the Supplementary Leverage Ratio issued by the banking agencies on September 3, 2014. The final rule modifies “leverage exposure,” which is the denominator calculation for the supplementary leverage ratio, in a manner consistent with recent changes agreed to by the Basel Committee on Banking Supervision. The revisions in the final rule would apply to all advanced approaches banking organizations.

Consistent with the final rule, an advanced approaches banking organization should calculate its supplementary leverage ratio as the ratio of its tier 1 capital to total leverage exposure. The proposed rule would have required banking organizations to use daily averages to calculate both on- and off-balance sheet items in total leverage exposure. However, under the final rule, institutions are required to calculate total leverage exposure as the mean of the on-balance sheet assets calculated as of each day of the reporting quarter, plus the mean of the off-balance sheet exposures calculated as of the last day of each of the most recent three months, minus the applicable deductions under the 2013 capital rule. For purposes of calculating projections for the supplementary leverage ratio denominator, BHCs and IHCs that are unable to calculate averages based on the averages of daily or monthly data may report exposures as of the quarter end.

Leverage Exposure for Tier 1 Leverage Ratio (applicable to all BHCs and IHCs)

Line item 1  Average total consolidated assets
Report average total on-balance sheet assets as reported in the FR Y-9C, Schedule HC-K, item 5.

Line item 2  LESS: Deductions from Common Equity Tier 1 and Additional Tier 1 Capital (report as a positive number)
Regulatory deductions from common equity tier 1 and additional tier 1 capital. Deductions should be calculated as defined in the FR Y-9C, Schedule HC-R, Part I.B., item 37.

Line item 3  LESS: Other Deductions from (Additions to) Assets for Leverage Ratio Purposes (report as a positive number if a net deduction or a negative value if a net addition)
Other deductions from or additions to assets for purposes of the leverage ratio as defined in the FR Y-9C, Schedule HC-R, Part I.B., item 38.

Line item 4  Total Assets for the Leverage Ratio (item 1 less the sum of items 2 & 3)
This item is shaded and is derived from other items in the schedule; no input required.

---

Leverage Exposure for Supplementary Leverage Ratio (applicable to advanced approaches BHCs and IHCs only)
Refer to section 217.10(c)(4)(ii)(A) of the final rule.

Line item 5  On-Balance Sheet Assets (excluding on-balance sheet assets for repo-style transactions and derivative exposures, but including cash collateral received in derivative transactions)
On-balance sheet assets (excluding on-balance sheet assets for repo-style transactions and derivative exposures, but including cash collateral received in derivative transactions).

Line item 6  LESS: Deductions from common equity tier 1 capital and additional tier 1 capital (report as a positive number)
Regulatory deductions from common equity tier 1 and additional tier 1 capital, as applicable to advanced-approaches BHCs and IHCs per the capital rules under section 217.22(a),(c), and (d).

Line item 7  Total On-Balance Sheet Exposures (excluding on-balance sheet assets for repo-style transactions and derivative exposures, but including cash collateral received in derivative transactions) (item 5 less item 6)
This item is shaded and is derived from other items in the schedule; no input required.

Derivative exposures
Refer to sections 217.10(c)(4)(ii) (B), (C), (D), or (I) of the final rule as appropriate.

Line item 8  Replacement cost for derivative exposures (net of cash variation margin).
Report the total amount of the replacement cost for all derivative exposures, generally consistent with the US GAAP balance sheet numbers, and adjusted for cash variation margin that does not meet the criteria described in section 217.10 (c)(4)(ii)(C) of the final rule.

Line item 9  Add-on amounts for potential future exposure (PFE) for derivatives exposures
Report the total amount of PFE for each derivative contract, including for cleared transactions except as provided in section 217.10 (c)(4)(ii)(I) of the final rule, to which the banking organization is a counterparty (or each single-product netting set of such transactions), as described in section 34 of the regulatory capital rule, but without regard to section 217.34(b). Specifically, a banking organization may not use cash variation margin to reduce the net current credit exposure or the gross current credit exposure in calculation of the net-to-gross ratio.

Line item 10  Gross-up for collateral posted if deducted from the on-balance sheet assets, except for cash variation margin
Report cash (except for qualifying cash variation margin) and non-cash collateral posted to a counterparty in a derivative transaction that has reduced the institution’s on-balance sheet assets.

Line item 11  LESS: Deductions of receivable assets for cash variation margin posted in derivatives transactions, if included in on-balance sheet assets (report as a positive value)
Report the value of cash collateral that is posted to a counterparty to a derivative contract and that has been included on the banking organization’s balance sheet as a receivable if the
posted cash collateral satisfies the requirements described in section 217.10 (c)(4)(ii)(C) of the final rule. If not applicable, report zero.

**Line item 12  LESS: Exempted CCP leg of client-cleared transactions (report as a positive value)**
A clearing member banking organization that does not guarantee the performance of a CCP with respect to a transaction cleared on behalf of a clearing member client may exclude its exposure to the CCP for purposes of determining its total leverage exposure (if such exposure is included in the on-balance sheet items).

A clearing member banking organization that guarantees the performance of a CCP with respect to a transaction cleared on behalf of a clearing member client must treat its exposure to the CCP as a derivative contract for purposes of determining its total leverage exposure.

**Line item 13  Effective notional principal amount of sold credit protection**
The effective notional principal amount (that is, the apparent or stated notional principal amount multiplied by any multiplier in the derivative contract) of a credit derivative, or other similar instrument, through which the banking organization provides credit protection (for example, credit default swaps or total return swaps that reference instruments with credit risk, such as a bond).

**Line item 14  LESS: Effective notional principal amount offsets and PFE adjustments for sold credit protection (report as a positive value)**
A banking organization may reduce the effective notional principal amount of sold credit protection by a reduction in the mark-to-fair value of the sold credit protection if the reduction is recognized in common equity tier 1 capital.

A banking organization may further reduce the effective notional principal amount of sold credit protection by the effective notional principal amount of a credit derivative or similar instrument through which the banking organization has purchased credit protection from a third party (purchased credit protection) if the requirements of section 217.10 (c)(4)(ii)(D) of the final rule are satisfied. When a banking organization reduces the effective notional principal amount of sold credit protection by purchased credit protection in accordance with this section, the banking organization must reduce the effective notional principal amount of purchased credit protection by the amount of any increase in the mark-to-fair value of the purchased credit protection that is recognized in common equity tier 1 capital.

If a banking organization purchases credit protection through a total return swap and records the net payments received as net income but does not record offsetting deterioration in the mark-to-fair value of the sold credit protection on the reference exposure (either through reductions in fair value or by additions to reserves) in common equity tier 1 capital, the banking organization may not reduce the effective notional principal amount of the sold credit protection.

A banking organization may also adjust PFE for sold credit protection as described in section 217.10 (c)(4)(ii)(B) of the final rule, to avoid double-counting of the notional amounts of these exposures.

**Line item 15  Total derivative exposures (sum of items 8, 9, 10, and 13, minus items 11, 12, and 14)**
This item is shaded and is derived from other items in the schedule; no input required.
**Repo-style transactions**
Refer to sections (c)(4)(ii) (E), (F), or (G) of the final rule as appropriate.

**Line item 16  On-balance sheet assets for repo-style transactions**
Report the on-balance sheet assets for repo-style transactions, except include the gross value of receivables for reverse repurchase transactions. Exclude from this item the value of securities received in a security-for-security repo-style transaction where the securities lender has not sold or re-hypothecated the securities received. Include in this item the value of securities sold under a repo-style arrangement.

**Line item 17  LESS: Reduction of the gross value of receivables in reverse repurchase transactions by cash payables in repurchase transactions under netting agreements (report as a positive value)**
Where a banking organization acting as a principal has more than one repo-style transaction with the same counterparty and has applied the GAAP offset for repo-style transactions, report the reduction of the gross value of receivables in reverse repurchase transactions if the criteria in section 217.10(c)(4)(ii)(E), (1) through (3) of the final rule are satisfied.

**Line item 18  Counterparty credit risk for all repo-style transactions**
Report the aggregate amount of counterparty credit risk for all repo-style transactions in which the institution acts as principal. Do not include repo-style transactions in which the institution acts as an agent. To determine the counterparty credit risk exposure, the banking organization would subtract the fair value of the instruments, gold, and cash received from a counterparty from the fair value of any instruments, gold and cash lent to the counterparty. If the resulting amount is greater than zero, it would be included in total leverage exposure. For repo-style transactions that are not subject to a qualifying master netting agreement or that are not cleared transactions, the counterparty exposure measure must be calculated on a transaction-by-transaction basis. However, if a qualifying master netting agreement is in place, or the transaction is a cleared transaction, the banking organization could net the total fair value of instruments, gold, and cash lent to a counterparty against the total fair value of instruments, gold and cash received from the counterparty for those transactions.

**Line item 19  Exposure for repo-style transactions where a banking organization acts as an agent**
Where a banking organization acts as agent for a repo-style transaction and provides a guarantee (indemnity) to a customer with regard to the performance of the customer’s counterparty that is greater than the difference between the fair value of the security or cash lent and the fair value of the security or cash borrowed, the banking organization must include the amount of the guarantee that is greater than this difference. Include both on and off-balance sheet repos in this line.

**Line item 20  Total exposures for repo-style transactions (sum of items 16, 18, and 19 minus item 17)**
This item is shaded and is derived from other items in the schedule; no input required.

**Other off-balance sheet exposures**
Refer to section (c)(4)(ii) (H) of the final rule.

**Line item 21  Off-balance sheet exposures at gross notional amounts**
The notional amount of all off-balance sheet exposures (excluding off-balance sheet exposures associated with securities lending, securities borrowing, reverse repurchase transactions, and derivatives).
Line item 22  LESS: Adjustments for conversion to credit equivalent amounts (report as a positive value)
The final rule retains the 10 percent CCF for unconditionally cancellable commitments, but it would replace the uniform 100 percent CCF for other off-balance sheet items with the CCFs applicable under the standardized approach for risk-weighted assets in section 217.33 of the regulatory capital rule.

Line item 23  Off-balance sheet exposures (item 21 less item 22)
This item is shaded and is derived from other items in the schedule; no input required.

Line item 24  Total Leverage Exposure (sum of items 7, 15, 20 and 23)
This item is shaded and is derived from other items in the schedule; no input required.
D.6—Planned Actions

The FR Y-14Q Planned Action schedule collects information on the results of all material planned actions that management outlined in its FR Y-14A Regulatory Capital Transitions submission. The objective of this section is to track the BHC’s progress in its actual strategic actions taken relative to its proposed planned actions as reported in its most recently submitted FR Y-14A Regulatory Capital Transitions Schedule D.6 –Planned Actions.

For each reporting period, BHCs and IHC’s should report the incremental quantitative impact of each action on:

- Common equity tier 1 capital
- Tier 1 capital
- RWA_Standardized
- RWA_Advanced
- Average Total Assets for Leverage Capital Purposes (relevant to the tier 1 leverage ratio; to be completed by all BHCs and IHCs)
- Total Leverage Exposure for the Supplementary Leverage Ratio (to be completed by advanced approaches BHCs and IHCs only); and
- Balance sheet.

The quantitative impact of actions submitted by BHCs and IHCs should represent the stand-alone, incremental immediate impact of the action.

Column Instructions
Note that certain columns include an option of "other" in the drop down list that can be used if the listed action cannot be described using the listed selections.

Column B  Description
Brief description of the planned action.

Column C  Action Type
Select from a list of available actions provided in the schedule. BHCs and IHCs should select the type of action that best describes the planned action.

Column D  Exposure Type
Select from a list of available exposure types provided in the schedule. BHCs and IHCs should select the type of exposure that is most impacted by the planned action.

Column E  RWA Type
Selection from a list of available RWA exposure types provided in the schedule. For planned actions that have an impact on RWAs, the BHC or IHC should report the type of RWA (i.e., Counterparty Credit, Other Credit, Market, or Operational) that is most impacted by the planned action.

Columns F-L  Report the actual impact of planned action on the applicable category in $ millions.
For each planned action please input the actual dollar amount impact on tier 1 common, tier 1 capital, risk-weighted assets, average total assets, leverage exposures, and the firm’s balance sheet based on progress made on the action in the past quarter. In a separate attachment, please provide additional information to describe the progress made on each planned action during the reporting quarter.
**Total impact of plan actions** are shaded items and are derived from other items in the schedule; no input is required. This is the summation of each individual column aligned with the applicable category (e.g., “Common Equity Tier 1,” “Tier 1 capital,” etc.).

**Reported changes from prior period** are shaded items and are derived from other items in the schedule; no input is required. This field captures the change between each reporting period on the change in impact for the applicable category (e.g., “Common Equity Tier 1,” “Tier 1 capital,” etc.).

**Columns M-N**
Where applicable, please provide supporting documentation and additional comments.
Schedule E—Operational Risk

General Instructions
Each quarter an institution must submit the **Operational Loss History** and **Legal Reserve Frequency** data files. In addition to the Loss Reference Number, please include a unique identifier for each row of data in the firm’s FR-Y14Q data submission in section E.1. Also include a unique identifier for each row of data in the firm’s FR-Y14Q submission in Section E.8. Unique identifiers in Section E.1 and Section E.8 should remain constant with the specified row of data in subsequent submissions, and become a permanent element of the data for those schedules.

E.1—Operational Loss History

Submit a complete history of operational losses at and above the institution’s established collection threshold(s) in accordance with the following instructions.

The data file should contain all operational losses, with the exception of data on legal reserves and non-legal reserves, captured by the institution as of the respective reporting quarter end, starting from the point-in-time at which the institution began capturing operational loss event data in a systematic manner.

An operational loss is defined as a financial loss (excluding insurance or tax effects) resulting from an operational loss event and includes all expenses associated with an operational loss event except for opportunity costs, forgone revenue, and costs related to risk management and control enhancements implemented to prevent future operational losses. An operational loss event is defined as an event that results in loss and is associated with any of the seven operational loss event type categories (Level 1) identified and defined in Reference Table E.1.a.

Each loss event must contain a unique loss reference number. A single operational loss event could have multiple impacts (e.g., several accounting or recovery dates) and/or could be assigned to multiple business lines. In cases where the institution submits a single loss event that has multiple impacts and/or is assigned to multiple business lines, the same loss reference number must be used to link these individual records to the same event.

The requirement for reporting a loss event is based on the event’s total loss amount, regardless of how the loss amount is distributed. For example, if an institution’s collection threshold is $10,000 and a single loss event of $12,000 was assigned evenly to three business lines (i.e., $4,000 each), then the event needs to be included in the institution’s submitted data file.

The intent of the Operational Loss Schedule (in the FR Y-14Q) is to capture actual or realized losses. Operational losses should be included in the Schedule from the quarter when the loss is settled and/or realized. This will often differ from the accounting date and capture dates.

Do not report separate, distinct operational loss events on an aggregated basis. For example, the “bundling” of separate loss events that fall below the institution’s established threshold into one loss event record should not be reported.

Foreign banking institutions should report operational losses that impact the institution’s U.S. operations in accordance with these reporting instructions.

Ensure that the information provided for each reporting field conforms to the instructions in the Operational Loss Data Collection Schedule in Section E.1.
## Section E.1. Operational Loss Data Collection Schedule

<table>
<thead>
<tr>
<th>Field Reference</th>
<th>Field Name</th>
<th>Description</th>
<th>Format</th>
</tr>
</thead>
<tbody>
<tr>
<td>A</td>
<td>Section E.1 Unique Identifier</td>
<td>Report the unique identifier for each row of data in the institution’s FR-Y14Q data submission for Section E.1. The unique identifier should remain constant with the specified row of data in subsequent submissions, and become a permanent element of the data. The unique identifier should not include any white spaces, tabs, or special characters.</td>
<td>A</td>
</tr>
<tr>
<td>B</td>
<td>Reference Number</td>
<td>Report the unique institution-established identifier assigned to each loss event. The reference number should not include any white spaces, tabs, or special characters.</td>
<td>A</td>
</tr>
<tr>
<td>C</td>
<td>Capture Date</td>
<td>Report the date that the institution captured/recorded the loss event in its internal operational loss database. The Capture Date must be submitted in the following format: MM/DD/YYYY. For example, “January 5, 2011,” should be “01/05/2011.”</td>
<td>Date MM/DD/YYYY</td>
</tr>
<tr>
<td>D</td>
<td>Occurrence Date</td>
<td>Report the date that the operational loss event occurred or began. The Occurrence must be submitted in the following format: MM/DD/YYYY. For example, “January 5, 2011,” should be “01/05/2011.”</td>
<td>Date MM/DD/YYYY</td>
</tr>
<tr>
<td>E</td>
<td>Discovery Date</td>
<td>Report the date that the operational loss event was first discovered by the institution. The loss event’s discovery date should not be earlier than its occurrence date. The Discovery Date must be submitted in the following format: MM/DD/YYYY. For example, “January 5, 2011,” should be “01/05/2011.”</td>
<td>Date MM/DD/YYYY</td>
</tr>
<tr>
<td>F</td>
<td>Accounting Date</td>
<td>Report the date that the financial impact of the operational loss event was recorded on the institution’s financial statements. The accounting date should be consistent with, and no later than, the date a legal reserve is established. Generally, the loss event’s accounting date should not be earlier than its occurrence date or discovery date; however, there are cases where accounting date can accurately be reflected prior to discovery data. The Accounting Date must be submitted in the following format: MM/DD/YYYY. For example, “January 5, 2011,” should be “01/05/2011.”</td>
<td>Date MM/DD/YYYY</td>

| ($USD)          |            | and provision write backs, and costs related to risk management and control enhancements implemented to prevent future operational losses. Also, the following types of events should **not** be included in the gross loss amount or the institution's completed Schedule: **Near Misses:** An operational risk event that did not result in an actual financial loss or gain to the institution. **Timing Events:** An operational risk event that causes a temporary distortion of the institution's financial statements in a particular financial reporting period but that can be fully corrected when later discovered (e.g., revenue overstatement, accounting and mark-to-market errors). **Credit Boundary Events:** Losses that are related to both operational risk and credit risk. For example, where a loan defaults (credit risk) and the bank discovers that the collateral for the loan was not properly secured (operational risk). [Exception: Retail credit card losses arising from non-contractual third-party initiated fraud (for example, identity theft) should be treated as external fraud operational losses and **should be included** in the institution's submission.] **Forgone Revenues/Opportunity Costs:** Inability to collect potential future revenues due to operational risk related failures. **Gains:** Situations where an operational risk related failure results in a financial gain for the institution. In addition, **Gross Loss Amounts:** Should be reported in units of one (not thousands), rounded to the nearest unit (for example, a one million dollar loss would be reported as 1,000,000). Must be reported in $US dollars. Loss amounts recorded in foreign currency should be converted to $US dollars using a foreign exchange rate as of the accounting date associated with the respective loss.

| I               | Recovery Amount ($USD)                       | A recovery is an independent occurrence, related to the original loss event, separate in time, in which funds or outflows of economic benefits are received from a third party, excluding funds received from insurance providers. Recovery Amounts:  
  - Should not be included in the Gross Loss Amount column or netted into the gross loss amount.  
  - Should exclude provisions and provision write backs.  
  - Should have the same reference number as the associated loss event.  
  - Should be reported in units of one (not thousands), rounded to the nearest unit (for example, a one million dollar loss would be reported as 1,000,000).  
  - Should be reported in $US dollars. Recoveries recorded in foreign currency amounts should be converted to $US dollars using a foreign exchange rate as of the accounting date associated with the respective recovery.  
  - Cannot be reported as a negative value.                                                                                                                                  | N      |
<p>| J               | Basel Event-Type Category: Level 1           | All loss events reported by the institution must be mapped to one of the seven “Level 1 Event Types” in Reference Table E.1.a. This field must contain the respective Level 1 Event-Type code specified in Reference Table E.1.a (i.e., ET1, ET2, ET3,...ET7). The exact code provided must be used (e.g., “ET1”) with no additional characters or spaces added. | A      |
| K               | Basel Event-Type Category: Level 2           | If the institution categorizes loss events to the “Level 2 Event-Types” in Reference Table E.1.a, use the Level 2 Event-Type codes specified in Reference Table E.1.a (i.e., ET11 – ET76). If the institution does not map loss events to those Level 2 Event-Types, or cannot map a particular loss event to one of the Level 2 Event-Types contained in Reference Table E.1.a, then “ET00” should be inserted in this field. The exact code provided must be used (e.g., “ET41”) with no additional characters or spaces added. | N      |
| L               | Basel Business Line: Level 1                 | All loss events reported by the institution must be mapped to one of the nine “Level 1 Business Lines” in Reference Table E.1.b. This field must contain the specific Level 1 Business Line code identified in Reference Table E.1.b (i.e., BL1, BL2, BL3,...BL9) which corresponds to the Level 1 Business Line. | N      |
| M               | Basel Business Line: Level 2                 | If the institution categorizes loss events to the “Level 2 Business Lines” (Column L) in Reference Table E.1.b, use the Level 2 Business Line codes specified in Reference Table E.1.b (i.e., BL11 – BL81). If the institution does not map loss events to those Level 2 Business Lines, then insert BL00 in the respective field(s) in this column. | N      |</p>
<table>
<thead>
<tr>
<th>Field Reference</th>
<th>Field Name</th>
<th>Description</th>
<th>Format</th>
</tr>
</thead>
<tbody>
<tr>
<td>N</td>
<td>Internal Business Line or Corporate Function</td>
<td>Report the institution-specific business line (e.g., Equities) or corporate function (e.g., HR, Finance or Compliance) to which the operational loss event has been assigned. This field should contain a numeric code (i.e., 1, 2, 3…) with each unique internal business line mapped to a unique digit representing that business line/corporate function. The institution should provide this mapping using the schedule provided in Section E.2 ('Internal Business Line').</td>
<td>N</td>
</tr>
<tr>
<td>O</td>
<td>Acquired or Merged Entities</td>
<td>If the loss event being reported originated from an acquired or merged entity, then include the name of the respective acquired or merged entity in this field. If not, then insert &quot;NA&quot; (not applicable). “Events originating from acquired or merged entities” refer to loss events that have a capture date prior to the acquisition/merger date. This requirement should also apply to loss events originating from acquired or merged entities that have capture dates after the acquisition/merger date, if those losses have not yet been integrated into the business lines/functions of the merged entity.</td>
<td>C</td>
</tr>
<tr>
<td>P</td>
<td>Is Loss Event Included in the Institution’s Most Recently Reported Operational Risk Capital Estimate?</td>
<td>If the institution uses statistical model to estimate operational risk capital, enter “Yes” or “No” depending on whether or not the respective loss event is included in the institution’s most recently reported operational risk estimate. If the institution does not estimate operational risk using a statistical model, enter &quot;N/A&quot; for this field.</td>
<td>C/Y, N, or N/A</td>
</tr>
<tr>
<td>Q</td>
<td>Unit of Measure</td>
<td>The Unit-of-Measure (UOM), established by the institution, to which the loss has been assigned for regulatory and/or economic capital calculation purposes. It is the level at which the BHC’s or IHC’s quantification model generates a separate distribution for estimating potential operational losses (for example, organizational unit, operational loss event type, risk category, etc.). Some institutions estimate a unique loss distribution for each business line/event type combination while others may estimate scenario loss distributions that span multiple business lines or events types (for example, &quot;Retail Banking/External Fraud&quot;). The UOM field should contain a numeric code (i.e., 1, 2, 3…) that is mapped to a unique UOM. The institution should provide this mapping using the schedule provided in Section E.3 ('Unit-of-Measure').</td>
<td>N</td>
</tr>
<tr>
<td>R</td>
<td>Detailed Description of Loss Event (required for events ≥ $250k)</td>
<td>For all operational loss events with gross loss amounts greater than or equal to $250 thousand, include a detailed description of the loss event. Generally, the &quot;short-form&quot; descriptions captured in an institutions’ internal loss database should suffice.</td>
<td>C</td>
</tr>

### Level 1 Event-Type Categories

- **Internal Fraud**: Losses due to acts of a type intended to defraud, misappropriate property or circumvent regulations, the law or company policy, excluding diversity/discrimination events, which involves at least one internal party.
- **External Fraud**: Losses due to acts of a type intended to defraud, misappropriate property or circumvent the law, by a third party.
- **Employment Practices and Workplace Safety**: Losses arising from acts inconsistent with employment, health or safety laws or agreements, from payment of personal injury claims, or from diversity/discrimination events.
- **Clients, Products & Business Practices**: Losses arising from an unintentional or negligent failure to meet a professional obligation to specific clients (including fiduciary and suitability requirements), or from the nature or design of a product.
- **Damage to Physical Assets**: Losses arising from loss or damage to physical assets from a natural disaster or other events.
- **Business Disruption and System Failures**: Losses arising from disruption of business or system failures.
- **Execution, Delivery and Process Management**: Losses from failed transaction processing or process management, from relations with trade counterparties and vendors.

### Activity Groups

- **BL1** Corporate Finance: Mergers and acquisitions, underwriting, privatizations, securitization, research, debt (government, high yield), equity, syndications, IPO, secondary private placements
- **BL2** Trading & Sales: Fixed income, equity, foreign exchanges, commodities, credit, funding, own position securities, lending and repos, brokerage, debt, prime brokerage
- **BL3** Retail Banking: Retail lending and deposits, banking services, trust and estates
- **BL4** Commercial Banking: Private lending and deposits, banking services, trust and estates, investment advice
- **BL5** Payment and Settlement: Merchant/commercial/corporate cards, private labels and retail
- **BL6** Agency Services: Project finance, real estate, export finance, trade finance, factoring, leasing, lending, guarantees, bills of exchange
- **BL7** Asset Management: Payments and collections, funds transfer, clearing and settlement
- **BL8** Retail Brokerage: Issuer and paying agents
- **BL9** Corporate Level - Non-Business Line Specific: Execution and full service

**BL9** Corporate Level - Non-Business Line Specific: Losses originating from a corporate/firm-wide function that cannot be linked to a specific business line.

E.5—Legal Reserves Frequency

Report the total number of outstanding/pending legal events by Business Line and Event Type for which a legal reserve(s) has been established in accordance with the following instructions.

The total number reported should be based on the number of legal events, not the number of “reserve entries.” The total number of outstanding/pending legal events should be reported by the quarter and year in which the first legal reserve for each respective legal event was recorded. For example, a legal event that had three separate reserves recorded in Q1-2011, Q4-2011, and Q2-2012 should be included as one event in the Q1-2011 total.

The Legal Reserves Frequency file should contain the total number of outstanding/pending legal events, for which a legal reserve has been established. The values of losses should also be reported in the FR Y-14Q Operational Loss Data Collection Schedule (E.1) as the event is partially settled. Remaining reserves should be not be included in the FR Y-14Q Operational Loss Data Collection Schedule (E.1) until that portion is settled.

Previously reported legal events that have been settled or closed during the current reporting quarter should not be included in the current or future submissions. These events should be detailed as part of the Operational Loss History. Example: A reserve for a legal event was first recorded in Q1-2011. The legal event was then settled in Q2-2012. In this example, the legal event should not be included in the institution’s Q2-2012 Legal Reserve Frequency submission or future Legal Reserve Frequency submissions, but should be included in the firm’s Operational Loss History.

The total number outstanding/pending legal events for which the first legal reserve was recorded on or prior to December 31, 2007 must be reported under “Q4-2007” by Business Line and Event Type in accordance with the following instructions. To clarify, total numbers reported by business line and event type under Q4-2007 should represent the total number of outstanding/pending legal events for which a reserve(s) was established prior to December 31, 2007 and for which reserves are still in place as of the current reporting quarter.

Ensure the information provided for each descriptive element conforms to the reporting instructions in the Legal Reserves Frequency Schedule in Section E.5. For illustrative purposes, an example of a Legal Reserves Frequency Schedule is provided in Reference Table E.5.a.

Schedule F—Trading

A. Purpose of Schedule:

This schedule is designed to capture P/L sensitivities to assets firms hold in their trading books, private equity investments, and certain other assets under fair value accounting. These terms are defined as follows:

Trading Book assets are those assets which are reported as trading securities on the FR Y-9C report, i.e.

"Trading activities typically include (a) regularly underwriting or dealing in securities; interest rate, foreign exchange rate, commodity, equity, and credit derivative contracts; other financial instruments; and other assets for resale, (b) acquiring or taking positions in such items principally for the purpose of selling in the near term or otherwise with the intent to resell in order to profit from short-term price movements, and (c) acquiring or taking positions in such items as an accommodation to customers or for other trading purposes."

Private Equity includes all equity related investments such as common, preferred, and convertible securities.

This includes investments made on a principal basis in standalone companies, real estate, general and limited partnership interests and hedge funds, including seed capital invested in hedge or mutual funds. This includes Private Equity that is mark to market (MTM), held for sale (HFS) or under fair value option accounting (FVO).

Other Fair Value Assets are all assets held under fair value option (FVO) accounting except for retail and wholesale loans which should be included in the schedules for Retail and Wholesale FVO loans.

Examples would include legacy assets, community development assets and tax-oriented investments, e.g. wind farms.

B. General Instructions:

Please see the Regional Groupings worksheet for definitions of country/currency categorizations.

Credit Valuation Adjustments (CVA) should NOT be included in this schedule, while CVA hedges should be reported separately in its own FR Y-14Q Trading schedule.

Exposures to repurchase agreement positions that are accounted for under the fair value option and any associated hedges should be reported in this schedule.

Neither Mortgage Servicing Rights (MSR’s) nor MSR hedges should be included in this schedule.

All worksheets are required to be filled out.

White cells represent required inputs. Green cells represent required inputs for parameters that are flexible and can be changed.

Gray cells represent calculations or fixed values, and do not need to be completed by the BHC or IHC.

Examples of flexible parameters include tenor points and shock %s in some grids.
See sheet-specific instructions around acceptable ranges.

Sensitivities related to Exchange Traded Funds (ETFs) that are primarily backed by direct asset holdings should be reported in the appropriate asset class. For example, ETFs that are primarily backed by physical and financial commodities holdings (e.g. XAU) should be included in the Commodities worksheets. Data related to all other ETFs should be reported in the Equity worksheets, except in the case of currency related ETFs. If possible, decompose currency related ETFs into separate currency components and report the related sensitivities in the appropriate currency row of the FX worksheets. If decomposition is not possible, report currency related ETFs in the USD/Other row of the FX worksheets.

**C. Item-Specific Instructions:**

Worksheet-specific instructions are included within.
<table>
<thead>
<tr>
<th><strong>Glossary</strong></th>
</tr>
</thead>
<tbody>
<tr>
<td><strong>API 2:</strong> The benchmark price reference for coal imported into northwest Europe. It is calculated as an average of the Argus cost-insurance-freight (cif), Antwerp-Rotterdam-Amsterdam (ARA, major coal importing ports in northwest Europe) assessment and McCloskey's northwest European steam coal marker.</td>
</tr>
<tr>
<td><strong>API 4:</strong> The benchmark price reference for coal exported out of South Africa's Richards Bay terminal, it is used in physical and over-the-counter (OTC) contracts. Its value is calculated as the average of the Argus freight-on-board (fob) Richards Bay assessment and McCloskey's fob Richards Bay market.</td>
</tr>
<tr>
<td><strong>ARS:</strong> Auction Rate Security - Long term, variable rate bonds tied to short term interest rates. ARS have a long term nominal maturity with interest rates reset through a modified Dutch auction, at predetermined short term intervals.</td>
</tr>
<tr>
<td><strong>bp:</strong> Basis Point, 1/100th of 1%.</td>
</tr>
<tr>
<td><strong>Carry Value:</strong> The amount of an investment as reflected in the consolidated financial statements prepared in accordance with GAAP.</td>
</tr>
<tr>
<td><strong>CDS:</strong> Credit Default Swap - A swap designed to transfer the credit exposure of fixed income products between parties. The buyer of the credit swap receives credit protection, whereas the seller of the swap guarantees the credit worthiness of the product.</td>
</tr>
<tr>
<td><strong>CER:</strong> Certified Emission Reduction - A type of emissions unit, or carbon credits, issued by the Clean Development Mechanism (CDM) Executive Board for emission reductions.</td>
</tr>
<tr>
<td><strong>CMO:</strong> Collateralized Mortgage Obligation - A type of mortgage backed that represent claims to specific cash flows from large pools of home mortgages. The streams of principal and interest payments on the mortgages are distributed to the different classes of CMO interests, known as tranches. Each tranche may have different principal balances, coupon rates, prepayments risks, and maturity dates.</td>
</tr>
<tr>
<td><strong>Covered Bond:</strong> A corporate bond with recourse to a pool of assets that secures or &quot;covers&quot; the bond if the originator (usually a financial institution) becomes insolvent.</td>
</tr>
<tr>
<td><strong>CS01:</strong> The sensitivity of the portfolio to 1 bp adjustment to credit spreads.</td>
</tr>
<tr>
<td><strong>CVA:</strong> Credit Valuation Adjustment - The market value of the credit risk due to any failure of the counterparty to deliver.</td>
</tr>
<tr>
<td><strong>Delta:</strong> The expected change in the value of a derivative for each dollar change in the price of the underlying asset.</td>
</tr>
<tr>
<td><strong>DV01:</strong> The dollar value (DV) impact on the value of an asset resulting from a one basis point parallel shift downward in interest rates.</td>
</tr>
<tr>
<td><strong>EUA/ETS:</strong> European Union Emissions Trading System - Cap and trade emission allowances in the European Union. Companies can buy and sell from each other as needed.</td>
</tr>
<tr>
<td><strong>Gamma:</strong> The expected change in delta exposure for a +1% relative change in the price of the underlying entity. Gamma is used to gauge the sensitivity of a derivative position to a price change in the underlying reference security or portfolio. A large positive gamma can serve to magnify gains and cushion losses.</td>
</tr>
<tr>
<td><strong>GICS:</strong> Global Industry Classification Standard - An industry taxonomy developed by MSCI and Standard &amp; Poor's for use by the global financial community.</td>
</tr>
<tr>
<td><strong>HY:</strong> High Yield - Bonds rated below investment grade (below BBB). Because these bonds have a higher risk of default, they have higher yields than better quality bonds.</td>
</tr>
<tr>
<td><strong>IG:</strong> Investment Grade - Bonds that are rated BBB or above.</td>
</tr>

F.1—Equity by Geography

General Instructions
For definitions of the "Other" categories in each section, reference the Regional Groupings worksheet. For example, "Other Advanced Economies" would include entries for any Advanced Economy country (as defined on the Regional Groupings worksheet) that is not explicitly listed in the Advanced Economies section of this worksheet. This Other Advanced Economies row would also include aggregated exposures from explicitly listed countries where the exposures fall below minimal thresholds specified below.

Note that each regional section has a row for cross-country indices, e.g. the Euro Stoxx indices, which may be used if firms have difficulty decomposing sensitivities by country. **Vega should be reported in absolute terms (SM / +1 vol point) regardless of whether relative or absolute vols were provided on the Equity Spot-Vol Grids worksheet.**

Profit/(Loss) Calculation
Profit/(Loss) should be calculated assuming full revaluation where possible. In completing the Profit/(Loss) section, firms should run full revaluations assuming all equities move a given relative % and then allocate the resulting P/L by country/index.

For example, all entries in the -50% decline column would be calculated by running a single full-revaluation simulation in which all equities decline by -50% regardless of geography. P/L from this single simulation would then be allocated among the various rows corresponding to different countries/indices.

Thresholds
Sensitivities for countries in **Advanced Economies** for which the delta is less than $3mm may be aggregated and entered as a single entry on the "Other Advanced Economies" row. For **other regions**, sensitivities for which the delta is less than $2mm may be aggregated and entered in the appropriate "Other" row for that region.

Spot Shocks
The spot shocks listed in the green cells may be modified to fit what the firm has available subject to the following constraints:

Spot shocks must at a minimum span 0% to -50% and at least 5 distinct spot shocks less than 0% must be provided.

The difference between adjacent spot shocks must not exceed 25%.

Additional columns for other shock percent may be added. Unused columns should be left blank.

Tenors
In the term structure section, please replace the tenor points shown in green with those the firm has available. Insert additional term structure columns as needed. Unused columns should be left blank.
F.2—Equity Spot-Vol Grid

General Instructions
Each point on the grid should be calculated using full revaluation and should represent firm-wide Profit/(Loss) results.
Vega post spot shock must be provided in absolute terms (units of $MM / +1 vol point) even if the spot-vol grid is populated using relative volatility shocks.
Additional rows and columns for other shock values may be added. Unused rows/columns should be left blank.

Spot Shocks
The spot shocks provided must match those provided on the Equity by Geography worksheet and are subject to the constraints outlined on that worksheet.

Volatility Shocks
The volatility shocks listed in the green cells may be modified subject to the following constraints:
Vol shocks must go out to at least +20 vol points (or an equivalent amount if using a relative methodology).

If using relative volatility shocks, it may be necessary to modify the default volatility shocks shown in the grid based on the level of the volatility surface on the effective date of this submission. Firms must provide at least 3 absolute volatility shocks which are greater than zero.

Absolute Vol Shocks
When shocking spot, "sticky" (i.e., fixed) strike volatility must be kept constant. The implied volatility at each strike should not change and the volatility curve within a given tenor should remain unchanged (in terms of sticky / fixed strike vs. absolute volatility). This is illustrated as we go from Table 1 to Table 2, below.

When shocking implied volatility within a given tenor, the absolute implied volatility at each strike (of each option at each strike) should be shocked in a parallel manner by the same absolute amount. This is illustrated as we go from Table 2 to Table 3.

<table>
<thead>
<tr>
<th>Table 1:</th>
<th>Table 2:</th>
<th>Table 3:</th>
</tr>
</thead>
<tbody>
<tr>
<td><strong>Spot Shock: 0%</strong></td>
<td><strong>Spot Shock: -30%</strong></td>
<td><strong>Spot Shock: -30%, Vol Shock: +10 pts</strong></td>
</tr>
<tr>
<td><strong>Strike</strong></td>
<td><strong>Implied Vol</strong></td>
<td><strong>Strike</strong></td>
</tr>
<tr>
<td>700</td>
<td>32</td>
<td>700</td>
</tr>
<tr>
<td>800</td>
<td>27</td>
<td>800</td>
</tr>
<tr>
<td>900</td>
<td>23</td>
<td>900</td>
</tr>
<tr>
<td>1000</td>
<td>20</td>
<td><strong>1000</strong></td>
</tr>
</tbody>
</table>

Relative Vol Shocks
Firms applying relative volatility shocks would keep their volatility surface fixed in going from Table 1 to Table 2. That is, the implied volatility given a -30% shock would be what the implied volatility was before shocking spot by -30%.
**F.3—Other Equity**

**General Instructions**

Entries in the dividend table above should represent the Profit/(Loss) in $MM that the firm would experience if dividend yields in the specified tenors were to decline by -1% in relative terms, i.e. drop from 3% to 2.97%.

For a precise description of what countries constitute Europe, please refer to the UN GeoScheme: (http://millenniumindicators.un.org/unsd/methods/m49/m49regin.htm#Europe).

**Tenors**

In the term structure section, replace the tenor points shown in green with those the firm has available. Insert additional term structure columns as needed. Unused columns should be left blank. The unspecified tenor column is to be used only if the firm is unable to break out its sensitivities by tenor.
F.4—FX Spot Sensitivities

General Instructions

Enter currency symbols into the green cells of the Currency1 and Currency2 columns. Additional rows may be inserted into this section as needed. Any unused rows should be left blank.

Report on-shore and off-shore currency sensitivities separately.

For non-USD currency pairs:

1) Delta is defined as USD delta equivalent of Currency1, with a positive number indicating long Currency1 / short Currency2, and a negative number indicating short Currency1 / long Currency2.

2) If the currency delta positions are netted and shown only versus USD, then enter zero for delta and show the P/L arising from gamma only in the corresponding currency pair row.

Profit/(Loss) Calculation

Profit/(Loss) should be calculated assuming full revaluation where possible. In completing the Profit/(Loss) section, firms should complete each row independently. For example, a row for EUR vs. USD would be calculated by shocking only the EUR vs. USD exchange rate and leaving all other exchange rates fixed.

Thresholds

Entries for currencies where the absolute value of the delta is below $50mm and where no grid P/L entries have an absolute value above $10mm may be aggregated and placed into the OTHER vs. USD line.

Spot Shocks

The spot shocks listed in the green cells may be modified to fit what the firm has available subject to the following constraints:

Spot shocks must at a minimum span -30% to +30% and at least four distinct spot shocks on each side of 0% must be provided.

The difference between adjacent spot shocks must not exceed 10%.

Additional columns for other shock percent may be added. Unused columns should be left blank.

In computing the Profit/(Loss) entries, assume normal volatility does not change.
F.5—FX Vega

General Instructions

Enter currency symbols into the green cells of the Currency1 and Currency2 columns. Additional rows may be inserted as needed. Unused rows should be left blank.

Report on-shore and off-shore currency sensitivities separately.

Thresholds

Enter all currency pairs for which the absolute value of the vega at any tenor (or in total) exceeds $1 mm / +1 vol point; pairs with smaller vegas may be omitted.

Tenors

In the term structure section, replace the tenor points shown in green with those the firm has available. Insert additional term structure columns as needed. Unused columns should be left blank.
**F.6—Rates DV01**

**General Instructions**

For definitions of the "Other" categories in each section, reference the Regional Groupings worksheet. For example, "Other Asia Ex-Japan" would include entries for any Asia Ex-Japan currency (as defined on the Regional Groupings worksheet) that is not explicitly listed in the Asia Ex-Japan section of this worksheet. This Other Asia Ex-Japan row would also include aggregated exposures from explicitly listed currencies where the exposures fall below minimal thresholds specified below.

**DV01s of instruments shocked by market value (MV) such as securitized products, ARS, Loans and defaulted securities must be entered in aggregate on the "Instruments shocked by Market Value" row for the appropriate currency.** For the regional sections (Other Advanced Economies, Emerging Europe, Latin America & Caribbean, etc.), DV01s of instruments shocked by MV should not be included to avoid double counting.

Entries on this sheet should include ALL products with interest rate sensitivities including those such as munis, agencies and ARS for which DV01s are also requested elsewhere in this schedule.

DV01 for Corporates should be included in the Swaps / Discounting Curve line for the appropriate currency. If the OIS curve is used as the discounting curve, report the sensitivities associated with changes in the OIS curve in the Swaps/Discounting Curve rows.

**Examples**

**Example 1:** Consider a 5 year receive fixed swap versus 6-month LIBOR, where the standard curve is 3 month LIBOR. The DV01 of the fixed side and the first fixing would appear in the **Swaps / Discounting Curve row as a positive directional risk number.** The DV01 of the 0.5Y by 5Y year basis swap would appear in the 6m row as a positive number as well since a 1 bp drop in that curve would be beneficial. Note that this would correspond to a -1 bp change in x, where x is the spread in the 6m vs. 3m + x basis swap.

**Example 2:** 3 year basis swap in which the bank pays 1m LIBOR + 10 bps vs. 3m LIBOR, where the standard curve is 3 month LIBOR. The initial 1m and 3m fixings would appear in the **Swaps / Discounting Curve line as a directional risk number.** The remaining 1m by 3Y basis swap would appear in the 1m line as a positive number. Note that this would correspond to a +1 bp change in x, where x is the spread in the 3m vs. 1m + x basis swap.

**Sovereign Bonds**

Sovereign bonds issued in the same currency as the reference sovereign's base currency should have their DV01's entered on this worksheet. Examples would include U.S. government bonds denominated in USD and U.K. government bonds denominated in GBP. Such instruments would not lead to any credit spread entries on the Sovereign Credit worksheet, though they would lead to entries in the MV (A) and Notional (B) sections of that worksheet.

Euro-denominated bond positions issued by countries using the euro should also be entered on this worksheet only. Note that there are specific rows for "Government" exposures for those countries defined as "Advanced Economies" on the Regional Groupings worksheet. For other countries, the
government exposures would be summed with other types of rates exposures and entered in aggregate in the single row for the corresponding country. So, for example, Spanish government bonds would be entered on this worksheet on the row in the "EUR Directional Risks" section labeled "Governments: Spain", while Hungarian government bond exposures would be aggregated along with any other Hungarian rates exposures and entered in the row labeled "HUF". Again, such instruments would not lead to any credit spread entries on the Sovereign Credit worksheet, though they would lead to entries in the MV (A) and Notional (B) sections of that worksheet.

In the case of sovereign bonds issued in a currency that differs from the reference sovereign’s base currency, the rates risk should be entered on this worksheet, while the corresponding credit risk should be entered on the Sovereign Credit worksheet. Examples would include Japanese government bonds denominated in USD and U.K. government bonds denominated in EUR.

Any rates exposure from Sovereign CDS should be entered on this worksheet, while the corresponding credit risk should be entered on the Sovereign Credit worksheet.

These instructions with respect to sovereign bonds pertain solely to the entries on this worksheet. Please see the instructions on the Sovereign Credit worksheet when entering the notionals and market values there.

**Profit/(Loss) Section**

The shock entries listed in the green cells may be modified to fit what the firm has readily available. Shock levels should range from -200 bps to +500 bps and the difference between adjacent shocks should not exceed 100 bps.

Additional columns for other shock percent may be added. Unused columns should be left blank.

When calculating the Profit/(Loss) from negative rate shocks, if the firm’s systems cannot accommodate negative rate levels, floor rates at +1bp (i.e. assume rates cannot become negative).

In computing Profit/(Loss), assume normal (absolute) volatility does not change and, to the extent possible, preserve the skew by strike for all shock levels.

Do not include instruments shocked by market value (MV) in computing the Profit/(Loss) points.

**Tenors**

In the term structure section, replace the tenor points shown in green with those the firm has available. Insert additional term structure columns as needed. Unused columns should be left blank.
F.7—Rates Vega

General Instructions

For definitions of the "Other" categories in each section, reference the Regional Groupings worksheet. For example, the "Other Advanced Economies" section should include entries for any Advanced Economy country (as defined on the Regional Groupings worksheet), when the currency is not explicitly listed on this worksheet.

Similarly, the Totals sections, such as Total Emerging Europe, should contain the summation of the vegas across all the currencies when issuing countries are defined as Emerging Europe on the Regional Groupings worksheet.

Specify in the green cells at the top of the worksheet whether the vegas provided are normal or lognormal and whether the units are $MM / +10% relative move or $MM / +10 bps absolute move.

Tenors

In the term structure section, replace the tenor points shown in green with those the firm has available. Insert additional term structure rows and columns as needed. Unused rows and columns should be left blank.
**F.8—Other Rates**

**General Instructions**

Cross-Currency vs. USD basis is defined as USD vs. CCY + x Basis Swap ($K).

**Tenors**

In the term structure section, replace the tenor points shown in green with those the firm has available. Insert additional term structure columns as needed. Unused columns should be left blank.
F.9—Energy

General Instructions

Delta for commodities is defined as dollarized delta exposure in ($MM).

"Total Gamma" is the unweighted sum of gammas across all tenors for each product. Similarly, "Total Vega" is the unweighted sum of the vegas across all tenors for each product.

Vega may be reported in absolute ($MM / +1 vol point) or relative ($MM / +10% Rel) terms regardless of whether relative or absolute vols are provided on the Commodity Spot-Vol Grids worksheet, but should be consistent across the Energy, Metals, Ags & Softs and Commodity Indices worksheets. The appropriate vega units may be selected from the list provided in the Vega title cell.

Ideally, storage and other models, which do not qualify for derivatives accounting treatment, should be excluded from this schedule while the underlying (exposure and P/L contribution) should be included. In cases where such exclusion is computationally difficult due to system constraints, firms may include the impacts of storage and other models provided it is immaterial (i.e., the absolute value of the incremental P/L contributed by the model at both spot up +75% and spot down -75% are both <$50mm).

BHCs and IHCs should decompose the commodities sensitivities of complex products into their constituent product sensitivities wherever possible. The column for Structured Products is meant to capture commodity exposures that are not easily decomposed into their underlying components. Examples include structured notes linked to commodity baskets and custom indices.

Tenors

The maturities/maturity buckets in column B may be modified to fit what the firm has available and all should be considered as relative to the effective date of this submission. Please provide monthly data for the first 12 months. Maturities greater than 12 months but less than 10 years from the effective date must be supplied on a monthly, quarterly or annual basis. Maturities greater than 10 Years from the effective date may be grouped together.

Informational section

The columns in the "Informational" section are meant to be SUBSETS of the total exposures entered in the other columns to the left of the "Total Energy" column. Additional informational columns (e.g. Coal, Emissions, etc.) may be inserted if desired.
F.10—Metals

General Instructions

Delta for commodities is defined as dollarized delta exposure in ($MM).

"Total Gamma" is the unweighted sum of gammas across all tenors for each product. Similarly, "Total Vega" is the unweighted sum of the vegas across all tenors for each product.

Vega may be reported in absolute ($MM / +1 vol point) or relative ($MM / +10% Rel) terms regardless of whether relative or absolute vols are provided on the Commodity Spot-Vol Grids worksheet, but should be consistent across the Energy, Metals, Ags & Softs and Commodity Indices worksheets. The appropriate vega units may be selected from the list provided in the Vega title cell of the Energy worksheet.

Ideally, storage and other models, which do not qualify for derivatives accounting treatment, should be excluded from this schedule while the underlying (exposure and P/L contribution) should be included. In cases where such exclusion is computationally difficult due to system constraints, firms may include the impacts of storage and other models provided it is immaterial (i.e., the absolute value of the incremental P/L contributed by the model at both spot up +75% and spot down -75% are both <$50mm).

Tenors

The maturities/maturity buckets in column B may be modified to fit what the firm has available and all should be considered as relative to the effective date of this submission. Please provide monthly data for the first 12 months. Maturities greater than 12 months but less than 10 years from the effective date must be supplied on a monthly, quarterly or annual basis. Maturities greater than 10 years from the effective date may be grouped together.
F.11—Ags & Softs

General Instructions

Delta for commodities is defined as dollarized delta exposure in ($MM).

"Total Gamma" is the unweighted sum of gammas across all tenors for each product. Similarly, "Total Vega" is the unweighted sum of the vegas across all tenors for each product.

Vega may be reported in absolute ($MM / +1 vol point) or relative ($MM / +10% Rel) terms regardless of whether relative or absolute vols are provided on the Commodity Spot-Vol Grids worksheet, but should be consistent across the Energy, Metals, Ags & Softs and Commodity Indices worksheets. The appropriate vega units may be selected from the list provided in the Vega title cell of the Energy worksheet.

Ideally, storage and other models, which do not qualify for derivatives accounting treatment, should be excluded from this schedule while the underlying (exposure and P/L contribution) should be included. In cases where such exclusion is computationally difficult due to system constraints, firms may include the impacts of storage and other models provided it is immaterial (i.e., the absolute value of the incremental P/L contributed by the model at both spot up +75% and spot down -75% are both <$50mm).

Tenors

The maturities/maturity buckets in column B may be modified to fit what the firm has available and all should be considered as relative to the effective date of this submission. Provide monthly data for the first 12 months. Maturities greater than 12 months but less than 10 years from the effective date must be supplied on a monthly, quarterly or annual basis. Maturities greater than 10 years from the effective date may be grouped together.
F.12—Commodity Indices

General Instructions

Delta for commodities is defined as dollarized delta exposure in ($MM).

"Total Gamma" is the unweighted sum of gammas across all tenors for each product. Similarly, "Total Vega" is the unweighted sum of the vega across all tenors for each product.

Vega may be reported in absolute ($MM / +1 vol point) or relative ($MM / +10% Rel) terms regardless of whether relative or absolute vols are provided on the Commodity Spot-Vol Grids worksheet, but should be consistent across the Energy, Metals, Ags & Softs and Commodity Indices worksheets. The appropriate vega units may be selected from the list provided in the Vega title cell of the Energy worksheet.

Ideally, storage and other models, which do not qualify for derivatives accounting treatment, should be excluded from this schedule while the underlying (exposure and P/L contribution) should be included. In cases where such exclusion is computationally difficult due to system constraints, firms may include the impacts of storage and other models provided it is immaterial (i.e., the absolute value of the incremental P/L contributed by the model at both spot up +75% and spot down -75% are both <$50mm).

Firms should decompose their exposures to diversified commodity indices into their individual constituents and enter them on the Energy, Metals and Ags & Softs worksheets to the extent possible. Any residual exposures to diversified commodity indices should be entered on this worksheet.

The column for Long/Short Commodity Indices is meant to capture exposures to indices that do not contain outright commodity exposures but instead seek to generate alpha through long/short commodity strategies.

Tenors

The maturities/maturity buckets in column B may be modified to fit what the firm has available and all should be considered as relative to the effective date of this submission. Provide monthly data for the first 12 months. Maturities greater than 12 months but less than 10 years from the effective date must be supplied on a monthly, quarterly or annual basis. Maturities greater than 10 years from the effective date may be grouped together.
F.13—Commodity Spot-Vol Grids

General Instructions

Please use full revaluation, if possible, in calculating the grid entries.

Ideally storage and other models which do not qualify for derivatives accounting treatment should be excluded from this schedule while the underlying (exposure and P/L contribution) should be included. In cases where such exclusion is computationally difficult due to system constraints, firms may include the impacts of storage and other models provided it is immaterial (i.e. the absolute value of the incremental P/L contributed by the model at both spot up +75% and spot down -75% are both <$50mm).

In calculating the grid entries, shock the entire vol surface by the specified vol shock and shock all spot prices by the specified spot shock. Recalculate the value of all options under these conditions and compute the change in market value relative to current market value. This change in market value is what should be entered in the appropriate grid cells.

Diversified Commodity Indices:

The grid for Diversified Commodity Indices should correspond to those exposures listed on the Commodity Indices worksheet. It should not include the impact from diversified index exposures which were decomposed and entered into other columns on the Energy, Metals or Ags & Softs worksheets. The impact from these decomposed index positions should be factored into the other spot-vol grids on this page. Firm choosing to decompose all diversified commodity index exposures into their components would leave the Spot-Vol grid for Diversified Commodity Indices blank.

Long/Short Index exposures (detailed on the Commodity Indices worksheet) should be excluded from the Spot-Vol grids.

Spot/Volatility Shocks:

The specific spot and vol shocks chosen need not be the same across each of the commodity grids. Rows and columns for additional shock values may be added. Unused rows or columns should be left blank.

Vol shocks may be specified as either absolute moves in vol points or as a relative (%) change in volatility.

Indicate in the green cells above each grid which volatility units are being provided.

The spot and volatility shocks listed in the green cells may be modified to fit what the firm has readily available subject to the following constraints:

**Spot shocks must at a minimum span -75% to +75%. At least 5 distinct spot shocks less than 0% and 3 distinct spot shocks greater than 0% must be provided.**

**The difference between adjacent spot shocks must not exceed 25%.**

If volatility shocks are specified in terms of absolute moves, volatility shocks must span at least 0 to +50 vol pts. At least 4 distinct volatility shocks greater than 0 must be provided and adjacent shocks must be no more than 15 vol points apart.
If volatility shocks are specified in terms of relative (%) moves, then the guidance above must be converted to relative space using the at the money spot volatilities on the effective date of this submission.
F.14—Securitized Products

Notional and MV amounts should be reported, by rating and vintage, for all relevant products. * MV for CDS should be reported as the notional amount plus the current MTM of the CDS, i.e. the bond-equivalent market value of the CDS. The notional amount should be positive for cases where CDS protection has been sold (long underlying bond) and negative for cases where CDS protection has been bought (short underlying bond).

Ratings information reflects current rating and not original rating.

Vintage is defined as the difference between the effective date of the submission and the issue date (securities) or effective date (loans or derivatives). If vintage information for a given product is not available, please enter exposures (MV and notional) in the unspecified vintage bucket for the appropriate rating.

Agency loans that are in forward contract should be included on the Agencies worksheet, otherwise they should be entered here under Whole Loans.

Warehouse should only include exposure to which there is first loss protection provided. Otherwise, all residential whole loans and commercial real estate whole loans used for trading or warehoused without first loss protection should be included in the respective whole loan categories. For CLO Warehouse exposures, the traded amount should be reported.

The Total Protection column should contain the total first loss protection that is applicable to the firm’s warehouse exposures. The reported first loss protection can be in the form of cash or assets. Firms should specify in their supporting documentation how much of this protection is in the form of cash vs. assets.

A category for European RMBS is provided. European ABS and CMBS exposures should not be included in this column, but instead entered in the existing ABS and CMBS sections of this worksheet.
**F.15—Agencies**

General:

The top section above should contain sensitivities for US Agency securities only.

The lower section should contain sensitivities for non-US Agencies *without* an explicit sovereign government guarantee. This includes bonds as well as CDS.

Non-US Agency securities that do have an explicit government guarantee should *not* be entered here. They should be treated as government bonds and entered on the Rates DV01 worksheet and/or the Sovereign Credit worksheets in accordance with the instructions on those pages.

Loans should be included on this worksheet only if they are in forward contract or if the loans have FHA IDs and are in process of being reviewed for FHA insurance. Otherwise, the loans should be entered on the Securitized Products worksheet under Whole Loans.

Note that the spread sensitivities here refer to Option Adjusted Spread (OAS).

**Spread Shocks:**

The spread widenings listed in the green cells may be modified to fit what the firm has readily available subject to the following constraints:

- OAS shocks must at a minimum range from 100 bps to at least 400 bps and at least 4 distinct spot shocks greater than 1 bp must be provided.

Additional columns for other shock levels may be added. Unused columns should be left blank.
F.16—Munis

General:

* MV for CDS should be reported as the notional amount plus the current MTM of the CDS, i.e. the bond-equivalent market value of the CDS. The notional amount should be positive for cases where CDS protection has been sold (long underlying bond) and negative for cases where CDS protection has been bought (short underlying bond).

This worksheet should contain exposures to all Municipals, regardless of geography and currency.

Municipals refer to local government entities that do not have an explicit guarantee from the sovereign central government. Issuers with an explicit sovereign guarantee should be treated as government bonds and entered on either the Rates DV01 and/or the Sovereign Credit worksheet.

Profit/(Loss) Calculation:

Profit/(Loss) should be calculated assuming full revaluation where possible. In completing the Profit/(Loss) section, firms should run full revaluations assuming all credit spreads (across all geographies and products- Munis, Corporates, CDS, etc.) move a given amount and then allocate the resulting P/L to the various rows and sections across all credit worksheets.

For example, firms should run a single full-revaluation simulation in which all spreads widen by 100% regardless of geography/product. P/L from this single simulation would then be allocated among the various rows and worksheets corresponding to different products, countries and indices.

Spread Shocks:

Profit/(Loss) from spread widenings should be entered using either the relative (%) section or the absolute (bps) section, but not in both.

Columns for additional slide points may be inserted, however **do not remove or modify any of the existing slide points shown in gray.**

Tenors:

In the term structure section, replace the tenor points shown in green with those the firm has available.

Insert additional term structure rows as needed. Unused rows should be left blank.
**F.17—Auction Rate Securities (ARS)**

**General:**
This worksheet is meant to collect basic sensitivities related to Auction Rate Securities (ARS).

**Tenors:**
In the term structure section, replace the tenor points shown in green with those the firm has available.

Insert additional term structure rows as needed. Unused rows should be left blank.
**General:**

Reference the Regional Groupings worksheet for the definition of which countries are included in Advanced Economies.

Notional and MV amounts should be reported, by rating and tenor, for all relevant products.

* MV for CDS should be reported as the notional amount plus the current MTM of the CDS, i.e. the bond-equivalent market value of the CDS. The notional amount should be positive for cases where CDS protection has been sold (long underlying bond) and negative for cases where CDS protection has been bought (short underlying bond).

"On-the-Run" refers to the two most recent series (i.e. the current and the prior) of the index.

The <B rating bucket for each section is broken into 3 categories - one for defaulted securities, one for non-defaulted securities, and one for "Default Status Unknown". The “Defaulted” category is meant to capture (1) defaulted positions and (2) for Bonds, Single Name CDS, Covered Bonds and Other/Unspecified categories, positions that do not have associated credit spread sensitivities, e.g. distressed positions or positions for which credit spread sensitivities are not available, regardless of rating. The "Default Status Unknown" row is meant to be used only when firms do not have the ability to categorize a given security as being defaulted or not.

Note that no credit widening sensitivities are requested for <B defaulted securities.

The CDX Other and Itraxx Other categories are meant to capture exposures to indices that are not explicitly listed in the 'Corporate Credit-Advanced' tab. For example, CDX HiVol exposures should be reported under the “CDX Other” category and Itraxx HiVol exposures should be reported in the “Itraxx Other” category.

**Decomposition:**

Bespoke CDOs and Credit Baskets should be decomposed and included by rating on the appropriate Corporate Credit worksheet under the section for "Single Name CDS".

Indices, Index Tranches and Index Options SHOULD NOT BE DECOMPOSED. They should be included by category (IG, HY, Loan Index) in the Indices & Index Tranches and the Index Options sections.

**Profit/(Loss) Calculation:**

Profit/(Loss) should be calculated assuming full revaluation where possible. In completing the Profit/(Loss) section, firms should run full revaluations assuming all credit spreads (across all geographies and products- Munis, Corporates, CDS, etc.) move a given amount and then allocate the resulting P/L to the various rows and sections across all credit worksheets.

For example, firms should run a single full-revaluation simulation in which all spreads widen by 100% regardless of geography/product. P/L from this single simulation would then be allocated among the various rows and worksheets corresponding to different products, countries and indices.

**Spread Shocks:**

Profit/(Loss) from spread widenings should be entered using either the relative (%) section or the
The spread widenings listed in the green cells may be modified to fit what the firm has readily available subject to the following constraints:

**If using relative (%) widenings:**

The 50%, 100% and 200% widenings are required. At least one widening must be 400% or greater.

At least 3 widenings greater than 200% must be provided and no two adjacent widening %'s may be more than 100% apart.

**If using absolute (bps) widenings:**

The +50 bps, +100 bps, +500 bps and +1000 bps widenings are required. At least one widening must be +2500 bps or greater.

At least 3 additional widenings above +1000 bps must be provided. These must be spaced such that no two adjacent widenings are more than 1000 bps apart.

Note that the guidance in absolute space is necessarily a function of spread levels on the effective date and therefore subject to change. Firms are strongly encouraged to provide relative (%) spread sensitivities.
**F.19—Corporate Credit-Emerging Markets**

**General:**
Emerging Markets encompasses all countries not defined as Advanced Economies on the Regional Groupings worksheet.

Notional and MV amounts should be reported, by rating and tenor, for all relevant products. * MV for CDS should be reported as the notional amount plus the current MTM of the CDS, i.e. the bond-equivalent market value of the CDS. The notional amount should be positive for cases where CDS protection has been sold (long underlying bond) and negative for cases where CDS protection has been bought (short underlying bond).

"On-the-Run" refers to the two most recent series (i.e. the current and the prior) of the inde
The <B rating bucket for each section is broken into 3 categories - one for defaulted securities, one for non-defaulted securities, and one for "Default Status Unknown". The "Defaulted" category is meant to capture (1) defaulted positions and (2) for Bonds, Single Name CDS, Covered Bonds and Other/Unspecified categories, positions that do not have associated credit spread sensitivities, e.g. distressed positions or positions for which credit spread sensitivities are not available, regardless of rating. The "Default Status Unknown" row is meant to be used only when firms do not have the ability to categorize a given security as being defaulted or not.

Note that no credit widening sensitivities are requested for <B defaulted securities.

**Decomposition:**
Bespoke CDOs and Credit Baskets should be decomposed and included by rating on the appropriate Corporate Credit worksheet under the section for "Single Name CDS".

Indices, Index Tranches and Index Options SHOULD NOT BE DECOMPOSED. They should be included by category (CDX, iTraxx, Loan Index) in the Indices, Index Tranches and the Index Options sections.

**Profit/(Loss) Calculation:**
Profit/(Loss) should be calculated assuming full revaluation where possible. In completing the Profit/(Loss) section, firms should run full revaluations assuming all credit spreads (across all geographies and products- Munis, Corporates, CDS, etc.) move a given amount and then allocate the resulting P/L to the various rows and sections across all credit worksheets.

For example, firms should run a single full-revaluation simulation in which all spreads widen by 100% regardless of geography/product. P/L from this single simulation would then be allocated among the various rows and worksheets corresponding to different products, countries and indices.

**Spread Shocks:**
Profit/(Loss) from spread widenings should be entered using either the relative (%) section or the absolute (bps) section, but not in both. The spread widenings listed in the green cells may be modified to fit what the firm has readily available subject to the following constraints:

**If using relative (%) widenings:**
The 50%, 100% and 200% widenings are required. At least one widening must be 400% or greater.

At least 3 widenings greater than 200% must be provided and no two adjacent widening %’s may be more than 100% apart.
If using absolute (bps) widenings:

The +50 bps, +100 bps, +500 bps and +1000 bps widenings are required. At least one widening must be +2500 bps or greater.

At least 3 additional widenings above +1000 bps must be provided. These must be spaced such that no two adjacent widenings are more than 1000 bps apart. Note that the guidance in absolute space is necessarily a function of spread levels on the effective date and therefore subject to change. Firms are strongly encouraged to provide relative (%) spread sensitivities.
F.20—Sovereign Credit

General:
Exposures related to central governments and quasi-sovereigns that are explicitly guaranteed by the central government should be included in this worksheet and bucketed under the central government rating. Sub-sovereign exposures, such as those from municipalities, should be reported on the Munis Worksheet.

Notional and MV amounts should be reported for all relevant exposures. The MV and Notional in columns (A) and (B) are to be used for sovereign bonds and sovereign CDS issued in the same currency as the base currency of the issuing sovereign. The rates sensitivities of these instruments are captured on the Rates DV01 worksheet.

The MV and Notional in columns (C) and (D), are to be used for sovereign bonds and sovereign CDS denominated in currencies other than the base currency of the issuing sovereign. The rates sensitivities of these instruments are captured on the Rates DV01 worksheet.

Credit spread sensitivities for sovereign CDS (regardless of currency) and for sovereign bonds denominated in currencies other than the base currency of the issuing sovereign should be entered on this worksheet. The rates sensitivities of these instruments are captured on the Rates DV01 worksheet.

* MV for CDS should be reported as the notional amount plus the current MTM of the CDS, i.e. the bond-equivalent market value of the CDS. The notional amount should be positive for cases where CDS protection has been sold (long underlying bond) and negative for cases where CDS protection has been bought (short underlying bond).

Exposures to SovX indices (including options on SovX indices) should be decomposed and entered on the individual country rows.

Reference the definitions on the Regional Groupings worksheet for which countries should be included in rows labeled "Other".

Profit/(Loss) Calculation:
Profit/(Loss) should be calculated assuming full revaluation where possible. In completing the Profit/(Loss) section, firms should run full revaluations assuming all credit spreads (across all geographies and products- Munis, Corporates, CDS, etc.) move a given amount and then allocate the resulting P/L to the various rows and sections across all credit worksheets.

For example, firms should run a single full-revaluation simulation in which all spreads widen by 100% regardless of geography/product. P/L from this single simulation would then be allocated among the various rows and worksheets corresponding to different products, countries and indices.

Spread Shocks:
Profit/(Loss) from spread widenings should be entered using either the relative (%) section or the absolute (bps) section, but not in both. The spread widenings listed in the green cells may be modified to fit what the firm has readily available subject to the following constraints:

If using relative (%) widenings:
The 50%, 100%, and 200% widenings are required. At least one widening must be 300% or greater.
At least 2 widenings greater than 200% must be provided and no two adjacent widening %'s may be more than 100% apart.
If using absolute (bps) widenings:
The +50 bps, +100 bps, +500 bps and +1000 bps widenings are required. At least one widening must be +2000 bps or greater.
At least 2 additional widenings greater than or equal to +1500 bps must be provided.
Note that the guidance in absolute space is necessarily a function of spread levels on the effective date and therefore subject to change. Firms are strongly encouraged to provide relative (%) spread sensitivities.
**F.21—Credit Correlation**

**General:**
This worksheet is meant to capture the base correlation sensitivities of various structured credit indices by tenor and also notional amounts and MV of these positions.

The percentages in the first column are detachment points for the index tranches, where the attachment point for each tranche is the detachment point of the previous tranche. For example, for the IG index, the second tranche (the 7% row of the table) refers to the 3-7% tranche that absorbs losses beyond the first 3% and up to 7% of losses.

"Equity" tranches are defined as any tranche having a 0% attachment point.

"Super Senior" tranches are defined as any tranche having a detachment point of 60% or higher.

"Mezzanine" tranches are defined as all other tranches; that is any tranche with a non-zero attachment point and a detachment point less than 60%.

Tranches with non-standard attachment points should be mapped to the closest attachment points of the best-matching index category.

**Market Value (MV) and Notionals:**
* MV for CDS should be reported as the notional amount plus the current MTM of the CDS, i.e. the bond-equivalent market value of the CDS. The notional amount should be positive for cases where CDS protection has been sold (long underlying bond) and negative for cases where CDS protection has been bought (short underlying bond).

The notional / MV of bespoke CDOs and indices should be split between the various indices based upon the geographical location of names in the basket.

The notional / MV of bespoke CDOs and indices should be assigned to the closest current attachment point.

Long and Short exposures should be reported from the perspective of long or short the underlying credit. For CDS contracts, the long and short direction should not be from the perspective of bought or sold credit protection, but from the perspective of long or short the underlying credit exposure. Thus, sold protection in a CDS would be reported as a long credit position.

The exposures to be reported in each of the long and short categories should be netted against like exposures as described below:
Firms should conduct all netting at the firm-wide level, not at the business or desk level. MV- longs, and MV-shorts, should be the sum of exposures to obligors (issuers) to which the firm has net MV long, and net MV short, positions respectively. To arrive at the net Long, or net Short position, exposures to the same obligor should be netted (if JTD exposures to that obligor are offsetting) before aggregation across obligors. In determining the net exposure to an obligor, structured positions that are perfect replications of each other can be offset to arrive at the net position. For instance, long positions in a collection of tranches that when combined perfectly replicate short positions in another collection of tranches or an index can be offset against each other, if all the positions are to the exact same index and series (e.g. all are exposures to the CDX NA IG series 18). (For instance, a long position in a 10-15% tranche can be offset against short positions composed of a 10-12% tranche and a 12-15% tranche, if all the tranches are on the exact same index and series.) When a perfect replication is not possible, then offsetting is not allowed (except in the case of a residual as described in the next sentence). Where the long and short positions are otherwise equivalent except for a residual, the net amount should show the entire residual exposure.
Notional-long, and Notional-short, should similarly be the sum of the notional values of obligors with net long notionals, and net short notionals, positions respectively. For index products, for the exact same index family (e.g. NA IG), series (e.g. series 18), and tranche (e.g. 0-3%), positions should be netted across maturities. Different tranches of the same index or series may not be netted (except where replication is possible as specified above), different series of the same index may not be netted, and different index families may not be netted.
**F.22—IDR-Corporate Credit**

**General**

See the *Regional Groupings* tab for the definition of Advanced Economies. Please consider Emerging Markets to encompass all countries not defined as Advanced Economies on the *Regional Groupings* worksheet.

1. For reporting in this schedule, exposures in index and structured products may be decomposed/unbundled into their underlying single name constituents if such decomposition is normally done in a firm’s internal position measurement or models of default risk. See item (2) below on the decomposition. The one exception to this rule is for exposures to the SovX family of indices. SovX exposures must be decomposed by country and entered on the Sovereign Credit worksheet.

2. The decomposition of structured products into the MV of single name equivalents should be done on a JTD equivalent basis - e.g. the difference in MV of the structured security assuming that the single name does and does not default, with zero recovery. Similarly, the notional amount of decomposed exposures should be the notional amount corresponding to the MV equivalent in the previous step (assuming zero recovery).

3. The single name positions in Table A should include only actual single name products such as bonds, loans, and single name CDS. The single name exposures in Tables D and E should include the single name exposures in Table A and also equivalent single name exposures from decomposition of index or structured products. In tables A, D and E, the net exposure across products to the same obligor should be reported as specified in (6) below. The exposures in Tables A (Single Name Products), B (Index Products) and C (Other/Unspecified) should be exposures without any decomposition/unbundling of index or structured products. If the firm would like to provide an all-inclusive view of exposures that includes the effect of decomposed/unbundled index and structured products, these should be reported in the memorandum Tables D-G.

4. Table B should include all index, index tranche and bespoke products before any decomposition, and Table F should include index, index tranche and bespoke exposures that were not decomposed into single name underlying exposures. Similarly, Table C should include all other products before any decomposition, and Table G should include remaining other products that were not decomposed. Emerging Market CDX and iTraxx exposures should be reported in the CDX Other and iTraxx Other categories, respectively, in Table B and Table F.

5. Exposures on Tables A through C should be reported only once (with no double counting).

6. The exposures to be reported in each of the long and short categories should be netted against like exposures as described below:
   - Firms should conduct all netting at the firm-wide level, not at the business or desk level.
   - MV- longs, and MV-shorts, should be the sum of exposures to obligors (issuers) to which the firm has net MV long, and net MV short, positions respectively. To arrive at the net Long or net Short position, exposures to the same obligor should be netted (if JTD exposures to that obligor are offsetting) before aggregation across obligors.
   - Notional-long, and Notional-short, should similarly be the sum of the notional values of obligors with net long notional, and net short notionals, positions respectively.
   - For index products, for the exact same index family (e.g. NA IG), series (e.g. series 18), and tranche (e.g. 0-3%), positions should be netted across maturities.
   - Different tranches of the same index or series may not be netted, different series of the same index may not be netted, and different index families may not be netted.

7. MV for CDS should be reported as the notional amount plus the current mark-to-market value (MTM) of the derivative -- i.e. report in bond equivalent terms. CDS should be reported as the notional amount plus the mark-to-market value of the CDS. The notional amount should be positive for cases where CDS protection has been sold (long...
underlying bond) and negative for cases where CDS protection has been bought (short underlying bond).

Options should be reported on the basis of bond equivalent market value, and not in terms of the MTM of the option. The objective of the reported market value is the bond equivalent amount for determination of the jump-to-default loss in the event of an obligor default. Specifically, bond options should be reported as specified in (i), or if that is not feasible then as in the alternative method (ii). In both cases, the Long/Short reporting should be on the basis of long or short the underlying credit exposure (i.e. not bought vs. sold option).

(i) An Option on a bond should be reported as follows.

- **Sold Put**: MV of exposure = Strike – Option Premium
- **Bought Put**: MV of exposure = Option Premium – Strike
- **Sold Call**: MV of exposure = –Option Premium
- **Bought Call**: MV of exposure = Option Premium

Where the strike is in terms of the bond price (not the yield).

(ii) As an alternative, if the firm’s data systems cannot report as above, then the firm should report using the delta adjusted notional plus the option value.

8. If unable to separate into emerging markets and sovereigns, then report under corporate credit advanced economies. If unable to report separately, clearly indicate this in supporting documentation.

9. The exposures in this tab should include only corporate credit. Other structured products reported on the Securitized Products worksheet (i.e. RMBS, CMBS or ABS) should not be reported on this tab.

10. Long and Short exposures should be reported from the perspective of long or short the underlying credit. For CDS contracts, the long and short direction should be from the perspective of long or short the underlying credit exposure, and not bought or sold credit protection. Thus, sold protection in a CDS would be reported as a long credit position. For bond options, the long or short direction should be reported on the basis of long or short the underlying credit exposure, and not bought or sold options.
F.23—IDR-Jump to Default

**General:**
The decomposition of index and structured products into single name equivalents should be done on a JTD equivalent basis - i.e. the difference in MV of the structured security assuming that the single name does and does not default, with zero recovery.

Please enter information for any issuer for which the jump to default (using the firm's standard recovery assumptions) exceeds $25MM.

Exposures listed in this table should include debt and equity related instruments, for corporate exposures, including exposures to standalone nonpublic companies. Exposures to Sovereigns, Agencies, Munis, ARS, and counterparty credit exposures from derivative contracts should not be reported here.

Insert additional rows if needed. Unused rows should be left blank.
The Totals section at the bottom should be the firm-wide total JTD by rating for all issuers, not just those listed here.

Exposures should include unbundled exposures from index and structured products if such unbundling is used in the reporting firm's exposures measurement or internal models. If unbundled exposures are included, clearly indicate this in the firm's supporting documentation.
F.24—Private Equity

General:
This worksheet is meant to capture carry value of Private Equity investments across regions and aggregated by GICS code.

Real estate, minority interest in hedge funds, fund seed capital, infrastructure funds and investments where the GICS code is not clearly defined should be entered in the separate sections below the Data by GICS code section.

The row labelled "Unspecified Sector/Industry" is meant to capture the carrying value of investments not easily categorized into one of the specified industries and sectors, invests in several sectors and for which there is insufficient detail to break out the carrying value of the holdings into component sectors. An example would be a fund that invests in several sectors and for which there is insufficient detail to break out the carrying value of the holdings into component sectors.

Unfunded Commitments
All unfunded commitment balances are expected to be included, regardless of accounting and regulatory approaches used by the firms. This applies whether the institution holds a limited or general partner position.

Real Estate Categories
Core/Existing real estate investments typically involve the management of developed or existing properties where the primary purpose is to generate stable cash flows. Income is the primary investment objective of this type.
Opportunistic/Development is meant to capture real estate investments that are in the developing stage or involve major property restructuring from one primary purpose to a different primary purpose. Capital appreciation with income is the primary objective.

Regional Definitions
Western Europe: Austria, Belgium, France, Germany, Greece, Ireland, Italy, Luxembourg, Monaco, Netherlands, Portugal, Spain, Sweden, Switzerland, UK.
Other Developed Markets: All "Advanced Economies" defined on the Regional Groupings worksheet, excluding those in Western Europe defined above.
Emerging Markets: All other countries.
Unspecified Geography: Use in cases where current systems do not allow for the geographical source to be easily identified.
F.25—Other Fair Value Assets

General:

This worksheet is meant to capture the fair value of investments other than private equity which are subject to fair-value accounting aggregated by GICS code. These entries should be broken out into whether they are equity or debt instruments and whether they are US-based or not.

Investments where the sector/industry is not clearly defined should be entered on the Unspecified Sector/Industry line.

Tax credit investment information should be entered in the separate Tax Credits section below the Data by NAICS code section.

Definition of Other Fair Value Assets:
Please see the general instructions for this schedule.

Real Estate Categories
Core/Existing real estate investments typically involve the management of developed or existing properties where the primary purpose is to generate stable cash flows. Income is the primary investment objective of this type.
Opportunistic/Development is meant to capture real estate investments that are in the developing stage or involve major property restructuring from one primary purpose to a different primary purpose. Capital appreciation with income is the primary objective.

BOLI, COLI, and Stable Value Wraps:
The maximum instantaneous (post-shock) amount receivable under wrapped BOLI/COLI policies owned (directly or indirectly through the insurance carrier) by BHCs and IHC should be entered on the row labeled "BOLI, COLI and Stable Value Wraps" in the column for US Debt.

Similarly, the maximum instantaneous (post-shock) amount payable under wraps written by BHCs and IHCs should be entered in the same cell. These should be entered as a negative asset (i.e. a negative fair value).

Firms that have a combination of unwrapped separate account COLI/BOLI, written stable value wraps and purchased stable value wraps should net the respective entries and enter them in the same cell.

In no case should exposures related to BOLI, COLI or stable value wraps on these policies be entered anywhere else in this schedule.
Schedule G—PPNR

A. General Technical Details

This section provides general guidance and data definitions for the PPNR Schedule. The PPNR Schedule consists of four worksheets: PPNR Submission Cover Sheet, PPNR Submission worksheet, PPNR Net Interest Income (NII) worksheet, and PPNR Metrics worksheet. The four worksheets are described in detail below.

Certain commonly used terms and abbreviations, including PPNR, are defined at the end of this section. Other definitions are embedded in the Schedule. Undefined terms should be assumed to follow FR Y-9C definitions. In cases where FR Y-9C guidance is unavailable, BHCs and IHCs should use internal definitions and include information about the definitions used in the Supporting Documentation submitted for FR Y-14A projections.

All line item definitions and identification numbers are consistent between the FR Y-14A and FR Y-14Q and data should be reported accordingly. Where specific FR Y-14 PPNR and/or FR Y-9C guidance exists for business line and/or other items, provide both historical and projections data consistently throughout time in accordance with the instructions. If a BHC or IHC is unable to consistently adhere to definitions, it can request an exemption. If a BHC or IHC has to correct an error in prior filings, the BHC or IHC should restate and resubmit going back to first quarter of 2009.

All quarterly figures should be reported on a quarterly basis (not on a year-to-date basis).

Provide data for all non-shaded cells, except where the data requested is optional. The BHC or IHC is not required to populate cells shaded gray.

If there are no data for certain numerical fields, then populate the fields with a zero (0). If the fields are optional and a BHC or IHC chooses not to report data, leave the fields blank. For numerical fields requesting information in percent (e.g. average rates earned), use standard format where .01 = 1%. Do not use non numerical characters in numerical fields.

If there are no data for certain numerical fields, then populate the fields with a zero (0). If the fields are optional and a BHC or IHC chooses not to report data, leave the fields blank. For numerical fields requesting information in percent (e.g. average rates earned), use standard format where .01 = 1%. Do not use non numerical characters in numerical fields.

If the BHC or IHC has no information to report in the descriptive fields PPNR Submission footnotes 4, 7, 9, 25 or 27, PPNR NII footnotes 2 or 3, or PPNR Metric footnotes 14, 19, 20, 21, 23, 31, 32, or 34, then populate the fields with “N/A.” Do not leave descriptive fields blank.

The BHCs and IHCs need to ensure that (a) revenues and expenses reported always reconcile on a net basis to the following as defined in the FR Y-9C, Schedule HI, item 3 plus Schedule HI, item 5.m less Schedule HI, item 7.e plus Schedule HI, item 7.c.(1) less PPNR Submission worksheet, item 40, Valuation Adjustment for firm’s own debt under fair value option (FVO), (b) Net Interest Income is equal between the PPNR Submission and PPNR Net Interest Income worksheets, and that (c) Average balances reported for the purposes of the PPNR Net Interest Income worksheet equal FR Y-9C, Schedule HC-K, item 5 for item 17, Total Average Asset Balances and an average of FR Y-9C, Schedule HC, item 21 for item 40, Total Average Liability Balances. BHCs and IHCs should follow the same guidance when restating data to correct any errors either internally identified or identified by the Federal Reserve.

Materiality Thresholds

All BHCs and IHCs should complete all three worksheets, including the Net Interest Income worksheet and the Net Interest Income worksheet section of the PPNR Metrics worksheet.
Report data for all quarters for a given business segment in the PPNR Submission and PPNR Metrics worksheets if the total revenue of that business segment (calculated as the sum of net interest income and noninterest income for that segment), relative to total revenue of the BHC or IHC exceeded 5 percent in any of the most recent four actual quarters as provided by the BHC or IHC in the FR Y-14Q.

If international revenue exceeded 5 percent of total revenue in any of the most recent four actual quarters as provided by the BHC or IHC in the FR Y-14Q, provide regional breakouts (PPNR Metrics worksheet, line items 42A-42D) for all quarters in the PPNR Metrics worksheet.

If International Retail and Small Business revenues exceeded 5 percent of Total Retail and Small Business Segment revenue and Total Retail and Small Business Segment revenues were material based on an applicable 5 percent threshold in any of the most recent four actual quarters as provided by the BHC or IHC in the FR Y-14Q, provide related metrics data for all quarters (PPNR Metrics worksheet, line item 10).

Net Interest Income: Primary and Supplementary Designation
BHCs and IHCs are expected to report all line items for all worksheets subject to applicable thresholds as detailed in the instructions. In addition, for all BHCs and IHCs that are required to complete the PPNR Net Interest Income worksheet, the PPNR Net Interest Income worksheet should be designated as “Primary Net Interest Income.” The PPNR Submission worksheet for such BHCs and IHCs will be “Supplementary Net Interest Income” by default. For BHCs and IHCs that are not required to complete the PPNR Net Interest Income worksheet the PPNR Submission worksheet should be designated as “Primary Net Interest Income.” PPNR Net Interest Income Worksheet will be “Supplementary Net Interest Income” for such BHCs and IHCs by default, but is optional. Note that this designation would refer only to the net interest income portion of the worksheets.

B. Commonly Used Terms and Abbreviations

Credit cards: Unless specified otherwise, use the same definitions as provided in the FR Y-14M Credit Card schedule.

Domestic Revenues: Revenues from the US and Puerto Rico only. Note that this differs from the definition of domestic on the FR Y-9C.

International Revenues: International Revenues should be those generated from transactions with clients that are domiciled outside the U.S. and Puerto Rico.

Pre-provision Net Revenue (PPNR): Sum of net interest income and noninterest income net of noninterest expense, with components expected to reconcile with those reported in the FR Y-9C when adjusted for certain items. As presented on the PPNR schedules, the adjustments include exclusions of Valuation Adjustment for BHC’s and IHC’s debt under fair value option (FVO), goodwill impairment, loss resulting from trading shock exercise (if applicable), as well as adjustments related to operational risk expense required for PPNR purposes. For the related items, reference the PPNR Submission worksheet and related instructions for the line items 29, 40-42. Gains and losses on AFS and HTM securities, including other than temporary impairments (OTTI) estimates, are not a component of PPNR. All revenue and expenses related to mortgage servicing rights (MSRs) are components of PPNR to be reported in the associated noninterest income and noninterest expense line items on the PPNR schedule. Total Loans Held for Sale and Loans Accounted for under the Fair Value Option (as defined in the FR Y-14A, Schedule A.1.a, line item 57) are excluded only if they are a result of a market shock exercise. Other Losses (as
defined in the FR Y-14A, Schedule A.1.a, line item 66) are excluded as applicable and are expected to be infrequent.

**Revenues:** Sum of net interest income and noninterest income adjusted for selected exclusions, as reported on line item 27 of the PPNR Submission worksheet.

**Run-Off or Liquidating Businesses:** operations that do not meet an accounting definition of “discontinued operations” but which the BHC or IHC intends to exit. In order to facilitate the calculation of the proper net interest income on the *Net Interest Income worksheet*, report total balances related to discontinued operations as a negative number in “Other” in lines 15 and 38 and the corresponding average rates earned in lines 31 and 46. BHCs and IHCs should provide a detailed listing of the type (by corresponding line item on the *Net Interest Income worksheet*) of such balances reported as negative items in “Other” and the corresponding rates in the submission documentation.
G.1—PPNR Submission Worksheet

The PPNR Submission worksheet is based on standardized reporting of each component of PPNR, using business segment/line views as discussed below. If there is a difference between the FR Y-14 standardized reporting requirements and the BHCs' or IHCs' internal view used for internal capital planning purposes, the BHCs or IHCs should report data in the PPNR worksheets only per the standardized FR Y-14 requirements. The BHCs and IHCs are encouraged to provide data consistent with their own internal view in supporting documentation accompanying the FR Y-14A Projections and discuss data differences. If the BHCs and IHCs are unable to comply with the requirements, they can request a temporary exemption. This guidance applies to PPNR Submission and PPNR Net Interest Income worksheets. Please see guidance for PPNR Metrics in the PPNR Metrics section of the instructions.

Revenue Components
Revenue items are divided into net interest income and noninterest income, with totals expected to reconcile with what would be reported in the FR Y-9C when adjusted for Valuation Adjustment for firm's own debt under fair value option (FVO), loss resulting from trading shock exercise (if applicable), and operational risk expense adjustments required for PPNR purposes. For related items, reference PPNR Submission worksheet and related instructions for the line items 29, 40, and 42. In the documentation supporting the FR Y-14A PPNR submission, BHCs and IHCs are encouraged to discuss operational risk losses reported as contra-revenues for FR Y-9C purposes and their reallocation to Operational Risk expense in accordance with the PPNR instructions. Do not report gains and losses on AFS and HTM securities, including other than temporary impairments (OTTI) estimates, as a component of PPNR.

Report all items either in the segments that generated them and/or segments that they were allocated to through funds transfer pricing (FTP). Net interest income allocation to the defined segments should be based on the cost of funds applicable to those segments as determined by the BHC or IHC. Supporting documentation regarding methodology used should be provided in the memo required with the FR Y-14A Projections. Business segments and related sub-components do not have to correspond to but may include certain line items on the FR Y-9C schedule. The Business segment structure of the worksheet is defined by product/service (e.g., credit cards, investment banking) and client type (e.g., retail, medium size businesses); it is not defined by client relationship.

BHCs and IHCs are encouraged to note which line items contain Debt Valuation Adjustments (DVA) and/or Credit Valuation Adjustments (CVA) (note: these are different from fair value adjustment on the BHC's or IHC's own debt under the Fair Value Option (FVO) which is excluded from PPNR by definition), including amounts if available, and whether these are generated with the purpose to generate profit.

All revenue and expenses related to mortgage servicing rights (MSRs) and the associated noninterest income and noninterest expense line items should be evolved over the nine quarter projection horizons, and reported in the pre provision net revenue (PPNR) schedules.

Gains or losses on loans held for sale and loans accounted for under the fair value option (HFS/FVO loans) should be reported in the relevant items on the PPNR Submission Worksheet in accordance with the BHC's and IHC's normal accounting procedures.

Business Segment Definitions
Subject to applicable thresholds, reporting of net interest income and noninterest income items is requested based on a business segment/line view, with business segments/lines defined as
follows:

- As general guidance, small business clients are those with annual sales of less than $10 million. Business, government, not-for-profit, and other institutional entities of medium size are those with annual sales between $10 million and $2 billion. Large business and institutional entities are those with annual sales of more than $2 billion. If a BHC’s or IHC’s internal reporting for these client segments deviates from this general guidance, continue to report according to internal definitions and describe how the BHC or IHC defined these or similar client segments and the scope of related business segments/lines (internal and those defined in the FR Y-14 PPNR worksheets) in the memo supporting the FR Y-14A submission.

- A BHC or IHC may include public funds in the segment reporting based on the type of the relationship that exists between the public funds and the BHC or IHC. For example, if the BHC or IHC acts in a custodial or administrative capacity, the BHC or IHC may report public funds in Investor Services. If a BHC or IHC is involved in the management of funds, the BHC or IHC may report the public funds in Investment Management.

**Net Interest Income by Business Segment** (unless specified otherwise, all numbers are global).

**Line item 1 Retail and Small Business**
This item is a shaded cell and is derived from the sum of items 1A and 1G. For items 1A through 1F, domestic includes U.S. and Puerto Rico only.

Report in the appropriate sub-item all net interest income related to retail and small business banking and lending, including both ongoing as well as run-off and liquidating businesses. Exclude any revenues related to Wealth Management/Private Banking (WM/PB) clients even if they are internally classified as retail. BHCs and IHCs may include such revenues in WM/PB line items instead. In case of WM/PB mortgage repurchase contra-revenues, if any, report them as outlined in the PPNR Submission worksheet.

**Line item 1A Domestic**
This item is a shaded cell and is derived from the sum of items 1B through 1F.

**Line item 1B Credit and Charge Cards**
Report net interest income from domestic BHC and IHC issued credit and charge cards to retail customers including those that result from partnership agreements. May include revenue that is generated on domestic accounts due to foreign exchange transactions. Exclude the following:
- other unsecured borrowing and debit cards;
- small business cards (report in Other Retail and Small Business Lending, item 1F);
- wholesale and commercial cards (report in Treasury Services, item 8).
- Cards to Wealth Management/Private Banking clients (report in Wealth Management/Private Banking, line 19B)

**Line item 1C Mortgages**
Report net interest income from domestic residential mortgage loans offered to retail customers.

**Line item 1D Home Equity**
Report net interest income from domestic home equity loans and lines of credit (HELOANs/HELOCs) provided to retail customers.

---

13 See “Commonly Used Terms and Abbreviations” for the definition.
Line item 1E  Retail and Small Business Deposits
Report net interest income from domestic branch banking and deposit-related products and services provided to retail and small business customers. Include debit card revenues in this line. May include revenue that is generated on domestic accounts due to foreign exchange transactions. This item does not include any lending revenues.

Line item 1F  Other Retail and Small Business Lending
Report net interest income from other domestic retail and small business lending products and services. These include, but are not limited to, small business cards, loans, auto loans, student loans, or personal unsecured credit. All domestic lending revenues not captured in Credit Cards, Mortgages, and Home Equity should be reported here.

Line item 1G  International Retail and Small Business
Report net interest income from retail and small business generated outside of the U.S. and Puerto Rico. Includes, but is not limited to, all international revenues from credit/charge/debit cards, mortgages, home equity, branch and deposit services, auto, student, and small business loans.

Line item 2  Commercial Lending
Report net interest income from lending products and services provided to business, government, not-for-profit, and other institutional entities of medium size, as well as to commercial real estate investors and owners. Exclude treasury, deposit, and investment banking services.

Line item 3  Investment Banking
Report in the appropriate sub-item all net interest income generated from investment banking services provided to business and institutional entities of both medium and large size. Include revenues from new issue securitizations for third parties. Business lines are defined as follows:

- Advisory: Corporate strategy and financial advisory, such as services provided for mergers and acquisitions (M&A), restructuring, financial risk management, among others.
- Equity Capital Markets: Equity investment banking services (e.g., IPOs or secondary offerings).
- Debt Capital Markets: Generally non-loan debt investment banking services.
- Syndicated/Corporate Lending: Lending commitments to larger corporate clients, including event or transaction-driven lending (e.g., to finance M&A, leveraged buyouts, bridge loans). Generally, all syndicated lending origination activity should be included here (not in Commercial Lending).

Line item 4  Merchant Banking/ Private Equity
Report net interest income from private equity (PE), real estate, infrastructure, and principal investments in hedge funds. May include principal investment related to merchant banking activities.

Line item 5  Sales and Trading
This item is a shaded cell and is derived from the sum of items 5A and 5B. Report in the appropriate sub-item all net interest income generated from sales and trading activities. Any interest income from carry should be included in Sales & Trading net interest income. May include short-term trading made for positioning or profit generation related to the Sales & Trading activities in this line item.

Line item 5A  Prime Brokerage
Report net interest income generated from securities financing, securities lending, custody, clearing, settlement, and other services for hedge funds and other prime brokerage clients. Include all prime brokerage revenues in this line and not in any other business segments/lines.
Line item 5B  Other  
Report net interest income from all other Sales & Trading activities. These include, but are not limited to:

- Equities: Commissions, fees, dividends, and trading gains and losses on equity products. Exclude prime brokerage services.
- Fixed Income: Commissions, fees, and trading gains and losses on rates, credit, and other fixed income products. Exclude prime brokerage services.
  - Rates: Generally U.S. Treasury, investment grade sovereign, U.S. agency bonds, and interest rate swaps. Rates revenues related to trading activities outside of the Sales & Trading division need not be included into the Rates trading in this section, but describe where they are allocated in the BHC’s or IHC’s documentation supporting the FR Y-14A submission.
  - Credit: Generally corporate bonds, loans, ABS, muni, emerging markets, CDS. If a BHC or IHC classifies some of the credit related trading (such as distressed debt) in segments other than “Sales & Trading,” it can continue to report it as in its internal financial reports but indicate where they are reported in the documentation supporting FR Y-14A submission.
- Other: e.g., FX/Currencies if not included above.
- Commodities: Commissions, fees, and trading gains and losses on commodity products. Exclude prime brokerage services.

Line item 6  Investment Management  
Report all net interest income generated from investment management activities. Business lines are defined as follows:

- Asset Management: Professional management of mutual funds and institutional accounts. Institutional clients may include endowments, not-for-profit entities, governments, and others.
- Wealth Management/Private Banking (WM/PB): Professional portfolio management and advisory services for individuals. Individual clients may be defined as mass market, affluent, and high net worth. Activities may also include tax planning, savings, inheritance, and wealth planning, among others. May include deposit and lending services to WM/PB clients here and retail brokerage services for both WM/PB and non WM/PB clients.

Line item 7  Investment Services  
Report all net interest income generated from investment servicing. Exclude prime brokerage revenues. Business lines are defined as follows:

- Asset Servicing: Custody, fund services, securities lending, liquidity services, collateral management; and other asset servicing. Include record keeping services for 401K and employee benefit plans, but exclude funding or guarantee products offered to such clients.
- Issuer Services: Corporate trust, shareowner services, depository receipts, and other issuer services.
- Other Investment Services: Clearing and other investment services.

Line item 8  Treasury Services  
Report all net interest income from cash management, global payments, working capital solutions, deposit services, and trade finance from business and institutional entities of both medium and large size. Include wholesale/corporate and commercial cards.

Line item 9  Insurance Services  
Report all net interest income from insurance activities including, but not limited to, individual (e.g., life, health), auto and home (property and casualty), title insurance and surety insurance, and employee benefits insurance.

153
Line item 10  Retirement/Corporate Benefit Products
Report premiums, fees, and other net interest income generated from retirement and corporate benefit funding products, such as annuities, guaranteed interest products, and separate account contracts. The fees/revenues that may be recorded here are generally generated as a result of the BHC or IHC accepting risks related to actuarial assumptions or the estimation of market returns where guarantees of future income streams have been made to clients.

Line item 11 Corporate/Other
Report net interest income associated with:
- Capital and asset-liability management (ALM) activities. Among other items, may include investment securities portfolios (but not gains and losses on AFS and HTM securities, including OTTI, as these are excluded from PPNR by definition). Also may include principal investment supporting the corporate treasury function to manage firm-wide capital, liquidity, or structural risks.
- Run-off or liquidating businesses\(^\text{14}\) (but exclude retail and small business run-off/liquidating businesses, per Retail and Small Business segment definition)
- Non-financial businesses (e.g., publishing, travel services)
- Corporate support functions (e.g., Human Resources, IT)
- Other non-core revenues not included in other segments (e.g., intersegment eliminations).

Line item 12 Optional Immaterial Business Segments
BHCs and IHCs have the option to report less material business segment revenue in Optional Immaterial Business Segments. The reported total optional immaterial business segment revenue relative to total revenue cannot exceed 10 percent. If the total immaterial business segment revenue relative to total revenue would be greater than 10 percent in any of the most recent four actual quarters as provided by the BHC or IHC in the FR Y-14Q, report data for the largest business segment among the immaterial business segments for all quarters in the PPNR Submission and PPNR Metrics worksheets such that the amount reported in the Optional Immaterial Business segments line items does not exceed 10 percent. BHCs and IHCs should provide comprehensive information in the supporting documentation on which business segments are included in the Optional Immaterial Business segments line items in both FR Y-14Q and FR Y-14A schedules, their relative contribution to the totals reported in both schedules and the manner in which the revenues were projected for FR Y-14A purposes. List segments included in this line item in Footnote 7.

Line item 13 Total Net Interest Income
This item is a shaded cell and is derived from the sum of items 1, 2 through 5, and 6 through 12. Line item 13 should equal item 49 on PPNR NII Worksheet, if completed.

Noninterest Income by Business Segment (unless specified otherwise, all numbers are global).

Line item 14 Retail and Small Business
This item is a shaded cell and is derived from the sum of items 14A and 14T.

Line item 14A Domestic
This item is a shaded cell and is derived from the sum of items 14B, 14E, 14O, and 14S.

Report in the appropriate sub-item all domestic revenues related to retail and small business

\(^{14}\) See "Commonly Used Terms and Abbreviations" for the definition.
banking and lending, including both ongoing as well as run-off and liquidating businesses. Exclude any revenues related to Wealth Management/Private Banking (WM/PB) clients even if they are internally classified as retail. BHCs and IHCs may include such revenues in WM/PB line items instead. In case of WM/PB mortgage repurchase contra-revenues, if any, report them as outlined in the PPNR Submission worksheet.

**Line item 14B Credit and Charge Cards**
This item is a shaded cell and is derived from the sum of items 14C and 14D. Report in the appropriate sub-item all noninterest income generated from domestic BHC and IHC issued credit and charge cards to retail customers including those that result from a partnership agreements. May include revenue that is generated on domestic accounts due to foreign exchange transactions and corporate cards. Exclude the following:

- other unsecured borrowing and debit cards;
- small business cards (report in Other Retail and Small Business Lending, item 14S);
- wholesale and commercial cards (report in Treasury Services, item 21);
- Cards to Wealth Management/Private Banking clients (report in Wealth Management/Private Banking, line 19B)

**Line item 14C Credit and Charge Card Interchange Revenues - Gross**
Report interchange revenues from all domestic BHC and IHC issued credit and charge cards including those that result from a partnership agreement. Report before any contra-revenues (e.g., rewards, etc.).

**Line item 14D Other**
Report all other fee income and revenue earned from credit and charge cards not captured in line 14C.

**Line item 14E Mortgage and Home Equity**
This item is a shaded cell and is derived from the sum of items 14F, 14I and 14N. Report in the appropriate sub-item noninterest income generated from domestic residential mortgage loans offered to retail customers and domestic home equity loans and lines of credit (HELOANs/HELOCs) provided to retail customers.

**Line item 14F Production**
This item is a shaded cell and is derived from the sum of items 14G and 14H.

**Line item 14G Gains/Losses on Sale**
Report gains/(losses) from the sale of domestic mortgages and home equity originated through all production channels (retail, broker, correspondent, etc.) with the intent to sell. Such gains/losses should include deferred fees and costs that are reported as adjustments to the carrying balance of the sold loan, fair value changes on loan commitments with rate locks that are accounted for as derivatives, fair value changes on mortgage loans held-for-sale designated for fair value treatment, lower-of-cost or market adjustments on mortgage loans held-for-sale not designated for fair value treatment, fair value changes on derivative instruments used to hedge loan commitments and held-of-sale mortgages, and value associated with the initial capitalization of the MSR upon sale of the loan.

**Line item 14H Other**
Report all other fee income and revenue earned from mortgage production not captured in line

---

15 See "Commonly Used Terms and Abbreviations" for the definition.
14G.

**Line item 14I Servicing**
This item is a shaded cell and is derived from the sum of items 14J, 14K, 14L, and 14M.

**Line item 14J Servicing & Ancillary Fees**
Report fees received from activities relating to the servicing of mortgage loans, including (but not limited to) the collection principal, interest, and escrow payments from borrowers; payment of taxes and insurance from escrowed funds; monitoring of delinquencies; execution of foreclosures; temporary investment of funds pending distribution; remittance of fees to guarantors, trustees, and others providing services; and accounting for and remittance of principal and interest payments to the holders of beneficial interests in the financial assets.

**Line item 14K MSR Amortization**
Include economic amortization or scheduled and unscheduled payments, net of defaults under both FV and LOCOM accounting methods.

**Line item 14L MSR Value Changes due to Changes in Assumptions/Model Inputs/Other Net of Hedge Performance**
Report changes in the MSR value here and not in any other items. Report changes in the MSR hedges here and not in any other items. Include MSR changes under both FV and LOCOM accounting methods.

**Line item 14M Other**
Report all other revenue earned from servicing activities not captured in lines 14J through 14L.

**Line item 14N Provisions to Repurchase Reserve/Liability for Residential Mortgage Representations and Warranties (contra-revenue)**
Report provisions to build any non-litigation reserves/accrued liabilities that have been established for losses related to sold or government-insured residential mortgage loans (first or second lien). Do not report such provisions in any other items; report them only in line items 14N or 30, as applicable. Exclude all provisions to litigation reserves/liability for claims related to sold residential mortgages (report in item 29).

**Line item 14O Retail and Small Business Deposits**
This item is a shaded cell and is derived from the sum of items 14P, 14Q and 14R. Report in the appropriate sub-item noninterest income from domestic branch banking and deposit-related products and services provided to retail and small business customers. Include debit card revenues in this line. May include revenue that is generated on domestic accounts due to foreign exchange transactions.

**Line item 14P Non-Sufficient Funds/Overdraft Fees – Gross**
Report noninterest income from fees earned from insufficient fund deposit balances and overdrawn client deposit accounts. Report before any contra-revenues (e.g., waivers, etc.).

**Line item 14Q Debit Interchange – Gross**
Report noninterest income from interchange fees earned on debit cards. Report before any contra-revenues (e.g., rewards, etc.).

**Line item 14R Other**
Among items included here are debit card contra-revenues, and overdraft waivers, as applicable.
**Line item 14S  Other Retail and Small Business Lending**
Report noninterest income from other domestic retail and small business lending products and services. These include, but are not limited to, small business cards, other small business loans, auto loans, student loans, or personal unsecured credit.

**Line item 14T  International Retail and Small Business**
Report noninterest income from retail and small business generated outside of the US and Puerto Rico. Includes, but is not limited to, all revenues from credit/charge/debit cards, mortgages, home equity, branch and deposit services, auto, student, and small business loans.

**Line item 15  Commercial Lending**
Report noninterest income from lending products and services provided to business, government, not-for-profit, and other institutional entities of medium size, as well as to commercial real estate investors and owners. Exclude treasury, deposit, and investment banking services provided to commercial lending clients.

**Line item 16  Investment Banking**
This item is a shaded cell and is derived from the sum of items 16A through 16D. Report in the appropriate sub-item noninterest income generated from investment banking services provided to business and institutional entities of both medium and large size. Include revenues from new issue securitizations for third parties.

**Line item 16A  Advisory**
Corporate strategy and financial advisory, such as services provided for mergers and acquisitions (M&A), restructuring, financial risk management, among others.

**Line item 16B  Equity Capital Markets**
Equity investment banking services (e.g., IPOs or secondary offerings).

**Line item 16C  Debt Capital Markets**
Generally non-loan debt investment banking services.

**Line item 16D  Syndicated/Corporate Lending**
Lending commitments to larger corporate clients, including event or transaction-driven lending (e.g., to finance M&A, leveraged buyouts, bridge loans). Generally, all syndicated lending origination activity should be included here (not in Commercial Lending).

**Line item 17  Merchant Banking/ Private Equity**
This item is a shaded cell and is derived from the sum of items 17A through 17C.

Report in the appropriate sub-item revenues from the sponsorship of, management of, or from investing in, distinct long-term investment vehicles, such as real estate funds, private equity funds, hedge funds or similar vehicles. Also include direct long-term investments in securities and assets made primarily for capital appreciation, or investments where the BHC or IHC is likely to participate directly in corporate governance. Do not include revenues from sales & trading operations, corporate lending outside of a fund structure, investing in a HTM or AFS securities portfolio, brokerage or mutual fund operations.

**Line item 17A  Net Investment Mark-to-Market**
Report the net gain or loss from sale or from the periodic marking to market of Merchant Banking/Private Equity investments.
Line item 17B  Management Fees
Report fees and commissions paid by third parties to the BHC or IHC in connection with sale, placement or the management of above described investment activities.

Line item 17C  Other
Report any noninterest income items not included in items 17A and 17B. Also include the BHC’s or IHC’s proportionate share of the income or other adjustments from its investments in equity method investees.

Line item 18  Sales and Trading
This item is a shaded cell and is derived from the sum of items 18A, 18D, 18H, and 18K. Report in the appropriate sub-item noninterest income generated from sales and trading activities. Any interest income from carry should be included in Sales & Trading under net interest income. May include short-term trading made for positioning or profit generation related to the Sales & Trading activities in this line item.

Line item 18A  Equities
This item is a shaded cell and is derived from the sum of items 18B and 18C.

Line item 18B  Commission and Fees
Report commissions, fees, and dividends on equity products. Exclude prime brokerage services.

Line item 18C  Other
Report all noninterest income for equities sales and trading, excluding prime brokerage (to be reported as a separate line item) and excluding commissions and fees. This includes trading profits and other noninterest non-commission income.

Line item 18D  Fixed Income
This item is a shaded cell and is derived from the sum of items 18E, 18F, and 18G. Report in the appropriate sub-item commissions, fees, and trading gains and losses on rates, credit, and other fixed income products. Exclude prime brokerage services.

Line item 18E  Rates
Generally U.S. Treasury, investment grade sovereign, U.S. agency bonds, and interest rate swaps. Rates revenues related to trading activities outside of the Sales & Trading division need not be included into the Rates trading in this section, but describe where they are allocated in the BHC’s and IHC’s documentation supporting the FR Y-14A submission.

Line item 18F  Credit
Generally corporate bonds, loans, ABS, muni, emerging markets, CDS. If a BHC or IHC classifies some of the credit related trading (such as distressed debt) in segments other than “Sales & Trading,” it can continue to report it as in its internal financial reports but indicate where they are reported in the documentation supporting FR Y-14A submission.

Line item 18G  Other
Report other fixed income products if not included above (e.g., FX/Currencies).

Line item 18H  Commodities
This item is a shaded cell and is derived from the sum of items 18I and 18J.

Line item 18I  Commission and Fees
Report commissions, fees, and trading gains and losses on commodity products. Exclude prime brokerage services.

**Line item 18J Other**
Report other noninterest income generated from commodity products, excluding prime brokerage services.

**Line item 18K Prime Brokerage**
This item is a shaded cell and is derived from the sum of items 18L and 18M. Report in the appropriate sub-item noninterest income from securities financing, securities lending, custody, clearing, settlement, and other services for hedge funds and other prime brokerage clients. Include all prime brokerage revenues in this line and not in any other business segments/lines.

**Line item 18L Commission and Fees**
Report commissions and fees on prime brokerage services.

**Line item 18M Other**
Report other noninterest income generated from prime brokerage services.

**Line item 19 Investment Management**
This item is a shaded cell and is derived from the sum of items 19A and 19B. Report in the appropriate sub-item all noninterest income generated from investment management activities.

**Line item 19A Asset Management**
Professional management of mutual funds and institutional accounts. Institutional clients may include endowments, not-for-profit entities, governments, and others.

**Line item 19B Wealth Management/Private Banking (WM/PB)**
Professional portfolio management and advisory services for individuals. Individual clients may be defined as mass market, affluent, and high net worth. Activities may also include tax planning, savings, inheritance, and wealth planning, among others. May include deposit and lending services to WM/PB clients here and retail brokerage services for both WM/PB and non WM/PB clients.

**Line item 20 Investment Services**
This item is a shaded cell and is derived from the sum of items 20A, 20D, and 20E. Report in the appropriate sub-item all noninterest income generated from investment servicing. Exclude prime brokerage revenues.

**Line item 20A Asset Servicing**
This item is a shaded cell and is derived from the sum of items 20B and 20C. Report in the appropriate sub-item all noninterest income from custody, fund services, securities lending, liquidity services, collateral management, and other asset servicing. Include record keeping services for 401K and employee benefit plans, but exclude funding or guarantee products offered to such clients.

**Line item 20B Securities Lending**
Report noninterest income generated from securities lending.

**Line item 20C Other**
Report all other noninterest income asset servicing, excluding securities lending.
**Line item 20D  Issuer Services**
Corporate trust, shareowner services, depository receipts, and other issuer services.

**Line item 20E  Other**
Report noninterest income from clearing and other investment services not included above.

**Line item 21  Treasury Services**
Report cash management, global payments, working capital solutions, deposit services, and trade finance from business and institutional entities of both medium and large size. Include wholesale and commercial cards.

**Line item 22  Insurance Services**
Report all noninterest income from insurance activities including, but not limited to, individual (e.g., life, health), auto and home (property and casualty), title insurance and surety insurance, and employee benefits insurance.

**Line item 23  Retirement/Corporate Benefit Products**
Report premiums, fees, and other noninterest income generated from retirement and corporate benefit funding products, such as annuities, guaranteed interest products, and separate account contracts. The fees/revenues that may be recorded here are generally generated as a result of the BHC and IHC accepting risks related to actuarial assumptions or the estimation of market returns where guarantees of future income streams have been made to clients.

**Line item 24  Corporate/Other**
Report noninterest income associated with:
- Capital and asset-liability management (ALM) activities. Among other items, may include investment securities portfolios (but not gains and losses on AFS and HTM securities, including OTTI, as these are excluded from PPNR by definition). Also may include principal investment supporting the corporate treasury function to manage firm-wide capital, liquidity, or structural risks.
- Run-off or liquidating businesses (but exclude retail and small business run-off/liquidating businesses, per Retail and Small Business segment definition)
- Non-financial businesses (e.g., publishing, travel services)
- Corporate support functions (e.g., Human Resources, IT)
- Other non-core revenues not included in other segments (e.g., intersegment eliminations).

**Line item 25  Optional Immaterial Business Segment.**
BHCs and IHCs have the option to report less material business segment revenue in separate line items “Optional Immaterial Business Segments”. The reported total optional immaterial business segment revenue relative to total revenue cannot exceed 10 percent. List segments included in this line item in Footnote 7.

**Line item 26  Total Noninterest Income.**
This item is a shaded cell and is derived from the sum of items 14, 15, 16, 17, 18, 19, 20, and 21 through 25. Excludes Valuation Adjustment for firm’s own debt under fair value option (FVO) reported in item 40 and the result of trading shock exercise (where applicable), as it is reported in item 42.

**Line item 27  Total Revenues**
This item is a shaded cell and is derived from the sum of items 13 and 26.
Noninterest Expense Components
Noninterest Expense figures are to be broken out as detailed on the worksheet. The total is expected to reconcile with what would be reported in the FR Y-9C when adjusted for certain items. As presented on the PPNR worksheets, the adjustments include exclusions of goodwill impairment and adjustments related to operational risk expense required for PPNR purposes. For the related items, reference PPNR Submission worksheet and related instructions for the line items 29 and 41.

Expense data on the PPNR Submission worksheet are only intended to be reported as firm-wide BHC or IHC expenses, with exception of line item 34A, i.e. Marketing Expense for Domestic Credit Cards. This line item is for Domestic Credit Cards business line only. See the description of the Domestic Credit Card business line in the Business Segment Definitions section of the document.

If the Worker’s Compensation expense is an expected item, or is regularly budgeted and paid out similar to an insurance premium or accrual of agreed-upon expenses, then a BHC or IHC would report it as Compensation expense or line item 28. If the Worker’s Compensation results from a legal settlement, or is part of a large payout to prevent litigation, solve a complaint, or satisfy a penalty or fine, then a BHC or IHC would report it in line item 29 with Operational Risk Expenses.

Line item 28 Compensation Expense
This item is a shaded cell and is derived from the sum of items 28A through 28E.

Line item 28A Salary
Exclude stock based and cash variable pay compensation and report in items 28D and 28E, respectively.

Line item 28B Benefits
Exclude stock based and cash variable pay compensation and report in items 28D and 28E, respectively.

Line item 28C Commissions.
Report commissions only in “Commissions” line item 28C; do not report commissions in any other compensation line items.

Line item 28D Stock Based Compensation
Report all expenses related to stock based compensation as defined by ASC Topic 718, Compensation-Stock Compensation (formerly FASB Statement No. 123(R), Shared-Based Payment).

Line item 28E Cash Variable Pay
Report expenses related to all discretionary variable compensation paid (or to be paid) in the form of cash. Include deferred variable compensation plans not associated with BHC or IHC stock.

Line item 29 Operational Risk Expense
All operational loss items, including operational losses that are contra revenue amounts or cannot be separately identified, should be reported in the operational risk expense. Any legal consultation or retainer fees specifically linked to an operational risk event should be included in the Operational Risk Expense. Include all provisions to litigation reserves/liability for claims related to sold residential mortgages and all litigation settlements and penalties in this line item and not in any other line item. The reporting of the operational risk expense item will not necessarily be consistent with FR Y-9C reporting.
**Line item 30  Provisions to Repurchase Reserve/Liability for Residential Mortgage Representations and Warranties**

Provisions to build any non-litigation reserves/accrued liabilities that have been established for losses related to sold or government-insured residential mortgage loans (first or second lien). Do not report such provisions in any other items; report them only in line items 14N or 30, as applicable. Exclude all provisions to litigation reserves/liability for claims related to sold residential mortgages (report in item 29).

**Line item 31  Professional and Outside Services Expenses**

Among items included are routine legal expenses (i.e., legal expenses not related to operational losses), audit and consulting fees, and other fees for professional services.

**Line item 32  Expenses of Premises and Fixed Assets**

Report expenses of premises and fixed assets, as defined in the FR Y-9C, Schedule HI, item 7.b.

**Line item 33  Amortization Expense and Impairment Losses for Other Intangible Assets**

Report amortization expense and impairment losses for other intangible assets, as defined in the FR Y-9C, Schedule HI, item 7.c.(2).

**Line item 34  Marketing Expense**

This item is a shaded cell and is derived from the sum of items 34A and 34B.

**Line item 34A  Domestic Credit and Charge Card Marketing Expense**

Include domestic BHC and IHC issued credit and charge cards, as defined in line item 1.b, including those that result from a partnership agreement. Include both direct and allocated expenses. Report any expenses that are made to expand the company's card member and/or merchant base, facilitate greater segment penetration, enhance the perception of the company's credit card brand, and/or increase the utilization of the existing card member base across the spectrum of marketing and advertising mediums. See Instructions for description of standardized Business Segments/Lines. Unless specified otherwise, all numbers are global.

**Line item 34B Other**

Report all marketing expenses not related to domestic credit and charge cards captured in line 34A.

**Line item 35  Other Real Estate Owned Expense**

All expenses associated with other real estate owned that would normally be reported in the FR Y-9C, Schedule HI, item 7.d., “Other noninterest expense”.

**Line item 36  Provision for Unfunded Off-Balance Sheet Credit Exposures (to build/decrease item 141 (BHCKB557) in Balance Sheet)**

Report the provision for credit losses on off-balance sheet credit exposures normally reported as one of the items in FR Y-9C, Schedule HI, item 7.d.

**Line item 37  Other Noninterest Expense**

Provide a further break out of significant items included in Other Noninterest Expense in footnote 4, such that no more than 5% of Noninterest Expense are reported without further breakout.

Report the line item breakout for the combined 9 quarters of projected “Other noninterest expense” (line item 37). A quarterly breakout of these data should be included in the supporting
Line item 38  Total Noninterest Expense
This item is a shaded cell and is derived from the sum of items 28, 29 through 34, and 35 through 37. Excludes Goodwill Impairment included in item 41.

Line item 39  Actual PPNR
This item is a shaded cell and is derived from item 27 less 38. By definition, PPNR will calculate as net interest income plus noninterest income less noninterest expense, excluding items broken out in items 40 through 42.

Line item 40  Valuation Adjustment for Firm’s Own Debt Under Fair Value Option (FVO)
List segments from which item was excluded in Footnote 9. List FR Y-9C, Schedule HI items from which this item is excluded in Footnote 27.

Line item 41  Goodwill Impairment
Report impairment losses for goodwill, as defined in the FR Y-9C, Schedule HI, item 7.c.(1). Under GAAP (ASC 350-20-35-30), "Goodwill of a reporting unit shall be tested for impairment between annual tests if an event occurs or circumstances change that would more likely than not reduce the fair value of a reporting unit below its carrying amount." However, it is acceptable for purposes of this exercise to provide annual estimates as long as the resulting quarterly capital projections would not differ materially from those generated using quarterly impairment projections.

Line item 42  Loss Resulting from Trading Shock Exercise (if applicable)
This item is a shaded cell and is derived from the sum of items 58 through 62 on the Worksheet 1.a, Income Statement. BHCs and IHCs should not report changes in value of the MSR asset or hedges within the trading book. List segments from which item was excluded in Footnote 25.
G.2—PPNR Net Interest Income (NII) Worksheet

All BHCs and IHCs are required to submit the Net Interest Income worksheet. BHCs and IHCs should complete non-shaded cells only; all shaded cells with embedded formulas will self-populate.

This worksheet requires BHCs and IHCs to provide average asset and liability balances and average yields to calculate net interest income. The total net interest income calculated should equal the total net interest income reported using a business segment/line view in the PPNR Submission worksheet.

The average balances and rates are meant to reflect the average over each quarter as best as possible. The Federal Reserve understands that because of changes in balances over the period, the simple multiplication of average loan rates and balances may not yield the actual interest income. In these cases, the BHCs and IHCs may report the average loan rate so that it equals a weighted average rate over the period and the interest income total for each quarter reflects historical results or the BHC’s or IHC’s projection, as applicable. If the average rates are materially impacted by large shifts in balances over the period, highlight this in documentation supporting the FR Y-14A submission.

Rates on this worksheet are intended to provide a product level view exclusive of transfer pricing activity and should be reported on a gross basis. The reporting of net interest income on the PPNR Submission worksheets provide a business line view and should be reported net of transfer pricing adjustments.

Average Assets

BHCs and IHCs should reference FR Y-9C and other definitions provided in the PPNR Net Interest Income worksheet when completing this section. Align the asset categories definitions, where no FR Y9C code is provided, with those on the Balance Sheet worksheet of the FR Y-14A Summary Schedule. The FR Y-9C code references are intended only to provide guidance for the types of items to be included or excluded; but NOT the type of balance to be provided. All requested balance items are averages.

In the case of loans, align definitions with the “total loans” section of the Balance Sheet worksheet. Include purchased credit impaired loans PCI loan balances and the interest income recognized on these loans. However, report the aggregate of all nonaccrual loans as line item 9 rather than including them in each loan type. Although nonaccrual loans are reported in aggregate for reporting purposes, BHCs and IHCs are encouraged to provide details on the nonaccrual loans by Balance Sheet worksheet definition, if available, in the documentation supporting their FR Y-14A submission.

Average balances on the PPNR Net Interest Income worksheets (both on FR Y-14Q and FR Y-14A) are intended to be reported in a manner consistent with items on the Balance Sheet worksheet of FR Y-14A schedule. As such, average asset balances on PPNR Net Interest Income worksheet are to reconcile to average of asset balances based on FR Y-9C BHCK2170 (which reflects fair value of AFS securities). If this reporting results in recording certain non-earning assets in the average trading assets line on the PPNR Net I worksheet (or any other line item with an associated rate), a BHC or IHC should simply reduce the weighted average rate applied to that balance to ensure that income forecasts are calculated appropriately.

Line item 1 First Lien Residential Mortgages (in domestic offices)
Report the average balance of first lien residential mortgages in domestic offices (as defined in the FR Y-9C, Schedule HC-C, item 1.c.(2)(a), column B).
Line item 2  Second/Junior Lien Residential Mortgages (in domestic offices)
This item is a shaded cell and is derived from the sum of items 2A and 2B.

Line item 2A  Closed-End Junior Liens
Report the average balance of second/junior lien residential mortgages in domestic offices (as defined in the FR Y-9C, Schedule HC-C, item 1.c.(2)(b), column B).

Line item 2B  Home Equity Lines of Credit (HELOCs)
Report the average balance of home equity lines of credit in domestic offices (as defined in the FR Y-9C, Schedule HC-C, item 1.c.(1), column B).

Line item 3  C&I Loans
Report the average balance of C&I Graded, Small Business (Scored/Delinquency Managed), Corporate Card, and Business Card loans.

Line item 4  CRE Loans (in domestic offices)
Report the average balance of CRE loans in domestic offices as defined in the FR Y-9C, Schedule HC-C, items 1.a.(1), 1.a.(2), 1.d, 1.e.(1), and 1.e.(2), column B.

Line item 5  Credit Cards
Report the average balance of credit cards (as defined in the FR Y-9C, Schedule HC-C, item 6.a, column A).

Line item 6  Other Consumer
This item is a shaded cell and is derived from the sum of items 6A through 6C.

Line item 6A  Auto Loans
Report the average balance of auto loans as defined in the FR Y-9C, Schedule HC-C, item 6.c, column A.

Line item 6B  Student Loans
Report the average balance of student loans.

Line item 6C  Other (including loans backed by securities (non-purpose lending))
Report the average balance of other loans.

Line item 7  Real Estate Loans (not in domestic offices)
This item is a shaded cell and is derived from sum of items 7A and 7B. (Also, defined as FR Y-9C, Schedule HC-C, item 1, column A, less above items 1, 2, 4, and FR Y-9C, Schedule HC-C, item 1.b, column B.)

Line item 7A  Residential Mortgages (first and second lien)
Report the average balance of first and second lien residential mortgages not in domestic offices.

Line item 7B  Other
Report the average balance of other real estate loans not in domestic offices.

Line item 8  Other Loans and Leases
Report the average balance of other loans and leases. Include loans secured by farmland as defined in FR Y-9C, Schedule HC-C, item 1.b, column B, and other loans not accounted for in the above
categories. If total net interest income does not reconcile to FR Y-9C total per PPNR definition using fair value average balances for AFS securities, use "Other" balances (line items 15 and 38) and corresponding rates (line items 31 and 46) to offset the difference.

**Line item 9  Nonaccrual Loans**
Report the average balance of nonaccrual loans, as defined in the FR Y-9C, Schedule HC-N, item 10 (Column C) less Schedule HC-N, item 9 (Column C). Institutions are to provide additional details within the supporting documentation; the composition of the non-accrual loans by key loan type over the reported time periods for each of the scenarios.

**Line item 10  Securities (AFS and HTM) – Treasuries and Agency Debentures**
Report the average balance of AFS/HTM balances in Treasury and Agency debentures, as defined in the FR Y-9C, Schedule HC-B, items 1, 2.a and 2.b, columns A and D.

**Line item 11  Securities (AFS and HTM) – Agency RMBS (both CMOs and pass-throughs)**
Report the average balance of AFS/HTM balances in Agency RMBS, as defined in the FR Y-9C, Schedule HC-B, items 4.a.(1), 4.a.(2), 4.b.(1) and 4.b.(2), columns A and D.

**Line item 12  Securities (AFS and HTM) - Other**
Report the average balance of all AFS/HTM investments not reported in line items 10 and 11 (defined in the FR Y-9C, Schedule HC, items 2.a and 2.b less Net II Worksheet line items 10 & 11.

**Line item 13  Trading Assets.**
Report the average balance of trading assets as defined in the FR Y-9C, Schedule HC-K, item 4.a.

**Line item 14  Deposits with Banks and Other**
Report the average balance of deposits with banks.

**Line item 15  Other Interest/Dividend-BearingAssets**
Report the average balance of other interest/dividend-bearing asset not accounted for in the above categories (e.g. Fed Funds Sold, Repos, etc.). In Footnote 2, breakout and explain nature of significant items included in other average interest-bearing asset balances such that no more 5% of total average interest-bearing asset balances are reported without a further breakout.

**Line item 16  Other Assets**
Report the average balance of all non-interest bearing assets. Line 16 of the Net Interest Income Worksheet is intended for a BHC or IHC to report noninterest bearing assets, and accordingly is excluded from the calculation of interest income.

**Line item 17  Total Average Asset Balances**
This item is a shaded cell and is derived from sum of items 1, 2, 3 through 6, 7, and 8 through 16.

**Average Rates Earned**
All rates are annualized.

**Line item 18  First Lien Residential Mortgages (in domestic offices)**
Report the earned average rate of first lien residential mortgages in domestic offices as defined in the FR Y-9C, Schedule HC-C, item 1.c.(2)(a), column B.

**Line item 19  Second/Junior Lien Residential Mortgages (in domestic offices)**
This item is a shaded cell and is derived from sum of items 19A and 19B.
Line item 19A  Closed-End Junior Liens
Report the earned average rate of second/junior lien residential mortgages in domestic offices as defined in the FR Y-9C, Schedule HC-C, item 1.c.(2)(b), column B.

Line item 19B  Home Equity Lines of Credit (HELOCs)
Report the earned average rate of home equity lines of credit in domestic offices as defined in the FR Y-9C, Schedule HC-C, item 1.c.(1), column B.

Line item 20  C&I Loans (excluding small business (scored/delinquency managed)
Report earned average rate of large commercial credits and small business (graded) loans. Note that the definitions for Large Commercial Credits and Small Business (Graded) are aligned with Balance Sheet definitions (e.g., in the current reports, consistent with CCAR 2012 Balance Sheet worksheet).

Line item 21  CRE Loans (in domestic offices)
Report the earned average rate of CRE loans in domestic offices as defined in the FR Y-9C, Schedule HC-C, items 1.a.(1), 1.a.(2), 1.d, 1.e.(1), and 1.e.(2), column B.

Line item 22  Credit Cards
Report earned average rate of credit cards as defined in the FR Y-9C, Schedule HC-C, item 6.a, column A.

Line item 23  Other Consumer
This item is a shaded cell and is derived from the sum of items 23A through 23C.

Line item 23A  Auto Loans
Report earned average rate of auto loans as defined in the FR Y-9C, Schedule HC-C, item 6.c, column A.

Line item 23B  Student Loans
Report earned average rate of student loans.

Line item 23C  Other, incl. loans backed by securities (non-purpose lending)
Report earned average rate of other loans.

Line item 24  Real Estate Loans (not in domestic offices)
Item 24 is a shaded cell and is derived from sum of items 24A and 24B. (Also, defined as FR Y-9C, Schedule HC-C, item 1, column A, less above items 18, 19, 21, and FR Y-9C, Schedule HC-C, item 1.b, column B.)

Line item 24A  Residential Mortgages (first and second lien)
Report the earned average rate of first and second lien residential mortgages not in domestic offices.

Line item 24B  Other
Report the earned average rate of other real estate loans not in domestic offices.

Line item 25  Other Loans and Leases
Report the earned average rate of other loans and leases. Include loans secured by farmland as defined in Schedule HC-C, FR Y-9C, Schedule HC-C, item 1.b, column B, and other loans not accounted for in the above categories. If total net interest income does not reconcile to FR Y-9C total per PPNR definition using fair value average balances for AFS securities, use “Other” balances (line
items 15 and 38) and corresponding rates (line items 27 and 43) to offset the difference.

**Line item 26  Nonaccrual Loans**
Report the earned average rate of nonaccrual loans. Interest income earned on nonaccrual balances is generally expected to be small.

**Line item 27  Securities (AFS and HTM) – Treasuries and Agency Debentures**
Report the earned average rate earned on AFS/HTM balances in Treasury and Agency debentures.

**Line item 28  Securities (AFS and HTM) – Agency RMBS (both CMOs and pass-throughs)**
Report the earned average rate earned on AFS/HTM balances in Agency RMBS.

**Line item 29  Securities (AFS and HTM) - Other**
Report the earned average rate earned on all other AFS/HTM balances.

**Line item 30  Trading Assets**
Report the earned average rate of trading assets as defined in the FR Y-9C, Schedule HC-K, item 4.a.

**Line item 31  Deposits with Banks and Other**
Report the earned average rate of deposits with banks.

**Line item 32  Other Interest/Dividend-Bearing Assets**
Report the earned average rate of other interest/dividend-bearing asset not accounted for in the above categories.

**Line item 33  Total Interest Income**
This item is a shaded cell and is derived from sum of the products of items 1 and 18, 2A and 19A, 2B and 19B, 3 and 20, 4 and 21, 5 and 22, 6A and 23A, 6B and 23B, 6C and 23C, 7 and 24, 7B and 24B, 8 and 25, 9 and 26, 10 and 27, 11 and 28, 12 and 29, 13 and 30, 14 and 31, & 15 and 32 annualized.

**Average Liability Balances**
For the classification of domestic and foreign deposit liabilities, BHCs and IHCs should report based on internal definitions (those deemed to best represent the behavior characteristics of deposits). For all other liabilities, BHC and IHC should reference FR Y-9C and other definitions provided in the PPNR Net interest Income worksheet when completing this section.

**Line item 34  Deposits-Domestic**
This item is a shaded cell and is derived from sum of items 34A through 34E.

A sum of average domestic and foreign deposits should be equal to a sum of average FR Y-9C, Schedule HC, items 13.a.(1), 13.a.(2), 13.b.(1), and 13.b.(2).

**Line item 34A  Noninterest-bearing Demand**
Report balances using internal definitions.

**Line item 34B  Money Market Accounts**
Report balances using internal definitions.

**Line item 34C  Savings**
Report balances using internal definitions.
Line item 34D  Negotiable Order of Withdrawal (NOW), Automatic Transfer Service (ATS), and other Transaction Accounts
Report balances using internal definitions.

Line item 34E  Time Deposits
Report balances using internal definitions.

Line item 35  Deposits-Foreign
This item is a shaded cell and is derived from the sum of items 35A and 35B.

A sum of average domestic and foreign deposits should be equal to a sum of average FR Y-9C, Schedule HC, items 13.a.(1), 13.a.(2), 13.b.(1), and 13.b.(2).

Line item 35A  Foreign Deposits
Report balances using internal definitions.

Line item 35B  Foreign Deposits-Time
Report balances using internal definitions.

Line item 36  Fed Funds, Repos, & Other Short Term Borrowing
This item is a shaded cell and is derived from the sum of items 36A through 36C.

Line item 36A  Fed Funds

Line item 36B  Repos
Report the average balance of Securities sold under agreement to repurchase as defined in the FR Y-9C, Schedule HC, item 14.b.

Line item 36C  Other Short Term Borrowing
Report the average balance of liabilities reported as other borrowed money and subordinated notes and debentures (as defined in the FR Y-9C, Schedule HC, items 16 and items 19a which the firm would define as short term borrowings).

A sum of line items 36C ("other short term borrowing") and 39 ("other interest bearing liabilities") equals a sum of average BHCK3190, average BHCK4062, and average interest-bearing liabilities reported in BHCK2750; line item 40 ("other liabilities") captures average non-interest bearing liabilities in BHCK2750.

Line item 37  Trading Liabilities
Report the average balance of Trading Liabilities as defined in the FR Y-9C, Schedule HC, item 15.

Line item 38  Subordinated Notes Payable to Unconsolidated Trusts Issuing Trust Preferred Securities (TruPS) and TruPS Issued by Consolidated Special Purpose Entities
Report the average balance of Preferred Securities (TruPS) and TruPS Issued by Consolidated Special Purpose Entities as defined in the FR Y-9C, Schedule HC, item 19b.

Line item 39  Other Interest-Bearing Liabilities
Report the average balance of liabilities reported as Other Borrowed Money and Subordinated Notes and Debentures as defined in the FR Y-9C, Schedule HC, items 16 and items 19a which are
not already reported in line item 35c Other Short Term Borrowing. This includes all long-term debt not included in line item 38 above. A sum of line items 36C (“other short term borrowing”) and 39 (“other interest bearing liabilities”) equals a sum of average BHCK3190, average BHCK4062, and average interest-bearing liabilities reported in BHCK2750; line item 40 (“other liabilities”) captures average non-interest bearing liabilities in BHCK2750.

**Line item 40 Other Liabilities**
Report the average balance of liabilities reported as Other Liabilities as defined in the FR Y-9C, Schedule HC, item 20. A sum of line items 36C (“other short term borrowing”) and 39 (“other interest bearing liabilities”) equals a sum of average BHCK3190, average BHCK4062, and average interest-bearing liabilities reported in BHCK2750; line item 40 (“other liabilities”) captures average non-interest bearing liabilities in BHCK2750.

**Line item 41 Total Average Liability Balances**
This item is a shaded cell and is derived from sum of items 34, 35, 36, and 37 to 40.

**Average Liability Rates**
All rates are annualized.

**Line item 42 Deposits—Domestic**
This item is a shaded cell and is derived from sum of items 42A through 42E.

**Line item 42A Noninterest-bearing Demand**
This item is a shaded cell; rates are equal to zero by definition.

**Line item 42B Money Market Accounts**
Report the earned average rate of Money Market Accounts reported in item 34B.

**Line item 42C Savings**
Report the earned average rate of Savings Accounts reported in item 34C.

**Line item 42D Negotiable Order of Withdrawal (NOW), Automatic Transfer Service (ATS), and other Transaction Accounts**
Report the earned average rate of Negotiable Order of Withdrawal (NOW), Automatic Transfer Service (ATS), and other Transaction Accounts reported in item 34D.

**Line item 42E Time Deposits**
Report the earned average rate of Time Deposits reported in item 34E.

**Line item 43 Deposits—Foreign**
This item is a shaded cell and is derived from the sum of items 43A and 43B.

**Line item 43A Foreign Deposits**
Report the earned average rate of Foreign Deposits reported in item 35A.

**Line item 43B Foreign Deposits—Time**
Report the earned average rate of Foreign Deposits—Time reported in item 35B.

**Line item 44 Fed Funds, Repos, & Other Short Term Borrowing**
This item is a shaded cell and is derived from the sum of items 44A through 44C.
**Line item 44A  Fed Funds**  
Report the average rate paid for Fed Funds purchased in domestic offices as defined in the FR Y-9C, Schedule HC, item 14a.

**Line item 44B  Repos**  
Report the average rate paid for Securities Sold under agreements to repurchase as defined in the FR Y-9C, Schedule HC, item 14b.

**Line item 44C  Other Short Term Borrowing**  
Report the average rate paid on liabilities reported as other borrowed money and subordinated notes and debentures as defined in the FR Y-9C, Schedule HC, items 16 and items 19a which the firm defined as short term borrowings.

**Line item 45  Trading Liabilities**  
Report the average rate of Trading Liabilities as defined in the FR Y-9C, Schedule HC, item 15.

**Line item 46  Subordinated Notes Payable to Unconsolidated Trusts Issuing Trust Preferred Securities (TruPS) and TruPS Issued by Consolidated Special Purpose Entities**  
Report the average rate of Preferred Securities (TruPS) and TruPS Issued by Consolidated Special Purpose Entities as defined in the FR Y-9C, Schedule HC, item 19b.

**Line item 47  Other Interest-Bearing Liabilities**  
Report the average rate paid on the liabilities reported as other borrowed money and subordinated notes and debentures as defined in the FR Y-9C, Schedule HC, items 16 and 19a which the firm defined as Other Interest Bearing Liabilities.

**Line item 48  Total Interest Expense**  
This item is a shaded cell and is derived from sum of the products of items 34A and 42A, 34B and 42B, 34C and 42C, 34D and 42D, 34E and 42E, 35A and 43A, 35B and 43B, 36A and 44A, 36B and 44B, 36C and 44C, 37 and 45, 38 and 46, and 39 and 47, annualized.

**Line item 49  Total Net Interest Income**  
This item is a shaded cell and is derived from item 33 minus item 48. Amount should equal Worksheet 7.a, PPNR Submission Worksheet, item 13.
G.3—PPNR Metrics

The PPNR Metrics worksheet requests information on certain metrics relevant for the assessment of various components of PPNR. All metrics are required of all BHCs and IHCs, subject to applicable thresholds.

Metrics in Section A, "Metrics by Business Segment/Line," correspond to Business Segments/Lines on PPNR Submission worksheet. In contrast, Sections B and C are both for firm-wide metrics.

In providing industry market size information, BHCs and IHCs can use third party data and are not required to independently derive these metrics. Any supporting information should be described in detail, including the data source, and corresponding data should be provided in the worksheet. A BHC or IHC, if relying upon third party data for building projections, should still be cognizant of how their estimates would be appropriate across the range of assumed macro-economic conditions in various scenarios or if some adjustment may be appropriate. BHCs and IHCs should use internal definitions of proprietary trading and clearly describe the covered activities and transactions in methodology narratives.

If a BHC or IHC is unable to provide a metric on the PPNR Metrics worksheet, it should offer a data series for alternative metrics that are considered by the BHC or IHC in projecting the relevant component(s) of PPNR and include in the Supporting Documentation required with the FR-14A Projections a discussion of why the standard metric could not be provided.

A. Metrics by Business Segment/Line (unless specified otherwise, all numbers are global).

"Metrics by Business Segment/Line" correspond to Business Segments/Lines on the PPNR Submission Worksheet. This means that each metric is reflective of revenues reported on the PPNR Submission worksheet for a given business segment/line, unless explicitly stated otherwise.

Retail and Small Business Segment

Domestic
For line items 1 through 9, domestic includes U.S. and Puerto Rico only.

Credit and Charge Cards

Line item 1 Total Open Accounts – End of Period
Report number of total open accounts at the end of period for credit and charge cards.

Line item 2 Credit and Charge Card Purchase Volume
Report credit and charge card purchase volume, net of returns. Exclude cash and balance transfer volumes.

Line item 3 Credit and Charge Card Rewards/Partner Sharing Expense
Report credit card rewards/partner sharing expense for credit and charge cards.

In Footnote 23, list which line item(s) on PPNR Submission Worksheet contain(s) the Cards Rewards/Partner Sharing contra-revenues and/or expenses.

Note if this item includes any contra-revenues other than Rewards/Partner Sharing (e.g.
Marketing Expense Amortization) in footnote 34.

**Mortgages and Home Equity**

**Line item 4  Average Third-Party Residential Mortgages Serviced**
Report the average outstanding principal balance for residential mortgage loans the BHC or IHC services for others.

**Line item 5  Residential Mortgage Originations Industry Market Size – Volume**
Report total volume of domestic mortgages that originated during the quarter. A BHC or IHC would provide US industry-wide origination volume ($millions) for closed-end loans secured by first liens on 1 to 4 family residential properties during a given quarter. This would not include any home equity loans or lines of credit.

**Line item 6  Mortgages and Home Equity Sold During the Quarter**
Report first and junior lien mortgages and home equity loans sold during the quarter as defined in FR Y-9C, Schedule HC-P, items 3.a, 3.b, 3.c.(1), 3.c.(2). FR Y-9C name is "Residential Mortgages Sold During the Quarter"; this metric need not be limited to Mortgages and Home Equity business line.

**Line item 7  Servicing Expenses**
Report expenses for servicing first and junior lien mortgages and home equity loans. Include both direct and allocated expenses.

**Retail and Small Business Deposits**

**Line item 8  Total Open Checking and Money Market Accounts – End of Period**
Report only the number of checking and money market accounts that are deposit accounts under FR Y-9C guidance and are consistent with the definitions provided for “Retail and small business banking and lending services” segment and “Retail and small business deposits” business line within this segment in the PPNR instructions.

**Line item 9  Debit Card Purchase Transactions**
Report number of transactions (not dollar value).

**International Retail and Small Business**
International retail and small business located in regions outside the U.S. and Puerto Rico.

**Line item 10  Credit and Charge Card Revenues**
Provide metrics data for all quarters, but only if international retail and small business segment revenues exceeded 5% of total retail and small business segment and total retail and small business revenue exceeded 5% of total revenues in any of the last four actual quarters requested in the PPNR schedule.

**Investment Banking Segment**
Only firms that report greater than $100 million any quarter in item 16, Investment Banking, of Schedule G.1 (PPNR Submission) should report the investment banking metrics below (Lines 11 to 26).
Line item 11  Number of Employees
Report the number of full-time equivalent employees at end of current period as defined in the FR Y-9C, Schedule HI, Memorandum item 5, for investment banking segment.

Line item 12  Compensation – Total
Include both direct and allocated expenses for investment banking segment.

Line item 13  Stock Based Compensation and Cash Variable Pay
Include both direct and allocated expenses for investment banking segment.

Advisory

Line item 14  Deal Volume
Report the global dollar volume of all completed deals for the reporting BHC or IHC.

Line item 15  Industry Market Size - Fees
Report global fees earned by all relevant industry participants in this area.

Line item 16  Industry Market Size - Completed Deal Volume
Report the global dollar volume of completed deals for all relevant industry participants.

Line item 17  Backlog
A backlog should be based on probability weighted fees. The data should be consistent with historical internal reporting, not by market measurement. The last quarter should be the BHC’s or IHC’s latest backlog estimate. Backlog reporting is not required on a projections basis.

Equity Capital Markets

Line item 18  Deal Volume
Report the global dollar volume of all deals for the reporting BHC or IHC.

Line item 19  Industry Market Size – Fees
Report global fees earned by all relevant industry participants in this area.

Line item 20  Industry Market Size - Volume
Report global dollar volume of completed deals for all relevant industry participants.

Debt Capital Markets

Line item 21  Deal Volume
Report the global dollar volume of all deals for the reporting BHC or IHC.

Line item 22  Industry Market Size – Fees
Report global fees earned by all relevant industry participants in this area.

Line item 23  Industry Market Size – Volume
Report the global dollar volume of completed deals for all relevant industry participants.
Syndicated Lending

**Line item 24  Deal Volume**
Report the global dollar volume of all deals for the reporting BHC or IHC.

**Line item 25  Industry Market Size - Fees**
Report global fees earned by all relevant industry participants in this area.

**Line item 26  Industry Market Size - Volume**
Report the global dollar volume of completed deals for all relevant industry participants.

Sales and Trading Segment

**Line item 27  Number of Employees**
Report the number of full-time equivalent employees at end of current period as defined in the FR Y-9C, Schedule HI, Memorandum item 5, for sales and trading segment.

**Line item 28  Compensation – Total**
Include both direct and allocated expenses for sales and trading segment.

**Line item 29  Stock Based Compensation and Cash Variable Pay**
Include both direct and allocated expenses for sales and trading segment.

Equities

**Line item 30  Average Asset Balance**
Report average asset balance for the quarter of all mark-to-market assets associated directly with the equity sales and trading businesses.

Fixed Income

**Line item 31  Average Asset Balance**
Report average asset balance for the quarter of all mark-to-market assets associated directly with the fixed income sales and trading businesses.

Commodities

**Line item 32  Average Asset Balance**
Report average asset balance for the quarter of all mark-to-market assets associated directly with the commodities sales and trading businesses.

Prime Brokerage

**Line item 33  Average Client Balances**
Report gross client balances (adding credits, debits, and shorts) that are consistent with and drivers of prime brokerage revenues being reported on the PPNR schedule.
Line item 34  Transaction Volume  
Report total dollar volume of all transactions during the quarter.

Investment Management Segment

Asset Management

Line item 35  AUM – Total  
This item is a shaded cell and is derived from the sum of items 35A through 35C.

Line item 35A  AUM – Equities  
Report total assets under management for which the investment mandate/strategy is primarily equities.

Line item 35B  AUM – Fixed Income  
Report total assets under management for which the investment mandate/strategy is primarily fixed income.

Line item 35C  AUM – Other  
Report total assets under management for which the investment mandate/strategy cannot be classified as either Equities or fixed income. For example, include alternative investments, currency products, etc.

Line item 36 Net Inflows/Outflow  
Report impact of net inflows/outflows on assets under management.

Wealth Management/Private Banking

Line item 37  Fee Earning Client Assets – Total  
This item is a shaded cell and is derived from the sum of items 37A through 37C.

Line item 37A  Fee Earning Client Assets – Equities  
Report total Fee Earning client Assets invested directly or indirectly primarily in equities.

Line item 37B  Fee Earning Client Assets – Fixed Income  
Report total Fee Earning Client Assets invested directly or indirectly primarily in fixed income.

Line item 37C  Fee Earning Client Assets – Other  
Report total Fee Earning Client Assets for which the investment cannot be classified as either Equities or fixed income. For example, include some types of alternative investments, currency products, etc.

Line item 38  Net Inflows/Outflow  
Report impact of net inflows/outflows on Fee Earning Client Assets.

Line item 39  Number of Financial Advisors  
Provide a relevant headcount number (e.g. financial advisors, portfolio managers) to facilitate the assessment of revenue productivity in the Wealth Management/Private Banking business line.
Investment Services Segment

Asset Servicing

Line item 40  Assets under Custody and Administration
Report total assets under custody and administration as of the end of the quarter.

B. Firm Wide Metrics: PPNR Projections Worksheet

Line item 41  Number of Employees
Report the number of full-time equivalent employees at end of current period as defined in the FR Y-9C, Schedule HI, Memorandum item 5.

Line item 42  Revenues - International
This item is a shaded cell and is derived from the sum of items 42A through 42D. These items are based on holding company consolidated reporting and not on legal-entity basis.

Line item 42A  Revenues - APAC
Provide Asia and Pacific (includes South Asia, Australia, and New Zealand) region breakouts for all quarters, but only if international revenue exceeded 5% of the total revenue in any of the last four actual quarters requested in the PPNR schedule. For specific country assignments, use internal definitions.

Line item 42B  Revenues - EMEA
Provide Europe, Middle East, and Africa region breakouts for all quarters, but only if international revenue exceeded 5% of the total revenue in any of the last four actual quarters requested in the PPNR schedule. For specific country assignments, use internal definitions.

Line item 42C  Revenues - LatAm
Provide Latin America, including Mexico region breakouts for all quarters, but only if international revenue exceeded 5% of the total revenue in any of the last four actual quarters requested in the PPNR schedule. For specific country assignments, use internal definitions.

Line item 42D  Revenues - Canada
Provide Canada region breakouts for all quarters, but only if international revenue exceeded 5% of the total revenue in any of the last four actual quarters requested in the PPNR schedule.

Line item 43  Revenues - Domestic
This item is a shaded cell and is derived from PPNR Submission Worksheet item 27 less item 42. The item will capture all revenues so long as international revenues do not exceed 5% of total revenue in any of the last four actual quarters requested in the PPNR schedule.

Line item 44  Severance Costs
In Footnote 14, list items on PPNR Submission worksheet that include this item if any.

Line item 45  Collateral Underlying Operating Leases for Which the Bank is the Lessor
This item is a shaded cell and is derived from the sum of items 45A and 45B. Refers to the balance sheet carrying amount of any equipment or other asset rented to others under operating leases, net of accumulated depreciation. This item should correspond to the amount provided in the FR Y-9C, Schedule HC-F item 6 (see item 13 in the instructions).
amount included should only reflect collateral rented under operating leases and not include collateral subject to capital/financing type leases.

**Line item 45A  Auto**
Report the carrying amount of automobiles rented to others under operating leases, net of accumulated depreciation. The amount reported should only reflect collateral rented under operating leases and should not include collateral subject to capital/financing type leases.

**Line item 45B  Other**
Report the carrying amount of any equipment or other assets (other than automobiles) rented to others under operating leases, net of accumulated depreciation. The amount reported should only reflect collateral rented under operating leases and should not include collateral subject to capital/financing type leases.

**Line item 46  OREO Balance**
This item is a shaded cell and is derived from the sum of items 46A through 46C. Reporting of OREO items on FR Y-14Q PPNR Metrics is expected to be consistent with reporting of OREO items on FR Y-14A PPNR Metrics worksheet which sources the data directly from FR Y-14A Balance Sheet worksheet. Thus, reporting of OREO items on FR Y-14Q PPNR Metrics worksheet is consistent with reporting of OREO items on FR Y-14A Balance Sheet worksheet.

**Line item 46A  Commercial**
Report the net book value of all other real estate owned in the form of, or for which the underlying real estate consists of, commercial real estate.

**Line item 46B  Residential**
Report the net book value of all other real estate owned in the form of, or for which the underlying real estate consists of, residential real estate.

**Line item 46C  Farmland**
Report the net book value of all other real estate owned in the form of, or for which the underlying real estate consists of, farmland.

**Line item 47  Non-Recurring PPNR Items**
Report the total income statement impact of all material non-recurring and infrequent items. Examples of such items include gains or losses on sales of business lines, gains or losses on extinguishment of debt, gains or losses on mergers/joint ventures, etc. Break out and explain these excluded items in footnote 32.

**Line item 48  Trading Revenue**
Report trading revenue as defined in the FR Y-9C, Schedule HI, item 5.c.

**Line item 49  Net Gains/(Losses) on Sales of Other Real Estate Owned**
Report trading revenue as defined in the FR Y-9C, Schedule HI, item 5.j.

In Footnote 19, list business segments reported on PPNR Submission Worksheet that include this item, if any.
C. **Firm Wide Metrics: Net Interest Income Worksheet** (Required only for BHCs or IHC’s that were required to complete the Net Interest Income Worksheet)

**Line item 50  Carrying Value of Purchased Credit Impaired (PCI) Loans**
Report trading revenue as defined in the FR Y-9C, Schedule HC-C, memorandum item M.5.b.

**Line item 51  Net Accretion of discount on PCI Loans included in interest Revenues**
Report the net accretion of discount on PCI loans included in net interest income as included on the PPNR Submission Worksheet and Net Interest Income Worksheet.

**Line item 52  Loans Held for Sale – First Lien Residential Liens in Domestic Offices (Average Balances)**
Report average balance of first lien residential loans held for sale as included in the Net Interest Income Worksheet.

**Line item 53  Average Rate on Loans Held for Sale – First Lien Residential Liens in Domestic Offices**
Report average rate paid on first lien residential loans held for sale as included in the Net Interest Income Worksheet.

**Quarter End Weighted Average Life of Assets**
The Weighted Average Life (WAL) should reflect the current position, the impact of new business activity, as well as the impact of behavioral assumptions such as prepayments or defaults, based on the expected remaining lives, inclusive of behavioral assumptions. It should reflect the weighted average of time to principal actual repayment (as modeled) for all positions in that portfolio, rounded to the nearest monthly term. For revolving products, the WAL should reflect the underlying repayment behavior assumptions assumed by the institution, which would include contractual repayments, any assumed excess payments or prepayments, and defaults. The WAL for the FR Y-14Q disclosures should reflect the spot balance sheet position for each time period. The WAL should be reflective of the timing assumed by the institutions for those assets/liabilities trading portfolios to be held on the balance sheet and not at the individual position level. For the FR Y-14A, given that it covers forecasted time periods, the WAL should be forward-looking which incorporates the changes to the projected WAL, including new business activity. Reference the PPNR Net Interest Income worksheet for product definitions.

**Line item 54  First Lien Residential Mortgages (in Domestic Offices)**
Report the quarter end weighted average life of domestic first lien residential mortgages (as defined in the FR Y-9C, Schedule HC-C, item 1.c.(2)(a), column B).

**Line item 55  Closed-End Junior Residential Liens (in Domestic Offices)**
Report the quarter end weighted average life of domestic closed-end junior residential liens (as defined in the FR Y-9C, Schedule HC-C, item 1.c.(2)(b), column B).

**Line item 56  Home Equity Lines Of Credit (HELOCs)**
Report the quarter end weighted average life of domestic home equity lines of credit (as defined in the FR Y-9C, Schedule HC-C, item 1.c.(1), column B).

**Line item 57  C&I Loans**
Report the quarter end weighted average life of C&I Graded, Small Business (Scored/Delinquency Managed), Corporate Card, and Business Card loans.
Line item 58  CRE Loans (in Domestic Offices)
Report the quarter end weighted average life of domestic CRE loans (as defined in the FR Y-9C, Schedule HC-C, the sum of items 1.a.(1), 1.a.(2), 1.d., 1.e.(1) 1.e.(2)), Column B.

Line item 59  Credit Cards
Report the quarter end weighted average life of credit cards (as defined in the FR Y-9C, Schedule HC-C, item 6.a., column A).

Line item 60  Auto Loans
Report the quarter end weighted average life of auto loans (as defined in the FR Y-9C, Schedule HC-C, item 6.c., column A).

Line item 61  Student Loans
Report the quarter end weighted average life of student loans.

Line item 62  Other, incl. loans backed by securities (non-purpose lending)
Report the quarter end weighted average life of Other Consumer Loans, incl. loans backed by securities (non-purpose lending).

Line item 63  Residential Mortgages (First and Second Lien, Not in Domestic Offices)
Report the quarter end weighted average life of all residential mortgages (first and second lien) not in domestic offices.

Line item 64  Other Real Estate Loans (Not in Domestic Offices)
Report the quarter end weighted average life of other real estate loans not in domestic offices.

Line item 65  Other Loans & Leases
Report the quarter end weighted average life of other loans and leases. Include loans secured by farmland (as defined in the FR Y-9C, Schedule HC-C, item 1.b, column B), and other loans not accounted for in the above categories.

Line item 66  Securities (AFS and HTM) - Treasuries and Agency Debentures
Report the quarter end weighted average life of AFS/HTM balances in Treasury and Agency Debentures (as defined in the FR Y-9C, Schedule HC-B, items 1, 2.a and 2.b, columns A and D). The WAL reporting items (items 66-68) on PPNR Metrics within the Summary Schedule is intended to reflect the weight average remaining life for the reported period. The number is to reflect both the weighted average life of the current positions as well as the impact of assumed new business.

Line item 67  Securities (AFS and HTM) - Agency RMBS (both CMOs and pass-throughs)
Report the quarter end weighted average life of AFS/HTM balances in Agency RMBS (as defined in the FR Y-9C, Schedule HC-B, items 4.a.(1), 4.a.(2), 4.b.(1) and 4.b.(2), columns A and D). The WAL reporting items (items 66-68) on PPNR Metrics within the Summary Schedule is intended to reflect the weight average remaining life for the reported period. The number is to reflect both the weighted average life of the current positions as well as the impact of assumed new business.

Line item 68  Securities (AFS and HTM) - Other
Report the quarter end weighted average life of all other AFS/HTM (defined in the FR Y-9C, Schedule HC, as items 2.a and 2.b less PPNR Metrics Worksheet line items 66 & 67). The WAL reporting items (items 66-68) on PPNR Metrics within the Summary Schedule is intended to reflect the weight average remaining life for the reported period. The number is to reflect both the weighted average life of the current positions as well as the impact of assumed new business.
**Line item 69  Trading Assets**
Report the quarter end weighted average life of trading assets (as defined in the FR Y-9C, Schedule HC-K, item 4.a.). For trading assets, WAL should be reflective of the timing assumed by the institutions for those assets to be held on the balance sheet and not necessarily the duration of the underlying positions.

**Line item 70  All Other Earning Assets**
Report the quarter end weighted average life of all other interest-bearing assets not accounted for in the above categories.

**Quarter End Weighted Average Life of Liabilities**
The Weighted Average Life (WAL) should reflect the current position, the impact of new business activity, as well as the impact of behavioral assumptions such as prepayments or defaults, based on the expected remaining lives, inclusive of behavioral assumptions. It should reflect the weighted average of time to principal actual repayment (as modeled) for all positions in that portfolio, rounded to the nearest monthly term. For revolving products, the WAL should reflect the underlying repayment behavior assumptions assumed by the institution, which would include contractual repayments, any assumed excess payments or prepayments, and defaults. The WAL for the FR Y-14Q disclosures should reflect the spot balance sheet position for each time period. For the FR Y-14A, given that it covers forecasted time periods, the WAL should be forward-looking which incorporates the changes to the projected WAL, including new business activity. Reference PPNR Net Interest Income worksheet for product definitions.

**Line item 71  Domestic Deposits – Time**
Report the quarter end weighted average life for Domestic Time Deposits (using internal definitions).

**Line item 72  Foreign Deposits – Time**
Report the quarter end weighted average life of Foreign Time Deposits (using internal definitions).

**Line item 73  Fed Funds**
Report the quarter end weighted average life of Fed Funds purchased in domestic offices (as defined in the FR Y-9C, Schedule HC, item 14.a.).

**Line item 74  Repos**
Report the quarter end weighted average life of Securities sold under agreement to repurchase (as defined in the FR Y-9C, Schedule HC, item 14.b.).

**Line item 75  Other Short Term Borrowing**
Report the quarter end weighted average life of liabilities reported as other borrowed money and subordinated notes and debentures (as defined in the FR Y-9C, Schedule HC, items 16. and 19.a., of which the firm would define as short term borrowings).

**Line item 76  Trading Liabilities**
Report the weighted average life of Trading Liabilities (as defined in the FR Y-9C, Schedule HC, item 15.). For trading liabilities, WAL should be reflective of the timing assumed by the institutions for those assets to be held on the balance sheet and not necessarily the duration of the underlying positions.
Line item 77  Subordinated Notes Payable to Unconsolidated Trusts Issuing TruPS and TruPS Issued by Consolidated Special Purpose Entities
Report the quarter end weighted average life of Preferred Securities (TruPS) and TruPS Issued by Consolidated Special Purpose Entities (as defined in the FR Y-9C, Schedule HC, item 19.b.).

Line item 78  All Other Interest Bearing Liabilities
Report the quarter end weighted average life of all long-term debt not included in line item 77 above.

Average Domestic Deposit Repricing Beta
Domestic deposit repricing is rate movement in an environment where the repricing assumption assumed by each of the major deposit products is not restricted by a cap, floor, or zero. Beta should be reported as the balance-weighted average of the betas of the line items that contribute to the roll up point requested, with an as-of-date equal to the reporting date. The beta should be the beta utilized for forecasting purposes ‘normal environment’.

For the balance-weighted average beta, each deposit category should be reported using a blend of brokered and retail deposits. Beta refers to the average repricing response rate the firm projects for each of the deposit products relative to movements in interest rates.

The betas for line items 79 through 82 should be reported in basis points (bp) and reflect movement in the yield curve, either up or down in relationship to an assumed 100 bps movement. For beta-related line items 79 to 84 on the PPNR Metrics template, a negative number can be reported in the downward rate movements. However, a negative would be indicating that the firm is projecting an “increase” in the beta when rates movements are down.

Line item 79  Money Market Accounts
Report (in basis points) the balance-weighted average beta of domestic money market accounts (using internal definitions for this product).

Line item 80  Savings
Report (in basis points) the balance-weighted average beta of domestic savings accounts (using internal definitions for this product).

Line item 81  NOW, ATS, and other Transaction Accounts
Report (in basis points) the balance-weighted average beta of Negotiable Order of Withdrawal (NOW), Automatic Transfer Service (ATS), and other transaction accounts (using internal definitions for these products).

Line item 82  Time Deposits
Report (in basis points) the balance-weighted average beta of time deposits (using internal definitions for this product).

Average Foreign Deposit Repricing Beta
Foreign deposit repricing is rate movement in an environment where the repricing assumption assumed by each of the major deposit products is not restricted by a cap, floor, or zero. Beta should be reported as the balance-weighted average of the betas of the line items that contribute to the roll up point requested, with an as-of-date equal to the reporting date.

For the balance-weighted average beta, each deposit category should be reported using a blend of
brokered and retail deposits. Beta refers to the average repricing response rate the firm projects for each of the deposit products relative to movements in interest rates.

The beta ratios for line items 83 through 84 should be reported in basis points (bp) movement in the yield curve, either up or down in relationship to an assumed 100 bps movement.

**Line item 83  Foreign Deposits**
Report (in basis points) the balance-weighted average beta of foreign deposits (using internal definitions for this product).

**Line item 84  Foreign Deposits-Time**
Report (in basis points) the balance-weighted average beta of foreign time deposits (using internal definitions for this product). It is appropriate to report this item as a “balance-weighted average beta of foreign time deposits.

**Line item 85  New Domestic Business Pricing for Time Deposits**
New business pricing for time deposits refers to the anticipated average rate on newly issued time deposits, including renewals. Given that time deposits have a stated maturity, all time deposits issued for that time period are considered new business. The worksheet is requesting re-pricing beta under normal rate scenarios for both an upward and downward rate movement.

**Line item 85A  Curve (if multiple terms assumed)**
Report the primary reference curve used by the firm for pricing time deposits.

If more than one curve for the pricing of time deposits is used, the curve used to price the majority of the time deposits should be noted on the schedule and additional pricing information should be provided in the supplementary information. If the institution only assumes a single maturity term for new issuance, then the institution should provide the relative index (line item 85B) and spread used to estimate new business pricing in lieu of the curve (line item 85C).

The term “curve” refers to the reference rate used to price time deposits. Given that the pricing of time deposits is dependent on the term, the institution should provide the overall curve used to price time deposits.

**Line item 85B  Index Rate (if single term assumed)**
Report the index (e.g., “30 day LIBOR”) used to price time deposits when a single maturity term for new issuances is assumed. The index should be the one to which the beta in line item 82 is applied.

**Line item 85C  Spread relative to the Index Rate**
Report the weighted average spread used to price time deposits above the index rate when a single maturity term for new issuances is assumed.
Schedule H—Wholesale Risk

H.1 - Corporate Loan Data Schedule

The Corporate Loan Data Schedule collects loan level detail on corporate loans and leases. The data collection has two sections: (1) Loan and Obligor Description section (Fields 1 through 51, and Fields 83 through 101), which collects information related to the obligor and the loan itself; and (2) Obligor Financial Data section (Fields 52 through 82), which collects data related to the financial health of the obligor or the entity that is the primary source of repayment for the loan. Both sections are completed at a loan level detail.

A. Loan Population

The loan population includes corporate loans and leases that are held for investment (HFI) (as defined in the FR Y-9C, Schedule HC-C General Instructions) and held for sale (HFS) as of the report date (i.e. quarter end). Include HFI and HFS loans that the holding company has elected to report at fair value under the fair value option. Exclude all loans and leases classified as trading (reportable on the FRY-9C, Schedule HC, item 5).

Include all corporate loans that are at the consolidated Bank Holding Company (BHC) and Intermediate Holding Company (IHC) level and not just those of the banking subsidiaries, as well as any unused commitments that are reported on Schedule HC-L that would be reported in the relevant FR Y-9C category (as outlined below) if such loans were drawn (including all undrawn commitments extended to non-consolidated variable interest entities and commitments to commit as defined in the FR Y-9C). Exclude informal “advised lines” (i.e., a revocable commitment by the bank to lend funds for up to a specified period of time, usually one year, sometimes referred to as a guidance line) from commitments.

Report potential exposures from the syndicated loan pipeline including exposures where the BHC or IHC has signed a commitment letter and has extended terms to the borrower, even if the borrower has not countersigned the commitment letter (i.e. single signed commitment). Commitments are to be reported regardless of whether they contain “material adverse change” clauses or other provisions that are intended to relieve the BHC or IHC of its funding obligations under certain conditions.

In addition to corporate loans and leases that are currently active as of the reporting date, the loan population should also include corporate loans and leases that were disposed of during the reporting quarter. For purposes of this schedule, refer to Field 98 (Disposition Flag) for specific instructions on instances of disposed corporate loans and leases.

The loan population is limited to corporate loans and leases with a committed balance greater than or equal to $1 million. Although corporate loans and leases with a committed balance under $1 million are not reported on the FR Y-14Q Corporate Loans Schedule, the sum of the outstanding balance of these loans would be included in the relevant fields on the FR Y-14Q Supplemental Schedule and the FR Y-14A Summary Schedule pursuant to the instructions for those schedules.

In general, use loan classifications on the FR Y-9C, Schedule HC-C as a guide in determining the population of corporate loans and leases. Refer to the FR Y-9C, Schedule HC-C instructions for specific guidance on loan classifications. In determining loan classifications on the FR Y-14Q Corporate Loan Data Schedule, look to the security, borrower, or purpose of the loan. Below is a list of FR Y-9C, Schedule HC-C categories that are considered corporate loans:

184
1) Loans to U.S. banks and other U.S. depository institutions (FR Y-9C, Schedule HC-C, item 2.a);
2) Loans to foreign banks (FR Y-9C, Schedule HC-C, item 2.b);
3) Loans to finance agricultural production and other loans to farmers (FR Y-9C, Schedule HC-C, item 3);
4) Commercial and industrial loans to U.S. addresses (FR Y-9C, Schedule HC-C, item 4.a);
5) Commercial and industrial loans to non-U.S. addresses (FR Y-9C, Schedule HC-C, item 4.b);
6) Loans to foreign governments and official institutions (including foreign central banks) (FR Y-9C, Schedule HC-C, item 7);
7) Loans to non-depository financial institutions (FR Y-9C, Schedule HC-C, item 9.a);
8) All other loans, excluding consumer loans (FR Y-9C, Schedule HC-C, item 9.b(2));
9) All other leases, excluding consumer leases (FR Y-9C, Schedule HC-C, item 10.b);
10) Loans secured by owner-occupied nonfarm nonresidential properties originated in domestic offices (FR Y-9C, Schedule HC-C, item 1.e(1)); and
11) Loans secured by owner-occupied nonfarm nonresidential properties originated in non-domestic offices (reported within FR Y-9C, Schedule HC-C, item 1).

Report loans secured by owner-occupied nonfarm nonresidential properties on the FR Y-14Q Corporate Loans Schedule, even if they are cross-collateralized with a loan reported on the FR Y-14Q Commercial Real Estate Schedule. Loans secured by owner-occupied nonfarm nonresidential properties are those nonfarm nonresidential property loans for which the primary source of repayment is the cash from the ongoing operations and activities conducted by the party, or an affiliate of the party, who owns the property. Thus, for loans secured by owner-occupied nonfarm nonresidential properties, the primary source of repayment is not derived from third party, nonaffiliated, rental income associated with the property (i.e., any such rental income is less than fifty percent (50%) of the source of repayment) or the proceeds of the sale, refinancing, or permanent financing of the property. Consequently, such loans are considered corporate loans rather than commercial real estate loans.

Exclude small business loans from the loan population as they are reportable on the FR Y-14Q US Small Business Schedule and the International Small Business Schedule. The main differentiating factor between corporate loans and small business loans is how the consolidated holding company evaluates the creditworthiness of the borrower. For corporate lending, banks look at the commercial operations process (commercial grading or internal risk rating) to assess credit risk. Therefore, corporate loans are loans that are “graded” or “rated” using the consolidated holding company’s commercial credit rating system, as it is defined in the consolidated holding company’s normal course of business. Meanwhile, for small business lending, banks look at the credit score of the borrower (scored rating) and/or use delinquency management. Therefore, small business loans are loans that are “scored” or “delinquency managed” for which a commercial internal risk rating is not used or that uses a different scale than other corporate loans.

Report non-purpose loans reportable in the relevant FR Y-9C, Schedule HC-C categories outlined above and in Field 26 ‘Line Reported on FR Y-9C’ regardless of whether those loans are “graded.” For purposes of this schedule, non-purpose loans are loans collateralized by securities made for any purpose other than purchasing or carrying securities.

Exclude unplanned overdrafts (as defined in the FR Y-9C, Schedule HC-C, item 9).

Exclude domestic and international business and corporate credit card or charge card loans included in the FR Y-14Q/M, Credit Card Data Collections (see the FR Y-14M, Credit Card Data Collection Data Dictionary for the definition of business and corporate credit card or charge card loans). For example, if there is any individual liability associated with the sub-lines such that individual borrower characteristics are taken into account during the underwriting decision, and/or performance on the credit is reported to the credit bureaus,
the loan should be reported on the FR Y-14Q/M Credit Card Data Collections. Alternatively, loans with a committed balance greater than $1 million for which a commercially-graded corporation is ultimately responsible for repayment of credit losses incurred should be reported in the FR Y-14Q Corporate Loan schedule.

The population of loans should be reported at the credit facility level. For purposes of this collection, a credit facility is defined as a credit extension to a legal entity under a specific credit agreement. A credit facility may be secured or unsecured, term or revolving, drawn or undrawn (excluding informal advised lines). The credit facility may also allow for multiple extensions of credit (or draws) with unique borrowing terms such as interest rate or repayment date; however, ultimately the aggregation of such extensions of credit are governed under one common credit agreement. Descriptions of typical credit facility types are outlined in Field 20. The $1 million dollar reporting threshold applies to any set of commitments where the sum of those commitments, governed under one common credit agreement, is greater than or equal to $1 million. These criteria are the same for all extensions of credit and all types of standby letters of credit. Corporate borrowers may also have multiple facilities from the same bank. Each facility should be reported separately, but multiple draws within a facility should be consolidated at the facility level. If a borrower has more than one legally separate credit facility each with a committed amount of less than $1 million, those facilities would be excluded from the Corporate Loans Data collection even if they are cross defaulted and/or cross collateralized.

Credit facilities containing loans which fall under one or more of the FR Y-9C line items outlined above should be reported on the FR Y-14Q Corporate Loan Data schedule at the credit facility level. For credit facilities also containing loans reported on FR Y-9C line items not outlined above, the underlying loans should be aggregated and reported on the respective FR Y-14Q schedules based on the relevant schedule instructions. For example, consider a credit facility which has the following underlying loan commitments:

- Loan 1: $2 million committed balance reported on FR Y-9C, Schedule HC-C, item 4.a
- Loan 2: $1 million committed balance reported on FR Y-9C, Schedule HC-C, item 4.b
- Loan 3: $500,000 committed balance reported on FR Y-9C, Schedule HC-C, item 1.e(1)
- Loan 4: $500,000 committed balance reported on FR Y-9C, Schedule HC-C, item 1.d

The BHC or IHC should aggregate loans 1, 2, and 3 and report one facility with a $3.5 million committed balance on the FR Y-14Q Corporate Loan schedule and one facility with a $500,000 committed balance on the FR Y-14Q Commercial Real Estate schedule. **Note that all loans within the facility are reported, including those under the credit facility threshold.** In the above example, the $500,000 committed balance is reported on the FR Y-14Q CRE schedule because of the overall facility commitment is greater than $1 million.

**B. Reporting Specifications**

Consistent with the FR Y-9C, report all loans net of charge-offs, fair value adjustments (FVA) and ASC 310-30 (originally issued as SOP 03-3) adjustments, if applicable, but gross of ASC 310-10 (originally issued as FAS 114 Accounting by Creditors for Impairment of a Loan) reserve amounts. Charge-offs, FVA, ASC 310-10 reserve amounts, and ASC 310-30 adjustments should be reported separately in the designated fields (28, 30, 31, 84, and 85 respectively).

Once a credit facility is closed and settled (Option ‘4’ in Field 100), all dollar amounts in the Loan and Obligor Description section should represent only the consolidated holding company’s pro-
rata portion of any syndicated or participated loan.

The loan population also includes credit facilities which include a fronting exposure. Fronting exposures are those that represent a BHC’s or IHC’s exposure to fund certain obligations (e.g., swingline or letters of credit) on behalf of other participant lenders. For such exposures, BHCs and IHCs should indicate Option 18 in Field 20 ‘Credit Facility Type’ and report their pro-rata portion of the stated commitment amount as one facility to the borrower and the fronting obligations as separate credit facilities to each of the lending group participants. For example, consider a facility with $400 million committed balance where the BHC or IHC is the agent bank and the BHC’s or IHC’s pro-rata share of the commitment is 10% or $40 million. Assume further that the credit facility contains a $50 million sublimit that the BHC or IHC, as agent, has an obligation to advance on behalf of lending group participants which may include swinglines, letters of credit and other fronting obligations. In this example, the agent BHC or IHC would report a $40 million pro-rata commitment as one credit facility to the borrower and would report 90% of the $50 million sublimit (or $45 million) as separate pro-rata credit facilities to the lending group participants.

All amounts should be reported in US dollars.

C. Obligor Financial Data Section Instructions

Fields 52 through 82 (Obligor Financial Data section), must be reported for all corporate loans and leases as of the report date, excluding loans with:

(i) An obligor domiciled (as defined in the FR Y-9C Glossary entry for “domicile”) outside of the US (Field 6);
(ii) An obligor with a NAICS code beginning with 52 (Finance and Insurance), or 5312 (Real Estate Agents and Brokers), or 551111 (Offices of Bank or Intermediate Holding Companies);
(iii) An obligor that is a nonprofit organization or federal, state, or local government or related agencies; or
(iv) An obligor that is a Natural Person (including individuals doing business as (DBA) another entity where the primary source of repayment analyzed is the personal credit of the natural person behind the DBA).

For loans that meet the exclusions above, Fields 52 through 82 should be left blank. The exclusions outlined above for the Obligor Financial Data section are at the obligor or primary source of repayment entity level.

The Obligor Financial Data Section relates to the legal entity that provides the primary source of repayment for the credit facility identified in Field 15. If the legal entity used by underwriting as the primary source of repayment is different from the legal entity actually making the payment, report the Obligor Financial Data Section for the entity used by underwriting. Note, the legal entity that provides the primary source of repayment will generally be different from the guarantor, which provides secondary support for repayment. Information related to the guarantor should be reported in Fields 44 through 48 of the Loan and Obligor Description section.

If this legal entity that provides the primary source of repayment is the same as the Obligor identified in Field 2, the Obligor Financial Data Section should reflect financial information of that Obligor and Fields 49 through 51 and Field 95 should be left blank. However, if the primary source of repayment is provided by an entity that is different than the Obligor identified in Field 2, the entity should be identified in Fields 49-51 and Field 95 and the Obligor Financial Data section should reflect the financial information for this entity. All other Obligor Fields reported in the Loan and Obligor Description section should continue to reflect the Obligor identified in Field 2.

For a credit facility for which there is no clear predominant borrower that serves as the primary
source of repayment, the Obligor Financial Data Section should reflect the financial information of the entity that best represents the credit repayment capacity for the credit facility. For loans secured by owner occupied real estate for which the primary source of repayment is an operating company that occupies the real estate and is an affiliate of the property company which owns the property, the Obligor Financial Data Section should reflect the financial information of the operating company.

Data in Fields 54 through 82 should be reported or calculated in accordance with GAAP standards. Note descriptions in the Obligor Financial Data Section provide guidance on what should be reported in each field based on commonly-used definitions; unless otherwise instructed, a reporting bank should report the Fields as defined by its financial spreading systems (i.e., software programs on which the BHC or IHC spreads and analyzes the financial statements of its customers) in accordance with its credit policy. The financial statement data fields should be populated with the most recent financial statement data available as of the report date (i.e. the most recent financial data found in the consolidated holding company's financial spreading system as of the report date) and should not be bound by financial statement data that was used in the consolidated holding company's most recent formal rating review.

Fields 54, 56, 57, 58, 59, and 82 should be reported for the most recently available trailing twelve month (TTM) period, with the ending date indicated in Field 52. If an obligor lacks trailing twelve months of financial information sufficient for Fields 54, 56, 57, 58, 59, and 82, provide the underwritten annual information for Fields 54, 56, 57, 58, 59 and 82, with the ending date indicated in Field 52. Fields 55 and 60 should be reported for the TTM period ended one year prior to the date indicated in Field 52. If an obligor lacks trailing twelve months of financial information sufficient for Fields 55 and 60, provide the underwritten annual information for Fields 55 and 60, with the ending date one year prior to the date indicated in Field 52.

Data Format

Data should be provided in a single extensible markup language file (.xml). No quotation marks should be used as text identifiers. Do not provide a header row or a row count. This file will contain one record per active loan in the contributor's inventory.

For fields that the schedule specifies as a date, but the XSD specifies as a datetime, provide T00:00:00 as the time.

D. Corporate Loan Data Fields

The table on the following pages shows the fields that should be contained in the submission file. Report all fields with data as of the report date. For corporate loans and leases disposed of during the quarter, report all fields as of the date of disposition, unless otherwise instructed in individual field descriptions.
<table>
<thead>
<tr>

H.2 – Commercial Real Estate Schedule

A. Loan Population

The loan population includes Commercial real estate (CRE) loans and leases that are held for investment (HFI) (as defined in the FR Y-9C, Schedule HC-C General Instructions) and held for sale (HFS) as of the report date (i.e. quarter end). Include HFI and HFS loans that the holding company has elected to report at fair value under the fair value option. Exclude all loans and leases classified as trading (reportable on the FR Y-9C, Schedule HC, item 5).

CRE loans and leases are defined as loan commitments or credit facilities to an obligor as defined in the credit agreement. Include all CRE loans and leases that are at the consolidated Bank Holding Company (BHC) and Intermediate Holding Company (IHC) level and not just those of the banking subsidiaries, as well as any unused commitments that are reported in Schedule HC-L that would be reported in the relevant FR Y-9C category (as outlined below) if such loans were drawn (including all undrawn commitments extended to non-consolidated variable interest entities and commitments to commit as defined in the FR Y-9C).

In addition to CRE loans that are currently active as of the reporting date, the loan population should also include CRE loans that were disposed of during the reporting quarter. For purposes of this schedule, refer to Field 61 (Disposition Flag) for specific instructions on instances of disposed CRE loans to leases.

Include all CRE loans and leases with a committed balance greater than or equal to $1 million. Although certain CRE loans and leases with a committed balance under $1 million are not reported on the FR Y-14Q CRE schedule, the sum of the outstanding balance of these loans would be included in the relevant fields on the FR Y-14Q Supplemental Schedule and the FR Y-14A Summary Schedule pursuant to the applicable instructions of those schedules.

All CRE loans included in this schedule must be secured by real estate (as defined in the FRY-9C Glossary entry for "loans secured by real estate"). Loans to finance CRE but not secured by CRE do not meet the definition of "loans secured by real estate" and should not be reported on the CRE Schedule. For example, a line of credit issued for the purpose of acquiring real estate that is not currently secured by real estate would not be considered secured by real estate for purposes of this Schedule. In this case, the commitment is an unsecured corporate loan until the balance is actually lent out and secured by CRE property. At that point, the commitment becomes a CRE loan for purposes of this Schedule.

In general, use loan classifications on the FR Y-9C, Schedule HC-C as a guide to determining the population of CRE loans and leases. Refer to the FR Y-9C, Schedule HC-C instructions for specific guidance on loan classifications. In determining loan classifications, look to the security, borrower, or purpose of the loan. Below is a list of FR Y-9C, Schedule HC-C categories of loans secured by real estate that are considered CRE loans and leases:

i. 1-4 family residential construction loans originated in domestic offices (FR Y-9C, Schedule HC-C, item 1.a(1)) and in non-domestic offices (reported within FR Y-9C, Schedule HC-C, item 1);

ii. Other construction loans and all land development and other land loans originated in domestic offices (FR Y-9C, Schedule HC-C, item 1.a(2)) and in non-domestic offices (reported within FR Y-9C, Schedule HC-C, item 1);

iii. Loans secured by multifamily (5 or more) residential properties originated in domestic offices (FR Y-9C, Schedule HC-C, item 1.d) and in non-domestic offices (reported within FR Y-9C, Schedule HC-C, item 1);

iv. Loans secured by other nonfarm nonresidential properties originated in domestic offices (FR Y-9C, Schedule HC-C, item 1.e(2)) and in non-domestic offices (reported within FR Y-9C, Schedule
Loans secured by owner-occupied nonfarm nonresidential properties should be reported on the FR Y-14Q Corporate Loans Schedule. Loans secured by owner-occupied nonfarm nonresidential properties are those nonfarm nonresidential property loans for which the primary source of repayment is the cash from the ongoing operations and activities conducted by the party, or an affiliate of the party, who owns the property. Thus, for loans secured by owner-occupied nonfarm nonresidential properties, the primary source of repayment is not derived from third party, nonaffiliated, rental income associated with the property (i.e., any such rental income is less than fifty percent (50%) of the source of repayment) or the proceeds of the sale, refinancing, or permanent financing of the property. Consequently, such loans are considered corporate loans rather than CRE loans.

The population of loans should be reported at the credit facility level. For purposes of the CRE Schedule, a credit facility is defined as a credit extension to a legal entity under a specific credit agreement. The credit facility may allow for multiple extensions of credit (or draws) with unique borrowing terms such as interest rate or repayment date; however, ultimately, the aggregation of such extensions of credit are governed under one common credit agreement. The $1 million dollar reportability threshold applies to any set of commitments where the sum of those commitments, governed under one common credit agreement, is greater than or equal to $1 million. These criteria are the same for all extensions of credit. Borrowers may have multiple facilities from the same bank. Each facility should be reported separately, but multiple draws within a facility should be consolidated at the facility level.

Credit facilities containing loans which fall under one or more of the FR Y-9C line items outlined above should be reported on the FR Y-14Q CRE schedule at the credit facility level. For credit facilities also containing loans reported on FR Y-9C line items not outlined above, the underlying loans should be aggregated and reported on the respective FR Y-14Q schedules based on the relevant schedule instructions. For example, consider a credit facility which has the following loans:

- **Loan 1**: $2 million committed balance reported on FR Y-9C, Schedule HC-C, item 4.a
- **Loan 2**: $1 million committed balance reported on FR Y-9C, Schedule HC-C, item 4.b
- **Loan 3**: $500,000 committed balance reported on FR Y-9C, Schedule HC-C, item 1.e(1)
- **Loan 4**: $500,000 committed balance reported on FR Y-9C, Schedule HC-C, item 1.d

The BHC and IHC should aggregate loans 1, 2, and 3 and report one facility with a $3.5 million committed balance on the FR Y-14Q Corporate Loan schedule and one facility with a $500,000 committed balance on the FR Y-14Q Commercial Real Estate schedule. **Note that all loans within the facility are reported, including those under the credit facility threshold.** In the above example, the $500,000 committed balance is reported on the FR Y-14Q CRE schedule because of the overall facility commitment is greater than $1 million.

**B. Instructions for Cross Collateralized Loans**

As discussed above, the entire Schedule should be completed for CRE loans with a committed balance greater than or equal to $1 million. However, CRE loans with balances less than $1 million are subject to a limited data collection if they are cross collateralized with a CRE loan with a committed balance greater than or equal to $1 million. For purposes of this schedule, cross-collateralized loans are those in which the collateral securing one loan is also used as collateral for other loans, even if that loan has less than $1 million committed balance. Cross collateralized loans that are not CRE loans should be excluded (i.e. home loan). A single loan secured by multiple properties is not considered to be cross-collateralized for purposes of this schedule. Lien position does not impact determinations of whether loans are cross-collateralized.
Under this limited data collection, report the following fields for cross collateralized CRE loans with balances less than $1 million:

i. Field 1, Loan Number;
ii. Field 3, Outstanding Balance;
iii. Field 5, Committed Exposure Global;
iv. Field 44, Cross Collateralized Loan Numbers

Reporting of all other fields for cross collateralized loans with balances less than $1 million is optional.

C. Reporting Specifications

Consistent with the FR Y-9C, report all loans net of charge-offs, fair value adjustments (FVA) and ASC 310-30 (originally issued as SOP 03-3) adjustments, if applicable, but gross of ASC 310-10 (originally issued as FAS 114 Accounting by Creditors for Impairment of a Loan) reserve amounts. Charge-offs, ASC 310-10 reserve amounts, ASC 310-30 adjustments, and FVA (including those for held for sale loans) should be reported separately in the designated fields (6, 46, 47, 50 and 51, respectively).

For acquired loans (see Field 36), report data retrievable from loan accounting systems of record reported on a prospective basis.

All dollar amounts should represent only the consolidated holding company’s pro-rata portion of portion of any syndicated or participated loan.

All amounts should be reported in U.S. dollars.

D. Data Format

Data should be provided in a single extensible markup language file (.xml). No quotation mark should be used as text identifiers. Do not use header or a row count. This file will contain one record per active loan in the contributor’s inventory. For fields that the schedule specifies as a date, but the XSD specifies as a datetime, provide T00:00:00 as the time.

D. Commercial Real Estate Data Fields

The table on the following pages shows the fields that should be contained in the submission file. Report all fields with data as of the report date.

For disposed CRE loans, report all Fields as of the date of disposition, unless otherwise instructed in individual Field descriptions.

<tbody>
<tr>
<td></td>
<td>submitted by the borrower. Replacement reserves, if allocated by the borrower on the operating statement, should be deducted from operating income to arrive at the NOI. The NOI should represent the best estimate of actual NOI at the date given in Field 10. If there has been significant recent leasing activity, then rent roll (less expenses) annualized may be the best NOI number. If there is seasonality in the numbers, then actual fiscal or trailing twelve months NOI may be the best number. However, NOI should not be forward looking in the sense of being based on potential future leasing or sales activity. The NOI for loans originated for the purpose of construction that are currently generating income should be reported as the actual NOI from operating information obtained from the borrower. If a participation, prorate based on your share of the credit. For loans that are cross-collateralized at origination (date given in Field 10), the NOI provided should represent the total NOI available to service the debt from the underlying collateral pool. For the purposes of Field 12 only, for loans that are cross-collateralized after origination (date given in Field 10), the NOI provided should be the total NOI available at origination, not the subsequently combined NOI from the collateral pool. NOI is a loan level concept that represents the sum of the NOIs of all of the properties that secure the loan. If the BHC or IHC has one loan secured by multiple properties, the NOI reported should be the sum of the NOI generated by the individual.</td>
<td>construction and land development loan reported in FR Y-9C, Schedule HC-C, item 1.a(2)) that is (1) not currently generating income, and (2) not cross-collateralized with another property currently generating income.</td>

25. **Loan Purpose (LoanPurpose)** G073

Indicate the purpose of the CRE Loan at the origination date, as recorded in Field 10, using an integer from the following list.

The following Loan Purpose descriptions provide guidance based on commonly-used definitions. Report fields as defined in the BHC's or IHC's loan system.

(1) **Construction Build to Suit**: The loan proceeds fund the construction of a building specified by a tenant and leased to the tenant / Construction Credit Tenant Lease: 100% occupancy to an investment grade tenant on a long term triple-net lease; both occupancy and lease type conditions must be met to meet this definition.

(2) **Land Acquisition & Development**: The loan proceeds fund the acquisition of vacant land or improvement of unimproved real property prior to the construction of building structures. The improvement of unimproved real property may include the laying or placement of sewers, water pipes, utility cables, streets, changes in zoning, and other infrastructure necessary for future development.

(3) **Construction Other**: The loan proceeds fund the construction of buildings or other structures, including additions or alterations to existing structures.

ASC 310-30 addresses the accounting for difference between contractual and expected cash flows for loans purchased with evidence of credit deterioration, which is defined in the accounting guidance as the nonaccratable difference.

The amount referred to in this field is the remaining nonaccratable difference, less the amount of that difference that is reflected in Field 46.

Provide if available at a credit facility level, otherwise a pro-rated allocation from the portfolio level to the loan level may be reported.

267
Schedule I – MSR Valuation Schedule

General Instructions:

- Report all dollar items in thousands ($’000s)
- Report all information for First Lien Residential MSRs Only
- The fields that pertain to Average, Min, Max, etc will be completed by the Federal Reserve System; do not enter any numbers in these fields.

Section 1: General Information

- Do not report MSR asset values net of hedges.
- Report the book value of the MSR asset as of the most recent quarter end.
- Report the market value of the MSR asset as of the most recent quarter end.
- Report the aggregate dollar volume of mortgage loans serviced
- Report the total number of mortgage loans serviced.

Section 2: Current Capitalization Rate Information

- Report the capitalization rate (multiple) and base mortgage rate on FNMA/FHLMC, Jumbo and GNMA 30 year products sold during the quarter into a current coupon secondary market MBS. Assume that the remittance cycle is Scheduled/Scheduled, taxes and insurance are escrowed, with industry standard credit scores of 700, and LTV of 80%.

- Use the value at the time of capitalization for those transactions that are closest to the end of the quarter.

- For the current coupon second market MBS, please use the TBA that is trading closest to par.

Section 3: Valuation Information

- Report the following:
  - Valuation Methodology: Static or OAS
  - Prepayment Model Used: Proprietary or Vendor
    - If Vendor Model Used, Note Vendor Name
  - Default Model Used: Proprietary or Vendor
    - If Vendor Model Used, Note Vendor Name
  - FHLMC/FNMA normal, delinquency, and default/foreclosure servicing cost per loan ($)
  - FHA normal, delinquency, and default/foreclosure servicing cost per loan ($)
  - VA normal, delinquency, and default/foreclosure servicing cost per loan ($)
  - Non-agency normal, delinquency, and default/foreclosure servicing cost per loan ($)
  - Judicial jurisdiction foreclosure time frame (mos)
  - Non-judicial jurisdiction foreclosure time frame (mos)
  - Servicing costs (performing and non performing) must be presented as annual costs per loan.
Section 4: MSR Valuation Sensitivity Metrics

Report the following valuation sensitivity metrics for 1) the total MSR portfolio; 2) fixed rate products including 30 year FHLMC/FNMA, 15 year FHLMC/FNMA, FHA, and VA; 3) ARMs including FHLMC/FNMA, FHA, VA, and Non-Agency; and 4) ALT-A/Option ARM, and Subprime loans under Memo. For downward rate shocks, use a risk-free rate floor of 25 basis points.

Mortgage products that do not have a 15 or 30 year term should be excluded from the sensitivity analysis section of the template.

- +100 basis point parallel move in yield curve
- +50 basis point parallel move in yield curve
- +25 basis point parallel move in yield curve
- -25 basis point parallel move in yield curve
- -50 basis point parallel move in yield curve
- -100 basis point parallel move in yield curve
- +10% parallel change in - Implied Swaption Volatility Surface
- -10% parallel change in - Implied Swaption Volatility Surface
- +100 basis point move in OAS/discount rate (option adjusted spread)
- -100 basis point move in OAS/discount rate
- +100 basis point change in CDR (conditional default rate). Do not shock other factors or vectors.
- +500 basis point change in CDR
- +1000 basis point change in CDR
- +100 basis point change in CPR. Do not shock other factors or vectors.
- +500 basis point change in CPR
- +1000 basis point change in CPR
- 3 month increase in foreclosure time frame
- $1 per loan increase in normal servicing cost; exclude late fee and modification revenue.
- $1 per loan increase in delinquency servicing cost
- $1 per loan increase in default/foreclosure servicing cost
- $1 per loan decline in ancillary income; include late fee and modification revenue.

The Federal Reserve recognizes there is a divergence in industry practice regarding treatment of "default/foreclosure" loans in MSR valuation models. The firm should include all costs included in its MSR valuation model for default/foreclosure loans.

For the following sensitivity stresses, shock related vectors in prepayment and default models
- +100 basis point change in national unemployment rate
- +500 basis point change in national unemployment rate
- -500 basis point change in HPI (National Core Logic Index)
- -1000 basis point change in HPI (National Core Logic Index)
- -2000 basis point change in HPI (National Core Logic Index)

The HPI and unemployment sensitivities in the MSR schedule are intended to be immediate, one-time, shocks to HPI and unemployment that are sustained for the life of the MSR asset.

In the context of HPI, the firm should immediately increase/decrease the national HPI core
logic index level by the stated amount and hold the resultant index level constant at the shocked level for the life of the asset when determining the MSR's valuation sensitivity to this input.

In the context of unemployment, the firm should immediately increase/decrease the national unemployment rate by the stated amount and hold the resultant national unemployment rate constant at the shocked level for the life of the asset when determining the MSR's valuation sensitivity to this input.

**Section 5: Detailed Valuation Information**

Report the following data for each indicated loan type by coupon strata:

- Fair Value (FV) Multiple
- Voluntary Prepayment Speed (CPR)
- Involuntary Prepay Speed (Default Rate) (CDR)
- Discount Rate (in %)
- Option Adjusted Spread (OAS) (in basis points)
- Weighted Average Coupon (WAC) (in %)
- Weighted Average Maturity (WAM) (in months)
- Weighted Average Servicing Fee (WASF) (in %)
- Weighted Average Remaining Term (WART) (in months)
- Weighted Average Life (WAL) (in months)
- Average Loan Size ($)
- Cost to Service per Loan ($)
- Ancillary Income per Loan ($)
- Unpaid Principal Balance ($)
Schedule J – Retail Fair Value Option/Held for Sale (FVO/HFS)

The Fair Value Option/Held for Sale (FVO/HFS) schedule collects information on retail loans and leases that are classified as either (1) Held for Sale (HFS) or (2) Held for Investment (HFI) under the Fair Value Option (FVO). The loan population is limited to retail loans and leases. For purposes of this schedule, retail loans and leases include credit card loans, first lien closed-end 1-4 family residential loans and leases, home equity loans and leases, student loans, auto loans and leases, and other consumer loans and leases (refer to the instructions for the respective FR Y-14Q/M schedules for definitions of these loan categories). Include SME and Corporate Card loans (defined in the FR Y-14Q, Balances Schedule). Do not include commercial real estate loans (defined in the FR Y-14Q, Commercial Real Estate Schedule), corporate loans (defined in the FR Y-14Q, Corporate Loans Schedule), small business loans (defined in the FR Y-14Q US Small Business Schedule), loans secured by farmland (defined in the FR Y-9C, Schedule HC-C, item 1.b), or loans to finance agricultural production and other loans to farmers (defined in the FR Y-9C, Schedule HC-C, item 3) on this schedule. Do not include loans serviced for others (i.e. serviced loans that are not directly held in the loan portfolio).

Table 1

Table 1 has two columns. In column A report the unpaid principal balance of loans and leases as of the report date in millions. In column B report the carrying value of loans and leases as of the report date in millions. For purposes of this Schedule, “carrying value” is defined as follows:

For HFS loan, the carrying value is the lower of cost or fair value.

For HFS loans that the holding company has elected to report at fair value under the fair value option, the carrying value is fair value.

For HFI loans that the holding company has elected to report at fair value under the fair value option, the carrying value is fair value.

Item Instructions

For each column in Table 1: (i) the sum of items 1 through 3 must equal item 4; (ii) the sum of items 5 through 9 must equal item 10; and (iii) the sum of items 4, 10, and 11 must equal item 12.

Line item 1  Residential Loans with Forward Contracts to Federal Agencies

Report in the appropriate column the unpaid principal balance and the carrying value of all residential retail loans and leases with forward contracts to Federal Agencies.

For purposes of this schedule, residential retail loans include all loans meeting the definition of FR Y-9C, Schedule HC-C, items 1.c(1), 1.c(2)(a), and 1.c(2)(b). Residential retail leases include all leases reported in FR Y-9C, Schedule HC-C, item 10.b that otherwise meet the classification criteria to be considered a residential loan, except for the fact that they are a lease rather than a loan.

For purposes of this schedule, loans and leases with forward contracts to Federal Agencies are loans and leases originated for the purpose of selling to Federal Agencies (i.e. Fannie Mae, Freddie Mac, Ginnie Mae, etc.) for future securitization.
Line item 2  Residential Loans Repurchased from Agencies with FHA/VA Insurance
Report in the appropriate column the unpaid principal balance and the carrying value of all
residential retail loans and leases repurchased from agencies such as the Federal Housing
Administration (FHA) or Veterans Administration (VA) insurance.

Line item 3  All Other Residential Loans Not Included Above
Report in the appropriate column the unpaid principal balance and the carrying value of all
other residential retail loans and leases not included in items 2 or 3 above.

Line item 4  Total Residential Loans
Item 4 includes shaded cell and is derived from the sum of items 1, 2, and 3.

Line item 5  Non-Residential Loans with Forward Contracts to Federal Agencies
Report in the appropriate column the unpaid principal balance and the carrying value of
loans and leases that do not meet the definition of residential loans or leases, reported in
Line item 1, that were originated for the purpose of selling to Federal Agencies (i.e. Fannie
Mae, Freddie Mac, Ginnie Mae, etc.) for future securitization.

Line item 6  Student Loans (Not in Forward Contracts)
Report in the appropriate column the unpaid principal balance and the carrying value of
loans to finance educational expenses, as defined in the FR Y-9C, Schedule HC-C, item 6.d,
that were not originated for the purpose of selling to Federal Agencies (i.e. Fannie Mae,
Freddie Mac, Ginnie Mae, etc.) for future securitization.

Line item 7  Credit Card Loans (Not in Forward Contracts)
Report in the appropriate column the unpaid principal balance and the Carrying Value of all
extensions of credit to individuals for household, family, and other personal expenditures
arising from credit cards, as defined in the FR Y-9C, Schedule HC-C, item 6.a. Also include in
this line item the unpaid principal balance and carry value of SME and Corporate Cards, as
defined in the FR Y-14Q Schedule M (Balances). Exclude loans originated for the purpose of
selling to Federal Agencies (i.e. Fannie Mae, Freddie Mac, Ginnie Mae, etc.) for future
securitization.

Line item 8  Auto Loans (Not in Forward Contracts)
Report in the appropriate column the unpaid principal balance and the carrying value of all
consumer loans and lease agreements extended for the purpose of purchasing new and
used passenger cars and other vehicles such as minivans, vans, sport-utility vehicles, pickup
trucks, and similar light trucks for personal use, as defined in the FR Y-9C, Schedule HC-C,
item 6.c, that were not originated for the purpose of selling to Federal Agencies (i.e. Fannie
Mae, Freddie Mac, Ginnie Mae, etc.) for future securitization. Include all relevant leases
reported in FR Y-9C, Schedule HC-C, item 10.a that otherwise meet the classification criteria
to be considered an auto loan, except for the fact that they are a lease rather than a loan.

Line item 9  All Other Non-Residential Loans Not Included Above
Report in the appropriate column the unpaid principal balance and the carrying value of all
non-residential loans and lease agreements and extensions of credit to individuals for
household, family, and other personal expenditures as defined in the FR Y-9C, Schedule HC-
C, items 6(b) & 6(d), that are not reported in Items 1 through 8 above. Include all relevant
leases reported in in FR Y-9C, Schedule HC-C, item 10 that otherwise meet the classification
criteria to be considered other non-residential loans, except for the fact that they are a lease
rather than a loan.
**Line item 10  Total Non-Residential Loans**
Item 10 includes shaded cells and is derived from the sum of items 5 through 9.

**Line item 11  Other Retail Loans with Zero Principal or Interest Recourse to the Bank**
Report in the appropriate column the unpaid principal balance and the carrying value of any retail loans and leases that present no recourse liability to the bank.

**Line item 12  Total Retail FVO/HFS Loans**
Item 12 includes shaded cells and is derived from the sum of items 4, 10 and 11.

**Table 2**
Table 2 has nine columns (A-I). The definitions of the loan categories in Columns A through H are defined in Table 1 above. Column I contains shaded cells, and items are derived from the sum or Columns A through H. Below is a list of Columns included on Table 2:

- **Column A  Residential Loans in Forward Contract**
- **Column B  Residential Loans (Repurchased with FHA/VA Insurance)**
- **Column C  All Other Residential Loans Not Included in Columns A or B**
- **Column D  Non-Residential Loans with Forward Contracts to Federal Agencies**
- **Column E  Student Loans (Not in Forward Contract)**
- **Column F  Credit Card Loans (Not in Forward Contract)**
- **Column G  Auto Loans (Not in Forward Contract)**
- **Column H  All Other Non-Residential Loans Not Included in Columns D, E, F or G**
- **Column I  Total**

Items in Column I are shaded cells and are derived from the sum or Columns A through H.

**Item Instructions**
The rows in this table refer to the vintage of the loan or lease. The vintage of the loan is the calendar year that the loan or lease was originated. The vintages range from Pre 2006 to the current calendar year.

Categorize loans and leases by vintage and report the entire carrying value of the loan or lease in the row corresponding with the calendar year that the loan or lease was originated. Additionally, categorize loans and leases by the loan classifications provided in columns A through H. Report the total carrying value of loans and leases as of the report date in millions in the appropriate column and row according to loan classification (column) and vintage (row).

The Total row contains shaded cells, and items are derived from the sum of the vintage years. The amount reported in Table 2, Column I, Row 8 should equal the sum of in Table 1, Column B, Row 4 and Table 1, Column B, Row 10.
**Schedule K - Supplemental**

The Supplemental Schedule is intended to capture gaps in the data collected between the FR Y-14 and the FR Y-9. Not all BHCs and IHCs will need to complete all cells in the schedule. Refer to the instructions below to determine which part of the schedule you must complete. See the definitions of the loans in each row of the schedule in Reference Table K.1 of these instructions.

Refer to the FR Y-14Q/M General Instructions for information on the as-of and filing dates for this schedule and the other FR Y-14Q and FR Y-14M schedules.

For the purposes of reporting this schedule, the carrying value of an asset is defined as the original cost of the asset less any write-downs associated with depreciation, amortization or impairment costs.

Technical instructions on how to submit the data for this schedule will be provided separately.

Provide all dollar unit data in millions of dollars ($ Millions).

**Column A: Immaterial Portfolios**
Report the carrying value of loans in immaterial or excluded portfolios that were not reported in the FR Y-14Q or FR Y-14M schedules because they were immaterial based on the FR Y-14 materiality thresholds. If the loans in a given row were reported in the FR Y-14Q or FR Y-14M, leave the row blank.

**Column B: Cumulative Gross Charge-offs**
Only report categories of loans for which you reported FR Y-14Q or FR Y-14M Schedule A - Retail Worksheets. For each row in column C, report the cumulative lifetime gross charge-offs on loans reported in the FR Y-14Q or FR Y-14M schedules.

**Column C: Purchase Impairments and Fair Value Adjustments**
Only report categories of loans for which you reported FR Y-14Q or FR Y-14M Schedule A - Retail Worksheets. For each row in column D, report the cumulative lifetime purchase impairments and fair value adjustments on loans reported in the FR Y-14Q or FR Y-14M schedules.

**Column D: Outstanding Balance of Commercial Real Estate (CRE) and Corporate loans under $1M in committed balance**
Report the outstanding balance of CRE and corporate loans with under $1M in committed balance for each of the categories which were excluded from the FR Y-14Q, Schedule H – Wholesale Risk, Worksheet 2, CRE and Worksheet 1, Corporate Loan based solely on commitment size (i.e. report the outstanding balance for loans which otherwise would meet the definition of the loan population in those schedules). For CRE related rows, do not report loans less than $1 million which are reported on the FR Y-14Q, Schedule H – Wholesale Risk, Worksheet 2, CRE schedule due to cross collateralization.

**Column E: Unplanned Overdrafts**
Report any unplanned overdrafts as defined in the FR Y-9C HC-C, item 9 and which were excluded from the FR Y-14Q, Schedule H – Wholesale Risk, Worksheet 1, Corporate Loan.
Column F Scored loans
Report the carrying value of any scored loans reported in the respective FR Y-9C line items.

For the purposes of this report, a loan is reported as a scored/delinquency managed loan if the primary focus of the underwriting decision is an individual. A loan is reported as a graded loan if the focus of the underwriting decision is the cash flows of the organization.

Schedule L - Counterparty

Columns that collect information based on the supervisory stress scenarios are only required to be populated for the submission of data from the as-of quarter of CCAR.

This schedule has 13 sub-schedules for information on counterparty credit risk grouped as follows:

L.1. Derivatives profile by counterparty and aggregate across all counterparties
   a. Top counterparties comprising 95% of firm Credit Valuation Adjustment (CVA), ranked by CVA
   b.1 Top 20 consolidated/parent counterparties ranked by Federal Reserve Severely Adverse Scenario Stressed CVA
   b.2 Top 20 consolidated/parent counterparties by BHC or IHC Scenario Stressed CVA
   c.1 Top 20 consolidated/parent counterparties ranked by Net CE
   c.2 Top 20 consolidated/parent counterparties ranked by Federal Reserve Severely Adverse Scenario Stressed Net CE
   c.3 Top 20 consolidated/parent counterparties ranked by BHC or IHC Scenario Stressed Net CE
   d.1 Top 20 consolidated/parent collateralized counterparties ranked by Gross CE
   d.2 Top 20 consolidated/parent collateralized counterparties ranked by Federal Reserve Severely Adverse Scenario Stressed Gross CE
   e.1 Aggregate CVA data by ratings and collateralization
   e.2 Additional/Offline CVA reserves
   e.3 Collateralized netting sets (netting sets with a CSA agreement in place), sorted by Internal Rating
   e.4 Uncollateralized netting sets (netting sets without a CSA agreement in place), sorted by Internal Rating

L.2. Expected Exposure (EE) profile by counterparty: Top counterparties ranked by CVA comprising 95% of firm CVA

L.3. Credit quality by counterparty: Top counterparties ranked by CVA comprising 95% of firm CVA

L.4. Aggregate and Top CVA sensitivities

L.5. Derivatives and securities financing transactions (SFT) profile: All CCPs and G7 sovereigns + Top 25 non-CCP/non-G7 SFT and derivative counterparties ranked by methodologies
   1. Derivative and SFT information by counterparty legal entity and netting set/agreement
   2. SFT assets posted and received by counterparty legal entity and netting set/agreement and asset category
   3. Aggregate SFTs by Internal Rating
   a. 4. Derivative positions detail by counterparty legal entity and netting set/agreement and asset category

Additionally, reporting institutions can provide supporting information to explain the content of specific items in this schedule. If the BHC or IHC elects to provide additional data, this should include an explanation of the additional data and why it is provided. If the data links to data in other schedules of the CCR schedule, then a clear data identifier must be provided such that schedules may be merged if necessary (see counterparty identification details below).

Data Formatting Instructions
Future time buckets (sub-schedule L.2): The level of granularity of future revaluation time buckets should be at the level used to calculate CVA at the BHC or IHC, and should be as granular as available.
Sub-schedules L.1.a, L.1.b, L.1.c, and L.1.d provide data at the counterparty level (unit of observation = counterparty). Sub-schedule L.2 provides all available data at the counterparty + tenor bucket level (unit of observation = counterparty + tenor bucket). Sub-schedule L.3 provides data at the counterparty level for each date of market data inputs used. Sub-schedules L.5 provide data at the netting agreement level as well as at the aggregated level by rating.

Where applicable, fields that allow optional reporting should be populated with appropriate information or with “NA.” For all required fields, 1) where information is not available or applicable, fields should be left blank and 2) where firms do not have exposures, a zero should be reported. Incorrectly reported fields will be rejected.

For sub-schedules L.1-L.5, all figures reported should be reported in positive terms with the exception of single name credit hedges on sub-schedules L.1.a-1.e, which can be reported as either positive or negative figures (net sold position reported as positive, net bought position reported as negative). See sub-schedule L.5 for further formatting guidelines, as several items can be reported in positive or negative terms.

Counterparty Exposure Universe
All counterparty exposures related to derivatives activities should be included in the universe of transactions applicable for sub-schedules L.1- L.5. All counterparty exposures related to repurchase, reverse repurchase, securities lending and securities borrowing activities should be included in the universe of transactions applicable for sub-schedule L.5.

Counterparty Identification
All counterparties must have a unique counterparty identifier. In addition, the name of the counterparty should be provided. Unique identifiers and names must be consistent across sub-schedules. In particular, it must be possible to merge sub-schedules L.1, L.2, L.3, and L.5, on the variables counterparty name, counterparty ID and Rank. Specifically for sub-schedules L.1, L.2, and L.3: If any netting set or sub-netting set IDs are provided on one sub-schedule, they must be provided on all sub-schedules. Specifically for sub-schedules L.5: The consolidated/parent counterparty name and ID must be consistent with sub-schedules L.1, L.2, and L.3, if applicable. Other identifying information – industry, country, internal rating and external rating – must be reported at the legal-entity level, i.e. for each reported legal entity.

Consolidation of Counterparties
Sub-schedules L.1-L.4: When calculating total group exposure, all counterparties/legal entities should be included, regardless of whether or not they have a CVA associated with them.

For non-sovereigns and non-central counterparties report at the consolidated group/parent level.

For sovereigns and central counterparties, report at the entity level. Report the consolidated group/parent level name in the Counterparty Name field, the consolidated/parent counterparty ID in Counterparty ID field, the counterparty entity ID in the Legal Entity Identifier (LEI) field, and the counterparty entity name in the Sub-Netting Set ID field. Do not consolidate bankruptcy-remote entities. For sub-schedules L.1.b-L.1.d, more than 20 entries may be needed based on this requirement.

- Report the industry code, country, and internal/external rating of each reported entity.
- Rank is based on the consolidated/parent counterparty, inclusive of sovereign/CCP and non-sovereigns/CCP counterparty, and that rank must be reported for each entity.
**Sub-schedules L.2 and L.3:** If different market spreads are attached to different entities within a counterparty group, each entity should be reported as a separate counterparty. Display each counterparty entity's own name, rating, country ID and industry information. The rank should be that of the consolidated/parent counterparty reported on sub-schedule L.1.a.

**Sub-schedule L.4:** The top 10 counterparties by sensitivities to Risk Factors should be aggregated and ranked at the consolidated/parent level.

**Sub-schedule L.5:** Any consolidation requirements for this sub-schedule is located below in the specific instructions for this subschedule.

---

**Central Counterparty Reporting**

Designated central clearing counterparty (CCP) exposures should include both cleared OTC derivatives and exchange traded derivatives. For counterparties that clear both OTC derivatives and exchange traded derivatives (namely futures and options), provide a breakout of the amount of exposure reported for each (OTC vs exchange traded) in a separate a supplemental Excel file submitted as supporting documentation.

Report **only house exposures** to the CCPs and report these counterparties at the legal entity level, as opposed to consolidated entity level. Gross CE, Net CE, and CVA (as defined in column instructions below) should include all exposures to the CCP, such as default fund contributions, initial margin, and any other collateral provided to the CCP that exceeds contract MtM amounts. Additionally, Total Notional, New Notional During Quarter, Weighted Average Maturity, Position MtM, and Total Net Collateral, as reported on sub-schedules L.1.a-d and Stressed EEs, as reported on sub-schedule L.2, should also include the firm's exposures to the CCPs.

If a firm takes a CVA on a CCP and that CVA falls into the top 95% of total firm CVA, that CCP should be reported on sub-schedules L.1.a, L.2 and L.3 of Schedule L. Regardless of whether a CVA is taken, if a CCP falls into any of the top 20 lists on sub-schedules L.1.b, L.1.c, and L.1.d of Schedule L, that CCP should be reported. Exposure to CCPs should be included in aggregate exposures reported on both sub-schedules L.1.e and sub-schedule L.5 of Schedule L. On sub-schedule L.1.e.3, CCP exposure should be reported in collateralized netting sets if the collateral is legally enforceable. Otherwise, the exposure should be reported in uncollateralized netting sets on sub-schedule L.1.e.4. If a CCP falls into any top 10 counterparty list on sub-schedule L.4 of Schedule L, it should be reported. All CCPs should be reported on sub-schedule L.5, regardless of whether a CVA is taken against the CCP.

In the case a CCP itself is the bi-lateral counterparty to a derivative or SFT, then the CCP must be included in the consideration of which bi-lateral counterparties are the “top 25” as ranked by the ranking methodologies outlined in sub-schedule L.5.

---

**Regular/Unstressed and CCAR/Stressed Submissions**

Regular submissions of this schedule (i.e. without stressed information) must be submitted for all four quarters, including the CCAR as-of quarter, following the regular FR Y-14Q submission deadlines. As noted at the beginning of the FR Y-14Q instructions, the deadline for the regular/unstressed submission of the CCAR as-of quarter is the same as FR Y-14Q Schedule F (Trading), which is 52 calendar days after the notification date (notifying respondents of the as-of-date) or March 15, whichever comes earlier. The as-of date for this regular/unstressed submission for the CCAR quarter is the as-of date for the global market shock.

In addition, a submission for the CCAR as-of quarter must be submitted with stressed information by April 5th. Unstressed information must be provided with the CCAR/stressed submission unless it was already provided with the CCAR as-of quarter regular/unstressed submission.
Sub-schedules L.1.a through L.1.e — Top Counterparties & Aggregate

Top counterparties should be ranked per instructions on sub-schedules L.1.a, L.1.b.1, L.1.b.2, L.1.c.1, L.1.c.2, L.1.c.3, L.1.d.1, and L.1.d.2. Aggregate data are provided on sub-schedule L.1.e.1, L.1.e.2, L.1.e.3 and L.1.e.4. The column instructions listed further below apply to each sub-schedule in this section.

Counterparties should only be reported once across sub-schedules L.1.a-d.

Sub-schedule Instructions

L.1.a – Top consolidated/parent counterparties comprising 95% of firm CVA, ranked by CVA

Report information for the top counterparties that comprise 95% of total firm CVA, ranked by CVA.

L.1.b – Top 20 consolidated/parent counterparties ranked by applicable Stressed CVA

This sub-schedule is comprised of two sub-schedules of Top 20 Counterparties:
b.1. Top 20 Counterparties ranked by Federal Reserve Severely Adverse Scenario (FR Specification) Stressed CVA
b.2. Top 20 Counterparties ranked by BHC or IHC Scenario (BHC or IHC Specification) Stressed CVA

Report information for these two sub-schedules in columns as described below. If a Top 20 counterparty already is reported on sub-schedule L.1.a, L.1.c.1-L.1.c.3, or L.1.d.1-L.1.d.2, do not duplicate information for that counterparty on sub-schedule L.1.b.1 or L.1.b.2. Report only any additional counterparties needed to arrive at the Top 20 by each specific sorting criteria that are not already incorporated in sub-schedule L.1.a, L.1.c.1-L.1.c.3, or L.1.d.1-L.1.d.2. Further, do not duplicate same counterparty information between L.1.b.1 and L.1.b.2. That is, a Top 20 counterparty that is reported on L.1.b.1 should not appear in L.1.b.2. Report counterparties in the row corresponding to the correct rank for that counterparty based on the sorting criteria.

L.1.c – Top 20 consolidated/parent counterparties ranked by applicable Net CE

This sub-schedule is comprised of three sub-schedules of Top 20 Counterparties:
c.1. Top 20 Counterparties ranked by Net CE
c.2. Top 20 Counterparties ranked by Federal Reserve Severely Adverse Scenario Stressed Net CE
c.3. Top 20 Counterparties ranked by BHC or IHC Scenario Stressed Net CE.

Report information for these three sub-schedules in columns as described below. If a Top 20 counterparty already is reported on sub-schedule L.1.a, L.1.b.1, or L.1.b.2, do not duplicate information for that counterparty on this Top 20 counterparties sub-schedule. Report only any additional counterparties needed to arrive at the Top 20 by each specific sorting criteria that are not already incorporated in sub-schedule L.1.a, L.1.b.1, and L.1.b.2. Further, do not duplicate same counterparty information amongst three sub-schedules within sub-schedule L.1.c. That is, if a Top 20 counterparty is reported on L.1.c.1, L.1.c.2, or L.1.c.3, it should be reported only once. Report counterparties in the row corresponding to the correct rank for that counterparty based on the sorting criteria.

L.1.d – Top 20 consolidated/parent collateralized counterparties ranked by applicable Gross CE
This sub-schedule is comprised of two sub-schedules of Top 20 Counterparties:
d.1. Top 20 Collateralized Counterparties ranked by Gross CE (counterparties with at least one netting set with a CSA agreement in place)
d.2. Top 20 Collateralized Counterparties ranked by BHC or IHC Scenario Stressed Gross CE (counterparties with at least one netting set with a CSA agreement in place)

Report information for these two sub-schedules in columns as described below. Include counterparties with at least one netting set with a CSA agreement in place. If a Top 20 counterparty already is reported on sub-schedule L.1.a, L.1.b.1, L.1.b.2, L.1.c.1, L.1.c.2, or L.1.c.3, do not duplicate information for that counterparty on this Top 20 counterparties sub-schedule. Report only any additional counterparties needed to arrive at the Top 20 by each specific sorting criteria that are not already incorporated in sub-schedule L.1.a, L.1.b.1, L.1.b.2, L.1.c.1, L.1.c.2, or L.1.c.3. Further, do not duplicate same counterparty information amongst two sub-schedules tables within sub-schedule L.1.d. That is, if a Top 20 counterparty is reported on sub-schedule L.1.d.1 or L.1.d.2, it should be reported only once. Report counterparties in the row corresponding to the correct rank for that counterparty based on the sorting criteria.

**Item Instructions (L.1.a – L.1.d)**

**Sub-schedule ID (CACVM926)**
Report the sub-schedule on which the consolidated/parent counterparty is being reported, i.e. L.1.a-L.1.d.

**Rank (CACVM899)**
Report the rank of the consolidated/parent counterparty as ordered by CVA.

**Counterparty name (CACVM900)**
Report counterparty name that is alphabetically recognizable rather than an alphanumeric code. As in the overall instruction, consolidated group/parent level counterparty name should be reported.

**Counterparty ID (CACVM901)**
Report the unique identifier (for example, alphanumeric) assigned to the counterparty name. The counterparty ID must be unique and consistent across all sub-schedules in this schedule.

**Legal Entity Identifier (LEI) (CACV9224)**
Report the official LEI of the reported entity whenever available.

**Netting set ID (optional) (CACVM902)**
This field is optional. Netting sets should map to ISDA master netting agreements.

**Sub-netting set ID (optional) (CACVM903)**
This field is optional. Used if CVA is calculated below the netting set level.

**Industry Code (CACVR620)**
Report the four to six digit numeric code that describes the primary business activity of the parent/consolidated entity according to the North American Industry Classification System (NAICS). Six digit code required for all financial counterparties.

**Country (CACVM905)**
Report the country of domicile of the counterparty. BHCs and IHCs may also report country of risk, but the firm must then provide details in the methodology documentation, including the list of counterparties for whom this alternate approach is selected. Countries should be identified using the standard ISO two-letter
Internal rating (CACVM906)
Report the BHC’s or IHC’s internal rating of the counterparty. If there are multiple ratings associated with the different netting sets of the counterparty, the mean or median internal rating should be used. Elaborate in the documentation the approach to selecting the internal rating for these types of counterparties. As a reminder, even if there are multiple internal ratings for a counterparty, there is always only one CDS for that counterparty. All data should be reported at the level at which CVA is calculated; thus every counterparty must have only one CDS spread associated with it. See above for definition of a counterparty.

External rating (CACVM907)
Report the external rating equivalent to the counterparty’s internal rating, not the external rating associated with the specific counterparty. Provide an external rating from a Nationally Recognized Statistical Rating Organization (NRSRO).

Gross CE (CACVM908)
Report Gross CE, which is defined as pre-collateral exposure after bilateral counterparty netting. Sometimes referred to as the replacement cost or current credit exposure, Gross CE is the fair value of a derivative contract when that fair value is positive. Gross CE is zero when the fair value is negative or zero. For purposes of this schedule, Gross CE to an individual counterparty should be derived as follows: Determine whether a legally enforceable bilateral netting agreement is in place between the BHC or IHC and the counterparty. If such an agreement is in place, the fair values of all applicable derivative contracts with that counterparty that are included in the scope of the netting agreement are netted to a single amount, which may be positive, negative, or zero. Report Gross CE when the fair value is positive, report it as a zero when the fair value is negative or zero.

Stressed Gross CE (Severely Adverse - CACVM909; Adverse - CACVM910; BHC or IHC - CACVM911)
Report the full revaluation of Gross CE under applicable stressed conditions.

Net CE (CACVM912)
Report the sum of positive Gross CE netting agreements for a given counterparty less the value of collateral posted by the counterparty to secure those trades. Net CE should be reported after counterparty netting and after collateral. Net CE should reflect any excess collateral posted by the BHC or IHC to the counterparty. Net CE should not reflect collateral that was called but not yet exchanged. Only collateral that was actually exchanged should be incorporated in the Net CE reporting.

Stressed Net CE (Severely Adverse - CACVM913; Adverse - CACVM914; BHC or IHC - CACVM915)
Report the full revaluation of Net CE under applicable stressed conditions. Hold collateral constant; assume no additional collection of collateral, but do apply stressed conditions to collateral.

Total Notional (CACVJF39)
The gross notional amount of all derivatives positions associated with the reported amount in the item Gross CE. For contracts with variable notional principal amounts, the basis for reporting is the notional principal amounts at the time of reporting. The total should include the sum of notional values of all contracts with a positive market value and contracts with a negative market value. When derivatives position has multiple legs, the firm should report maximum notional value across all legs.

New Notional During Quarter (CACVJD56)
The gross notional amount of the positions that were entered into during the reporting quarter.

Weighted Average Maturity (CACVJD57)
The average of time to maturity in years for all positions associated with the reported amount in the item Gross CE, as weighted by the gross notional amount associated with a given position. For trades with Optional Early Termination (OET), the maturity reporting should not take into account such early termination features. For trades with Mandatory Early Termination (MET), however, the maturity reporting should take into account such early termination features. Firms should report the average time to legal maturity in years, inclusive of OETs or METs.

**Position MtM (CACVJD58)**
The net mark-to-market of all positions associated with the item Gross CE not including collateral. This amount could be positive or negative.

**Total Net Collateral (CACVJD59)**
The amount of net mark-to-market value of all collateral associated with the item Gross CE. This netting is computed as the amount received less the amount posted, i.e. net received amounts would be reported as positive.

**CVA (CACVM916)**
Report the balance of all CVA, gross of hedges, for asset-side, unilateral CVA. Report CVA as a positive value. CVA is an adjustment made to the market or fair value of derivatives receivables to take into account the credit risk of a counterparty. This is different from "Net CVA", which would be equivalent to CVA less debt valuation adjustment (DVA). Provide an explanation for counterparties where this does not hold (e.g., adjustments). By requiring unilateral CVA, the default risk of the counterparty should not be conditioned on the survival of the reporting institution. Note that CVA hedges should not be included in this schedule. CVA Hedges should be reported separately in its own FRY-14Q Trading Schedule, F.

**Stressed CVA (Severely Adverse - CACVM917; Adverse - CACVM918; BHC or IHC – CACVM921)**
The full revaluation of asset-side CVA under stressed conditions. Stressed CVA should incorporate the full revaluation of exposure, probability of default (PD), and loss given default (LGD) under stressed conditions. Stressed CVA needs to be calculated for the FR specification under the FR scenarios and the BHC or IHC specification under the BHC or IHC scenario.

**CSA in place? (CACVM922)**
Report the indication of whether at least one of the netting sets comprising this counterparty has a legally enforceable collateral agreement, for example, Credit Support Annex (CSA), in place. "Y" for yes, "N" for no.

**% Gross CE with CSAs (CACVM923)**
Report the percentage of Gross CE that is associated with netting sets that have a legally enforceable collateral agreement in place. For example, if there are two netting sets, one collateralized and one not, with equal Gross CEs in both netting sets, report a value of 50%.

**Downgrade trigger modeled? (CACVM924)**
Per existing guidance, report this field NA.

**Single Name Credit Hedges (CACVM925)**
Report the net notional amount of single name credit hedges on the default of the counterparty, including only single name CDS on the counterparty as a reference entity. Report net bought protection as negative values and net sold protection as positive values.
L.1.e — Aggregate CVA Data by Ratings and Collateralization

This sub-schedule is comprised of four tables, as described below:

e.1 Aggregate CVA data by ratings: Report aggregate data by internal ratings category in columns as described below. The aggregate line items should equal the sum of the three tables of data below: Additional/Offline CVA Reserves, Collateralized Netting Sets and Uncollateralized Netting Sets.

e.2 Additional/Offline CVA Reserves: Report aggregate data for additional offline CVA in columns as described below. If there is a Gross CE or a Net CE figure associated with these reserves, those should be reported as well. If not, enter "0". Accompanying documentation should elaborate about the nature of these reserves.

e.3 Collateralized netting sets sorted by internal rating: Report aggregate data for collateralized netting sets by internal ratings category in columns as described below. Include only netting sets with a CSA agreement in place.

e.4 Uncollateralized netting sets sorted by internal rating: Report aggregate data for uncollateralized netting sets (netting sets without a CSA agreement in place) by internal ratings category in columns as described below.

The internal ratings categories reported on L.1.e must be the same as those reported on L.5.3.

Item Instructions

Internal rating (CACVM906)

Report the BHC's or IHC's internal rating of the counterparty. If there are multiple ratings associated with the different netting sets of the counterparty, the mean or median internal rating should be used. Elaborate in the documentation the approach to selecting the internal rating for these types of counterparties. As a reminder, even if there are multiple internal ratings for a counterparty, there is always only one CDS for that counterparty. All data should be reported at the level at which CVA is calculated for the firm; thus every counterparty must have only one CDS spread associated with it. The same mean or median rating scheme should apply to sub-schedule L.1.a. See above for definition of a counterparty.

External rating (CACVM907)

Report the external rating equivalent to the counterparty's internal rating, not the external rating associated with the specific counterparty. Provide an external rating from a Nationally Recognized Statistical Rating Organization (NRSRO).

Gross CE excluding CCPs (CACVM919)

Report Gross CE, which is defined as pre-collateral exposure after bilateral counterparty netting. Sometimes referred to as the replacement cost or current credit exposure, Gross CE is the fair value of a derivative contract when that fair value is positive. Gross CE is zero when the fair value is negative or zero. For purposes of this schedule, Gross CE to an individual counterparty should be derived as follows: Determine whether a legally enforceable bilateral netting agreement is in place between the BHC or IHC and the counterparty. If such an agreement is in place, the fair values of all applicable derivative contracts with that counterparty that are included in the scope of the netting agreement are netted to a single amount, which may be positive, negative, or zero. Report Gross CE when the fair value is positive, report it as a zero when the fair value is negative or zero.

Gross CE to CCPs (CACVM920)

Report the Gross CE that is a result of transactions conducted through CCPs.

Stressed Gross CE excluding CCPs (Severely Adverse - CACLR485; Adverse - CACLR490)

Report the full revaluation of Gross CE excluding CCPs under applicable stressed conditions.
Stressed Gross CE to CCPs (Severely Adverse - CACLR489; Adverse - CACLR516)
Report the full revaluation of Gross CE to CCPs under applicable stressed conditions.

Stressed Gross CE BHC or IHC scenario (CACLM911)
Report the full revaluation of Gross CE under applicable stressed conditions.

Net CE excluding CCPs (CACLR517)
Report the sum of positive Gross CE netting agreements for a given counterparty less the value of collateral posted by the counterparty to secure those trades. Net CE should be reported after counterparty netting and after collateral. Net CE should reflect any excess collateral posted by the BHC or IHC to the counterparty. Net CE should not reflect collateral that was called but not yet exchanged. Only collateral that was actually exchanged should be incorporated in the Net CE reporting.

Net CE to CCPs (CACLR518)
Report the Net CE that is a result of transactions conducted through CCPs.

Stressed Net CE excluding CCPs (Severely Adverse - CACLR519; Adverse - CACLR521)
Report the full revaluation of Net CE excluding CCPs under applicable stressed conditions. Hold collateral constant; assume no additional collection of collateral, but do apply stressed conditions to collateral.

Stressed Net CE to CCPs (Severely Adverse - CACLR520; Adverse - CACLR522)
Report the full revaluation of Net CE to CCPs under applicable stressed conditions.

Stressed Net CE BHC or IHC scenario (CACLM915)
Report the full revaluation of Net CE under applicable stressed conditions.

CVA (CACLM916)
Report the balance of all CVA, gross of hedges, for asset-side, unilateral CVA. Report CVA as a positive value. CVA is an adjustment made to the market or fair value of derivatives receivables to take into account the credit risk of a counterparty. This is different from "Net CVA", which would be equivalent to CVA less debt valuation adjustment (DVA). Provide an explanation for counterparties where this does not hold (e.g., adjustments). By requiring unilateral CVA, the default risk of the counterparty should not be conditioned on the survival of the reporting institution. Note that CVA hedges should not be included in this schedule. CVA Hedges should be reported separately in its own FRY-14Q Trading Schedule, F.

Stressed CVA (Severely Adverse - CACLM917; Adverse - CACLM918; BHC or IHC – CACVM921)
The full revaluation of asset-side CVA under stressed conditions. Stressed CVA should incorporate the full revaluation of exposure, probability of default (PD), and loss given default (LGD) under stressed conditions. Stressed CVA needs to be calculated for the FR specification under the FR scenarios and the BHC or IHC specification under the BHC or IHC scenario.

Single name credit hedges (CACVM925)
Report the net notional amount of single name credit hedges on the default of the counterparty, including only single name CDS on the counterparty as a reference entity. Report net bought protection as negative values and net sold protection as positive values.

Aggregate CVA and Stressed CVA
The difference between Aggregate Stressed CVA and Aggregate CVA should equal the CVA losses reported on Schedule A, Summary, Sub-schedule 5- Counterparty Credit Risk, Item 2, Counterparty Credit MTM
Losses (CVA losses).

Additional/offline CVA reserves
Report Additional or offline CVA reserves, including Risks Not in CVA, Wrong Way Risk, Offline Reserves, or any other applicable, non-standard add-ons, that are not explicitly included in the Expected Exposure (EE) profile on sub-schedule L.2. If there is a Gross CE or a Net CE figure associated with these reserves, those should be reported as well. If not, enter "0". Accompanying documentation should provide a detailed breakdown and elaborate about the nature of these reserves. The amounts must be reported into one of five categories: model/infrastructure limitations, trades not captured, offline reserves, Funding Valuation Adjustment (if applicable), and other as described below:

a) Model/infrastructure limitations: Risk factor not captured in the underlying pricing model or simulated in the simulation model. Please provide a break-out between pricing model and simulation model limitations in the supporting documentation.

b) Trades not captured: Types of trades or counterparties not captured in CVA systems.

c) Offline reserves: Offline reserves held at the discretion of Finance

d) Funding Valuation Adjustment (FVA) (if applicable): Funding Valuation Adjustment (if applicable)

e) Other: Includes any additional items that do not fall in the four categories listed above. Please provide a detailed description and breakout of the components of this section in the supporting documentation.

Collateralized counterparty
A collateralized counterparty is a counterparty with at least one netting set with a legally enforceable collateral agreement in place.

Collateralized netting set
Netting sets with a CSA agreement in place and for which only financial collateral applies.

L.2—EE profile by counterparty: Top counterparties comprising 95% of firm CVA, ranked by CVA

Column Instructions

Rank (CACVM899)
Report the rank of the consolidated/parent counterparty as ordered by CVA.

Counterparty name (CACBM900)
Report counterparty name that is alphabetically recognizable rather than an alphanumeric code. As in the overall instruction, consolidated group/parent level counterparty name should be reported.

Counterparty ID (CACBM901)
Report the unique identifier (for example, alphanumeric) assigned to the counterparty name. The counterparty ID must be unique and consistent across all sub-schedules in this schedule.

Legal Entity Identifier (LEI) (CACB9224)
Report the official LEI of the reported entity whenever available.

Netting set ID (optional) (CACBM902)
This field is optional. Netting sets should map to ISDA master netting agreements.
Sub-netting set ID (optional) (CACBM903)
This field is optional. Used if CVA is calculated below the netting set level.

Industry Code (CACBR620)
Report the four to six digit numeric code that describes the primary business activity of the parent/consolidated entity according to the North American Industry Classification System (NAICS). Six digit code required for all financial counterparties.

Country (CACBM905)
Report the country of domicile of the counterparty. BHCs and IHCs may also report country of risk, but the firm must then provide details in the methodology documentation, including the list of counterparties for whom this alternate approach is selected. Countries should be identified using the standard ISO two-letter codes available at https://www.iso.org/. For supranational entities report "XX."

Internal rating (CACBM906)
Report the BHC’s or IHC’s internal rating of the counterparty. If there are multiple ratings associated with the different netting sets of the counterparty, the mean or median internal rating should be used. Elaborate in the documentation the approach to selecting the internal rating for these types of counterparties. As a reminder, even if there are multiple internal ratings for a counterparty, there is always only one CDS for that counterparty. All data should be reported at the level at which CVA is calculated; thus every counterparty must have only one CDS spread associated with it. See above for definition of a counterparty.

External rating (CACBM907)
Report the external rating equivalent to the counterparty's internal rating, not the external rating associated with the specific counterparty. Provide an external rating from a Nationally Recognized Statistical Rating Organization (NRSRO).

Tenor bucket in years (CACBM928)
The time provided should be as granular as possible. Use years as the unit. For example, if the time is 6 months, the BHC and IHC should report "0.5" not "6".

Tenor buckets are defined as the time between time t and time t-1. Therefore if the value provided is one year, and the previous time provided is 6 months, the tenor bucket over which marginal (forward) probabilities of default is calculated would be from 6 months to one year. Typically EE will be calculated at time t (the endpoint of the tenor bucket). If not, clarify if the value provided corresponds to a midpoint during the tenor bucket, an average, or some other value.

The level of granularity of future revaluation time buckets should be at the level used to calculate CVA at the BHC or IHC, and the data provided should be as granular as available.

EE - BHC or IHC specification (CACBP799)
The (unstressed) EE metric used to calculate CVA for each tenor bucket. Along each simulation path, the exposure at time t used to estimate EE(t) should be non-negative; if any exposures along a simulation path calculated at time t are negative, these should be set to 0 before calculating the expected value. The EE reference point refers to the end-point of the time bucket between time t and t-1. A time bucket is considered the time between time t and time t-1. Indicate in separate methodology notes if another approach is used (e.g., average over time bucket, mid-point, etc.).
EE (unstressed) calculated using the BHC’s or IHC’s own specification.

**Marginal PD (CACBQ451)**
Value provided should be the interpolated unilateral marginal PD for each time bucket between time t and t-1. For most BHCs and IHCs, marginal PD will reflect default probability over tenor bucket and be equivalent to the difference between the cumulative PD at the beginning and the end of the tenor bucket. If not, provide additional explanation. PDs should not be conditioned on the survival of the BHC or IHC.

**LGD (CVA) (CACBQ667)**
Loss Given Default (1-Recovery Rate) used to calculate CVA.

**Discount factor (CACBR486)**
Report discount factor used to calculate unstressed CVA. The discount factor should be roughly equal to e^{-zt} or (1+z)^{-t}, where z is the value of the zero curve at time t for the LIBOR or some other risk free rate.

**Stressed EE - FR scenario & FR specification (Severely Adverse - CACBR487; Adverse - CACBR488)**
Stressed EE calculated under the Federal Reserve (FR) shock scenario using the FR specification. Calculate the EE under the FR specification with a 10 day margin period of risk (MPOR) for all counterparties for which collateral is collected, and exclude the collection of additional collateral due to downgrade of a counterparty (i.e., downgrade triggers).

**Stressed EE - BHC or IHC scenario & BHC or IHC specification (CACBR491)**
Stressed EE calculated under the BHC or IHC shock scenario using the BHC’s and IHC’s own specification.

**Stressed marginal PD (Severely Adverse - CACBR492; Adverse - CACBR493; BHC or IHC - CACBR494)**
The (unilateral) marginal PD associated with the counterparty’s stressed spread. PDs should not be conditioned on the survival of the BHC or IHC.

**Stressed LGD (CVA) (Severely Adverse - CACBR495; Adverse - CACBR496; BHC or IHC - CACBR497)**
LGD used to calculate CVA in the applicable stressed scenario.

**Stressed LGD (PD) (Severely Adverse - CACBR498; Adverse - CACBR499; BHC or IHC - CACBR500)**
LGD used to calculate PD in the applicable stressed scenario.

**Stressed Discount Factor (Severely Adverse - CACBR523; Adverse - CACBR524; BHC or IHC - CACBR525)**
Report the discount factor used to calculate CVA in the applicable stressed scenario.
L.3—Credit Quality by Counterparty, Top counterparties comprising 95% of firm CVA, ranked by CVA

Column Instructions

Rank (CACVM899)
Report the rank of the consolidated/parent counterparty as ordered by CVA.

Counterparty name (CACQM900)
Report counterparty name that is alphabetically recognizable rather than an alphanumeric code. As in the overall instruction, consolidated group/parent level counterparty name should be reported.

Counterparty ID (CACQM901)
Report the unique identifier (for example, alphanumeric) assigned to the counterparty name. The counterparty ID must be unique and consistent across all sub-schedules in this schedule.

Legal Entity Identifier (LEI) (CACQ9224)
Report the official LEI of the reported entity whenever available.

Netting set ID (optional) (CACQM902)
This field is optional. Netting sets should map to ISDA master netting agreements.

Sub-netting set ID (optional) (CACQM903)
This field is optional. Used if CVA is calculated below the netting set level.

Industry Code (CACQR620)
Report the four to six digit numeric code that describes the primary business activity of the parent/consolidated entity according to the North American Industry Classification System (NAICS). Six digit code required for all financial counterparties.

Country (CACQM905)
Report the country of domicile of the counterparty. BHCs and IHCs may also report country of risk, but the firm must then provide details in the methodology documentation, including the list of counterparties for whom this alternate approach is selected. Countries should be identified using the standard ISO two-letter codes available at https://www.iso.org/. For supranational entities report “XX.”

Internal rating (CACQM906)
Report the BHC’s or IHC’s internal rating of the counterparty. If there are multiple ratings associated with the different netting sets of the counterparty, the mean or median internal rating should be used. Elaborate in the documentation the approach to selecting the internal rating for these types of counterparties. As a reminder, even if there are multiple internal ratings for a counterparty, there is always only one CDS for that counterparty. All data should be reported at the level at which CVA is calculated; thus every counterparty must have only one CDS spread associated with it. See above for definition of a counterparty.

External rating (CACQM907)
Report the external rating equivalent to the counterparty’s internal rating, not the external rating associated with the specific counterparty. Provide an external rating from a Nationally Recognized Statistical Rating Organization (NRSRO).
Time period (CACQR501)
The date for which the CDS (or other input) applies. For a one year CDS spread, enter "1". For grid pricing, do not enter the interpolated CDS spreads. Enter only the dates for which market data was available.

Market spread (bps) (CACQR502)
Enter the market value. If this value comes from a proxy grid, enter the value from the grid. The whole grid is not necessary. For example, if the grid is computed based on 1, 3, 5, and 10 years spreads, enter only 1, 3, 5, and 10 year data. All spread data should be reported as the all-in-cost spread, with any upfront costs incorporated into the current all-in spread.

Spread adjustment (bps) (CACQR503)
Provide the amount and operator (e.g., "*" and "+") of adjustments (in bps), if any, applied to the market spread. This field should be blank if no add-on is used.

Spread (bps) used in CVA calculation (CACQR504)
Enter the value used in the CVA calculation. This may be left blank if the market spread of the single name or proxy is used without any adjustment.

Stressed spreads (Severely Adverse - CACQR505; Adverse - CACQR506; BHC or IHC - CACQR507)
The stressed values of CDS spreads used in the stressed CVA calculation.

Mapping approach (CACQR508)
Indicate the type of proxy mapping approach used. Report either Single name own or Proxy in this field. Single name own indicates that the single name reference entity is the same as the counterparty name. Proxy indicates that the counterparty's own spread was not used; rather, a proxy spread was used.

Proxy mapping approach (CACQR509)
If single name own approach is not used, indicate the type of proxy mapping approach used. Report one of the following: Single name-related party, Industry (indicate industry based on list provided above), Ratings class (indicate the rating; e.g., AAA, AA), Industry-rating, Industry-geography, Industry-rating-geography, Rating-geography, or Other. This field may be left blank when mapping approach is Single name own.

Proxy name (CACQR510)
Identify the specific proxy used.

Market input type (CACQR511)
Indicate the type of market input used, by reporting one of the following in this field: CDS spreads, Bond spreads, KMV-EDFs, or Other.

Ticker / identifier (CACQR512)
Where applicable, enter the ticker number used (e.g., CDX IG AA, single name ticker).

Report date (CACQR513)
Enter the date of the market data.

Source (CACQR514)
Enter the source of the market data (e.g., Bloomberg, Markit).

Comments (CACQR515)
Enter any relevant comments.
L.4— Aggregate and Top 10 CVA Sensitivities by Risk Factor

This schedule collects sensitivity information of aggregate asset-side CVA based on changes in underlying risk factors. A sensitivity refers to a 1 unit change in the risk factor, and a slide refers to a larger change in the risk factor. Report an increase in CVA as a positive figure. Reported figures should be gross of CVA hedges. Sensitivities are collected in aggregate, i.e. across all positions for which CVA is taken, and for the 10 counterparties with the largest sensitivities to a given risk factor (i.e. top 10 by factor). Please report at the consolidated group/parent level, reporting only 10 entries per risk factor.

Aggregate CVA sensitivities and slides
The BHC or IHC may provide their own values for slides (e.g., +20bps instead of +10bps). However, if a BHC or IHC chooses to report slides other than those listed, at least one slide must be consistent with the size of the shock to that risk factor under the FR scenario. All slides should be reported only if they are based on a full revaluation of the portfolio given the change in the risk factor; slides should not be reported if they are simple linear scaling of the associated sensitivity. At a minimum there should be slides that represent a significant positive and negative move for that risk factor. For credit, when a basis point move is requested, this refers to an absolute move in the risk factor, and when a percentage move is requested, this refers to the relative move in the risk factor.

Sensitivities for top 10 counterparties
For each risk factor, report the change in CVA for each of the top 10 counterparties most sensitive to a 1bp or 1% increase, depending on risk factor. Report an increase in CVA as a positive figure. Reported sensitivities should be gross of CVA hedges.

Other material sensitivities
Material sensitivities are other large and/or important risk factors for the BHC or IHC. Add the relevant risk factors for the BHC or IHC. This information is reported across all counterparties for each material sensitivity; unlike prescribed risk factors, there is currently no requirement to report top 10 counterparties for each “other material sensitivity”. The label must clearly identify the risk factor. If an additional risk factor is provided that is not listed in the template, provide a description of this sensitivity in the supporting documentation. For example, for equity indices, include a reference to the country or region to which index corresponds.

Item Instructions

Risk factor category (CACUR526)
Report the risk factor category associated with the reported sensitivity. The risk factors consist of specified factors (see report form) and other material sensitivities that are determined by the respondent.

Risk factor description (CACUW899)
Report a brief description of the risk factor.

Counterparty name (CACQM900)
Report counterparty name that is alphabetically recognizable rather than an alphanumeric code. As in the overall instruction, consolidated group/parent level counterparty name should be reported.

Counterparty ID (CACQM901)
Report the unique identifier (for example, alphanumeric) assigned to the counterparty name. The counterparty ID must be unique and consistent across all sub-schedules in this schedule.
Risk factor slide (CACUR527)
Report the movement of the risk factor associated with the reported sensitivity.

Risk sensitivity (CACUR528)
Report aggregate asset-side CVA, gross of CVA hedges, based on the associated change in underlying risk factor.
L.5— Derivatives and Securities Financing Transactions (SFT) Profile

This sub-schedule collects information about all top counterparties, G-7 sovereign and CCPs to SFTs and/or derivative positions at the level of position netting. The first sub-schedule (L.5.1) is intended to identify the counterparties to these types of positions for all ranking methodologies and associated exposures. Counterparties must be ranked by each methodology to determine which must be reported. All G-7 sovereigns and designated CCPs should be reported, regardless of which ranking methodology is used, in addition to the Top 25 counterparties by ranking methodologies 1, 2, 3, 4 (including non-G-7s sovereigns and non CCPs) as specified below.

For counterparties reported on sub-schedule L.5.2, only ranking methodologies 1 and 2 should apply. For counterparties reported on sub-schedule L.5.4, only ranking methodologies 3 and 4 should apply.

For non-CCAR (unstressed) quarter, all G-7 sovereigns and designated CCPs plus Top 25 non-G-7/non CCP counterparties should be reported, ranked by the following ranking methodologies.

Ranking Methodologies for non G-7/non CCP counterparties as of non-CCAR (unstressed) quarter:  
1. Top 25 non-sovereign and non-CCP counterparties by SFT amount posted.  
2. Top 25 non-sovereign counterparties by SFT Net CE.  
3. Top 25 non-sovereign counterparties by derivatives notional.  
4. Top 25 non-sovereign counterparties by derivatives Net CE.

For as-of-CCAR (stressed) quarter, all G-7 sovereigns and CCPs plus Top 25 non-G-7/non CCP counterparties should be reported, ranked by the following ranking methodologies. For ranking methodologies 2 and 4 which use Stressed Net CE, the amount of FR Stressed Net Current Exposure should be reported for each scenario.

Ranking Methodologies for non G-7/non CCP counterparties as of CCAR (stressed) quarter:  
1. Top 25 non-sovereign and non-CCP counterparties by SFT amount posted.  
2. Top 25 non-sovereign counterparties by Stressed SFT Net CE.  
3. Top 25 non-sovereign counterparties by derivatives notional.  
4. Top 25 non-sovereign counterparties by Stressed derivatives Net CE.

For SFTs, exclude intraday transactions and prime brokerage margin lending. Include situations in which the firm is acting as a principal or on behalf of a client (agent) for which lender indemnification has been provided against the borrower’s default. The counterparty to be reported is the consolidated organization that is a legal principal in the transaction (i.e. not the agent).

For derivatives, each consolidated counterparty’s exposure amounts reported on this schedule should be calculated using the same netting methodology as used in sub-schedules L.1a-L.1d. For example, the aggregate of the positive derivative mark-to-market netting set information for a consolidated counterparty/ legal entity should equal the Gross CE for that same counterparty on L.1. While there are cross-netting and other exceptions that prevent exact equivalence, the amounts should generally be the same.

Reported mark-to-market amounts must reflect the positive or negative contribution to exposure upon counterparty default and close-out netting. For example, if margin or collateral is posted to a counterparty, this would be reported as a positive amount and if collateral is received from a counterparty, this would be reported a negative amount. In the case of netting collateral posted against collateral received, net posted positions would be reported as a positive amount and net received positions would be reported as a negative amount. Similarly, if a position has positive mark-to-market value from the perspective of the
respondent, the mark-to-market value would be reported as positive and reflected as positive when performing netting computations against negative mark-to-market positions. Additionally, purchased single-name CDS hedge notional amounts must be reflected as negative, and sold single-name CDS exposure must be reflected as positive.

For positions with no legal agreement, mark-to-market amounts can be aggregated and reported as a single record and must reflect actual mark-to-market amounts. The aggregated record must have the item Legal Enforceability reported as “N” and Netting Level should be reported as ”None”.

All designated CCPs and G-7 sovereign counterparties should be reported, regardless of the which ranking methodology is used.

Netting Agreement Reporting:
Information must be reported for each netting agreement held with a legal entity of a consolidated counterparty organization, even if the net current exposure for a given netting agreement is zero. For example, if a counterparty has two subsidiaries, and two netting agreements have been executed with the first subsidiary and one agreement with the second subsidiary, then three lines of information would be reported for that counterparty. If there are positions with a counterparty where no bilateral close-out netting agreement exists, those must be reported as a single record with Legal Enforceability identified as “N” and Agreement Type identified as ”None”.

L.5.1— Derivative and SFT information by counterparty legal entity and netting set/agreement

Line Item Instructions

Report the information required by each column for all designated CCPs, G-7 sovereign entities, and the top consolidated/parent counterparties as ranked by all methodologies outlined in the general instructions above for this sub-schedule. If a counterparty would be reported under more than one ranking methodology, the information for that counterparty must only be reported once.

There are columns (Rank Methodology and Rank) in which each ranking methodology and rank should be identified for each reported counterparties. All 4 ranking methodologies should be reported in one table in the firm’s XML submission.

Column Instructions

Rank Methodology (CACNJJD60)
Indicate which ranking methodology applies to the reported counterparties.

Rank (CACNM899)
The rank of the consolidated/parent counterparty as ordered by the rank methodology indicated.

Counterparty Name (CACNM900)
The name of the consolidated/parent organization that is either a CCP, G-7 sovereign country, or one of the top 25 counterparties.

Consolidated/Parent Entity Counterparty ID (CACNM901)
A unique identifier (for example, alphanumeric) assigned to the counterparty reported in the Counterparty Name column, which must be the consolidated/parent entity. The counterparty ID must be unique and consistent across all sub-schedules.
Counterparty Legal Entity Name (CACN9017)
The name of the legal entity with whom the netting agreement was executed. This could be a subsidiary or affiliate of the consolidated/parent organization or the consolidated/parent organization itself.

Legal Entity ID (CACNR621)
A unique identifier (for example, alphanumeric) assigned to the legal entity reported in the Counterparty Legal Entity column, which must correspond to the consolidated/parent entity. This ID must be unique and consistent across all sub-schedules.

Netting Set ID (CACNM902)
A unique identifier (for example, alphanumeric) assigned to the netting agreement being reported. If a netting set ID is not reported (for example, given no netting agreement in place) this field must be populated with “NA”.

Industry Code (CACNR620)
Report the four to six digit numeric code that describes the primary business activity of the legal entity according to the North American Industry Classification System (NAICS). Six digit code required for all financial counterparties.

Country (CACNM905)
Report the country of domicile of the counterparty. BHCs and IHCs may also report country of risk, but the firm must then provide details in the methodology documentation, including the list of counterparties for whom this alternate approach is selected. Countries should be identified using the standard ISO two-letter codes available at https://www.iso.org/. For supranational entities report “XX.”

Internal rating (CACNM906)
Report the BHC’s or IHC’s internal rating of the counterparty. If there are multiple ratings associated with the different netting sets of the counterparty, the mean or median internal rating should be used. Elaborate in the documentation the approach to selecting the internal rating for these types of counterparties. As a reminder, even if there are multiple internal ratings for a counterparty, there is always only one CDS for that counterparty. All data should be reported at the level at which CVA is calculated; thus every counterparty must have only one CDS spread associated with it. See above for definition of a counterparty.

External rating (CACNM907)
Report the external rating equivalent to the counterparty's internal rating, not the external rating associated with the specific counterparty. Provide an external rating from a Nationally Recognized Statistical Rating Organization (NRSRO).

Agreement Type (CACNR529)
For SFTs, allowable entries are SFT Repo, SFT Sec Lending, and SFT Cross-product. “Repo” covers both repos and reverse repos, while “SFT Sec Lending” covers both securities lending and securities borrowing agreements. “SFT Cross-product (combined)” agreements cover netting agreements where there is cross-product netting (e.g. reverse repo and securities borrowing), if a legal opinion on legal enforceability on close-out has been obtained.

For derivatives, when at least one of the netting sets comprising this counterparty has a legally enforceable collateral agreement, for example, Credit Support Annex (CSA), identify the type of CSA. Allowable entries in this case are Derivatives 1-way CSA, Derivatives 2-way SCSA, Derivatives 2-way old CSA, Derivatives Centrally Cleared. When there is no legally enforceable collateral agreement, allowable entry is “Derivatives no CSA.”
When agreements cover netting agreements where there is cross-product netting between SFTs and derivatives, report “SFT Derivatives Cross-product”.

**Agreement Role (CACNR530)**
For SFTs, identify whether the respondent is defined in the netting agreement as a principal to the transactions, an agent on behalf of a client, or a client. Allowable entries are: Principal, Agent Client. These entries are only applicable for SFTs. For derivatives, report “NA”..

**Legal Enforceability (CACNR534)**
Per your firm’s assessment, indicate whether the netting agreement is legally enforceable in the jurisdiction of the counterparty legal entity. Such a situation might arise if the counterparty legal entity is a sovereign, and close-out netting is not enforceable in that jurisdiction. Possible options are Yes and No (reported as “Y” or “N”). Note that for situations for which there is no close-out netting agreement between the parties (i.e. no netting), this field should be marked as “N”.

**Initial Margin (CACSR551)**
Report the net amount of initial margin posted to the reporting firm by the counterparty legal entity if the margin posted by the reporting firm to the counterparty legal entity is not held in a bankruptcy remote account; and report only the margin the reporting firm received from the counterparty legal entity if the margin posted by the reporting firm to the counterparty legal entity is held in a bankruptcy remote account. Do not report the margin that the reporting firm posted to the counterparty legal entity in a manner that is held in a bankruptcy remote account. The initial margin may be in the form of cash and/or securities; report the aggregate MtM value of cash and securities. Margin that was called but not yet exchanged should not be included; and only those margin that was actually exchanged should be reported.

**Non-Cash Collateral Type (CACSR552)**
Identify the type(s) of non-cash collateral or initial margin allowed under the agreement. All posted collateral/initial margin types should be reported and separated by a comma. Possible options are: U.S. Debt, Non-U.S. Sovereign Debt, Investment Grade Corporate Debt, Public Equity, Public Convertibles, and Other.

**Excess Variation Margin (for CCPs) (CACSR553)**
The total amount of excess variation margin (mark-to-market margin posted by the BHC or IHC in excess of the CCP’s requirements) posted to the CCP legal entity under the agreement if the margin is not held in a bankruptcy remote account. Do not report the excess variation margin held in a bankruptcy remote account. Margin that was called but not yet exchanged should not be reported. Only margin that was actually exchanged should be reported.

**Default Fund (for CCPs) (CACSR554)**
The amount required under the agreement to be contributed to the default fund of a CCP legal entity. This amount, if positive, must be reported for all CCPs including those with which the respondent has no active trades.

**Threshold CP (CACSR555)**
The threshold amount for the BHC’s or IHC’s counterparty, which is equivalent to the amount of exposure that the BHC or IHC party is willing to have to its counterparty before the counterparty is required to post collateral to the BHC or IHC.

**Threshold BHC or IHC (CACSR556)**
The threshold amount for the BHC or IHC, which is equivalent to the amount of exposure that its counterparty is willing to have to the BHC or IHC before the BHC or IHC is required to post collateral to its counterparty.
Minimum Transfer Amount CP (CACSR557)
The minimum amount that must be transferred to the counterparty for any margin call.

Minimum Transfer Amount BHC or IHC (CACSR558)
The minimum amount that must be transferred to the BHC or IHC for any margin call.

Margining Frequency (CACSR559)
The frequency (in business days) of margin calls, per the netting agreement.

CSA contractual features (non-vanilla) (CACSR560)
Indicates if any of the transactions conducted under the agreement have any non-vanilla contractual features. Possible options are: Downgrade Trigger, Break Clause – Mandatory, Break Clause – Optional, and Other. If more than one applies for a given netting set, list them all (comma separated).

Wrong Way Risk Position (CACNR535)
Indicates if any of the individual transactions conducted under the agreement with the given counterparty legal entity is considered a wrong-way risk position. Possible options are Specific, General, and None. The BHC and IHC should use its internal BAU risk management process to determine whether an given transaction with the specific counterparty legal entity is a wrong-way risk position, and if so whether it constitutes “specific” WWR or not. If a netting agreement contains both specific WWR and non-specific WRR positions, report as Specific.

Net CE SFTs (CACNM912)
The current exposure to the counterparty legal entity for the netting set under close-out. For a single netting set, this is calculated as the greater of zero and the difference between the aggregate mark-to-market value of securities or cash posted to the counterparty legal entity and the aggregate mark-to-market value of securities or cash received from that counterparty legal entity. Net CE should not reflect collateral (cash or securities) that was called but not yet exchanged. Only collateral that was actually exchanged should be incorporated in the Net CE reporting.

Stressed Net CE SFTs (Severely Adverse –CACNR538; Adverse – CACNR539)
The full revaluation of Net CE for SFTs under the FR stressed market environment – one value for each supervisory global market shock scenario. The global market shock should be applied to all assets, including collateral, prior to application of the max function.

Net CE Derivatives (CACSJF40)
The current exposure to the counterparty legal entity for the netting set under close-out for derivatives. For a single netting set, this is calculated as the greater of zero and the difference between the aggregate mark-to-market value of the derivative positions with the counterparty legal entity and the aggregate mark-to-market value of collateral received from that counterparty legal entity. This should be the same definition as in sub-schedule L.1.

Stressed Net CE Derivatives (Severely Adverse-CACSR564; Adverse-CACSR565)
The full revaluation of Net CE Derivatives under the FR stressed market environment – one value for each supervisory global market shock scenario. The global market shock should be applied to all assets, including collateral, prior to application of the max function.

Unstressed MtM (Derivatives) (CACSR566)
The mark-to-market value of derivative positions in the record, not including collateral but including netting of positions where legally binding. This could be a positive or negative value. The aggregate of the positive amounts for a given consolidated/parent counterparty should be equivalent to the derivative Gross CE for the consolidated/parent counterparty on sub-schedule L.1a-d. When a legally-enforceable
netting agreement is not in-place, this should be a sum of the positive and negative mark-to-market values across positions associated with the consolidated/parent counterparty.

**Unstressed MtM Posted (SFTs) (CACNR544)**
The gross cumulative mark-to-market (MtM) value of the cash and assets posted to the legal entity under the netting agreement. If the netting agreement comprises several netting sets, report the sum of the MtM posted values for those netting sets that are in the money (have a net positive MtM amount).

**Unstressed MtM Received (SFTs) (CACNR545)**
The gross cumulative mark-to-market (MtM) value of the cash and assets received from the legal entity under the netting agreement. If the netting agreement comprises several netting sets, report the sum of the MtM received values for those netting sets that are in the money (have a net positive MtM amount). These amounts must be reported reflecting their actual mark-to-market amount, i.e., positive mark-to-market values should be reported as positive.

**Stressed MtM (Derivatives) (Severely Adverse - CACSR567; Adverse - CACSR568)**
The mark-to-market value of exposure based on the full revaluation of all derivatives under the agreement, as revalued according to the supervisory global market shock scenarios, not including collateral but including netting of positions where legally binding. This could be a positive or negative value.

**Stressed MtM Posted (SFTs) (Severely Adverse - CACNR540; Adverse - CACNR541)**
The gross cumulative MtM values using full revaluation under each supervisory global market shock scenario of the cash and assets reported in the mark-to-market Posted column. If the netting agreement comprises several netting sets, report the sum of the Stressed MtM posted values for those netting sets that are in the money (have a net positive MtM amount).

**Stressed MtM Received (SFTs) (Severely Adverse - CACNR542; Adverse - CACNR543)**
The gross cumulative MtM values using full revaluation under each supervisory global market shock scenario of the cash and assets reported in the mark-to-market Received column. If the netting agreement comprises several netting sets, report the sum of the Stressed MtM received values for those netting sets that are in the money (have a net positive MtM amount). These amounts must be reported reflecting their actual mark-to-market amount, i.e., positive mark-to-market values should be reported as positive.

**Unstressed MtM Cash Collateral (Derivatives) (USD – CACSJF43; EUR – CACSJF44; GBP – CACSJF45; JPY – CACSJF46; Other – CACSJF47)**
The mark-to-market value of net cash collateral posted by the counterparty legal entity under the netting agreement, in the respective currency. This could be a positive or negative value. All collateral reported should be eligible financial collateral. This amount is sub-divided by currency in the subsequent columns.

**Total Unstressed MtM Collateral (Derivatives) (CACSR575)**
The net mark-to-market value of all collateral posted by the legal entity under the netting agreement. All collateral reported should be eligible financial collateral.

The mark-to-market value of the net cash collateral reported in column Total Unstressed MtM Cash Collateral as revalued under the supervisory global market shock scenarios. This amount is sub-divided by currency in the subsequent columns.

**Total Stressed MtM Collateral (Derivatives) (Severely Adverse - CACSR578; Adverse - CACSR579)**
The mark-to-market value of all collateral reported in the column Total Unstressed MtM Collateral, as revalued under the supervisory global market shock scenarios.
**CDS Reference Entity Type (CACNR546)**
The type of institution for which the five-year CDS spread is being reported. The possible options are CP Legal Entity, CP Parent, and Proxy. Use Proxy if and only if there is no internal mark for the counterparty legal entity or its parent and provide the BHC’s or IHC’s internal proxy CDS spread under Counterparty Credit Spread and a commercially available CDS identifier under Counterparty Legal Entity Identifier (see below). In all other cases, if there is an internal mark for the counterparty legal entity, choose “CP Legal Entity”, otherwise choose “CP Parent”.

**5Y CDS Spread (bp) (CACNR547)**
The five-year CDS spread for counterparty for which the reference entity is either the counterparty legal entity, the consolidated/parent organization, or the Proxy.

**Counterparty Legal Entity Identifier (LEI) (CACN9224)**
The official globally recognized legal entity identifier (LEI) of the counterparty legal entity. If an LEI is unavailable, report a CDS identifier that is commercially available associated with the reported CDS spread (such as a Markit RED code or Bloomberg CDS ticker). In case a commercially available CDS identifier is used, specify the identifier as a string in the form “<Source> | <CDS identifier>”.

**Wrong Way Risk Hedge (CACSR583)**
Indicates if any portion of the CDS hedges are wrong-way risk positions with respect to the CDS counterparty and the CDS reference entity. The BHC or IHC should use its internal BAU risk management process to determine whether the CDS protection (e.g. sovereign CDS) with the specific counterparty legal entity (e.g. bank in the sovereign) is a wrong-way hedge. Possible options are “Y” and “N”.

**CDS Hedge Notional (CACSR584)**
The notional amount of specific CDS hedges on the derivatives under the agreement. The specific CDS hedges that are allowed to be included are bought plain-vanilla CDS protection (single-name and index, where the index includes the counterparty legal entity as one of the reference entities) which do not have any non-vanilla contractual features, and do not constitute wrong-way positions.

**Stressed CVA (Severely Adverse - CACSR590; Adverse - CACSR591)**
CVA for the derivatives within the agreement as evaluated under the supervisory global market shock scenarios.

**L.5.2—SFT assets posted and received by counterparty legal entity and netting set/agreement and asset category**

**Line Item Instructions**
Report the information required by each column for each consolidated/parent counterparty reported in L.5.1, including the CCPs and G-7 sovereign countries, with whom SFTs are held. In the case a CCP itself is the bi-lateral counterparty to a SFT, then the CCP must be included in the consideration of which bi-lateral counterparties are the "top 25" as ranked by the ranking methodologies. **Information in this schedule is reported at the level of netting agreements.**

Neting Agreement Reporting:
Information must be reported for each netting agreement held with a legal entity of a consolidated/parent counterparty organization, even if the net current exposure for a given netting agreement is zero. For example, if a counterparty has two subsidiaries, and two netting agreements have been executed with the first subsidiary and one agreement with the second subsidiary, then three lines of information would be reported for that counterparty. These must correspond to the netting agreements and associated netting
agreement IDs reported in L.5.1.

**Item Instructions**

**Rank Methodology (CACNJD60)**
Indicate which ranking methodology applies to the reported counterparties.

**Rank (CACNM899)**
The rank of the consolidated/parent counterparty as ordered according to the rank methodology indicated. For CCPs, specify rank as “CCP”; for G-7 sovereigns, specify rank as “G7”.

**Counterparty Name (CACNM900)**
The name of the consolidated/parent organization that is either a CCP, G-7 sovereign country, or one of the top 25 counterparties.

**Consolidated/Parent Entity Counterparty ID (CACNM901)**
a unique identifier (for example, alphanumeric) assigned to the counterparty reported in the Counterparty Name column. The counterparty ID must be unique and consistent across sub-schedules in this schedule.

**Counterparty Legal Entity Name (CACN9017)**
The name of the legal entity with whom the netting agreement was executed. This could be a subsidiary or affiliate of the consolidated/parent organization or the consolidated/parent organization itself.

**Legal Entity ID (CACNR621)**
a unique identifier (for example, alphanumeric) assigned to the legal entity reported in the Counterparty Legal Entity column, which must correspond to the consolidated/parent entity. This ID must be unique and consistent across sub-schedules.

**Netting Set ID (CACNM902)**
a unique identifier (for example, alphanumeric) assigned to the netting agreement being reported.

**Asset Categories**

**Posted:** the aggregate mark-to-market value of the asset category/sub-category posted to a consolidated/parent counterparty as part of a securities lending/borrowing or repurchase/reverse repurchase agreement. Include situations in which the firm is acting as a principal or on behalf of a client for which lender indemnification has been provided against the borrower’s default. If the netting agreement comprises several netting sets, report the sum of the posted values for those netting sets that are “in the money”, i.e. have a net positive MtM amount for those netting sets for which the net (stressed) exposure (i.e. exposure net of collateral) is positive under that scenario.

**Received:** the aggregate mark-to-market value of the asset category/sub-category received from a consolidated/parent counterparty as part of a securities lending/borrowing or repurchase/reverse repurchase agreement. Include situations in which the firm is acting as a principal or on behalf of a client for which lender indemnification has been provided against the borrower’s default. If the netting agreement comprises several netting sets, report the sum of the received values for those netting sets that are “in the money”, i.e. have a net positive MtM amount for those netting sets for which the net (stressed) exposure (i.e. exposure net of collateral) is positive under that scenario. These amounts must be reported reflecting their actual mark-to-market amount, i.e. positive mark-to-market values should be reported as positive.
**Central Debt**
This category includes debt obligations issued by a sovereign entity or a government-sponsored enterprise (G.S.E.). This category does not include inflation-indexed securities. The amounts must be separated by the sovereign entity sub-categories: United States, Germany, United Kingdom & France, Other Eurozone, Japan, and Other.

**Corporate Bonds – Advanced Economies**
This category includes all debt obligations issued by any public or private entity that is not backed by the full faith and credit of a single sovereign country; specifically it includes supranationals. This category does not include commercial paper. The issuing entity must be domiciled in a sovereign that is defined as an advanced economy in the instructions for schedule F. The amounts must be separated into two sub-categories: Investment Grade (IG) and Sub-Investment Grade (Sub-IG) as based on the rating of the specific issuances.

**L.5.3—Aggregate SFTs by Internal Rating**

**Line Item Instructions**
Information must be reported for all counterparties as grouped by internal rating, one line of information for each internal rating. Posted and received amounts by asset category should be reported as actual mark-to-market amounts.

**Internal rating (CACNM906)**
Report the BHC’s or IHC’s internal rating associated with the group of counterparties included in the reported amounts. Counterparties must be grouped and reported for each internal rating.

**External rating (CACNM907)**
Report the external rating equivalent to the counterparty's internal rating. Provide an external rating from a Nationally Recognized Statistical Rating Organization (NRSRO).
Net CE (CACNM912)
Report the aggregate Net CE of the counterparties associated with the reported rating bucket.

Stressed Net CE (Severely Adverse - CACNFD73; Adverse - CACNFD74; BHC or IHC - CACNFD75)
Report the full revaluation of Net CE under applicable stressed conditions. Hold collateral constant; assume no additional collection of collateral, but do apply stressed conditions to collateral.

Column Instructions (Asset Categories)

Indemnified Securities Lent (Notional Balance) (CACNFD76)
This category includes securities lent for which the respondent has provided borrower default indemnification to the lender.

Indemnified Cash Collateral Reinvestment (Notional Balance) (CACNFD77)
This category includes cash that has been delivered as collateral for which the respondent has provided default indemnification to the lender.

US Treasury & Agency (Repo Posted - CACNFD78; Repo Received - CACNFD79; Sec. Lending Posted - CACNFD94; Sec. Lending Received - CACNFD95)
This category includes all U.S. Treasury securities, obligations issued by U.S. government agencies, and obligations issued by U.S. government-sponsored enterprises (GSEs) as defined in the FR Y-9C.

Agency MBS (Repo Posted - CACNFD80; Repo Received - CACNFD81; Sec. Lending Posted - CACNFD96; Sec. Lending Received - CACNFD97)
This category includes mortgage-backed securities issued by a U.S. government agency as defined above.

Equities (Repo Posted - CACNFD82; Repo Received - CACNFD83; Sec. Lending Posted - CACNFD98; Sec. Lending Received - CACNFD99)
This category includes publicly traded and privately issued equity securities.

Corporate Bonds (Repo Posted - CACNFD84; Repo Received - CACNFD85; Sec. Lending Posted - CACNFE00; Sec. Lending Received - CACNFE01)
This category includes all debt obligations issued by any public or private entity that is not backed by the full faith and credit of a single sovereign country; specifically, it includes supranationals.

Non-Agency (ABS, RMBS) (Repo Posted - CACNFD86; Repo Received - CACNFD87; Sec. Lending Posted - CACNFE02; Sec. Lending Received - CACNFE03)
This category includes asset-backed securities and residential mortgage-backed securities not issued by a U.S. government agency as defined above.

Sovereigns (Repo Posted - CACNFD88; Repo Received - CACNFD89; Sec. Lending Posted - CACNFE04; Sec. Lending Received - CACNFE05)
This category includes debt issued by any sovereign state or organization backed by the full faith and credit of a sovereign state other than debt issued by the U.S. Treasury or any U.S. Agency.

Other (Repo Posted - CACNFD90; Repo Received - CACNFD91; Sec. Lending Posted - CACNFE06; Sec. Lending Received - CACNFE07)
This category includes any asset not defined in any of the above asset categories (US Treasury, Agency MBS, Equities, Corporate Bonds, Non-Agency (ABS, RMBS), and Sovereigns) and excludes cash.

Cash (Repo Posted - CACNFD92; Repo Received - CACNFD93; Sec. Lending Posted - CACNFE08; Sec. Lending Received - CACNFE09)
This category includes currency to be reported in U.S. dollar amount.
L.5.4—Derivative position detail by counterparty legal entity and netting set/agreement and asset category

Line item Instructions

Report the information required by each column for all CCPs, G-7 sovereign countries, and the top 25 counterparties that are not CCPs or G-7 sovereign countries. Information must be reported for each consolidated counterparty organization and associated legal entities and netting sets reported in sub-schedule L.5.1 with whom the respondent holds derivative positions. In the case a CCP itself is the bi-lateral counterparty to a derivative agreement, then the CCP must be included in the consideration of which bi-lateral counterparties are the "top 25" as ranked by the ranking methodologies.

Rank Methodology (CACSJD60)
Indicate which ranking methodology applies to the reported counterparties.

Rank (CACSM899)
The rank of the consolidated/parent counterparty as ordered according to rank methodology indicated. For CCPs, specify rank as “CCP”; for G-7 sovereigns, specify rank as “G7”.

Counterparty Name (CACSM900)
The name of the consolidated/parent organization that is either a CCP, G-7 sovereign country, or one of the top 25 counterparties.

Consolidated/Parent Entity Counterparty ID (CACSR619)
A unique identifier (for example, alphanumeric) assigned to the counterparty reported in the Counterparty Name column. The counterparty ID must be unique and consistent across sub-schedules in this schedule.

Counterparty Legal Entity Name (CACS9017)
The name of the legal entity with whom the netting agreement was executed. This could be a subsidiary or affiliate of the consolidated/parent organization or the consolidated/parent organization itself.

Legal Entity ID (CACSR621)
A unique identifier (for example, alphanumeric) assigned to the legal entity reported in the Counterparty Legal Entity column, which must correspond to the consolidated/parent entity. This ID must be unique and consistent across all sub-schedules.

Netting Set ID (CACSM902)
A unique identifier (for example, alphanumeric) assigned to the netting set being reported. Netting sets should map to ISDA master netting agreements.

Derivative Types
Report the unstressed and stressed mark-to-market exposure amounts for the categories of derivatives below. For any derivative contract that contains optionality, “vanilla” means American or European style with no additional contract features. All others should be classified as either “structured” or “exotic.” Derivative contracts that do not contain optionality are considered “vanilla.”

Schedule M—Balances

Schedule M.1 – Quarter-end Balances

For each line item listed below, report all loans and leases held for investment (HFI) or held for sale (HFS). Include the fair value of all loans held for investment and all loans held for sale that the holding company has elected to report at fair value under a fair value option (FVO). In column A report loans held for investment at amortized cost (HFI at AC) in domestic offices. In column B report loans held for sale or measured at fair value under a fair value option in domestic offices. In column C report loans held for investment at amortized cost in international offices. In column D report loans held for sale or measured at fair value under a fair value option in international offices. Report all dollar amounts in millions.

The balances reported here should be consistent with the balances reported on Schedule HC-C of the FR Y-9C for corresponding line items. For example, the reported balance of loans held in domestic offices secured by first liens on residential real estate (line 1.a.(1).(a), column A + line 1.a.(1).(a), column B + line 1.a.(1).(b), column A, + line 1.a.(1).(b), column B) should equal the balance of such loans reported on Schedule HC-C of the FR Y-9C (line 1.c.(2).(a), column B). A more comprehensive list of relationships between this schedule and the FR Y-9C will be included with the technical instructions provided to all submitting institutions.

**Line item 1.a.(1).(a), First mortgages**
Report first mortgage loans that meet the loan criteria defined in FR Y-9C, Schedule HC-C, line 1.c.(2).(a). Do not include first lien closed-end home equity loans.

**Line item 1.a.(1).(b), First lien HELOANs**
Report first lien closed-end home equity loans (HELOANs) that meet the loan criteria defined in FR Y-9C, Schedule HC-C, line 1.c.(2).(a). Do not include first mortgages.

**Line item 1.a.(2).(a), Junior lien HELOANs**
Report junior lien closed-end home equity loans (HELOANs) that meet the loan criteria defined in FR Y-9C, Schedule HC-C, line 1.c.(2).(b).

**Line item 1.a.(2).(b), HELOCs**
Report home equity lines of credit (HELOCs) that meet the loan criteria defined in FR Y-9C, Schedule HC-C, line 1.c.(1).

**Line item 1.b.(1), Construction and land development**
Report construction and land development (CLD) loans that meet the loan criteria defined in FR Y-9C, Schedule HC-C, lines 1.a.(1) and 1.a.(2).

**Line item 1.b.(2), Multifamily real estate**
Report multifamily real estate loans that meet the loan criteria defined in FR Y-9C, Schedule HC-C, line 1.d.

**Line item 1.b.(3).(a), Owner-occupied nonfarm nonresidential**
Report owner occupied nonfarm nonresidential loans that meet the loan criteria defined in FR Y-9C, Schedule HC-C, line 1.e.(1).

**Line item 1.b.(3).(b), Non-owner-occupied nonfarm nonresidential**
Report non-owner-occupied loans that meet the loan criteria defined in FR Y-9C, Schedule HC-C, line 1.e.(2).
Line item 1.c, Secured by farmland
Report loans secured by farmland that meet the loan criteria defined in FR Y-9C, Schedule HC-C, line 1.b.

Line item 2.a, Graded C&I loans
Report graded C&I loans included in FR Y-9C, Schedule HC-C, lines 4.a and 4.b. Also include non-purpose loans reported in lines 4.a and 4.b of Schedule HC-C of the FR Y-9C regardless of whether those loans are graded. Do not include scored or delinquency managed small business loans, small/medium enterprise (SME) cards, or corporate cards.

Line item 2.b, Small business loans
Report small business loans included in FR Y-9C, Schedule HC-C, lines 2.a, 2.b, 3, 4.a, 4.b, 7, 9.a, 9.b.(2), and 10.b. Small business loans are loans that are “scored” or “delinquency managed” for which a commercial internal risk rating is not used or that uses a different scale than other corporate loans. Do not include graded loans, SME cards, corporate cards, non-purpose loans, or loans for purchasing and carrying securities.

Line item 2.c, SME cards and corporate cards
Report SME card and corporate card loans included in FR Y-9C, Schedule HC-C, lines 4.a, 4.b, 6.a, 6.b, 6.d, and 9.b.(2). SME cards are credit card accounts where the loan is underwritten with the sole proprietor or primary business owner as an applicant. Corporate cards are employer-sponsored credit cards for use by a company’s employees. Only include cards where there is any individual liability associated with the sub-lines such that the individual borrower characteristics are taken into account during the underwriting decision and/or performance of the credit is reported to the credit bureaus. Do not include loans for which a commercially-graded corporation is ultimately responsible for repayment of credit losses (such loans should be reported as graded C&I loans or other commercial loans).

Line item 3.a, Bank cards
Report bank card loans included in FR Y-9C, Schedule HC-C, line 6.a. Do not include SME card and corporate card loans.

Line item 3.b, Charge cards
Report charge card loans to consumers included in FR Y-9C, Schedule HC-C, line 6.a and 6.d. Do not include SME card and corporate card loans or loans for which a commercially-graded corporation is ultimately responsible for repayment of credit losses.

Line item 4.a, Auto loans

Line item 4.b, Student loans

Line item 4.c, Non-purpose lending
Report non-purpose loans included in FR Y-9C, Schedule HC-C, lines 6.b and 6.d. Non-purpose loans are loans collateralized by securities made for any purpose other than purchasing or carrying securities.

Line item 4.d, Auto leases
Line item 4.e, Other consumer loans
Report all other consumer loans included in FR Y-9C, Schedule HC-C, lines 6.b and 6.d that are not reported elsewhere on this schedule.

Line item 4.f, Other consumer leases
Report all other consumer leases included in FR Y-9C, Schedule HC-C, line 10.a that are not reported elsewhere on this schedule.

Line item 5.a, Loans to foreign governments
Report graded loans to foreign governments included in FR Y-9C, Schedule HC-C, line 7. Also include non-purpose loans reported in line 7 of Schedule HC-C of the FR Y-9C regardless of whether those loans are graded. Do not include scored or delinquency managed loans reported as small business loans above.

Line item 5.b, Agricultural loans
Report graded agricultural loans included in FR Y-9C, Schedule HC-C, line 3. Also include non-purpose loans reported in line 3 of Schedule HC-C of the FR Y-9C regardless of whether those loans are graded. Do not include scored or delinquency managed loans reported as small business loans above.

Line item 5.c, Securities lending
Report all loans for purchasing or carrying securities included in FR Y-9C, Schedule HC-C, line 9.b.(1).

Line item 5.d, Loans to financial institutions
Report graded loans to financial institutions included in FR Y-9C, Schedule HC-C, lines 2.a, 2.b, and 9.a. Also include non-purpose loans reported in lines 2.a, 2.b, and 9.a of Schedule HC-C of the FR Y-9C regardless of whether those loans are graded. Do not include scored or delinquency managed loans reported as small business loans above.

Line item 5.e, Other commercial loans
Report other graded commercial loans included in FR Y-9C, Schedule HC-C, line 9.b.(2). Also include non-purpose loans reported in line 9.b.(2) of Schedule HC-C of the FR Y-9C regardless of whether those loans are graded. Do not include scored or delinquency managed loans reported as small business loans above, SME and corporate card loans reported as SME and corporate card loans, or charge cards reported as charge cards above.

Line item 5.f, Other commercial leases
Report other graded commercial leases included in FR Y-9C, Schedule HC-C, line 10.b. Also include non-purpose loans reported in line 10.b of Schedule HC-C of the FR Y-9C regardless of whether those loans are graded. Do not include scored or delinquency managed loans reported as small business loans above.
Schedule M.2 - FR Y-9C Reconciliation

For the select portfolios from Schedule M.1 listed below, report the balance of loans included in the indicated line items on Schedule HC-C of the FR Y-9C. In column A report loans held for investment at amortized cost (HFI at AC). In column B report loans held for sale (HFS) or measured at fair value under a fair value option (FVO). Report all dollar amounts in millions.

The balances reported here should be consistent with the balances reported on Schedule M.1 for the corresponding portfolios. For example, the reported balance of small business loans held for investment at amortized cost (lines 1.a to 1.h, column A) should equal the balance of such loans reported on Schedule M.1 (line 2.b, column A + line 2.b, column C). A more comprehensive list of relationships between this schedule, Schedule M.1, and the FR Y-9C will be included with the technical instructions provided to all submitting institutions.

1. Small business loans
   For each of the following line items under line 1, report the small business loans reported in line 2.b in Schedule M.1 that are included in the indicated line item on Schedule HC-C of the FR Y-9C:

   Line item 1.a - Report loans included in FR Y-9C, Schedule HC-C, lines 2.a and 2.b.
   Line item 1.g - Report loans included in FR Y-9C, Schedule HC-C, line 10.b.

2. SME cards and corporate cards
   For each of the following line items under line 2, report the SME card and corporate card loans reported in line 2.c in Schedule M.1 that are included in the indicated line item on Schedule HC-C of the FR Y-9C:

3. Charge cards
   For each of the following line items under line 3, report the charge card loans reported in line 3.b in Schedule M.1 that are included in the indicated line item on Schedule HC-C of the FR Y-9C:

4. Student loans
   For each of the following line items under line 4, report the student loans reported in line 4.b in Schedule M.1 that are included in the indicated line item on Schedule HC-C of the FR Y-9C:

5. Non-purpose consumer lending
For each of the following line items under line 5, report the non-purpose loans reported in line 4.c in Schedule M.1 that are included in the indicated line item on Schedule HC-C of the FR Y-9C:

Schedule M.3 - Principal Balance of Retail Loans in Domestic Offices Held for Investment at Amortized Cost by Purchase Credit Impairment

For each line item listed below, report the book value and unpaid principal balance (UPB) of all retail loans and leases held for investment at amortized cost (HFI at AC) in domestic offices by purchase credit impairment status. Do not include loans held for sale or loans measured at fair value under a fair value option. Do not include loans held in international offices. In column A report the book value of non-purchase credit impaired (non-PCI) loans. In column B report the UPB of non-PCI loans. In column C report the book value of purchase credit impaired (PCI) loans. In column D report the UPB of PCI loans. Report all dollar amounts in millions.

For the purposes of this schedule, the book value of a loan held for investment at amortized cost is the original cost of the loan less any write-downs associated with depreciation, amortization, or impairment costs. The UPB of the loan is the total principal amount outstanding as of the end of the reporting period and should not reflect any accounting based write-downs or purchase credit impairments.

The book value reported here should be consistent with the balances reported on Schedule M.1 for the corresponding portfolios. For example, the book value of first mortgages held for investment at amortized cost in domestic offices (line 1.a.(1).(a), column A + line 1.a.(1).(a), column C) should equal the balance of such loans reported on Schedule M.1 (line 1.a.(1).(a), column A). A more comprehensive list of relationships between this schedule and Schedule M.1 will be included with the technical instructions provided to all submitting institutions.

**1.a.(1).(a), First mortgages**
Report first mortgage loans that are reported in line 1.a.(1).(a) in Schedule M.1.

**1.a.(1).(b), First lien HELOANs**
Report first lien closed-end home equity loans (HELOANs) that are reported in line 1.a.(1).(b) in Schedule M.1.

**1.a.(2).(a), Junior lien HELOANs**
Report junior lien closed-end home equity loans (HELOANs) that are reported in line 1.a.(2).(a) in Schedule M.1.

**1.a.(2).(b), HELOCs**
Report home equity lines of credit (HELOCs) that are reported in line 1.a.(2).(b) in Schedule M.1.

**2.a., Bank cards**
Report bank card loans that are reported in line 3.a in Schedule M.1.
2.b., Charge cards
Report charge card loans that are reported in line 3.b in Schedule M.1.

3.a., Auto loans
Report auto loans that are reported in line 4.a in Schedule M.1.

3.b., All other consumer loans and leases
Report all other consumer loans and leases that are reported in lines 4.b, 4.c, 4.d, 4.e, and 4.f in Schedule M.1.
Appendix A: FR Y-14Q Supporting Documentation

Supporting Documentation for Schedule C – Regulatory Capital Instruments

Additional Information required for capital instrument issued (Tied to C.3: Regulatory Capital Instruments Issuances During Quarter)

For all capital instruments except for common stock that were issued during the quarter, include as a separate attachment to the schedule submission the prospectus supplement, certificate of designation, or the indenture for the instrument.

Supporting Documentation for Schedule D – Regulatory Capital Transitions

Additional Information Required for Each Planned Action (Tied to D.6)

In addition to the information provided within the Planned Action worksheet, BHCs and IHCs are also required to submit additional information related to the actual progress made on its planned actions through the report date.

At a minimum, the document should address the following:

- The status of the action during the reporting quarter, and how it compares to the BHC’s or IHC’s projection for the planned action to date. This should state whether the BHC or IHC is on-track in terms of meeting its planned action strategy relative to the impact it projected for the corresponding action in its most recent FR Y-14A Regulatory Capital Transitions schedule submission, and/or how it has deviated from the strategy and the rationale behind the changes.

- The supplemental document should also describe in detail any new actions the BHC or IHC has taken, which was not part of its proposed planned actions as submitted per the FR Y-14A Regulatory Capital Transitions schedule.

This quarterly information related to each planned action must be provided in a separate attachment and should be titled: BHCRSSD_BHCMNEMONIC_REGCAPTRANS_QTRLYUPDATE_ACTION#_YYMMDD.
Note that the “#” in this file name must correspond with the appropriate “Action #” in column A of the Planned Actions Worksheet of the most recent FR Y-14A submission.

Supporting Documentation for Schedule L – Counterparty

The supporting document should be titled BHCRSSD_BHCMNEMONIC_CCR_METHODODOLOGY_YYMMDD. BHCs and IHCs should submit separate documents for different models and/or methodologies. The documents should be titled: BHCRSSD_BHCMNEMONIC_CCR_METHODODOLOGY_MODELTYPE_YYMMDD. Model Type refers to Trading Issuer Default, CVA and Counterparty Default Losses. These instructions are also provided in the FR Y-14A instructions.

The documentation should include a detailed description of the methodologies used to estimate Trading Issuer Default, CVA, and Counterparty Default losses under the stress scenarios reported on the FR Y-14A Summary schedule as well as methodologies used to produce the data in the FR Y-14Q CCR schedule (only for the CCAR as of quarter). All information relevant for supervisors to understand the approach should be included, and it should be transparent in the documentation where to find the response to each item. Any differences between the BHC or IHC and the FR scenarios in methodology, position capture, or other material elements of the loss modeling approach should be clearly described. It is expected that for some BHCs or IHCs, there will be BHC or IHC-specific or other material methodological items in addition to those specifically listed in the instructions. These additional items should be included in the documentation as
well.

As part of the detailed methodology document, BHCs and IHCs should provide an Executive Summary that gives an overview of each model and answers each of the questions below. If one of the questions below is not fully addressed in the Executive Summary, cite the document name and page number(s) of the methodology document that fully addresses the question.

In addition to the Executive Summary, there should be a section of the methodology document devoted to any divergence from the instructions to the Counterparty Risk sub-schedule or the FR_Y-14A Schedule. Use this section to explain any data that is missing or not provided as requested. This section should also be used to describe where and how judgment was used to interpret an instruction.

Supporting documentation for a given model should be submitted at the same time as the loss estimates derived from that model. For example, Trading IDR supporting documentation should be submitted along with FR Y-14Q Schedule F and CVA and Default Loss supporting documentation should be submitted along with FR Y-14Q Schedule L.

**Trading Issuer Default Losses (Trading IDL)**

1. **Data and systems**
   a. What product types are included and excluded? Specifically, comment on whether equities are excluded and what types of securitized products, if any, are excluded. Comment on the materiality of any exclusions.
   b. Are there any issuer type exclusions? Comment on the materiality of any exclusions.
   c. Are there any exposure measurement or trade capture limitations impacting the Trading IDL estimate in Item 1 on the Counterparty Risk sub-schedule in the SUMMARY_SCHEDULE or the data provided in sub-schedules Corporate Credit-Advanced, Corporate Credit-EM, Sovereign Credit, Credit Correlation, IDR-Corporate Credit, or IDR-Jump To Default in the FR_Y-14Q_TRADING Schedule? If so, please elaborate in the documentation, particularly where these limitations understate losses.
   d. Are there any discrepancies in position capture between the MV and Notionals reported in sub-schedules Corporate Credit-Advanced, Corporate Credit-EM, Sovereign Credit, Credit Correlation, or IDR- Corporate Credit in the FR_Y-14Q_TRADING Schedule? If so, please elaborate on the discrepancies in the documentation.
   e. Are any index or structured exposures decomposed/unbundled into single name exposures on the IDR Corp Credit or IDR Jump to Default sub-schedules in the FR_Y-14Q_TRADING Schedule? If so, provide a description of the exposures that are decomposed and the methodology used.
   f. What types of CVA hedges are included in the FR_Y-14Q_TRADING Schedule and Item 10 on the Trading sub-schedule of the SUMMARY_SCHEDULE (e.g., market risk hedges, counterparty risk hedges)? Which, if any, of these hedges are excluded from the Trading IDR loss estimates (Item 1 on the Counterparty Risk sub-schedule of the SUMMARY_SCHEDULE)? Confirm that hedges modeled in Trading IDR are excluded from CCR IDR.

2. **PD methodology**
   a. How is the severity of default risk treated? Is a stressed expected PD used, or is it an outcome in the tail of the default distribution? If an outcome in the tail is used, what is the tail percentile?
   b. How is default risk represented over the horizon of the stress test? Is a cumulative two-year PD or a one-year PD used as a model input? How is migration risk captured?
   c. What data sources and related time periods are used to generate the assumptions on stressed expected PD or the default distribution? In the documentation, provide a breakdown of PDs (e.g., by...
rating, asset category). Provide stressed PDs if a stressed PD is used, or provide PD inputs if an outcome in the tail is used.

3. **Correlation assumptions**

a. What correlation assumptions are used in the Trading IDL models?

4. **LGD methodology**

a. Do the models assume a static LGD or a stochastic LGD with a non-zero recovery rate volatility?
   i. If a static LGD is used, were the mean LGDs stressed? What data sources and related time periods were used to determine the LGDs? In the methodology documentation, provide the relevant breakdown of LGDs used in the model (e.g., by ratings, asset category).
   ii. If a stochastic LGD is used, elaborate on the assumptions generating the stochastic LGD in the documentation, including assumptions on the LGD mean and volatility and rationale for modeling choices.

5. **Liquidity horizon**

a. What liquidity horizon assumptions are used?

6. **Exposure at default (EAD)**

a. What Exposure at Default (EAD) is used for Trading IDL? For example, is the calculation based on actual issuer exposures, stressed exposures, a mix of both, or something else? If exposures are stressed, please explain how the exposures were stressed.

7. **Treatment of gains**

a. Are any gains being reflected in the Trading IDL calculations? If so, elaborate in the documentation how gains are treated.

8. **Model validation and documentation**

a. For any models used to report numbers in the SUMMARY_SCHEDULE or the FR_Y-14Q_Trading that are also used in Business as Usual (BAU) production, have those models been validated as used in BAU? If so, attach model validation documents. If not, elaborate in the documentation on any review process.
   b. For any ad-hoc models used for CCAR that would not have been previously validated, what review if any has occurred? Elaborate in the documentation where appropriate.

**CVA Losses**

1. **Divergence from instructions**

a. In the FR_Y-14Q_CCR or Summary Schedules, is bilateral CVA included in any element of the submission (i.e., CVA where the counterparty default probabilities are conditional on the survival of the BHC or IHC)? If so, elaborate in the documentation.
   b. Are CVA hedges considered or included in any aspect of the firm’s CVA loss reporting or CVA
calculations? If so, please provide detail and document where CVA data are reported net of hedges on the FR_Y_14Q_CCR Schedule or Item 2 on the Counterparty Risk sub-schedule in the SUMMARY_SCHEDULE.

c. In calculating Stressed Net CE in sub-schedules 1a, 1b, 1c, 1d, and 1e in FR_Y-14Q_CCR, are there any occasions where it is assumed additional collateral has been collected after the shock? If so, elaborate in the documentation.

d. Are there any counterparties for which your firm did not fully implement the FR specification for the EE profiles on sub-schedule 2 in the FR_Y-14Q_CCR? If so, elaborate in the documentation.

e. Are there any counterparties for which your firm substituted ‘Country of Risk’ for ‘Country of Domicile’ in the FR_Y-14Q_CCR? If so, elaborate in the documentation.

2. Data and systems

In the documentation, clearly identify, describe, and comment on the materiality (in both exposure and CVA loss terms) of any exclusions that prevent 100% capture of counterparties or trades. At a minimum, address the questions below and elaborate in the documentation where appropriate.

a. As firms are required to report only counterparties comprising 95% of CVA on sub-schedule 1a of FR_Y-14Q_CCR, please provide detailed information on the composition of counterparties comprising the remaining 5%, including any relevant industry concentrations or counterparties with significant default risk.

b. Are any counterparties on sub-schedule 1a of FR_Y-14Q_CCR excluded from sub-schedule 2? Where specific counterparties are reported as Top counterparties by 95% of Total CVA on one sub-schedule of the Schedule, but are not listed on other sub-schedules, list these counterparties in the documentation by name and provide a reason for their exclusion.

c. Are any counterparties excluded from the unstressed or stressed aggregate data reported in sub-schedules 1e, 2, or 3 of FR_Y-14Q_CCR or the losses reported in the SUMMARY_SCHEDULE SUMMARY_SCHEDULE (Item 2 in the Counterparty Risk sub-schedule)? In the documentation, elaborate on the nature, materiality, and rationale for these exclusions.

d. Please ensure that the methodology documentation includes a description of how stressed or unstressed discount factors are included in the CVA calculation.

e. Do the expected exposure (EE) profiles, CDS spreads, PDs, LGDs, discount factors, as provided on sub-schedule 2, come from the same systems as those used for the calculation of CVA losses as provided in the SUMMARY_SCHEDULE (Item 2 in the Counterparty Risk sub-schedule)? If not, elaborate in the documentation.

f. For unstressed and stressed CVA reported in the FR_Y-14Q_CCR Schedule, which counterparties, counterparty types, or trade types are calculated offline or using separate methodologies? Why are they calculated offline or with a different methodology? Elaborate in the documentation.

g. Are any add-ons used to calculate stressed CVA in the FR_Y-14Q_CCR Schedule? Elaborate regarding the nature and rationale for each type of add-on in the documentation.

h. Are there any additional/ offline CVA reserves reported in sub-schedule 1e in theFR_Y-14Q_CCR Schedule? If so, elaborate about the nature of these reserves in the documentation. Explain what counterparties, counterparty types, or trade types are included, why are they calculated as reserves, and how they are stressed.

i. Are there any exposure measurement or product capture limitations impacting the loss estimate in Item 2 on the Counterparty Risk sub-schedule in the SUMMARY_SCHEDULE? If so, make sure to elaborate in the documentation, particularly where these limitations understate losses.

j. Does the firm conduct a reconciliation between the sum of items 15(a) in Schedule HC-L of the FRY-9C and the aggregate unstressed Gross CE on sub-schedule 1e of the FR_Y-14Q_CCR Schedule? Note that the figures in the FRY-9C are called "net current credit exposure", as the "net" refers to counterparty netting.
k. Are all sensitivities/slides provided as requested? If slides are not provided as requested in the FR_Y-14Q_CCR Schedule, elaborate in the documentation why they are missing or not provided correctly.

l. Are the sensitivities/slides provided in sub-schedule 4 of FR_Y-14Q_CCR sourced from the same calculation engine and systems as used for the firm’s loss estimates (Item 2 in the Counterparty Risk sub-schedule in the SUMMARY_SCHEDULE)? If not, elaborate in the documentation.

m. Elaborate on how sensitivities/slides in sub-schedule 4 of FR_Y-14Q_CCR were determined to be material. What qualifies a risk factor as immaterial?

3. LGD methodology

a. For the LGD used to calculate PD, are market implied recovery rates used? If not, elaborate on the source of the LGD assumption in the methodology documentation.

b. Is the same recovery/LGD used in the CVA calculation as is used to calculate PDs from the CDS spread? If not, in the documentation provide a detailed rationale and backup data to support the use of a different LGD, and provide the source of the LGD used to calculate CVA.

4. Exposure at default (EAD)

a. What Margin Period of Risk (MPOR) assumptions are used for unstressed and stressed CVA?

b. Are collateral values stressed in the numbers reported in the FR_Y_14Q_CCR Schedule or Items 2 or 3 on the Counterparty Risk sub-schedule in the SUMMARY_SCHEDULE? If so, elaborate on the stress assumptions applied.

c. In the FR_Y-14Q_CCR sub-schedule 2, for the BHC or IHC specification, are downgrade triggers modeled in the exposure profiles?

5. Application of shocks

a. Are the shocks applied to CVA (for calculating Item 2 in the Counterparty Risk sub-schedule in the SUMMARY_SCHEDULE as well as the Stressed figures reported in FR_Y-14Q_CCR) the same as those applied to the Trading Book (Item 10 in the Trading sub-schedule in the SUMMARY_SCHEDULE)? Where they differ, or where shocks applied diverge from the FR shock scenario, elaborate in the documentation.

6. Model validation and documentation

a. For any models used to report numbers in the SUMMARY_SCHEDULE or the FR_Y-14Q_CCR that are also used in Business as Usual (BAU) production, have those models been validated as used in BAU? If so, attach model validation documents. If not, elaborate in the documentation on any review process.

b. For any ad-hoc models used for CCAR that would not have been previously validated, what review if any has occurred? Elaborate in the documentation where appropriate.

Counterparty Default Losses (CDL)

1. Data and systems

a. Are there any exposure capture or measurement limitations related to counterparties, products or trades impacting the loss estimate in Item 3 on the Counterparty Risk sub-schedule in the SUMMARY_SCHEDULE? If so, please elaborate in the documentation, particularly where these limitations understate losses.
b. What types of CVA hedges are included in CDL? Confirm that hedges modeled were excluded from Trading IDL.

2. PD methodology (if applicable)
   a. How is the severity of default risk treated? Is a stressed expected PD used, or is it an outcome in the tail of the default distribution? If an outcome in the tail is used, what is the tail percentile?
   b. How is default risk represented over the horizon of the stress test? Is a cumulative two-year PD or a one-year PD used as a model input? How is migration risk captured?
   c. What data sources and related time periods are used to generate the assumptions on stressed expected PD or the default distribution? In the documentation, provide a breakdown of PDs (e.g., by rating, counterparty type). Provide stressed PDs if a stressed PD is used, or provide PD inputs if an outcome in the tail is used.

3. Correlation assumptions (if applicable)
   a. What if any correlation assumptions are used calculating Default Losses?

4. LGD methodology (if applicable)
   a. Do the models assume a static LGD or a stochastic LGD with a non-zero recovery rate volatility?
   b. If a static LGD is used, are the mean LGDs stressed? What data sources and related time periods are used to determine the LGDs? In the methodology documentation, provide the relevant breakdown of LGDs used in the model (e.g., by ratings, counterparty type).
   c. If a stochastic LGD is used, elaborate on the assumptions generating the stochastic LGD in the documentation, including assumptions on the LGD mean and volatility and rationale for modeling choices.

5. Liquidity horizon (if applicable)
   a. What liquidity horizon assumptions are used?

6. Exposure at default (EAD) (if applicable)
   a. Provide an overview of how EAD is modeled for Default Losses?
   b. Are any downgrade triggers assumed in the Default Loss model? If so, elaborate in the documentation.
   c. What Margin Period of Risk (MPOR) assumptions are modeled in Default Losses?

7. Treatment of gains (if applicable)
   a. Are any gains being reflected in the Default Losses calculations? If so, elaborate in the documentation how gains are treated.

8. Model validation and documentation
   a. For any models used to report numbers in the SUMMARY_SCHEDULE or the FR_Y-14Q_CCR that are also used in Business as Usual (BAU) production, have those models been validated as used in BAU? If so, attach model validation documents. If not, elaborate in the documentation on any review process.
   b. For any ad-hoc models used for CCAR that would not have been previously validated, what review if any has occurred? Elaborate in the documentation where appropriate.
9. Other

As the firm considers any additional firm-wide losses beyond OTC derivative and SFT transaction losses that could result from the default or potential default of a counterparty or counterparties, please detail and document those losses.

**Supplemental Data Collection**

Please provide a detailed description of the data provided in each table of the supplemental data collection schedule.
